Subject Index

Original Communications and Notes

- Absorption**
 Pressure, Temperature and pH Dependence of the Absorption Spectrum of Reduced Nicotinamide Adenine Dinucleotide 84
 Chromophore Content and Molar Absorptivity of Phytochrome in the P₁ Form 431
- Acacetin**
 The *Para*-O-Methylation of Apigenin to Acacetin by Cell-Free Extracts of *Robinia pseudo-acacia* L. 916
- Accessory Sex Gland**
 On the Specificity of Juvenile Hormone Biosynthesis in the Male *Cecropia* Moth 579
- 3-Acetyl-3-devinylchlorophyllide a**
 Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Acetylcholinesterase**
 Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- 8-O-Acetylmiporosid**
 Iridoids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708
- Acridone Alkaloid**
 Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Actin**
 Cytochalasin B-Induced ATPase Activity of Actin: Dependence on Monomer Concentration 1050
- Actin Polymerization**
 Cytochalasin B-Induced ATPase Activity of Actin: Dependence on Monomer concentration 1050
- Activation Volume**
 The Pressure Dependence of the Rotation of the N-Aralkylpyridinium Moiety in a Synthetic NAD⁺ Model System Studied by High Pressure HRNMR 366
- Active Particles**
 Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Acyl-CoA**
 Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Co²⁺-Acylamino Acid, Amido Hydrolase**
 Studies on the Zn²⁺/Co²⁺ Exchange with Acylamino Acid Amidohydrolase from Pig Kidney 951
- Adenosine 3'-phosphate**
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Adenostoma fasciculatum***
 Analysis of Phenolic Acids by High Performance Liquid Chromatography Using a Step-Wise Gradient 357
- Adenylylation**
 Regulatory Properties of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 784
- Adenylylation/Deadenylylation**
In Vivo Control of Glutamine Synthetase in the Facultative Phototrophic Bacterium *Rhodospseudomonas sphaeroides* 407
- Agaricus***
 Cadmium as a Growth Factor for the Mushroom *Agaricus abruptibulbus* (Peck) Kauffmann 765
- Agmatine Ureohydrolase**
 Location of Several Enzymes of L-Arginine Catabolism in *Evernia prunastri* Thallus (N) 692
- Ajuga***
 Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Alanine: Aldehyde Aminotransferase**
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Algae**
 Comparative Binding of Photosystem II – Herbicides to Isolated Thylakoid Membranes and Intact Green Algae 1041
- Alkylating NAD-Analogs**
 Half-of-the-Sites Reactivity of Glyceraldehyde-3-phosphate Dehydrogenase from Rabbit Muscle with Structural Analogs of NAD 545
- Allosteric Interaction**
 Direct Allosteric Interaction of Oxygen and Bicarbonate: N-Acetyl-alanyl-seryl-phenylalanine, N-Terminal Sequence of the β -Chains of the Haemoglobins of Nil Crocodile (*Crocodylus niloticus*) and Mississippi Crocodile (*Alligator mississippiensis*) (N) 902
- Alternaria cineraria***
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cineraria* (N) 1081
- Amine-Biosynthesis**
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Amino Acid Analysis**
 Chemical Analysis and Structure of Poliovirus. I. Cysteine/Cystine Content, Complete Amino Acid Analysis and Hydrophobicity of Poliovirus and Its Naturally Occurring Empty Capsids 164
- Amino Acid Transformation**
 Radiation Damage to Polypeptides and Proteins in the Solid State, II. Radiolysis of Poly-L-Glutamic Acid (N) 1091
- 5-Aminolevulinate Dehydratase**
 An Evolutionary Tree Based on Monoclonal Antibody-Recognized Surface Features of a Plastid Enzyme (5-Aminolevulinate Dehydratase) 44
- Aminomethylphosphonic Acids**
 Synthesis and Biological Activity of Aminomethylphosphonic Acids Related to the Herbicide Glyphosate 242
- Ammonium Assimilation**
 Molecular Characterization of Glutamine Syn-

- thetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* . . . 246
- c-AMP
Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 193
- Amphibia
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686
- Anacystis*
Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Andrena*
Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoea* F. (*Hym.*, *Apoidea*) . . . 928
- Aniba*
Flavonoid Glycosides and Pyrones in *Aniba* Species (Lauraceae) 385
- Anthocyanins
The Corolation of *Gladiolus*. I. Survey of Anthocyanins in Petals of *Gladiolus* 378
Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 619
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Anthocyanin Biosynthesis
Genetic Control of Flavanone 3-Hydroxylase Activity and Flavonoid 3'-Hydroxylase Activity in *Antirrhinum majus* (Snapdragon) 411
- A-5-MeC Antibody
The Isolation of Antibodies Specific for 5-Methyl-Cytidine-Bovine Serum Albumin 459
- Antibody Quantitation
The Isolation of Antibodies Specific for 5-Methyl-Cytidine-Bovine Serum Albumin 459
- Antifungals
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-methyl-glutaryl-CoA-reductase-[EC 1.1.1.34]Activity in *Saccharomyces cerevisiae* 798
- Rh Antigens
Different Protein-Lipid Interaction in Human Red Blood Cell Membrane of Rh Positive and Rh Negative Blood Compared with Rh_{null} . . . 988
- Antimicrobial Activity
Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Antimycotics
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-methyl-glutaryl-CoA-reductase-[EC 1.1.1.34]Activity in *Saccharomyces cerevisiae* 798
- Antirrhinum majus*
Genetic Control of Flavanone 3-Hydroxylase Activity and Flavonoid 3'-Hydroxylase Activity in *Antirrhinum majus* (Snapdragon) 411
Oxidation of Flavones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) . . . 737
- Antiserum Specificity
Immunoadsorption as a Means for the Purification of Low Molecular Weight Compounds: Isolation of Ecdysteroids from Insects 790
- Apigenin
Oxidation of Flavones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) . . . 737
- Apo-Enzyme
Studies on the Zn²⁺/Co²⁺ Exchange with Acrylamino Acid Amidohydrolase from Pig Kidney . . . 951
- Arginase
Location of Several Enzymes of L-Arginine (Catabolism) in *Evernia prunastri* Thallus. (N) . . . 692
- Arrhenius Plots
Arrhenius Plots Indicate Localization of Photosynthetic and Respiratory Electron Transport in Different Membrane Regions of *Anabaena* . . . 1036
- Artemisia absinthium*
On the Essential Oil Components from *Artemisia absinthium* L. 369
- Artemisia dracunculus*
On the Composition of the Essential Oil from *Artemisia dracunculus* L. during the Vegetation Period 724
- Arum maculatum*
Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Ezyme Involved in Secondary Metabolism 625
- Asclepiadaceae
Investigations on *Hoya species*. VIII. Leaf Flavonols and Di-C-glycosylflavones (N) . . . 1084
- Ascomycetes
Volatile Terpenes from *Ceratocystis fimbriata* (N) . . . 1075
- Ascorbic Acid
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
Paramagnetic Changes in Pulmonary Tumors . . . 5
On a Possible Mechanism of Action of Interferon Ascorbate Oxidase and Its Possible Involvement in Cancer 804
Is there an Equilibrium between Ascorbic and Dehydroascorbic Acids? (N) 1088
- Aspergillus oryzae*
Co⁺²-Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- ¹⁴C- and ¹⁵N-Assimilation
Photosynthetic Assimilation of ¹⁵N-Ammonia and ¹⁵N-Nitrate in the Marine Diatoms *Belerochea yucatanensis* (von Stosch) and *Skeletonema costatum* 834
- Assimilatory Nitrate Reductase
Electron Transport to Assimilatory Nitrate Reductase in *Azotobacter vinelandii* 1030
- ATP Synthesis
ATP Synthesis and Generation of Electrochemical Gradients of Protons in the Catecholamine Storage Organelle of the Adrenal Medulla . . . 1056
- ATPases
¹⁸O-Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State 539
- Atrazine
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex . . . 98
- Attractant
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) . . 178
- Audiospectrographic Study
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Auxin
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles . . . 997

