CIRCULAR No. 183

A Bibliography of Recent Literature Concerning
Plant-Disease Prevention

By CHARLES C. REES and WALLACE MACFARLANE

And

A Bibliography of Non-Parasitic Diseases
of Plants

By CYRUS W. LANTZ

URBANA, ILLINOIS, MAY, 1915

A Bibliography of
Recent Literature Concerning
Plant-Disease Prevention

BY

CHARLES C. REES and WALLACE MACFARLANE

PREFACE

In assembling this bibliography, an attempt has been made to include references to every article relating to plant diseases in which control measures are given, the abstract of which has appeared in the Experiment Station Record during the years 1909-14 inclusive.

The classification of the citations, about a thousand in number, has been made under headings of the various hosts arranged in alphabetical order. Under each host the references have been arranged alphabetically according to the common name of the disease when given. No attempt has been made to supply these names, and where they were missing the references are listed under the generic name of the fungus; for instance, an article discussing *Pleospora graminea*, which gave no common name to the disease, is listed under *Pleospora*. In every case where the generic name of the fungus was given, or where it could be supplied with reasonable certainty, it is included in parentheses after the common name of the disease. In many instances authors in discussing a disease caused by a certain fungus gave to the disease different common names; for instance, the disease of Irish potato caused by the fungus *Synchytrium endobiotica* was found referred to by different authors as wart, canker, black canker, and black scab. In such cases it was necessary to select the name most generally accepted and list the various references thereunder. Under each disease the citations have been placed in alphabetical order according to the name of the author.

In order to include as many pertinent references as possible, a general host classification under the headings of citrus fruits, field crops, et cetera, has also been employed. In addition to this there appears a set of references pertaining to fungicides.

Each article includes reference to the original article and to the Experiment Station Record in which the article was found abstracted. The latter reference, in which the first number indicates the volume and the second the page, is placed in parentheses.

A BIBLIOGRAPHY OF RECENT LITERATURE CONCERNING PLANT-DISEASE PREVENTION

BY CHARLES C. REES, ASSISTANT IN FLORICULTURAL PATHOLOGY RESEARCH, AND WALLACE MACFARLANE, FELLOW IN AGRONOMY¹

ACACIA

Root Disease (*Armillaria-Fomes*)

PETCH, T.

Circs. and Agr. Jour. Roy. Bot. Gard., Ceylon, 5 (1910), 10, 89. (25, 47)
Uproot and burn the diseased trees.

ALFALFA

Diseases, General

STEWART, F. C., FRENCH, G. T., and WILSON, J. K.
N. Y. (Geneva) Sta. Bul. 305. (20, 846)

Blight (*Pseudomonas*)

SACKETT, W. G.

Colo. Sta. Bul. 158. (23, 546) Introduce resistant varieties that will stand late spring frosts. Clip off frosted alfalfa as soon as danger of frost is passed, which will afford an early growth of a new cutting.

Club Root (*Urophlyctis*)

KORFF, G.

Prakt. Bl. Pflanzenbau u. Schutz, n. ser., 7 (1909), 21, 157. (23, 248)

SALMON, E. S.

Jour. Southeast Agr. Col. Wye, 1907, 16, 267. (20, 845)

Rust (*Uromyces*)

PAMMEL, L. H., and KING, C. M.

Ia. Sta. Bul. 131. (27, 445)

Stem Rot (*Rhizoctonia*)

LAURER, G.

Illus. Landw. Ztg., 30 (1910), 46, 439. (23, 741) Liquid manure, quicklime, and creosol recommended.

¹Working under the direction of Dr. F. L. Stevens, Professor of Plant Pathology, University of Illinois.

ALMOND

Diseases, General

ARNAUD, G.Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 15, 451. (21, 245)**APPLE**

Diseases, General

BROOKS, C.

N. H. Sta. Bul. 144. (22, 747)

McCORMACK, E. F.Ann. Rpt. State Ent. Ind., **3** (1909-10), 128. (25, 45)**MORSE, W. J., and LEWIS, C. E.**

Me. Sta. Bul. 185. (24, 745)

PRILLIEUX, E.Bul. Soc. Nat. Agr. France, **68** (1908), 5, 286. (20, 453)**REED, H. S., COOLEY, J. S., and ROGERS, J. T.**

Va. Sta. Bul. 195. (27, 152)

STEVENS, F. L.

N. C. Sta. Bul. 206. (23, 453)

STEWART, F. C.West N. Y. Hort. Soc. Proc., **56** (1911), 61. (26, 55) Keep trees in vigorous condition and spray regularly and thoroly.**SWINGLE, D. B.**Mont. Sta. Circ. **37**. (31, 644)Anthracnose (*Glaeosporium*)**CORDLEY, A. B.**Better Fruit, **4** (1909), 4, 13. (22, 349) Spray with Bordeaux soon after fruit is gathered. Spray again after the leaves have fallen with Bordeaux or lime sulfur.**JACKSON, H. S.**Ore. Sta. Bien. Crop Pest and Hort. Rpt. 1911-12, 178. (29, 153) Control measures given in Exp. Sta. Rec., **29**, 249.Ore. Sta. Circ. **17**. (27, 249) Apply 4-4-50 Bordeaux in fall before rains, and 6-6-50 Bordeaux as soon as fruit is picked. Give an additional spraying earlier in the season if disease is bad. Cut out cankers.**LAWRENCE, W. H.**Bien. Rpt. Bd. Hort. Ore., **12** (1911-12), 93. (31, 53) Repeated spraying recommended. Spray in autumn following maturity of fruit. Bordeaux-petroleum emulsion gives promise.**LOWNSDALE, M. O.**Better Fruit, **5** (1910), 1, 44. (23, 745) To prevent new infection during the succeeding year, spray in September with a solution of 1 gallon of lime sulfur in 18 gallons of water.

Bitter Rot (*Glomerella*)

LAUBERT, R.

Deut. Obstbau Ztg., 1910, 14, 175. (23, 548)

LOUNSBURY, C. P.

Agr. Jour. Cape Good Hope, 37 (1910), 4, 355. (24, 348)

WOLF, F. A.

Proc. Ala. State Hort. Soc., 9 (1912), 69. (27, 546)

Blister Canker (*Nummularia*)

GLOYER, W. O.

Ohio (Wooster) Sta. Circ. 125. (27, 749) Remove and destroy all diseased parts. Cover wounds after pruning with asphaltum or grafting wax.

PAMMEL, L. H., and KING, C. M.

Ia. Sta. Bul. 131. (27, 445)

Blotch (*Phyllosticta*)

LEWIS, D. E.

Kans. Sta. Bul. 196. (31, 53) 3-4-50 Bordeaux recommended. Lime sulfur found to be less effective than Bordeaux except in wet weather, when Bordeaux has a tendency to russet the fruit.

SCOTT, W. M., and RORER, J. B.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 144. (20, 1044) Apply 5-5-50 Bordeaux three weeks after petals have fallen. Follow with three applications at intervals of two weeks.

Canker (*Sphaeropsis*)

BROOKS, C., and DEMERITT, M.

Phytopath., 2 (1912), 5, 181. (28, 548) Plow under diseased leaves. Apply Bordeaux and lime sulfur.

DUCLOUX, A.

Rev. Hort. (Paris), 82 (1910), 21, 506; 22, 520. (24, 450)

EVANS, I. B. P.

Transvaal Agr. Jour., 7 (1908), 25, 62. (20, 848) Destroy all decayed fruit, prune out cankers, and spray with Bordeaux.

HESLER, L. R.

Proc. Ind. Acad. Sci., 1911, 325. (29, 752) Prune off diseased limbs below point of attack. Select for planting nonsusceptible varieties.

MCREADY, S. B.

Ann. Rpt. Ontario Agr. Col. and Expt. Farm, 35 (1909), 41. (23, 351) Good cultivation, thoro spraying, careful cutting out of all cankers, and destruction of diseased rubbish recommended.

SALMON, E. S.

Gard. Chron., 3 ser., 47 (1910), 1217, 258. (23, 549)

WOLF, F. A.

Phytopath., 3 (1913), 6, 288. (30, 650) Spray early in season with Bordeaux.

(ANON.)

Bd. Agr. and Fisheries (London) Leaflet 281 (1913). (30, 650) Remove dead branches and leaves and spray with half-strength Bordeaux a week after petals fall, and again one month later.

Crown Gall (*Pseudomonas*)

HEDGCOCK, G. G.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 186. (24, 249) To keep nursery free from disease, leave all diseased trees in the field at the time of digging and burn them as soon as dry. Scions from healthy trees and stocks from seed of sound trees *only* should be used. Avoid wounding of trees during cultivation.

Fire Blight (*Bacillus*)

HALL, J. G.

Wash. Sta. Popular Bul. 56. (29, 848) Remove and burn all diseased parts.

JACKSON, H. S.

Ore. Sta. Circ. 7. (23, 454)

LAWRENCE, W. H.

Bien. Rpt. Bd. Hort. Ore., 12 (1911-12), 107. (31, 53)

PICKETT, B. S.

Ill. Sta. Circ. 172. (31, 644) Remove infected trees, which carry disease over winter.

SWINGLE, D. B.

Mont. Sta. Circ. 2. (23, 352)

(ANON.)

Queensland Agr. Jour., 26 (1911), 5, 266. (25, 455) Spray trees several times during winter with red oil. Follow after foliage appears with a weak kerosene oil emulsion, applied with a brush to cankers on trunk.

Fruit Spot (*Cylindrosporium*)

BROOKS, C.

N. H. Sta. Sci. Contrib. 2, 423. (20, 847) To prevent disease, apply Bordeaux in June or July.

Fruit Spot (*Phoma*)

BROOKS, C.

N. H. Sta. Bul. 157. (27, 849)

LEWIS, C. E.

Me. Sta. Bul. 170. (22, 547)

Leaf Spot (*Cladosporium*)

CHITTENDEN, F. J.

Jour. Roy. Hort. Soc. (London), 33 (1908), 2, 500. (20, 547) To check germination of fungus spores, apply dilute Bordeaux.

Mildew, Powdery (*Podosphaera*)

BALLARD, W. S., and VOLCK, W. H.

U. S. Dept. Agr. Bul. 120, 26. (31, 748) Spray foliage with iron-sulfid solution or with precipitated sulfur. Prune in winter.

BOLL, J.

Deut. Obstbau Ztg., 1912, 3, 47. (26, 750) Lime sulfur, 1-20, recommended.

ERIKSSON, J.

Prakt. Bl. Pflanzenbau u. Schutz, n. ser., 7 (1909), 6, 73; 7, 96. (22, 349)
 Burn all old leaves and affected shoots. Spray with 1-percent copper-sulfate
 solution. One-percent potassium-sulfid solution also recommended. Mix lime
 in soil around trees.

LÜSTNER, G.

Ber. K. Lehranst. Wein, Obst u. Gartenbau Geisenheim, 1909, 120. (24,
 156) Destroy diseased branches on which perithecia are found. Sulfur and
 lime-sulfur spray recommended.

VOLCK, W. H.

Better Fruit, 5 (1911), 8, 39; 9, 60. (25, 145) Iron sulfid recommended as
 a summer spray.

Rust (*Gymnosporangium*)

BARTHOLEMEW, E. T.

Phytopath., 2 (1912), 6, 253. (28, 748) Bordeaux recommended.

FULTON, H. R.

N. C. Sta. Rpt. 1912, 62. (29, 49) For prevention, spray: (1) just after
 leaves emerge from bud, (2) just before blossoms open, (3) just after petals
 fall, and (4) ten days later.

GIDDINGS, N. J.

W. Va. Crop Pest Com. Bul. 2, 7. (30, 651) Destroy all cedars within a
 mile of apple orchard.

— — — and NEAL, D. C.

Phytopath., 2 (1912), 6, 258. (28, 748) Bordeaux recommended.

HEALD, F. D.

Nebr. Sta. Rpt. 1908, 103. (22, 47)

HEIN, W. H.

Insect Pest and Plant Disease Bur. Nebr., Div. Bot. Circ. 1. (21, 644)
 Remove cedar trees and plant resistant varieties of apple.

REED, H. S., COOLEY, J. S., and CRABILL, C. H.

Va. Sta. Bul. 203. (30, 450) Copper lime sulfur and lime sulfur both
 found to be effective.

WOLF, F. A.

