

THE OMINECA HERALD

VOL. 7 NEW HAZELTON, B. C., JULY 10, 1914 No. 2

NEW HAZELTON SLUGGED TO VICTORY OVER OLD TOWNERS

Good, Bad and Indifferent Ball Dished Up for Local Fans on Saturday on New Hazelton's Pasture--Clubbed Two Pitchers Out of the Box--Score Was Eleven to Two

Three old town heavies were worked in last Saturday's McClary Cup contest to appease the batting hunger of the New Hazelton baseball team. The locals had their best batting eyes along and they pounded, shoved, rapped and poked Spalding's pills as administered by Sinclair and Morrison into every nook and corner of the grounds. Roy McDonald had a great day at bat, and in the first and second innings pushed that little round thing for two bags with the pillows well populated, bringing in four runs. The game was played on the New Hazelton diamond and the final score was 11-2.

Sinclair was on the mound for the opening of the game, but failed to last through the first chapter, during which five runs were registered. Morrison, a late arrival from the Golden Gate who has joined the camp of the Tigers, was put on slab work and for a minute it looked as though he might be effective, retiring the new town by fanning the first man up. In the second, however, the visitors again sank into a slough of despond when, after Hodgins and Welch had retired, J. Jennings clouted the ball over right field's head and Barrett repeated to center field; then McDonald tipped off an assortment of fouls before straightening out his second double, which brought in two.

In the third Doc Rock essayed a prescription from the box for the benefit of the old town and he certainly was a success, allowing only eighteen men to bat in the five innings he was flinging.

Johnny Jennings was seen to better advantage than in the rain of the previous match. He had everything on the ball and had them all mixed up like an omelette. His marvellous one-hand pick-up of Graham Rock's smash in the sixth was a feature of the game.

Welch on first for New Hazelton gave the best exhibition of playing initial sack ever seen in this district and his play in the fourth when he took a peg to catch Doc Rock and then seemingly without looking catapulted the ball to Hodgins, catching Sinclair off the base, was loudly applauded. In fact all the new town players played excellent ball. Hodgins at 3rd had two bad pegs to mar an otherwise splendid game, one

in the ninth contributing considerably to the old town's pair of tallies.

Lynch and O'Shea for the visitors did some good work in the field, and, forgetting his disastrous experience on the pitcher's hill, Sinclair played a game characteristic of his usual good work at bat and in the field.

Following is the line-up of the teams and a summary:

Hazelton	New Hazelton
R. Rock.....2b	Hodgins.....3b
Sinclair...p, 3b, s.s.	Welch.....1b
Doc Rock...s.s., p	J. Jennings.....p

Smithers--so it is rumored--will play here on Sunday and Monday.

The teams in the Northern Interior Baseball League are now all tied in the race for the McClary mug, and from now on there will be some exciting scenes enacted on the diamond.

Have the managers of the local club a schedule of the dates on which the cup games are to be played? The supporters want to know and have a right to the information. Several schedules were drawn up early in the season, but they were drawn up without authority from the club as a whole. If there is a schedule, it should be given to the public--not kept a secret by one man.

While Saturday's baseball game was struggling along in the eighth, Paddy Martin strolled on the grounds with a pair of strangers in tow, who had just arrived on the eastbound. They were consigned to the old town ball club and were given a splendid ovation by the populace on the field. But somebody was sufficiently unmagnanimous to request their inspection of the tally slab. One of the new arrivals is a pitcher to take the place of Graham Rock, whose arm went out two weeks ago.

HAS A LEAD VEIN

Starting to Show Up Ore on Rocher de Boule Wonder Group

A lead vein has been uncovered on the Rocher de Boule Wonder group. O. B. Wallace came down for the week end and brought some fine samples of the new ore with him. He says that he has a vein of from two to two and a half feet, and the surface samples certainly show some fine lead ore. There is also a little copper running through it, but the lead predominates.

During the past week the surface prospecting got well started and is now progressing favorably. Mr. Wallace feels much encouraged by the new find.