- Avena* Coleoptiles
Initial Phases of Growth Induced by Sterylglucosides and Indole-3-acetic Acid in *Avena* Coleoptiles (N) 900
- Avena sativa*
Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 199
Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
Preparation and Properties of Chromopeptides from the P_{fr} Form of Phytochrome 440
High Performance Liquid Chromatographic Analysis of Steroidal Saponins from *Avena sativa* L. (N) 1072
- Azadirachta indica*
Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Azadirachtin
Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Azotobacter vinelandii*
Electron Transport to Assimilatory Nitrate Reductase in *Azotobacter vinelandii* 1030
- Bacterial Constituents
7-Hydroxy Tropolone from *Pseudomonas* sp. (N) 728
- Bacteriochlorophyllide a
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Bacteriochlorophylls
Δ₂,10-Phytadienol as Esterifying Alcohol of Bacteriochlorophyll b from *Éctothiorhodospira halochloris* 417
- Baker's Yeast
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- Behavioral Mutant
Drosophila Males Produce a Pheromone which Inhibits Courtship 694
- Benzimidazole Nucleosides
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126
- Bicarbonate
Direct Allosteric Interaction of Oxygen and Bicarbonate: N-Acetyl-alanyl-seryl-phenylalanine, N-Terminal Sequence of the β-Chains of the Haemoglobins of Nil Crocodile (*Crocodylus niloticus*) and Mississippi Crocodile (*Alligator mississippiensis*) (N) 902
- Bilayer
X-Ray Studies on Phospholipid Bilayers. I. Polymorphic Forms of Dimyristoyl Lecithin 875
- Biochemistry
Binding of Polylysine and Ethidium Bromide to Nucleosomal DNA: Comparison of Biochemical and Electron Microscopical Results 149
- 3-Biosides
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Biosynthesis
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
Formation of Fusaric Acid by Fungi of the Genus *Fusarium* (N) 338
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* 484
Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
Conversion of Flavanone to Flavone, Dihydroflavonol and Flavonol with an Enzyme System from Cell Cultures of Parsley 742
The Para-O-Methylation of Apigenin to Acaetin by Cell-Free Extracts of *Robinia pseudoacacia* L. 916
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 1921
- Blood Vascular System
Vascular Specialization in Fish, but No Evidence for Lymphatics (N) 490
- Blepharisma japonicum*
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* (N) 180
- Blepharismone
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* (N) 180
- Blood Count
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
- Blue-Green Algae
Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
Arrhenius Plots Indicate Localization of Photosynthetic and Respiratory Electron Transport in Different Membrane Regions of *Anabaena* 1036
- Boletales
Metabolites of 1,2,4-Trihydroxybenzene from Fruiting Bodies of *Gomphidius maculatus* and *G. glutinosus* (Boletales) (N) 488
- Bony Fishes
Vascular Specialization in Fish, but No Evidence for Lymphatics 490
- Bovine-Brain
Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- Bovine Satellite DNAs
A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA 973
- Brassicaceae
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Brown Algae
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- Burley Tobacco
New Cembranoids from Burley Tobacco (N) 1077
- Cadmium
Cadmium as a Growth Factor for the Mushroom *Agaricus abruptibulbus* (Peck) Kauffmann 765

- Calcium
Effect of Isobutylmethylxanthine and Related Drugs on the Receptor Response (ERG; a-Wave) of the Frog Retina at Various Extracellular Calcium Concentrations 597
- Calf Thymus DNA
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Calf Thymus Freezing
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Callus Culture
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Cancer
On a Possible Mechanism of Action of Interferon 323
- Cap Analogs
Preparation of 5',5''-Phosphate linked Dinucleosides 135
- Carbohydrate Moiety
Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Carbohydrates
Discrimination of Two Fusogenic Properties of Aqueous Polyethylene Glycol Solutions 593
- 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- β -Carboxylation
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- [¹⁴C] β -Carotene
Carotenoids in the Stick Insect, *Ectatosoma tataratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Caroten-2-one 755
- Carotenoids
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
- Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* 276
- Caryophyllaceae
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* 484
- Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
- Catecholamine Storage Organelles
ATP Synthesis and Generation of Electrochemical Gradients of Protons in the Catecholamine Storage Organelle of the Adrenal Medulla 1056
- Catharanthus roseus*
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Cations
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets 686
- Cell Damage
Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Cell Cultures
Conversion of Flavanone to Flavone, Dihydroflavonol and Flavonol with an Enzyme System from Cell Cultures of Parsley 742
- Cell Fusion
Discrimination of Two Fusogenic Properties of Aqueous Polyethylene Glycol Solutions 593
- Cell Membrane
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Cell Rotation
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Cembranoids
New Cembranoids from Burley Tobacco (N) 1077
- Central Nervous System
Action Potentials in "Non-Spiking" Visual Interneurons 470
- Ceratocystis fimbriata*
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- C-Glycosylflavones
Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
- Chalcone Synthase
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
- Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 619
- Change in Absorption
Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
- Changes in Amino Acid Compositions
Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition 310
- Cl⁻-Channel
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles 997
- Chasing
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Chelating Ligands
Studies on the Zn²⁺/Co²⁺ Exchange with Acylamino Acid Amidohydrolase from Pig Kidney 951
- Chemosystematics
Flavonoidglycoside and Pyrone bei *Aniba*-Arten (Lauraceae) 385
- Chemotaxis
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Chemotaxonomy
Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Investigations on *Hoya species*. VIII. Leaf Flavonols and Di-C-glycosylflavones (N) 1084
- Chlamydomonas reinhardtii* CW 15
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Chlorella*
A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396

- Chlorella fusca*
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
- 4-Chloroaniline
Incorporation of Chlorinated Anilines into Lignin 714
- Chlorophyll
Esterification of Chlorophyllide in Prolamellar Body (PLB) and Prothylakoid (PT) Fractions from *Avena sativa* Etioplasts 58
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
- Chlorophyll a/b Ratio
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chlorophyll Degradation
Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
Pyropheophytin a Accompanies Pheophytin a in Darkened Light Grown Cells of *Euglena* 827
- Chlorophyll Fluorescence
The Inhibition of Photosynthetic Light Reactions by Halogenated Naphthoquinones 645
- Chlorophyll-Proteins
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chlorophyllides a and b
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Chloroplast Development
Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chloroplast Envelope
The Permeability Coefficients of the Plasmalemma and the Chloroplast Envelope of Spinach Mesophyll Cells for Phytohormones 672
- Chloroplast Membranes
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex 98
- Chloroplasts
Reinvestigation of the Effects of Disalicylidenepranediamine (DSPD) and 2-Heptyl-4-hydroxyquinoline-N-oxide (HQNO) on Photosynthetic Electron Transport 109
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
Subcellular Compartmentation of Indole-3-acetic Acid in Mesophyll Cells of *Spinacia oleracea* 679
Evidence for a Transcarboxylase Reaction in Maize Chloroplast Extracts (N) 688
Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Chromatin
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Chrysosplenium americanum*
Polymethylated Flavonols of *Chrysosplenium americanum*. I. Identification and Enzymatic Synthesis 730
- Cineraria
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Cinnamoyl Putrescines
Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
- Circadian Rhythm
Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Taphozous melanopogon* 1068
- Circular Dichroism
Protamines. VII. Circular Dichroism Study of Salmine A I 305
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
- Clerodendrum*
Iridoids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708
- C₄-Metabolism
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- C-Methylated Flavones
Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- Coa/Co β -Isomerism
CO α /Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- Cobyric Acid
About the Iron Analogues of Cobalamin and Cobyric Acid 9
- Coenzyme Derivatives
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Coleoptile
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles 997
A H⁺/Ca²⁺ Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca²⁺ Pump 1009
- Collagen
Fitting of SAXS-Curves by Nonlinear Regression 333
- Colony Assay
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Compartmental Analysis
Subcellular Compartmentation of Indole-3-acetic Acid in Mesophyll Cells of *Spinacia oleracea* 679
- Computer Programs
A Program Package for the Analysis of Peptide Conformations on the TR 440 (N) 347
- Concentrations
Effect of Oxygen on Photosynthetic CO₂ Fixation of *Synechococcus* 93
- Conformation Analysis
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126

