

Financial Report 2005

This detailed report on the financial performance of the CGIAR Centers in 2005 is based on their audited financial statements. This report, as well as the "Executive Summary of the 2005 CGIAR Financial Results", was produced through a joint collaborative effort between IRRI and the CGIAR Secretariat. The IRRI team was led by Kwame Akuffo-Akoto and included Loriza E. Dagdag and Rodelita D. Panergalin. Both reports are included in the 2005 CGIAR Annual Report, which is also available at the CGIAR's website, http://www.cgiar.org.

Financial Report 2005

INTRODUCTION

Members of the Consultative Group on International Agricultural Research (CGIAR) support Centers and programs of their choice. The 2005 financial outcome, reported here in US dollars, is an aggregation of the audited financial statements of the 15 Centers and the four Challenge Programs supported by the CGIAR.

Financial Outcome

In 2005 the CGIAR achieved a positive financial result. Total resources (funding and earned income) reached \$460 million in 2005 compared with \$453 million in 2004, an increase of \$7 million (approximately 2 percent). Of the total resources available in 2005, \$450 million represented contributions from Members and non-members, an increase of \$13 million (3 percent) over 2004, and the remaining \$10 million was Center earned income. Meanwhile, expenditure in 2005 reached \$452 million, an increase of \$27 million (6 percent) over 2004. The difference between resources and expenditure was an excess of financing over expenditure of \$8 million, which was added to reserves. This compares with \$28 million added to reserves in 2004.

The \$13 million increase in funding resulted from a \$16 million increase for Challenge Programs (84 percent over 2004), which was offset by a reduction of \$3 million in support to Centers.

This result affected the financial indicators for liquidity and reserves for the System as whole. Although reserves expanded by \$8 million in absolute terms, their adequacy indicator dropped slightly at the System level, from 145 days of operations to 137 days. The liquidity indicator also dropped, from 170 days to 163 days. The drop in these two indicators is largely explained by the higher rate of growth in expenditure (6 percent) over that of resources (2 percent).

Centers continued to make progress in improving their efficiency of operations. This improvement was attributed to an increase in collaboration with partners and decreasing indirect costs. The share of resources going to collaborators as a percentage of total expenditure increased from 14 percent to 16 percent, while the indirect cost ratio fell from 24 percent to 21 percent at the System level. Table A summarizes the approved CGIAR program for 2005 and the actual outcomes for 2005 and 2004.

Table A. Summary of 2005 CGIAR Approved Program vs Actual Outcome (millions of US dollars)

| Total financing | 464 | 460 | 453 |
| Carried forward for future use | | 8 | 28 |

Composition of Funding

Total funding increased by \$13 million (3 percent) in 2005. Although unrestricted funding as a percentage of total funding decreased from 45 percent to 43 percent, the dollar value was unchanged due to the increase in total funding.

Sources of Funding

Industrialized countries provided \$312 million (69 percent) of the total funding in 2005, an increase of \$18 million (6 percent) over the 2004 contribution of \$294 million (67 percent of the total). International and regional organizations and Foundations provided \$86 million or 19 percent (2004: \$86 million or 20 percent), and Developing countries and Nonmembers provided the remaining \$52 million or 12 percent (2004: \$57 million or 13 percent).

Program Expenditure

Program expenditure in 2005 was \$452 million, an increase of \$27 million (6 percent) over 2004. Distribution of resources by CGIAR output was broadly consistent with the approved financing plan. It was also broadly in line with the actual 2004 distribution. Sustainable production, the major thrust of CGIAR's research, accounted for 33 percent of expenditure (2004: 35 percent). Enhancing NARS accounted for 20 percent, the same as in 2004. Expenditure on policy research accounted for 18 percent, (2004: 16 percent). Expenditure on germplasm improvement and germplasm collection accounted for 17 and 12 percent of total expenditure respectively, both the same as in 2004.

Expenditure in Sub-Saharan Africa was 46 percent (2004: 47 percent) while that in Asia was 30 percent (2004: 32 percent). In Latin America and the Caribbean it increased to 14 percent from 12 percent in 2004. In Central and West Asia and North Africa it increased to 10 percent from 9 percent.

Personnel costs remained at 45 percent of total expenditure compared with 2004. The share of personnel costs in total expenditure continues to vary widely among the Centers, reflecting the wide variability in the type of operations across the CGIAR system.

Center Highlights

The stability noted at the System level reflects a range of outcomes at the individual Centers. Contributions increased for 8 Centers compared with 12 in 2004. Five Centers (Africa Rice, CIAT, CIFOR, ICARDA, and IFPRI) had increases between 10 and 17 percent. Three (ICRISAT, IPGRI and World Agroforestry) had increases below 5 percent. Contributions to the other 7 Centers were lower. CIMMYT, CIP, IITA, ILRI, IWMI¹, and WorldFish had reductions between 1 and 10 percent and IRRI had a 12 percent reduction.

Operational results (contributions and earned income minus expenditure) show that 10 Centers ended the year with an excess of resources over expenditure compared with 14 in 2004. As a percentage of total resources, four Centers (Africa Rice, CIMMYT, IITA and ILRI) had an excess of resources over expenditure above 5 percent; six Centers (CIP, ICARDA, ICRISAT, IPGRI, IWMI and World Agroforestry) had below 5 percent. Five Centers incurred a deficit (excess of expenditure over resources). Three Centers (CIAT, CIFOR, and IFPRI) had deficits of 5 percent while, two had deficits above 10 percent (IRRI: 19 percent and WorldFish: 13 percent). Operational surpluses are the main source of Center reserves.

Financial Position

The 2005 financial data confirm that, as was the case in previous years, the CGIAR as a whole was in a strong financial position. Total net assets at the end of the year were \$238 million, an increase of \$2 million over 2004. Of these, the amount invested in fixed assets was \$78 million and restricted net assets were \$2 million. These were at the same level as in 2004.

¹ IWMI data are not comparable between 2004 and 2005. The 2004 data included components of Challenge Program on Water and Food (CPWF) that were implemented by other Centers and Partners, while in 2005 these data were excluded

Box 1. Compliance with Financial Guidelines

The Centers are institutions governed by their respective boards of trustees. To ensure transparency and consistency in financial practices and the presentation of financial information, the Centers are required to follow financial guidelines approved by the membership. Developed by the CGIAR Secretariat with the input of Center finance personnel and external financial experts, these guidelines aim to bring the CGIAR's financial practices into conformity with those generally accepted worldwide.