WHO STOLE THE CASH REGISTER?

Early Morning Robbery at the Northern Hotel Secures Only Fifteen Dollars for Thief

Who stole the cash register from the office of the Northern hotel last Monday night or early Tuesday morning? The night watchman, the police and the proprietor of the hotel would all like to know, and so would some of the guests in the house and the neighboring business men. It was after midnight Monday, the lights were all out and day was just breaking; the watchman was in some other part of the house when a party walked into the hotel and quietly picked up the cash register, carried it outside behind the garage and there broke open the bottom and removed the contents--\$15.00. He left the register outside and the theft was not discovered until the rest of the hotel staff began to go to work. In the afternoon the register was found, but that is not the end of the mystery.

HAS ORGANIZED NEW COMPANY

R. P. Trimble is Secretary and General Manager of the Juniper Creek Mines, Limited

R. P. Trimble arrived at the Great Ohio property on Saturday night from Portland and is spending the week up there. He was here Wednesday night. Mr. Trimble has completed the organization of his company, which will be known as the Juniper Creek Mines, Limited. Mr. Anderson, of the General Electric Co., Portland, is president, and Mr. Trimble is secretary and general manager. His head office will be in Portland. The other officers and directors are Tacoma and Portland men, some of them being connected with the Tacoma smelter.

Mr. Trimble has a strong organization and they are capable of carrying on development on a very large scale, and as soon as conditions warrant it this work will be undertaken.

BROUGHT DOWN SAMPLES

Jos. Eberhardt Opening His California Claim on Rocher de Boule

Jos. Eberhardt came down from the California claim on Rocher de Boule mountain last week and brought several samples from his property with him. He has three veins exposed now and they give promise of being as good as any on the hill. Some of the samples can be seen in the ore collection in the Herald window. For the present Mr. Eberhardt will devote his time and attention to other mineral claims as there is considerable snow yet near the summit where he will have to do his first work, but he will get busy on it next month. The California claim is up from the Sealey gulch. Another claim was staked this year adjoining.

L. Bullock-Webster is in the district this week doing missionary work for the Prince Rupert annual exhibition.

HAVE ENCOUNTERED ORE IN TUNNEL ON THE GREAT OHIO

Six-inch Stringer Came In a Hundred Feet Before Owners Expected It--May Decide on New Work as Result--Look for Great Showings from Great Ohio Vein

Another piece of ore was added this week to the valuable collection of New Hazelton district ores in the Omineca Herald window. The last specimen was brought from the Great Ohio and was taken from a depth of three hundred feet. Geo. Jennings, who is running the long tunnel on the property, came in with the sample, and informed the Herald that a few days ago they ran across a stringer about six inches wide in the tunnel. The importance of this is that they were not looking for ore for another hundred feet, and with the stringer coming in at this time they are feeling very much encouraged.

As a matter of fact it is now a question whether they will continue the tunnel a hundred feet on No. 1 vein--the one they have been running on--to get under the big showing on the surface, or run a fifty-foot cross cut to tap the main--or Great Ohio--vein. The Great Ohio vein is where they are looking for the big ore body, and George says there is no doubt in the world but that they will get what they are looking for and that it will be just as big as they expect. Some time ago he did a little prospecting on the surface and uncovered another shoot of ore four

feet wide and several hundred feet away from the first showing of six feet which they have been driving for. He says that he can run the cross cut from the tunnel into the main vein at any point and pick up the ore.

Before deciding upon the work of the immediate future they will complete the survey which is now being made and see how the actual distances compare with their estimates. If the cross cut will be fifty feet or less they will run it; otherwise they will continue the main tunnel.

When the ore showing on the surface is cut by the tunnel, the Great Ohio will have the greatest depth on Rocher de Boule mountain; and if the ore at depth comes up to expectations a big development campaign will immediately be undertaken to open up the property at the thousand-foot level. In the meantime work will also be continued on the upper levels.