- Coniferyl Alcohol
Incorporation of Chlorinated Anilines into Lignin 714
- Conjugation
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* 180
- Continuous ¹⁴CO₂ Evolution
In vivo Evidence for a Functional Glycolytic Compartment in Synchronous Yeast Cells 615
- Contrast
A Simple Coding Procedure Enhances a Neuron's Information Capacity (N) 910
- Copper and Spin Concentration of Blood
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
- Copper Proteins
Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Corixa*
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Corpus allatum
On the Specificity of Juvenile Hormone Biosynthesis in the Male *Cecropia* Moth 579
- Cosmos
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
- p*-Coumaroyl-CoA
Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 197
- Courtship
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Crayfishes
Isolation of Nuclei from Crayfish Tissues and Demonstration of Nuclear Ecdysteroid Receptors 326
- Cross-Linking
Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Cryopreservation
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Crystal Packing Forces
Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Crystals
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Cruciferae
Enzymatic Preparation and Properties of Some Desulfoglucosinolates 16
- Cultures
Effect of Glucocorticoids, Insulin and a Growth Promoting Tripeptide on the Biosynthesis of Plasma Proteins in Serum-Free Hepatocyte Cultures (N) 350
- Curvularin
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Cutleria multifida*
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Cyanobacteria
Hydrogen Evolution Catalyzed by Hydrogenase in Cultures of Cyanobacteria 87
- Cyclic AMP-Dependent and -Independent Protein Kinases in HeLa Cells and in Human Cervix Carcinoma 552
- Cyclic Guanosine Monophosphate
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- Cyclostomes
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686

 Iridoids in Some *Teucrium* and *Ajuga* Species 697
 Iridoids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708
- Iron-B₁₂-Analogues
 About the Iron Analogues of Cobalamin and Cobyrinic Acid 9
- Iron Stress
 Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
- Isobutylmethylxanthine
 Effect of Isobutylmethylxanthine and Related Drugs on the Receptors Response (ERG; a-Wave) of the Frog Retina at Various Extracellular Calcium Concentrations 597
- Isophorocabilin
 Chromophore Content and Molar Absorptivity of Phytochrome in the P_r Form 431
- Isoscoparin
 Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
- JH Biosynthesis
 On the Specificity of Juvenile Hormone Biosynthesis in the male *Cecropia* Moth 579
- Kalanchoe bl.*
 Succulence - Induction in *Kalanchoe blofeldiana* under Long-Day Conditions by a Lipophile Fraction out of Flowering *Kalanchoe* and MS-Identification of Pterosterone 465
- Kalmia latifolia*
 Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- 7-Keto-cholesterol
 Steroids of Human Thymi (N) 1086
- Kinetic Properties
 Co⁺²-Substituted Acylamino Acid Amido Hydrolyase from *Aspergillus oryzae* 751
- Kok Effect
 The Kok Effect and Its Relationship to Photorepiration in Tobacco 450
- Lactic Dehydrogenase
 Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Lactone
 Dryopterin, a Novel C₁₇-Flavan from *Dryopteris filix-mas* 607
- Lamiaceae
 Oviposition Deterrence Activity in Some Lamiaceae Plants against Some Insect Pests 122
- Lateral Line Afferents
 Electoreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- Lateral Line Efferents
 Electoreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- Leaf Wax
 9(11)-Fernene and Its 21-Epimer as an Epicuticular Layer on Ferns (N) 896
- Lectins
 Effect of Lectins and Chemical Modification on the Hemagglutinin Activity of Human Plasma Fibronectin 863

- Leukemia
 Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Leukemia L1210
 Specific Positional Distribution of Acyl Moieties in Phospholipids is not Generally Deleted in Neoplastic Cells 81
- Li⁺
 Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Taphozous melanopogon* 1068
- Lichen Substances
 Pannaric Acid and Propyrylic Acid Methyl Ester Lichen Substances in the Genus *Psoroma* (N) 893
- Life Cycle
 Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcicolubris* sp. nov, Snakes Function as Definitive Hosts (N) 1093
- Lifetimes
 Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Ligase
 Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 197
- Lignin
 Incorporation of Chlorinated Anilines into Lignin 714
- Liliaceae
 Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa* cv. "Apeldoorn" 721
- Liliopsida
 The Cyanogenic Glycoside of *Holcus mollis* (N) 336
- Linolenic Acid
 Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Lipid and Fatty Acid Composition
 Light-Dependent Changes in the Lipid and Fatty Acid Composition of Phycocyanin-Free Photosynthetic Lamellae of *Synechococcus* 856
- Lipid Peroxidation
 Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Lipid Phase Transition
 Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
- Lipid Transition Temperature
 Different Protein Lipid Interaction in Human Red Blood Cell Membrane of Rh Positive and Rh Negative Blood Compared with Rh_{null} 988
- Lipid Transport
 Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Lipopolysaccharide
 Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Liver Perfusion
 Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Lizard
 Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcicolubris* sp. nov, Snakes Function as Definitive Hosts (N) 1093
- Localization
 Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
- Locusta migratoria*
 Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Long Spacing
 Fitting of SAXS-Curves by Nonlinear Regression 333
- Low Temperature
 Immobilization of Erythrocytes by Radiation Polymerization of Glass-Forming Monomers at Low Temperatures 1062
- Lung Cancer
 Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Luteolin
 Oxidation of Flavanones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) 737
- Lymphatics
 Vascular Specialization in Fish, but No Evidence for Lymphatics (N) 490
- Lymphocyte Chalone
 Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Lymphocyte Responsiveness
 Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Maize
 Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5'-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 193
- Majorana hortensis* M.
 On the Essential Oil Components from *Majorana hortensis* Moench 23
- Malate Synthase
 Electrophoretic and Chemical Studies on the X-Ray Damage of Malate Synthase 516
- Mammalian Type-C Viruses
 Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes (N) 353
- Mandibular Glands
 Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoea* F. (*Hym., Apoidea*) 928
- Marine Diatoms
 Photosynthetic Assimilation of ¹⁵N-Ammonia and ¹⁵N-Nitrate in the Marine Diatoms *Bellerophonema yucatanensis* (von Stosch) and *Skeletonema costatum* 193
- Mass-Spectrometry
 Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5'-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 834
- The Kok Effect and Its Relationship to Photorespiration in Tobacco 450

