Supplemental Table S4 - Filtered list of extracellular proteome

Normalized SILAC protein ratios of ECM isolated from primary human keratinocytes derived from two RDEB and two healthy donors. Annotated spectra of single peptide identifications are available as supplemental information.

pathway;feeding behavior;female gamete generation;fibroblast growth factor receptor signaling pathway;fibroblast growth factor receptor signaling pathway involved in hemopoiesis;fibroblast growth factor receptor signaling pathway
involved in mammary gland specification;fibroblast growth factor receptor signaling pathway involved in negative regulation of apoptosis in bone marrow;fibroblast growth factor receptor signaling pathway involved in orbitofrontal cortex
development;fibroblast growth factor receptor signaling pathway involved in positive regulation of cell proliferation in bone marrow;forebrain development;forebrain neuroblast division;forebrain neuron development;forebrain ventricular
zone progenitor cell division;G0 to G1 transition;G1 phase;G1 phase of mitotic cell cycle;G1/S transition of mitotic cell cycle;G2 phase;G2 phase of mitotic cell cycle;G2/M transition checkpoint;G2/M transition DNA damage
checkpoint;G2/M transition of mitotic cell cycle;gamete generation;generation of neurons;gland development;glandular epithelial cell differentiation;glial cell development;glial cell differentiation;glucose homeostasis;glucose
transport;growth;growth hormone secretion;hair cycle process;hair follicle morphogenesis;hemopoiesis;hemopoietic or lymphoid organ development;hemopoietic progenitor cell differentiation;hemopoietic stem cell
differentiation;hemostasis;hexose transport;hippocampus development;histamine secretion;histamine secretion by mast cell;histamine secretion involved in inflammatory response;histamine transport;histone modification;histone
phosphorylation;homeostasis of number of cells;homeostatic process;hormone secretion;hormone transport;immune effector process;immune response;immune response-activating cell surface receptor signaling pathway;immune response-
activating signal transduction;immune response-inhibiting cell surface receptor signaling pathway;immune response-inhibiting signal transduction;immune response-regulating cell surface receptor signaling pathway;immune response-
regulating signaling pathway;immune system process;in utero embryonic development;induction of apoptosis;induction of programmed cell death;inflammatory response;innate immune response;innate immune response-activating signal
transduction;inner ear morphogenesis;inner ear receptor cell development;inositol lipid-mediated signaling;insulin receptor signaling pathway;integrin-mediated signaling pathway;interaction with host;interferon-gamma-mediated signaling
pathway;interspecies interaction between organisms;intracellular protein kinase cascade;intracellular protein transport;intracellular receptor mediated signaling pathway;intracellular signal transduction;intracellular transport;ion
homeostasis;ion transmembrane transport;ion transport;JAK-STAT cascade;JAK-STAT cascade involved in growth hormone signaling pathway;karyogamy;lacrimal gland development;lateral sprouting from an epithelium;lateral ventricle
development;layer formation in cerebral cortex;learning;learning or memory;lens fiber cell development;leukocyte activation;leukocyte degranulation;leukocyte differentiation;leukocyte homeostasis;leukocyte migration;leukocyte migration
involved in immune response;leukocyte proliferation;limb bud formation;limb morphogenesis;lipopolysaccharide-mediated signaling pathway;localization;locomotion;lung alveolus development;lung epithelium development;lung lobe
morphogenesis;lung-associated mesenchyme development;lymphocyte activation;lymphocyte costimulation;lymphocyte differentiation;lymphocyte homeostasis;lymphocyte proliferation;M phase;M phase of mitotic cell
cycle;macromolecular complex assembly;macromolecular complex subunit organization;macromolecule biosynthetic process;macromolecule catabolic process;macromolecule localization;macromolecule metabolic process;macromolecule
modification;maintenance of fidelity involved in DNA-dependent DNA replication;male gamete generation;mammary gland bud formation;MAPKKK cascade;meiosis;membrane depolarization;membrane disassembly;membrane
invagination;membrane organization;membranous septum morphogenesis;mesenchymal cell differentiation;mesenchymal cell differentiation involved in lung development;mesenchymal cell proliferation;mesenchymal cell proliferation
involved in lung development;mesenchymal-epithelial cell signaling;mesenchyme development;mesoderm development;metabolic process;metal ion homeostasis;metal ion transport;microtubule organizing center organization;midbrain
development;middle ear morphogenesis;mitosis;mitotic cell cycle checkpoint;mitotic cell cycle G2/M transition checkpoint;mitotic cell cycle G2/M transition DNA damage checkpoint;mitotic nuclear envelope disassembly;mitotic