Ald. Geo. Kerr, Prince Rupert, arrived Saturday night and is now on his way to the Ground Hog country, where he has interests in coal lands. Mr. Kerr has been making annual trips to the coal fields for several years.

LOCAL MINES ARE BEING INSPECTED

Seattle Mining Capitalists Accompanied P. J. Jennings on Inspection Trip Over Rocher de Boule Mt.

P. J. Jennings spent the week end in town in company with A. J. Anderson, a timber man of Grace Harbor, Wash., and J. A. Soderberg, a Seattle mining man. They had all been on Rocher de Boule mountain last week looking over the various properties undergoing development, including Rocher de Boule, the Great Ohio, the Red Rose and the Highland Boy. The visitors were very much impressed with the showings and predicted that in the not distant future this would be a lively mining camp. Mr. Soderberg is a mining man of wide experience, having made considerable money out of his several enterprises. There is a possibility of both of them becoming interested in this camp.

AFTER ORE AT THOUSAND FEET

Great Ohio Group Promises to Be First to Prove Depth of Rocher de Boule Veins

While in town on Wednesday night, R. P. Trimble was very enthusiastic over the development of the Great Ohio group, the property of the Juniper Creek Mines Co., of which he is general manager. He stated that he had decided to go ahead with the cross cut tunnel from the No. 1 vein to the Great Ohio vein and get under the big ore shoot at a depth of over four hundred feet. Mr. Trimble has every confidence of getting the ore at that depth, and if he does he has proven the district to that level at least, which should be the cause for great activity in all mining on Rocher de Boule mountain.

Mr. Trimble informed the Herald that, as soon as they got the ore in the cross cut tunnel that they are going after it on the thousand foot level and expect to have it so far advanced that it will be shipping this winter.

W. F. Dowling, inspector of offices for the dominion telegraph service, went up the line on Monday night on business. He will stop here on his way back to the coast city.

ST. EUGENE AND THE SILVER CUP

Paddy Higgins Will Work His Babine Property This Year Has a Fine Showing of Ore

Paddy Higgins, of Rossland, returned to the district last Saturday night and in a few days will leave for his mineral claims on Babine lake. His property is located about a mile and a half south of Jas. Cronin's. This summer Paddy anticipates doing considerable work on the St. Eugene and the Silver Cup. He has big strong veins that are carrying better than hundred dollar ore, and one vein he has traced for three thousand feet on the surface.

The Babine can be operated this year and shipments can be made this winter, as the Cronin and Higgins properties are only thirty miles from the railway at Adernere and they have a perfectly level country to cross. There is no wagon road yet, but when the snow is on the ground they can make good time. Mr. Higgins stated to the Herald that he had interested a company in his property during the past winter and spring, but the Calgary oil boom hit the lower part of the province and carried his company away like a lot of the others, but he is going ahead with the work himself feeling confident that his friends will be glad to take an interest after the oil boom blows over.

STOLE HIS PACK HAD TO RETURN

Sam Allen Compelled to Cut His Prospecting Trip Short--Located High Grade Property

S. J. Allen arrived in town this week after an eight hundred mile trip through the interior. He would be on that trip yet had not someone stolen most of his outfit and left him with but very little food and no means of securing any. He had to beat it back to civilization.

Sam has been prospecting in this country for the past fourteen years, and he believes he has secured something good a few miles out from Deckar lake. His ore carries big silver values and he has a strong vein which he has traced several thousand feet on the surface. He is awaiting instructions from his partner in Vancouver.

PRINCE RUPERT WANTED GAMES

Notice Was Too Short for New Hazelton to Play There Today and Tomorrow, But Later

Prince Rupert wants to hook up with New Hazelton. They recently lost a twelve-innings ball game to Kitchikan, but in spite of that they feel confident of their ability to tie a can to our team. On Wednesday night the management of the local nine received a wire asking the boys to go down to the coast for games today and tomorrow. The offer had to be turned down as the boys have league obligation to fulfill with Smithers. However the New Hazelton club is endeavoring to complete arrangements whereby the teams may clash in Prince Rupert next week.

