

Minister of Mines Will Investigate Non-metallic Mineral in the Province

What are the resources of British Columbia in non-metallic minerals? What are the possibilities for their economic development in greater degree than at present? These and other questions relating to non-metallics, are to be investigated by the Department of Mines, according to a statement made yesterday by Hon. W. A. McKenzie, minister of mines.

It was announced by Mr. McKenzie that A. M. Richmond, assistant resident engineer at Nelson, had been released temporarily from his regular duties under the "Mineral Survey and Development Act" and instructed to undertake a study of these questions. He is to assemble all information available, look into the problems having to do with the treatment of various materials in their preparation of the market, and compile a report for general distribution, under the supervision of J. D. Galloway, provincial mineralogist.

In explaining his objective Mr. McKenzie said that, while there was considerable production of non-metallic minerals as structural materials, it was believed that an intensive study would reveal possibilities for the future utilization of non-metallic mineral deposits of the province. The present extent of the industry is shown by the fact that structural materials output in 1930 amounted to \$4,092,568 and in addition other non-metallic minerals produced were valued at \$436,234, making a total of \$4,528,802, or 8.2 per cent of the gross value of the mineral out put for the year. Of course coal is not considered in these figures, pointed out Mr. McKenzie, as although it is strictly speaking a non-metallic mineral, it is considered as a separate class of mining by itself.

In the literature available there is much information about the known non-metallic mineral deposits of the province. Investigations have been carried out by Dominion Mine Branch on abrasives, clays, diatomite, building stone, etc., and further information is contained in the geological survey reports and the Department annual reports.

The present investigation will complete the available information and supplement it with further field work and testing of samples of the various deposits. In addition it is planned to make a survey of markets to ascertain if British Columbia minerals are available to replace those imported either in raw or manufactured form. The production of ordinary structural materials is well taken care of in the province but Mr. McKenzie considers that there are certain activities that may be stimulated by the present investigation. There is also a market outside British Columbia for certain high grade non-metallic minerals and attention will be directed to determine if any of the British Columbia deposits are of the requisite purity. The relationship between the extent of the use of the non-metallics and the growth of general industry was closer, perhaps, than it was in respect of the production of the precious and the base metals.

Asked to state what non-metallics would be included in the investigation ordered, Mr. McKenzie said that no limit had been set to Mr. Richmond's activities. His studies, however, are to include broadly the field of non-metallic minerals, but with investigation of special features rather than a general survey.

To accomplish this a first essential was the obtaining of authentic information regarding these materials, the probable tonnages possessed by deposits their location and character, their suitability for different forms of industry, and the markets available under present conditions. So much scientific headway had been made in recent years in the application of non-metallic, as well as metallic, resources to the common use of mankind that it was difficult to over-estimate the possible value of the work on which Mr. Richmond was engaged to the industrial welfare of British Columbia.

Mr. McKenzie appreciates that it is a large undertaking. In all probability it would not be completed inside of a year. His hope, however, was that it would be possible for Mr. Richmond to submit progress reports from time to time. If so, these would be issued as such and given general distribution among all those who may be interested. Mr. McKenzie concluded by explaining that Mr. Richmond's work might be facilitated, and generally made much more valuable, if he were accorded the co-operation of those at present identified with industry based on the use of non-metallic substances. He trusted that all in this position, realizing that the investigation has been set on foot in the public interest, will accord all the assistance in their power. Prospectors and owners of non-metallic deposits, which they think may be of value are requested to forward samples and descriptive information on the same to the Bureau of mines at Victoria.

HIGH WATER IN THE SKEENA

Highest in Forty Years, Says Old Timer—Bulkeley Also High

Following several days of very hot weather and then some very heavy rains the Skeena and Bulkeley rivers rose to unusual heights the middle of last week, with Thursday seeing the high water mark, which is reported to be the highest in the memory of the oldest white residents. It had several of the riverside dwellers nervous for a while, but on Friday the Skeena had dropped a foot and a half and before night it had dropped another foot or so and all danger was past. The ferry across the Skeena at Hazelton was carried away on Friday while a number of men with Commodore Hawks looking on and apparently unable to do anything. The ferry sailed merrily down stream as far as Ritchie, and then rested for a couple of days and then proceeded on down to Pacific and hung up. If it is not damaged too much it will be brought back and put into commission, otherwise a new boat will be required.

The Government Yukon Telegraph line suffered some damage from wash outs along the river, but nothing serious resulted. A couple of small bridges were washed out. Fortunately no drift wood was running in the rivers where much damage could be done.

