## 1. Web creation

The INCASI website was designed during the first half of 2016 and was published in a first version in June 2016, at the following address, in **Spanish** language:

<http://incasi.uab.es/> or <http://incasi.uab.cat/>

and in **English** language at this address:

<http://incasi.uab.cat/en>

It was designed with Drupal software, an open source content management system, by a technical team from Autonomous University of Barcelona:

Direcció de Tecnologies  
de la Informació i la Comunicació  
Àrea de Planificació de Sistemes d'Informació

Edifici D · Campus de la UAB · 08193 Bellaterra  
(Cerdanyola del Vallès) · Barcelona · Spain  
Tel. +34 93 581 33 18 · Fax +34 93 581 20 94  
apsi@uab.cat · www.uab.cat

During the second half of the year, the initial design and updating of information was completed and improved. At the moment, it is updated and it is maintained constantly with the support of a technical assistant.

The design and layout of the INCASI website cost € 900, within a pilot program of a new service of the UAB university. The tasks of introducing information, maintenance and improvements until mid-2017 will be about € 7000.

## 2. Technical issues about web page creation

Drupal is an open source content management system, flexible, simple and very useful. It is characterized by being a modular and extensible system, so that it provides a thin and powerful core that can easily be extended through customized modules; with quality coding, based on standards and with a low resource requirement.

Its main characteristics are:

Security:

- Secure implementation for scheduled tasks (cron.php).
- Secure password system.
- Secure log-in system.
- Modules can be updated via the web.

#### Usability:

- Administrative links to edit existing page elements are available on each web page, without having to go to an administration page first.
- Support for integration of WYSIWYG editors.
- Drag-and-drop for administrative tasks.
- Permissions have the ability to handle more meta-data (permissions have a description).
- Setting up automated task runs (cron) can be achieved via Drupal's configuration alone, without having to install any scripts on the web server.
- Password strength validator to make it kinder, gentler, and clearer.
- Support for default text formats to be assigned on a per-role basis.
- "Vertical tabs", a reusable interface component that features automatic summaries and increases usability.
- "Shortcuts" module to allows user to create their own menu for the pages they visit the most.

#### Database:

- Query builders for INSERT, UPDATE, DELETE, MERGE, and SELECT queries.
- Support for master/slave replication, transactions, multi-insert queries, delayed inserts, and other features.
- Support for the SQLite database engine.
- Default to InnoDB engine, rather than MyISAM, on MySQL when available for greater scalability and data integrity.

#### Documentation:

- Hook API documentation included in Drupal core.

#### News aggregator:

- OPML import functionality for RSS feeds.
- Feed update options.

#### Theme system:

- "Bartik" theme included as the default user interface theme.
- "Seven" theme included as the default administration interface theme.
- "Stark" theme included to make analyzing Drupal's default HTML and CSS easier.

#### File handling:

- Files are first class Drupal objects with file\_load(), file\_save(), and file\_validate() functions and corresponding hooks.
- Files use PHP stream wrappers to enable support for both public and private files and to support pluggable storage mechanisms and access to remote resources (e.g. S3 storage or Flickr photos).
- Includes a field specifically for uploading files, previously provided by the contributed module FileField.

Image handling:

- Image handling includes support for add-on image libraries.
- Includes a field specifically for uploading images, previously provided by the contributed module ImageField.

Others:

- Support for Multisite Installations
- Includes RDF support
- Support for search engine optimization and web linking
- Node access control system
- Installer can be run from the command line

Ability to add custom fields:

- Provides most of the features of the former Content Construction Kit (CCK) module.
- Custom data fields may be attached to nodes, users, comments and taxonomy terms.
- Node bodies and teasers are fields instead of being a hard-coded property of node objects.
- Fields are translatable.