A meeting between these two teams should provide some interesting ball, as it is well known that the terminus city has imported a few players since the old town went down a few weeks ago, and--well, you know what's happened in the line of improvement here!

Dr. Carl J. Cook, of the King Optical Co., Vancouver, spent several days in New Hazelton last week. He will return in the fall to look after business in the northern interior. It is expected that in the near future an office will be opened in Prince Rupert.

PICKED UP LEAD ON THE BIG SIX

Roy McDonald Found the Vein in Rock Slide After a Two-Year Hunt--Is 18 Inches Wide

After a whole lot of hard work extending over two or three years, the lead has been picked up on the Big Six group on the south side of Nine Mile mountain. The group is owned by Roy McDonald, Fred Brewer, D. McGibbon, John Johnston and Bill Sweeney. For two or three years they have been looking for the lead, but were unable to find it, although a large quantity of float has been picked up from time to time. Last Sunday morning Roy McDonald went up to the property to see how the assessment work was progressing under the superintendency of Johnston, and they looked around again for the lead but found nothing. While sitting around the camp fire at noon, Roy suddenly got an inspiration. He was going to fool the boys with a piece of float, and while looking for the float he came upon some quartz. Into this he picked and immediately found the lead. It was covered up by a slide and it was only by accident that he encountered it. From now on the boys will direct their attention to a drift until they get the ore opened up. The property is so situated that it can be easily worked, and it is closer to the railway than those mines on the north side of the hill.

FRIDAY, JULY 10, 1914

A copy of the summary report of the Geological Survey by the Dominion Department of Mines for the Calendar year 1912 has just come to hand. It contains the reports of R. G. McConnell on the geological section along the G. T. P. from Prince Rupert to Aldermere; Metalliferous deposits in this vicinity and the Groundhog Coal Field by G. S. Malloch. As these reports are of much value and interest to all interested in this district, the Herald will, during the next few weeks publish a portion of them until the reports have all been published. This week the first instalment of Mr. McConnell's report is given.

General Physical Features

The region traversed by the Grand Trunk Pacific railway from Prince Rupert to Telkwa, was practically unknown, until recent years, except to the fur trader, prospector, and an occasional explorer, and even at present surveys are practically limited to main waterways, and only the general geological features have been ascertained. The district includes the Coast range and a portion of the mountainous interior region bordering it on the east, and bold relief is the dominant feature everywhere.

The Coast range, where crossed, has a width of about 60 miles and, with the exception of some included schists, is everywhere carved out of coarse granitoid rocks. The mountains in the immediate vicinity of the Skeena valley are not high, seldom exceeding 5,000 feet. They are as a rule densely forested at the bottom, and steep and craggy above, but have been toned down by the movement of ice of the Glacial period and rendered somewhat monotonous. Higher, partially snow covered, are occasionally seen more impressive peaks up tributary valleys. Small glaciers of the Alpine type occur at a few points, but do not descend to low levels.

The eastern boundry of the Coast range is not always easy to define, as it often merges insensibly into the high plateaus and mountains of the interior. On the Skeena, the main range is bordered on the east by a wide depression occupied north of the Skeena by the Kitsumgallum river. This great trench, 4 to 5 miles in places, extends northward to the Nass and southward across the Coast range, reaching the sea at the head of the Kitimat arm. It evidently represents an old, partially abandoned, valley of erosion possibly robbed by the Skeena.

East of the Kitsumgallum valley, a second wide range of nameless mountains, mostly built of schist and granite, is crossed. These connect to the south with the coast range, and may be considered a spur from it. After passing them the dry interior is reached, and a change in the topography is immediately noted. The valleys of the Skeena and its tributaries become much wider and frequently terraced, and the relief is expressed in long even ridges, or in isolated groups of high peaks, mostly built of upturned Jurassic and Cretaceous strata surrounding granite cores. Among the prominent groups are the Rocher De-boule at the confluence of the Skeena and Bulkley rivers, some peaks of which reach elevations of over 8,000 feet, and judging from their rugged, angular character evidently exceeded the limits of glaciation, and the lofty Hudson Bay mountain bordering the Bulkley to the southwest.