Proc. Ala. State Hort. Soc., 9 (1912), 69. (27, 546)

Scab (*Venturia*)

BEATTIE, R. K.

West. Fruit-Grower, 20 (1909), 1, 6. (21, 244) Lime sulfur superior to
 Bordeaux. Solution of 1 pound of sulfur, $\frac{1}{2}$ pound of lime, and 5 gallons of
 water recommended.

— — —
 Phytopath., 4 (1914), 1, 42. (31, 346) Spray thoroly with lime sulfur
 under heavy pressure, twice during the season.

BLODGETT, F. M.

Phytopath., 4 (1914), 1, 44. (31, 449) Dust with sulfur and treat host with
 sulfur suspension in water.

BRETSCHNEIDER, A.

Wiener Landw. Ztg., 59 (1909), 100, 980. (22, 650)

DARROW, W. H.

Phytopath., 3 (1913), 5, 265. (30, 542) The disease may be carried over on young shoots, and the application of some strong fungicide to these before the opening of the leaf buds will reduce infection from this source.

FISCHER, F.

Ztschr. Pflanzenkrank., 19 (1909), 7, 432; abs. in Riv. Patol. Veg., 4 (1910), 7, 97. (23, 151) No immune varieties. Apply Bordeaux in spring before leaves appear.

MCCREADY, S. B.

Ann. Rpt. Ontario Agr. Col. and Expt. Farm, 36 (1910), 42. (25, 549) Apply home-boiled lime sulfur just before leaves open; give second application of commercial lime sulfur at the opening of blossom buds; and spray for the third time with 1-30 commercial lime sulfur when blossoms fall.

MALLY, C. W.

Agr. Jour. Cape Good Hope, 35 (1909), 2, 202. (22, 50) One application of 6-4-50 Bordeaux gave 60 percent sound fruit; two applications gave 90 percent sound fruit; and three applications rendered fruit practically free from disease.

MORRIS, H. E.

Mont. Sta. Bul. 96. (31, 645) Plant resistant varieties and spray thoroly.

NICHOLLS, H. M.

Agr. Gaz. Tasmania, 21 (1913), 10, 387. (30, 541) Plow fallen leaves under early, harrow surface, and leave undisturbed until after November 15. Spray trees early in October with Bordeaux, Burgundy, or lime-sulfur mixture, adding one pound of wheat flour to each gallon of solution in order to promote spreading and adhesion.

SALMON, E. S.

Jour. Bd. Agr. (London), 15 (1908), 3, 182. (20, 950) Wash trees in winter with strong solution of copper sulfate. Apply 4-4-50 Bordeaux in spring.

Jour. Southeast Agr. Col. Wye, 1907, 16, 267. (20, 845)

Jour. Southeast Agr. Col. Wye, 1909, 18, 267. (25, 247) Judicious spraying with 4-100 copper-sulfate solution in February followed by two or three sprayings with Bordeaux controls the disease.

Jour. Southeast Agr. Col. Wye, 1911, 20, 408. (28, 448) Bordeaux recommended over lime sulfur.

SCHANDER, R.

Deut. Landw. Presse, 36 (1909), 7, 63. (21, 54) Bordeaux (2 percent) more efficient than carbolineum ($\frac{1}{2}$ percent).

VOGES, E.

Ztschr. Pflanzenkrank., 20 (1910), 7, 385; rev. in Gard. Chron., 3 ser., 48 (1910), 1250, 432. (24, 450) Apply Bordeaux in spring.

WALLACE, E.

N. Y. (Cornell) Sta. Bul. 335. (30, 848) Lime sulfur recommended.

Rpt. Niagara Sprayer Co. Fellowship, **2** (1909), 10. (22, 650) Lime sulfur, 1-30, as efficient as 3-4-50 Bordeaux and does not cause injury to leaves or fruit.

(ANON.)

Ore. Agr. Col. Bul. 48, 1 ser. (25, 247) Spray with 1-15 lime sulfur when blossoms show pink.

ARROWROOT

Diseases, General

(ANON.)

Agr. News (Barbados), **10** (1911), 237, 174. (25, 654) Destroy diseased plants. Aerate soil thoroly. Rotate with cotton.

ASPARAGUS

Foot Rot (*Zopfia*)

FARNETI, R.

Riv. Patol. Veg., **4** (1910), 18, 273. (25, 44) Burn diseased plants. Disinfect beds with carbon disulfid.

ASTER

Milowia

MASSEE, G.

Roy. Bot. Gard. Kew, Bul. Misc. Inform., 1912, 1, 44. (26, 551) Sterilize seed bed with formalin or steam. Apply coal ashes.

AZALEA

Diseases, General

HARTMANN, J.

Gartenwelt, **14** (1910), 19, 217. (24, 252) Destroy diseased limbs. Spray with copper sulfate, 1½ percent.

Gall (*Exobasidium*)

LAUBERT, L.

Handelsbl. Deut. Gartenbau, **24** (1909), 466; abs. in Bot. Ztg., 2 Abt., **67** (1909), 20-21, 285. (22, 351) Use Bordeaux or sulfur. Remove and destroy diseased parts.

BANANA

Banana Disease (Unnamed)

LEVY, H. Q.

Jour. Jamaica Agr. Soc., **14** (1910), 7, 241. (23, 747)

Blight

McKENNEY, R. E. B.

Abs. in Science, n. ser., **31** (1910), 802, 750. (23, 455)

Smut (*Ustilagenoidella*)

ESSED, E.

Ann. Bot. (London), **25** (1911), 98, 363. (25, 350) Copper sulfate recommended.

BARLEYLate Blight (*Helminthosporium*)

BAKKE, A. L.

Proc. Ia. Acad. Sci., **19** (1912), 93. (29, 750) Keep soil in sanitary condition. Treat seed with formalin.

EDINBURGH and EAST OF SCOTLAND COLLEGE OF AGRICULTURE

Rpt. **30** (1913), 15. (31, 147) Formalin and copper sulfate treatment of seeds greatly reduces late blight.

JOHNSON, A. G.

Phytopath., **4** (1914), 1, 46. (31, 446) Soak seed five hours in cold water, and then for fifteen minutes in water at 52° C.

Pleospora

MORTENSEN, M. L.

Tidsskr. Landbr. Planteavl., **16** (1909), 1, 110. (22, 246) Dip seed 20 times in five minutes in water at 57° C.

Smut (*Ustilago*)

APPEL, O.

Illus. Landw. Ztg., **29** (1909), 55, 521. (22, 48) Hot-water treatment recommended.

— — — and RIEHM, E.

Arb. K. Biol. Anst. Land u. Forstw., **8** (1911), 3, 343. (26, 546) Soak seed in water at 50° C. for seven to ten minutes, then expose to air at 50° C. for five minutes only.

BROILI, J.

Naturw. Ztschr. Forst u. Landw., **8** (1910), 7, 335. (23, 741)

— — — Naturw. Ztschr. Forst u. Landw., **9** (1911), 1, 53. (24, 647)

HEALD, F. D.

Nebr. Sta. Rpt. 1907, 45. (20, 450) Formalin, 1-25, hot water, and copper sulfate recommended.

GISEVIUS, P., and BÖHMER

Illus. Landw. Ztg., **30** (1910), 77, 725. (24, 346) Drying apparatus to be used in hot-air method described.

KÜHLE, L.

Illus. Landw. Ztg., **28** (1908), 67, 578. (20, 947) Soak seed in water at 65° C. for twelve minutes.

SPERLING, J.

Illus. Landw. Ztg., **30** (1910), 9, 66. (23, 46) Soak seed in water at 25° C. for four hours, and then expose to air at 50° C. for thirty minutes.

TEPIN, H.

Sveriges Utsädesför. Tidskr., **19** (1909), 2, 119. (22, 246) Hot-water treatment recommended.

BEAN

Diseases, General

WHETZEL, H. H.

N. Y. (Cornell) Sta. Bul. 255. (20, 546) Select clean seed.

Anthracnose (*Colletotrichum*)

EDGERTON, C. W.

La. Sta. Bul. 116. (21, 549) Select clean seed.

MUNCIE, J. H.

Mich. Sta. Special Bul. 68. (31, 542)

QUERNER, H.

Ztschr. Landw. Kammer Braunschweig, 77 (1908), 31, 367. (20, 648)
Good drainage, clean seed, and application of ammoniacal copper carbonate as a preventative, recommended.

VON DIAKONOFF, H.

Geisenh. Mitt. Obst u. Gartenbau, 24 (1909), 4, 57. (22, 546)

WILCOX, E. M., and TEMPLE, C. E.

Insect Pest and Plant Disease Bur. Nebr., Div. Bot. Circ. 6. (21, 642)
Remove and burn diseased plants.Blight (*Alternaria*)

FERRARIS, T.

Riv. Patol. Veg., 3 (1909), 16, 241. (20, 1138) Bordeaux or soda Bordeaux recommended.

Blight (*Pseudomonas*)

EDGERTON, C. W., and MORELAND, C. C.

La. Sta. Bul. 139. (28, 846) Select clean seed and treat with corrosive sublimate before planting.

MUNCIE, J. H.

Mich. Sta. Special Bul. 68. (31, 542)

Mildew, Downy (*Plasmopara*)

JARVIS, C. D.

Conn. Storrs Sta. Rpt. 1908-09, 31. (22, 743) 2-2-50 Bordeaux recommended.

Rust (*Uromyces*)

FUSCHINI, C.

Revista (Conegliano), 4 ser., 17 (1911), 19, 443; abs. in Internat. Inst. Agr. (Rome), Bul. Bur. Agr. Intel. and Plant Diseases, 2 (1911), 11-12, 2600. (27, 47)
Apply iron sulfate to soil.

GASSNER, G.

Rev. Secc. Agron. Univ. Montevideo, 1908, 4, 125. (22, 746)

BEET

Diseases, General

BUSSE, W., and ULRICH, P.

Mitt. K. Biol. Anst. Land u. Forstw., 1909, 8, 21. (23, 348)

SCHANDER, R.

Deut. Zucherindus., **35** (1910), 5, 110; abs. in Centbl. Bakt. (etc.), 2 Abt., **27** (1910), 10, 307. (23, 745)

STIFT, A.

Centbl. Bakt. (etc.), 2 Abt., **23** (1909), 6, 173. (22, 347)

STÖRMER, K.

Bl. Zuckerrübenbau, **15** (1908), 16, 247; 17, 264; 18, 279. (21, 52)

WOHANKA & Co.

Ann. Amer. Rpt. Sugar Beet Seed Breeding Sta., **3** (1910), 30. (26, 648)

Club Root (*Urophlyctis*)

GRIFFON and MAUBLANC

Bul. Trimest. Soc. Mycol. France, **25** (1909), 2, 98. (21, 642)

Damping-off

STIFT, A.

Österr. Ungar. Ztschr. Zuckerindus. u. Landw., **40** (1911), 2, 211. (25, 349)

STÖRMER, K., and EICHINGER, A.

Fühling's Landw. Ztg., **59** (1910), 12, 393; abs. in Bl. Zuckerrübenbau, 17 (1910), 14, 229; 15, 245. (24, 248) Lime, phosphoric acid, and either table salt or potash recommended.

Heart Rot (*Phoma*)

BUSSE, W., and ULRICH, P.

Mitt. K. Biol. Anst. Land u. Forstw., 1909, 8, 21. (23, 348) When tested, ammonium salts showed no advantage over saltpeter.

GRIFFON and MAUBLANC

Bul. Trimest. Soc. Mycol. France, **25** (1909), 2, 98. (21, 642)

HEGYI, D.

Ztschr.-Pflanzenkrank., **21** (1911), 5, 269. (26, 548) Dry the seed, fertilize plants, and cultivate properly.

KÄPPELI, J., and MORGENTHALER, O.

Landw. Jahrb. Schweiz, **27** (1913), 8, 432. (31, 344) Employ least susceptible varieties. Plant other and non-susceptible crops between beets and dusty roadside.

KRÜGER, W.

Bl. Zuckerrübenbau, **16** (1909), 24, 369. (23, 248) Apply to soil humus and a nitrogenous fertilizer that will give an acid reaction.

LABBÉ, G.

Bul. Assoc. Chim. Sucr. et Distill., **28** (1910), 1, 119. (24, 155) The addition of nitrogenous fertilizers increases the disease. Heart rot is more intense during dry periods and less active with plants low in sugar content. Phosphoric acid, humus, and lime in various proportions recommended.