As part of the annual review of substantive financial performance, and in keeping with practice established in 2004, a peer group of finance directors has reviewed the 2005 externally audited financial statements of the Centers to assess their compliance with CGIAR accounting policies and reporting guidelines, and to validate the analysis underpinning the CGIAR financial report. The guidelines (CGIAR Accounting Policies and Reporting Practices Manual) were recently updated to reflect international financial reporting standards. The peer review also made a number of recommendations to promote best practice in fiduciary management and financial reporting.

Another mechanism to strengthen accountability within the CGIAR is a joint CGIAR Secretariat/Centers initiative to strengthen internal auditing within the System by providing strategic internal audit advice and services to the Centers. The Internal Audit Unit is part of the Systems Office. In 2004, three Centers joined the consortium, bringing to 13 the number of Centers participating in this initiative. At the end of 2005, the two remaining Centers had committed to joining the consortium.

Box 2. Financial Concepts and Terminology

Research Agenda. The research agenda is made up of all the Center activities. One or more Centers may execute these activities jointly with national agricultural research systems (NARS), advanced research institutions (ARIs), or nongovernmental organizations (NGOs). Centers develop the agenda and implement programs in collaboration with partners. The ExCo and, if necessary, SC reviews the agenda and, if appropriate, recommends it for CGIAR financing. Projects in the agenda should:

- Aim to produce research or research-related international public goods (including training)
- Be of high priority with regard to accomplishment of the CGIAR's goals and objectives
- Have acceptable probabilities of success, and
- Have no alternative producers or sources of supply with suitable costs or reliability.

Agenda Funding. The research agenda, as endorsed by the CGIAR, is eligible for financing by Members, including the World Bank. All Centers and partners are encouraged to maximize financing. Mechanisms to ensure that the agenda is fully funded have evolved from unsuccessful attempts to "guarantee" full financing through the sole use of World Bank funds. Members, instead of the World Bank alone, now act collectively to fill any financial gaps that might arise in the course of the year.

Modalities of Funding. Centers are primarily financed through annual support from CGIAR Members. Modest amounts are also available from Centers' annual miscellaneous income, including ad hoc contributions from organizations that are not CGIAR Members. Member financing may be unrestricted and directed to the CGIAR with flexibility regarding allocation based on CGIAR priorities; or to Centers, or to programs. Alternatively, Member financing may be restricted and directed to a specific Center program, project, subproject, or activity as defined in a contractual agreement.

All Members are expected to help pay the full cost of Center operations, including administrative costs, of which they must bear a proportionate share. All Members are encouraged to provide general (i.e., unrestricted) support. Members usually disburse funds directly to Centers throughout the year. The CGIAR Secretariat provides disbursement services, through the World Bank, to Members.

CGIAR Agenda Matrix. The distribution of financial resources is presented as the CGIAR research agenda matrix. Activities are divided into five groups representing the principal undertakings of the CGIAR. The matrix reflects the full allocation of Center project costs among the CGIAR activities. Projects are the basic units of activity. Approximately 160 projects were ongoing in 2005. The CGIAR has identified and implemented several system wide programs to respond to specific challenges and strengthen collaboration among Centers and with partners.

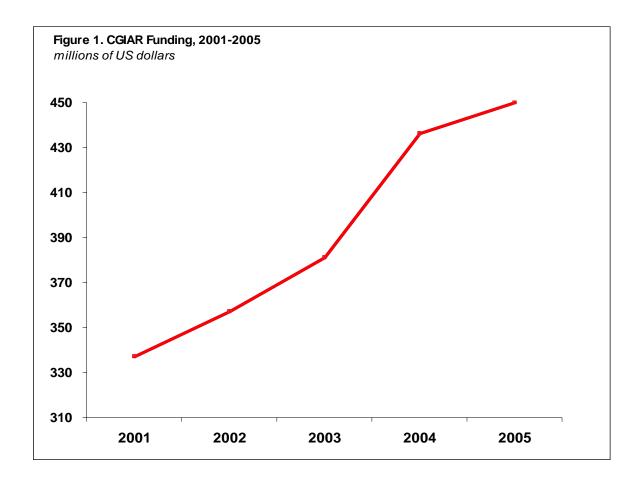

Implementation. Centers implement the research agenda in partnership with advanced institutions, NGOs, and NARS. These joint ventures might involve shared tasks at different points on the research and development continuum, from laboratory-based research to field-level experiments. Funding of such ventures is included in financing for the CGIAR research agenda.

2005 FUNDING

Overall

Members and Non-members provided \$450 million for the 2005 research agenda (see box 2 above). This represented an increase of \$13 million (3 percent) over the actual 2004 level of \$437 million but (2 percent) lower than the approved financing plan target of \$457 million.

Figure 1 shows CGIAR funding trends from 2001 to 2005 in historical values. Annex Table A1.1 provides Members' support since 1972. Funding in various details are shown in Annex 2.

Evolution of 2005 Funding

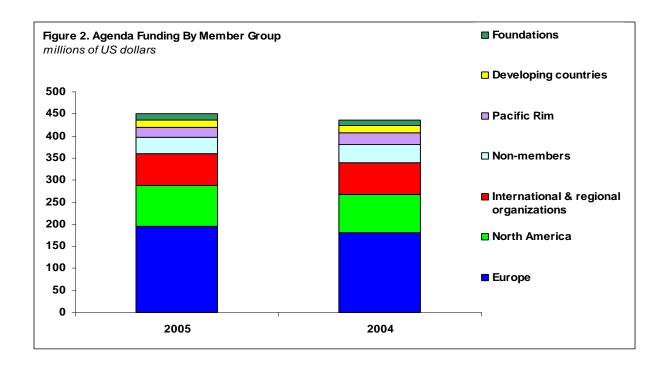

At AGM04, the CGIAR approved a financing plan of \$464 million for 2005 of which \$457 million was forecast from contributions of Members and Non-members and \$7 million from earned income.

Financial Outcome

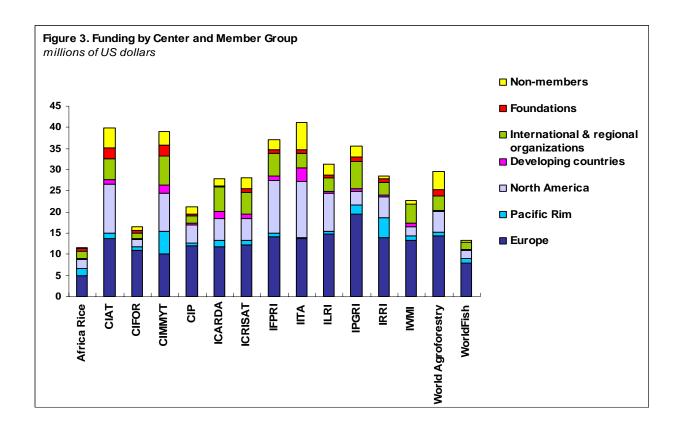

The \$450 million contributions from Members and Non-members and earned income of \$10 million resulted in total revenues of \$460 million for the CGIAR in 2005. Total expenditure was \$452 million, resulting in an overall operating surplus of \$8 million at the System level as detailed in Table A3.3. By comparison, the operating surplus in 2004 was \$28 million.