- Iroids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708

- Matthiola incana*
Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 662
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Media Effects
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Membrane
X-Ray Studies on Phospholipid Bilayers. I. Polymorphic Forms of Dimyristoyl Lecithin 875
- Membrane-Bound
Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- Membrane Ghosts
ATP Synthesis and Generation of Electrochemical Gradients of Proton in the Catecholamine Storage Organelle of the Adrenal Medulla 1056
- Membrane-Phloretin Interaction
Interaction of Phloretin with the Human Red Cell Membrane and Membrane Lipids: Evidence from Infrared, Raman and ESR Spectroscopy 586
- Membrane Vesicles
A H^+/Ca^{2+} Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca^{2+} Pump 1099
- Mesophyll Protoplasts
Distribution of Phenylalanine Ammonia-Lyase and 4-Coumarate: CoA Ligase in Oat Primary Leaf Tissues 389
- Metabolic Compartmentation
Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Metabolism
Carotenoids in the Stick Insect, *Ectatosoma tataratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Caroten-2-one 755
- C_4 -Metabolism
 C_4 -Metabolism in Marine Brown Macrophytic Algae 840
- Methemoglobin
Altered Heme Environments in Opossum and Rabbit Methemoglobins 964
- 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Methyl Corrinoids
Coa/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- Methylation
Methylation of 3',4' Di-OH C-Glucosylflavones in *Silene* (N) 486
- O-Methyltransferase
Polymethylated Flavonols of *Chrysosplenium americanum*. I. Identification and Enzymatic Synthesis 730
- Micellar Complexes
Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes (N) 353
- Microbial Acylamino Acid Amido Hydrolase
Co $^{2+}$ -Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- Mode of Action
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-Methyl-Glutaryl-CoA-Reductase-[EC1.1.1.34]Activity in *Saccharomyces cerevisiae* 798
- Model *syn* and *anti* Conformations
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126
- Molecular Forms
Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- Molecular Structures
Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Monoclonal Antibodies
An Evolutionary Tree Based on Monoclonal Antibody-Recognized Surface Features of a Plastid Enzyme (5-Aminolevulinate Dehydratase) 44
- Monoterpenes
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Morphology
Binding of Polylysine and Ethidium Bromide to Nucleosomal DNA: Comparison of Biochemical and Electron Microscopical Results 149
- Mouse
The Specific Labeling in Hypertonic Medium of a Spleen Protein (N) 183
Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904

- Protochlorophyllide
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase
Red Light Induced Change in the Saponin Content of Prolamellar Bodies in *Avena sativa* 869
- Proton Polarizability
Aspartic Acid-Aspartate and Glutamic Acid-Glutamate Hydrogen Bonds Having Great Proton Polarizability – IR Investigations 961
- Proton Pump
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles 997
- Protoplasts
Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
- Pseudomonas* sp.
7-Hydroxy Tropolone from *Pseudomonas* sp. [1] 728
- Psoroma*
Pannaric Acid and Prophyritic Acid Methyl Ester Lichen Substances in the Genus *Psoroma* (N) 893
- Pterocarpan
Induction of Phytoalexin Synthesis in Soybean. Structure and Reactions of Naturally Occurring and Enzymatically Prepared Prenylated Pterocarpan from Elicitor-Treated Cotyledons and Cell Cultures of Soybean 234
- Pterosterone
Succulence – Induction in *Kalanchoe blofeldiana* under Long-Day Conditions by a Lipophile Fraction out of Flowering *Kalanchoe* and MS-Identification of Pterosterone 465
- Pulmonary Tumors
Paramagnetic Changes in Pulmonary Tumors 5
- Ca²⁺ Pump
AH⁺/Ca²⁺ Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca²⁺ Pump 1009
- Purification
Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes 353
Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
- Pyridoxal 5'-Phosphate
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Primidine Tracts
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Pyrochlorophyllide a,
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthase 51

- Pyrones
Flavonoid Glycosides and Pyrones in *Aniba* Species (Lauraceae) 385
- Pyropheophytin
Pyropheophytin Accompanies Pheophytin in a Darkened Light Grown Cells of *Euglena* 827
- Pyruvate Metabolism
In vivo Evidence for a Functional Glycolytic Compartment in Synchronous Yeast Cells 615
- Quinone
Inhibition of Photosynthetic Electron Transport by the Quinone Antagonist UHDBT 272
- Quinones and Quinonediaamines
Site of Action of 2,5-Dimethoxy-3,6-Dichloro-*p*-Benzoquinone in the Photosynthetic Electron Transport Chain 656
- Radiation Damage
Electrophoretic and Chemical Studies on the X-Ray Damage of Malate Synthase 516
Radiation Damage to Polypeptides and Proteins in the Solid State, II Radiolysis of Poly-L-Glutamic Acid (N) 1091
- Radiation Damage to Proteins
Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition 310
- Radiation Polymerization
Immobilization of Erythrocytes by Radiation Polymerization of Glass-Forming Monomers at Low Temperatures 1062
- Raphanus*
Sinapine as a Supply of Choline for the Biosynthesis of Phosphatidylcholine in *Raphanus sativus* Seedlings 215
- Rat
Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Rat Hepatocytes
Effect of Glucocorticoids, Insulin and a Growth Promoting Tripeptide on the Biosynthesis of Plasma Proteins in Serum-Free Hepatocyte Cultures (N) 350
- Reassociation
Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Receptor Protein
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex 98
- Receptor Specificity
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Reconstitution
Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Red Light
Red Light Induced Change in the Saponin Content of Prolamellar Bodies in *Avena sativa* 869
- Redox Potential
Is there an Equilibrium between Ascorbic and Dehydroascorbic Acids? (N) 1088
- Regulation
Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Reptilia
Direct Allosteric Interaction of Oxygen and Bicarbonate: N-Acetyl-alanyl-seryl-phenylalanine, N-Terminal Sequence of the β -Chains of the Haemoglobins of Nil Crocodile (*Crocodylus niloticus*) and Mississippi Crocodile (*Alligator mississippiensis*) (N) 902
- Resonance Frequency
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Respiration
Arrhenius Plots Indicate Localization of Photosynthetic and Respiratory Electron Transport in Different Membrane Regions of *Anabaena* 1036
- Rhodospseudomonas capsulata*
Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
Molecular and Kinetic Characterization of Xanthine Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 932
Nitrate Photo-Assimilation by the Phototrophic Bacterium *Rhodospseudomonas capsulata* E₁F₁ 1025
- Rhodospseudomonas palustris*
Molecular Characterization of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 246
Regulatory Properties of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 784
- Rhodospseudomonas sphaeroides*
In Vivo Control of Glutamine Synthetase in the Facultative Phototrophic Bacterium *Rhodospseudomonas sphaeroides* 407
- Ribulose-1,5-bisphosphate Carboxylase
Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Robinia pseudoacacia*
The *Para*-O-Methylation of Apigenin to Acacetin by Cell-Free Extracts of *Robinia pseudoacacia* L. 916
- Rumex*
"Yellow Flavonols" as Components of Pollen Pigmentation 204
- Ruta graveolens*
Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Rutaceae
Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Rutacridone-Epoxide
Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Salmine
Protamines. VII. Circular Dichroism Study of Salmine A I 305
- Salts
Discrimination of Two Fusogenic Properties of Aqueous Polyethylene Glycol Solutions 593

