ABSTRACT

Suyanti: *Evaluation of the Performance of Teachers in Pilot International Standard Junior High Schools in Yogyakarta City. Thesis. Yogyakarta: Graduate School Yogyakarta State University, 2009.*

This study aims to evaluate the performance of teachers in Pilot International Standard Junior High Schools (PISJHS) in Yogyakarta City in terms of the four competencies, namely: (1) the pedagogic competency, (2) the personality competency, (3) the social competency, and (4) the professional competency.

This study was an evaluation study employing the Goal Oriented Model of

Evaluation. The research subjects were 2 principals, 54 PISJHS teachers, and 120 PISJHS students in SMPN 5 and SMPN 8 in Yogyakarta City. The data were collected through questionnaires, observation sheets, documents, and interviews. The instrument validity included the content validity and the construct validity. The instrument reliability was assessed by using the Cronbach's Alpha formula. The reliability coefficient of the instrument for teachers was 0.941, and that for the students was 0.784. The research data were analyzed by using the descriptive statistics.

The results of the quantitative descriptive analysis show that the performance of the PISJHS teachers in Yogyakarta City is in the good category. Of the four competencies, three competencies are in the good category, namely the personality competency, the pedagogic competency, and the social competency, while the professional competency is in the moderate category. The personality competence is in the moderate category according to the students, in the high category according to the self-assessment, and in the high category according to the principals. The pedagogic competency is in the high category according to the students, in the high category according to the self-assessment, and in the very high category according to the principals. The social competency is in the high category according to the students, in the high category according to the self-assessment, and in the high category according to the principals. The professional competency is in the moderate category according to the students, in the moderate category according to the self-assessment, and in the high category according to the principals. Obstacles faced by teachers in performing professional tasks, namely (a) the ability to speak English has not been adequate either oral or written, (b) inadequate control of ICT, (c) selection of teaching materials that have not been appropriate to grade students RSBI, (d) Connect the internet that do not have in the classroom