Funding Profile

Sixty of the 64 CGIAR Members² contributed \$413 million (\$396 million in 2004), and the remaining \$37 million came from a broad range of sources including Non-member Foundations and NGOs. Excluding the Non-member funding, the average Member funding was approximately \$6.9 million, slightly higher than the 2004 average of \$6.7 million. Figure 2 compares the composition of funding for 2005 with that of 2004. Figure 3 presents the composition of funding by Center and Member group in 2005.

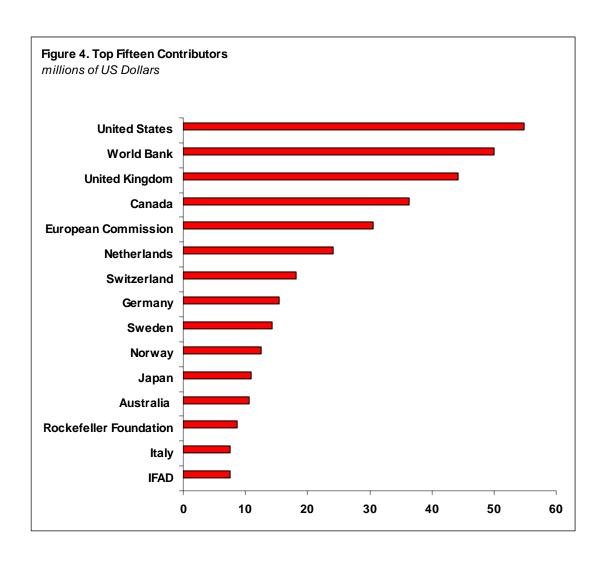

² For presentation purposes, Members are divided into four distinct groups: industrialized countries (24), Developing countries (24), Foundations (5), and International and regional organizations (11). Industrialized countries are further divided along geographical lines into three subgroups: Europe, North America and Pacific Rim.

Overall, funding increased by \$13 million (3 percent) compared with 2004. The increase in contributions in 2005 mainly came from Europe; \$15.5 million (9 percent over 2004) and North America; \$4.5 million (5 percent over 2004). Contributions from Developing countries decreased by \$1.3 million (8 percent below 2004). Nigeria maintained its rank as the top contributor among the Developing country members.

The decrease in the contributions from the Pacific Rim, \$1.9 million (7 percent) lower compared with 2004, was mainly attributed to the 20 percent reduction from Japan as well as foreign exchange losses due to a weaker yen in 2005.

The top fifteen contributors (Figure 4) accounted for approximately 77 percent (\$346 million) of contributions for the research agenda in 2005. The United States, contributing \$54.8 million, was the single largest contributor, followed by the World Bank (\$50 million), United Kingdom (\$44.2 million) and Canada (\$36.4 million). These members held the same rankings in 2004.

Disbursements

CGIAR Members have the option to disburse their contributions either directly to the Centers or through the Secretariat using the World Bank's payment system. In 2005, a new instrument – the Multi Donor Trust Fund Administrative Agreement (MDTFAA) – was finalized in order to enhance accountability and to bring the CGIAR trust fund into compliance with World Bank reforms. The MDTFAA constitutes a formal agreement between the World Bank and the contributing Member.

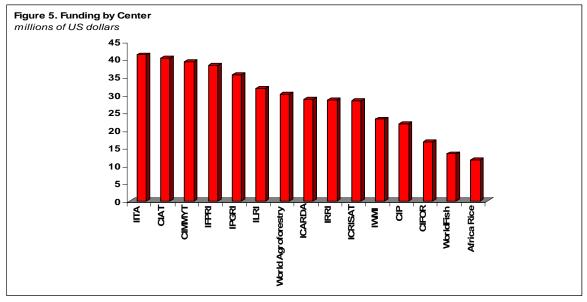

In 2005, approximately \$96 million (21 percent of total funding) from 11 Members was disbursed through the World Bank, compared with \$117 million (27 percent) from 16 Members in 2004. The reduction is attributed mainly to the initial transition process to the Multi Donor Trust Fund (MDTF). Details of disbursements through the World Bank are provided in table A2.4.

The main advantage to Members of using the Bank's payment system is a reduction in the number of disbursement transactions: Members make only one transfer to the World Bank account instead of as many as 15 to individual Center bank accounts.

In addition to trust funds, the World Bank's contribution is also managed by the CGIAR Secretariat.

Center Perspective ³

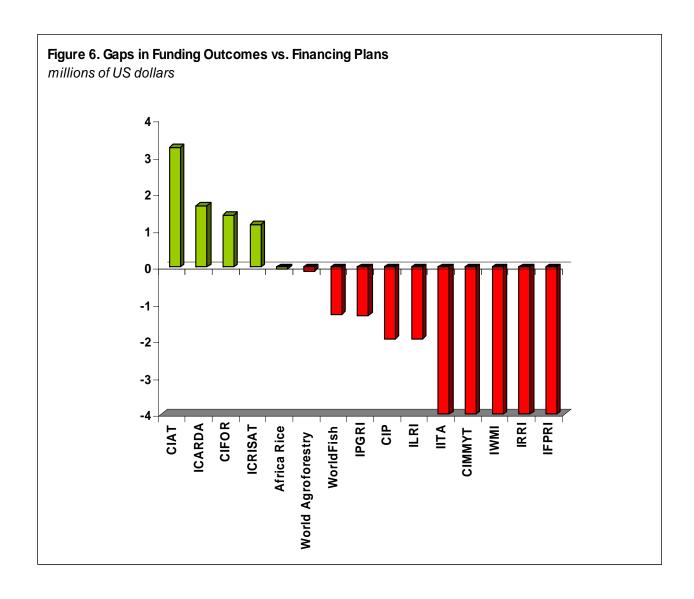

Figure 5 illustrates the distribution of funding by Center in 2005. Support to two Centers, IITA and CIAT was more than \$40 million, that to five Centers (CIMMYT, IFPRI, IPGRI, ILRI, and World Agroforestry) was between \$30 million and \$40 million, support to five others (ICARDA, IRRI, ICRISAT, IWMI⁴ and CIP) was between \$20 million and \$30 million while support to the final three (CIFOR, WorldFish and Africa Rice) was between \$10 and \$20 million.