- Saponin
 Red Light Induced Change in the Saponin Content of Prolamellar Bodies in *Avena sativa* 869
- Sarcocystis*
 Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcolubris* sp. nov, Snakes Function as Definitive Hosts 1093
- Sarcoma 180
 Specific Positional Distribution of Acyl Moieties in Phospholipids is not Generally Deleted in Neoplastic Cells 81
- Satellite DNA Evolution
 A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA 973
 1.715, 1.711b Satellite DNAs
 A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA 973
- Secondary Structure Prediction
 Protamines. VII. Circular Dichroism Study of Salmine A I 305
- Senecio cruentus*
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Sensitivity Threshold
 Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Sex Pheromone
 A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) 178
Drosophila Males Produce a Pheromone which Inhibits Courtship 694
- Sexual Behavior
Drosophila Males Produce a Pheromone which Inhibits Courtship (N) 694
- Shikimic Acid
 Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
- Signal-Receptor
 Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Silene*
 Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* (N) 484
 Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* (N) 486
- Sinapine
 Sinapine as a Supply of Choline for the Biosynthesis of Phosphatidylcholine in *Raphanus sativus* Seedlings 215
- Sinapis alba*
 Radioactively Labelled Phytic Acid from Maturing Seeds of *Sinapis alba* 383
- Small Angle X-Ray Diffraction
 Fitting of SAXS-Curves by Nonlinear Regression (N) 333
- Solanaceae
 New Cembranoids from Burley Tobacco (N) 1077
- Solanum tuberosum* L.
 Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Solid State Radiolysis
 Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition 310
- Soybean
 Induction of Phytoalexin Synthesis in Soybean. Structure and Reactions of Naturally Occurring and Enzymatically Prepared Prenylated Pterocarpanes from Elicitor-Treated Cotyledons and Cell Cultures of Soybean 234
- CD Spectra
 Co α /Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- ORD Spectra
 Co α /Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- Spectroscopy
 Chromophore Content and Molar Absorptivity of Phytochrome in the P_r Form 431
- Sperchia intractana*
 A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) 178
- Spin Concentration
 Paramagnetic Changes in Pulmonary Tumors 5
 On a Possible Mechanism of Action of Interferon 323
- Spin State
 Altered Heme Environments in Opossum and Rabbit Methemoglobins 964
- Spinach
 The Permeability Coefficients of the Plasmalemma and the Chloroplast Envelope of Spinach Mesophyll Cells for Phytohormones 672
- Spinach Chloroplast Lamellae
 Isolation and Identification of an Oxygen Reducing Factor (ORF) from Isolated Spinach Chloroplast Lamellae 284
- Spinacea oleracea*
 "Yellow Flavonols" as Components of Pollen Pigmentation 204
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Spiroacetals
 Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoa* F. (*Hym., Apoidea*) 928
- Spleen
 The Specific Labeling in Hypertonic Medium of a Spleen Protein (N) 183
- Spodoptera littoralis*
 Fatty Acid Composition of Eggs during Development of the Cotton Leaf-Worm, *Spodoptera littoralis* Boisduval 562
- Springene
 Mammalian Pheromone Studies, IV. Terpenoid Compounds and Hydroxy Esters from the Dorsal Gland of the Springbok, *Antidorcas marsupialis* (N) 340
- Stability of Chlorophylls
 Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Steroidal
 High Performance Liquid Chromatographic Analysis of Steroidal Saponins from *Avena sativa* L. 1072
- Sterol Biosynthesis
 The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-Methyl-Glutaryl-CoA-Reductase-[EC 1.1.1.34] Activity in *Saccharomyces cerevisiae* 798

- Sterylglucosides
 Initial Phases of Growth Induced by Sterylglucosides and Indole-3-acetic Acid in *Avena Coleoptiles* (N) 900
- Stick Insects
 Carotenoids in the Stick Insect, *Ectatosoma tiaratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Caroten-2-one 755
- Stizolobium hassjoo*
 Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Strain Specificity
 Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Strictosidine Synthase
 Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Stridulation
 An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) 189
- Structure
 Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Subcellular Localization
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Subunits
 Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Succulence
 Succulence - Induction in *Kalanchoe blofeldiana* under Long-Day Conditions by a Lipophile Fraction out of Flowering *Kalanchoe* and MS-Identification of Pterosterone 465
- Sucrose
 Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa* cv. "Apeldoorn" 721
- Sulphonyl Group Incorporation
 In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Surface Enhanced Raman Scattering
 Hydrogen-Deuterium Exchange in Adenosine 5'-Monophosphate Detected by Surface Enhanced Raman Scattering (SERS) 809
- Suspension Cultures
 Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
- Synchrotron X-Ray
 Fitting of SAXS-Curves by Nonlinear Regression 333
- Synchronous Yeast
 In vivo Evidence for a Functional Glycolytic Compartment in Synchronous Yeast Cells 615
- Synechococcus*
 Light-Dependent Changes in the Lipid and Fatty Acid Composition of Phycocyanin-Free Photosynthetic Lamellae of *Synechococcus* 856
- Ultrastructure of Differently Pigmented *Synechococcus* Cells (N) 907
- Synthesis
 Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Synthesis of Halogeno Analogues
 Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126
- Synthetase
 A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396
- Taphozous melanopogon*
 Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Taphozous melanopogon* 1068
- Teleosts
 Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686
- Teratogenicity
 Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904
- Terpenes
 On the Essential Oil Components from *Majorana hortensis* Moench 23
 On the Essential Oil Components from *Artemisia absinthium* L. 369
 On the Composition of the Essential Oil from *Artemisia dracuncululus* L. during the Vegetation Period 724
- Terpenoids
 Mammalian Pheromone Studies, IV. Terpenoid Compounds and Hydroxy Esters from the Dorsal Gland of the Springbok, *Antidorcas marsupialis* (N) 340
- Territorial Marking
 Mammalian Pheromone Studies, V. Compounds from the Preorbital Gland of the Grysbok, *Raphicerus melanotis* (N) 344
- 11-Tetradecenyl Acetate
 A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand 178
- Teucardosid
 Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Teucrium
 Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Thalidomide-like Malformations
 Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904
- Thermoluminescence
 Reinvestigation of the Effects of Disalicylidenepranediamine (DSPD) and 2-Heptyl-4-hydroxyquinoline-N-oxide (HQNO) on Photosynthetic Electron Transport 109
 Two Sites of Inhibition of the Photosynthetic Electron Transport Chain by the Herbicide Trifluralin 853
- Thiabendazole
 Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Thioredoxin
 A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396

- 4-Thiouridine
Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Thylakoid Composition
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* 276
- Thylakoid Membrane
Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Thylakoids
Esterification of Chlorophyllide in Prolamellar Body (PLB) and Prothylakoid (PT) Fractions from *Avena sativa* Etioplasts
Comparative Binding of Photosystem II - Herbicides to Isolated Thylakoid Membranes and Intact Green Algae 1041
- Tobacco Mutants
The Kok Effect and Its Relationship to Photorespiration in Tobacco
Dependence of Photorespiration and Photosynthetic Unit Sizes on Two Interdependent Nuclear Gene Factors in Tobacco 662
- Tortricidae
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) 178
- Tracking
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Transcarboxylase
Evidence for a Transcarboxylase Reaction in Maize Chloroplast Extracts (N) 688
- Transplantable Tumours
Intracellular Effect of Hydroxyalkenals on Animal Tumors 572
- Trichoplax*
DNA Content and Fragmentation of the Egg Nucleus of *Trichoplax adhaerens* 564
- Trifluralin
Two Sites of Inhibition of the Photosynthetic Electron Transport Chain by the Herbicide Trifluralin 853
- 1,2,4-Trihydroxybenzene
Metabolites of 1,2,4-Trihydroxybenzene from Fruiting Bodies of *Gomphidius maculatus* and *G. glutinosus* (Boletales) [1] (N) 488
- Tropic Acid Biosynthesis
Chemical Synthesis of α -Formylphenylacetic Acid, the Postulated Precursor of Tropic Acid 611
- Tryptophan Decarboxylase
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Tryptophan Synthase
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Tulipa*
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals
Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa cv. "Apeldoorn"*
- UDP-Galactose
Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Ultrastructure
Ultrastructure of Differently Pigmented *Synechococcus* Cells (N) 907
- ¹⁸O₂-Uptake
The Kok Effect and Its Relationship to Photorespiration in Tobacco 450
- Urease
Location of Several Enzyme of L-Arginine Catabolism in *Evernia prunastri* Thallus (N) 692
- Urodele Lateral Line System
Electroreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- L-Usnic Acid
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
- Usnic Acid Dehydrogenase
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
- Vanadate
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella fusca* 207
- Vascular Tissue
Distribution of Phenylalanine Ammonia-Lyase and 4-Coumarate: CoA Ligase in Oat Primary Leaf Tissues 389
- Vectors
Oviposition Deterrence Activity in Some Lamiaceae Plants against Some Insect Pests 122
- Vision
Action Potentials in "Non-Spiking" Visual Interneurons 470
- Vitamin B₁₂
About the Iron Analogues of Cobalamin and Cobyric Acid
Coa/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- X-Ray Crystal Structure Analysis of Factor A (2-Methyladeninyl-cyanocobamide), a Native Vitamin B₁₂-Analogue 506
- Vitamin B₁₂-factor A (2-Methyladeninyl-cyanocobamide)
X-Ray Crystal Structure Analysis of Factor A (2-Methyladeninyl-cyanocobamide), a Native Vitamin B₁₂-Analogue 506
- Vitexin
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* (N) 484
- Volatile Metabolites
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Waterbug
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Wound Reactions
Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115

