A mia Madre e mio Padre

ACKNOWLEDGEMENTS

Several people supported me in pursuing the course of my Ph.D. studies and I wish to thank them all. I want to thank my mother and my father for their unquestionably care they spend throughout my life and my lady for her beloved sustain.

Then, my gratitude goes to my tutor Prof. Luca Fanucci and Prof. Roberto Saletti both for their precious technical help, for the several chances of professional improving they provided to me, and their friendship.

A special thank goes to the SensorDynamics AG design centre of Navacchio in particular Eng. Marco De Marinis who believed in my work.

Great thanks go finally to all my friends who contributed to make these last three years unforgettable.

.
