Aliso: A Journal of Taxonomic and Evolutionary Botany is the scientific journal of Rancho Santa Ana Botanic Garden. International in scope, the journal specializes in plant evolutionary biology and taxonomy. Aliso also features papers on floristics and other facets of botanical research pertaining to the western United States and areas of comparable climate and vegetation. Recent titles and abstracts may be found at apt.allenpress.com. First published in 1948, the journal is named for the aliso, the Spanish word used by the early Californians for the western sycamore (Platanus racemosa Nutt.), a tree associated with the founding of Rancho Santa Ana Botanic Garden.

Submission of Manuscripts

Publication in Aliso is currently free of page charges, and page limits are generous. We encourage submission of longer manuscripts that would suffer from length reduction. The large journal format and expertise of a dedicated state-of-the-art printer, Allen Press (www.allenpress.com), facilitate the publication of high-quality illustrations. Instructions for Contributors and a Checklist for Manuscript Preparation and Submission may be obtained at www.rsabg.org/aliso or requested from the Editor-in-Chief (aliso.editor@rsabg.org).

Subscriptions and Back Issues

Inquiries concerning subscriptions, purchase of back issues, and exchanges should be addressed to aliso.subscriptions@rsabg.org.

Every effort has been made to trace the original source of copyrighted material contained in this volume. On behalf of the authors, the publisher apologizes for any omissions or errors.

The flower featured on the cover of this volume is the lemon lily, Lilium parryi Wats.

Aliso Volume 22 was published October 2006

Preface	17
OVERALL PHYLOGENY	1
Robust inference of monocot deep phylogeny using an expanded multigene plastid data set Sean W. Graham, Jessie M. Zgurski, Marc A. McPherson, Donna M. Cherniawsky, Jeffery M. Saarela, Elvira F. C. Horne, Selena Y. Smith, Winson A. Wong, Heath E. O'Brien, Vincent L. Biron, J. Chris Pires, Richard G. Olmstead, Mark W. Chase, and Hardeep S. Rai	3
Gondwanan origin of major monocot groups inferred from dispersal-vicariance analysis Kåre Bremer and Thomas Janssen	22
Phylogenetic relationships of monocots based on the highly informative plastid gene ndhF: evidence for widespread concerted convergence Thomas J. Givnish, J. Chris Pires, Sean W. Graham, Marc A. McPherson, Linda M. Prince, Thomas B. Patterson, Hardeep S. Rai, Eric H. Roalson, Timothy M. Evans, William J. Hahn, Kendra C. Millam, Alan W. Meerow, Mia Molvray, Paul J. Kores, Heath E. O'Brien, Jocelyn C. Hall, W. John Kress, and Kenneth J. Sytsma	28
Mitochondrial data in monocot phylogenetics Gitte Petersen, Ole Seberg, Jerrold I Davis, Douglas H. Goldman, Dennis W. Stevenson, Lisa M. Campbell, Fabian A. Michelangeli, Chelsea D. Specht, Mark W. Chase, Michael F. Fay, J. Chris Pires, John V. Freudenstein, Christopher R. Hardy, and Mark P. Simmons	52
Multigene analyses of monocot relationships: a summary Mark W. Chase, Michael F. Fay, Dion S. Devey, Olivier Maurin, Nina Rønsted, T. Jonathan Davies, Yohan Pillon, Gitte Petersen, Ole Seberg, Minoru N. Tamura, Conny B. Asmussen, Khidir Hilu, Thomas Borsch, Jerrold I Davis, Dennis W. Stevenson, J. Chris Pires, Thomas J. Givnish, Kenneth J. Sytsma, Marc A. McPherson, Sean W. Graham, and Hardeep S. Rai	63
BASAL MONOCOTS	77
Placing the monocots: conflicting signal from trigenomic analyses Melvin R. Duvall, Sarah Mathews, Neill Mohammad, and Tammy Russell	79
The fossil record of basal monocots Ruth A. Stockey	91
Perianth development in the basal monocot Triglochin maritima (Juncaginaceae) Matyas Buzgo, Douglas E. Soltis, Pamela S. Soltis, Sangtae Kim, Hong Ma, Bernard A. Hauser, Jim Leebens-Mack, and Bo Johansen	107
Morphology	127
Vegetative architecture of desiccation-tolerant arborescent monocotyledons Stefan Porembski	129