LINHART, G.

Monatsh. Landw., **1** (1908), 356; abs. in Bot. Centbl., **110** (1909), 18, 473. (23, 248)

PETERS, L.

Mitt. K. Biol. Anst. Land u. Forstw., 1909, 8, 25. (23, 248)

STIFT, A.

Österr. Ungar. Ztschr. Zuckerindus. u. Landw., 40 (1911), 2, 252. (25, 349)

Leaf Spot (*Cercospora*)

GRIFFON and MAUBLANC

Bul. Trimest. Soc. Mycol. France, 25 (1909), 2, 98. (21, 642)

POOL, V. W., and MCKAY, M. B.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 121, 13. (29, 48) Remove tops from the field while still green and make into silage. This process kills the fungus.

Mildew, Downy (*Peronospora*)

GRIFFON and MAUBLANC

Bul. Trimest. Soc. Mycol. France, 25 (1909), 2, 98. (21, 642)

STÖRMER, K.

Bl. Zuckerrübenbau, 17 (1910), 5, 88. (23, 348)

Root Rot (*Pythium*)

BUSSE, W.

Bl. Zuckerrübenbau, 15 (1908), 19, 297. (20, 546)

HEGYI, D.

Bul. Trimest. Soc. Mycol. France, 27 (1911), 2, 153; abs. in Bot. Centbl., 119 (1912), 1, 19. (26, 747) Maintain water content of 10 percent or less.

RIEHM, E.

Bl. Zuckerrübenbau, 16 (1909), 10, 145. (22, 347) The soaking of seed for various lengths of time in phenol, formalin, Bordeaux, copper-soda mixture, or copper sulfate is better than hot-water treatment.

STÖRMER, K.

Bl. Zuckerrübenbau, 17 (1910), 5, 88. (23, 348) Lime recommended.

Root Rot (*Rhizoctonia*)

BRIEM, H.

Ztschr. Zuckerindus, Böhmen, 36 (1911), 1, 23. (27, 47) Keep plenty of available lime in the soil and aerate by stirring the soil with a hoe.

ERIKSSON, J.

Rev. Gén. Bot., 25 (1913), 298, 14. (29, 50) Remove from the field all infected plants, disinfect seed, examine and destroy all stored roots that are diseased. Practice long rotation, four years or more.

Rust (*Puccinia*)

POOL, V. W., and MCKAY, M. B.

Phytopath., 4 (1914), 3, 204. (31, 842) Destroy salt grass, which is quite common along roadsides and ditches.

Rust (*Uromyces*)

GRIFFON and MAUBLANC

Bul. Trimest. Soc. Mycol. France, **25** (1909), 2, 98. (21, 642)

Yellows (*Bacillus*)

MALAQUIN, A., and MOITIÉ, A.

Engrais, **29** (1914), 9, 241. (31, 243) Dry seed at from 40° to 55° C. to a water content of about 7 percent. A rigorous selection of the roots to be used for the production of seed is advised.

BLACKBERRY

Anthracnose (*Glaeosporium*)

LAWRENCE, W. H.

Wash. Sta. Bul. **97**. (23, 452) To check disease, cut and burn all infected canes. As a preventative, spray with 4-4-50 Bordeaux before leaves appear. Give second application when leaves are expanded.

Crown Gall (*Pseudomonas*)

SWINGLE, D. B.

Mont. Sta. Circ. **37**. (31, 644)

Rust (*Gymnoconia*)

WILSON, G. W.

N. C. Sta. Rpt. 1912, 56. (29, 50)

BREADFRUIT

Disease, Unnamed

STOCKDALE, F. A.

Jour. Bd. Agr. Brit. Guiana, **6** (1912), 1, 14. (28, 153) Collect and burn all diseased fruits. Spray trees with 4-percent copper-sulfate solution or Bordeaux.

BRUSSELS SPROUTS

Club Root (*Plasmiodiphora*)

WORCESTER COUNTY EXPERIMENTAL GARDEN, DROITWICH

Ann. Rpt. 1912; abs. in Jour. Bd. Agr. (London), **20** (1914), 11, 1010. (31, 149) Gas lime or quicklime dug in or left on surface, recommended.

CABBAGE

Diseases, General

BOS, J. RITZEMA, and QUANJER, H. M.

Canker (*Phytophthora*)

RORER, J. B.

Bul. Dept. Agr. Trinidad, 9 (1910), 65, 79. (23, 748)

Bd. Agr. Trinidad and Tobago Circ. 10, 1913, 13. (29, 851) Bordeaux better than severe cutting back. See Exp. Sta. Rec., 20, 1141.

VAN HALL, C. J. J., and DROST, A. W.

Rec. Trav. Bot. Néerland., 4 (1908), 4, 243; Jour. Bd. Agr. Brit. Guiana, 2 (1909), 3, 126; Roy. Bot. Gard. Kew, Bul. Misc. Inform., (1909), 5, 223. (20, 1141)

(ANON.)

Agr. News (Barbados), 9 (1910), 214, 222. (23, 748) Bordeaux recommended.

Dieback (*Diplodia*)

BANCROFT, C. K.

Roy. Bot. Gard. Kew, Bul. Misc. Inform., 1910, 3, 93. (23, 354) Cut out and destroy the diseased branches and parts. Cover wounds with coal tar and clay. Manure and cultivate carefully.

CARNATION

Leaf Disease (*Heterosporium*)

BLIN, H.

Rev. Hort. (Paris), 82 (1910), 5, 104. (23, 153)

Rust (*Uromyces*)

FONDARD, L.

Rev. Hort. (Paris), **82** (1910), 14, 336. (23, 751) Dust thoroly with sulfur and spray with copper sulfate.

Stem Rot (*Fusarium*)

WRIGHT, C. J.

Pomona Col. Jour. Econ. Bot., **2** (1912), 3, 315. (28, 851) Use cuttings from healthy plants; change soil from year to year; protect against extreme heat and moisture; do not injure plants in transplanting.

Stem Rot (*Rhizoctonia*)

BLAKE, M. A., and FARLEY, A. J.

N. J. Sta. Rpt. 1910, 78. (27, 752)

CARROTStem Rot (*Rhizoctonia*)

ERIKSSON, J.

Rev. Gén. Bot., **25** (1913), 298, 14. (29, 50) Remove and destroy all infection. Disinfect seed. Practice four-year rotation.

CASSAVA

Root Rot

DE KRUIJFF, E.

Teysmannia, **21** (1910), 3, 147. (23, 547) Use lime on soil.**CELERY**Blight, Early (*Cercospora*)

STREIGHT, E. M.

Veg. Grower, **2** (1912), 3, 4. (27, 849) Bordeaux.

WINTERS, R. Y.

Fla. Sta. Rpt. 1908, 97. (21, 342)

Fla. Sta. Rpt. 1909, 79. (23, 451) Dry Bordeaux and air-slaked lime both effective.

Blight, Late (*Septoria*)

KLEBAHN, H.

Jahrb. Hamburg. Wiss. Anst., **30** (1912), 3, 1. (30, 847)

Ztschr. Pflanzenkrank, **20** (1910), 1, 1. (22, 746) Bordeaux recommended.

OSBORN, T. G. B.

Jour. Dept. Agr. So. Aust., **16** (1912), 4, 402. (28, 847) Apply dilute Bordeaux or potassium-sulfid solution (1 ounce to 3 gallons of water). Keep storehouse dry and well ventilated. Destroy affected refuse and purchase only fungus-free seeds.

ROGERS, S. S.

Cal. Sta. Bul. 208. (24, 551) Apply 5-6-50 Bordeaux at the rate of 35 gallons per acre when the plants are young. Apply same strength at the rate of 100 gallons per acre when the plants are over 15 inches high. Spray seedlings.

SALMON, E. S.

Gard. Chron., 3 ser., **53** (1913), 1382, 414; 1384, 3. (29, 846) Dip plants in Bordeaux while planting and spray with Bordeaux once in June, in July, and in August.

STREIGHT, E. M.

Veg. Grower, **2** (1912), 3, 4. (27, 849) Bordeaux.

(ANON.)

Jour. Bd. Agr. (London), **16** (1910), 12, 1010. (23, 148) Apply Bordeaux, one-half strength, as soon as disease appears and give one application each week thereafter for three weeks.

(ANON.)

Gard. Chron., 3 ser., **55** (1914), 1418, 150. (31, 344) Copper sprays ineffective. Manuring has no effect. Dry weather and artificial watering are probably beneficial.

Foot Rot (*Sclerotinia*)

WINTERS, R. Y.

Fla. Sta. Rpt. 1908, 97. (21, 342)

Fla. Sta. Rpt. 1909, 79. (23, 451) Dry Bordeaux and air-slaked lime both effective.

Scab (*Phoma*)

KLEBAHN, H.

Ztschr. Pflanzenkrank., **20** (1910), 1, 1. (22, 746) Disinfect soil.

CHERRY

Brown Rot (*Sclerotinia*)

BARNA, B.

Abs. in Internat. Inst. Agr. (Rome), Bul. Bur. Agr. Intel. and Plant Diseases, **3** (1912), 7, 1681. (28, 244) Keep orchards clean and spray.

SALMON, E. S.

Jour. Southeast Agr. Col. Wye, 1907, 16, 267. (20, 845)

Canker (*Cytospora*)

WORMALD, H.

Jour. Southeast Agr. Col. Wye, 1912, 21, 367. (30, 352) Remove and burn diseased parts.

Gummosis (*Pseudomonas*)

BARSS, H. P.

Ore. Sta. Bien. Crop Pest and Hort. Rpt. 1911-12, 198. (29, 154) Use resistant stock. Cut out cankers and remove small infected twigs.

Leaf Scorch (*Gnomonia*)

MARRÉ, E.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **31** (1910), 4, 121. (23, 151) Burn leaves in fall and spray in spring with Bordeaux.

SALMON, E. S.

Jour. Southeast Agr. Col. Wye, 1907, 16, 267. (20, 845)

Leaf Spot (*Cylindrosporium*)

STEWART, V. B.

N. Y. (Cornell) Sta. Circ. 21 (1914). (30, 848) Bordeaux 5-5-50 and lime-sulfur solution, 1 gallon to 50 gallons of water, recommended. The addition of granulated iron sulfate prevents burning.

Mildew, Powdery (*Podosphaera*)

HEIN, W. H.

Insect Pest and Plant Disease Bur. Nebr., Div. Bot. Circ. 2. (21, 643)

Shot-Hole Disease (*Cercospora*)

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 46, 614. (22, 351) Bordeaux or potassium permanganate recommended.

JANEY, P.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 43, 499. (22, 351) Dust shrubs with sulfur.

FIGCanker (*Libertia*)

DALLIMORE, W.

Jour. Bd. Agr. (London), 17 (1910), 1, 47. (23, 454) Cut out infection and burn. Coat wounds with tar.

Macrophoma

WOLF, F. A.

Ann. Mycol., 9 (1911), 6, 622. (26, 449) Remove and burn all diseased twigs and branches early in the season.

FLAXWilt (*Fusarium*)

DALLIMORE, W.

Roy. Bot. Gard. Kew, Bul. Misc. Inform., 9 (1913), 335. (30, 648) A continual rotation of crops is recommended.

GINSENGBlack Rot (*Rhizoctonia*)

OSNER, G. A.

Proc. Ind. Acad. Sci., 1911, 355. (29, 751) Destroy affected parts and apply Bordeaux.

RANKIN, W. H.

Spec. Crops, n. ser., 8 (1909), 87, 208. (22, 246)

Blight (*Alternaria*)

HOWITT, J. E.

Ann. Rpt. Ontario Agr. Col. and Expt. Farm, 38 (1912), 29. (30, 649)

WHETZEL, H. H.

Spec. Crops, n. ser., 11 (1912), 117, 91. (27, 446) 3-3-50 Bordeaux recommended. Lime sulfur found injurious.

_____ and RANKIN, W. H.

Spec. Crops, n. ser., 9 (1910), 93, 327. (23, 547) Bordeaux and Paris green found effective.

_____ and ROSENBAUM, J.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 250. (27, 649)

Fiber Rot (*Thielavia*)

WHETZEL, H. H.

Spec. Crops, n. ser., 8 (1909), 88, 229. (22, 454)

Spec. Crops, n. ser., 8 (1909), 84, 143. (21, 643) Reduce alkalinity of the soil.

