## Journal

08/28/92 New Mexico: ~~Albuquerque~~<sup>Bernalillo Co.</sup>

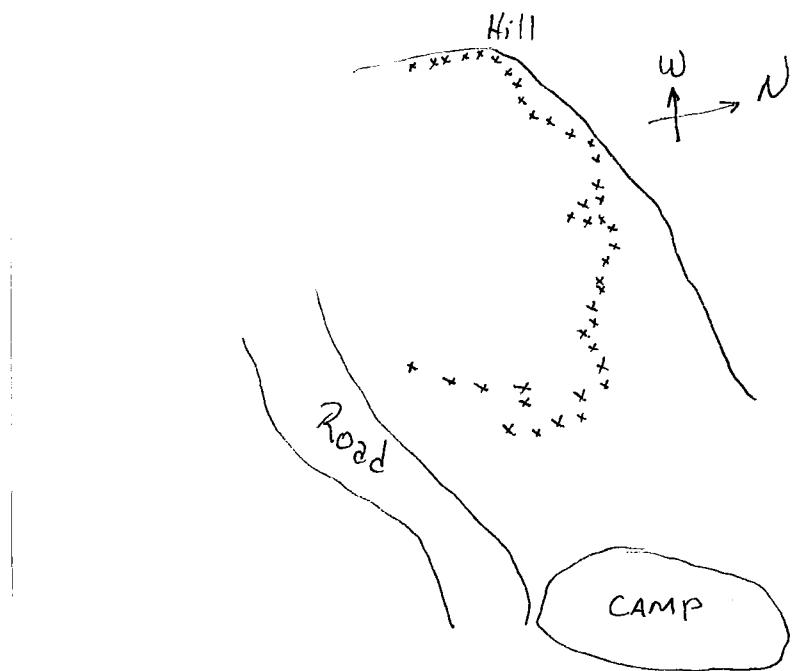

We start the trip at 13:51 heading to Belen road (78418 miles according to the van counter). Belen 14:35 hr. Socorro 15:13 hrs. Then we take right to 60 road for petrol (78494 miles) then we take left (78511) 15:48 hrs. over grass plain at the foot of Magdalena Mountain. starts of National Forest (78518) Juniperus and Piñons trees around the area with grass at the bottom. Trees are getting closer each other. The camp area we are going to stay is 235. We starting to climb (78515) and we saw ponderosa pine. Douglas fir (78516) to the trail 15 and then to the trail 11. 78520 miles we get to the 235 trail. (78522) Dust ~~year~~ tree trail 14. Trail 39 (78523) grassland starts as open areas. We arrive of 78524 miles.

I set 1 line on the west area of the camp 40 traps Sherman baited with oak and chicken staff (corn and sun flower seed) at 6 pm. It was a grassland with rock in the edge of forest At 10pm. I look at my line and I found 3 ~~+~~ mouses; Nicomys mexicana, "Microtis" and Peromyscus. The three of them were caught in the grass area up the hill. The line set with Jennifer Fray, caught 6 mouses and Tom & Susy caught 7 Frosty caught 4 mouses and two pocket gopher out of 6 traps.

08/29/92 New Mexico: Socorro Co.: 4 mi E, 9 mi S, Magdalena

Lat  $33^{\circ}59'25.8''$  N Long.  $107^{\circ}10'53.5''$  W Alt. 3209 m.

At 6 a.m. I review my line and I caught 16 mouses more. The total account was: 1 Peromyscus boylii, 12 Peromyscus maniculatus, 4 Neotoma Mexicana, and 2 microtus mexicanus

Luis P. Solles  
1992

(2)

Jennifer Frey caught 4 Microtus mexicanus, 6 Peromyscus maniculatus, 1 Neotoma mexicana in a pure dry grass from 27 traps.

Tom Collins caught 8 Peromyscus maniculatus, 4 Neotoma mexicana, 2 Microtus mexicanus, and 1 Clethrionomys boyeri in Grass edge and rock place from 40 traps.

Brendon Wolf set 38 traps in a grass land with rocks and trees and he caught 8 Peromyscus maniculatus, 4 Microtus mexicanus.

Stephen Davenport caught 5 Neotoma mexicana, 1 Microtus mexicanus and 4 Peromyscus maniculatus. He set traps in a grass land at the edge of the forest where rocks were.

Mark Watson set his 40 traps around spruce and fir tree where grass and rocks were and he caught 4 Peromyscus maniculatus and 2 Neotoma mexicanus.

Forrest Davis put his line in a  $\pm 60^\circ$  slope in a rocky, grassy land near Ponderosa and he caught 3 Peromyscus maniculatus and 8 Neotoma mexicana out of 40 traps.

Pet Zwartjes put his line in a steep ravine through mixed conifers; rocky in drainage, pine needle cover some downed trees. He set 30 traps and caught 7 Peromyscus maniculatus and 3 Neotoma mexicana.

Guy Herbert set his line in a mixed conifers with 39 traps and he caught 5 Neotoma mexicana, 5 Peromyscus maniculatus and 1 Peromyscus boylii.

Phil Glass set 39 traps in a mixed conifer woodland and caught 7 N. mexicanus and 4 P. maniculatus.

