

## Closing Week Of Legislature Taxes Easier

Victoria—Thirty-two working days after it began its labors on February 23 last the fifth session of the seventh legislature of British Columbia was prorogued by Lieutenant Governor, Hon. J. W. Fordham, at 9.15 p.m. on April 14. Eighty-five acts were given royal assent, including the Supply Act for \$22,897,350 and the Loan Act, 1933, for \$10,000,000. Renewal of the existing moratorium law; passage of several acts granting relief to irrigationists, mineral licensees, lumbermen loggers, municipal tax payers and others, were included in a large bloc of "relief legislation: not the least of which was the continuation of the main unemployment relief act, 1933. Extensive powers have been given municipalities to deal equitably with taxpayers who are in arrears, by reducing penalties, postponing tax sales and in other ways.

Reduction of expenditures rather than increased taxation was the means taken by the government of meeting inescapable costs this year. The reduction of expenditures from nearly \$30,000,000 two years ago, to \$22,729,593 estimated for 1933-34 is a result that speaks for itself. Included in the supply act is \$107,757 additional, supplementary to last year. The loan act provides authority to borrow \$7,000,000 on account of unemployment relief and deficits for last year, and \$3,000,000 for relief and other purposes this year. A concurrent Dominion return shows that British Columbia borrowed \$5,000,000 from the Dominion in 1931 and in 1932, and has repaid \$3,170,000 of this.

Not one dollar of extra taxation will be paid by the average B. C. citizen this year. Married men will get the benefit of last year's income tax changes, and pay less. Holders of land in unorganized districts have their school tax cut from five to two mills, while a large variety of licensees of timber, mineral claims and other rights shoulder lesser payments this year, as a direct measure of relief. The surtax on incomes over \$5,000 net will be borne by relatively few. The surtax on succession duties is not counted on to produce much revenue. Tourists will pay half of the meal tax, the entire proceeds of which will be less than \$250,000, all earmarked for B. C. hospitals.

Provincial government action to lower costs on the public is finding a direct reflex in municipalities, whose taxpayers will also pay less, and none more. It is true that provincial aid to civic centres will be reduced from \$7,500,000 in 1931, but they will still receive from \$4,000,000 to \$5,000,000 of provincial funds; the ministerial explanation being that the aid would be \$1,500,000 less than last year, all told. For some time past the province has been financing relief in some municipalities entirely, accepting the bonds of these centres on ten-year terms as security. The municipal aid issue has two sides, and the provincial taxpayer has been on the heavy end of it for a good many years; while it is a first principal that local wants shall be locally met.

Three departures in policy arise out of the session, two dealing with relief. The government is preparing plans to throw open reverted provincial lands to settlement by those wishing to leave the cities, under plans where settlers could go on lands for two years almost without payment of any kind, and then if suited, enter a ten-year easy-payment purchase plan to consolidate their holdings. In the last ten years 15,000 people have left the farms and gravitated to the cities. Most of them must go back, and the new land settlement plans will provide a genuine means of

assisting those who desire to help themselves. It is also proposed to take suitable men in relief camps, and outside of them, for training as placer miners and prospectors. These would be given a period of instruction, and then put to work in provincial placer reserves, under competent mining supervision. Those successful in the plan would be later grub-staked for a month, to secure a start on their own feet.

### The Political Situation

The most significant feature of the political situation was failure of consolidated attacks to break the ranks of the Conservatives in the house. Time after time propaganda seeking to undermine the Conservative regime predicted dire happenings for the session. The government, it said, was going to fall any day; private members were going to bolt to the Liberal group—to this or to the other group. The fact remains the Conservatives finished the session with a united front to the public galleries, giving substantial and solid majorities to all government bills. Events are beginning to show that he who was most hurt by the failure of union negotiations with the opposition was Mr. Pattullo, and public reaction to the stand taken by the leader of the Liberal party in the province is setting in strongly at coast points. No official announcement has been made as to the future course to the government, but cabinet reorganization is believed to be in the wind.