All interested in tennis and who would like to play on the court in New Hazelton are requested to meet in the New Hazelton hall at eight o'clock on Friday evening for a short meeting before the dance or to give their names in to Wm. Sheriff. The court requires very little work on it and arrangements are under way to get it into shape.

Gov. Agent at Smithers Sent To Anyox Office

H. B. Campbell of Kelowna has arrived in Smithers to take over the office of government agent for Skeena succeeding S. H. Hoskins, who has been appointed to the office at Anyox. Mr. Hoskins should be ready to move next week to his new home. Mr. Campbell comes to his new duties well recommended and it is believed he is quite capable of fulfilling the position with credit to the community and with good results to the government, also with credit to himself.

Mr. Hoskins has been agent at Smithers since the offices were moved to that point from Hazelton, a dozen or more years ago. He was agent at Hazelton for a time before moving to Smithers. He has been in the government employ for thirty years, having started as a policeman and has filled numerous positions along the road to the government agents job. He has a goodly number of friends who regret his removal.

The government decided that for the good of the service and for the good of the community a change in agents was desirable, and the new post to which Mr. Hoskins goes is less strenuous and will be much easier on the man who has spent thirty years in the employ of the government. His salary remains the same and it looks like an easier job for Mr. Hoskins. He is to be congratulated upon his receiving such consideration from the government. It also speaks well for the government in thus looking after the older men in its employ.

FAREWELLS TO THE PASTOR

People of the District Express Regret in Losing Association With Rev. and Mrs. Wright

Rev. and Mrs. Wright will leave on the morning train for the coast enroute to Vancouver where Mrs. Wright expects to remain. Mr. Wright has a plan to make a trip across the pond to be away several months. Rev. and Mrs. Wright have spent three years in this district and during that time accomplished much good work, and they made many good friends. The esteem in which they were held by the people was evidenced by the farewell gatherings held during the past week. The first was at the home of Mrs. H. C. Wrinch when the members of the Woman's Auxiliary to the Hazelton Hospital gathered to say farewell to their secretary-treasurer, and presented Mrs. Wright with a framed picture of Hazelton. On Monday night the members of the Hazelton United church met at the home of Mrs. John Newick for a social evening and to bid good-bye to the pastor and his wife. During the evening they were presented with a bread plate and a purse. On Tuesday night in New Hazelton there was a social gathering at the church, during the evening "Chuck" Smith on behalf of the Sunday School read an address to Mr. Wright and presented him with a fountain pen, and the congregation presented him with an address and a cheque. All in the district wish Mr. and Mrs. T. H. Wright many more years of happiness together and trust that their holiday may be a very pleasant one.

The Hazelton Golf Club met on the evening of Tuesday and it was reported that the first three holes on the green area ready for use and that the other six will be got ready immediately. Playing can start at any time and the public is invited to join up now and get into the game.

Columaria Gold Mines Ready To Erect Mill

Columaria Gold Mines Ltd., head office in Toronto, but whose mines are at Usk, B. C., about half way between New Hazelton and Prince Rupert, has recently issued a booklet for the benefit of its stock holders and others who might be interested. The booklet contains reports from mining engineers of standing, which outlines the amount of work already done on the property and the value of the ore at various places in the tunnels. The gold values predominate and run from a little over \$7 per ton to over \$40 per ton with a general average of over \$20. Many hundreds of feet of tunnels have been driven into the mountain on the different veins and a very faithful report of those tunnels is given. Since the engineers reports were prepared some 440 feet of additional tunnels have been driven with most satisfactory results.

The property is now ready for a mill and it is expected that the company will proceed with the erection of same at an early date. The mill will be situated under the hill, will be connected with the workings by an aerial tram. Then the mill will be connected with the railway at Usk by another short aerial tram. The property is situated that in its development every economy can be adopted. Veins are true fissure and all tunnels are drift tunnels, except of course the short connecting tunnels. When the work starts on the mill and the mine is producing it will be an important asset to Usk and an important factor in the mining life of the interior. Capt. John Willman has been in charge of development from the beginning and he has given every satisfaction to the company.

