PREFACE

This book is the proceedings of 'The 4th International Conference of Euro Asia Civil Engineering Forum 2013 (EACEF 2013)', held at the National University of Singapore, from 26 to 28 June 2013. The conference is hosted by The National University of Singapore (NUS), in collaboration with three universities from Indonesia, i.e. Universitas Pelita Harapan, Jakarta; Universitas Atmajaya, Yogyakarta; and Petra Christian University, Surabaya

*The theme of EACEF 2013 is '**Innovations in Civil Engineering for Society and the Environment**'. The conference brings together academicians, researchers and practitioners, especially in Civil Engineering field, from many different countries in Asia and Europe to exchange ideas and experiences, and to strengthen network among them.*

As this publication represents a wealth of knowledge of eminent researchers and engineers involved in many different areas in Civil Engineering, it is hoped that this conference proceedings will become a useful resource.
