ACKNOWLEDGEMENT

This work is the first major report of one of the approved programmes of the Fisheries Division of Kainji Lake Research Institute for the Fourth National Development Plan entitled: "Inventory of Fishes and Aquatic Resources in Nigeria". The survey was funded by the Institute from the programme vote with the full co-operation and support of the then Director of the Institute Dr. H. M. Yesufu.

The collection of data and information on reservoirs and fish ponds would have been impossible without the co-operation and assistance of State Fisheries personnel and staff of River Basin Development Authorities, Water Corporations and other Agencies located all over the country. We, therefore, wish to express our profound gratitude to the underlisted officers and Agencies in the various States:

1. Anambra State

Messrs E. N. C. Eziuzo, Chief Fisheries Officer;
G. E. Sagay, Federal Fisheries Officer and the Chief
Water Engineer of the State Water Corporation.

2. Bauchi State

The Chief Fisheries Officer, Messrs Malon Yeri - Zonal
Fisheries Officer, Gombe; Hezekiah Leke, Fisheries
Officer, Azare and Staff of the Bauchi Agricultural
Development Project.

3. Bendel State

Messrs L. O. Abuah, Chief Fisheries Officer, Ministry
of Agriculture and Natural Resources; I. M. Ogunsuyi,
Chief Fisheries Officer and J. O. Obayuwana (Fisheries
Officer) Benin Owena River Basin Development Authority,
Benin City; Federal Fisheries Officer, Bendel State
and Chief Water Engineer, Bendel State Water Board.

4. Benue State

Messrs James A. Asaku, Ag. Chief Fisheries Officer
Ministry of Agriculture and Natural Resources;
Abdul Sattar, Principal Fisheries Officer and Haq Nawaz
Khan, Senior Fisheries Officer, both of the Lower Benue
River Basin Development Authority, Makurdi.

5. Borno State

Messrs Elpidid P. Oroona, Principal Fisheries Officer, Chad Basin Development Authority; O. M. Alatishe, Federal Fisheries Officer and Dika G. Ndahi Principal Fisheries Officer, Ministry of Agriculture and Natural Resources, Maiduguri.

6. Cross River State

Messrs B. S. Moses, Chief Fisheries Officer, Ministry of Agriculture and Natural Resources, Calabar; D. E. S. Jayamaha, Principal Fisheries Officer; S. M. Desilva, Senior Fisheries Officer both of Cross River Basin Development Authority, Calabar; E. F. Ubom, Project Manager C.R.B.D.A. Nkari Project; A. S. Udo (Project Manager, C.R.B.D.A. Ikot Abasi Project) and F. S. Udo M.A.N.R., Calabar.

7. Gongola State

Alhaji Ibrahim Kashimbila, Chief Fisheries Officer and Mr. Dauda Mangton, Fisheries Superintendent M.A.N.R., Yola; The Senior Fisheries Officer U.B.R.B.D.A. and the Chief Agric. Officer U.B.R.B.D.A., Yola.

8. Imo State

Messrs H. C. Okoye, Assistant General Manager (Agriculture) and N. A. Ojike, Principal Fisheries Officer, Anambra Imo Raver Basin Development Authority; H. O. Igwe, Chief Fisheries Officer, Imo State and A. E. Okolie (Higher Fisheries Superintendent) M.A.N.R., Oguta and M. Adebisi, Federal Fisheries Officer Imo State.

9. Kaduna State

Alhaji Aliyu Magaji, Chief Water Engineer, Kaduna State Water Board (K.S.W.B.); Operations Manager (Rural Water Supply) K.S.W.B.; H. H. A. Indrasera, Senior Fisheries Officer M.A.N.R., Kaduna.

10. Kano State

Mr. Bashir Mohammed, State Fisheries Officer; Water Resources and Engineering Construction Agency (W.R.E.C.A.) Federal Fisheries Officer Kano State and Mr. M. Rehman, Principal Fisheries Officer, Hadeija Ja'amare River Basin Development Authority.

11. Kwara State

Mr. B. Ipinyomi, Principal Fisheries Officer, M.A.N.R.; Chief Water Engineer, Kwara State Water Corporation and the Principal Fisheries Officer, Niger River Basin Development Authority.