The Liberals are actively campaigning in all the Island ridings and have been for the last three weeks. The Co-operative Commonwealth Federation is moving into the British Columbia field, and says it will run candidates in all major centres at the next election. Then J. W. Bowser has announced his itinerary for a tour of the province as a non-party leader. Then a number of other groups are also getting their war paint on. In fact every person who thinks he can spare the time to pull B. C. out of a hole, is going to run. The prospects for the campaign looks like a campaign of many candidates.

### HAVING PLENTY OF SLIDES

The C. N. R. is having a full share of trouble with snow, mud and rock slides this spring, and they have only just nicely started. While the slides will cost the railway considerable, it will save the relief fund a great deal, and as the money comes from the same pockets there can not be much complaint made against the slides. The slides had to be expected as there was a heavy fall of snow last winter and not a great deal of frost.

### WERE STUCK IN THE MUD

Out the Kispox way the frost has come out of the ground and it is quite the thing for motors to go out that way or come into the settlements and get stuck in the mud. Many thousands of dollars have been spent on the Kispox road and there is no road yet, and after many more thousands of dollars have been spent there will still be no road. It is on the wrong side of the river, and nature is a hard force to buck, and an expensive one.

Canada is a generous country. She taught New Zealand how to establish a dairy industry, and Marquis wheat was a gift from heaven to the Argentinians.

The brooding and rearing of chicks a comparatively easy matter, but to be successful eternal vigilance and attention to detail is required.

Potash increases the yield and quality of Canadian tobacco.

## New Bulletin Placer Mining Is Now Ready

The vigorous policy of Hon. W. A. McKenzie, minister of mines, in giving all possible stimulation to gold-mining in the province, is again shown in the issuance of bulletin No. 1, 1933, "Placer Mining in British Columbia". In releasing the bulletin Mr. McKenzie explained that two previous bulletins on this subject had been issued in 1930 and another in 1931. The extreme demand for such information had exhausted both issues, 8,000 copies having been distributed. The data has been revised and a new bulletin is ready at this time.

Interest in placer mining has been strongly renewed since 1929. Prospecting has been particularly active as many men, finding employment difficult to obtain, have scoured the hills with pan and shovel in search of the yellow metal. Development of placer properties was vigorously prosecuted and productive hydraulics enjoyed a successful year.

Placer prospecting was stimulated by issuing a provincial free miners certificate free of charge, which enabled the holders thereof to locate and record placer claims without cost. By the end of 1932 about 10,000 of these certificates were issued and many tried their luck at small-scale placer-mining. While many were unsuccessful, owing to being totally inexperienced, a fair percentage had a satisfactory season, making from one to two dollars a day, being trained in this way for future years. Several new placer discoveries were reported, some of which promise to be of importance. Along the Fraser, Thompson and Shilkameen, and other rivers, bars which have been unworked for years have again been attacked and in the old placer camps many old diggings are being reworked.

Early in 1930 bulletin No. 2, entitled "Placer Mining in British Columbia" was issued. This contained reports of special examinations of placer areas made in the field season of 1929, and in addition, a general summary of placer mining in the province, including geological historical and statistical information regarding this branch of the mineral industry. Owing to the interest in placer mining the demand for this bulletin soon exhausted the issue. The bulletin was re-issued as No. 1, 1931, with some revision and additional new material. This latter is now also out of print. The present bulletin has been prepared in order to present brief information on promising areas for placer prospecting and methods of placer mining. Much of the historical data and special reports contained in the previous bulletins has been deleted, and the main material has been rewritten. Reports of the resident mining engineers indicate clearly the many areas in the province where opportunities exist for placer-mining of various kinds.

The placer-gold production in 1932 was \$346,800 a substantial increase of 19 per cent over the figure of \$291,992 recorded in 1931. The output from the larger operations was, in the aggregate, about the same as in the previous year, so that the winnings of individual and small scale operations were considerably larger and more numerous than in 1931.

