

Future Solar Energy Devices

Submitted by Mihaela Girtan on Tue, 10/10/2017 - 10:58

Titre	Future Solar Energy Devices
Type de publication	Livre
Type	Ouvrage scientifique
Année	2017
Langue	Anglais
Nombre de pages	104
Auteur	Girtan, Mihaela [1]
Pays	Suisse
Editeur	Springer Nature
ISBN	978-3-319-67336-3
Mots-clés	data transmission [2], Energy [3], Materials Science [4], Photonics [5], plasmonics [6], Solar cells [7]
Résumé en anglais	<p>This book addresses electronics and the rise of photonics, and asks what the future holds in store for this technology. It highlights the latest research on all types of solar cells and photonic devices, and a new approach combining photonics and electronics. Beyond simply explaining the existing systems or providing a synthesis of the current state of knowledge, the book also offers readers new perspectives for their own research. Lastly, drawing on the interconnections between electronics and photonics, the book suggests a possible means of using solar energy directly with the aid of future photonic devices.</p>
