John Shuck: Bringing Light to East End Cemetery

There is a dark narrow road on the border of Richmond and Henrico County that few have traveled in recent years except John Shuck and groups of volunteers, including ASPiRE students. This road takes you to the [East End Cemetery](#) where grave markers are broken and iron fences have been bent by tangled tree roots. The 16-acre cemetery is a place that has been long forgotten and neglected by many.

East End Cemetery, a historically black, privately-owned cemetery, was established in the 1897. Thousands of the city's residents are buried at the cemetery, with tombstones extending far into the woods. According to Shuck, the cemetery fell into disrepair because the families opted to care for the site themselves, but with time, people moved away or passed on. By the 1970s, the cemetery was largely abandoned.

As a result of the hard work of Shuck and his cadre of dedicated volunteers, the cemetery is slowly filling with light and coming back to life. Nearly every weekend, Shuck can be found cleaning debris from the cemetery and coordinating volunteers who give him a

Safety Net Collaborative a win-win for VCU and Richmond

When three safety net primary care clinics in Richmond found they could not fully meet the mental health needs of their patients, they knew they had to find a solution to provide these critical services to the city's most vulnerable populations.

With over half of all patients receiving substandard or no mental health care, the clinics needed to provide thousands of behavioral care sessions to their patients. But where to find a group psychologists willing to contribute hundreds of hours of work at little or no cost?

Bruce Rybarczyk, Ph.D., a professor in VCU's Department of Psychology, had the perfect answer: his doctoral trainees. As a result, since 2008 trainees have delivered over 10,000 pro bono sessions at the Ambulatory Care Center on the MCV Campus, the Daily Planet for the Homeless and the Fan Free Clinic. A fourth clinic, VCU's Hayes E. Willis Health Center, was added in August.

The Safety Net Primary Care Psychology Collaborative has proved fruitful for everyone involved. The clinics are able to better cover the mental health needs of their patients, while the doctoral students get valuable experience working with a wide-range of patients. Most importantly, the medically underserved in the Richmond community get access to the care they need.

Rachel Waller, M'99, has seen the benefits of the collaborative firsthand through her work on the internal medicine service at the Ambulatory Care Center.

Who's Riding With You?

Who is your audience? You can't fit everyone in the car!

The Division of Community Engagement assists VCU's faculty, staff, and students who are involved with service-learning classes or community-based research projects; we address the continuing studies and professional development needs of adults in the region and beyond; we offer programs for the community through the resources of the Mary and Frances Youth Center and the Carver Neighborhood space; we have launched ASPIRE, VCU's first living-learning residential hall with a focus on community engagement, and much more. The Division also administers the Council for Community Engagement, a representative body from all academic and academic-support units committed to creating a culture of community engagement at VCU.
