Driving Assessment Conference

2015 Driving Assessment Conference

Jun 24th, 12:00 AM

The Role of Attention in Increasingly Autonomous Driving

Trent Victor Dr

SAFER Vehicle and Traffic Safety Centre at Chalmers & Volvo Cars Safety Centre, Sweden

Follow this and additional works at: <https://ir.uiowa.edu/drivingassessment>

Victor, Trent Dr. The Role of Attention in Increasingly Autonomous Driving. In: Proceedings of the Eighth International Driving Symposium on Human Factors in Driver Assessment, Training and Vehicle Design, June 22-25, 2015, Salt Lake City, Utah. Iowa City, IA: Public Policy Center, University of Iowa, 2015: 211-211. <https://doi.org/10.17077/drivingassessment.1573>

This Event is brought to you for free and open access by the Public Policy Center at Iowa Research Online. It has been accepted for inclusion in Driving Assessment Conference by an authorized administrator of Iowa Research Online. For more information, please contact lib-ir@uiowa.edu.

The Role of Attention in Increasingly Autonomous Driving

Trent Victor

Distinguished Keynote Luncheon Speaker

Trent is Senior Technical Leader Crash Avoidance at Volvo Cars Safety Centre, and Adjunct Professor at Chalmers University of Technology in Gothenburg, Sweden. At Volvo Cars his role is to identify and define future leading edge safety needs within crash avoidance. His role provides leadership in safety analysis and research, supporting development of safety requirements and strategies and to drive human related aspects of safety design in a broader perspective, using the possibilities with new active safety functions and systems. For example he is responsible for safety in Volvo's self-driving car program Drive Me. At Chalmers, he is very active in the analysis of naturalistic driving data at SAFER Vehicle and Traffic Safety Centre at Chalmers, where he recently was PI for a SHRP2 S08 naturalistic driving risk analysis of driver inattention.