prometaphase;mitotic prophase;modification-dependent macromolecule catabolic process;modification-dependent protein catabolic process;molting cycle;molting cycle process;mononuclear cell proliferation;monosaccharide
transport;monovalent inorganic cation transport;morphogenesis of a branching epithelium;morphogenesis of a branching structure;morphogenesis of an epithelium;morphogenesis of embryonic epithelium;motor axon guidance;mRNA
metabolic process;mRNA processing;multicellular organism growth;multicellular organismal development;multicellular organismal process;multicellular organismal reproductive process;multi-organism process;muscle cell
development;muscle tissue development;muscle tissue morphogenesis;MyD88-dependent toll-like receptor signaling pathway;MyD88-independent toll-like receptor signaling pathway;myeloid cell differentiation;negative regulation of
anoikis;negative regulation of apoptosis;negative regulation of B cell activation;negative regulation of B cell proliferation;negative regulation of biological process;negative regulation of biosynthetic process;negative regulation of caspase
activity;negative regulation of catabolic process;negative regulation of catalytic activity;negative regulation of cell activation;negative regulation of cell adhesion;negative regulation of cell aging;negative regulation of cell
communication;negative regulation of cell cycle;negative regulation of cell cycle arrest;negative regulation of cell cycle process;negative regulation of cell death;negative regulation of cell differentiation;negative regulation of cell
proliferation;negative regulation of cell-matrix adhesion;negative regulation of cell-substrate adhesion;negative regulation of cellular biosynthetic process;negative regulation of cellular component organization;negative regulation of cellular
macromolecule biosynthetic process;negative regulation of cellular metabolic process;negative regulation of cellular process;negative regulation of cellular protein metabolic process;negative regulation of cellular senescence;negative
regulation of developmental process;negative regulation of DNA metabolic process;negative regulation of DNA replication;negative regulation of DNA-dependent DNA replication;negative regulation of epithelial cell proliferation;negative
regulation of ERK1 and ERK2 cascade;negative regulation of focal adhesion assembly;negative regulation of gene expression;negative regulation of hydrolase activity;negative regulation of immune response;negative regulation of immune
system process;negative regulation of intracellular protein kinase cascade;negative regulation of intracellular protein transport;negative regulation of intracellular transport;negative regulation of kinase activity;negative regulation of
leukocyte activation;negative regulation of leukocyte proliferation;negative regulation of lymphocyte activation;negative regulation of lymphocyte proliferation;negative regulation of macromolecule biosynthetic process;negative regulation
of macromolecule metabolic process;negative regulation of MAP kinase activity;negative regulation of MAPKKK cascade;negative regulation of mast cell proliferation;negative regulation of metabolic process;negative regulation of
mitosis;negative regulation of molecular function;negative regulation of mononuclear cell proliferation;negative regulation of myeloid cell differentiation;negative regulation of myeloid leukocyte differentiation;negative regulation of
nitrogen compound metabolic process;negative regulation of nuclear division;negative regulation of nucleobase-containing compound metabolic process;negative regulation of nucleocytoplasmic transport;negative regulation of organelle
organization;negative regulation of osteoblast differentiation;negative regulation of peptidase activity;negative regulation of programmed cell death;negative regulation of protein catabolic process;negative regulation of protein complex

assembly;negative regulation of protein export from nucleus;negative regulation of protein homooligomerization;negative regulation of protein kinase activity;negative regulation of protein metabolic process;negative regulation of protein
modification process;negative regulation of protein oligomerization;negative regulation of protein serine/threonine kinase activity;negative regulation of protein transport;negative regulation of protein ubiquitination;negative regulation of
response to stimulus;negative regulation of RNA metabolic process;negative regulation of sequestering of calcium ion;negative regulation of signal transduction;negative regulation of signaling;negative regulation of synaptic
plasticity;negative regulation of toll-like receptor 2 signaling pathway;negative regulation of toll-like receptor 4 signaling pathway;negative regulation of toll-like receptor signaling pathway;negative regulation of transcription from RNA