TWENTY EXTRA MEN AT WORK

Paul McMaster Arrived Sunday and is Hustling Work on the new Bridge

Paul McMaster is again in charge of the work at the new bridge. He arrived last Sunday by car, accompanied by his clerk, Kilpatrick. They report the roads fine and a most enjoyable trip, except for some miles east of Topley, and even from Topley to Telkwa. On Monday McMaster got busy on the bridge job and put a flock of men to work in addition to those on the job previously. The painting of the lower part of the bridge is being hurried as fast as weather will permit. Concrete pouring was started on Tuesday. There is considerable of that to do too. At an early date the old high level bridge will be taken down and piled up until a place can be found for it. It would make two good short bridges and the government will make use of it. Some twenty extra men were added to the pay roll during the week.

SHOULD GET BUSY NOW

Dugald Campbell, representing the Canadian Linotype Co., made a call on all the newspapers in the interior of B. C. the past week. He got to New Hazelton on Sunday and on Monday proceeded to Prince Rupert. He says he found all the paper boys still alive and while suffering from the same lack of business that most concerns have been enduring, he found them a little more optimistic than men in the other lines of business. The depression is more imaginary than real and it could be overcome to an extent by the people in the country getting busy and doing something rather than waiting for the government to hand them out a dollop of work, grub or money.

Work to Start on Pacific Road In Short Time

Premier Tolmie has announced his plans for coping with the unemployed situation in B. C., so far as he can go until a final report is received from the Dominion government following the report from Senator Gideon Robertson who has been on a tour of the Dominion investigating the whole situation.

Premier Tolmie proposes that the Dominion pay half of the floaters in B. C. who must have work and that the Dominion and Province go fifty-fifty on B. C. unemployed. Municipalities will look after their own.

The premier proposes to establish camps with good housing and good board. There will be different wages one for single men and a higher one for married men with an additional allowance for dependants who have to stay at home. To cope with the large number of young boys out of work it is proposed to establish a separate properly supervised so that the boys of teen age will not be associated with old men.

The work proposed in northern B. C. is the extension of the Pacific highway to Terrace with further work on the Prince Rupert end; also a road to the Alberta boundary from Prince George. The biggest undertaking is probably the completion of the P. G. E. to Prince George on which the provincial government will place 2,000 men providing the Dominion government undertakes to build a Peace River outlet to the coast.

These undertakings will provide a great deal of work during the summer fall and winter and will put B. C. away ahead with its construction program. That the Dominion government will come through with its full share of assistance is practically assured and the road building program will get underway at an early date. What will be done in regard to the railway building program is not so sure as the auto road building program. In any case the coming winter is not going to be so hard as last winter, all thanks to Premiers Bennett and Tolmie who realize the seriousness of the situation.

MEMORIAL SERVICE SUNDAY

On Sunday next the Elks Lodge of Smithers will hold a memorial service in St. Peter's church, Hazelton to be conducted by Rev. Mr. Isannister and officers of the lodge. Following the church service the members of the order will form in procession and proceed to the cemetery where a tablet is to be placed on the grave of the late Brother Lorne Baine. The service is to start at three o'clock. A large number will be down from Smithers and will be joined in Hazelton by members from New Hazelton and Hazelton.

NEW HAZELTON WON AGAIN

The boys working on the Sealy Gulch bridge sent a challenge to the New Hazelton ball team for a game to be played last Sunday afternoon. The challenge was accepted and the game played. Owing to the threatening weather the attendance was not as large as usual, but New Hazelton run up the usual large score and kept the challengers down to the usual small score. The boys had a good work out and provided some fun.

Dr. R. Agnew, Dentist, will be in Hazelton from June 25 to 27, both days included. Make your appointments early.

Golf! Golf! Golf!

Consult us in regard to golfing requirements. We will stock balls, tees, captive balls for practice Clubs, bags, etc., ordered as desired. Clubs and dag as low at \$7.50.

IT PAYS to specify the name Kellogg's when purchasing corn flakes.

Here is the world's most popular ready-to-eat cereal. Costing only a few cents a package. Always ready to serve. No trouble or work. Delicious!

Indeed, what other foods offer you so much value? Kellogg's Corn Flakes are delightful for breakfast, for lunch, for children's suppers — and to enjoy as a bedtime snack.

Serve with milk or cream. Add fresh or canned fruits or honey. Extra easy to digest. Crisp and flavorful.

Wise buyers know that there is no substitute for genuine Kellogg's, the original Corn Flakes. Imitations never equal that Kellogg "wonder" flavor!

Look for the red-and-green package at your grocer's. Oven-fresh in the patented wax-tite wrapper. Made by Kellogg in London, Ontario.

You'll enjoy Kellogg's Slumber Music, broadcast over WJZ and associated stations of the N. B. C. every Sunday evening at 10.30 E.D.S.T. Also KFI Los Angeles, KOMO Seattle at 10.00, and KOA Denver at 10.30.

