What is Social Media Analytics

- Social media analytics is the practice of gathering data from blogs and social media websites, such as Twitter, Facebook, Digg and Delicious, and analysing that data to inform business decisions.
- The most common use of social media analytics is gauging customer opinion to support marketing and customer service activities.

Source: <http://searchbusinessanalytics.techtarget.com/definition/social-media-analytics>

Social Network Analysis

- It maps and measures formal and informal relationships to understand what facilitates or impedes the knowledge flows that bind interacting units, viz., who knows whom, and who shares what information and knowledge with whom by what communication media (e.g., data and information, voice, or video communications)

Two-mode view of the Southern Women social event dataset

Valdis Krebs (2010) "Your Choice Reveal Who You Are: Mining and Visualizing Social Patterns" in *Beautiful Visualization*.

A Simple Network Graph

- Vertices
- Edges

The Ego Network

- Greener vertices have higher eigenvector centrality, and larger vertices have higher betweenness centrality.

Social Network Metrics

- Aggregate network metrics
- Vertex-specific network metrics
- Clustering and community detection algorithm
- Structures, network motifs, and social roles

Graph Metric	Value
Graph Type	Directed
Vertices	89
Unique Edges	188
Edges With Duplicates	146

Tools for analysing and visualising social media network

- NodeXL, an Excel Add-in for analysing and visualising social media network

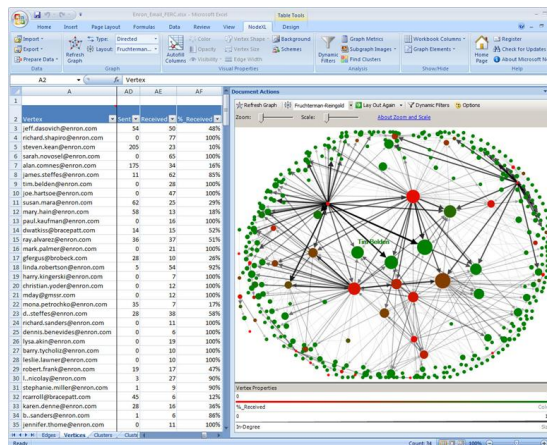

NodeXL: Network Overview, Discovery and Exploration for Excel

- Gephi, an open source interactive visualization and exploration platform for all kinds of networks and complex systems, dynamic and hierarchical graphs.

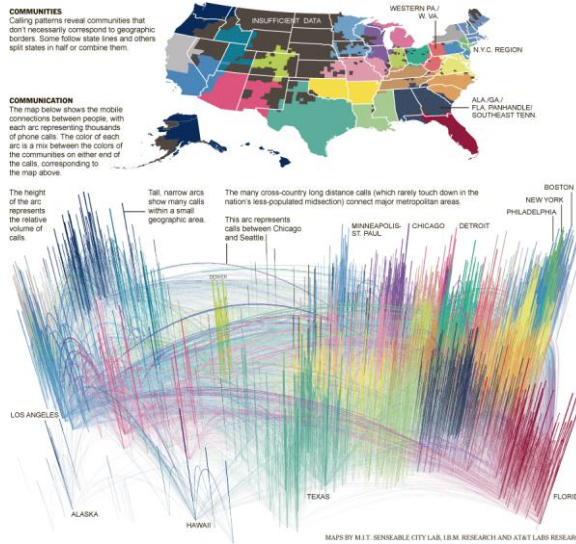

Historical and Legal Analysis of Enron E-mail

- SNA was used to identify key individuals using content networks

SNA for Analysing Calling Patterns

Event Detective

- Visualising and analysing the structure of connections among people discussing an event (i.e. Presidential election 2011) via social media services like Twitter.

Location-based social networking

Google Latitude
(February 2009)

Foursquare
(March 2009)