polymerase II promoter;negative regulation of transcription, DNA-dependent;negative regulation of transferase activity;negative regulation of transport;nerve growth factor receptor signaling pathway;neuroblast
division;neurogenesis;neurological system process;neuromuscular junction development;neuron apoptosis;neuron death;neuron development;neuron migration;neuron projection development;neuron projection morphogenesis;neuron-neuron
synaptic transmission;nitrogen compound metabolic process;nitrogen compound transport;Notch signaling pathway;nuclear division;nuclear envelope disassembly;nuclear envelope organization;nuclear mRNA splicing, via
spliceosome;nuclear transport;nucleic acid metabolic process;nucleobase-containing compound metabolic process;nucleocytoplasmic transport;odontogenesis;oligodendrocyte development;oligodendrocyte differentiation;oogenesis;organ
development;organ growth;organ induction;organ morphogenesis;organ regeneration;organelle fission;organelle fusion;organelle organization;organic substance transport;otic vesicle formation;outer ear morphogenesis;outflow tract septum
morphogenesis;paraxial mesoderm development;pattern recognition receptor signaling pathway;pattern specification process;peptide hormone secretion;peptide secretion;peptide transport;peptidyl-amino acid modification;peptidyl-serine
modification;peptidyl-serine phosphorylation;peptidyl-threonine modification;peptidyl-threonine phosphorylation;peptidyl-tyrosine modification;peptidyl-tyrosine phosphorylation;phagocytosis;phosphate ion homeostasis;phosphate-
containing compound metabolic process;phosphatidylinositol-mediated signaling;phosphorus metabolic process;phosphorylation;phosphorylation of RNA polymerase II C-terminal domain;photoreceptor cell maintenance;platelet
activation;platelet degranulation;positive regulation of actin cytoskeleton reorganization;positive regulation of actin filament polymerization;positive regulation of antigen receptor-mediated signaling pathway;positive regulation of
apoptosis;positive regulation of binding;positive regulation of biological process;positive regulation of biosynthetic process;positive regulation of calcium ion-dependent exocytosis;positive regulation of canonical Wnt receptor signaling
pathway;positive regulation of cardiac muscle cell proliferation;positive regulation of caspase activity;positive regulation of catalytic activity;positive regulation of cell activation;positive regulation of cell adhesion;positive regulation of cell
communication;positive regulation of cell cycle;positive regulation of cell cycle arrest;positive regulation of cell cycle process;positive regulation of cell death;positive regulation of cell development;positive regulation of cell
differentiation;positive regulation of cell division;positive regulation of cell migration;positive regulation of cell motility;positive regulation of cell projection organization;positive regulation of cell proliferation;positive regulation of cell
size;positive regulation of cell-matrix adhesion;positive regulation of cell-substrate adhesion;positive regulation of cellular biosynthetic process;positive regulation of cellular component movement;positive regulation of cellular component
organization;positive regulation of cellular metabolic process;positive regulation of cellular process;positive regulation of cellular protein metabolic process;positive regulation of cytokine secretion;positive regulation of cytoskeleton
organization;positive regulation of defense response;positive regulation of dendritic cell apoptosis;positive regulation of developmental process;positive regulation of DNA biosynthetic process;positive regulation of DNA metabolic
process;positive regulation of DNA replication;positive regulation of DNA-dependent DNA replication initiation;positive regulation of epithelial cell proliferation;positive regulation of epithelial cell proliferation involved in lung
morphogenesis;positive regulation of ERK1 and ERK2 cascade;positive regulation of exocytosis;positive regulation of Fc receptor mediated stimulatory signaling pathway;positive regulation of fibroblast proliferation;positive regulation of
gamma-delta T cell activation;positive regulation of gamma-delta T cell differentiation;positive regulation of gene expression;positive regulation of glial cell proliferation;positive regulation of gliogenesis;positive regulation of hormone
secretion;positive regulation of hydrolase activity;positive regulation of immune effector process;positive regulation of immune response;positive regulation of immune system process;positive regulation of innate immune response;positive
regulation of insulin secretion;positive regulation of integrin activation;positive regulation of intracellular protein kinase cascade;positive regulation of intracellular protein transport;positive regulation of intracellular transport;positive
regulation of JAK-STAT cascade;positive regulation of kinase activity;positive regulation of leukocyte activation;positive regulation of leukocyte apoptosis;positive regulation of leukocyte degranulation;positive regulation of leukocyte