Mr. McKenzie points out that since 1929, when he first engaged special engineers to report on placer mining, that the output has increased from \$118,711 to \$346,800 in 1932. It seems quite probable that the present revived interest may result in a considerably increased production in future years, besides finding employment for many. Undoubtedly placer mining presents

### BEAUTIFUL SERVICE FRIDAY

Evening in New Hazelton Church in Commemoration of the Crucifixion—Splendid Singing

Last Friday night (Good Friday) a special musical service was given in New Hazelton church and the largest congregation that ever gathered in the building was present. The service was also the most beautiful and the most impressive ever held there. Rev. Mr. Redman conducted the service and he also presided at the organ, and there is some question as to whether he excels most as a preacher or as a musician. He was ably assisted by Mrs. Redman who gave both a violin and a vocal solo, and by Mr. Mallinson, Mr. Rukin and Miss Burns, who gave vocal solos. The hymns selected for congregational singing were most appropriate and were well sung by the congregation. The service throughout was a great treat and did much to rouse interest in the church and its work.

### LIBERALS TO PICK CANDIDATE

Convention Called for April 25th in Smithers—Big Battle Expected Between East and West

The Liberal Association for Skeena riding will meet in convention in the village of Smithers on Tuesday, April 25th for the purpose of selecting a candidate to contest the riding at the next provincial election. It is understood a battle is about to be fought for the honor of succeeding Dr. Wrinch as the Liberal banner bearer, and it is reported that the keenest interest is being taken by party workers from both ends of the district with the Liberal of Hazelton holding the balance of power as it were. Anything might happen at that convention. The unexpected happened once before when the east and the west ends of Skeena Liberals could not rest peacefully one with the other. Whether A. M. Manson will attend the approaching convention or not has not been learned.

### BACK FROM VICTORIA AGAIN

Dr. H. C. and Mrs. Wrinch returned home on Thursday last after attending the last session of the legislature in Victoria. The Doctor was not overly enthusiastic over the results of the session and while he could not bring himself to admit that the government had done pretty well in face of the great handicaps that had to be overcome, and which in no way could be blamed on the government, he did admit that he was very glad that he was not one of the government and especially that he was not minister of finance.

George McBein is breaking up quite an acreage on his farm at Two Mile. He will sow grain this year.

Chickens require a fair proportion of animal feed ingredients in their food.

All pig ons are fond of salt dainties, and when they can get it they relish a feed of salt codfish.

Quite a lot of fur has been brought into the district the past season.

Now and again the police pick up a man riding the trains without proper credentials. This is now permissible any more and the men are given a few days free board when caught.

The New Hazelton hotel will be open for business by the 24th of May.

something better than unemployment relief for many during 1933.

## Wm. Chapman Badly Injured At Big Slide

The snow and rock slide at about mile 60 on the Skeena sub. which caused one of the snow sheds to collapse, is one of the worst that has yet visited the railway in this north country. For a week the railway company tried to remove the slide with the regular staff, but as it had been reduced to a minimum, it was found necessary the end of last week to increase the force and a large number of men from both Smithers and Prince Rupert were taken down to the slide.

The snow shed was about 500 feet long and before the shed collapsed a pile of snow and rock thirty feet high was on top of it. This was added to until finally the centre of the shed fell in. The situation was so dangerous that it was not safe for men to enter either end of the snow shed. Those in charge of the work of clearing wished to save what timber they could and the work was thus necessarily slow.

In the meantime freight was accumulating both east and west, and the interior was running short of supplies, while the east could get no halibut or other fish from Prince Rupert.

The snow shed that collapsed was one of the older sheds on the line and it had about served its life anyway. Thus far two men have been injured. The later part of the week Wm. Chapman, of the B. & B. Dept., and whose family reside at New Hazelton, was hit by a large piece of ice and he suffered a broken shoulder blade and two broken ribs with possible internal injuries. He was taken to the hospital in Prince Rupert.

It is understood that an effort will be made to transfer several car loads of fish around the slide. This will be a big job as it is about 1000 feet around the slide. In the meantime the interior country is inconvenienced considerably.

There was a fair attendance at the dance Easter Monday night in New Hazelton, but nothing like the crowds in the good old days now gone. The affair, however, was quite pleasant, although late in starting.