Geographic visualisation

- This dot map showing the spatial patterns of tweets on GE2011 polling day

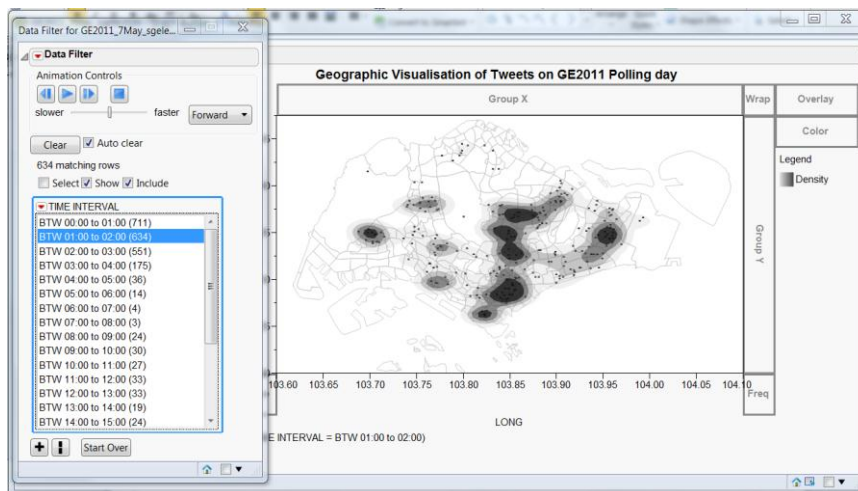

Animated map

- Animation and interactive slider are used to detect spatio-temporal patterns

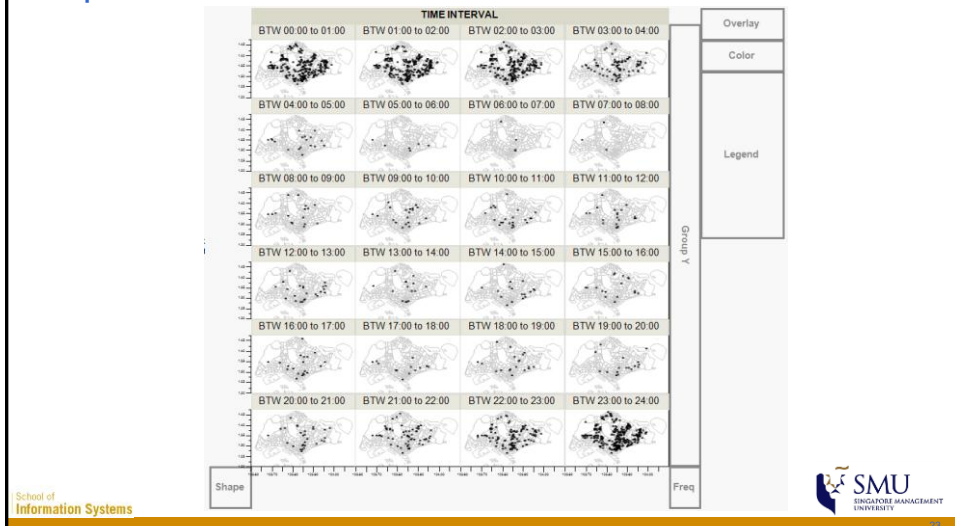

Density map

- Hotspots can be detected easily with density map

Trellis data visualisation

- The data visualisation shows the spatio-temporal patterns of the tweets.

Pandemics in the Age of Social Media

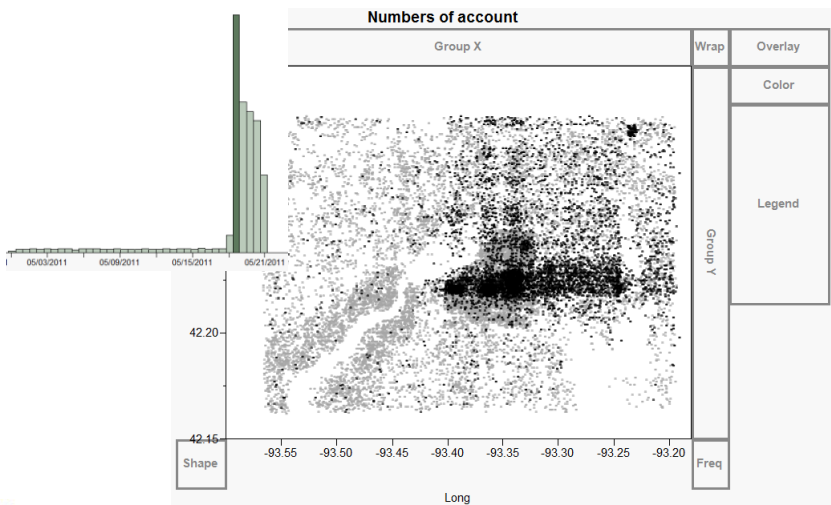

- To visualise and detect the spatio-temporal patterns of the epidemic spread
- Is the outbreak contained? Is it necessary for emergency management personnel to deploy treatment resources outside the affected area?

Geotagged Twitter data

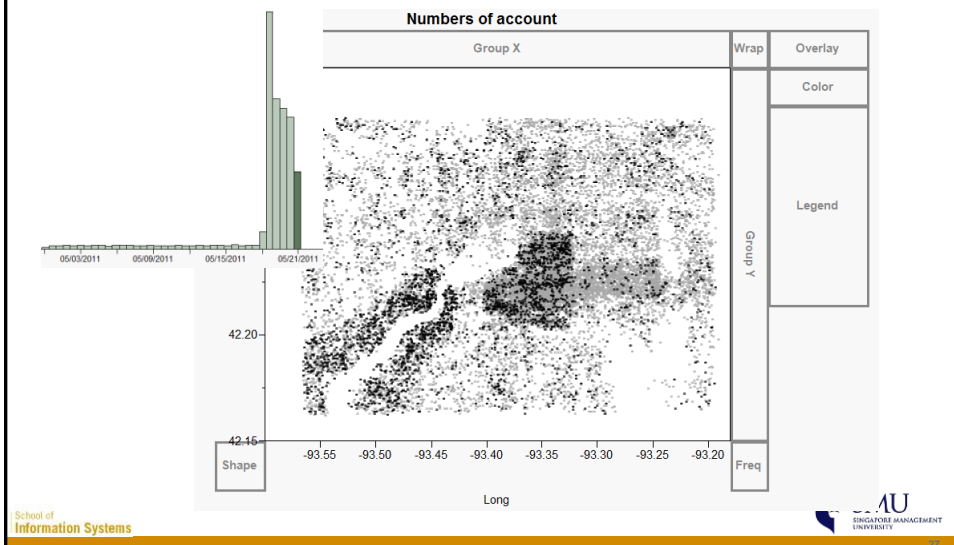

- A total of 1,023,077 between 30/04/2011-20/05/2011

Visualising and detecting spatio-temporal patterns (I)

Visualising and detecting spatio-temporal patterns (II)

In Conclusion

- Social media analytics can be fun!
- You shouldn't have to be a statistician to get information from your data
- Interactive and visual analytics approaches empowering everyday data analysts
- Visual analytics is more than computer graphics. It's an entirely different way of approaching data: It's dynamic, it's interactive, and it's visual.