_____ and OSNER, G.

Spec. Crops, n. ser., 9 (1910), 97, 411. (24, 153) Reduce alkalinity of the soil by applying acid phosphate.

Root Rot (*Sclerotinia*)

RANKIN, W. H.

Phytopath., 2 (1912), 1, 28. (27, 247) Eradicate affected roots. Disinfect soil with steam or formalin.

GOOSEBERRY

Dieback (*Sclerotinia*)

SALMON, E. S.

Jour. Bd. Agr. (London), 17 (1910), 1, 1. (23, 453) Remove and burn all diseased bushes.

Leaf Spot (*Glaeosporium*)

LÜSTNER, G.

Amtsbl. Landw. Kammer, Wiesbaden, 91 (1909), 15, 102; 16, 107. (22, 746) Bordeaux recommended.

Mildew (*Sphaerotheca*)

DOROGIN, G.

Ztschr. Pflanzenkrank., 23 (1913), 6, 334. (31, 546) Remove and destroy in autumn all parts of plants suspected of being diseased. Follow immediately and again in early spring by spraying plants and earth with 3-percent iron-sulfate solution.

ERIKSSON, J.

Prakt. Bl. Pflanzenbau u. Schutz, n. ser., 6 (1908), 11, 121. (20, 1044)

Deut. Obstbau Ztg., 1909, 22-23, 340; abs. in Centbl. Bakt. (etc.), 2 Abt., 26 (1910), 4-5, 110. (22, 747) Select resistant varieties, and prune and burn infected shoots in fall.

FOEX, E.

Jour. Soc. Nat. Hort. France, 4 ser., 14 (1913), 775; abs. in Jour. Agr. Prat., n. ser., 26 (1913), 49, 717. (30, 750) Cut and burn all affected parts;

turn the soil; spray in autumn with 3-percent Bordeaux and in spring and summer with .2-percent potassium sulfid.

FRON, G.

Ann. Inst. Nat. Agron., 2 ser., 8 (1909), 1, 131. (21, 448)

HEGYI, D.

Rev. Phytopath. Appl., 1 (1914), 22-23, 30. (31, 843) Bordeaux applied once or twice during winter at 5-percent strength and in early spring at 1-percent strength recommended.

HILTNER, L., and KORFF

Prakt. Bl. Pflanzenbau u. Schutz, n. ser., 11 (1913), 6, 73. (29, 850)

KÖCK, G.

Verhandl. K. K. Zool. Bot. Gesell. Wien, 59 (1909), 1-2, 48; 3-4, 49; abs. in Centbl. Bakt. (etc.), 2 Abt., 25 (1909), 19, 519. (22, 743)

Separate from Obstzüchter, 8 (1913). (31, 749) Cut and burn all infected shoots in autumn. Spray with lime sulfur in autumn and again just before foliage appears. Apply sulfur liberally to the disease at any time.

LEMCKE, A.

Separate from Georgine, Land u. Forstw. Ztg., 1909, 39. (22, 348) One-half percent solution of potassium sulfid recommended.

LIND, G.

K. Landtbr. Akd. Handl. och Tidskr., 48 (1909), 1, 33. (22, 247)

LONG, H. C.

Gard. Chron., 3 ser., 52 (1912), 1354, 421. (28, 650) In autumn cut and burn all infected parts. Early in season spray with copper-sulfate solution and later with potassium sulfid.

LÜSTNER, G.

Amtsbl. Landw. Kammer, Wiesbaden, 91 (1909), 15, 102; 16, 107. (22, 746) Bordeaux recommended.

MARCHAL, E.

Ztschr. Pflanzenkrank., 20 (1910), 4, 234. (23, 551) Spray with 35-percent solution of lime sulfur and burn badly diseased branches and canes.

MIDDLETON, T. H.

Bd. Agr. and Fisheries (London), Intel. Div. Ann. Rpt. Proc. 1909-10, 5. (25, 247) In fall or winter remove and burn all infected parts.

Bd. Agr. and Fisheries (London), Ann. Rpt. Intel. Div. 1910-11, pt. 2, 4. (27, 353) Spraying and pruning effective.

OBERSTEIN, O.

Ztschr. Pflanzenkrank., 20 (1910), 8, 449. (24, 649)

SALMON, E. S.

Jour. Southeast Agr. Col. Wye, 1907, 16, 267. (20, 845)

Jour. Southeast Agr. Col. Wye, 1909, 18, 271. (25, 248) To prevent spread of disease in summer time, spray with potassium sulfid.

SALMON, E. S.

Proc. Assoc. Econ. Biol., **1** (1909), 4, 150. (21, 748)

— — — and WRIGHT, C. B. W.

Jour. Bd. Agr. (London), **19** (1913), 12, 994. (29, 249)

STEFFEN

Prakt. Rathgeber Obst u. Gartenbau, 1909, 257; abs. in Ztschr. Landw. Versuchsw. Österr., **13** (1910), 1, 58. (23, 353) Cut and burn affected canes. Spray every ten days with solution of 700 grams potassium sulfid and 100 liters water. Just before leaves appear apply mixture of Bordeaux and potassium sulfid.

SWINGLE, D. B.

Mont. Sta. Circ. **37** (1914). (31, 644)

VINSON, R. S.

Jour. Southeast Agr. Col. Wye, 1911, 20, 427. (28, 448) Spray and prune.

WAGNER

Landw. Ztschr. Rheinprovinz, **11** (1910), 35, 527. (24, 452) During winter cut and burn all infected parts.

WILLIAMS, C. M.

Ann. Rpt. Quebec Soc. Protec. Plants (etc.), **3** (1910-11), 80. (26, 345) Lime sulfur recommended. Potassium sulfid and Bordeaux to be relied upon. (ANON.)

Dept. Agr. and Tech. Instr. Ireland Jour., **8** (1908), 3, 479. Remove and burn affected parts and spray with Bordeaux.

(ANON)

Jour. Bd. Agr. (London), **16** (1909), 2, 117. (21, 447) Spray thoroly; prune and burn all affected shoots.

GRAPE

Diseases, General

BIOLETTI, F. T.

Cal. Sta. Bul. 197. (20, 548)

DE CASTELLA, F.

Jour. Dept. Agr. Victoria, **9** (1911), 6, 394; 7, 462; 9, 651; 10, 673. (26, 244)

MOLZ, E.

Ber. K. Lehranst. Wein, Obst u. Gartenbau Geisenheim, 1907, 316. (21, 52)

NAZARI, V.

Staz. Sper. Agr. Ital., **42** (1909), 9, 609. (23, 650)

Anthracnose

DEGRULLY, L.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **35** (1914), 2, 33. (31, 346) Spray with solution of 8 parts of sulfuric acid and from 10 to 15 parts of iron sulfate to 100 parts of water.

ZACHAREWICZ, E.

Rev. Vit., **39** (1913), 1015, 760. (29, 849) Powdered lime, cement, and mineral superphosphate (2-1-1 by weight) applied three times at intervals of ten days has been found effective.

Anthracnose (*Glaeosporium*)

BOS, J. RITZEMA

Tijdschr. Plantenziekten, 15 (1909), 3-5, 95. (23, 353)

Anthracnose (*Sphaceloma*)

HAWKINS, L. A.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 105. (28, 649) Prune and spray with lime sulfur when dormant. Apply Bordeaux after winter spraying.

PEROLD, A. I.

Agr. Jour. Cape Good Hope, 37 (1910), 4, 370. (24, 350) Dust mixture of lime and sulfur on vines in summer.

Apoplexy (*Polyporus*)

RAVAZ, L.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 45, 574. (22, 247) Cut out diseased tissues and cover wounds with tar.

VINET, E.

Rev. Vit., 32 (1909), 835, 676. (22, 651) Cut out diseased tissues and cover wounds with tar.

Black Rot (*Guignardia*)

CAPUS, J.

Bul. Mens. Off. Renseig. Agr. (Paris), 10 (1911), 4, 456. (25, 550) Bordeaux and Burgundy mixtures recommended.

HAWKINS, L. A.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 65. (24, 50) Disease can be controlled with five applications of 4-3-50 Bordeaux, soap being used in final application.

LEROU, J.

Rev. Vit., 37 (1912), 957, 526. (27, 546)

PRUNET, A.

Rev. Vit., 39 (1913), 1000, 228. (29, 349) Spray with solution of copper sulfate or solution of sulfuric acid until bloom appears.

RAVAZ, L.

Ann. Sci. Agron., 3 ser., 3 (1908), 2, 179. (20, 949) Spray with copper fungicides every ten days during early part of season.

REDDICK, D.

West N. Y. Hort. Soc. Proc., 54 (1909), 127. (22, 651)

SHEAR, C. L., MILES, G. F., and HAWKINS, L. A.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 155. (22, 50) 4-3-50 Bordeaux or copper acetate, 1 pound to 50 gallons of water, recommended.

SOURSAC, L.

Ann. École Nat. Agr. Montpellier, n. ser., 8 (1908), 2, 151; 8 (1909), 3, 161. (21, 52)

TAFT, L. R.

Mich. Sta. Rpt. 1909, 152. (22, 651) Spray with 4-4-50 Bordeaux in early spring. If necessary apply 2-1-50 Bordeaux after July 15.

WILSON, C. S., and REDDICK, D.

N. Y. (Cornell) Sta. Bul. 266. (21, 344) Plow to cover all rotten clusters and leaves, keep down weeds, keep vines off ground, and spray thoroly with 5-5-50 Bordeaux.

Chlorosis

BERNÁTZKY, J.

Bul. Inst. Cent. Ampérol. Roy. Hongrois, 1 (1906), 8. (21, 551)

CHANCRIN, E.

Jour. Agr. Prat., n. ser., 23 (1912), 22, 683; 23, 715. (27, 850)

Crown Gall

HEDGCOCK, G. G.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 183. (23, 650) Remove and burn diseased vines. Deep planting in arid regions recommended.

Gray Rot (*Botrytis*)

ISTVANFFI, G.

Ann. Sci. Agron., 3 ser., 3 (1908), 2, 196. (20, 949)

LAFFORGUE, G.

Rev. Vit., 39 (1913), 1001, 245; Prog. Agr. et Vit. (Ed. l'Est-Centre), 34 (1913), 30, 104. (29, 349) Powdered lime, 85 percent, and powdered potassium permanganate recommended.

THOURET, A., and VIDAL, J. L.

Rev. Vit., 40 (1913), 1023, 117. (29, 849)

TOTAL, E.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 43, 499. (22, 349) Apply Bordeaux and soap when grapes reach full size.

ZACHAREWICZ, E.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 48, 664. (22, 454) Alternate applications of a liquid fungicide (copper sulfate, powdered soap, and water) followed when dry by sulfur, recommended.

Rev. Vit., 34 (1910), 887, 671. (24, 649)

Mildew

ANDRÉ, S.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 31 (1910), 33, 198. (24, 51)

BRUNET, R.

Rev. Vit., 34 (1910), 879, 421. (24, 452) Alternate spraying with Bordeaux and dusting vines and fruit with sulfur to which has been added 10 percent of copper sulfate, proved efficient.

BURNS, W.

Dept. Agr. Bombay Bul. 36 (1910). (24, 649) Three applications of 3-2-25 Bordeaux followed by a fourth application of 3-2-40 Bordeaux recommended.

CADORET, A.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 31 (1910), 31, 137. (24, 50)

CADORET, A.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **34** (1913), 18, 557. (29, 551) For early attack spray with Bordeaux or copper acetate twice at intervals of fifteen days. For June attacks follow the above spraying with a powder of bolted lime, sulfur, and copper sulfate, 60-30-10 respectively.

GERVIES, A.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **31** (1910), 35, 256. (24, 51) Alternate spraying with copper-sulfate solution and dusting with mixture of copper sulfate and sulfur recommended.

LABERGERIE

Jour. Agr. Prat., n. ser., **20** (1910), 38, 369. (24, 250) Bordeaux recommended.

MAISONNEUVE, P.

Rev. Vit., **34** (1910), 889, 709. (24, 649) Bordeaux recommended over copper oxychlorid.

SZIGETHI-GYULA, A., and DUPUIS, L.

Bul. Inst. Cent. Ampérol. Roy. Hongrois, **1** (1906), 13. (21, 551)

VERMOREL, V., and DANTONY, E.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **31** (1910), 30, 101; abs. in Rev. Vit., **34** (1910), 866, 71. Spray with solution of 20 grams of silver nitrate and 300 grams of white soap in 100 liters of water.