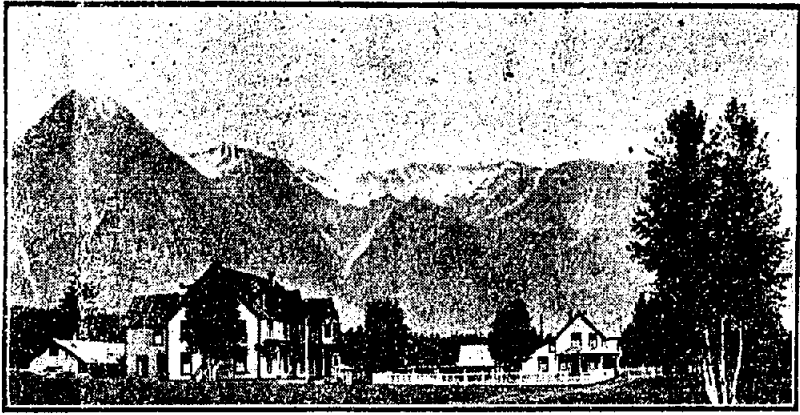

A new amendment to the Meat and Canned Foods Act prescribes that when containers of over three pounds capacity are used for jams, jellies and marmalades, the net weight of contents shall be declared in pounds, or pounds and ounces, on the principal label in letters not less than a quarter inch in height and plain visibility.

Rose bushes should be watered early in the morning or at night. Keep the soil well cultivated and in the early spring put on some good, well-rotted barnyard manure. Water the bushes well at intervals rather than a little drop every day.

Black cod, red cod, and rock cod as well as grey cod, which is also called whiting, are all taken in British Columbia fisheries. Ling cod are caught in greatest abundance.

Production of gasoline by hydrogenating the McMurray tar sands and coal in the province of Alberta by using hydrogen from the Turner Valley field now going to waste, was the theory advanced by Prof. Edgar Stansfield of the research council of Alberta recently, to the meeting of the Canadian Institute of Mining and Metallurgy, Northern Alberta Branch.

Fifty-one Alberta families have been put on the land and it is expected that another hundred will be placed there this year.

[New Hazelton, B. C.]

### RATIONS FOR WORK HORSES

If a teamster is to get a profitable return from his horses, and to keep them in good condition for their work, care must be taken in preparing and feeding a suitable ration. Many mixtures and rates of feeding have been tried and compared at the Dominion Experimental Farm, and it has been found that a grain mixture of five parts of whole oats, two parts bran, fed at the rate of 1 pound per one hundred pounds of live weight in the horse is a safe grain ration for horses at moderate work. As fodder, either clean timothy or mixed timothy and clover should be fed at a rate of about one pound per one hundred pounds of live weight. During the season of heavy work the proportion of bran may safely be reduced to one half, and the ration increased to one and a quarter pounds of the mixture per one hundred pounds of live weight.

A good feeding practice to follow is to feed three-eighths of the days grain mixture and quarter of the days hay in the early morning and again at mid day. For the evening meal the ration given is one quarter of the total grain mixture and one half of the days hay. When this plan is followed the horses go to work comfortable and but little danger of digestive trouble owing to distended stomachs while at work. On days that the horses are idle the grain ration is reduced one-half and bran mashes are given on Saturday night, and on nights previous to occasional idle days.

In the feeding of driving horses the same general precautions may safely be followed, with the exception that they should be fed more sparingly.

Feed roots when grain cannot be had. Carrots are perhaps most desirable, sugar beets, turnips and mangels are relished and useful. From three to six pounds of roots per day for horses at light work and less quantities or none at all while heavy work is being performed is recommended. Watering is best done before feeding, with, if necessary, a moderate drink before go-

ing to work. Copious drinking when the horse is over-heated, is a dangerous practice, liable to cause permanent injury in foundering.

### FEEDING BROODER CHICKS

As soon as the chicks are removed from the incubator to the brooder they may be fed, but they will do nicely for a day or so longer. After seeing to it that the chicks are comfortable they should be given slightly warmed water to drink in the usual chick fountains. Chick-size grit should be placed before them in shallow pans, and hoppers of mash may then be put before them. It is important that sufficient hopper and fountain space be provided so that all chicks may get sufficient food and water without crowding. Once the hoppers are put down they are not removed again as there is no danger of overfeeding.