Contents	ALISO

iv

Fleshy fruits in liliiflorous monocots Finn N. Rasmussen, Signe Frederiksen, Bo Johansen, Lise Bolt Jørgensen, Gitte Petersen, and Ole Seberg	135
FLORAL EVOLUTION AND DEVELOPMENT	149
Molecular basis of development in petaloid monocot flowers Bo Johansen, Signe Frederiksen, and Martin Skipper	151
Patterns of floral structure and orientation in Japonolirion, Narthecium, and Tofieldia Margarita V. Remizowa, Dmitry D. Sokoloff, and Paula J. Rudall	159
Recommendations and goals for evo-devo research: scenarios, genetic constraint, and developmental homeostasis Michael W. Frohlich	172
POLLEN EVOLUTION	189
The operculum in pollen of monocotyledons Carol A. Furness and Paula J. Rudall	191
Aperture pattern and microsporogenesis in Asparagales Sophie Nadot, Laurent Penet, Leanne D. Dreyer, Arlette Forchioni, and Adrienne Ressayre	197
Pollen wall ultrastructure of Araceae and Lemnaceae in relation to molecular classifications Michael Hesse	204
AQUATIC MONOCOTS	209
A reappraisal of phylogenetic relationships in the monocotyledon family Hydrocharitaceae (Alismatidae)	211
Donald H. Les, Michael L. Moody, and Connie L. Soros	
Speciation in duckweeds (Lemnaceae): phylogenetic and ecological inferences Daniel J. Crawford, Elias Landolt, Donald H. Les, and Rebecca T. Kimball	231
Further evidence for seed size variation in the genus Zostera: exploratory studies with Z. japonica	243
and Z. asiatica Sandy Wyllie-Echeverria, Victoria R. Wyllie-Echeverria, Algernon C. Churchill, and Paul A. Cox	
Arecales	249
A phylogenetic study of Arecaceae based on seedling morphological and anatomical data Flor M. Henderson and Dennis W. Stevenson	251
Stem anatomy of climbing palms in relation to long-distance water transport P. Barry Tomlinson	265
Conservation biology for seven palm species from diverse genera Christopher B. Wood, Helen J. Vautier, Wen Bin, Laurent G. Rakotondranony, and Hugh W. Pritchard	278
Asparagales	285
Phylogeny, genome size, and chromosome evolution of Asparagales J. Chris Pires, Ivan J. Maureira, Thomas J. Givnish, Kenneth J. Sytsma, Ole Seberg, Gitte Petersen, Legrald J. Davis, Dennis W. Stevenson, Paula J. Rudall, Michael F. Fay, and Mark W. Chase.	287

Genomic resources for Asparagales Michael J. Havey, Kenneth C. Sink, Maria Jenderek, and Christopher D. Town	305
AGAVACEAE AND XANTHORRHOEACEAE	311
Phylogeny of Agavaceae based on ndhF, rbcL, and ITS sequences: implications of molecular data for classification David J. Bogler, J. Chris Pires, and Javier Francisco-Ortega	313
Pollination biology and adaptive radiation of Agavaceae, with special emphasis on the genus Agave Martha Rocha, Sara V. Good-Ávila, Francisco Molina-Freaner, Héctor T. Arita, Amanda Castillo, Abisaí García-Mendoza, Arturo Silva-Montellano, Brandon S. Gaut, Valeria Souza, and Luis E. Eguiarte	329
Systematics of Xanthorrhoeaceae sensu lato, with an emphasis on Bulbine Dion S. Devey, Ilia Leitch, Paula J. Rudall, J. Chris Pires, Yohan Pillon, and Mark W. Chase	345
ALLIACEAE/AMARYLLIDACEAE	353
The never-ending story: multigene approaches to the phylogeny of Amaryllidaceae Alan W. Meerow and Deirdre A. Snijman	355
Molecular studies of subfamily Gilliesioideae (Alliaceae) Michael F. Fay, Paula J. Rudall, and Mark W. Chase	367
Phylogeny and new intrageneric classification of Allium (Alliaceae) based on nuclear ribosomal DNA ITS sequences Nikolai Friesen, Reinhard M. Fritsch, and Frank R. Blattner	372
IRIDACEAE	397
Phylogeny of Iridaceae subfamily Crocoideae based on a combined multigene plastid DNA analysis	399
Peter Goldblatt, T. Jonathan Davies, John C. Manning, Michelle van der Bank, and Vincent Savolainen	
Phylogenetics of the "tiger-flower" group (Tigridieae: Iridaceae): molecular and morphological evidence Aaron Rodriguez and Kenneth J. Sytsma	412
Patterns of evolution in characters that define <i>Iris</i> subgenera and sections Carol A. Wilson	425
The role of phylogenetic constraints in the evolution of pollination mechanisms in Iridaceae of sub-Saharan Africa Peter Bernhardt and Peter Goldblatt	434
Orchidaceae	445
A comparison and combination of plastid <i>atp</i> B and <i>rbc</i> L gene sequences for inferring phylogenetic relationships within Orchidaceae <i>Kenneth M. Cameron</i>	447
Molecular phylogenetic systematics in Dendrobieae (Orchidaceae) Mark A. Clements	465

