Engaging elementary English learner students' families and backgrounds within a standards-based curriculum

By:
Micaela Craig,
Alyssa Carano,
Criselda Lopez,
and Tanika Finch

"While one tenth of white students leave high school without a diploma, one fourth of african american , one third of latino, and two thirds of immigrant students drop out of school"

(Suarez-Orozco & Suarez-Orosco, 2001)

What information and experiences do student teachers need to know about English language learners, families, cultures, and communities to best meet their educational goals?

Surveys

Funds of Knowledge

**"Those historically
accumulated
and culturally developed
bodies of knowledge and
skills essential for
household or individual
functioning and well-being"
(Moll, 2011).**

**Funds
of Knowledge**

and what ends up
happening...

ENGLISH LANGUAGE LEARNERS

**Where do we draw the line
between negative funds of
knowledge and positive
funds of knowledge?**

**Dark funds of
knowledge**

**Light or
Positive
funds of
knowledge**

It becomes the duty of the teacher to bravely and creatively find the positives within the student's funds of knowledge.

**The
academic
success of
English
language
learners relies
on a
community as
a whole.**

Funds of Knowledge

**"Tell me and I forget,
teach me and I may
remember,**

involve me and I learn"

-Benjamin Franklin

Questions We Still Have

- How can we incorporate the ideas and thoughts of EI students and families into our research and how teachers implement these perspectives into the goals of ELL students and their families?
- Generalizing students culture and background can be hard to avoid. In what ways do teachers find out about students backgrounds?

