Note

- 1 Social reproduction theory of schooling is a wide-ranging tradition of thinking about institutional education from a political-economic perspective. In the following account I try to articulate basic premises of social reproduction theory for the purposes of my argument about co-operative schools as a challenge alternative. This account is by no means exhaustive. I only try to articulate some thoughts that are necessary for social reproduction theory, though they are not sufficient. For some reflection on this issue, see McGrew, 2011.