Brooding feeds usually consist of the following essentials; chick scratch grain, mash, grit, shell, charcoal and green feed. For grain a commercial chick size mixture may be purchased and it is not usually fed for a week or ten days. The mash ordinarily will contain ground grains, mineral feeds, such as bone meal, animal feeds, such as meat meal, fish meal, milk powder, etc., salt, and cod liver oil. Unless the chicks have access to sunshine within the first week or ten days it will be wisdom to insist that cod liver oil be a component of the mash if a commercial product is fed.

A very satisfactory home mixed mash may be composed of the following:—one part each of shorts, middling yellow corn meal and ground oat groat with one half part of animal feeds made up of meat meal, fish meal, buttermilk powder and bone meal in equal proportions. These ingredients may be varied in proportion according to cost and availability of the different feeds, the bone meal, however, remaining at the same level. In addition to these ingredients, one half per cent of salt, and two percent of crude cod liver oil should be incorporated into the mixture. When the birds are on free range in the sunlight, the oil may be reduced to one per cent or eliminated entirely. If milk in any form is available, the animal feeds of the mash may be cut down accordingly.

Canada outdid all other countries in the import of onions to Georgetown in British Guiana during the months of January and February and the same proportion was extending into March. In all 214,366 pounds of onions were imported into that colony, and of this total Canada provided 135,285 pounds. Formerly Holland lead by a large margin, but since the inter-Empire preferences went into effect following the Ottawa conference Canada has been out in front.

Fifty-one Alberta families have been put on the land and it is expected that another hundred will be placed there this year.

Rose bushes should be watered early in the morning or at night. Keep the soil well cultivated and in the early spring put on some good, well-rotted barnyard manure. Water the bushes well at intervals rather than a little drop every day.

Production of gasoline by hydrogenating the McCurray tar sands and coal in the province of Alberta by using hydrogen from the Turner Valley field now going to waste, was the theory advanced by Prof. Edgar Stansfield of the research council of Alberta recently, to the meeting of the Canadian Institute of Mining and Metallurgy, Northern Alberta Branch.

Black cod, red cod, and rock cod as well as grey cod, which is also called whiting, are all taken in British Columbia fisheries. Ling cod are caught in greatest abundance.

Not a week passes that you are not canvassed by representatives of nationally advertised products to stock and push them, and to give them window and counter displays

## Local Retailers is it Fair?

Their representatives tell you of the large sums of money being spent in metropolitan daily newspapers and in national magazines to create and maintain consumer demand, and they try hard to persuade you that such "remote" advertising will surely create and sustain a large local demand.

It is admitted that it is advantageous to you and your customers for you to stock nationally advertised products but such products will sell faster if they are locally advertised in the Omineca Herald, in addition to being advertised in non-local publications.

There is no good or sound reason why a national advertiser should not do local advertising in the Omineca Herald. You will be told when you say to the representative of firms canvassing you to stock and push his firm's goods, "Oh, we could never afford to do local advertising." What he really means when he says such words, is that he does not expect large

local sales. If he did then he would see that these local sales can provide a sum adequate to maintain a local advertising campaign.