- X-Ray Crystal Structure Analysis
 X-Ray Crystal Structure Analysis of Factor A
 (2-Methyladeninyl-cyanocobamide), a Native
 Vitamin B₁₂-Analogue 506
- X-Ray Diffraction
 X-Ray Studies on Phospholipid Bilayers. I. Poly-
 morphic Forms of Dimyristoyl Lecithin 875
- Xanthine Dehydrogenase
 Molecular and Kinetic Characterization of Xan-
 thine Dehydrogenase from the Phototrophic
 Bacterium *Rhodospseudomonas capsulata* 933
- 2''-O-Xyloside
 Structure and Biosynthesis of Vitexin 2''-O-Xylo-
 side in *Silene alba* (N) 484
- Yeast
 Initiation of Protein Synthesis in Yeast: Binding
 of Met-tRNA_i 142
In vivo Evidence for a Functional Glycolytic
 Compartment in Synchronous Yeast Cells 615

Euglena, Chlorophyll Degradation, Pyropheophytin, Photosynthesis, High Performance Chromatography

Light-grown non-dividing cells of *Euglena gracilis* Klebs var. *bacillaris* Cori form pheophytin a like pigments from chlorophyll a without loss of viability when they are allowed to incubate in darkness without shaking. This is accompanied by the loss of long-wavelength components in the red absorption band of intact cells. After extraction of these cells with acetone, transfer of the pigments to ether and treatment of the ether solution with dilute acid, two pigments can be separated by high performance liquid chromatography on reverse phase silica gel (RP-8) using methanol: water = 95:5 (v/v) as the eluting solvent. In addition to pheophytin a, the eluate contains an unknown pigment. With increasing times of incubation of the cells in darkness, the proportion of pheophytin a decreases and the proportion of the unknown increases suggesting, that the unknown is formed from pheophytin a. This pigment has been identified as pyropheophytin a. It has the same absorption spectrum as pyropheophytin a (prepared by pyridine pyrolysis of pheophytin a) and contains phytol as the longchain esterifying alcohol. On conversion to the methyl ester, the resulting methyl phorbide is identical with authentic pyromethylpheophorbide a by tlc, hplc, absorption, absorption difference and mass spectroscopy. This is the first report of pyropheophytin a or any pyrochlorophyll derivative from plants or oxygenic plant-like microorganisms where it may serve as an intermediate in chlorophyll degradation.

Introduction

The biosynthesis [1–4] and breakdown [5, 6] of porphyrin complexes (hemes) is well established, but for the magnesium porphyrins (chlorophylls and bacteriochlorophylls) only the biosynthetic pathway is known in some detail [1, 2, 7]. Particularly obscure, is the pathway of chlorophyll degradation in cells and the nature of the chemical intermediates in this process [8, 9]. Light-grown cells of *Euglena gracilis* var. *bacillaris* placed in darkness without

shaking convert a large proportion of their chlorophyll a to a pheophytin (Phe)-like pigment [10]. This appeared to be a promising system in which to look for other possible intermediates in chlorophyll degradation. In this paper we provide further information concerning pheophytin formation in *Euglena* and show that pyropheophytin a (Pyrophe) (a derivative of Phe lacking the carboxymethyl group on the isocyclic ring [11]) is also formed.

Materials and Methods

All commercial chemicals used in this study were reagent grade or better and all solvents used in the chemical characterization of pigments were distilled prior to use. *Euglena gracilis* Klebs var. *bacillaris* Cori was grown in one liter of the pH 3.5 medium of Hutner at 26° with shaking as described previously [10, 12]. Illumination was supplied by mixed white and red fluorescent lamps providing a light intensity of 150 ft c (180 $\mu\text{W} \cdot \text{cm}^{-2}$) at the surface of the culture [12]. When the cells reached about 2×10^6 cells/ml (three days of growth) the

0341-0382/81/0900-0827 \$01.00/0

culture was centrifuged at $500 \times g$ for 1 min at room temperature [13]. The pellet was resuspended in the same volume of resting medium (1.0% (w/v) with respect to mannitol, 0.01 M with respect to $MgCl_2$, 0.01 M with respect to KH_2PO_4 and 0.25% (w/v) with respect to *cis, cis, cis, cis*-1,2,3,4-cyclopentane-tetracarboxylic acid (Aldrich) adjusted to pH 3.5 with KOH [14]). All of these manipulations were done aseptically. The cell suspension so obtained was shaken at 26° under illumination as before, for three more days. Aliquots were then placed in the dark at 26° without shaking, or in some cases in the light, with shaking for various times. Dim green safelights [15] were used when necessary. Absorption spectra of these cells were measured as previously described [13]. Cell viability was measured as colony formation after plating the cells on pH 3.5 medium as described previously [16].

Each sample was then centrifuged at $800 \times g$ for 5 min at room temperature and the cell pellet was resuspended in 100 ml of 0.1 M potassium phosphate buffer, pH 7.0, at room temperature and was centrifuged. The following steps were performed under dim laboratory lighting. The pellet was resuspended in 100 ml of cold acetone and was centrifuged at $8000 \times g$ for 5 min at $4^\circ C$. The extraction was repeated three times to yield a total of about 350 ml of cold extract. The pigments were then transferred into fresh cold peroxide-free diethyl ether [17], and the ether was acidified by the addition of 10% (v/v) HCl (about 5 ml of acid for each 100 ml extract), washed neutral with distilled water, dried overnight over anhydrous sodium sulfate, and evaporated *in vacuo* at about 25° . The dry pigments were stored at -20° under nitrogen in darkness.

For some experiments, part of this crude pigment fraction was further separated by chromatography on silica gel thin layer plates (silicagel 60, Merck), using carbon tetrachloride/acetone = 9/1 (v/v) as the solvent [18]. The rapidly moving pheophytin a region was eluted with acetone, the eluate was taken to dryness *in vacuo* and the pigment was stored under nitrogen at -20° .

To determine the nature of the esterifying alcohol, the pigment was saponified with methanolic KOH as described previously [21]. The alcohols obtained were identified by gas chromatography using previously described methods [19]. Analytical high performance liquid chromatography (HPLC) [19]

was carried out with a Laboratory Data Control (LDC) constametric II pump, using either an LDC Model 1202 variable wavelength double beam absorbance detector set at 667 nm, or a Schöffel model FS 970 L.C. fluorescence detector ($\lambda_{exc} = 408$ nm, $\lambda_{em} \geq 580$ nm). The separation of the pigments solubilized in acetone was performed using a stainless steel column (15 \times 0.5 cm) packed with LiChrosorb RP-8/5 μm (Merck). Methanol/water (95/5 v/v) was used as eluant at a flow-rate of 1.0 ml/min. Preparative HPLC employed previously published procedures [20]. Absorption and derivative spectra in the visible and ultraviolet regions were recorded on a model 320 spectrophotometer (Perkin-Elmer). Coupled HPLC-absorption spectroscopy was performed in a homebuilt system using a model II double beam variable wavelength detector (LDC-Latek) combined with a model 8000 intelligent recorder (Bryans) for scanning and data manipulation. Details of the method will be published separately. Mass spectra were recorded on a model CH 7 mass spectrometer (Varian) in the EI-mode (70 KV) with direct inlet.

