

2010 IPHS Conference

14th International Planning History Society Conference, Istanbul, Turkey
"Urban Transformation: Controversies, Contrasts and Challenges" 12-15 July 2010

Conference Theme

The conference theme seeks to provide a window not only for a broad investigation of urban transformation aspects in Planning History across the world, but also for sharing professional and academic knowledge and expertise in Istanbul, in the European Capital of Culture 2010.

During the recent globalisation period, Istanbul has become the focus for a number of urban transformation initiatives, which have brought an unprecedented level of challenges in planning, urban governance, cultural and social structure, historic preservation and other areas.

Proposals will preferably address one or more of the following sub-themes:

Urban transformation and planning history [concepts of urban transformation, planning cultures and planning models]

Urban transformation strategies, policies, tools, urban management and governance,

Urban transformation and the urban space [urban form and architecture, urban transformation in heritage sites, landscapes, waterfronts, and public spaces, etc.]

Urban transformation and land use: housing and squatter settlements, commercial and industrial districts, transportation and infrastructure

Urban transformation and the society [social inclusion, social justice, urban poverty, gentrification]

Urban transformation and the economy [political economy of urban transformation, financial arrangements in urban transformation]

Urban transformation and the environment [sustainable transformation, green interventions, disaster management, etc.]

The IPHS conference organizers also welcome proposals that cover the full breadth of planning history.

Co-Host and Organizers:

Istanbul Technical University Faculty of Architecture
Istanbul Technical University Urban and Environmental Planning and Research Center

Prof.Dr.Nuran Zeren Gülersoy

Conference paper/presentation details

Title Urban climatology and urban design : a history of (non) applied science

Description The focus of this paper is not on the long history of climatic urbanism but on the immediate precedents of city-scale climatological and meteorological applications prior to the emergence in the 1990s of early work on the urban/global climate change interface.