proliferation;positive regulation of ligase activity;positive regulation of lipase activity;positive regulation of lipid kinase activity;positive regulation of lipid metabolic process;positive regulation of locomotion;positive regulation of
lymphocyte activation;positive regulation of lymphocyte differentiation;positive regulation of macromolecule biosynthetic process;positive regulation of macromolecule metabolic process;positive regulation of MAP kinase activity;positive
regulation of MAPKKK cascade;positive regulation of MAPKKK cascade by fibroblast growth factor receptor signaling pathway;positive regulation of mast cell activation;positive regulation of mast cell activation involved in immune
response;positive regulation of mast cell degranulation;positive regulation of mast cell proliferation;positive regulation of mesenchymal cell proliferation;positive regulation of metabolic process;positive regulation of metalloenzyme
activity;positive regulation of mitotic cell cycle;positive regulation of molecular function;positive regulation of multicellular organismal process;positive regulation of muscle contraction;positive regulation of neural precursor cell
proliferation;positive regulation of neurogenesis;positive regulation of neuron apoptosis;positive regulation of neuron differentiation;positive regulation of neuron projection development;positive regulation of nitrogen compound metabolic
process;positive regulation of nucleobase-containing compound metabolic process;positive regulation of oligodendrocyte progenitor proliferation;positive regulation of organelle organization;positive regulation of peptidase activity;positive
regulation of peptide hormone secretion;positive regulation of peptide secretion;positive regulation of peptidyl-tyrosine phosphorylation;positive regulation of phosphate metabolic process;positive regulation of phosphatidylinositol 3-kinase
activity;positive regulation of phosphatidylinositol 3-kinase cascade;positive regulation of phospholipase activity;positive regulation of phospholipase C activity;positive regulation of phosphorus metabolic process;positive regulation of
phosphorylation;positive regulation of podosome assembly;positive regulation of programmed cell death;positive regulation of protein binding;positive regulation of protein complex assembly;positive regulation of protein import into
nucleus, translocation;positive regulation of protein kinase activity;positive regulation of protein kinase B signaling cascade;positive regulation of protein metabolic process;positive regulation of protein modification process;positive
regulation of protein phosphorylation;positive regulation of protein polymerization;positive regulation of protein secretion;positive regulation of protein serine/threonine kinase activity;positive regulation of protein targeting to
membrane;positive regulation of protein transport;positive regulation of protein ubiquitination;positive regulation of proteolysis;positive regulation of reproductive process;positive regulation of response to stimulus;positive regulation of
RNA metabolic process;positive regulation of secretion;positive regulation of signal transduction;positive regulation of signaling;positive regulation of smooth muscle contraction;positive regulation of stress-activated protein kinase
signaling cascade;positive regulation of T cell activation;positive regulation of T cell differentiation;positive regulation of T cell receptor signaling pathway;positive regulation of transcription from RNA polymerase II promoter;positive
regulation of transcription, DNA-dependent;positive regulation of transferase activity;positive regulation of translation;positive regulation of transport;positive regulation of tyrosine phosphorylation of STAT protein;positive regulation of
tyrosine phosphorylation of Stat5 protein;positive regulation of ubiquitin-protein ligase activity;positive regulation of ubiquitin-protein ligase activity involved in mitotic cell cycle;positive regulation of uterine smooth muscle
contraction;positive regulation of viral reproduction;positive regulation of viral transcription;positive regulation of Wnt receptor signaling pathway;post-embryonic development;posttranscriptional regulation of gene expression;potassium
ion transport;primary metabolic process;progesterone receptor signaling pathway;programmed cell death;pronuclear fusion;prophase;prostate epithelial cord arborization involved in prostate glandular acinus morphogenesis;prostate
epithelial cord elongation;prostate gland epithelium morphogenesis;prostate gland growth;prostate gland morphogenetic growth;proteasomal protein catabolic process;proteasomal ubiquitin-dependent protein catabolic process;protein
autophosphorylation;protein complex assembly;protein complex subunit organization;protein localization;protein localization in membrane;protein localization to chromosome;protein localization to kinetochore;protein localization to