The
Common Core
State Standards

COMMON CORE

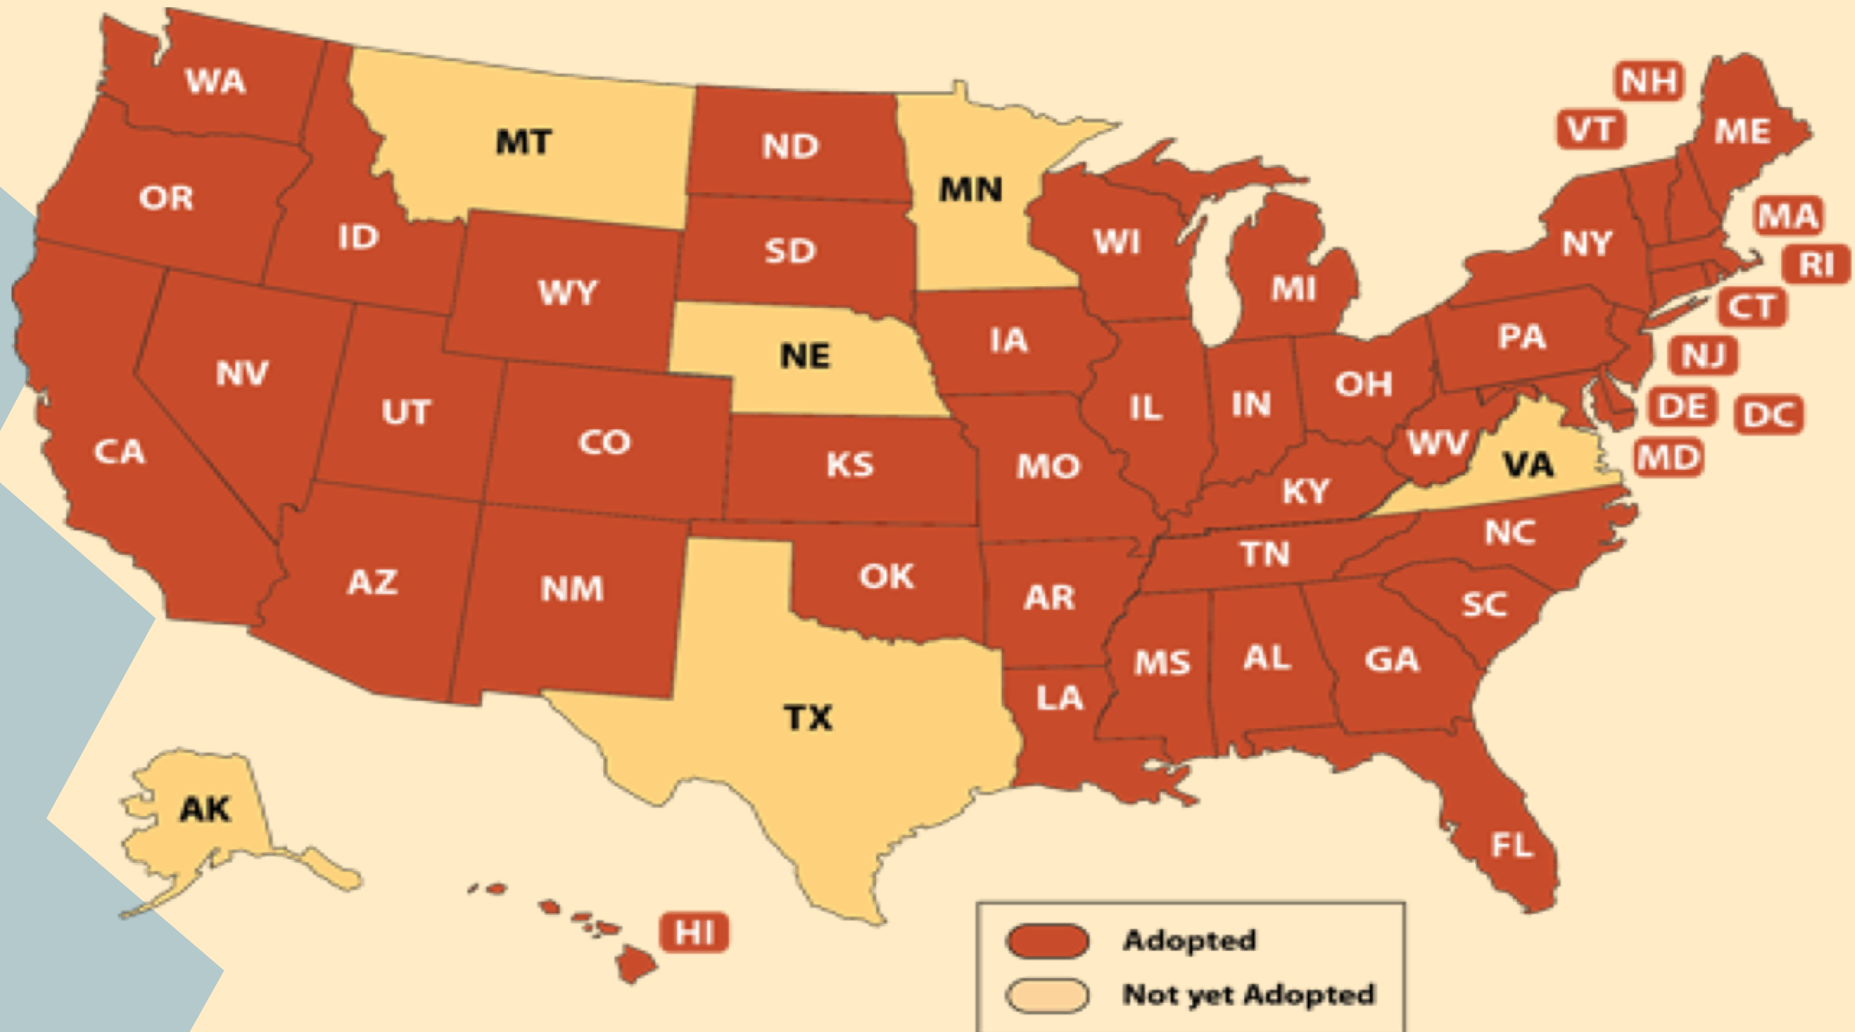

STATE STANDARDS INITIATIVE

PREPARING AMERICA'S STUDENTS FOR COLLEGE & CAREER

What are the Common Core State Standards?

- They define the define the knowledge and skills in **English, language arts**, and **mathematics** that students need for success in **college and career** upon high school education
- **2014- fully implemented**
- Before they were fully created, many states adopted them because of they didn't want to miss **needed funding**
- *Some states are **arguing** that the Common Core should be removed*

States that have Adopted the Common Core

What is wrong with them?

