Counter-supervisor  
Assistant Professor Maria Rita Laganà

## **ABSTRACT**

Information and Communication Technology (ICT) in education is essential to equip all citizens with the necessary knowledge in the information age. While most learners in the developed world have had the chance to be exposed to ICTs and learn basic computer skills through formal or informal learning, in developing countries disadvantaged learners usually do not have the same chances to acquire these skills at school or in their communities. For this reason it is crucial that educators are the first to be trained in using ICTs. This strategy would not only trigger a multiplier effect in their communities, but it is certainly the most cost-effective way to increase digital inclusiveness among the most disadvantaged members.

The South African Department of Education is willing to facilitate the introduction and spread of ICT in Education, but still has to launch a massive national campaign to train all teachers in the use of computers. Most ICT courses for teachers organised at a local level are geared mainly towards administrative purposes, and not towards integrating ICTs into their curricula.

The aim of this research was to identify and explore challenges to the training in ICT of large numbers of teachers from very disadvantaged contexts. Four main primary objectives were identified in order to reach this aim: (1) to study the issues in the disadvantaged South African schools and the ICT competencies of their teachers; (2) to analyse the challenges and limits of using blended learning and free open source software within the South African schools context; (3) to investigate the outcomes of the computer literacy programmes offered by Rhodes University to school teachers; and (4) to prove the feasibility of ICT training with large numbers of teachers from disadvantaged schools through designing, implementing and managing a computer literacy course using blended learning and free open source software, which would lead to an increase in teacher confidence in using computers and narrow the ICT skills gap.

The principal ICT issues found in the disadvantaged schools were the lack of confidence of the teachers in using computers, mainly due to the lower level of education provided to the non-white population during Apartheid, and the overestimation of the level of computer literacy of those few teachers who were already computer literate.

The lack of computers and limited access to the Internet, for the non-white South African ethnic groups, are real constraints that limit the benefits of blended learning, compared to the situation

experienced by learners who live in more developed countries. Due to these constraints, blended learning systems are forced to adapt to the local settings. However, the present constraints do not severely limit the possibility of implementing blended learning programmes, they only influence the type of blending chosen. In addition, the introduction of FOSS educational software and the use of new Linux distributions, such as Edubuntu, are invaluable tools for integrating ICTs into the curricula, although the present poor usability of free open source software is sometimes a major barrier that prevents its diffusion and adoption.

Regardless of the good quality of education received at Rhodes University by the teachers who attend the few computer literacy courses available, the findings of this research revealed that the main limitations are the teaching of ICT mainly for administrative purposes, the exclusive use of proprietary software, and the small course capacity. The computer literacy programmes available at Rhodes University make no use of free open source software and cater only for very small numbers of educators, usually 25 participants, even though this organisation has the means, knowledge and facilities to accommodate large numbers of attendees.

Finally the research has proved that it is feasible to provide computer training for more than 200 educators at a time at Rhodes University, using blended learning systems and free open source software. The final assessment on the newly acquired skills of the teachers, proved that on average, 77.50% of teachers responded correctly to questions at the end of the course. The confidence gained by the teachers to independently use a computer and the feedback received from the tutors throughout the course, showed the viability and sustainability of this kind of blended learning approaches.

The development of teacher education in all relevant fields needs to be prioritised to subsequently improve the quality of education for students in underprivileged schools in South Africa and reverse the impact of the Bantu education system. This research has determined that a major limiting factor in ICT education for teachers is the lack of large scale courses that are specifically designed for the learner level of the majority of teachers from disadvantaged backgrounds, the beginner level. It is therefore not only a matter of lack of investments that prevents the taking off of ICTs in the developing world, but mainly cultural and political decisions that have to be made in order to guide the change that would allow all citizens to have the means and the knowledge to access the information and improve their standard of living.