ZACHAREWICZ, E.

Rev. Vit., **34** (1910), 887, 671. (24, 649)

Mildew, Downy (*Plasmopara*)

BELLE and FONDARD

Rev. Vit., **32** (1909), 812, 47. (21, 644)

BOLLE, J.

Ztschr. Landw. Versuchsw. Österr., **16** (1913), 4, 299. (30, 448)

BRETSCHNEIDER, A.

Ztschr. Landw. Versuchsw. Österr., **13** (1910), 3, 135. (23, 651)

Ztschr. Landw. Versuchsw. Österr., **14** (1911), 5, 806. (25, 751)

Monatsh. Landw., **5** (1912), 5, 138. (27, 652)

Ztschr. Landw. Versuchsw. Österr., **15** (1912), 2, 147. (27, 652)

BURNS, W.

Dept. Agr. Bombay Bul. 45 (1911). (27, 49) Thoro and timely spraying with Bordeaux recommended.

CAORS, C.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **33** (1912), 5, 140. (26, 750) Spray, taking care to reach under sides of leaves.

CAPUS, J.

Rev. Vit., **39** (1913), 1013, 693. (29, 849)

CHAPPAZ, G.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 10, 285. (20, 1139)

CHUARD, E.

Compt. Rend. Acad. Sci. (Paris), **150** (1910), 13, 839. (23, 453) Bordeaux, 2-percent strength, recommended.

FAES, H.

Chron. Agr. Vaud., **21** (1908), 8, 189; 9, 207. (20, 548) Spray with 2-percent Bordeaux every fifteen days First application, 50 gallons per acre subsequent applications, 75 to 100 gallons per acre.

Terre Vaud., **1** (1909), 9, 85. (23, 251)

Rev. Vit., **36** (1911), 933, 489; 934, 517; 935, 545. (26, 550) Direct fungicide to under sides of leaves.

GERNECK, R.

Weinbau u. Weinhandel, **30** (1912), 47, 498. (29, 449) Early and timely spraying with 1-percent Bordeaux, repeated whenever rain falls, is recommended.

GOUTHIÈRE, H.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 17, 507. (21, 245)

GUICHARD, J.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 21, 621. (22, 349) Copper oxychlorid applied (1) about flowering period and (2) immediately after flowering period, is very effective.

HEIN, W. H.

Insect Pest and Plant Disease Bur. Nebr., Div. Bot. Circ. 4. (21, 643)

HÉRON, G.

Jour. Agr. Prat. Vit. et Écon. Rurale Midi France, **109** (1913), 5, 192. (31, 151) Burgundy mixture recommended.

KRANKOFF, J. J.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **33** (1912), 11, 334. (27, 49) Early and repeated spraying with Bordeaux recommended.

LEROU, J.

Rev. Vit., **37** (1912), 957, 526. (27, 546)

LÜSTNER, G.

Ber. K. Lehranst. Wein, Obst u. Gartenbau Geisenheim, 1908, 111. (22, 349) One-percent Cucasa or copper soda recommended.

MEISSNER, R.

Weinbau u. Weinhandel, **26** (1908), 43, 387. (20, 549) Two-percent Bordeaux recommended.

MÜLLER, K.

Grossh. Bad. Landw. Vers. Anst. Augustenb. Flugbl., **1** (1913), 12; in Ber. Grossh. Bad. Landw. Vers. Anst. Augustenb., (1912). (31, 346)

MÜLLER, H., and THURGAU

Weinbau u. Weinhandel, **29** (1911), 29, 346; 46, 521. (26, 450) Spray under sides of leaves with Bordeaux.

PEROLD, A. J.

Agr. Jour. Cape Good Hope, **37** (1910), 4, 370. (24, 350) Apply flowers of sulfur.

SAURET, L.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **35** (1914), 19, 582. (31, 544) Apply liquid fungicide containing 2 kilograms copper sulfate and 1 kilogram of lime or carbonate of soda.

SCHELLENBERG, H.

Landw. Jahrb. Schweiz, **22** (1908), 5, 284. (20, 757)

Landw. Jahrb. Schweiz, **26** (1912), 6, 420. (28, 152) Bordeaux recommended.

THIÉBAUT, V.

Rev. Vit., **33** (1910), 862, 691. (23, 746) Apply mixture of 1 part quick-lime, 2 parts sublimed sulfur, and 2 parts copper sulfate.

ZACHAREWICZ, E.

Rev. Vit., **34** (1910), 887, 671. (24, 649)

Rev. Vit., **40** (1913), 1025, 171. (30, 150) Copper-sulfate mixtures recommended.

(ANON.)

Weinbau u. Weinhandel, **26** (1908), 20, 193. (21, 54) Tenax, (consisting of equal proportions of copper sulfate, clay-treated sulfuric acid, and soda) in a 1-percent solution is recommended.

Mildew, Powdery (*Uncinula*)

CHAPPAZ, G.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 18, 532. (22, 247) Combinations of treatments of sulfur and copper recommended.

DE ISTVÁNFFI, G.

Bul. Inst. Cent. Ampérol. Roy. Hongrois, **1** (1906), 14. (21, 551) A mixture of bisulfite of soda and sulfur recommended.

Bul. Inst. Cent. Ampérol. Roy. Hongrois, **1** (1906), 9. (21, 551) Late autumn spraying recommended.

LEROU, J.

Rev. Vit., **37** (1912), 957, 526. (27, 546)

Necrosis (*Fusicoccum*)

REDDICK, D.

N. Y. (Cornell) Sta. Bul. 263. (21, 148) Eradicate disease by removing and burning all diseased parts. To prevent new infection, spray in May or June.

Pourridié

SZIGETHI-GYULA, A.

Bul. Inst. Cent. Ampérol. Roy. Hongrois, **1** (1906), 16. (21, 550) Lime at the rate of 2 kilograms or 10 liters of milk of lime to a vine recommended.

Red Spot (*Pseudopeziza*)

DÜMMLER

Wchnbl. Landw. Ver. Baden, 1910, 415; abs. in Ztschr. Landw. Versuchsw. Österr., **13** (1910), 6, 597. (24, 351) Two-percent Bordeaux recommended.

LÜSTNER, G.

Ber. K. Lehranst. Wein, Obst u. Gartenbau Geisenheim, 1910, 175. (26, 144) Manure applied to light sandy soil increases resistance.

MÜLLER-THURGAU, H.

Landw. Jahrb. Schweiz, **26** (1912), 6, 313. (28, 55) Bordeaux recommended.

Root Rot (*Pestalozzia*)

WOLF, F. A.

Nebr. Sta. Rpt. 1907, 69. (20, 451)

Sun Scald

PACOTTET, P.

Rev. Vit., **32** (1909), 813, 57. (23, 48) Prune judiciously and whitewash glass of greenhouse.

White Rot (*Coniothyrium*)

DEGRULLY, L.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **34** (1913), 36, 289. (30, 247) Spray with fungicide high in copper content.

ISTVANFFI, G.

Ann. Sci. Agron., 3 ser., **3** (1908), 2, 183. (20, 950) Apply 3-percent Bordeaux. Later dust with powder containing copper and sulfite of soda. Begin application immediately after flowering.

GRAPE FRUIT

Scab

FAWCETT, G. L.

Porto Rico Prog., **6** (1914), 22, 6. (31, 152) Remove and burn infected parts. Bordeaux will control disease but destroys beneficial fungi which hold scale insects in check.

HEMP

Anthracnose (*Colletotrichum*)

SHAW, F. J. F.

Agr. Jour. India, **8** (1913), 1, 65; abs. in Agr. News (Barbados), **12** (1913), 289, 174. (29, 346) Collect and burn diseased leaves and spray with Bordeaux.

HEVEA

Dieback (*Glaeosporium*)

PETCH, T.

Circs. and Agr. Jour. Roy. Bot. Gard., Ceylon, **4** (1910), 23, 307. (23, 552) Cut out diseased shoots and paint wounds with tar.

Leaf Disease (*Fusicladium*)

KUYPER, J.

Rec. Trav. Bot. Néerland., 8 (1911), 3-4, 371. (26, 651) Bordeaux recommended.

Pink Disease (*Corticium*)

BUTLER, E. J.

Ann. Rpt. Bd. Sci. Advice India, 1911-12, 124. (30, 845)

Root Disease (*Sphærostilbe*)

PETCH, T.

Circs. and Agr. Jour. Roy. Bot. Gard., Ceylon, 5 (1910), 8, 65. (25, 46)
Dig up and destroy all diseased trees and roots. Isolate infected area by trenches one foot deep and treat ground with quicklime.**HOLLYHOCK**Rust (*Puccinia*)

WEBB, G.

Gard. Chron., 3 ser., 50 (1911), 1288, 174. (26, 750) Dust powder on plants, in morning while dew is still on, three or four times during growing season. Powder should contain 1 bushel slaked lime, 1 bushel soot, 4 pounds flowers of sulfur, and 2 ounces finely powdered copper sulfate.

HOPMildew (*Sphaerotheca*)

BLODGETT, F. M.

N. Y. (Cornell) Sta. Bul. 328. (29, 346) Observe proper sanitation. Sulfur recommended.

HYACINTHYellows (*Bacterium*)

SMITH, E. F.

Carnegie Inst. Washington Pub. 27, 2 (1911). (27, 44)

IMMORTEL

Canker

SOUTH, F. W.

Agr. News (Barbados), 11 (1912), 263, 174. (27, 451) Cut out and burn diseased bark. Apply tar to wounds.

LARCHCanker, European (*Peziza*)

BORTHWICK, A. W.

Notes Roy. Bot. Gard. Edinb., 1909, 21, 23. (22, 548)

Scab (*Cladosporium*)

FIORI, A.

Bul. Soc. Bot. Ital., 1912, 8, 307. (29, 156) Remove and burn diseased parts and spray with Bordeaux.

LAVATERAAnthracnose (*Colletotrichum*)

CHITTENDEN, F. J.

Jour. Roy. Hort. Soc. (London), **35** (1909), 2, 213. (22, 454) Repeated sprayings with Bordeaux checked the disease.**LEBBEK**

Diseases, General

BALLS, W. L.

Cairo Sci. Jour., **4** (1910), 41, 42. (23, 552)**LEMON**

Cottony Mold

SMITH, C. O.

Cal. Cult., **35** (1910), 9, 196. (24, 48) Copper sulfate.Gummosis (*Botrytis*)

FAWCETT, H. S.

Mo. Bul. Com. Hort. Cal., **2** (1913), 8, 601. (30, 51) Bordeaux mixture or paste recommended.**LETTUCE**Drop (*Sclerotinia*)

BURGER, O. F.

Fla. Sta. Bul. 116. (29, 846) Remove and destroy diseased plants. Drench infected area with Bordeaux or copper sulfate. Rotate.

STEVENS, F. L.

Abs. in Science, n. ser., **33** (1911), 850, 941. (25, 548)

N. C. Sta. Bul. 217. (25, 846) Remove and destroy diseased plants. Apply Bordeaux or copper sulfate to places from which plants have been removed.

— and HALL, J. G.

Abs. in Science, n. ser., **31** (1910), 802, 752. (23, 452) Prevent formation of sclerotia by early destruction of affected plants.

N. C. Sta. Tech. Bul. 8, 89. (26, 448)

Mildew, Downy (*Bremia*)

SCHNEIDER, N.

Rev. Hort. (Paris), **84** (1912), 21, 493. (28, 446) Cover ground with light dressing of charcoal.**LILAC**Leaf Disease (*Pseudomonas*)

Güssow, H. T.

Gard. Chron., 3 ser., **44** (1908), 1146, 404. (20, 850) Cut and burn all diseased shoots.

Trunk Disease (*Polyporus*)

VON SCHRENK, H.

Ann. Mo. Bot. Gard., **1** (1914), 2, 253. (31, 750) Disease enters thru holes made by borers. Kill borers, treat holes with antiseptic and plug. Burn diseased trunks.

LOGANBERRY*Hendersonia*

(ANON.)

Jour. Bd. Agr. (London), **19** (1912), 2, 124. (27, 448) Cut and burn all diseased canes. Spray with Bordeaux.

MAGUEY

Diseases, General

GANDARA, G.