Nearly **one fourth** of *all schools* in the United States are **not** meeting the standards that are expected

How are students evaluated using the CCSS?

- **Smarter Balanced Assessment Consortium- SBACC**
- **Partnership for Assessment of Readiness for College and Career- PARCC**
- Modifications for all students?
- “Teaching to the test”
- ELL assessment stresses and misclassifications caused by inaccurate testing

Incorporating Backgrounds

- Sociocultural backgrounds + Cognitive learning

- *Teacher training*

- $L_1 + L_2 =$ Bilingualism; bilingualism = more proficiency in English in the long run

- *Pre-Kindergarten for all students*

What do you think?

On a scale of 1-5,

if you were currently an elementary, middle, or high school student who spoke English as a second language, **how comfortable** would you feel about the *Common Core State Standards*?

Please show your number with your fingers when you are ready :)

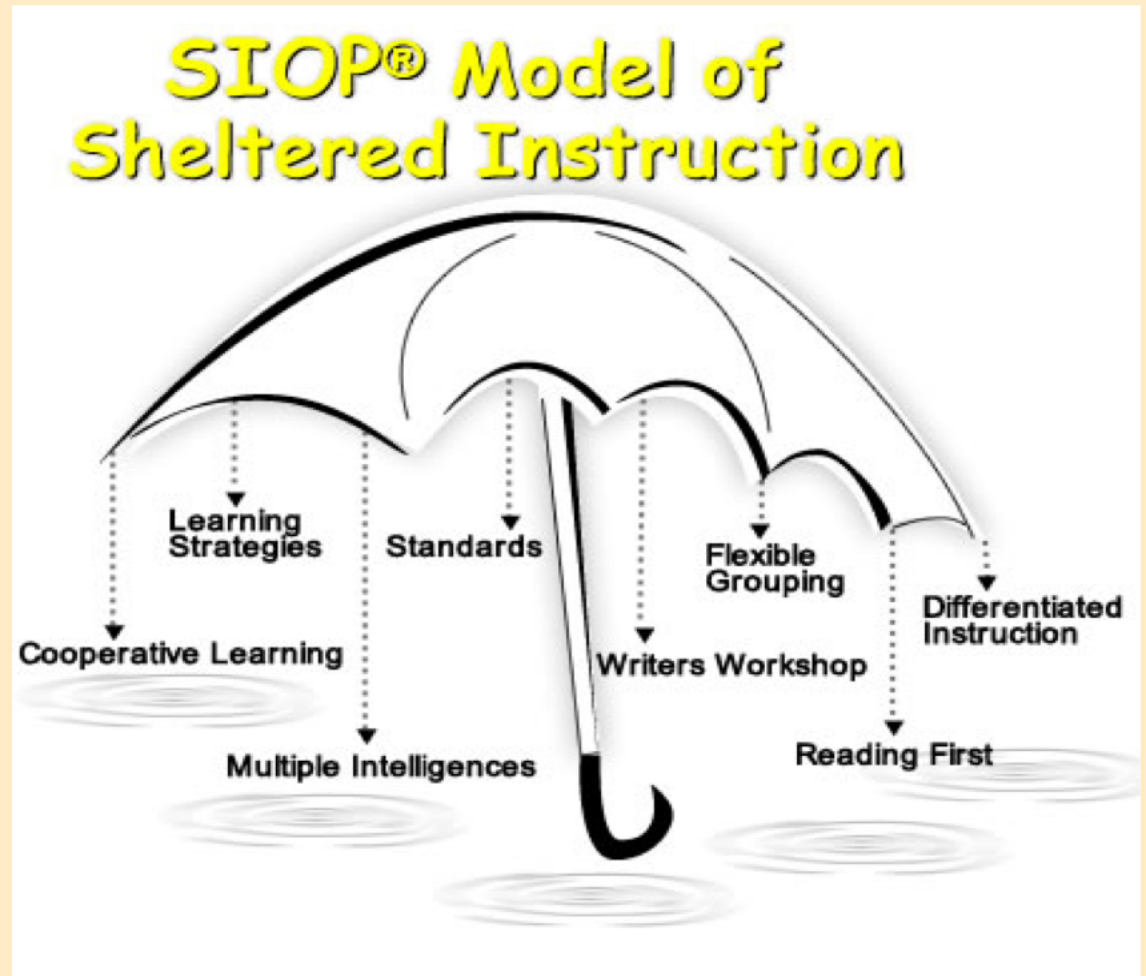

Questions We Still Have

- How do teachers incorporate the Common Core State Standards without “teaching to the test”?
- Where do the Common Core State Standards incorporate student’s unique abilities and backgrounds?