## TABLE OF CONTENTS

<b>ABSTRACT</b> .....	i
<b>TABLE OF CONTENTS</b> .....	iii
<b>LIST OF FIGURES</b> .....	vii
<b>LIST OF TABLES</b> .....	ix
<b>LIST OF PLATES</b> .....	x
<b>APPENDICES</b> .....	x
<b>ACKNOWLEDGEMENTS</b> .....	xi
<b>ACRONYMS</b> .....	xiii
<b>Chapter 1. INTRODUCTION</b> .....	1
1.1 Introduction to the project .....	1
1.2 Historical background of South African education .....	7
1.3 Present computer literacy situation in South Africa .....	9
1.4 Blended learning and free open source software in South Africa .....	11
1.5 Intentions of the project .....	13
1.5.1 Context of the field research .....	13
1.5.2 Aim and objectives .....	17
1.5.3 Reasons for selecting Grahamstown as an intervention area .....	18
1.6 Structure of thesis .....	19
<b>Chapter 2. RELATED WORKS</b> .....	21
2.1 Analysis of problems in South African teacher <sup>1</sup> education .....	21
2.1.1 Social transformations and the new teachers' roles .....	22
2.1.2 The present situation in ordinary public schools and the teacher education .....	27
2.1.3 Pedagogical models and cultural dependencies: from the behaviourists to the constructivists in the South African experience .....	43
2.2 Teaching to adults with blended learning paradigms in the South African context .....	49
2.2.1 From Andragogy to Heutagogy in the African context .....	49
2.2.2 Definitions of distance learning, face-to-face, e-learning and blended learning paradigms .....	52
2.2.3 Advantages in the use of blended learning compared to the other learning paradigms .....	64
2.2.4 Benefits and constraints of blended learning in disadvantaged contexts .....	67
2.2.5 Lessons learned from the projects of other countries and from some South African projects .....	69
2.3 Free Open Source Software (FOSS) for learning and blended learning .....	82

<sup>1</sup> It is used the term teacher although, in the Curriculum 2005 (C2005) and the subsequent transformation of the role of the educator in the new national curriculum of South Africa, the new term used is mediator.

2.3.1	Socio-economic dependencies with the use of open technologies .....	83
2.3.2	Equal dignity of education and technology in the open world .....	88
2.3.3	Common mistakes to avoid in the use of technologies .....	90
<b>Chapter 3.</b>	<b>COMPUTER LITERACY AT RHODES UNIVERSITY .....</b>	<b>95</b>
3.1	ICT courses for teachers .....	95
3.1.1	RUMEP ACE MATHS ICT Module .....	100
3.1.2	ACE-ICT Programme .....	109
3.2	Limitations of current approach and possible solutions .....	118
3.2.1	Too small course capacity .....	118
3.2.2	Strong focus on administrative use of ICT .....	121
3.2.3	Large cultural, educational and language differences between teachers and facilitators .....	123
3.2.4	Use of expensive proprietary software .....	124
3.2.5	Heavy rely on <i>champion teachers</i> .....	128
3.2.6	Course design and required computer skills .....	130
3.2.7	High course fees .....	132
<b>Chapter 4.</b>	<b>FREE OPEN SOURCE SOFTWARE FOR TEACHING AND BLENDED LEARNING .....</b>	<b>134</b>
4.1	Essential tools for a blended learning computer literacy course .....	134
4.1.1	Operating systems .....	135
4.1.2	e-Learning platforms .....	136
4.1.3	Educational games .....	136
4.1.4	Office suites .....	137
4.1.5	Educational software .....	137
4.2	FOSS tools for a blended learning computer literacy course .....	138
4.2.1	Operating system: Edubuntu .....	140
4.2.2	e-Learning platform: Moodle .....	142
4.2.3	Educational games: KDE Education Suite .....	143
4.2.4	Office suite: OpenOffice .....	145
4.2.5	Educational software: FreeMind .....	146
<b>Chapter 5.</b>	<b>INITIAL EXPERIENCES TEACHING COMPUTER LITERACY .....</b>	<b>150</b>
5.1	Centres of Excellence and its school projects .....	150
5.1.1	The Rhodes University' and the University of Fort Hare' Telkom Centres of Excellence .....	150
5.1.2	The Siyakhula project in Dwesa .....	154
5.1.3	The e-Yethu schools project in Grahamstown .....	160
5.2	Adaptation and delivery of learning materials to teachers participating in Siyakhula project .....	164

