**OPTICAL TRANSPOSITIONS.**

A MAGIC NOVELTY FOR THE STEREOSCOPE.

*(Registered.)*

These designs, which form an entirely new amusement, undergo marvellous Transpositions when seen in the Stereoscope; and so viewed, produce the most amusing, magical, and surprising effects.

**DIRECTIONS.**

First examine the subject that you may more readily note the change it will present; and that the Transpositions be duly effected, put the slide fully to the end of the Stereoscope.

*London:—Published by WILLIAM SPOONER, 379, Strand.*