³ To maintain the integrity of Center financial statements, the presentation of funding received by Centers (and expenditure reported) includes inter-Center activities. However, at the aggregate CGIAR level, these activities (funding and expenditure) are eliminated to avoid double counting. In 2005 inter-Center activities totaled \$5.4 million.

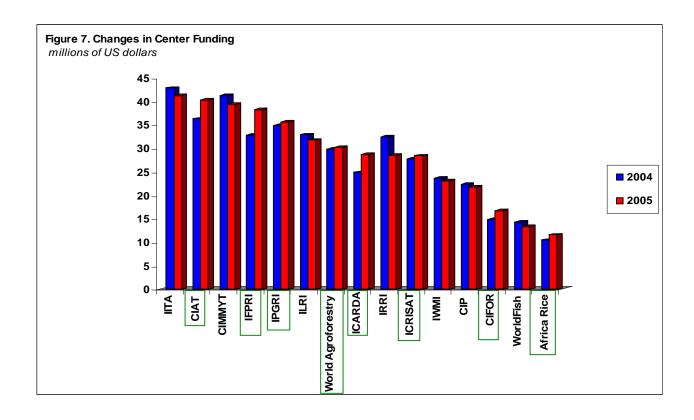

See footnote number 1

Figure 6 shows gaps in funding outcomes versus financing plan by Center in 2005. As shown, funding for five Centers was at or above the approved financing plans: CIAT (\$3.3 million or 9 percent); ICARDA (\$1.7 million or 6 percent); CIFOR (\$1.4 million or 9 percent); ICRISAT (\$1.2 million or 4 percent), and Africa Rice was at the same level as approved. Funding for six Centers (World Agroforestry, WorldFish, IPGRI, CIP, ILRI and IITA) was broadly in line with the financing plan (within 10 percent). Four Centers (CIMMYT, IWMI, IRRI and IFPRI) were more than 10 percent below their financing plans.

As Figure 7 shows⁵, funding increased for eight Centers (CIAT, IFPRI, IPGRI, World Agroforestry, ICARDA, ICRISAT and CIFOR), compared with twelve in 2004. Five of these (Africa Rice, CIAT, CIFOR, ICARDA and IFPRI) increased between 10 and 20 percent, and three (ICRISAT, IPGRI and World Agroforestry) increased between 1 and 5 percent. Seven Centers experienced a contraction in their funding. Six (CIP, CIMMYT, IITA, ILRI, IWMI⁶ and WorldFish) experienced reductions of 10 percent or less and IRRI had a reduction of 12 percent.

Annex Table A2.5 details 2005 funding by Center. Annex Table A2.6 presents 2005 funding outcomes by Center. Annex Table A2.7 shows CGIAR funding by Center from 2001 to 2005.

⁶ See footnote number 1

13

⁵ Figures include "inter-Center activities".

Modalities of Funding

Analysis of categories and types of funding provides another perspective on the challenges faced by Centers in implementing the approved research agenda. Depending on the degree of flexibility in its use, CGIAR funding has been traditionally divided into two broad categories: unrestricted and restricted.

Unrestricted Funding

Unrestricted funding refers to resources whose use is not restricted by the Members, i.e. the support is provided to the Center as a whole. The World Bank's funding for general support is the best example of this type of funding because, within the research agenda, allocation of the funding is totally unconstrained. Centers can allocate unrestricted funds to any program or cost within the research agenda on the basis of institutional needs and priorities.

Restricted Funding

There are three levels of restriction associated with restricted contributions in the CGIAR: the least restricted are programs (e.g., Challenge Programs, System wide and Ecoregional Programs), followed by targeted (e.g., geographic), and the most restricted are projects.

Project funding is restricted through a contract between a Member and the Center implementing the project, subproject, or activity. Funds for each line item in the budget are specified. Any reallocation of funds between budget lines generally requires the prior consent of the Member. Accountability requirements are detailed in the contract, which often call for financial audits on a periodic (annual) or end-of-project basis.

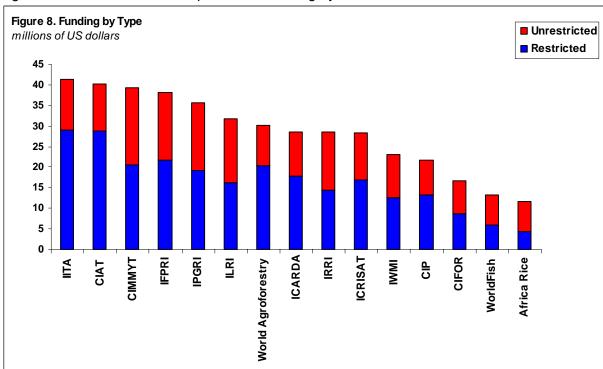

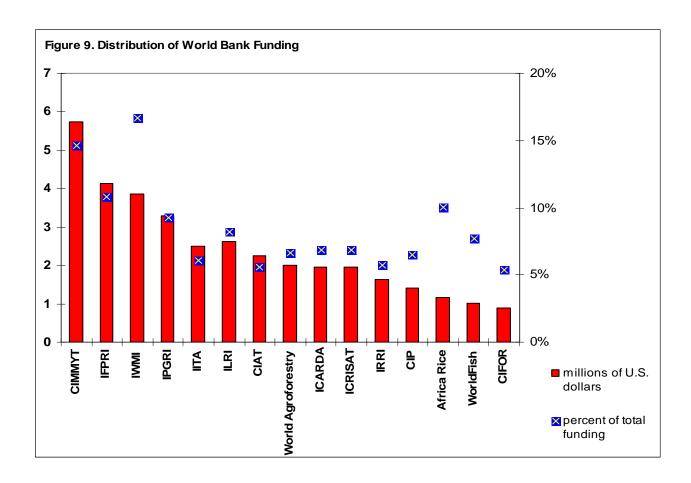

Figure 8 below shows the composition of funding by Center in 2005.

World Bank Funding

In 2005 the World Bank maintained its strategic approach to allocating its contribution. Approximately half of the Bank's contribution was allocated for general support and the other half was allocated to support the reform program and System Office and Committees. Of the allocation for general support, 75 percent was allocated according to a Center's size based on six funding brackets. Allocation of the other 25 percent was linked to performance, of which there were three categories: satisfactory, superior and outstanding.

Table A2.8 provides details of the allocation of the World Bank's 2001-2005 support.