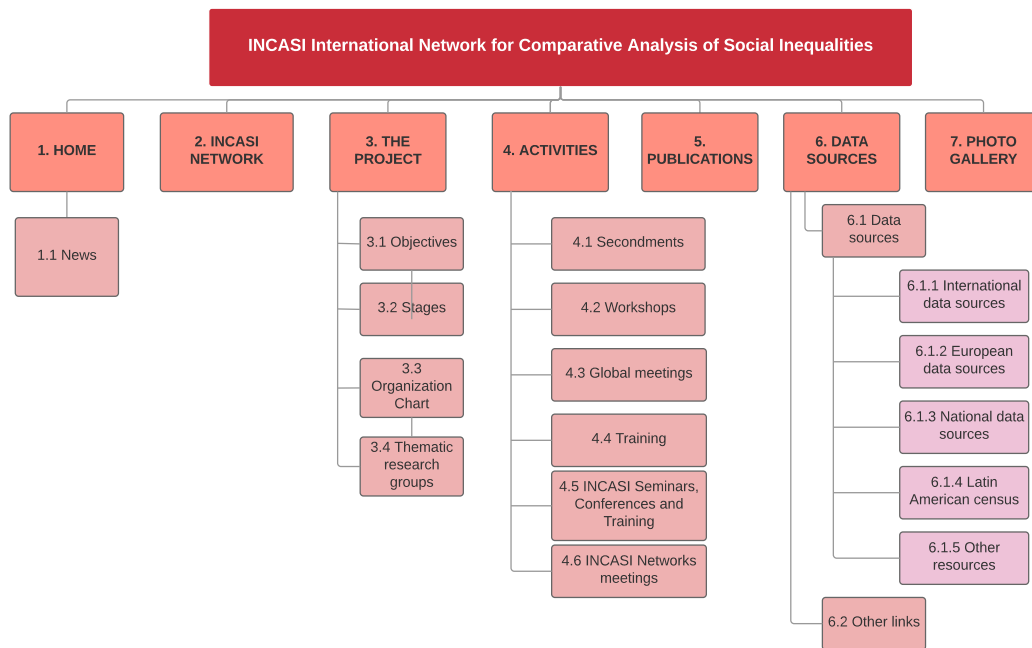

### 3. Structure of the website

#### 3.1. Web map

Next figure shows the structure of INCASI website. It is organized into six main sections:

1. Home: presentation of the INCASI Project and news.
2. INCASI network: link to each university, Beneficiary and Partner, and short curriculum of each researcher.
3. The project: presentations of the main features of the project (Objectives, Stages, Organisation chart and Thematic Research Groups).
4. Activities: information about scientific activities the scientific and dissemination activities of the network, and training activities.
5. Data sources: links to different resources related with the study of social inequalities.

### 3.2. Screenshots

The following pages present the captures of the main website pages.

INCASI, International Network for Comparative Analysis of Social Inequalities, aims to create and consolidate a network of research and training between Europe and Latin America. To this end, we develop the project Global trends in social inequalities in Europe and Latin America and exploring innovative ways to reduce them through life, occupational and educational trajectories research to face uncertainty, from January 2016 to December 2019, and is funded by the Horizon 2020 program of the European Commission:

Horizon 2020  
European Union Funding  
for Research & Innovation

Marie Skłodowska-Curie Actions (MSCA)  
Research and Innovation Staff Exchange (RISE)  
Project Number: 691004

10 European and 9 Latin American universities are involved, with more than 130 researchers, coordinated by the Institute for Labor Studies (IET) and the Research Group on Education and Labor (GRET) of the Autonomous University of Barcelona. The coordinator, Principal Investigator, of the network is Pedro López-Roldán.

More News

### 3.2.2. News

The screenshot displays the INCASI Project website. At the top, there is a navigation bar with the INCASI logo and the text 'Comparative Analysis of Social Inequalities'. Below this, a horizontal menu lists: INCASI NETWORK, THE PROJECT, ACTIVITIES, PUBLICATIONS, DATA SOURCES, and PHOTO GALLERY. The main content area is titled 'News' and features two articles. The first article, 'Seminar GRET-INCASI', discusses indigenous childhood in Mexico and social inequalities in Argentina. The second article, 'Exposition INCASI', lists the principal researchers and coordinators of the network. The website is flanked by two vertical panels of abstract, colorful artwork.

#### The project

The project of the INCASI network is part of the European Commission's **Horizon 2020** research and innovation program, within the **Excellent Sciences** section, which aims to improve and consolidate the European research area.

