In the paper “Floating stones off El Hierro, Canary Islands: xenoliths of pre-island sedimentary origin in the early products of the October 2011 eruption” by V. R. Troll et al. (*Solid Earth*, 3, 97–110, 2012) an error occurred in the final paper. There is an error in footnote number 8 to Table 3.

The footnote currently reads as follows:

<sup>8</sup> Contaminated trachytic rind material of restingolite from El Hierro. Data obtained by XRF at the University of Bremen, Germany.

The corrected footnote should read:

<sup>8</sup> Trachyte lava from the El Golfo cliff, El Hierro. Data obtained by XRF at IFM-GEOMAR, Germany.