Figure 9 illustrates the share of the World Bank's support in each Center's overall 2005 funding.

Challenge Programs

In 2005 Members and Non-members made available \$38 million for Challenge Programs compared with \$37 million in 2004. Of the \$38 million for 2005, \$35 million⁷ was spent (compared with \$19 million in 2004), leaving \$3 million which increased the cumulative balance brought forward from 2004 of \$28 million to \$31 million at the end of 2005. Table 2 summarizes Challenge Program resources and expenditure.

-

⁷ \$25 million of Challenge Program components were implemented by Centers and \$10 million by CGIAR partners

AGENDA RESOURCES

Spending on the 2005 research agenda amounted to \$452 million an increase of \$27 million or 6 percent over 2004 (\$425 million). Two Centers had lower expenditure in 2005 compared with 2004. These were CIMMYT (a reduction of \$2.3 million or 6 percent), and IITA (\$2.4 million, or 6 percent).

Expenditure of the remaining twelve Centers was higher than in 2004. They were: IFPRI (by \$8.3 million, or 26 percent), CIAT (by \$5.7 million or 16 percent), ICARDA (by \$4.5 million or 18 percent), CIFOR (\$ 2.4 million or 16 percent), IPGRI (\$2.5 million or 8 percent), World Agroforestry (by \$1.5 million or 5 percent), ICRISAT (\$1.7 million or 6 percent), WorldFish (by \$1.0 million or 7 percent), Africa Rice (by \$0.9 million or 9 percent), and CIP, ILRI and IRRI (by \$0.5 million or 2 percent).

Allocation of Resources

The allocation of resources is reviewed from the perspective of CGIAR outputs, regions and object of expenditure. Annex Table A3.1 provides data on expenditure by Center⁸ from 2001 to 2005.

By Output

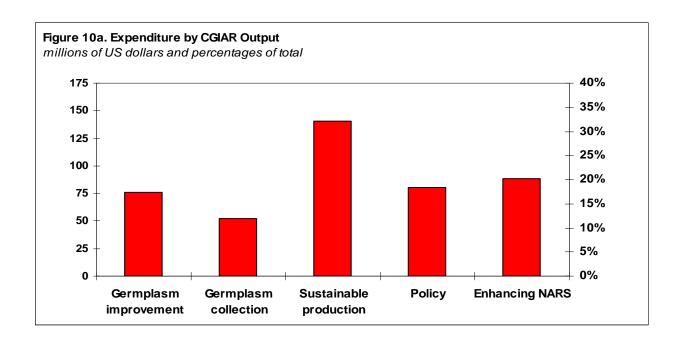

Figure 10a illustrates expenditure for the year 2005 in terms of the CGIAR's five research outputs: germplasm improvement, germplasm collection, sustainable production, policy and enhancing national agricultural research systems (NARS). Annex Table A3.2 provides details for the period 2001-2005.

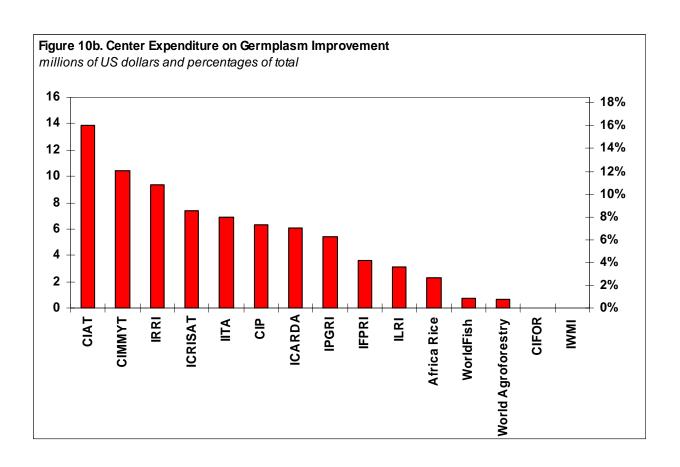

Expenditure for the five CGIAR output by Center is presented in Figures 10b, 10c, 10d, 10e and 10f. Annex Table A3.3 provides details.

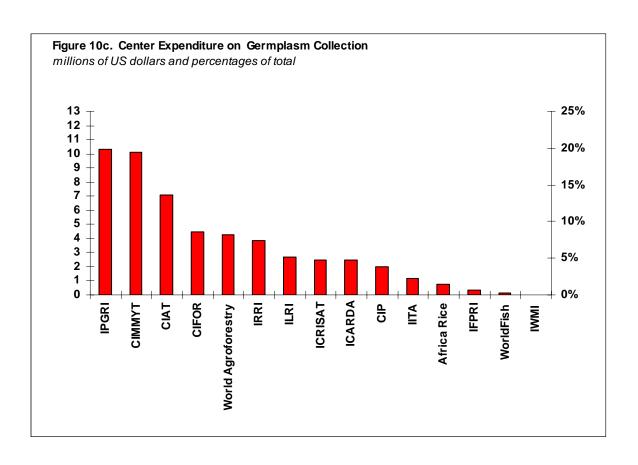

Expenditure for germplasm improvement was 17 percent of total expenditure, germplasm collection 12 percent, sustainable production 33 percent, policy 18 percent and enhancing NARS 20 percent.

