December 2005

Special library

The Ali Hasyimi Library collection of rare books, manuscripts, historical objects, etc. was out of the tsunami's way. However, some library materials fell on the floor due to the preceding tremors and became wet from pipe leaks

Special library

The Ali Hasyimi Library collection now becomes important an source of Aceh history and heritage, primarily because the Aceh Documentation and Information Center (PDIA) which housed a large collection of manuscript has been completely defunct

School library

The tidal wave did not leave any readable materials behind for the library of the Technical Vocational School (SMK 2). The school's ground, including the floors of the buildings, was swamped and covered by a mixture of water, mud and all sorts of debris

School library

A sample of a desperate measure to repair the swamped books by drying them in the sun, but this is a procedure which is not acceptable nor recommended from the standpoint of conservators
