After holding the biennial European Conference of Fracture (ECF) for the first time in Italy back in 1990, twenty-six years later the 21st edition of this conference (ECF21 - www.ecf21.eu) came back to Italy being hosted by the sunny and welcoming Sicilian city of Catania.

The conference was organised by the Italian Group of Fracture (IGF, www.gruppofrattura.it) to have not only conventional sessions populated with oral and poster presentations, but also a large number themed mini-symposia that were led by invited chairpersons. This strategy resulted in a large number of talks being delivered by researchers, academics and industrialists coming from 47 different countries as well as in 471 technical articles that were all published, with the support of Elsevier, in Procedia Structural Engineering (www.journals.elsevier.com/procedia-structural-integrity). In order to maximise the dissemination of the large body of research work that was presented in Catania, the IGF has also made available the majority of the presentations being given via the ESIS You Tube channel (www.youtube.com/c/EuropeanStructuralIntegritySociety).

The present special issue collects the extended versions of 16 technical articles that were presented in Catania, with these articles being selected for their particular scientific achievements in the field of Engineering Failure Analysis.

The guest editors of this special issue of Engineering Failure Analysis would like to express their sincere gratitude to the authors for submitting their valuable contributions as well as to the referees for reviewing all the manuscripts very competently.

Guest Editors for Engineering Failure Analysis

Prof. Luca Susmel

Department of Civil and Structural Engineering

The University of Sheffield, Mappin Street, Sheffield, S1 3JD, UK

e-mail address: l.susmel@sheffield.ac.uk

Prof. Andrea Carpinteri

Department of Engineering and Architecture

University of Parma, Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Prof. Danie G. Hattingh

Nelson Mandela Metropolitan University, North Campus

Gardham Avenue, M-Block, M038, Port Elizabeth, South Africa

Prof. Zeljko Bozic

Department of Aeronautical Engineering

University of Zagreb, Ivana Lucica 5, 10000 Zagreb, Croatia

Prof. Donka Angelova

University of Chemical Technology and Metallurgy

St. Kliment Ohridski 8, Sofia 1756, Bulgaria