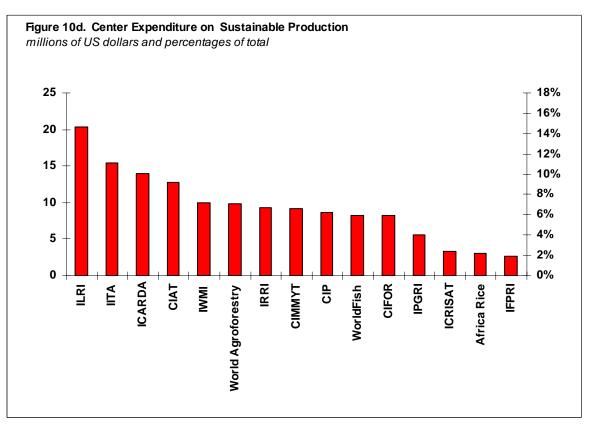

_

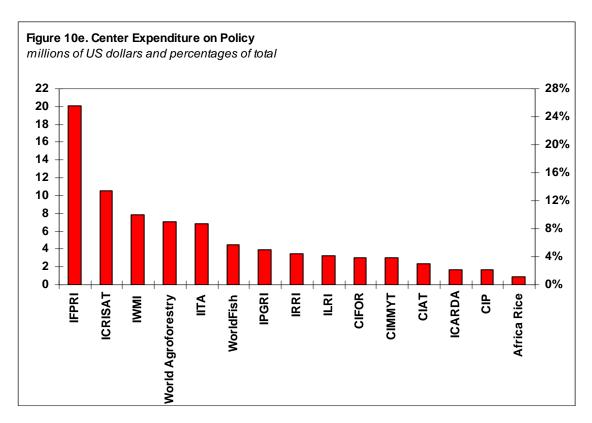

⁸ See footnote number 1

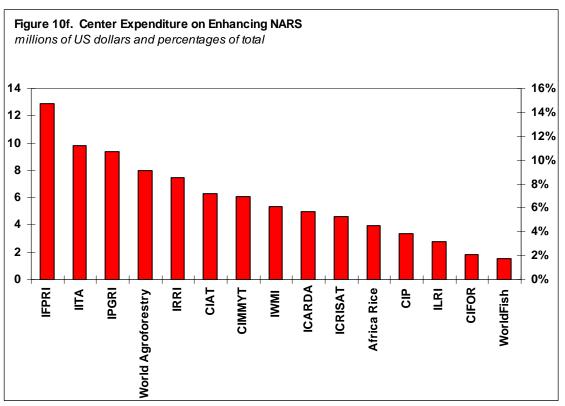

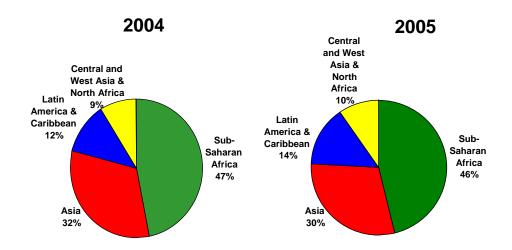

By Region

Figure 11 presents the 2005 allocation of CGIAR resources by regions. Expenditure in Sub-Saharan Africa decreased from 47 percent to 46 percent and Asia from 32 percent to 30 percent. Conversely, expenditure in Latin America and the Caribbean increased from 12 percent to 14 percent while that in Central and West Asia and North Africa increased from 9 percent to 10 percent.

All Centers invested in programs for sub-Saharan Africa in 2005 as shown in Table A3.4. Eight Centers – Africa Rice, CIMMYT, ICRISAT, IFPRI, IITA, ILRI, IPGRI, and World Agroforestry – accounted for the majority of allocations to this region. Four others - CIFOR, IRRI, IWMI and WorldFish - accounted for the majority of allocations to Asia. More than half of the allocations for CWANA continued to be made by ICARDA while CIAT and CIP accounted for 48 percent of all allocations made in Latin America and the Caribbean.

Figure 11. CGIAR Allocation by Region

By Object of Expenditure

Expenditure on personnel as a percentage of total expenditure remained at the same level in 2005 as in 2004 (45 percent, Figure 12). Expenditure on supplies and services decreased to 27 percent from 29 percent while that on collaboration and partnerships increased to 16 percent from 14 percent. Travel and depreciation remained at 8 percent and 4 percent, respectively, in 2005 compared with 2004. Annex Table A3.5 provides details of expenditure by object while Annex Table A3.6 provides data on staffing.

FINANCIAL POSITION

The aggregations of 2001-2005 Center data, shown in Table 3 and elaborated below, reflect the financial position of the CGIAR System. Annex Table A4.1 provides details by Center for 2005.

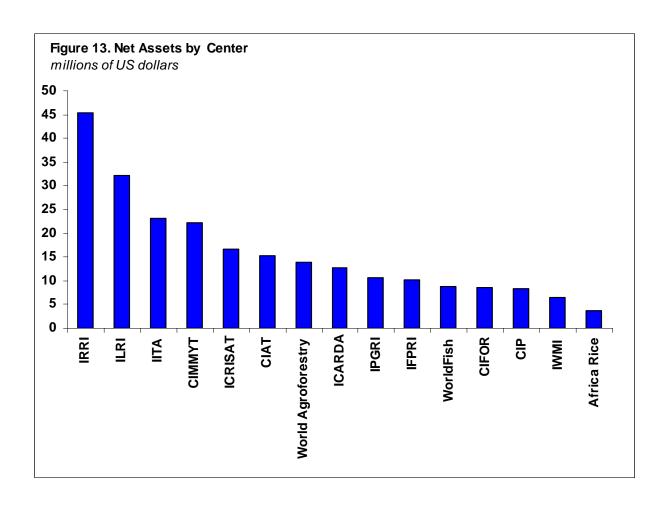

The 2005 financial data confirmed that, as was the case in previous years, the CGIAR as a whole was in a strong financial position. Total net assets at the end of the year were \$238 million (2004: \$236 million). These assets were made up of \$158 million (2004: \$156 million) in unrestricted net assets excluding investments in fixed assets, \$78 million (2004: \$78 million) in investments in fixed assets and \$2 million (same with 2004) in restricted net assets. Cash and cash-equivalent balances totaled \$267 million at the end of 2005 (2004: \$270 million). This figure includes \$45 million in cash investments disclosed under non-current assets. Investments in fixed assets (Table A4.2) totaled \$15.8 million in 2005 against \$15.5 million in 2004. At the end of 2005, \$84 million, equivalent to 19 percent of the total funding or more than 2 months of funding, was outstanding in accounts receivable from Members.

Net Assets

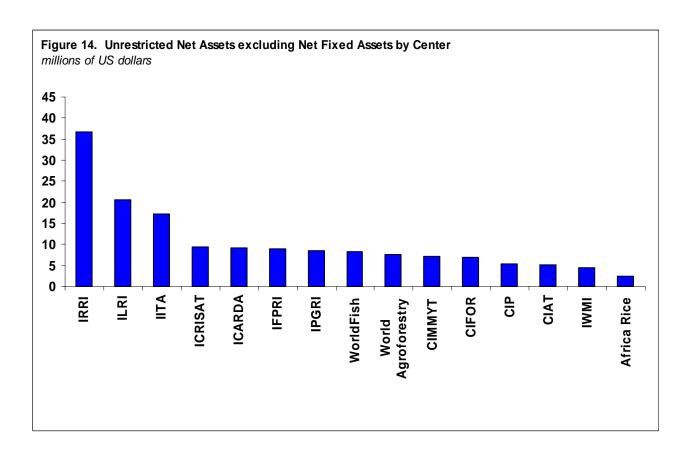

Net assets are the residual interest in an entity's assets after the liabilities have been deducted. Hence, net assets in not-for-profit organizations are equivalent to "shareholder's equity" in for-profit organizations. In the CGIAR, net assets arise mainly from the annual surplus of unrestricted funding over unrestricted expenditure. In exceptional cases, they could arise from technical reasons (such as the recognition of certain revenue and expense items directly into net assets and changes in accounting policies). In 2005, total net assets increased by \$2 million, the result of an increase of \$4 million in total assets partially offset by an increase of \$2 million in total liabilities. The level of net assets for each Center is shown in Figure 13.