Mem. y Rev. Soc. Cient. "Antonio Alzate," **25** (1908-09), 9-12, 293. (23, 151)

MAIZEMildew, Downy (*Sclerospora*)

BUTLER, E. J.

Mem. Dept. Agr. India, Bot. Ser., **5** (1913), 5, 275. (31, 51) Prevent the formation of oospores. Remove and burn all diseased plants before they wilt.

Smut (*Sorosporium*)

MCALPINE, D.

Jour. Dept. Agr. Victoria, **8** (1910), 5, 290. (23, 647) Disinfect seed with copper sulfate or formalin.

MANDARIN

Black Spot

(ANON.)

Agr. Gaz. N. S. Wales, **25** (1914), 8, 684. (31, 843) Prune and spray trees and ground with Bordeaux.

MANGOBloom Blight (*Glaeosporium*)

CARDIN, P. P.

Cuba Rev., **8** (1910), 5, 28. (24, 49) Two applications of Bordeaux at intervals of two weeks recommended.

MELONCanker (*Micosphaerella*)

MIDDLETON, T. H.

Bd. Agr. and Fisheries (London), Ann. Rpt. Intel. Div. 1910-11, pt. 2, 54. (27, 353) Spray with Bordeaux and disinfect houses thoroly in winter.

Mildew (*Pseudoperonospora*)

JARVIS, C. D.

Conn. Storrs Sta. Rpt. 1908-09, 31. (22, 743) 2-2-50 Bordeaux recommended.

KÖCK, G.

Verhandl. K. K. Zool. Bot. Gesell. Wien, **59** (1909), 1-2, 48; 3-4, 49; abs. in Centbl. Bakt. (etc.), 2 Abt., **25** (1909), 19-25, 519. (22, 743)Wilt (*Bacillus*)

TROOP, J., and WOODBURY, C. G.

Ind. Sta. Rpt. 1908, 30. (20, 1044)

MUSKMELON

Rust

TROOP, J., and WOODBURY, C. G.

Ind. Sta. Rpt. 1908, 35. (20, 1044) Five applications of 5-5-50 Bordeaux recommended; first application when rust spots begin to appear, followed by others at ten-day intervals.

Soft Rot (*Bacillus*)

GIDDINGS, N. J.

Vt. Sta. Bul. 148. (23, 349) Spray with Bordeaux. Support melons above ground and remove all traces of infection.

MINTRust (*Puccinia*)

NOFFRAY, E.

Jour. Agr. Prat., n. ser., **19** (1910), 5, 150. (23, 350) Spray with Bordeaux and burn infected leaves late in the fall.**MULBERRY**Leaf Spot (*Sphaerella*)

AVERNA-SACCÀ, R.

Bol. Agr. (São Paulo), 12 ser., 1911, 9-10, 727. (27, 547) Both Bordeaux and copper sulfate recommended.

NARCISSUSDry Rot (*Fusarium*)

MASSEE, G.

Jour. Bd. Agr. (London), **20** (1914), 12, 1091. (31, 646) Kill secondary spores during germination by working into soil a dressing of kainit or potassium sulfate. Rotate with non-susceptible plants.**OAK**Mildew (*Oidium*)

CUIF, E.

Bul. Soc. Sci. Nancy, 3 ser., **12** (1911), 1, 102. (26, 451) Dust seedlings with sulfur two or three times during season.

d'ALMEIDA, J. V.

Rev. Agron. (Portugal), **6** (1908), 3, 42. (23, 50)

KIRCHNER, O.

Allg. Forst u. Jagd Ztg., **85** (1910), 158. (23, 50)

KÖCK, G.

Österr. Forst u. Jagd Ztg., **28** (1910), 3, 18. (23, 50) Dust trees with powdered sulfur or spray with Bordeaux.

KÖVESSI, F.

1. Cong. Internat. Pathol. Comparée (Paris), 1912, **2**, Comp. Rend., 924. (31, 845) Flowers of sulfur recommended.

NEGER, F. W.

Tharand. Forstl. Jahrb., **62** (1911), 1, 1. (27, 253) Spray once or twice with lime sulfur.

VON TUBEUF, K.

Naturw. Ztschr. Forst u. Landw., **7** (1909), 2, 119; abs. in Bot. Centbl., **110** (1909), 24, 627. (23, 50) Hot-water treatment of seeds recommended.

Yellow Spot

MAIGE, A.

Bul. Sta. Forest Nord. Afrique, **1** (1912), 1, 10. (31, 247)

OATS

Diseases. General

STÖRMER, K., and KLEINE, R.

Illus. Landw. Ztg., **32** (1912), 51, 471. (28, 149)

Blight (*Pseudomonas*)

MANNS, T. F.

Ohio (Wooster) Sta. Bul. 210. (22, 453) Select resistant varieties.

"Dry Leaf"

EDINBURGH and EAST OF SCOTLAND COLLEGE OF AGRICULTURE

Rpt. **30** (1913), 22; abs. in Jour. Bd. Agr. (London), **20** (1914), 11, 1010. (31, 243) The use of such fertilizers as ammonium sulfate, superphosphate, and manganese sulfate, lessens disease.

Mildew (*Erysiphe*)

STÖRMER, K., and KLEINE, R.

Deut. Landw. Presse, **39** (1912), 51, 599. (28, 346) The use of phosphorus, potassium, and calcium salts recommended.

Scolecotrichum

NILSSON-EHLE, H.

Abs. in Bot. Centbl., **111** (1909), 7, 165. (23, 46)

Smut (*Ustilago*)

Goss, A.

Ind. Sta. Rpt. 1908, 17. (20, 1043) The use of formalin recommended.

Yellows

CLAUSEN, H.

Mitt. Deut. Landw. Gesell., **25** (1910), 44, 631. (24, 449) A direct application of lime should be omitted; ammonium sulfate should be used in place of nitrate of soda; phosphoric acid should be in form of superphosphate in place of "Thomas slag"; and soil after planting should be thoroly rolled down.

OLEANDER

Bacteriosis

TONELLI, A.

Ann. R. Accad. Agr. Torino, **55** (1912), 383. (30, 751) Cut out cankers and cover wounds with some good fungicide.

OLIVE

Diseases, General

CUBONI

Ann. Agr. (Italy), 1908, 256, 83. (20, 950)

Sooty Mold (*Meliola*)

VIDAL, D.

Prog. Agr. et Vit. (Ed. l'Est-Centre), **30** (1909), 24, 730. (23, 250) Spray trees twice during season with 2-percent Bordeaux. To every 100 liters of Bordeaux add 1 liter of turpentine:

ONION

Mold (*Macrosporium*)

RAMIREZ, R.

Bol. Dir. Gen. Agr. (Mexico), Rev. Agr., **2** (1912), 5, 413. (29, 245) Lime sulfur, 1-1-100, recommended.

Smut (*Urocystis*)

JONES, L. R., and VAUGHN, R. E.

Wis. Sta. Bul. **240** (1914). (31, 840) Disinfect seed with formalin.

PAMMEL, L. H., and KING, C. M.

Ia. Sta. Bul. **131**. (27, 445)

REDDICK, D.

West N. Y. Hort. Soc. Proc., **58** (1912), 194. (29, 245)

STONE, G. E.

Mass. Sta. Circ. 21. (23, 743) Treat seed before planting with solution of 1 pound of formalin to 30 gallons of water.

ORANGE

Diseases, General

GANDARA, G.

Estac. Agr. Cent. (Mexico), Bol. 31, 1, 43. (24, 157)

Dieback

FLOYD, B. F.

Fla. Sta. Rpt. 1913, 27. (31, 749) Spray twice in spring with 5-5-50 Bordeaux.

Exanthema

BITTLEBANK, C. C.

Jour. Dept. Agr. Victoria, 10 (1912), 7, 401. (27, 850) Avoid nitrogenous manures. Plow under green crops previously manured with superphosphates.

Rot

SAVASTANO, L.

R. Staz. Sper. Agrum. e Frutticol. Acireale, Bol. 9 (1912). (31, 646) Timely tree surgery and substitution of sound young trees recommended.

ORCHID

Bacterial Disease (*Bacillus*)

HORI, S.

Centbl. Bakt. (etc.), 2 Abt., 31 (1911), 1-4, 85. (26, 650) Apply 1-percent solution of corrosive sublimate with soft sponge. Avoid excess of water.

Leaf Spot (*Hypodermium*)

BROOKS, F. T.

Gard. Chron., 3 ser., 50 (1911), 1281, 27. (25, 755) Sponge leaves with a dilute solution of potassium permanganate.

PALM

Diseases, General

COLEMAN, L. C.

Ann. Mycol., 8 (1910), 6, 591; Dept. Agr. Mysore, Mycol. Ser. Bul. 2, 1910. (24, 650)

Bud Rot (*Pythium*)

BUTLER, E. J.

Mem. Dept. Agr. India, Bot. Ser., 3 (1910), 5, 221. (24, 351) Systematic cutting and destruction of all diseased trees recommended.

PEACH

Diseases, General

ESSIG, E. O.

WORSHAM, E. L., and REED, W. V.

Ga. Bd. Ent. Bul. 26. (20, 757)

Brown Rot (*Sclerotinia*)

BARRE, H. W.

S. C. Sta. Rpt. 1910, 27. (24, 745) Two applications of self-boiled lime sulfur (8-8-50) recommended.

McCUE, C. A.

Del. Sta. Bul. 85. (21, 244) Lime-sulfur wash recommended.

MORRIS, O. M.

Okla. Sta. Rpt. 1908, 16. (20, 950) Four applications of Bordeaux recommended.

OKLAHOMA

Okla. Sta. Rpt. 1908, 78. (20, 950) Both Bordeaux and ammoniacal copper carbonate recommended.

SCOTT, W. M., and QUAINTANCE, A. L.

Better Fruit, 5 (1910), 1, 19. (23, 745) Apply solution of 2 pounds of arsenate of lead to 50 gallons of lime sulfur. Repeat one month after petals fall and again one month before fruit ripens.

STEWART, J. P.

Proc. State Hort. Soc. Pa., 52 (1911), 181; Proc. Amer. Pomol. Soc., 32 (1911), 281. (25, 352)

Crown Gall (*Pseudomonas*)

SWINGLE, D. B.

Mont. Sta. Circ. 37 (1914). (31, 644)

Leaf Curl (*Exoascus*)

ARNAUD, G.

Rev. Phytopath., 1 (1913), 2, 24; abs. in Riv. Patol. Veg., 6 (1913), 7, 218. (30, 353) Bordeaux or lime sulfur recommended.

BLAKE, M. A., and FARLEY, A. J.

N. J. Sta. Rpt. 1908, 53. (22, 150) Remove and destroy affected parts. Apply Bordeaux or lime sulfur.

BOLLE, J.

Ztschr. Landw. Versuchsw. Österr., 16 (1913), 4, 299. (30, 448)

FARLEY, A. J.

N. J. Sta. Circ. 29. (30, 750) Thoro application of lime sulfur before buds open recommended.

GASSNER, G.

Rev. Asoc. Rural Uruguay, 37 (1908), 10, 546. (22, 748)

MANARESI, A.

Coltivatore, 56 (1910), 7, 208. (23, 151)

QUINN, G.

Jour. Dept. Agr. So. Aust., 15 (1911), 1, 58. (26, 144) Two applications of Burgundy or Bordeaux recommended

Jour. Dept. Agr. So. Aust., 17 (1913), 1, 28. (30, 50) Burgundy most effective.

SWINGLE, D. B.

Mont. Sta. Circ. 37. (31, 644)

WALLACE, E.

Rpt. Niagara Sprayer Co. Fellowship, 1 (1909). (22, 652) Lime sulfur better than Bordeaux.

WEEKS, C. B.

Mo. Bul. Com. Hort. Cal., 1 (1912), 8, 359. (28, 152) Bordeaux 7-7-50 in late fall, 4-4-50 in spring, and 2-2-50 after leaves appear, recommended.

ZAULI, G.

Bul. R. Soc. Toscana Ort., 3 ser., 12 (1907), 11, 325. (20, 548) Apply solution of copper sulfate, lime, and ammonium chlorid at time buds open. If rainy give a second application.

Little Peach

BLAKE, M. A.

N. J. Sta. Bul. 226. (22, 748)

CAESAR, L.

Ont. Dept. Agr. Bul. 185. (24, 250) Destroy affected trees.