SHOULD USE DAIRY BUTTER

While the farmers are having quite a hard time at present to dispose of their butter at a profitable price, and while there seems to be quite a drive on by the whole salers to shut out the dairy butter, it would be a great help to the farmers in the northern interior and to the country as a whole if the local citizens would buy and use only dairy butter. There are lots of farmers who make excellent butter, superior to creamery butter and they ought to be encouraged. With prices what they are the farmer in the interior is unable to ship cream to the creamery and get his money out of it. The railway company takes a big slice out of the revenue and if taken to the creamery by car the oil companies take a huge slice out of the revenue. The only help for the farmer is for local people to call for dairy butter only until the wholesaler or the creamery people cut out their price war. Butter from the farmer is 25c per pound for the highest grade, and there is a lot of it, both now and for the next couple of months.

AWFUL GASOLINE PRICES

Keeping up prices is all very well and most commendable when there is no general cut in most lines. But a big reduction in prices has been made in a great many lines and especially in food products. Yet there has not been a reduction on the part of great corporations, such as the railway freight rates and the gas companies products. Gasoline is still 40 cents a gallon in the northern interior. Five cents a gallon is for road tax leaving 35 cents net for the oil companies and the railway company to split between them. According to prices in other countries gasoline should be sold in this part of the country for at most 30 cents a gallon at the filling stations. It is alright for wealthy men like Flavelle, and great corporations to talk about reduction of wages, reduction of farm produce and a reduction of raw material prices. But they say nothing about reduction in price of gasoline, or freight rates, or ham

GOVERNMENT LIQUOR ACT

Notice of Application for Consent to Transfer Beer Licence.

Notice is hereby given that on the 10th day of July next the undersigned intend to apply to the Liquor Control Board for consent to transfer of Beer License Number 1852; and issued in respect of premises being part of a building known as the Terrace Hotel situate at Terrace, Kallum Avenue, upon the lands described as Lots Nos. 12, 13 and 14, in Block No. 12, Map 972, land registration district in the Province of British Columbia, from J. K. Gordon to Emil Wille of Terrace, British Columbia, the transferee. Dated at Terrace this 8th day of June, 1931.

Applicant and Transferee
Emil Wille

and bacon or cold storage beef and pork. That is another matter.

There would be no kick made in a reduction of wages, farm products, etc if the products put on the market by the big corporations were reduced in proportion. Gasoline especially needs a heavy reduction in price.

EXTEND SKEENA RIDING

Considerable work has been done on the road east of Telkwa, in fact on the Omineca western end. There is a stretch of many miles between Telkwa and points east that badly needs improvement. The road is both narrow, high crowned, ungravelled and in no way can it be called a road, except for live stock in dry weather. The settlers in the western end of Omineca district have suffered so much from a lack of road that there is a strong desire expressed that they be put back into Skeena riding where they will be closer to the road department. There is not half a dozen farmers a year go from the west end of Omineca to the Prince George district, and it is in the Prince George District where the engineer and road superintendent have their headquarters. Those farmers referred to all do business in Smithers and Telkwa, and that is where they should be able to transact all their business.

The hotel keepers assoc. of the continent in convention in Vancouver last week placed themselves on record as being thoroughly favorable to the Yukon-Alaska highway, and expressed the hope that the countries involved would solve any difficulties in a very short time.

Terrace Notes

Bertha McCubbin and Theo Hogan of Pacific are here writing their grade 10 examinations.

The farmers of the district are looking forward to a bumper crop of hay this year. The early frost caught a few of the berry patches and fruit trees, otherwise conditions are very favorable.

Mrs. Chas. Carruthers is on the sick

list this week.

Terrace ball team again defeated a Vanarsdol team on Sunday afternoon by a score of 17 to 7. The club secretary is trying to get a Prince Rupert team up for the 1st of July.

H. C. Fraser called at the schools here on Monday to see that all was in readiness for the holidays.

Grades 9 and 10 of the local high school wrote exams the first three days this week. Grade 11 started on Tuesday. Nine local students will be writing.

Mr. and Mrs. Unger have returned from a trip to Vancouver.

Mrs. D. A. McKinnin returned last week from Vancouver where she was a delegate to the convention of Rebekah lodge.

Mrs. E. J. Moore returned last week after a visit with her daughters, Misses Egater and Bessie.

Miss Parker was a guest of Miss K. Burnett at their summer home at the

Lakelse Lake.