SIOP Model

Sheltered Immersion Observation Protocol

Theory

- SIOP is a teaching model or framework that generally refers to a core subject such as math, science, or history along with academic language development.

Research and Methods

A 3D red line graph with a large red arrow pointing upwards and to the right, set against a grid background. The line starts with a jagged, oscillating pattern and then trends upwards towards the right, ending in a large, solid red arrowhead. The background is a light gray grid on a white surface.

- **SLOP attention to language development, high teacher implementation, and practices influence stronger academic performance and English language proficiency while improving content teaching**

(Short, Echevarría, & Richards-Tutor, 2011).

Practice & Applications

Teacher Strategies

- Pre Reading Activities
- Vocabulary
- Read Alouds
- Communicative Pre-Reading
- Questioning Method
- Providing background information
- Utilizing students first language
- Scaffolding

Collaboration

- “It takes an entire community in order to support the needs of ELLs”

SIOP Overview

Turn to a neighbor and explain Sheltered Immersion Operations Protocol in your own words!

Questions We Still Have

- Every method has its limitations and strengths, what are the current and most popular methods' limitations and strengths?
- How do schools get the support they need to create high implementing teachers, and how do they determine that when the focus of the standards has changed?

Deficit Approach Theory

“language barrier”

“cultural limitations”

“cultural discrepancies”

T=TEACHER

- ***ELL (English Language Learner)***
- ***LEP (Limited English Proficiency)***
- ***Culturally and linguistically diverse***
- ***English as a second language***
- ***Language minority***
- ***Far below basic, Below basic, Basic,***

RESEARCH

More than double the

Amount of ELL students in special education
Compared to a 61% increase of ELL students,
And they have only regressed in their progress

As a consequence

(Clarke, 2011, p. 733-734)

***“If all that is reinforced
in our lives are deficits, it
is likely that we will have
deficit identities”***

~Hattam and Prosser (2008)

What we do know ...

Practice/Collaboration

- *SLOP and funds of knowledge must be interweaved with deficit thinking research*
- *“[Respect] [students’] background knowledge & experience and [build] on students’ linguistic, cultural and cognitive ‘funds of knowledge’ to teach them what they need to achieve success” Dudley-Marley and Lucas (2009)*

What we do know ...

Practice/Collaboration

- *Elicit student connections from outside world*
- *Acknowledge dominant culture while valuing students' cultures*
- *Discontinue labels of students*

Questions We Still Have

- How can we ensure that teachers do not place upon students a deficit discourse? What kind of teacher development/ accountability would help teachers?
- There are light and dark funds of knowledge (the latter based on a deficit approach). How do teachers respond to perceived dark funds of knowledge?

All of the Questions We Still Have

- How do teachers incorporate the Common Core State Standards without “teaching to the test”?
- Where do the Common Core State Standards incorporate student’s unique abilities and backgrounds?
- Every method has its limitations and strengths, what are the current and most popular methods’ limitations and strengths?
- How do schools get the support they need to create high implementing teachers, and how do they determine that when the focus of the standards has changed?
- How can we incorporate the ideas and thoughts of EI students and families into our research and how teachers implement these perspectives into the goals of ELL students and their families?
- Generalizing students culture and background can be hard to avoid. In what ways do teachers find out about students backgrounds?
- How can we ensure that teachers do not place upon students a deficit discourse? What kind of teacher development/ accountability would help teachers?
- There are light and dark funds of knowledge (the latter based on a deficit approach). How do teachers respond to perceived dark funds of knowledge?