The Skeena river, heads in some of its branches with the Fraser, and, like it, drains a large portion of the rough elevated country lying between the Coast range and the Rocky mountains. It is a wide, swift-flowing stream, repeatedly dividing around low alluvial islands in its passage through the Coast range. In its upper reaches it becomes more confined and its course is interrupted by numerous short boulder-strewn rapids and by occasional canyons. It is ascended by river steamers to Hazelton at the mouth of the Bulkley, a distance of 154 miles, but its navigation, except near the mouth, is difficult and dangerous.

This geological report will be continued next week.

WONDERFUL RESULTS ATTEND HOSPITAL FARM EXPERIMENTS

Alfalfa, Oats, Peas and Wheat Disprove Claims of the Unsuitability of Agricultural Land in this Vicinity--Wheat Growing Six Feet High and Heavily Headed--Vegetables Doing Well

Anyone who ever had any doubts as to the New Hazelton district being an agricultural district, as well as a mineral district, needs only to pay a visit to the hospital farm, where Dr. Wrinch has, with the aid of the department of agriculture, through its agent, Mr. Walker, been carrying on some experimental work.

It has often been remarked, especially by old timers who had not seen a farm for many years, that the land in the district was not suitable for agricultural purposes; that it would not grow anything until water was brought onto it, and for the greater part of the country water was not available for irrigation purposes.

This spring Mr. Walker secured from Dr. Wrinch permission to use a couple of acres of the hospital farm. A dry, high piece of ground was selected—one that was considered too dry and sandy to be successfully cultivated. This was ploughed and treated, and about the 27th May part of the area was sown with Alfalfa which on the 5th of July was fourteen inches high, a growth not only satisfactory, but quite out of the ordinary. Dr. Wrinch is satisfied that alfalfa can be successfully and profitably grown.

Another patch was sown with oats of three varieties, and these are now all well headed and have grown a good strong straw. Most of it will be cut green for feed, although one or two of the varieties could be ripened and then threshed. Another patch is devoted to field peas, and better field peas could not be grown anywhere. Most of the vines have finished blooming and the pods are well formed and beginning to fill. There will be an excellent crop.

Another patch was sown to millet on the same day as the alfalfa and it has reached a height of thirteen to fourteen inches and is growing splendidly.

As a result of the experiments, Dr. Wrinch has become quite an enthusiastic advocate of farming in this vicinity. The land around the hospital is not what would be called first-class land in some parts of the valley, because many patches can be found that lie low, are well watered, and the soil is a rich looking black loam. But the greater portion of the land in the New Hazelton district is the lighter sandy loam, and this is what has been so successfully brought under cultivation at the hospital farm.

Besides what the department of agriculture has been doing, Dr. Wrinch has carried on a little experiment with wheat on his own account for the last three years. In his chicken yard he first noticed some wheat had started to grow and he decided to allow it to remain to see what it would do. The growth was a surprise to him, and he took courage, and for the last two years he has been sowing a small patch of wheat with increased success. This year he has two small patches of wheat in his garden which surpasses anything the writer has ever seen in either Ontario or on the prairies. The straw stands six feet high and every head is

full and well matured at this date. The doctor stated that it will ripen in good shape, as it did last year and the year before. This spring he sent a sample to the Guelph agricultural college and he has since received word that they are experimenting with it there this year. The result will be of interest to everyone in this district.

On the hospital farm are also many acres in timothy, feed oats, potatoes, etc., but the garden is the chief pleasure to the average person. Here are found all the small fruits, such as currants—the finest that can be found in any country, strawberries, etc., and the last year or two apple trees have been planted and are doing very well. Vegetables of all kinds grow to perfection, as also do flowers.

A trip to the hospital farm is a treat and an education, and both Dr. Wrinch and Mrs. Wrinch are very kind in allowing people to inspect the place. Mrs. Wrinch is just as enthusiastic over the farming as is the doctor and personally superintends many departments of the work.