Mrs. Richmond and Mrs. McLeod were guests of Mrs. Wilson at Remo.

Roy Thomas, Ab. Moore and Frank Gavin were looking for bear in the Shames district over the week end.

R. W. Riley spent last week end in Prince Rupert.

Miss Fanny McLaren, a recent graduate of the nurses training school at Prince Rupert, spent the week end at her home here.

Mrs. Kirkaldy, sr., is on the sick list. She is being cared for at the home of her son.

There will be no more evening services in St. Matthews church until the beginning of September. The morning services will be at 10.30 instead of 11 o'clock.

Mr. and Mrs. Beveridge and family were guests of Mr. and Mrs. McKenney at Lakelse Lake Sunday.

A number of local people attended a dance at Kallum Lake on Saturday night and remained over the week end. The roads were in good shape and the outing was most enjoyable.

Miss Swaya A. Sulmbold of Bulkley Valley is a guest of her sister, Mrs. Wallace. Mrs. Wallace has been on the sick list but is now on the mend.

W. McLean, A. Rust, D. Elliott of Vancouver, L. Vilroka of Buchen, Belgium, were among those registered at the Philbert hotel.

H. E. Alton and Leslie Huson of Prince Rupert were in Terrace during the past week.

Orval Kenney has joined the bridge crew on the C. N. R. Last week he got the boys roused up to base ball and on Sunday took a team to New Hazelton to show them how ball is played in the fruit belt. The New Hazelton boys trimmed them properly. This coming Sunday Orval is going to take his steel workers to Hazelton to try out the old town.

E. T. Kenney has received a new row boat for his summer home equipment.

Mrs. Dix of Kallum Lake is expected home from Rupert this week. She has recovered her health again.

Mrs. Ardagh and Mrs. Sherwood spent the week end at Lakelse.

Stanley Smith spent Sunday at the Lake.

Mrs. E. T. Kenney returned last week after attending the Rebekah convention in Vancouver.

Mr. and Mrs. E. Cole and family enjoyed Sunday at Lakelse Lake. The trip was made in a buggy drawn by a horse. They took their time and enjoyed the whole trip.

BESSIE MOORE FROM TERRACE

Miss Bessie Moore of Terrace, not Vancouver, as claimed by Vancouver papers, stood at the top of the class of 224 student teachers who passed examinations recently held. Not only was she first in the class but she also won the medal for physical education. Vancouver papers are getting very Americanized in claiming the production of every person or any article of outstanding merit. It is a very small and a very cheap claim to glory, and should be beneath the dignity of a self admitted self-respecting paper.

High Water at Terrace Cause Inconvenience

From Terrace by special correspondent—Thanks for all the water coming down the Skeena these days. But why not send it down in more moderation and spread it over a longer period?

On Monday men employed by J. B. Agar attempted to swim a team of horses from his Island ranch and had the misfortune to loose one. Thursday afternoon and R. Beecher drove out to pay a visit to the ranch. Going along the old plank road on the old Copper River road the planks separated and the car settled in about four feet of water. From there they went to get the boat that had been left tied to an old cottonwood snow plow. But plow and boat had both gone off down the river.

Braun's Island bridge went out on Friday morning when a hemlock tree drifted down the slough and tangled in the cables. Tom Marsh was visiting on the island and some of the island residents were in town. The various parties had to stay put until Mr. Floyd Frank got his boat into commission and improvised a ferry service temporarily.

The Danhauer bridge at Copper City was in grave danger on Friday. Men worked all day keeping the drift cleared away and the structure was saved.

The Hamer family at the old ferry landing spent the night with water all around their buildings. Saturday in the morning Constable McKenney and T. J. Kirkpatrick and Fred Nash waded through water to their knees and carried out the four younger children, the father and two older boys remaining to watch the property. Fred Nash stepped into a hole enroute and he had an idea that he was going all the way through, but he stopped when the

water reached his neck.

A big jam was forming on the upper side of the big bridge, but no fear is felt for this main channel of communication.

The Remo road on the south side of the river is flooded in places. An empty boat was seen going down the river at noon on Saturday. It made the trip alright until it reached Little Canyon and there took a nose dive and disappeared.

FEED MEAL FOR MILK

The final judge of the old familiar argument as to the amount of meal which can profitably be fed to the dairy cow must be the dairyman himself, and his decision must depend on the purpose for which he is using the dairy herd. If he wants volume of milk for direct sale, then the more meal he feeds the more milk he gets but if his revenue comes from butter-fat production then the feeding of increased quantities of meal over a certain minimum does not pay sufficient to cover the cost of feeding.

