Applied Global Innovation Initiative

of Grand Valley State University

Iniciativa Global de Innovación Aplicada

- **Vision:** Empowering people to change their world with their resources
- **Mission:** Through product innovation that is interdisciplinary, intercultural, and innovative in approach the Applied Global Innovation Initiative empowers individuals (communities, faculty, staff, and students) to address challenging environmental, economic, and social issues facing the world's poorest populations.

AGII – May 2012

- ~130 Participants:
 - 100+ students from UNAN's campuses
 - 25+ UNAN faculty
 - Including various engineering disciplines, business administration, economics, computer science, psychology, anthropology, philosophy
- 4 Nicaraguan translators
- 5 AGII Project Coordinators and ~dozen project partners and volunteers with a range of skills and backgrounds

Next?

- AGII staff, with input from Tiger Studio Design, will select 1-5 ideas from among those developed and presented in May
- Program leaders Dr. Lane & Dr. Farris will return to Estelí with Tiger Studio staff for a week in August to provide support for further development
- **AGII Goal:** At least 1-2 new product roll-outs reported by Nica participants in May 2013

Abstract

Engineering South of the Border: A Librarian's Experience in Nicaragua

I will spend the first half of May'12 in Estelí, Nicaragua, as a volunteer member of a project to teach product innovation and development skills to students and faculty of the Nicaraguan national university system. The two leaders, Engineering and Business faculty members from GVSU, require no special expertise or language skills for volunteers, but are excited at the prospect of having a library professional among the support group in this year's seventh annual iteration of the program. I look forward to sharing what I learn about engineering and academics in a culture eager to develop.