12. Lagos State

Mrs. S. T. Agbalajobi, Assistant Director of Fisheries; A. Sanni, Assistant Chief Fisheries Officer and F. O. Ajakaiye (Principal Fisheries Officer), Lagos State Fisheries Board.

13. Niger State

Messrs M. G. Qader, Principal Fisheries Officer, and Ishiaku Yeru, M.A.N.R., Minna; C. S. Nwokike, Federal Fisheries Officer, Sub-field Office, Bida; Chief Water Engineer, Niger State Water Board, Minna and P. Azodo, N.E.P.A. Field Station, Shiroro Hydroelectric Dam Project, Shiroro, Niger State.

14. Ogun State

Chief Z. A. Adesanya, Chief Fisheries Officer, and Principal Fisheries Officer, Ogun Oshun River Basin Development Authority.

15. Ondo State

Messrs E. O. Ojo, Chief Fisheries Officer, and Eric Arotiba, Fisheries Superintendent, Fisheries Division, M.A.N.R., Akure.

16. Oyo State

Messrs O. O. Elliot, Chief Fisheries Officer, M.A.N.R., J. O. Omoloyin and Sunday Ikotun Federal Fisheries Officers.

17. Plateau State

Senior Fisheries Officer, Panyam Fish Farm, Plateau State and A. N. Atanda, Federal Fisheries Officer, Plateau State.

18. Rivers State

Dr. F. O. Otobo, Assistant General Manager (Agriculture), S. A. Wokoma, Chief Fisheries Officer (operation) and S. S. Joshua, Chief Fisheries Officer all of Niger Delta Basin Development Authority, Port Harcourt; B. B. Akuiyibo, Principal Fisheries Officer and S. B. Domkpe, Higher Fisheries Superintendent, M.A.N.R. and the Permanent Secretary, Ministry of Water and Electricity Supply.

19. Sokoto State

Messrs Angus Oguike, Federal Fisheries Officer, Sokoto State; B. A. Qurera, Ministry of Water Resources and Electricity Supply, Sokoto State; R. S. Chaudhary, Principal Fisheries Officer, Sokoto Rima River Basin Development Authority.

We shall continue to rely on their co-operation in subsequent surveys and in regular correspondence to update the current information in the various States.

ABSTRACT

The paper presents a checklist of all available reservoirs, lakes, fish ponds and flood ponds in all the States of Nigeria. The checklist covers all artificial water bodies currently under construction and those proposed for the future. Major lakes (e.g. Lake Chad and Kainji Lake) and rivers, with their flood plains, traversing more than one State are listed separately to avoid duplication of surface areas in different States.

A summary of the checklist shows that out of a total of 137802 hectares (ha) of existing reservoirs in the country, Kano State topped the list with 42,773 ha followed by Niger, Gongola and Sokoto States with about 36224 ha, 17848 ha and 14623 ha respectively. Anambra State came last with about 38 ha. No reservoir was recorded for Lagos and Rivers States. Also out of a total of about 1945 ha of existing fish ponds in the country, Plateau State topped the list with about 471 ha followed by Oyo, Sokoto, Bendel and Imo States with about 449 ha, 195 ha, 130 ha and 123 ha respectively. Niger State came last with 5 ha. No fish pond was recorded in Gongola State at the time of the initial survey.

A total of 23698 ha of reservoirs and 2695 ha of fish ponds were proposed while 114034 ha of reservoirs and 336 ha of fish ponds were under construction in various parts of the country at the time of this survey.

Major lakes, rivers and their flood plains covered a total water mass of 12,004,410 ha. On the whole, there were altogether about 12,487,818 ha of water mass in the country including cattle ponds, mining paddocks and stagnant pools of seasonal rivers.

INTRODUCTION

This report presents a comprehensive checklist of water bodies in all the States of the Federation. Ita and Sado (1983) carried out a preliminary inventory of water bodies in eight out of the nineteen States of Nigeria. The report which was presented to the Fisheries Society of Nigeria (FISON) Conference in February, 1983 generated a lot of interest. The survey was part of a study to collate a comprehensive statistics of the total water surface area, location and distribution of flood ponds, cattle ponds, stagnant pools of seasonal rivers, burrow pits, mining paddocks, existing and proposed fish ponds, lakes and reservoirs including those under construction in the nineteen States of the Federation of Nigeria. The purpose of such statistics is to permit an estimation of the fish yield potentials of these inland water bodies as a prelude towards evolving proper management practices for increased inland fish production. This report is the first in the series intended to evolve a comprehensive inland fisheries management strategies for Nigeria.