5.2.1	Adaptation .....	165
5.2.2	Delivery .....	169
5.2.3	Positive results .....	172
5.2.4	Lessons learnt .....	174
5.3	Organisation and delivery of a pilot computer literacy course for teachers at Mary Waters secondary school .....	176
5.3.1	Organisation .....	177
5.3.2	Delivery .....	178
5.3.3	Positive results .....	183
5.3.4	Lessons learnt .....	184

<b>Chapter 6.</b>	<b>DESIGN AND IMPLEMENTATION OF A COMPUTER LITERACY COURSE USING BLENDED LEARNING AND FREE OPEN SOURCE SOFTWARE .....</b>	<b>188</b>
6.1	New approaches for accessibility to computer literacy courses with e-Yethu schools project .....	189
6.1.1	Bridging the digital divide with digital inclusiveness .....	189
6.1.2	Resistance and fears to extend inclusiveness .....	190
6.2	Instructional design aspects for a course with a large number of participants .....	191
6.2.1	Prevision of teacher understanding .....	192
6.2.2	Definition of end goals and learning objectives of the course .....	193
6.2.3	Creation of media-based off-line and on-line learning contents .....	195
6.3	Adapting and extending the RUMEP ICT manual for FOSS and educational needs of the teachers .....	196
6.3.1	Reasons for choosing the RUMEP ICT manual .....	196
6.3.2	Creating a manual accessible to second language English speakers .....	198
6.3.3	The 8 sections of the e-Yethu manual .....	199
6.3.4	Functional models for teachers' empowerment: exercises typing formal letters, requesting computer sponsorships .....	209
6.4	Designing a Moodle course for distance learning sessions .....	211
6.4.1	The initial aim of the online course .....	212
6.4.2	Adapting the online course to the face-to-face course .....	214
6.4.3	Pre-course objectives .....	217
6.5	Organisation of the course .....	218
6.5.1	Adjustment from the pilot course, logistics and advertisement .....	219
6.5.2	Inclusiveness with regards to the course's accessibility .....	220
6.5.3	Recruitment of tutors .....	222
6.5.4	Session planning .....	223

<b>Chapter 7. THE METHODOLOGY</b> .....	225
7.1 The continuous redesigning of the course .....	225
7.2 The <i>Extreme Programming</i> (XP) methodology .....	226
7.2.1 Definition of XP .....	226
7.2.2 Rules, values, practices and activities of XP .....	231
7.3 The XP methodology applied to the e-Yethu computer literacy course .....	236
7.3.1 Application of the paradigm to the e-Yethu course .....	237
7.3.2 XP's rules, values, practices and activities in the e-Yethu project .....	244
<b>Chapter 8. DELIVERY AND DISCUSSIONS</b> .....	251
8.1 The course population and its attendance .....	251
8.1.1 General discussions on the population background .....	252
8.1.2 Course population statistics .....	253
8.1.3 Attendance and drop outs .....	258
8.2 Learning environment situations .....	260
8.2.1 Adapting the pace of the course to the audience .....	260
8.2.2 Relationship dynamics in the course's environments .....	261
8.2.3 Structuring the lesson plans .....	262
8.2.4 Difficulties with equipment .....	264
8.3 Data analysis and assessment of the new acquired skills .....	266
8.3.1 Teacher pre-course questionnaires and analysis of expectations .....	267
8.3.2 Teacher post-course questionnaires and evaluation of the course .....	272
8.3.3 Tutor post-course questionnaires and feedback analysis .....	277
8.3.4 Assessment of the newly acquired skills .....	283
8.3.5 Comments and suggestions of teachers and tutors .....	291
<b>Chapter 9. CONCLUSIONS</b> .....	295
9.1 Results achieved .....	295
9.2 Benefits noted and problems encountered .....	300
9.3 Possible upgrades and improvements for future initiatives .....	301
9.4 Increasing future project sustainability and success .....	306

