### Introduction

This is the first in a series of papers listing new records, which will be published whenever sufficient new records have been found. The taxa are arranged by countries for an easier evaluation, e.g. updates of checklists. The initials of the contributor for each record is shown in square brackets after the record, and these initials are interpreted at the end of the paper.

The 47 new records from Africa (using O'Shea (1995) as the base-line) contributed by BJO where found by the contributor whilst working on BM collections. Locality details are as shown on the collection packet. The identifications of the records have not been checked.

O'Shea (1995) noted 1st occurrence in Angola, Burundi, Central African Republic, Kenya, Natal, Rwanda, Swaziland, Tanzania, Transvaal,

Uganda, Zaire, Zambia and Zimbabwe. 1st appearance in Madagascar is therefore not unexpected. [CRS]

### Malawi

- Ectropothecium taxiforme* (Brid.) Broth. nr. Bandawe, Chinteché. Coll.: Adziel Lillie, 1935. BM. (First record for East Africa. Previously recorded only from Liberia, Annobon (Pagalu) and Cameroon.) [BJO]

From the slightly more detailed data on the BM specimen, it appears after all to be from Malawi. This is the only record apart from a subsequent gathering in Central African Republic (Potier de la Varde, 1939).)

- Rhacopilopsis guineensis* (Broth. & Par.) Buck nr. Bandawe, Chinteché. Coll.: Adziel Lillie, 1935. BM. (The first East African record for this taxon, previously recorded from Guinea, Sierra Leone and Liberia in West Africa, and Gabon, Central African Republic and Zaire in central Africa.) [BJO]

I have not seen a specimen of this variety (I believe only the type exists (in PC)), but have already expressed doubt about its value as a taxon based on the original description and an appreciation of the high degree of variation present in the species (O'Shea, 1997). The variety appears to have been recorded for Mauritius rather than Tristan by mistake (Bescherelle, 1880), and this is perpetuated in the African checklist (O'Shea, 1995).) [BJO]
