Communications in Computer and Information Science

The CCIS series is devoted to the publication of proceedings of computer science conferences. Its aim is to efficiently disseminate original research. results in informatics in printed and electronic form. While the focus is on publication of peer-reviewed full papers presenting mature work, inclusion of reviewed short papers and abstracts reporting on work in progress is welcome. too. Besides globally relevant meetings with internationally representative program committees guaranteeing a strict peer-reviewing and paper selection process, conferences run by societies or of high regional or national relevance are considered for publication as well.

The topical scope of CCIS spans the entire spectrum of informatics ranging from foundational topics in the theory of computing to information and communications science and technology and a broad variety of interdisciplinary application fields.

CCIS proceedings can be published in time for distribution at conferences. or as post-proceedings, as printed books and/or electronically; furthermore CCIS proceedings are included in the CCIS electronic book series hosted in the SpringerLink digital library.

The language of publication is exclusively English. Authors publishing in CCIS have to sign the Springer CCIS copyright transfer form, however, they are free to use their material published in CCIS for substantially changed, more elaborate subsequent publications elsewhere. For the preparation of the camera-ready papers/files, authors have to strictly adhere to the Springer CCIS Authors' Instructions and are strongly encouraged to use the CCIS LaTeX style files or templates.

Detailed information on CCIS can be found at www.springer.com

Preface

On behalf of the SPICE Organizing Committee we are proud to present the proceedings of the 13th International Conference on Software Process Improvement and Capability determination (SPICE 2013), held in Bremen, Germany, during June 4–6, 2013.

The SPICE Project was formed in 1993 to support the development of an international standard for software process assessment. The work of the project has eventually led to the finalization of ISO/IEC 15504 – Process Assessment, and its complete publication represented a climax for the work of the project. As part of its charter to provide ongoing publicity and transition support for the emerging standard, the project organized a number of SPICE Workshops and Seminars, with invited speakers drawn from project participants.

These have now evolved to a sustaining set of international conferences with broad participation from academia and industry with a common interest in model-based process improvement. This was the 13th in the series of conferences organized by the SPICE User Group to increase knowledge and understanding of the International Standard and of the technique of process assessment.

The conference program featured invited keynote talks, research papers, and industry experience reports on the most relevant topics related to software process assessment and improvement. The technical research papers were selected for presentation following peer review by members of the Program Committee. In addition, a number of tutorials were hosted.

SPICE conferences have a long history of attracting attendees from industry and academia. This confirms that the conference covers topics that are upto date, important, and interesting. SPICE 2013 offered a unique forum for industry and academic professionals to discuss their needs and ideas in the area of process assessment and improvement, and related aspects of quality management.

On behalf of the SPICE 2013 conference Organizing Committee, we would like to thank all participants. Firstly all the authors, whose quality work is the essence of the conference, and the members of the Program Committee, who helped us with their expertise and diligence in reviewing all of the submissions. As we all know, organizing a conference requires the effort of many individuals. We wish to thank also all the members of our Organizing Committee, whose work and commitment were invaluable.

June 2013

Acknowledgments

The local organizers acknowledge the support of the Chair for TZI at the University of Bremen, Prof. Dr. Rainer Malaka; the Senator for Economic Affairs and Ports of the Free Hanseatic City of Bremen, Mr. Martin Günthner; and the Senator for Education and Science of the Free Hanseatic City of Bremen, Prof. Dr. Eva Quante-Brandt.

The conference organizers wish to acknowledge the assistance and support of the SPICE User Group, SPICE 2013 Program Committee, and reviewers in contributing to a successful conference.

Table of Contents

Process Quality					
Safety as a Process Quality Characteristic	1				
Derivation of Green Metrics for Software					
Medical Device Software Processes					
A Process Assessment Model for Security Assurance of Networked Medical Devices	25				
The Approach to the Development of an Assessment Method for IEC 80001-1	37				
The Development and Current Status of Medi SPICE	49				
Design and Use of Process Models					
An Approach to Development of an Application Dependent SPICE Conformant Process Capability Model	61				
An Improvement of Process Reference Model Design and Validation Using Business Process Management	73				
Comparing SPiCE for Space (S4S) and CMMI-DEV: Identifying Sources of Risk from Improvement Models	84				
Studies of Software Development					
Assessing Software Product Management Capability: An Industry Validation Case Study	95				

Using ISO/IEC 12207 to Analyze Open Source Software Development Processes: An E-Learning Case Study	107
A Case Study on the Need to Consider Personality Types for Software Team Formation	120
Agile Development	
Assessment of Agile Maturity Models: A Multiple Case Study Ozden Ozcan-Top and Onur Demirörs	130
Agile Software Development in System Engineering Conditions Ernest Wallmüller and Fred Kaminski	142
TestSPICE and Agile Testing – Synergy or Confusion	154
IT Service Management	
Can 'Soft' Organisational Problems Be Solved by 'Hard' Process Reference Models?	165
Exploring the Impact of IT Service Management Process Improvement Initiatives: A Case Study Approach	176
Software-Mediated Process Assessment in IT Service Management Aileen Cater-Steel, Wui-Gee Tan, Mark Toleman, Terry Rout, and Anup Shrestha	188
Assessment for Diagnosis	
Balancing Agility and Discipline in a Medical Device Software Organisation	199
Investigation of Traceability within a Medical Device Organization Gilbert Regan, Fergal McCaffery, Kevin McDaid, and Derek Flood	211
Usage of Multiple Process Assessment Models	223
