## USAID DEVELOPMENT PHILOSOPHY

- **LAYERING** – building on what has been achieved, or what others are doing (REGAL-IR, GIZ, etc.)
- **SEQUENCING** – picking up on/continuing what others have reached/attained
- **INTEGRATION** – using hybrid approaches with instruments/tools borrowed from different disciplines

## OVERALL GOAL

- Increase income from sales of livestock by 50% by 2018 (over current levels)
- by lifting additional 50,000 households out of poverty, and
- improving households' nutritional status.

Objective 1: To enhance market access for **50,000** pastoralists, ex-pastoralists and smaller traders

Objective 2: To increase livestock productivity for **30,000** producers

Objective 3: To enhance the enabling environment for 20 markets and 30 communities

Objective 4: To contribute to improved nutrition of women and children among **50,000** households

## OBJECTIVE 2: TO INCREASE LIVESTOCK PRODUCTIVITY FOR 30,000 PRODUCERS

### Output 2.2: Improved surveillance and control of diseases for increased livestock production and trade

- Support County Governments to establish producer based disease surveillance system
- Support the counties to establish and host an electronic-based disease surveillance system (database, links to the DVS, feedback mechanism)
- Vet drug supply chain and inspectorate issues in pastoral production system
- In selected NRT supported conservancies scale out veterinary clinical/extension services at designated points within the conservancies.
- Carry out regular food safety assessment for quality assurance in meat and milk among the AVCD LC supported households.