This pillar of the Horizon 2020 program defines four objectives. The INCASI project is designed to promote transnational, inter-sectorial and interdisciplinary mobility of predoctoral and postdoctoral researchers through the **Marie Skłodowska-Curie Actions (MSCA)**. It is about creating strategic alliances between recognized research centers.

In specific, our Project is based on international cooperation, between Europe and Latin America, through the exchange of research and innovation staff (**Research and Innovation Staff Exchange, RISE**) of the 19 universities that make up the network.

Through the INCASI network, it is planned to establish the conceptual and methodological bases for, on the one hand, the development of a longer-term international comparative research program and, on the other hand, to design an international postgraduate study program that analyzes social inequalities in a comparative perspective.

The content of the INCASI project is presented in four sections: Objectives, Stages, Organization Chart and Thematic Research Groups

### 3.2.5. Objectives

Red Internacional para el Análisis Comparado de las Desigualdades Sociales
English | Español

**INCASI** *International Network for Comparative Analysis of Social Inequalities*

INCASI NETWORK   **THE PROJECT**   ACTIVITIES   PUBLICATIONS   DATA SOURCES   PHOTO GALLERY

#### The project

- Objectives
- Stages
- Organization chart
- Thematic research groups

#### Objectives

The main objective of INCASI is to create and consolidate a network of research and postgraduate training between Europe and Latin America related to the analysis of social inequalities in a comparative perspective and to derive elements of reflection, social innovation and recommendations for social policies.

The project will allow the mobility of pre-doctoral and postdoctoral research staff with the aim that the exchanges generate a consortium of research centers of the universities. Initially, the network consists of 10 European and 9 Latin American universities, is made up of more than 130 researchers and is led by the Universidad Autónoma de Barcelona through the Institut d'Estudis del Treball (IET), the project headquarters, and the Grup de Recerca en Educació i Treball (GRET).

The project entitled "Global Trends in Social Inequalities in Europe and Latin America exploring innovative ways to reduce them through the research of educational, occupational and life trajectories to deal with uncertainty" is developed by establishing 8 main objectives:

1. Develop a general framework of collaboration for the creation and consolidation of a research and training network among research centers of European and Latin American universities.
2. Analyze the trajectories that the citizens have followed in the labor market, identifying their results in terms of mobility and social inequality. With this knowledge, the objective is to develop a model that explains these trajectories in comparative terms between Latin America and Europe.
3. Identify and understand the different strategies that are developed and how resources and capacities have been mobilized to identify, classify and compare patterns of social behavior adopted to address the uncertainties in each region.
4. Specifically study these trajectories and strategies by analyzing the relationship between work, training and employment, and connecting the life trajectories of citizens, including the productive and reproductive spheres.
5. To examine the social policies that have tried to address inequalities in different areas, focusing the interest in the participating countries and more generally addressed in a comparative context between Europe and Latin America.
6. Develop models of macro and micro analysis and comparative methodologies adopting dynamic and longitudinal perspectives. A mixed-methods approach will be adopted by combining qualitative and quantitative techniques.
7. Draw practical conclusions that help to inform the design of innovative public policies to deal with situations of social inequality, particularly in relation to employment and education policies.
8. To project the INCASI network by establishing the conceptual and methodological bases for, on the one hand, the development of an international comparative program in the longer term, and, on the other hand, to design an international master program that analyzes social inequalities in a comparative perspective.

### 3.2.6. Stages

#### The project

- Objectives
- Stages
- Organization chart
- Thematic research groups

#### Stages

In order to achieve these objectives, the project is organized into four sequential Work Packages throughout the period January 2016 to December 2019:

In addition, a fifth work package is planned regarding the organization and coordination of the INCASI network activities.

