PENSYL
MARYLAND
The Ohio or Fair River called also by the English Alliganey
Elks Eye Creek
Fort taken in 1754 called by the French Fort du Quesne now Pittsburg
West Bounds of Pensilvania
Yawyawganey River
There is a Treaty now on Foot between the Colony and the Six Nations, by which it is expected that all this Tract of Country, containing 9 or 10,000,000 of Acres, lying between the Ohio River and the Konhaway, will be ceded to Great Britain. It is here laid down from the best Information that could be obtained.

A Concise Account of the Number of Inhabitants,

In the Colony of Virginia, are 131,000 Tithables, 55,958 of which number are white Men, and the residue consists of Negro Men and Women; It will I suppose be reckoned a very moderate computation to allow three Children for every pair of Negros Tithable, if so the Number of Negro Slaves will amount to 187,606, and as none but White Men are listed as Tithables, we must suppose that there are 50,863 Women; the proportion between the Sexes being commonly stated as 11 to 10, and allowing three Children to every Woman there will be 152,589 Children; consequently the number of Inhabitants White and Black in Virginia will amount to 447,008, a number greatly exceeding any of the Colonies in America. As to the Value of this great number of Slaves, we can only make a probable computation founded on Principles well known and admitted in the Colony: A Negro Man or Woman, between 16 and 40 Years of Age is reckoned now worth Fifty Pounds, (tho' 3 or 4 Years ago they went at double, that Price) reckoning then the above number of Negros Tithables but at 40 Pounds each they will amount to 3,001,680 Pounds Virginia Currency, & as to the residue valuing them but at 30 L.s each they will amount to 3,376,890 L.s & all of them to 6,378,570 Pounds. As to the Trade of the Colony, its Staple is Tobacco; & tho' it does not yeild much to the Planter, notwithstanding that between 50 and 60,000 Hogsheads are communibus Annis, exported to Great Britain, yet as 17,000 Tons of Shipping are employed, and many thousand British Inhabitants supported thereby, it is very valuable to the Subjects, & may also be said to be a Jewel to the Crown as so large a Sum arises out of the Duties. The Country indeed is very capable of improvement and some attempts have been made to raise Hemp though not considerable, the Soil however is very proper for such production. As to the Drink chiefly used in the Colony, it is generally Cyder, every Planter having an Orchard, and they make from 4,000 to 5 or 6,000 Gallons annually, in proportion according to their Rank and Fortune. As to the Soil it is very different in different Parts, that which lies upon the Rivers & their Branches