Pyropheophytin a

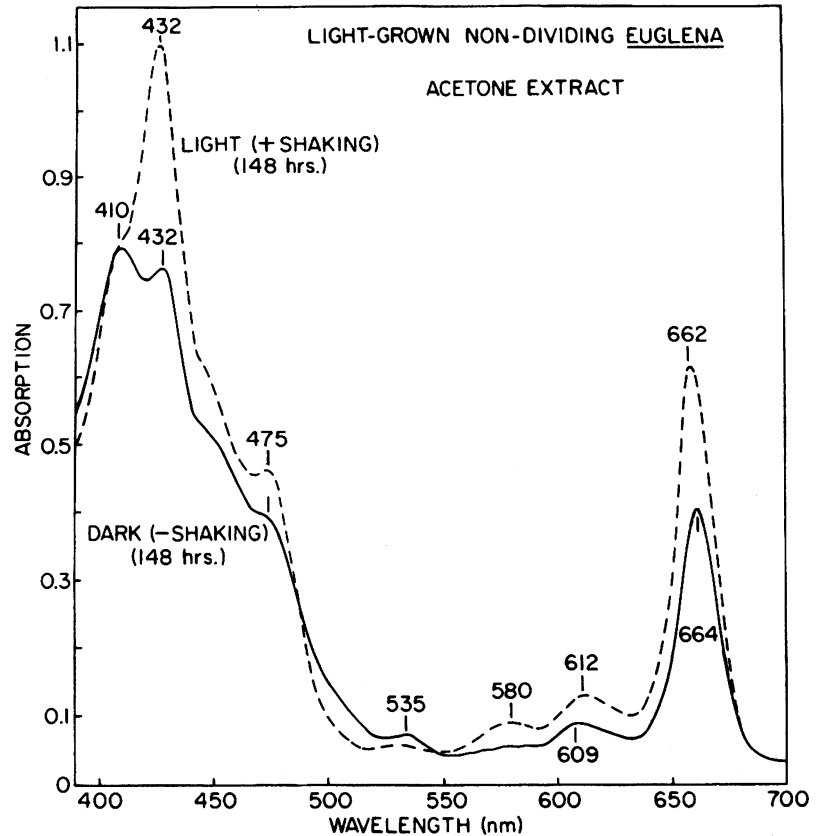

An authentic sample of Phe was obtained from crude pheophytin "Sandoz". It was converted to Pyrophe by refluxing in pyridine for 12 h under nitrogen [11, 18].

Pyromethylpheophorbide a

For transesterification (replacement of the phytol group by methyl on the propionic acid side chain) the unknown pigment was refluxed for 1 h in chloroform methanol (1:1 v/v) containing 2.5% (v/v) H_2SO_4 . The products were purified by standard procedures, involving TLC on 20 \times 20 cm glass plates coated with 0.75 mm silica "H" (Merck) using 4% (v/v) acetone in carbon tetrachloride as the developing solvent [18].

Authentic pyromethylpheophorbide was prepared from Phe by transesterification and subsequent pyrolysis to remove the carbomethoxy group [18]. Analytical TLC was done with commercial plates (HPTLC, Merck, 10 \times 10 cm). Either a silica coating developed with 6% (v/v) acetone in carbon tetrachloride or a C-18 reverse phase coating with methanol as solvent was used.

Fig. 1. Absorption spectra of acetone extracts of light-grown non-dividing cells of *Euglena* maintained in the light with shaking or in darkness without shaking for 148 h.

Results and Discussion

Acetone extracts of normal light-grown non-dividing cells of *Euglena* shaking in the light show absorption peaks due to the presence of Chl (432 nm and 662 nm) and carotenoids (Fig. 1). Extracts of the same cells incubated in darkness without shaking show additional absorption peaks at 410 nm and 535 nm attributable to Phe-like pigment(s) [10]. In either culture, there is no significant loss of cell viability during the experimental period as determined by plating (data not shown).

Evidence of pheophytin a formation is also seen in the absorption spectrum of intact cells maintained in darkness without shaking (Fig. 2). There is an increased absorption at 413 nm expected for the Soret band of Phe. Also evident is a loss of absorption on the long wavelength side of the red absorption region. A similar selective loss of chlorophyll a components absorbing at longer wavelengths has been observed during Phe formation in *Euglena* cells growing in the presence of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea (DCMU) in the light [22]

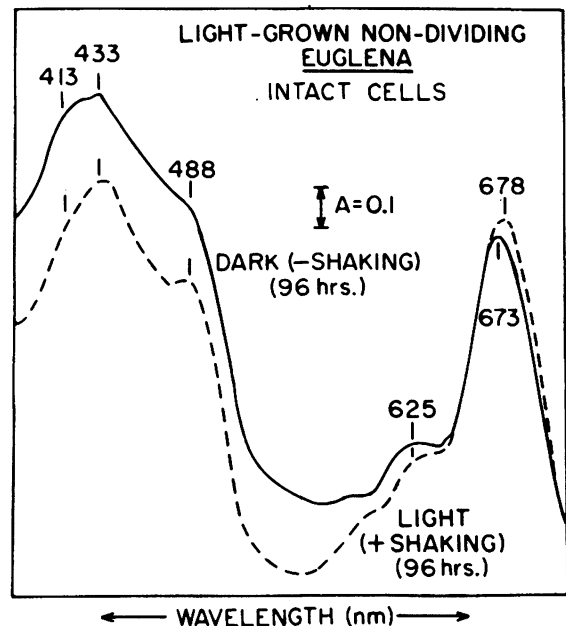

Fig. 2. Absorption spectra of intact light-grown non-dividing cells of *Euglena* maintained in the light with shaking or in darkness without shaking for 96 h.

and is attributed to a selective loss of the light-harvesting systems of photosystem I of photosynthesis. Perhaps inhibition of normal light-driven hydrogen ion pumping by darkness or DCMU allows accumulation of H^+ near the chlorophyll of photosystem I leading to pheophytin formation.

To elucidate the structure of the pigment(s) formed from Chl, they were extracted from the cells and the extracts were acidified to convert all remaining chlorophyll(s) to pheophytin(s). The crude mixture was then subjected to chromatography. Whereas only a single band is obtained on silica tlc-plates, two components can be separated by reverse-phase HPLC (Fig. 3). One peak is chromatographically identical with Phe ($r = 16.2$ min) as expected since any remaining Chl was converted to Phe by acidification during the preparative procedure. It is accompanied by a second peak eluting later ($r = 23.2$ min). During incubation of the cells in darkness, the unknown compound increases at the expense of Phe suggesting that the latter is progressively converted to the unknown compound (Fig. 3, inset). *In situ* spectroscopy of the HPLC eluate at the two maxima (Fig. 3) gave identical absorption spectra indicating either the presence of a different esterifying alcohol or a chromophore modified at a position not severely affecting the π -electron system. To test these possibilities larger amounts of the unknown pigment were isolated

using preparative HPLC. After saponification the only long chain alcohol found by gas chromatography is phytol, excluding the first possibility. The amount of phytol found is greater than expected using the known extinction coefficient for Phe to estimate the amount of pigment saponified. This indicates that the extinction coefficient of the unknown pigment is lower than that of Phe.