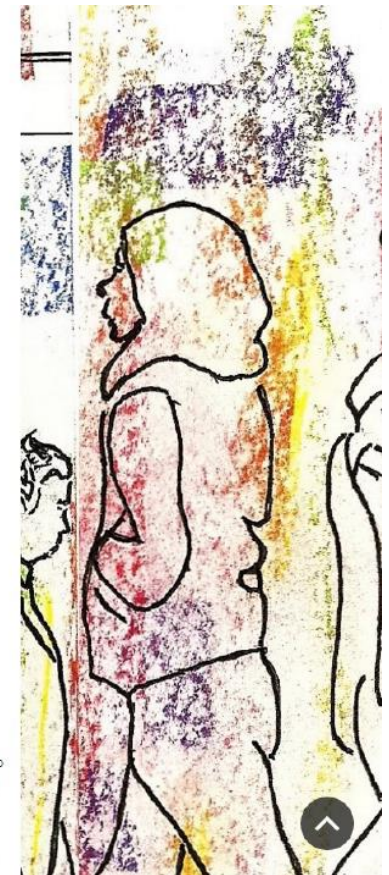

1. Compilation	2. Construction	3. Innovation	4. Projection
<ul style="list-style-type: none"> <li>• Compilation of the scientific production of the INCASI network</li> <li>• Structuring the initial analytical model AMOSIT</li> <li>• Data sources from Europe &amp; Latin America</li> <li>• Training</li> </ul>	<ul style="list-style-type: none"> <li>• Definition of the common analytical model AMOSIT</li> <li>• Systematic analysis of the social policies of Europe &amp; Latin America in the 21st century</li> <li>• Training</li> </ul>	<ul style="list-style-type: none"> <li>• Proposal derived from the analysis of theoretical and methodological aspects of social inequalities</li> <li>• Training</li> </ul>	<ul style="list-style-type: none"> <li>• Research Project</li> <li>• Master Project</li> <li>• White Paper publication</li> <li>• Dissemination</li> </ul>
14 months	14 months	11 months	8 months

#### 1. COMPILATION

In the first phase of the project the main objective is to review the existing accumulated scientific capital among the members of the network. It is a matter of compiling exhaustively the scientific production of the investigations carried out on social inequalities according to the model of analysis of the project that we have called AMOSIT: Analytical model of social inequalities and trajectories. In addition, we will proceed to a systematic collection of data sources from Europe and Latin America.

#### 2.CONSTRUCTION

Based on the contribution of the different groups of the INCASI network, it is a matter of consensus and definition of a common research

### Organization chart

In order to ensure an efficient project management which is in agreement with the programmed activities in the Work Packages, the structure of the organization and the economic management are designed with two dynamics:

1. A centralized-coordinating university (the Institut d'Estudis del Treball, IET, Universitat Autònoma de Barcelona) that assumes the leadership of the project and ensures the homogeneity of the network activity, through the action of the Principal Coordinator and the Task Manager.
2. Another participatory and deliberative dynamic among peers: the Academic Commission (AC), as the highest responsible body for the direction and management of the scientific development of the INCASI Project, and Thematic Research Groups (TRGs), the general project subgroups dedicated to research in each thematic axis and transversal pillar, 11 in total.

3.2.8. Thematic research groups

The screenshot shows the INCASI project website. At the top, there is a navigation menu with links: INCASI NETWORK, THE PROJECT (underlined), ACTIVITIES, PUBLICATIONS, DATA SOURCES, and PHOTO GALLERY. The main content area is titled 'Thematic research groups' and includes a paragraph explaining the project's organization. Below this is a table with 11 rows, each representing a thematic axis and its responsible institutions. A sidebar on the left lists 'The project' with sub-links: Objectives, Stages, Organization chart, and Thematic research groups.

Thematic axis	TRG Responsibles	
	Beneficiaries	Partners
<b>PILLAR 1: substantive background and explanatory models of social inequalities</b>		
1 Inequalities in the labor market and labor trajectories	UAB-IET, UNIMI	UCA
2 Asymmetries in the relationship between training and employment	UAB-GRET	UdelaR
3 Inequalities in work and family life	UB, UNICAL	UNLP
4 Educational inequalities	ULL	USP
5 Geographical and social inequalities: ethnicity and language	UTA	UC
6 Social inequalities, migration and space	UDC	UdeC
7 Uncertainty, strategies, resources and capabilities	UAB-GRET	IIGG, UdeC
8 Inequality of opportunity: intergenerational social mobility	US	IIGG, UChile
<b>TRANSVERSAL PILLARS</b>		
9 Pillar 2: Methodology for the analysis of social inequalities	UAB-IET	UdelaR, UNLP

## Activities

The activities of the INCASI Network in the context of the RISE project focus on the exchange of researchers through the holding of research stays (secondments) in the research centers of Latin American and European universities.

