Febbraio 2006

To my mom, my dad and my grandfather,
who never questioned my choices

Special thanks go to my tutor, Prof. Gandolfo, who led me through the path of this work and without whom this theses would not be what it is, and to all the people from Auto Vysocina and Automatic, because without their kind help this theses could not have come into existence.

This is the end of a long journey and I would not be where I am now without the support and love of my family, my friends and someone special.

Mom, dad, my little brother... Petra, Linda, Alenka, Oriana, Jing-jing, Gaetano, Selene, Nino, Luca and everyone else who joined me during this journey...

...Gaspere...

...THANK YOU, DÍKY, GRAZIE!
