Technology and Innovation Management

**Analysis of
the New Zealand Plastics Industry —
Technology Status, Problems and Opportunities**

A thesis presented in partial fulfilment of the requirements
for the degree of Master of Technology in Production
Technology at Massey University

Xiaoping Pan

1994

Abstract

The aim of this thesis is to evaluate the status of innovation and technology management in the New Zealand plastics industry using a survey.

This thesis provides a comparison of plastics manufacturing capability in New Zealand and in other industrial countries; it also provides an examination of key trends, attitudes and problems within the New Zealand plastics industry to indicate where technology transfer from overseas, or research and development may be required.

Acknowledgements

My sincerest thanks to my supervisors Professor Don Barnes and Mr. Lionel Loo for all their guidance, encouragement and friendship during my study.

I would like to thank Mr. Gordon Smith, Mr. Bryan Wenmouth and Mr. Alan Wright, for their help and care during the course of my study.

My thanks also extend to all staff and postgraduate students in the Department of Production Technology for their assistance and friendship.

I am grateful to Plastics Institute of New Zealand (PINZ) for giving the support and also acknowledge the contribution of all the plastics companies to this project.

Finally, I would like to express my thanks to my wife, Liangli Kong, for her love, encouragement, and my family for their moral support.

Table of Contents

Chapter 1

Introduction1

Chapter 2

**The Importance of Technology and Innovation to
Manufacturing Industry**.....4

2.0 Introduction4

2.1 The key elements for achieving competitive advantage4

2.2 Review the change of global trade in manufacturing5

2.3 New Zealand's competitiveness in global market8

2.4 The position of manufacturing in New Zealand's economy9

2.4.1 Definition of manufacturing9

2.4.2 Contribution to real GDP and employment..... 10

2.5 Discussion 12

Chapter 3

Manufacturing Strategy..... 14

3.0 Introduction..... 14

3.1 Literature of manufacturing strategy..... 14

3.2 The definition of manufacturing strategy..... 15

3.3 Benefits of manufacturing strategy 16

3.4 Formulation of a manufacturing strategy..... 18

3.5 Survey results of global manufacturing strategy..... 20

3.6 Survey of New Zealand manufacturing future..... 23

3.6.1 Competitive manufacturing ability 23

3.6.2 The most useful programmes for manufacturing..... 24

3.7 Summary..... 26

Chapter 4

World Class Manufacturing	27
4.0 Introduction.....	27
4.1 Brief review of the changes in manufacturing technology.....	27
4.2 Some major manufacturing technologies	29
4.2.1 Computer integrated manufacturing (CIM)	29
4.2.2 Manufacturing resource planning (MRPII)	31
4.2.3 Just-in-Time (JIT)	33
4.2.4 Total quality management (TQM)	34
4.2.5 Innovation and technology management.....	35

Chapter 5

Brief Review of Plastics Industry	38
5.0 Introduction.....	38
5.1 Constitution of the plastics industry	38
5.2 The situation and condition of plastics industry.....	41
5.2.1 Resin sales in the world.....	41
5.2.2 The recent trend in plastics machinery market.....	45
5.3 Summary.....	47

Chapter 6

Profile of the New Zealand Plastics Industry	48
6.0 Introduction.....	48
6.1 Background.....	48
6.2 Questionnaire.....	48
6.3 Samples.....	50
6.4 Company type and personnel percentage	51
6.5 linkages.....	53
6.6 Investment in technology.....	54
6.7 Product group statistics	57
6.8 Average percentage of markets.....	58

Chapter 7

Key Issues in the New Zealand Plastics Industry	60
7.0 Introduction.....	60
7.1 Major problems	60

7.2	Problem solution.....	63
7.2.1	People skills	63
7.2.2	Keeping up with technology	65
7.3	The critical technology changes.....	66
7.4	Tool and die making.....	67
7.5	Summary.....	68

Chapter 8

	Assessment of Techniques and Processes	69
8.0	Introduction.....	69
8.1	The importance of techniques and processes.....	70
8.2	The company status of techniques and processes.....	72
8.3	The gap between the importance and the status.....	74
8.4	Further analysis of major techniques.....	77
8.4.1	Injection moulders	77
8.4.2	Extruders	79
8.4.3	Hydraulic moulding presses.....	81
8.4.4	Mixers.....	83
8.4.5	Laminators.....	85
8.4.6	Blow moulders	87
8.4.7	Grinders.....	89
8.4.8	Flexible manufacturing systems (FMS).....	91
8.4.9	Robots and automation.....	93
8.4.10	Computer aided design (CAD).....	95
8.4.11	Computer aided manufacturing (CAM)	97
8.4.12	Computer integrated manufacturing (CIM)	99

Chapter 9

	Assessment of the Competitive Characteristics	101
9.0	Introduction.....	101
9.1	Important strategic directions.....	102
9.2	Marketing management.....	105
9.3	Planning, control and appraisal methods.....	107
9.4	Achieving competitive edge	109
9.5	Management and engineering systems.....	112
9.6	Supplier management.....	114
9.7	Recommendation.....	115

Chapter 10	
Conclusion and Recommendation.....	118
References.....	123
Appendix I	
Survey Questionnaire	126
Appendix II	
Comments on the Critical Technology Changes	134
Appendix III	
Comments on the Importance of Tool and Die Making	140