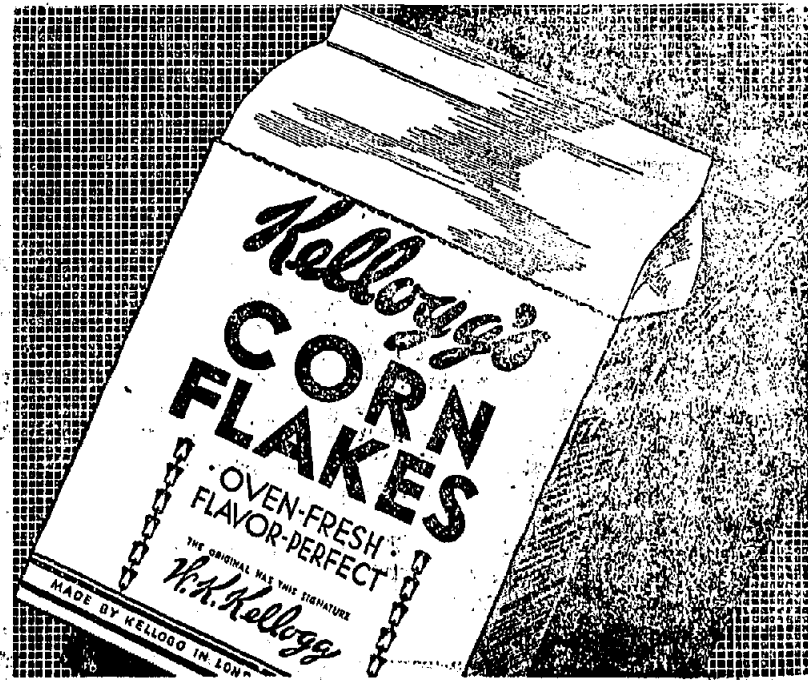

Why should you help a national advertiser to develop his business in the territory covered by the circulation of The Omineca Herald without advertising co-operation from him?

You provide local distribution facilities for manufacturers of branded products, and your value to them is recognized. Why, then should these manufacturers not assist you to sell these goods, if stocked by you, by a series of local advertisements, perhaps carrying your name as distributor, published in the Omineca Herald.

N. B.—Show this advertisement to those travellers who urge you to stock goods not locally advertised.

### TIMBER SALE X15539

Sealed tenders will be received by the Minister of Lands at Victoria, B. C., not later than noon on 1st day of May, 1933, for the purchase of License X15539, to cut 476,820 lineal feet of Cedar poles and piling on an area adjoining the east boundaries of Lots 1413 and 1418, Kitsumgallum Valley near Terrace, Range 5, Coast Land District.

Three (3) years will be allowed for the removal of timber.

Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.  
Ap. 12-May 3.

## Terrace Notes

Mrs. Willie of the Terrace Hotel is the proud owner of a rose bush in full bloom. She has had the plant inside all winter and as a result of her care it has responded to the spring sunshine adding a welcome splash of color to the hotel.

District Forester E. A. Parlow was in town the beginning of the week, and was seen along with George Little doing some beautifying along Lakelse Ave. Several gaps existed in the line of shade trees on the north side of the avenue, and seedlings have been planted by the two enthusiasts. The new plantings are of coniferous including white pines, firs, etc.

Maurice Barnes is spending several days at the Philbert Hotel while receiving medical attention.

Capt. Clarke of the R.C.M.P., Itupert spent from Thursday to Saturday in the district.

The public works department is busy clearing the snow from the Usk-Terrace road. It is reported that in the neighborhood of Copper River there is still snow to a depth of three feet on the level.

A. Y. Wilson of Reno was a visitor here last Saturday.

Herman Freckman, who for the last few months has been visiting at his old home in Denmark, returned to Terrace last Thursday.

Mrs. Gagnon of Smithers, accompanied by her grandchildren arrived on Thursday.

Mrs. O. Kenney left Saturday night for Anyox.

Mrs. W. Holmes left Saturday for Anyox.

A. St. Louis of Usk visited Terrace last week.

J. Finlayson, who has bought the Graham place south of town, is making necessary repairs and is preparing for the spring work.

Easter Monday was not without its excitement in town. About 11 a.m. sparkes from the chimney on the residence of George Little started a roof fire on the east side of the building. The citizens quickly responded to the alarm and got the blaze out before any material damage was done.

At 1.15 the alarm went again and it was found the Harry Martin's house west of town was on fire. The blaze was in the west end of the roof, but it was put out before much damage was done.

Miss Russon of Campbell River is a holiday visitor of Canon and Mrs. E. A. McKim.

Mrs. J. Farquar is now a guest of her mother for a week or so.

Miss Mary Easthope, formerly of the staff of the Kitsumgallum school, is a guest at Usk and will visit with Mrs. Marsh the latter part of the week.

Lawrence Greig is spending the hollidays at Lakelse Lake in hopes of seeing a grizzly. He wants a rug on the floor before next winter.

The Woman's Auxiliary of St. Matthews church held a sale of home cooking last Saturday and raised \$25.

The special Easter services were all well attended and the special music was much appreciated.

In Knox church on Easter Monday night the Sunday school children put on a pageant entitled "Did you know Jesus?"

It is understood that the village commissioners are lining up a good program for the further development of

and gravelling will predominate. the village streets. More sidewalks

Jonas Willman and Andrew Pete of Usk were in town on Monday.

