

Legal Studies is a fascinating area of study, full of stories about what happened to real people and how the legal system responded. The stories you will read about in this publication show the best and worst in human nature, some are funny, some are incredibly sad. One of our challenges as legal educators is to keep up-to-date with new legislation and new cases being decided. We have included plenty of questions to get class discussion and activity going.

Let the discussions begin!