Rust (*Puccinia*)

PERRONNE, P.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 35 (1914), 2, 57. (31, 53)

Scab (*Cladosporium*)

BARRE, H. W.

S. C. Sta. Rpt. 1910, 27. (24, 745)

BLAKE, M. A., and FARLEY, A. J.

N. J. Sta. Bul. 236. (25, 455) Lime sulfur 1-150 or 1-175 recommended. Stronger solutions unsafe.

EVANS, I. B. P.

Agr. Jour. Union So. Africa, 1 (1911), 5, 696. (25, 752) Bordeaux 5-5-50 three weeks before buds open, 4-4-50 just after fruit is setting, and 4-4-100 when fruit is half grown.

SCOTT, W. M., and AYRES, T. W.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 174. Lime sulfur recommended.

STEWART, J. P.

Proc. State Hort. Assoc. Pa., 52 (1911), 181; Proc. Amer. Pomol. Soc., 32 (1911), 281. (25, 352) Bordeaux or lime sulfur and lead arsenate recommended.

Yellows

BLAKE, M. A.

N. J. Sta. Bul. 226. (22, 748)

HUTCHINS, E.

Better Fruit, 5 (1910), 1, 64. (23, 746) For three years uproot and burn all trees showing signs of yellows.

PEANUT

Diseases, General

SOUTH, F. W.

West Indian Bul. 11 (1911), 3, 157. (25, 348)

PEAR

Diseases, General

Mass. Sta. Rpt. 1909, pt. 2, 65. (24, 252)

Black Knot (*Plowrightia*)

COONS, G. H.

Mich. Farmer, **140** (1913), 14, 425. (29, 155) Dilute commercial lime sulfur recommended.

Brown Rot (*Sclerotinia*)

MORRIS, O. M.

Oklahoma Sta. Rpt. 1908, 16. (20, 951) Four applications of half-strength Bordeaux recommended.

STONE, G. E.

Mass. Sta. Rpt. 1909, pt. 2, 65. (24, 252)

Leaf Spot (*Cylindrosporium*)

STEWART, V. B.

N. Y. (Cornell) Sta. Circ. 21 (1914). (30, 848) Bordeaux, 5-5-50, or lime-sulfur solution, 1 gallon to 50 gallons of water, recommended. Burning is prevented by the addition of granulated iron sulfate.

Rust (*Puccinia*)

BROOKS, F. T.

New Phytol., 10 (1911), 5-6, 207; Gard. Chron., 3 ser., 50 (1911), 1295, 292; abs in Internat. Inst. Agr. (Rome), Bul. Bur. Agr. Intel. and Plant Diseases, 2 (1911), 11-12, 2603. (27, 48) Eradicate *Anemone coronata*, upon which the aecidium stage is found.

Scab (*Cladosporium*)

MACOUN, W. T.

Canada Expt. Farms Rpts., 1909, 126. (22, 350) Spray early with Bordeaux. When fruit sets use ammoniacal copper carbonate to prevent staining.

Silver Leaf (*Stereum*)

PICKERING, S. W.

Woburn Expt. Fruit Farm Rpt., 12 (1910); rev. in Gard. Chron., 3 ser., 48 (1910), 1246, 356. (24, 349) Remove and destroy all infection.

POPLAR

Canker

HOC, P.

Prog. Agr. et Vit. (Ed. l'Est-Centre), 30 (1909), 30, 116. (21, 645) Remove and destroy infected branches.

POTATO

Diseases, General

EVANS, I. B. P.

Transvaal Agr. Jour., **8** (1910), 31, 462. (23, 548)

JOHNSON, T.

Econ. Proc. Roy. Dublin Soc., **1** (1908), 12, 453. (20, 450) Disinfect seed with Bordeaux or 2-percent copper-sulfate solution. Cultivate thoroly and treat soil with sulfur.

(ANON.)

Jour. Bd. Agr. (London), **15** (1908), 8, 592. (20, 649) Soak seed before planting for two hours in solution of $\frac{1}{2}$ pint of formalin in 15 gallons of water.

Dry Rot (*Fusarium*)

EVANS, I. B. P.

Transvaal Agr. Jour., 7 (1908), 25, 64. (20, 847)

LONGMAN, S.

Jour. Linn. Soc. (London), Bot., 39 (1909), 270, 120. (22, 149)

LOUNSBURY, C. P.

Agr. Jour. Cape Good Hope, 35 (1909), 1, 42. (21, 643) Destroy all diseased tubers, use only healthy seed, and rotate crops.

MANNS, T. F.

Ohio (Wooster) Sta. Bul. 229. (25, 653) Use only sound tubers for seed, practice five- or six-year crop rotation, and avoid the use of infected barnyard manure as a fertilizer.

MORSE, W. J.

Me. Sta. Doc. 375. (23, 548)

ORTON, W. A.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 110. (28, 848) Select clean seed rotate crops, and use care in storing tubers.

PETHYBRIDGE, G. H., and BOWERS, E. H.

Econ. Proc. Roy. Dublin Soc., 1 (1908), 14, 547. (20, 846) Destroy all suspicious tubers when harvesting; examine stored potatoes from time to time and remove those affected. Take care to prevent wounding when handling the crop.

WILCOX, E. M., LINK, G. K. K., and POOL, V. W.

Nebr. Sta. Research Bul. 1. (29, 47) Before storing potatoes treat with lime sulfur, formalin, or formalin vapor.

Early Blight (*Alternaria*)

MILWARD, J. G.

Wis. Sta. Circ. Inform. 3. (22, 247) Only standard, medium late, and late varieties are benefited by Bordeaux spraying. Spray not less than four times, beginning not later than August 15.

SANDSTEN, E. P., and MILWARD, J. G.

Wis. Sta. Bul. 168. (20, 948) Bordeaux recommended.

STUART, W.

Va. Sta. Bul. 179 (1914). (31, 643)

(ANON.)

Dept. Agr. and Tech Instr. Ireland Jour., 9 (1909), 4, 745. (21, 746)

Late Blight (*Phytophthora*)

ALLEN, W. J.

Agr. Gaz. N. S. Wales, 21 (1910), 7, 571. (24, 47) Bordeaux recommended.

BARCUS, M. F.

N. Y. (Cornell) Sta. Circ. 19. (29, 549) Spray with Bordeaux.

BATSY, F.

Petite Rev. Agr. et Hort., 18 (1912), 421, 135. (27, 748) Bordeaux or copper-sulfate solution recommended.

CUTHBERTSON, W.

Gard. Chron., 3 ser., 49 (1911), 1261, 122. (25, 44)

FINARDI, E.

Avven. Agr., 20 (1912), 7, 290; abs. in Internat. Inst. Agr. (Rome), Bul. Bur. Agr. Intel. and Plant Diseases, 3 (1912), 10, 2310. (29, 246)

GANDARA, G.

Bol. Soc. Agr. Mexicana, 33 (1909), 20, 394; 21, 412; 22, 425. (21, 747)
Bordeaux recommended.

HAYWOOD, A. H.

Agr. Gaz. N. S. Wales, 21 (1910), 1, 63. (22, 746) Apply 6-4-40 Bordeaux at the rate of 50 gallons per acre.

JONES, L. R., GIDDINGS, N. J., and LUTMAN, B. F.

U. S. Dept. Agr., Bur. Plant. Indus. Bul. 245. (27, 544)

LEA, A. M.

Agr. Gaz. Tasmania, 19 (1911), 7, 357. (26, 143) Bordeaux recommended.

MCALPINE, D.

Jour. Dept. Agr. Victoria, 7 (1909), 11, 698. (22, 453) Treat seed tubers to dry heat at 120° F. for four hours. Such treatment destroys fungus and increases germinating power. Spray with Bordeaux.

Jour. Dept. Agr. Victoria, 8 (1910), 6, 358. (23, 744)

Dept. Agr. Victoria Bul. 27; Dept. Agr. So. Aust. Bul. 49. (24, 46)

MORSE, W. J.

Me. Sta. Doc. 375. (23, 548)

Me. Sta. Bul. 169. (22, 546) Apply 5-5-50 Bordeaux when plants are about eight inches high and every ten days thereafter until frost.

MORTENSEN, M. L.

Tidsskr. Landbr. Planteavl, 17 (1910), 2, 293. (23, 744) Spray with Bordeaux about July 20 and one month later.

OLDERSHAW, A. W.

Dept. Agr. and Tech. Instr. Ireland Jour., 11 (1911), 3, 450. (25, 455)

PETHYBRIDGE, G. H.

Dept. Agr. and Tech. Instr. Ireland Jour., 13 (1913), 3, 445. (29, 549) Bordeaux better than Burgundy.

RAVN, F. K.

Tidsskr. Landbr. Planteavl, 17 (1910), 2, 271. (23, 744)

REED, H. S.

Phytopath., 2 (1912), 6, 250. (28, 747)

SEYMOUR, G.

Jour. Dept. Agr. Victoria, 10 (1912), 12, 745. (28, 849)

STEVENS, H. E.

Fla. Sta. Rpt. 1912, 93. (29, 242)

STUART, W.

Va. Sta. Bul. 179 (1914). (31, 643)

TURNER, D.

Agr. Student's Gaz., n. ser., **15** (1910), 2, 38. (24, 252) Late spring spraying with 14-9-100 Bordeaux recommended.

Leaf Roll

APPEL, O. and KREITZ, W.

Mitt. K. Biol. Anst. Land u. Forstw., **1909**, 8, 15. (23, 148)

HEDLUND, T.

Tidsskr. Ländtman, **31** (1910); abs. in Bot. Centbl., **114** (1910), 22, 567. (24, 552) A loose seed bed, sound seed tubers, not too deep planting, and liming of the soil are recommended.

LANG, W.

Württemb. Wchnbl. Landw., **1909**, 23, 420; 24, 444. (24, 46) Breed resistant varieties.

ORTON, W. A.

U. S. Dept. Agr. Bul. **64** (1914). (30, 649).

U. S. Dept. Agr., Bur. Plant Indus. Circ. **109**. (28, 848) Select clean seed; rotate and improve culture.

OSTERSPEN

Mitt. Deut. Landw. Gesell., **26** (1911), 18, 222. (25, 455)

REMY, T., and SCHNEIDER, G.

Fühling's Landw. Ztg., **58** (1909), 6, 201. (21, 243)

BOHUTINSKY-KRIZEVCI, G.

Ztschr. Landw. Versuchsw. Österr., **13** (1910), 7, 607. (24, 154) Formalin proved worthless in controlling the disease.

SCHANDER, R.

Fühling's Landw. Ztg., **58** (1909), 8, 273. (22, 346)

Jahresber. Ver. Angew. Bot., **7** (1909), 235. (24, 46) Use only sound tubers for seed.

SCHLEH

Fühling's Landw. Ztg., **58** (1909), 18, 641. (22, 347)

STEGLICH, B.

Sächs. Landw. Ztschr., **57** (1909), 17, 296. (22, 246)

STÖRMER, K.

VAÑHÁ, J.

Monatsh. Landw., **3** (1910), 9, 268. (24, 154) Lohsol, a carbolineum preparation, 20 to 40 cc. to every square meter of soil, was very effective either when mixed with soil or used for disinfecting seed tubers.

VON ZEDTWITZ, W.

Wiener Landw. Ztg., **59** (1909), 83, 818; abs. in Centbl. Bakr. (etc.), 2 Abt., **26** (1910), 4-5, 117. (23, 249)

(ANON.)

Ztschr. Landw. Versuchsw. Österr., **14** (1911); 7, 911. (27, 351) Use only healthy tubers for seed.

Rhizoctonia

ERIKSSON, J.

Meddel. Centralanst. Försöksv. Jordbruksområdet, 1912, 67; K. Landtbr. Akad. Handl. och Tidskr., 51 (1912), 7-8, 550. (29, 152) Use clean seed and rotate three to four years.

GLOYER, W. O.

N. Y. (Geneva) Sta. Bul. 370 (1913). (30, 539) Soak seed tubers in solution of corrosive sublimate, 1-2000.

Scab

BERNHARD, A.

Deut. Landw. Presse, 38 (1911), 15, 168; 16, 179. (25, 245) Sulfur recommended.

HOLMES, E. S.

Jour. Dept. Agr. Victoria, 8 (1910), 9, 570. (24, 247) Soak seed tubers for two hours in a 1-30 solution of formalin before cutting.

SEYMOUR, G.