It is reported that one of the young ladies in Terrace is planning on opening an Oriental Tea Room.

### THE TERRACE DRAMATIC CLUB

As a means of diversion the majority of the young folks of Terrace, and a few from Usk and Copper City have organized the Terrace Dramatic Club. The meetings are now held at the Marionette Shoppe have proven a pleasant pastime. for the present twenty-five members as well as making headway in their objective—plays, dances and concerts to be given in public in due course. The Club also has its own 3 piece orchestra. A number of the members have already shown considerable talent in different forms. The officers of the club are:—President, Jean McLeod; sec.-treas., Helen Smith; orchestra conductor, Ed. Kremmer; master of ceremonies, Mrs. Kate Smith; bouncers, Percy Gladstone, "Fritz" Thomas and Frank Hipp.

Nova Scotia's seafishermen caught 26,640 hundredweight of alewives last year. Most of the catch was used fresh but 127 hundred weight of the smoked product were put up; 1800 barrels of fish were pickled.

The strawberry weevil is a hiker. He has strong legs and can walk rapidly for long distances.

In the average Canadian home the most important breeding place of the clothes moth is in the hot air furnace pipes amongst the fluff brushed thru the radiators.

"We wish to announce the appointment of John DeKergemeaux as Chevrolet sales and servant agent for Terrace and district."

The New Chevrolet Six for 1933 is a beauty. Dependability and operating economy. For full information apply to

## WITH THE TRAIL RIDERS

East is East and West is West, but men ride wherever the sun shines and the Trail Riders of the Canadian Rockies, with a membership which girdles the globe, are creating widespread interest with their plans for their 1932 expedition from Banff to Mount Assiniboine, through some of the most beautiful country in the great mountains from which they take their name. The famous peak, with its many adjoining lakes and valleys, was the focal point of the 1927 trail ride and this year's trip, starting on July 29, will follow generally the same lines, with nights spent in camp, according to the best traditions of the Order. Ample time will be given for exploring the territory traversed, the ride occupying five days and traversing Brewster and Allenby Creeks; Assiniboine Pass and the shores of Lake Magog to the great mountain, which is the objective of the riders. Return will be made through the Valley of the Rocks; the Golden Valley; Citadel Pass and so

through Sunshine Camp to Banff once more. The pictures shown above are distinctly interesting and show Lt. Col. Phil Moore, president of the Trail Riders, and Mrs. Moore, on camel-back at the Pyramids, during the world-cruise of the Canadian Pacific liner "Empress of Britain", in strong contrast to the cowboy viewing Mount Assiniboine, where this year's trail ride leads. Inset is H. M. King Prajadhipok of Siam, who proved an enthusiastic trail rider during his visit to Canada last summer. Below, two fair bathers are seen setting out from one of the cabins at Assiniboine Camp:

## Mining in British Columbia

Among the Canadian Provinces, British Columbia is the leading producer of Lead, Silver and Zinc. In this Province about 45% of Canada's Silver, 97% of the Lead and 93% of the Zinc are produced. British Columbia has produced approximately \$1,300,000,000 worth of minerals. About 200,000 square miles of unexplored mineral-bearing lands are open for prospecting.

Practically every mineral known to be found on the continent occurs to some extent in British Columbia.

## Doings Around Home

Of interest to you and your friends

On Friday night the New Hazel C.G.I.T. group will hold a social evening in place of the regular session.

F. Teuber was injured by a block of ice falling on him at the big slide on the railway on the Skeena sub.

Dr. H. C. Wrinch will attend the meeting of the Smithers Liberal Asso. tomorrow night to tell the boys all that was done or was not done during the late session of the legislature. He will also tell the boys about the bright prospects the Grand Old Party have when the next election is called. The meeting is being held for the purpose of appointing delegates to the Liberal nominating convention to be held a week later and for other purposes, such as what candidate is to be supported, etc.

The Mounted Police were round and about the past week collecting licenses from radio owners. It is now up to the Canadian Broadcasting Commission to deliver some radio. Since the Commission took over broadcasting in Canada there has been only part time reception at least in the northern part of this northern district. It will never do to confine broadcasting to Vancouver as nothing can come out of that city for the north unless the ward heelers get their pickings.