## ACKNOWLEDGEMENTS

I extend my grateful thanks to all who made this research project possible, in particular:

My Lord and Our Lady of Fátima for their constancy, strength and many blessings.

My principal research supervisor, Professor Giorgio Gallo, whose guidance and encouragement throughout the process have been invaluable.

My field research supervisor, Professor Alfredo Terzoli, who invited me to join his research team at the *Rhodes University Telkom Centre of Excellence* and made this research possible, regardless the many difficulties.

The teachers of the disadvantaged schools of Grahamstown, to whom this thesis is dedicated to, and to whom I am indebted to for their time and willingness to engage with me as well as permit me to study and document their activities.

To my family, a family of teachers: Guerrina, Tommaso and Edward for their example, support and passion for teaching.

To Merle whose encouragement, assistance and patience helped me to the end.

To my e-learning guru, Professor Marcello Giacomantonio, who shared with me his experience and perspectives on didactics and technology.

Professor Peter Clayton, from *Rhodes University Telkom Centre of Excellence*, who granted me the research funds to make this project possible.

Professor Cheryl Hodgkinson-Williams, from *Rhodes University Department of Education*, for her assistance with pedagogical methodologies and teaching strategies, and Brenda Mallinson, from *Rhodes University Department of Information Systems*, for her introduction to the world of e-learning.

The *e-Yethu Schools' Project* Team for the assistance during the research process, insight and friendship, in particular Bradley, Caroline, Cecile, Cleo, Hannah, Ingrid, Kevin, Lloyd, Lorenzo and Mamello.

The *Rhodes University Mathematics Education Programme* (RUMEP), in particular Dr Rose Spanneberg and Mark Sainsbury for sharing their insights and experience.

The *Rhodes University IT Division*, in particular Andrew Grant, who worked relentlessly to make sure all relevant software was installed in the Rhodes Union computer laboratory, and David Siebörger, who created and managed the login accounts for all the teachers of the e-Yethu course.

Past and present staff of the *Centre for Higher Education Research, Teaching and Learning* (CHERTL) at Rhodes University, in particular to Professor Chrissie Boughey, Liz Sayigh, Rose Grant, Meryl Queisser and last but not the least Markus Mostert with whom I had the privilege to work as his assistant in the field of educational technology and e-learning support.

To Bruno Galiffa, my first teacher of mathematics, who built the basis for my career with the bits.

To Theo and Gemma whose accuracy for research and drive for excellence is inspirational.

To my friends, especially Alberto & Chiara, Anna, Antonio B, Antonio D, Antonio G, Antonio I, Antonio L, Antonio M, Bachi & Anna, Brice, Chiara, Danny & Jo, Davide & Sara, Davide & Tiziana, Enrico, Erika, Fabrizio, Fedele & Silvana, Francesco & Bernadette, Franco, Gerardo, Giovanni & Letizia, Giuseppe, Irene, Jeroen & Elize, José, Lara, Marco, Mariano, Massimo, Mimma, Orazio & Adele, Rita, Roberto, Samuele and Urso & Kitty.

The Order of the Knights of da Gama, Council 27, whose members made me feel at home in Grahamstown and in particular Neil, John, Mike, Paddy, Ron, James, Dario, Stephen and Simon.

---

This research project was funded by the Rhodes University Telkom Centre of Excellence in Distributed Multimedia, the University of Pisa International Relations Office and my family. Their financial support is gratefully acknowledged.
