Gifford-Thorne's office is 653,000-acre wilderness area

Liz Gifford-Thorne '01

Forgive Liz Gifford-Thorne if she smiles at the thought of a nerve-grinding rush-hour commute. Her vehicle of choice? A sea kayak.

Gifford-Thorne '01 is a wilderness ranger for the U.S. Forest Service, based in Juneau, Alaska. Her territory is the 653,000-acre Tracy Arm-Fords Terror Wilderness Area.

The 27-year-old from Portland has lived in Alaska for three years. Prior to that, she was a field instructor, teaching environmental education to sixth-graders in the Multnomah Education

Service District Outdoor School.

"I came to Juneau because the University of Alaska Southeast has an outdoor leadership skills program, and I wanted to feel more comfortable leading students in the backcountry," said Gifford-Thorne, who majored in anthropology with an environmental studies minor at Linfield.

"I love being challenged physically," she said. "I want to help others discover that safely."

Among her backcountry adventures, she and two other rangers were bushwhacking on a steep slope when a black bear popped up from behind a stump. Because he was small, they feared he might be a cub with a defensive mother nearby. He turned out to be an adolescent eager to display his toughness. The rangers had to find stable ground, so they retreated downhill.

"He charged us," Gifford-Thorne said. Back on flat ground, the hikers grabbed sticks and yelled at the bear, which came within 50 feet of them before turning and running off. "It was a very intense experience in which I learned a lot about bear behavior," Gifford-Thorne said.

Every day is interesting in managing wilderness areas, she said. "I love my job. I work on a

variety of projects, such as monitoring the harbor seal population for its health and stability and collecting lichen samples for air-quality surveys."

She also searches for invasive plants in the wilderness and would like eventually to earn a master's degree in botany.

In Juneau, accessible only by water and air, she has found a tight-knit community. "It's a creative environment that is very supportive of new artists," said Gifford-Thorne, who has displayed and sold her photography in several gallery shows there.

Her mother, Janet Gifford '70, works at Linfield's Portland campus in the DCE/Adult Degree Program. When she visited Liz in Alaska, they flew with a bush pilot in a deHavilland Beaver float plane to Admiralty Island, where they watched brown bears fish and romp in a Forest Service sanctuary.

"I like to visit with Liz in her place," Janet said. "It gives me such happiness to see her in her element. I have great satisfaction knowing that she's doing something so important to her and, by extension, important to the rest of us."

Chaplain follows his calling in second career

John Hubbard '62

At age 53, as some of his peers were eyeing retirement, John Hubbard '62 was embarking on a new career.

Hubbard retired from Deere and Company in 1992 after a successful 30-year management career and, three months later, entered the seminary.

For most of his life, Hubbard has been active in Baptist and, later, Presbyterian churches. He considered the ministry at a younger age, but, "I just figured I wasn't good enough for that, so I didn't do it" at the time, he said.

Instead, he majored in business administration at Linfield, then embarked on a corporate career. After a series of promotions, he was in Deere's headquarters in Moline, Ill. "It was a disappointment in many ways because I found it wasn't very satisfying," he said. "I created many programs, but saw few of them put into action."

After returning to the West Coast, Hubbard earned a Master of Divinity degree in 1996 from San Francisco Theological Seminary in San Anselmo, Calif. He now lives in Vancouver, Wash., and has been a chaplain at Providence Portland

Medical Center for eight years.

Initially, hospital work did not appeal to Hubbard. In fact, he dreaded the required chaplain rotation. But he was good at it. "In time it came to be what I felt was my calling," he said. "Now I can't imagine doing anything else."

Father Bruce Cwiekowski, Providence's director of pastoral care, said Hubbard is well loved by patients and staff. "He has a great sense of humor, and he's down to earth," Cwiekowski said.

The job can require rapid emotional shifts: The chaplain may bless a newborn, then console a family whose loved one is dying. Hubbard's faith grounds him, Cwiekowski said, adding, "His spirituality enables him to meet people where they are."

Hubbard said he never could have made this dramatic career shift without his family's support. Wife Judy is a contract registered nurse for Multnomah County. They have two daughters, Julie Hubbard-McNall '90 of McMinnville, and Jennifer Geller of Eugene. Each has two children.

Hubbard recently completed his Doctor of Ministry degree from San Francisco Theological Seminary. "I feel better doing this job overall, mentally, physically and spiritually," he said. At the end of a work day, he knows he has made a difference.

Former ASLC president becomes 'Face of Sherwood'

Keith Mays '91

When Keith Mays '91 led the Linfield College student body as president in 1990, he never imagined a career in politics.

Yet today, Mays is putting his leadership skills to work as mayor of Sherwood. At 37, Mays is one of Oregon's youngest mayors, leading one of the state's fastest-growing cities. Sherwood has more than doubled in size to 16,000 residents since Mays moved there in 1996, and managing that growth has been his

number one priority, first as a member of the planning commission, then as city council president and now as mayor.

Along the way, Mays has helped revitalize the once stagnant community and mend long-standing conflicts between the city and school district. They formed a partnership to jointly manage and maintain school district ball fields and gyms. Last year, the city formed Sherwood Broadband, and Mays hopes to partner with the school district in this area, too.

Mays used the same innovative leadership at Linfield when he helped to create the Catalyst, Linfield's student-run deli that operated until 2004, according to Jeff Mackay, associate dean of students and director of residence life.

"As student body president, Keith was a hard worker who served the students well," Mackay said.

Although he was an applied physics major at Linfield, Mays didn't limit himself to the science lab.

"Linfield gave me the opportunity to try new things, to test my interests and abilities and learn from my professors, coaches and peers," he said. "Linfield taught me how to learn, communicate and listen – important skills for the rest of my life."

Mays works hard to balance his mayoral responsibilities with his personal life and career – he has worked in the commercial equipment finance industry for the past 12 years. Much of his time is spent listening.

"In a small community like Sherwood, it's about getting out, listening to your neighbors and finding out what's important to them," he said. "And then trying to deliver."