VOLUME 22

INDEX

This volume and its companion, *Monocots: Comparative Biology and Evolution—Poales*, contain papers presented at the Third International Conference on the Comparative Biology of the Monocotyledons ("Monocots III") and the Fourth International Symposium on Grass Systematics and Evolution ("Grasses IV"). Hosted by Rancho Santa Ana Botanic Garden, Claremont, California, the conferences were held concurrently at the nearby Ontario Convention Center from March 31 through April 4, 2003. Some 305 researchers and students from 37 countries attended.

Monocots I was held in 1993 at the Royal Botanic Gardens, Kew, and resulted in the two-volume publication, *Monocotyledons: Systematics and Evolution* (P. J. Rudall, P. J. Cribb, D. F. Cutler, and C. J. Humphries [editors], Royal Botanic Gardens, Kew, UK, 1995). Monocots II took place in Sydney in 1998 and resulted in *Monocots: Systematics and Evolution* (K. L. Wilson and D. A. Morrison [editors], CSIRO Publishing, Collingwood, Victoria, Australia, 2000). A brief history of the International Symposium on Grass Systematics and Evolution is provided in the preface of the companion to the current volume.

At Monocots III/Grasses IV, the goals of the scientific program were to: (1) Present and publish original research of high caliber. (2) Offer a strong core program in systematics while incorporating newer, relevant fields such as developmental biology and genomics, and to address the timely and challenging issue of data integration. (3) Assemble scientists and students, representing diverse fields, from around the world to interact, share ideas, and form collaborations. In a departure from past conferences, the Organizing Committee reserved sessions for contributed talks. We felt some prospective presenters who were not invited to participate in an organized session nor were organizing a session themselves would have original research of significant importance to report, perhaps involving taxa or processes not addressed in the organized sessions, and would prefer an oral presentation format.

Some 250 presentations were made in the form of talks or posters. Presenters in all 27 organized sessions were invited to submit papers for the proceedings volumes, along with presenters of selected contributed talks and posters. All manuscripts were reviewed by multiple referees.

At the closing session of the conference Robert F. Thorne was presented with an award acknowledging his lifetime of contributions to the phylogenetics, biogeography, and classification of angiosperms.

ACKNOWLEDGMENTS

In addition to the editors, other members of the conference Organizing Committee were Richard Chute, Ann Joslin, Tasha LaDoux, Bob Thorne, and Todd Young. Co-sponsoring societies were the American Society of Plant Taxonomists, Botanical Society of America, and International Association for Plant Taxonomy. Financial support came from the National Science Foundation (DEB-0314259), the W. M. Keck Foundation, VWR International, Epicenter Technologies, and Brad Blaine.

Many others contributed to the success of the conference, including the participants; Anna Bell as chief organizer; staff, students, research associates, and volunteers at Rancho Santa Ana Botanic Garden; session organizers; banquet speaker Bob Schmidt; session moderators; student projectionists; field trip leaders; Doug McCulloh and staff at Geographics; Karen Wilson; Linda Worlow; Ontario Convention Center; The Huntington Botanical Gardens; and the Claremont and Pasadena Chambers of Commerce.

Production of this volume was made possible through the commitment and many contributions of *Aliso* Editor-in-Chief Vanessa Ashworth and Technical Editors Linda Worlow and Carol Annable. Bob Thorne kindly proofread a number of manuscripts and the index. Reviewers of manuscripts are listed on p. 661. Allen Press (in particular Keith Parsons), Geographics, and the Columbia Indexing Group helped guide us through the process of publishing a work of this scale. We thank Patrick Larkin, Executive Director of Rancho Santa Ana Botanic Garden, for his steadfast support.