Jour. Dept. Agr. Victoria, 8 (1910), 6, 360. (23, 744)

STONE, G. E., and CHAPMAN, C. H.

Mass. Sta. Rpt. 1912, pt. 1, 84. (30, 150)

VON WAHL, C.

Ber.-Grossh. Bad. Landw. Vers. Anst. Augustenb., 1910, 58. (26, 342) Soak seed tubers for one and one-half hours before planting, in either 2-percent solution Bordeaux or .05-percent solution corrosive sublimate.

Scab (*Oospora*)

BERNHARD, A.

Deut. Landw. Presse, 37 (1910), 18, 204. (23, 744) The use of sulphur is beneficial, as it disinfects the soil, improves physical conditions, and causes quicker and more intensive action of commercial fertilizers.

HENDERSON, L. F.

Maritime Farmer, 14 (1909), 13, 291. (21, 51) Treat seed tubers with solution of either formalin or corrosive sublimate and plant in virgin soil when possible.

Scab, Powdery (*Spongopora*)

JOHNSON, T.

Sci. Proc. Roy. Dublin Soc., n. ser., 12 (1909), 16, 165. (22, 149) Treat scabby tubers with 2-percent Bordeaux and plant seed whole.

MELHUS, I. E.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 127. (29, 347)

MORSE, W. J.

Me. Sta. Bul. 227 (1914). (31, 243)

Wart (*Synchytrium*)

BOS, J. RITZEMA

Tijdschr. Plantenziekten, 16 (1910), 1-2, 59. (23, 347)

CUTHBERTSON, W.

Gard. Chron., 3 ser., 49 (1911), 1261, 122. (25, 44)

ERIKSSON, J.

Jour. Bd. Agr. (London), **21** (1914), 2, 135. (31, 842) The use of a 1-percent solution of formalin at the rate of one quart per square foot of soil as a disinfectant has been found beneficial.

GÜSSOW, H. T.

Canada Cent. Expt. Farm Bul. 63. (22, 545) Clean infected land of tubers and rubbish and apply 4 to 5 tons of unslaked lime per acre.

JOHNSON, T.

Sci. Proc. Roy. Dublin Soc., n. ser., **12** (1909), 14, 131. (22, 149)

JÖSTUNG, H.

Deut. Landw. Presse, **36** (1909), 88, 941. (23, 347) Use only healthy seed, rotate crops, burn diseased tubers, and after cooking, feed slightly infected tubers to stock.

Deut. Landw. Presse, **36** (1909), 68, 725. (22, 246)

KITLEY, F.

Gard. Chron., 3 ser., **46** (1909), 1175, 362. (23, 744)

MALTHOUSE, G. T.

Field Expts. Harper-Adams Agr. Col. and Staffordshire Joint Rpt. 1908, 19. (24, 449) The use of sulfur at the rate of $\frac{1}{4}$ pound per square yard of soil is recommended.

Harper-Adams Agr. Col. Bul., (1910), Nov. (24, 648)

RIEHM, E.

Centbl. Bakt. (etc.), 2 Abt., **24** (1909), 8-12, 208. (22, 650) Gas lime, quicklime, or sulfur applied to soil have been found beneficial.

SALMON, E. S.

Jour. Southeast Agr. Col. Wye, (1909), 18, 294. (25, 245)

SCHNEIDER, G.

Deut. Landw. Presse, **36** (1909), 88, 940. (22, 545) Rotate crops and burn all infected tubers.

SPIECKERMANN

Illus. Landw. Ztg., **34** (1914), 2, 7; 3, 16. (31, 149) Apply sulfur to soil.

ZIMMERMANN, E.

Naturw. Ztschr. Forst u. Landw., **8** (1910), 6, 320. (23, 744)

(ANON.)

Black Rot (*Sphæronema*)

HARTER, L. L.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 114. (28, 849)

Dry Rot (*Diaporthe*)

HARTER, L. L., and FIELD, E. C.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 281. (29, 153) Cook diseased potatoes before feeding to stock; sterilize seed beds; use care in selection of seed.

Stem Rot (*Fusarium*)

HARTER, L. L.

U. S. Dept. Agr., Bur. Plant Indus. Circ. 114. (28, 849)

QUINCE

Fire Blight (*Bacillus*)

PICKETT, B. S.

Ill. Sta. Circ. 172 (1914). (31, 644) Remove and destroy infected trees, which carry disease over winter.

RASPBERRY

Anthracnose (*Glaeosporium*)

LAWRENCE, W. H.

Wash. Sta. Bul. 97. (23, 452) Apply 4-4-50 Bordeaux before leaves appear.

Cane Blight (*Coniothyrium*)

HOWITT, J. E.

Canad. Hort., 36 (1913), 10, 237. (30, 246) Remove and burn all diseased specimens and plant only healthy plants.

O'GARA, P. J.

Off. Path. and Ent. Rogue River Valley, Bul. 4, 1911. (27, 250) Remove and burn all infected canes. Spray in fall before rains with strong Bordeaux. Give three applications of Bordeaux in spring before blossoms appear. If roses are near, give them attention also.

Crown Gall (*Pseudomonas*)

SWINGLE, D. B.

Mont. Sta. Circ. 37 (1914). (31, 644)

Hendersonia

(ANON.)

Jour. Bd. Agr. (London), 19 (1912), 2, 124. (27, 448) Cut and burn all diseased canes. Spray with Bordeaux.

Rust (*Gymnoconia*)

WILSON, G. W.

N. C. Sta. Rpt. 1912, 56. (29, 50)

Yellows

HOWITT, J. E.

Canad. Hort., 36 (1913), 10, 237. (30, 246)

MELCHERS, L. E.

Ohio Nat., 14 (1914), 6, 281. (31, 545) Plant red raspberries secured from uninfected regions, in light or medium heavy soil. Manure well and drain adequately. Remove and burn all diseased plants.

RICE

Blight

COLLIER, J. S.

Rpt. of investigations concerning rice. Stuttgart, Ark., 1910. (24, 743)

Ill. Sta. Circ. 156. (27, 47) Good physical condition of soil with aeration at the proper time will prevent the blight.

HEWITT, J. L.

Ark. Sta. Bul. 110. (27, 248) Rotate crops. Plow late in fall and burn stubble.

Smut (*Pleospora*)

RAMIREZ, R.

Bol. Dir. Gen. Agr. (Mexico), Rev. Agr., 2 (1912), 5, 413. (29, 245) Disinfect with formalin.

ROSE

Diseases, General

LAUBERT, R., and SCHWARTZ, M.

Rosenkrankheiten und Rosenfeinde Jena, 1910. (24, 748)

Black Spot (*Diplocarpon*)

WOLF, F. A.

Ala. Sta. Bul. 172. (29, 552) Cultivate properly and spray with ammoniacal copper carbonate.

Mildew, Powdery (*Sphaerotheca*)

NORTON, J. B. S., and WHITE, T. H.

Md. Sta. Bul. 156. (26, 450) Apply vaporized sulfur.

SCHMIDT, H.

Österr. Gart. Ztg., 4 (1909), 7, 249; abs. in Centbl. Bakt. (etc.), 2 Abt., 26 (1910), 16-17, 482. (23, 654) Put air-slaked lime around each bush in fall. Dust foliage with sulfur.

Rot (*Botrytis*)

BEAUVIERIE, J.

La Pourriture des Roses, Lyon, 1910, 8. Reprint from Les Amis des Roses, 1910. (24, 351) Lime water, lime sulfate, bisulfite of magnesia, nickel sulfate, copper sulfate, or formalin recommended.

RUBBER

Diseases, General

GALLAGHER, W. J.

Mont. Sta. Circ. 37 (1914). (31, 644)

Spurmaria

MANGIN, L.

Rev. Hort. (Paris), **81** (1909), 24, 568. (23, 151) Spray with potassium sulfid, 3-1000.**SUGAR CANE**

Diseases, General

EDGERTON, C. W.

La. Sta. Bul. 120.

MAUBLANC, C.

Agr. Prat. Pays Chauds, **10** (1910), 88, 43; 89, 143; 90, 232; 91, 312; 92, 379; 93, 502. (25, 847)

Blight (*Mycosphaerella*)

WILBRINK, G., and LEDEBOER, F.

Meded. Proefstat. Java-Suikerindus., 1910, 39, 443. (24, 648) Reject all diseased canes as seed and plant resistant varieties when possible.

Red Rot (*Colletotrichum*)

BUTLER, E. J., and HAFIZ, A.

Mem. Dept. Agr. India, Bot. Ser., **6** (1913), 5, 151. (30, 649) Secure only sound canes for seed, remove and burn all plants showing infection, and practice long periods of rotation.

EDGERTON, C. W.

La. Sta. Bul. 133. (26, 548)

FAWCETT, H. S.

Fla. Sta. Rpt. 1910, 45. (25, 452) Dip the seed canes in 5-5-50 Bordeaux just before planting. Plant in fall and introduce immune varieties.

KULKARNI, G. S.

Dept. Agr. Bombay Bul. 44 (1911). (27, 48) Use only cuttings showing white pith at ends. Discard cuttings showing slightest reddening.

Root Disease (*Marasmius*)

COBB, N. A.

Hawaiian Sugar Planters' Sta., Div. Path. and Physiol. Bul. 6. (22, 49)

STOCKDALE, F. A.

West Indian Bul. 9 (1908), 2, 103. (21, 147)

SWEET PEA

Streak Disease (*Bacillus*)

MANNS, T. F., and TAUBENHAUS, J. J.

Gard. Chron., 3 ser., **53** (1913), 1371, 215. (29, 352) Mulch heavily with straw.

Streak Disease (*Macrosporium*)

(ANON.)

Gard. Chron., 3 ser., **51** (1912), 1308, 36; 1309, 52; 1311, 84. (27, 354) Treat seed before planting with solution of potassium permanganate.

Streak Disease (*Thielavia*)

CHITTENDEN, F. J.

Jour. Roy. Hort. Soc. (London), **37** (1912), 3, 541. (27, 45) Secure good active growth, as fungus attacks only weakened plants.

MASSEE, G.

Roy. Bot. Gard. Kew, Bul. Misc. Inform., 1912, 1, 44. (26, 551) Fumigate seed bed with formalin or steam. The use of coal ashes or volcanic scoria for seed beds may be advantageous.

TEABlister Blight (*Exobasidium*)

TUNSTALL, A. C.

Indian Tea Assoc., Sci. Dept. Quart. Jour., 1913, 2, 50. (31, 56) Spray dormant bushes with solution of 2 pounds of sodium hydrate to 10 gallons of water. To green bushes apply solution of 6 pounds of copper sulfate and quick-lime to 100 gallons of water.

Copper Blight (*Læstadia*)

SHAW, F. J. F.

Agr. Jour. India, 6 (1911), 1, 78. (25, 46) Remove and burn all infection. Apply Bordeaux.

TIMOTHYRust (*Puccinia*)

JOHNSON, E. C.

U. S. Dept. Agr., Bur. Plant Indus. Bul. 224. (26, 52)

Abs. in Science, n. ser., 31 (1910), 803, 791. (23, 450)

A Bibliography of
Non-Parasitic Diseases
of Plants

BY

CYRUS W. LANTZ

PREFACE

The aim in the preparation of this bibliography is merely to present a list of non-parasitic diseases of plants with reference to the more important literature on these diseases. The list includes those diseases in which no parasites have been found and some diseases—e. g., gummosis—in which there is some question as to whether the cause is or is not a parasite.

The diseases are listed under the common names of the plants upon which they occur, and the names of these plants are arranged alphabetically. Where a disease occurs upon several different plants,—e. g., chlorosis, mosaic,—it is also given a separate heading, and placed in its alphabetical position. Plant injuries are also arranged in this way.

Owing to the confusion in the naming of some of the so-called physiological diseases and to the lack of definite knowledge concerning them, it is probable that the same disease in some instances occurs under two different names; however, it seems better to err in this way than to risk the grouping together of distinct diseases as one. The names here used for the diseases are those found in the original publication.

This list of diseases and literature is complete up to and including the year 1914 in so far as it has been possible to make it. Free use has been made of a bibliography of non-parasitic diseases of plants published by Dr. George E. Stone in the 17th Annual Report (1905) of the Hatch Experiment Station of Massachusetts and of the reviews in the Experiment Station Record.

A BIBLIOGRAPHY OF NON-PARASITIC DISEASES OF PLANTS