The secondments are accompanied by other activities of the network to develop and manage the project:

- Local workshops in Europe and Latin America
- Global Meetings of the entire network
- Training: the Postgraduate Diploma in Methodology for the analysis of social inequalities (MADES)
- Other research activities: participation in congresses, seminars, publications, etc.

### Secondments

The secondments are short-term research stays of at least one month, carried out by European researchers in the research center of a Latin American university, or Latin American researchers in the research center of a European university. The exchanges are made according to the thematic affinity of the research groups of the network. In total the project contemplates 521 months of stays whose distribution appears in the following table:

- INCASI Network Meetings

**Workshops**

Annually, working meetings are held in Europe between European partners and in Latin America between Latin American partners to create a space for joint reflection in relation to each of the stages of the project (Work Packages): compilation, construction, innovation and projection. In addition, these meetings are complemented by training and management activities. Local meetings also serve to prepare the overall meeting of each work package with the members of the network altogether with other invited researchers and specialists.

- First Workshop in Europe (Kick off Meeting), Barcelona, January 29, 29 and 30, 2016

**Kick off Meeting INCASI Barcelona 29-30 Enero 2016**

Participants: José Jarr, Néstor Domínguez, Liana Oro, Leandro Sepúlveda, Pedro López Roldán, Rosita Seneca, Sandra Pacheco, Estrella Chaves, José Setrúano Martínez, Rafael Mirero, Edoardo Marqués, Victoria Portas

- First Workshop in Latin America, Buenos Aires, March 3 and 4, 2016

**Primer Workshop INCASI América Latina 3-4 Marzo 2016**

Participants: Emmanuelle Barozet, Patricia Scarponeo, Lenisa Miskic, Sandra Fachelin, Eduardo Chavez, Pedro López Roldán, Agustín Salva, Cecilia Basso, Gabriela Rubiato, Marcelo Boudo, Graciela Peroni

#### Global meetings

Joint meetings with all participating organizations members are annually organized for the exchange, debate and construction of research, training and innovation proposals, in accordance with each work package: compilation, construction, innovation and projection.

These are work, reflection and dissemination spaces in relation to the thematic axes of the project and thematic research groups. These meetings are also opened to the participation of other researchers as well as third sector's relevant actors and agents, the media, government officials and public administration.

First Global Meeting: Barcelona, March 1, 2, 3 and 4, 2017

**Training**

The INCASI network is created for cooperation in research as well as for postgraduate training. It is an objective of this project to design a postgraduate study program on the analysis of social inequalities in a comparative perspective.

During the project, and from the experience of the training program of the Master of Applied Social Research Techniques (TISA), an advanced training in methods and techniques of social research will be offered to the researchers through the "Diploma Of Postgraduate Methodology for the analysis of social inequalities (MADES)" that will be given in online format with the following contents:

- Research Process and Analysis Designs
- Construction of Social Indicators
- Data Sources for Research
- Statistical Data Analysis: exploratory models
- Statistical Data Analysis: explanatory models
- Interview Technique
- Discussion Group Technique
- Biographical Method
- Analysis of Texts and Discourse
- Analysis of Social Inequalities
- Longitudinal Data Analysis
- Social Network Analysis
- Evaluation of Public Policies

