<b>Notation</b>	<i>page</i> vii
<b>Abbreviations</b>	viii
<b>Preface</b>	xii
<b>1 Overview of power amplifier modelling</b>	1
1.1 Introduction	1
1.2 Power amplifier modelling basics	2
1.3 System-level power amplifier models	10
1.4 Circuit-level power amplifier models	20
References	23
<b>2 Properties of behavioural models</b>	27
2.1 Introduction	27
2.2 Model-structure-based properties of behavioural models	29
2.3 Application-based model properties	30
2.4 Amplifier-based model properties	35
2.5 Amplifier characterisation	45
References	79
<b>3 Memoryless nonlinear models</b>	86
3.1 Introduction	86
3.2 Overview of memoryless behavioural models	90
3.3 A comparison of behavioural models based on PA performance prediction	95
3.4 Complex power series model	99
3.5 Saleh models	103
3.6 Modified Saleh models	106
3.7 Fourier series model	116
3.8 Bessel–Fourier models	117
3.9 Hetrakul and Taylor model	125
3.10 Berman and Mahle model	127
3.11 The Wiener expansion	127
3.12 Other comparative considerations	131
References	133

vi Contents

<b>4 Nonlinear models with linear memory</b>	136
4.1 Introduction	136
4.2 Two-box models	136
4.3 Three-box models	145
4.4 Parallel-cascade models	157
4.5 Summary	160
References	161
<b>5 Nonlinear models with nonlinear memory</b>	163
5.1 Introduction	163
5.2 Memory polynomial model	164
5.3 Time-delay neural network model	168
5.4 Nonlinear autoregressive moving-average model	174
5.5 Parallel-cascade Wiener model	179
5.6 Volterra-series-based models	184
5.7 State-space-based model	199
References	212
<b>6 Validation and comparison of PA models</b>	215
6.1 Introduction	215
6.2 General-purpose metric	215
6.3 Figures of merit based on real-world test signals	220
References	232
<b>7 Aspects of system simulation</b>	233
7.1 Introduction	233
7.2 Some relevant simulation terminology	234
7.3 Analogue-signal behavioural simulators for wireless communication systems	235
7.4 Figure of merit considerations in behavioural simulations	238
7.5 Circuit-level techniques	239
7.6 System-level techniques	242
7.7 Digital-logic simulation	244
7.8 Analogue signal – representation, sampling and processing considerations	244
7.9 Heterogeneous simulation	248
References	250
<b>Appendix A Recent wireless standards</b>	253
<b>Appendix B Authors and contributors</b>	260
<b>Index</b>	262