These properties of the unknown pigment suggested that it might be a pheophytin carrying different substituents at C-13² than pheophytin a. In particular the absorption spectrum of the unknown pigment is essentially the same as that of pyropheophytin a, a derivative lacking the 13²-carbomethoxy group [11, 18, 23]. This suggestion was substantiated by the chemical correlations shown in Fig. 4. Heating of pheophytin a with pyridine yielded pyropheophytin a, which is identical with the unknown pigment ($r = 23.2$ min) by HPLC, TLC and uv-vis spectroscopy. Also, the unknown remained unchanged after refluxing in pyridine under identical conditions.

Conversely, the unknown pigment was converted to its methyl ester and compared to an authentic sample of pyromethylpheophorbide a, obtained from pheophytin a as shown in Fig. 4 (right side).

The absorption spectra, difference spectrum (Fig. 5) of the two methyl phorbides and their 2nd and 4th derivatives (data not shown) are identical.

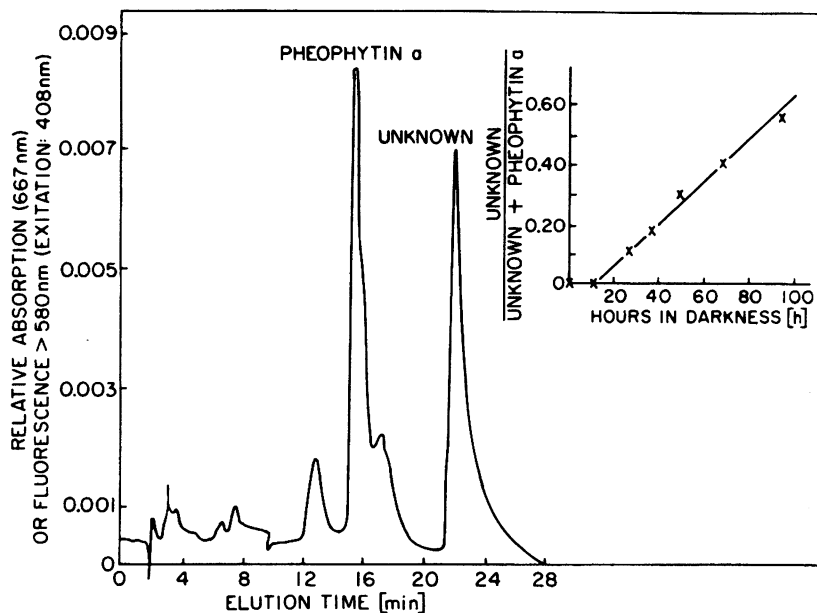

Fig. 3. Elution pattern of pigments extracted from light-grown non-dividing cells of *Euglena* incubated in darkness for 96 h. and subjected to high performance liquid chromatography after acidification. The inset shows the ratios of unknown pigment to unknown plus pheophytin a in cells incubated in darkness for various times, which have been calculated from the relative intensities of the HPLC peaks after correction for the different extinction coefficients ($\epsilon_{\text{Pyrophe}}^{667} = 49.01 \cdot g^{-1} \cdot cm^{-1}$, $\epsilon_{\text{Phe}}^{667} = 63.71 \cdot g^{-1} \cdot cm^{-1}$).

Fig. 4. Chemical correlation of pyropheophytin a, the "unknown pigment" isolated from dark-adapted *Euglena* (in box), with authentic derivatives of chlorophyll a.

The two pigments also have the same R_f values on "normal" and "reverse phase" thin layer chromatography (Fig. 6) and HPLC. Finally, the mass spectra of the two methyl phorbides are also in excellent agreement (Table I). Taken together, the data show that the unknown pigment is pyropheophytin a (boxed in Fig. 4).

Pyropheophytin a is found along with pheophytin a in light-grown non-dividing cells of *Euglena* incubated in darkness without shaking. Since the proportion of pyropheophytin increases with time in darkness while the proportion of pheophytin decreases, pyropheophytin may be formed from pheophytin. However, since all pigments were converted to their magnesium-free forms with acid before analysis, the formation of pyrochlorophyll a as an intermediate is not excluded.

To our knowledge this is the first report of a pyrochlorophyll or pyropheophytin in an oxygenic

photosynthetic organism. Derivatives of pyrochlorophyll are major antenna pigments in green sulfur bacteria [24, 25]; pyromethylpheophorbide a and its derivatives have been isolated from the excrements of various herbivores [26]. Little is known of the steps involved in chlorophyll degradation in photosyn-

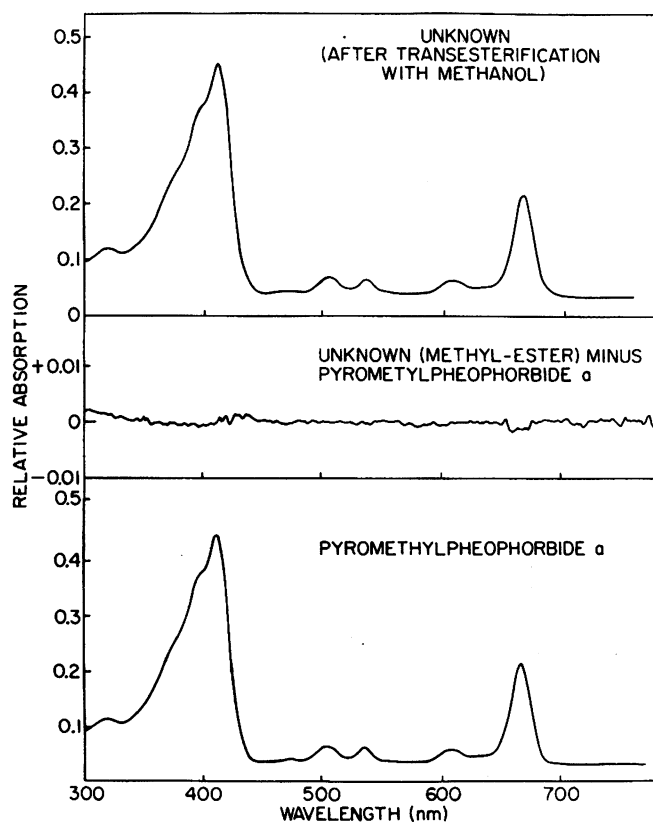

Fig. 5. Absorption spectra (in methanol) of pyromethylpheophorbide a and the methylpheophorbide prepared from the unknown pigment, as well as their difference spectrum (expanded absorption scale).

Fig. 6. A comparison of the methyl phorbide prepared from the unknown pigment with methyl pheophorbide a and pyromethylpheophorbide a on a thin layer chromatogram (C-18 reverse phase in silica, methanol as eluent).

thetic organisms [8, 9] and it is entirely possible that pheophytin a and pyropheophytin a (or pyrochlorophyll a) serve as intermediates in such a pathway. It might be noted that the methine bridges adjacent to the reduced ring IV in chlorins are susceptible to oxidative ring opening [27] especially if they bear an alkyl substituent [28–30]. One way of

creating such a situation may be the conversion of pheophytin a (bearing a CHCOOCH_3 -substituent at the C-15 methine bridge) to pyropheophytin a bearing a CH_2 -substituent instead.

Note added in proof: We are aware of the work of O. Shimomura (FEBS Lett. **116**, 203 (1981)), who recently suggested a bile-pigment structure derived from pyrochlorophyll b for "compound F" involved in bioluminescence of an euphausiid shrimp.

Acknowledgements

We thank Dr. W. Schäfer (München-Martinsried) for recording the mass spectra. The skillful technical assistance (in Munich) of I. Blos (GC) and H. Wieschhoff (preparative HPLC) is acknowledged. We are indebted to Prof. H. H. Inhoffen for a generous gift of pheophytin "Sandoz". This work was supported by the National Institutes of Health (J.A.S.) the Deutsche Forschungsgemeinschaft (S.S.) and the US Department of Energy (H.W.S.).