FINEST IN ANY CAMP

So Says an Old Mining Man of New Hazelton's Climate

One of the leading mining men here who has travelled through or worked in nearly every camp in western America, both sides of the line, stated to the Herald that for climate there was not a camp in the west that could compare with the New Hazelton district. Most every other camp has its drawbacks from a weather standpoint, but so far as he had experienced in his several years' sojourn here the climate of New Hazelton was as near perfection the year round as one could find.

J. E. Oppenheimer left last Sunday morning for the south, where he will spend a month. He will then return to the Rocher de Boule property and remain until shipping starts.

OVERHEARD AROUND NEW HAZELTON

Mrs. Tobey, of Prince Rupert, is visiting with Mrs. Brown.

F. C. McKinnon was a visitor at the Rocher de Boule mountain this week.

Mr. and Mrs. W. S. Haskins and daughter spent last Sunday in New Hazelton with friends.

Miss DeLorme left Sunday morning for Prince Rupert, after spending a couple of weeks in town with friends.

Chief of Police Minty went up to Smithers Monday night to superintend the installation of the steel cells for the lock-up there. He took Geo. Walker and Constable Lavery with him from here to do the work.

D. McLeod inspected mining properties on Hudson Bay mountain this week.

Neil McIver spent the early part of the week in Prince Rupert on business.

Wm. Manson, M. P. P., was a guest on Supt. Mehan's car Saturday night. He and Mr. Mehan and Mr. McNicholl went up to meet Hon. Mr. Bowser and Hon. Mr. Ross and take them through to Prince Rupert.

SUSPECT IS ARRESTED

Man Taken in Charge at Rupe in Connection With Register Theft

Word was received Wednesday night that one of the men connected with the robbery at the Northern hotel had been captured in Prince Rupert. The party was around the hotel Monday and had been noticed by several connected with the hotel. He had very small feet and wore a high-heeled shoe, almost like a

woman's, and it was this same shoe mark found near the garage where the cash register was found. It was also known that he had gone to Rupert on the Tuesday morning train.

Lost

A brown pocketbook, with contents, lost Saturday evening. Finder please apply at Lynch Bros. for reward. 21

Lost

A baby's locket and chain. Finder please leave with Mrs. Warner.

COAL NOTICES

Hazelton Land District—District of Coast, Range V.

Take notice that I, Leslie George Skinner, of Copper City, B. C., storekeeper, intend to apply for a license to prospect for coal and petroleum over the following 640 acres of land described as follows: Commencing at a post planted 2 1-2 miles east of the mouth of the Kitnayakwa river thence south 80 chains, west 80 chains, north 80 chains, east 80 chains. Leslie George Skinner. Dated April 18, 1914 jun12 J. Gabriel, agent

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Public Building, New Hazelton, B. C.," will be received at this office until 4.00 P.M., on Wednesday, July 15, 1914, for the construction of a Public Building at New Hazelton, B. C.

Plans, specifications and form of contract can be seen and forms of tender obtained at the offices of Mr. Wm. Henderson, Resident Architect, Victoria, B.C.; at the Post Office, New Hazelton, B.C.; at the office of the District Engineer, Department of Public Works, Canada, Prince Rupert, B.C.; and at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS, Secretary.

Department of Public Works, Ottawa, June 16, 1914.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—53124 52-2

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

Ninth Avenue New Hazelton

Why New Hazelton?

The answer is: Because it has Made Good

NEW HAZELTON has lead and silver deposits that are larger and cover a greater territory than those that have made the Cobalt district famous. New Hazelton is the distributing point for supplies for a country larger and richer than all the New England states combined. New Hazelton has agricultural lands that surpass those of almost any other section in richness. New Hazelton is at the junction of two fertile valleys that contain more than a million acres of productive lands. New Hazelton has all that has made other great cities in Canada, and more.

We will be glad to give you more particulars on New Hazelton and the New Hazelton District