Robt. Shannon of Sealy Lake school is a guest of Jack Wright at Cedarvale.

Messrs. Campbell and Freeman of the Kispix schools are spending the Easter vacation with Mr. Freeman's brother at Port Simpson.

Rev. Mr. Redman held Easter services at Kispix last Sunday afternoon. There was a large attendance and a

very impressive service was the result. Fortunately the minister took a couple of assistants along with him in his car or he never would have got thru the mud. This week Rev. Mr. Redman is going to Cedarvale for a couple of days to organize work there for the United Church.

Mrs. Harold Gould and infant son, accompanied by Mrs. Peter Smith, left Tuesday morning for Barrett.

George Little of Terrace was a visitor here last Thursday calling on a few of his old customers. He then went on to Smithers.

There was a very good attendance at the Easter Tea and sale of home cooking, flowers, etc., held by the Ladies Aid of the United Church in Hazelton on Thursday afternoon last. The ladies disposed of everything they had.

Dr. I. B. Wrinch left Saturday morning for Kamloops where he will spend a week or so with Mrs. Wrinch.

The illustrated lecture given by Rev. Mr. Redman in the United Church in Hazelton last Thursday night was not so well attended as might have been. There was some doubt as to whether the picture slides would get over the snow slides in time for Thursday night. They got there alright and those people who attended were well repaid for the effort of turning out.

The special services in the United Church in New Hazelton in the morning and in Hazelton in the evening were largely attended and greatly appreciated. In the morning Mrs. Redman and Athol Russell sang a duet and Mrs. Redman also gave a couple of vocal solos.

Ed Sweet has started the erection of a large new dairy barn at Two Mile. The new structure will give him lots of room to increase his herd of dairy cows and to store feed as well. Mr. Sweet is also getting considerably more land under cultivation.

Mrs. R. Spooner has returned home after spending several weeks with her son Peter in the Bulkley Valley.

The grader was out on the roads on Monday and made quite an improvement.

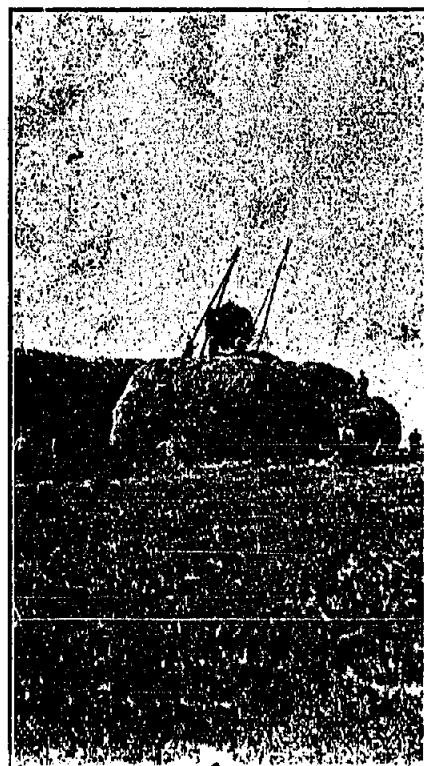

Spring is here—The boys are pitching horse shoes and throwing the baseball.

The big slide at mile 60 Skeena sub. was so far cleared away that the night train Tuesday was allowed through.

## CANADIAN AUTHOR MAKES BIG HIT

The literary hit of the year has been made by Frederick Niven, an author residing near Nelson, B.C. whose novel entitled "Mrs. Barry" is described by Compton Mackenzie in the Daily Mail as a profoundly moving book, and is hailed as a classic worthy to stand beside Sir James Barrie's "Margaret Ogilvy". Although Frederick Niven has a long list of books to his credit, and has always enjoyed a following among the critics, this is his first appearance among the "best sellers". He worked his way through Canada early this century, and at one time handled baggage and freight for the railway at Nelson, B.C. He eventually took up a small holding on Kootenay Lake twenty years ago, where he has secured excellent local colour for his western stories. "Mrs. Barry" is a novel of the type in Glasgow, where at one time Frederick Niven edited a newspaper.