organelle;protein localization to synapse;protein metabolic process;protein modification process;protein phosphorylation;protein secretion;protein transport;proteolysis;proteolysis involved in cellular protein catabolic process;pyramidal
neuron development;Ras protein signal transduction;receptor catabolic process;receptor clustering;receptor metabolic process;re-entry into mitotic cell cycle;regeneration;regulated secretory pathway;regulation of actin cytoskeleton
organization;regulation of actin cytoskeleton reorganization;regulation of actin filament length;regulation of actin filament polymerization;regulation of actin filament-based process;regulation of actin polymerization or
depolymerization;regulation of anatomical structure morphogenesis;regulation of anatomical structure size;regulation of anoikis;regulation of antigen receptor-mediated signaling pathway;regulation of apoptosis;regulation of B cell
activation;regulation of B cell apoptosis;regulation of B cell proliferation;regulation of B cell receptor signaling pathway;regulation of behavior;regulation of bile acid biosynthetic process;regulation of binding;regulation of biological
process;regulation of biological quality;regulation of biosynthetic process;regulation of blood coagulation;regulation of body fluid levels;regulation of bone remodeling;regulation of bone resorption;regulation of branching involved in
prostate gland morphogenesis;regulation of branching involved in salivary gland morphogenesis;regulation of branching involved in salivary gland morphogenesis by mesenchymal-epithelial signaling;regulation of calcium ion
transport;regulation of calcium ion transport into cytosol;regulation of calcium ion-dependent exocytosis;regulation of canonical Wnt receptor signaling pathway;regulation of cardiac muscle cell proliferation;regulation of cardiac muscle
tissue development;regulation of cardiac muscle tissue growth;regulation of catabolic process;regulation of catalytic activity;regulation of cell activation;regulation of cell adhesion;regulation of cell adhesion mediated by integrin;regulation
of cell aging;regulation of cell communication;regulation of cell cycle;regulation of cell cycle arrest;regulation of cell cycle process;regulation of cell death;regulation of cell development;regulation of cell differentiation;regulation of cell
division;regulation of cell fate commi" "acetylcholine receptor activator activity;acetylcholine receptor regulator activity;adenyl nucleotide binding;adenyl ribonucleotide binding;antigen binding;ATP binding;binding;binding,
bridging;carbohydrate binding;catalytic activity;cation binding;cyclin binding;cyclin-dependent protein kinase activity;DNA binding;enzyme binding;ErbB-2 class receptor binding;ErbB-3 class receptor binding;Fc-gamma receptor I
complex binding;fibroblast growth factor binding;fibroblast growth factor-activated receptor activity;glycolipid binding;glycosaminoglycan binding;glycosphingolipid binding;growth factor binding;heme binding;heparin binding;histone
kinase activity;hydrolase activity;hydrolase activity, acting on ester bonds;immunoglobulin receptor binding;integrin binding;ion binding;iron ion binding;kinase activity;kinase binding;lipid binding;magnesium ion binding;metal ion
binding;molecular transducer activity;non-membrane spanning protein tyrosine kinase activity;nucleic acid binding;nucleotide binding;pattern binding;phosphatase activity;phosphoprotein binding;phosphoprotein phosphatase
activity;phosphoric ester hydrolase activity;phosphotransferase activity, alcohol group as acceptor;phosphotyrosine binding;polysaccharide binding;protein binding;protein binding transcription factor activity;protein binding,
bridging;protein complex binding;protein domain specific binding;protein kinase activity;protein kinase binding;protein phosphorylated amino acid binding;protein serine/threonine kinase activity;protein serine/threonine phosphatase
activity;protein tyrosine kinase activity;purine nucleotide binding;purine ribonucleoside triphosphate binding;purine ribonucleotide binding;receptor activator activity;receptor activity;receptor binding;receptor regulator activity;receptor
signaling protein activity;receptor signaling protein tyrosine kinase activity;regulatory region DNA binding;regulatory region nucleic acid binding;ribonucleotide binding;RNA binding;RNA polymerase II carboxy-terminal domain kinase
activity;SH2 domain binding;SH3/SH2 adaptor activity;signal transducer activity;signaling adaptor activity;signaling receptor activity;snRNA binding;sphingolipid binding;tau-protein kinase activity;tetrapyrrole binding;transcription
coactivator activity;transcription cofactor activity;transcription factor binding transcription factor activity;transcription regulatory region DNA binding;transferase activity;transferase activity, transferring phosphorus-containing
