# **E-Learning and E-Systems to Facilitate Learning from Marked Student Work**

A thesis presented

in partial fulfillment of the requirements

for the degree of Master of Science in Computer Science

at Massey University, Palmerston North, New Zealand

**Jia Yi Lu**

**2006**

## **Abstract**

Heinrich (2004a) first introduced the concept of ‘electronic repositories of marked student work’ and suggested an innovative approach of learning from marked student work. This research project further develops this e-learning approach.

The learning approach was analyzed in the framework of modern educational theories, especially those relevant to formative assessment. Learning activities that mostly suit this new approach were identified. These activities show a large degree of variation in cognitive complexity and learning effectiveness, and according to their characteristics, can be associated with various learning styles. A range of factors that need to be considered in constructing learning processes based on these learning activities were investigated.

The conceptualization of an e-learning environment to support the approach of learning from marked student work was developed. Three major objectives of developing such an e-learning environment were identified. Based on these objectives the general framework of e-learning from marked student work was outlined.

There were very few applications of this approach in teaching practice and no study has been done on its effectiveness in the practical teaching before this research. An initial learning experiment using this approach was carried out. The effectiveness of this approach was evaluated and various aspects associated with this approach were investigated. To fully support this new learning approach, a web-based prototype system named *E-Repositories of Marked Student Work*, was developed.

This research project developed opportunities for student learning and provided guidelines for teaching staff on how to reuse valuable learning resources in their teaching practice in the e-learning context.

## **Acknowledgements**

My first thank goes to my supervisor, Dr Eva Heinrich, who introduced me into this interesting research area of e-learning and guided me throughout the project. I appreciate all the positive encouragement she gave to me and the great patience she had, especially on the stage of writing of this thesis.

I would like to thank Dr Alasdair Noble from Statistics Research and Consulting Centre (SRCC), Massey University, for the professional consultation regarding the design of the anonymous survey.

I am grateful to the staff at Computer Science group, Institute of Information Science and Technology (IIST), Massey University. Especially, I would like to thank Ms Lis Todd, Dr Jens Dietrich and Mr Jun Zhang for their advices and useful discussions.

Finally, my special thank goes to my family, my husband – Fu-Guang and my two wonderful children – Yi Ge and Matthew, for their unconditional support and love.

## **Publications**

Publications related to this research are:

Lu, J.Y, Heinrich, E. & Fung, I. (2005). An Initial Survey on Student Attitudes toward Working with Marked Examples in the E-learning Context. Paper presented at the International Conference on Computers in Education (ICCE2005), Singapore.

# Contents

<b>Chapter 1</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Research background .....	1
1.2	Motivation and research goals .....	3
1.3	Research steps.....	4
1.4	Structure of the thesis .....	5
<b>Chapter 2</b>	<b>Assessment and Learning in Higher Education .....</b>	<b>7</b>
2.1	Assessment in higher education.....	7
2.1.1	Learner-centred and teacher-centred assessment .....	9
2.1.2	Self- and peer-assessment.....	11
2.1.3	Summative and formative assessment.....	12
2.2	Formative assessment and its contribution to learning .....	13
2.2.1	What is formative assessment .....	13
2.2.2	Effectiveness of formative feedback .....	14
2.2.3	Theory of formative assessment.....	15
2.2.4	Formative assessment in learner-centred learning .....	15
2.3	Summary.....	19
<b>Chapter 3</b>	<b>IT Systems Enhancing Assessment and Learning.....</b>	<b>21</b>
3.1	Assessment management systems.....	22
3.2	Systems supporting student work assessing – marking tools .....	23
3.3	Course management systems with assessment management components and communication facilities .....	26
3.4	Web-based systems linking e-learning with self- and peer-assessment.....	27
3.5	Discussion.....	31
3.6	Summary.....	32
<b>Chapter 4</b>	<b>Conceptualization of E-Learning from Marked Student Work.....</b>	<b>33</b>
4.1	Opportunities in learning from marked student work .....	33

4.1.1	Overview of procedure of learning from marked student work .....	34
4.1.2	Learning resources .....	38
4.1.3	Learning activities.....	38
4.1.4	Designing learning processes .....	41
4.1.5	Some example learning processes designed for learner-centred learning 45	
4.2	Developing an e-learning environment to support learning from marked student work .....	47
4.2.1	Objectives of developing an e-learning environment .....	47
4.2.2	Technical requirement analysis .....	50
4.3	The framework of the e-learning environment.....	53
4.4	Summary .....	54

## **Chapter 5     A Learning Experiment ..... 57**

5.1	The learning exercise .....	57
5.1.1	Aims of the learning exercise .....	57
5.1.2	Participants .....	58
5.1.3	Learning topic and resources.....	58
5.1.4	The learning process .....	59
5.1.5	Setting up an e-learning environment for the exercise.....	59
5.2	The survey .....	60
5.3	The results .....	61
5.4	Summary .....	66

## **Chapter 6     Development of E-Repositories of Marked Student Work – a Prototype System..... 69**

6.1	The scope of the prototype system .....	69
6.1.1	User roles.....	69
6.1.2	Functionalities.....	70
6.2	Prototype implementation .....	72
6.2.1	Application model.....	72
6.2.2	Java Server Pages.....	74
6.2.3	Java Class and Java Bean .....	76
6.2.4	Java Database Connectivity Application Programming Interface.....	77

6.2.5	MySQL database server.....	78
6.3	System evaluation .....	81
6.3.1	Learning exercises.....	81
6.3.2	Establishing electronic repositories of marked student work .....	83
6.3.3	Helping teaching staff to design learning processes and monitor student learning .....	84
6.3.4	Supporting student learning from marked student work .....	87
6.3.5	Other management functionalities.....	88
6.4	Summary.....	89
<b>Chapter 7 Conclusions and Future Work.....</b>		<b>91</b>
7.1	Project review .....	91
7.2	Contributions .....	92
7.3	Future work.....	94
<b>Bibliography.....</b>		<b>97</b>
<b>Appendix A Information sheet for the survey .....</b>		<b>107</b>
<b>Appendix B The task for the learning experiment .....</b>		<b>108</b>
<b>Appendix C Survey .....</b>		<b>109</b>
<b>Appendix D Survey Results.....</b>		<b>113</b>
<b>Appendix E Screen Shots from the Prototype System .....</b>		<b>119</b>
	Learning exercise 1.....	119
	Learning exercise 2.....	127

## List of Tables

Table 3.1 Summary of the web based systems that support self- and peer- assessment.....	27
Table 4.1 Cognitive complexity and learning effectiveness of various learning activities.....	42
Table 4.2 The relationships between learning activities and learning styles .....	44
Table 4.3 Forms of formative feedback.....	49
Table 4.4 Technical requirements for different learning activities .....	52
Table 6.1 Main JSPs in <i>E-Repositories of Marked Student Work</i> .....	75
Table 6.2 Java Class/Beans in <i>E-Repositories of Marked Student Work</i> .....	76
Table 6.3 JDBC classes and interfaces used in the prototype system .....	77
Table 6.4 Tables on the MySQL server.....	80
Table 6.5 The learning process for Data Modelling Exercise 1 .....	82
Table 6.6 The learning process for Data Modelling Exercise 2.....	82

## List of Figures

Figure 2.1 Learner-centred assessment process .....	10
