: 13. Abstract :  
: :  
: Four pressure vessels were tested for their behaviour, :  
: under uniform internal pressure loading of 225 Kgf/cm<sup>2</sup>. :  
: The strains on the external surface were monitored, in :  
: detail in one vessel and on crucial locations for other :  
: vessels. The details of the test with the results :  
: are presented in this report. :