## INCASI Seminars, Conferences and Training

### Seminars

- **Seminar GRET-INCASI**  
**Infancias indígenas en México: Niñez y trabajo de los Maya-tsotsiles de los Altos de Chiapas, México: Apuntes para la reflexión**  
 Norma Pérez López, researcher of the INCASI network by the Universidad de Chile, COES.  
**Desigualdades sociales en los procesos de formación a través de la escolarización en niños y adolescentes de la Argentina Urbana**  
 Ianina Tuñón, researcher of the INCASI network by the Universidad Católica Argentina.  
 Date: Monday, February 27, 2017, 15:30 to 18:00. Place: Building E1, Floor 2, Seminar 2, Universitat Autònoma de Barcelona.
- **Seminar QUIT-INCASI**  
**Movilidad social intergeneracional en Montevideo 1996-2010**  
 Marcelo Boado, principal researcher of the INCASI network by the Universidad de la República (Uruguay).  
**El capital social y las estrategias metodológicas para su operacionalización**  
 Rafael Rey, researcher of the INCASI network by the Universidad de la República (Uruguay).  
 Date: Wednesday, February 15, 2017, 13:30 to 15:00. Place: Boardroom of the Faculty of Political Science and Sociology, Universitat Autònoma de Barcelona.
- **Seminar IGG (Instituto de Investigación Gino Germani) - INCASI**  
**El análisis comparativo entre Europa y América Latina: Investigación comparada de la red INCASI**  
 Pedro López-Roldán, Main coordinator of the INCASI network, Universitat Autònoma de Barcelona-IET  
 Sandra Fachelli, Task Manager and researcher of the INCASI network, Universitat Autònoma de Barcelona-GRET  
 Laura Oso, principal researcher of the INCASI network by the Universidade da Coruña (UDC), Spain  
 José Saturnino Martínez, principal researcher of the INCASI network by the Universidad de La Laguna (ULL), Spain  
 Renata Semenza, principal researcher of the INCASI network by the Università degli Studi di Milano (UNIMIL), Italy  
 Coordinated by: Pablo Molina Derteano, Instituto de Investigación Gino Germani, Universidad de Buenos Aires

### 3.2.15. *INCASI Network Meetings*

The screenshot shows the INCASI website's 'Activities' page. At the top, there is a navigation menu with links for 'INCASI NETWORK', 'THE PROJECT', 'ACTIVITIES' (which is underlined), 'PUBLICATIONS', 'DATA SOURCES', and 'PHOTO GALLERY'. The main header features the INCASI logo and the text 'INCASI International Network for Comparative Analysis of Social Inequalities', flanked by flags of various countries. On the left side, there is a vertical sidebar with a list of activity categories: 'Secondments', 'Workshops', 'Global meetings', 'Training', 'INCASI Seminars, Conferences and Training', and 'INCASI Network Meetings'. The main content area is titled 'INCASI Network Meetings' and contains a list of five specific meetings, each with details about the location, coordinators, and dates.

## Publications

This space includes INCASI network publications divided into two main sections:

- Those that correspond to the academic and diffusion works compiled as background of the project.
- Publications derived from the project: reports, working papers, articles, books, book chapters, etc. Which will always be freely accessible.

The compilation of these publications will appear throughout the project and will be specifically included in the [OpenAIRE](#) platform, an initiative of the European Commission and Horizon 2020 to promote open access to repositories of documentation.

To search for a specific author or a keyword, you can use the [Open AIRE search engine](#).

### Publications of Project Global trends in social inequalities in Europe and Latin America and exploring innovative ways to reduce them through life, occupational and educational trajectories research to face uncertainty (INCASI - H2020-MSCA-RISE-2015)

- **Preparación de los datos para el análisis**  
López-Roldán, Pedro; Fachelli, Sandra  
Bellaterra Universitat Autònoma de Barcelona 2015
- **Reflexiones en torno a la aproximación biográfica y la etnografía virtual como estrategias para estudiar la apropiación de las tecnologías digitales e internet por parte de jóvenes**  
Lomas, Magdalena  
Universidad Nacional de La Plata 2015
- **Els qüestionaris com a instruments per a l'avaluació de competències transversals**  
Casanelles Chuzcos, Montserrat; Nedy, Tjago; Lutz, Montolio Estivill; Daniel, Solé Català; Marina, Fachelli, Sandra 2014
- **Análisis de la movilidad social intergeneracional a España el 2011**  
Fachelli, Sandra; López-Roldán, Pedro 2015
- **Clasificación de las técnicas de análisis de datos**  
López-Roldán, Pedro; Fachelli, Sandra  
Bellaterra Universitat Autònoma de Barcelona 2015
- **Approaches to imputation of income from the perspective of class analysis. A proposal using factor analysis techniques**  
Fernández Melton, María Clara 2014

### 3.2.17. Data sources and links

- Other Links

**Data Sources and Links**

This space is to disseminate digital resources that allow researchers, local governments or any institution to do comparative data analysis throughout time and different countries with the goal of contributing to the generation of diagnosis of comparative analysis regarding social inequalities.

It also offers information about Congresses and Seminars in which the INCASI network participates, and about other topics related to the INCASI project.