Unrestricted Net Assets

As explained above, net assets in the CGIAR are mainly of the unrestricted category. Unrestricted net assets excluding net fixed assets indicate the financial capacity of an organization to adjust to unplanned changes in revenue or expenditure.

At the Center level, unrestricted net assets excluding net fixed assets increased by \$2 million to \$158 million in 2005. As a percentage of revenue, unrestricted net assets excluding net fixed assets remained unchanged in 2005 (34 percent). Figure 14 indicates the total of unrestricted net assets excluding net fixed assets by Center.

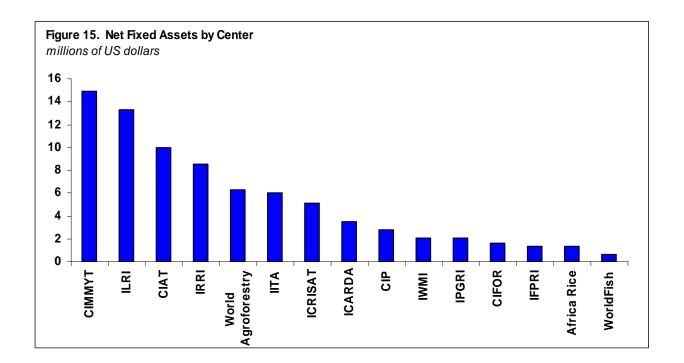

Restricted Net Assets

Restricted net assets rarely arise in the CGIAR's normal course of business because restricted operations do not result in a surplus or deficit. However, in exceptional cases an endowment may arise. An endowment is a permanently restricted net assets where income would normally be available for operations.

Net Fixed Assets

Capital invested in fixed assets makes up the bulk of designated net assets in the CGIAR⁹. This remained at the same level of \$78 million in 2005 and 2004. The CGIAR's asset base indicates a stable pattern of capital acquisition. In 2005, capital expenditure totaled \$15.8 million, about the same level as the annual depreciation charge. Annex Table A4.2 indicates capital expenditure by Center for the period 2001-2005. Figure 15 illustrates the 2005 year-end levels of net fixed assets for all the Centers. Physical research facilities of Centers need to be maintained at international standards suitable for cutting edge research. Adequate resources should be allocated for their maintenance and upkeep.

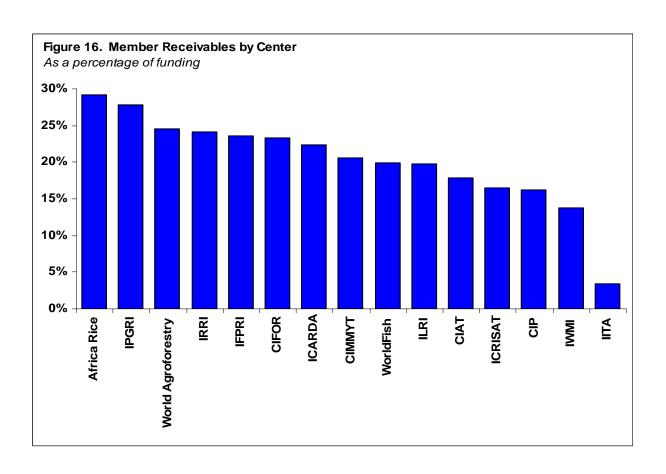

⁹ In the revised accounting guidelines (March 2004) unrestricted net assets are further divided into undesignated and designated net assets.

Liquidity

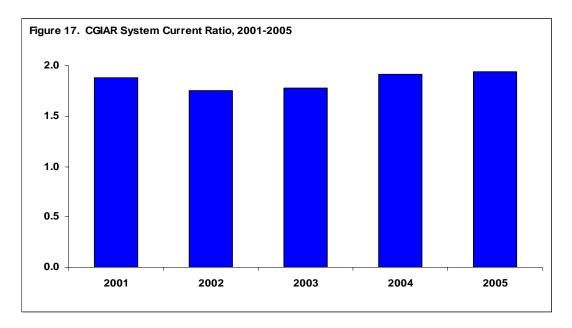

Liquidity represents an organization's ability to meet its short-term disbursement requirements. Two primary indicators of liquidity are "current ratio" and "working capital". Current ratio is the ratio of current assets to current liabilities. This measure is comparable across organizations, regardless of size, because it is a relative figure. Working capital is the difference between current assets and current liabilities and measures the ability of an organization to meet its short term obligations.

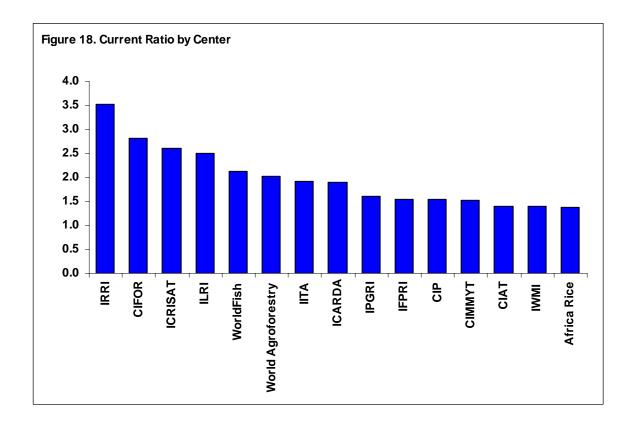

A Center's liquidity hinges on Members' disbursement pattern, which takes place throughout the entire calendar year. At the end of 2005, about 19 percent of the value of 2005 funding was outstanding as accounts receivable from Members. Figure 16 shows these by Center as a percentage of total funding.

Current Ratio

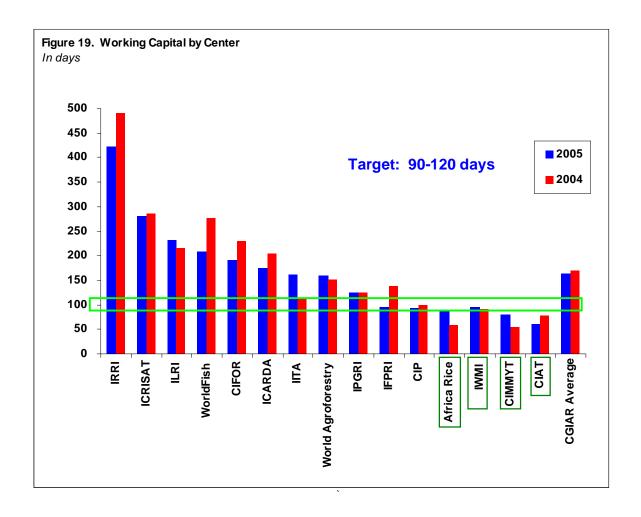

The system level current ratio was 1.9, the same level as in 2004. In general, a current ratio of 1.0 or higher is considered adequate. Figure 17 shows the evolution of the CGIAR current ratio from 2001. Figure 18 shows the ratio by Center for 2005.