At one of the Dominion Experimental stations during the past five years a special study with respect to the relation of meal to milk and butter-fat production has been conducted. This shows conclusively but slight increase in the volume of butter-fat produced through the feeding of extra meal. They show with equal conclusiveness that where raw milk was the revenue producing product that the more meal fed the greater the volume of milk produced.

Bob Willan got a great response to the small notice he had in the paper last week about him sharpening lawn mowers. One day after the paper was published he had orders to sharpen every lawn mower in Hazelton. He thinks he might get some orders from Smithers where the poor people shove their heads off and get no grass cut.

BUY NOW!

Not in many years have prices been so low on a vast number of merchandise items as at present.

Not in many years has there been such an opportunity to get so much for so little money.

The thrifty are seeing the advantage of buying now while prices are low, knowing that these prices cannot remain at the present level very long.

Buyers are eager to buy when they find bargains or hear of them. The merchant who has bargains and advertises them well, gets the buyers.

Short Stories Close to Home

Dr. L. B. Wrinch and Miss Frances Johnston of Victoria will be married at the bride's home town tomorrow, June 25th. The groom, accompanied by his two younger brothers, Arthur and Harold, left on Thursday afternoon by car for Vancouver. The bride and groom are expected to arrive in Hazelton early in July.

Mr. and Mrs. Chas. Reid of Smithers who have recently returned from a holiday trip south, spent their last day of vacation at Sealy Lake fishing. In the evening they were guests of W. A. and Mrs. Gow.

A son was born in Smithers on the 17th of June to Mr. and Mrs. Norman Kilpatrick.

Chas. Wilson of Lake Kathryn made a business trip to Prince Rupert last week.

As a result of the rains and of the general warm weather the crops in the entire district never looked better than they do at present. The past two or three years have been exceptionally dry and last year was as near a crop failure as this country has ever known. But there is every indication that hay, grain and vegetables will this year be a full crop. The country throughout the Bulkley Valley is very beautiful just now.

H. C. Fraser, inspector of public schools paid a visit to New Hazelton and Hazelton on Saturday evening, his last call before the summer vacation.

During the past week some improvements were made to the road on the north side of the New Hazelton passing track. Now able to get a team to the "Y".

TALK ON MISSIONS IN CHINA

Miss Foster of Vancouver, formerly lady principal of Columbian College, New Westminster, made a trip in the northern interior of the province and on Monday and Tuesday was a guest of Mrs. H. C. Wrinch. On Tuesday afternoon Miss Foster gave a very interesting address in the United church on China and the work the church is doing there. Miss Foster was a former missionary in China and is going back there in a short time for another seven year period.

Arrangements are all made for the dance in the New Hazelton hall on Friday evening next. The admission will be only fifty cents, but the dance will be quite up to the high standard of New Hazelton dances. There will be a good time.

A lot of people change their minds over night, a privilege they have of course, but it often makes it hard for a paper to always have its reports of people going or coming quite correct. Last week this paper reported several people going a certain day and a certain way, and others coming at certain times. At the last minute none of these things happen as per schedule and the paper gets the blame.

The weather last Saturday night was not the best possible for a lawn social and the attendance at the Camp Fire Festival was not as well attended as anticipated. Much trouble had gone to by the people interested in St. Peter's church, Hazelton, and arrangements for a good evening were quite complete. The financial end of the affair, however, were quite satisfactory thanks to the ticket sellers who had been busy for a week or two previously.

Wm. Manson, formerly of Prince Rupert was recently elected head of the Elks Lodge in B. C.

H. E. Thornton, engineer with the C. N. R., who has been in the Hazelton hospital for some time, left Monday morning for the coast. He intended taking his two sons, who had been at Usk, with him and proceeding to Vancouver.

For every place there is for a man on the bridge job there have been half a dozen or more men looking for it, and the word had not got around that more men were being put to work. It is high time that some work was got under way in the district to use up the surplus labor. Everyone is looking forward to the resumption of work on the Pacific highway west of New Hazelton.

McEwen will in future be known as divisional freight and passenger agent for the C. N. R. with headquarters at Prince Rupert. He thus takes over the work formerly carried on by R. F. McNaughton, recently moved to San Francisco.

Ensign Parkinson will conduct services in Hazelton Sunday evening at 7.30. Robt. Tomlinson will conduct the services in New Hazelton in the morning at 11 o'clock.

The Omineca Herald is \$2.00 per year