In view of the fact that the inventory includes only existing water bodies, those currently under construction and those proposed for the future based on information at our disposal, we regret any omission of currently existing water bodies in any of the States. However, the report would be updated from time to time as more information becomes available.

RESULTS

Tables 1 - 19 show the checklist of reservoirs, lakes and ponds in the nineteen States of the Federation arranged in alphabetical order. The popular name, location, ownership and surface area of each water body is given in the table

for easy identification.

Table 20 summarizes the surface areas of major lakes, rivers and their flood plains while Table 21 presents a grand total summary of water surface area of lakes, reservoirs, ponds and major rivers in the country.

DISCUSSION

A cursory look at the ownership column in all the Tables reveals that with the exception of fish ponds, the majority of the reservoirs constructed in the various States are owned by either Water Corporations or River Basin Authorities operating within the States. Whereas the River Basin Authorities have separate Fisheries Divisions which could cater for fisheries interest in their reservoirs, the State Water Corporations do not utilize their reservoirs for fish production. A collaborative arrangement could therefore be worked out between such Corporations and the Fisheries Departments of the respective States with the objective of utilizing the Corporations reservoirs for fish production by way of stocking them with the commonest indigenous species such as Sarotherodon sp, Clarias sp and possibly Heterotis niloticus.

In view of the fact that the primary objective of such reservoirs is domestic water supply, care should be taken to prevent overstocking particularly since fertilization of these reservoirs might lead to eutrophication and hence to water pollution. Stocking should therefore be limited to the natural carrying capacity of the reservoir in question.

Although it is common knowledge that artificial stocking of reservoirs can lead to increased fish production, it is important to note that such an exercise becomes fruitless if fishing is not controlled in the reservoir. If the reservoir is too small to permit a limited number of registered fishermen to operate, it could be utilized for leisure sport fishing activity if it is located close to the city or a Local Government headquarters.

CONCLUSION

It is important to note that although this publication is intended to serve as a working register for fisheries managers and personnels, it is hoped that the comparative analysis between the States will provide more incentive for increased inland fisheries development in the country.

REFERENCES

Ita, E.O. and Sado, E.K. (1983a) A preliminary inventory of water bodies in Nigeria with special reference to Ponds, Lakes and Reservoirs. Paper presented during the 3rd Annual Conference of the Fisheries Society of Nigeria (FISON) Maiduguri, 22nd - 25th February, 1983.

APPENDICES

1. LEGEND

An asterisk (*) before the name of a fish pond, reservoir or lake indicates that the project is proposed but where the asterisk is placed in front of a figure, it means that, that portion (area) of an existing project is proposed.

A cross (+) before the name of a fish pond, reservoir or lake indicates that the project is under construction but where the cross appears before a figure it shows that, that portion (area) of an existing project is under construction.

N.S. indicates that no information or data were supplied by appropriate fisheries departments or water development agencies.

2. DEFINITION OF TERMS USED IN THE TEXT

Burrow pit - This is a rain fed depression formed by massive excavation during road construction.

Cattle pond - This is a small earth dam or embankment constructed by local communities to conserve drainage water for cattle during the dry season. Such a dam has no outflow channel and excess water flows either over the dam or through extreme ends of the embankment.

Dam - This is a barrier across seasonal or perennial river intended to hold back (store) the water for either domestic use, irrigation or hydroelectric power generation. The barrier could be of concrete or earth-filled embankment.

Fish pond - A small artificial embankment for fish culture with controlled water inlet and outlet.

Flood pond - A body of water which is left behind (in troughs) on the floodplain after the flood water of a river has receded.

Lake - An inland water body of considerable size found in a natural enclosed basin or formed by building a barrier across the course of a perennial river.

Mining paddock - A fairly wide and deep excavation abandoned after mineral ore extraction and often filled with drainage and underground water.

Reservoir - An earthen receptacle for storage of water formed by the construction of either a concrete or earth filled dam usually across the main course of a perennial or seasonal river (see Dam).

River - A large natural water course which flows in a well defined channel. It may be seasonal or perennial.

Stagnant pool - A small body of stagnant water found in a depression along the course of a seasonal river during the dry season.