Liquidity indicator

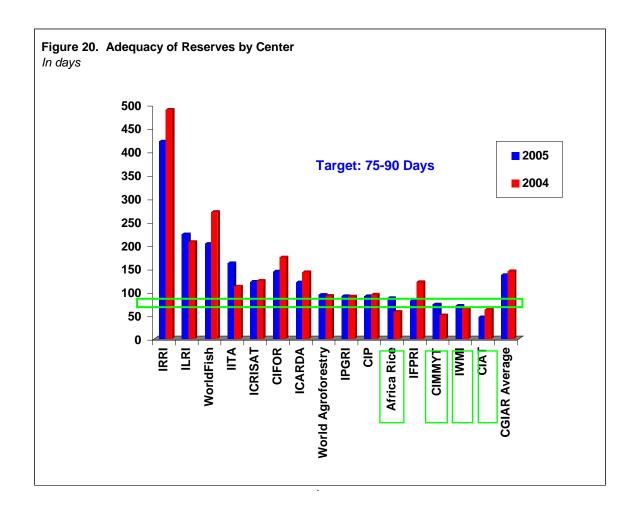

Figure 19 compares working capital expressed in expenditure days in 2005 and 2004. The 2005 system average of 163 days was lower than the 2004 average of 170 days. It is recommended that Centers build their working capital through planned annual resource allocation to the minimum recommended range of 90-120 days to ensure their ability to meet short-term obligations of Center operations. Four Centers (Africa Rice, IWMI¹⁰, CIMMYT and CIAT) had working capital levels below this range.

¹⁰ Computation of IWMI's ratio included components of the CPWF implemented by other Centers and Partners. If these had been excluded, IWMI's ratio would have been within the range.

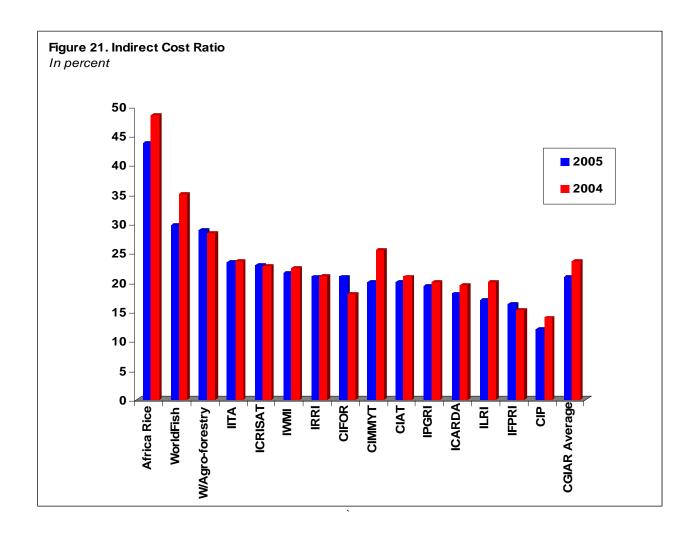

Long-term (adequacy of reserves indicator)

In the CGIAR, the reserve indicator is measured in terms of expenditure days of net assets (net of fixed assets). This is also known as adequacy of reserves. Figure 20 compares the adequacy of reserves for 2005 and 2004. The 2005 system average of 137 days was lower than the 2004 level of 145 days. The CGIAR-recommended minimum range is 75-90 days. Four Centers (Africa Rice, CIMMYT, IWMI, and CIAT) were below this range. IWMI's ratio remained below including or excluding the CPWF components implemented by other Centers and Partners.

Indirect Cost Ratio

This indicator (Figure 21), attempts to measure the efficiency of operations by measuring the level of institutional support services required to deliver an organization's output. This is computed as the ratio of indirect costs to direct costs (indirect costs divided by direct costs) expressed as a percentage. In 2005 the CGIAR's indirect cost ratio was 21 percent, lower than the 24 percent rate of 2004.

Cash Management of Restricted Operations

This indicator is intended to measure the level of restricted operations pre-financed by either the Center (receivables) or donor (payables). It is computed as restricted donors' accounts receivable divided by restricted donors' accounts payable expressed as a ratio. A ratio less than one indicates that more restricted operations are pre-financed by donors while a ratio greater than one indicates pre-financing by the Center.

GLOSSARY OF TERMS

Net Assets

The residual balance of total assets minus total liabilities (i.e. equivalent of "retained earnings" or "owner's worth" in a commercial business).

Unrestricted Net Assets

Net assets that are not restricted and are available for Board and Management designation based on business needs.

Restricted Net Assets

Net assets whose use is restricted by time or purposes.

Net Fixed Assets

This represents the cumulative cost of property and equipment less the accumulated depreciation.

Liquidity

This is defined as an organization's ability to meet current maturing obligations. Liquidity is measured by two indicators, i.e. current ratio and working capital in days of cash expenditure.

Current Ratio

This ratio is defined as current assets divided by current liabilities. As a general rule of thumb, a current ratio of 1.5 is considered desirable.

Working Capital

This is defined as current asset minus current liabilities.

Short-term Solvency (liquidity indicator)

This is **Working Capital** as defined above divided by per day operating expenses excluding depreciation. This indicator measures the ability of a Center to sustain current level of operation in the event of donor delays in grant remittance.

Long-term Stability (adequacy of reserve indicator)

This is computed as **Unrestricted Net Assets**, less **Net Fixed Assets**, (both as defined above) divided by per day operating expenses excluding depreciation. This measures the ability to sustain activity levels of a Center in the event of unexpected funding reduction from donors.

Indirect Cost Rate

This is the ratio of indirect costs to direct costs expressed as a percentage. This ratio generally measures how much research program activity a Center is able to support on its institutional cost base.

Cash Management of Restricted Operations

This financial health indicator is computed as restricted donor's accounts receivable divided by restricted accounts payable expressed as a ratio. The rule of thumb desirable rate is less than 1.

Per day Operating Expenses

The total annual Operating Expenses of a Center less depreciation divided by 365 days.