Nat Runyan 10 P. maniculatus and 3 N. mexicanus out of 32 traps

Travis Perry 15 P. maniculatus, 5 N. Mexicanus, and 2 M. Mexicanus out of 30 traps

The total account is 14 N. mexicanus, 90 P. maniculatus, 2 P. boylii, 39 N. mexicanos, 1 C. boyeri 149 mice with 512 t.

( ) Luis M. Lelles Today Michael Yates caught 2 gophers.  
1992

During the morning it was clouded and cool. The sun came out at 2 pm. and it is getting warm. At 3 pm we head up to the mountain where the observatory is with Terry Yates, Jorge Salazar, Michael Yates, Brian Yates and his friend. I set 25 traps up in the hill in a grassland with rocks and 15 traps inside the woodland next to rocks. We put with Terry Yates 8 buckets as pitfalls and 15 Thomas hawks. Terry Yates set 10 traps inside the woodland and Jorge too.

During the night rains starting at 10 pm and didn't stop until dawn.

08/30/92 New Mexico: Socorro Co.: 4 mi E; 9 mi S. Magdalena

At 7 am. we start to see traps. Morning was warm and stop the rain, announcing the start of a good and nice day. I caught 4 N. mexicana, 6 Microtus, 1 P. gratus, 2 P. maniculatus from the 25 traps up the hill and 5 P. maniculatus and 3 N. mexicana from the 15 traps down the hill inside the woodland. The rest of the crew caught:

Jennifer Frey : 27 traps 3 Clethrionomys gapperi, 13 P. maniculatus  
 Forest and Rocks 5 N. mexicanus, 2 P. difficilis, 2 N. mexicana

Stephen Davenport 40 traps 5 N. mexicana  
 Mixed forest grass 7 P. maniculatus

Tom Collins 84 traps 3 C. gapperi, 7 M. mexicanus  
 5 N. mexicana, 12 P. maniculatus

Brian Yates & Eddie Donato 7 N. mexicana, 5 P. boylii  
 6 P. maniculatus 1 P. difficilis

top N. slope Frosty Davis 36 traps 5 N. mexicana 5 P. maniculatus

Joris H. Zelotes  
1992

September 18, 1992 New Mexico, Bernalillo Co Albuquerque

We left Albuquerque at 2<sup>45</sup> towards 40 Road west 56,5 miles away we change to Cubero 104 Road at 3<sup>48</sup> pm until we got to Villa Cubero 2.4 miles more at 4<sup>07</sup> pm. There we found a Motel and gas station where we bought petrol and we left to the right road where a Cubero School notice was 1.5 miles further we touch another left where a notice Cibola 8 country was. On that earthy road we found a rabbit 0.9 miles away and 2.5 miles more we saw a sign Mt Taylor Ranch 3.4 miles further we cross a fence and at 4<sup>30</sup> we got to Mt Taylor Ranch going by Water Canyon road. We saw two Alce (Elk) males and 2 miles further we got to Gutierrez Creek and half a mile further we saw one Alce <sup>(Elk)</sup> and 0,9 miles further 3 Alce more 0,3 miles further we cross another fence to get to UNM field and we arrived at 4<sup>40</sup> to the camp.

I put 60 Sherman traps on top of the hill where the Spruce forest was and finished at 6<sup>20</sup> pm. The following morning after a pretty rough night and a sunny night with the temperature not so cold we went to see the traps. Frosty caught 5 gophers and one snake during the night

September 19, 1992 New Mexico: Valencia Co; Mt Taylor,  
Water Canyon 35°13'33.3"N, 107°33'31.4"W 2695 m.

The result of the Sherman trap collection is as follow:

Mount Taylor. View from the place I set 40 sherman traps. Sept. 18, 1992

Beaver Meadow

(6)

P. Glass, G. Herbert and K. Vanden bosch

they put two mist nests 1 42" and another 52" and  
they caught 1 *Myotis evotis* and 2 *Eptesicus fuscus*

Jennifer Fray set 29 traps and caught

3 *Peromyscus maniculatus*

8 *Microtus longicaudus*

M.L. Watson set 40 traps in meadow/mixed conifer edge

1 *Neotoma mexicana*, 1 *Microtus longicaudus*

1 *Peromyscus maniculatus*

R. Driedmanns set 35 traps in top of Pine forest Hill

and caught 2 *N. mexicana*, 1 *Entomias* sp., 6 *P. maniculatus*

and 5 traps near rocky area and caught

1 *M. longicaudus* and 3 *P. maniculatus*

H. Zelles set 60 traps in top of Spruce Forest

4 *Neotoma*, 1 *Peromyscus* and 1 *Microtus*

E. Palma set 68 traps in top of Spruce Forest

11 *Peromyscus*, 1 *Microtus*, 1 *Neotoma*

and in the rocky area set 20 traps

1 *Microtus* and 1 *Neotoma*.

T. Collins set 38 traps in the Beaver Meadow

1 *Sorex* sp., 3 *Microtus mexicanus*, 3 *Microtus*

*longicaudus* and 1 *Peromyscus maniculatus*.

S.-C. Revoredo set 28 small shermans in Spruce/  
fir edge of Beaver meadow and caught

7 *Microtus longicaudus* and didn't catch

anything in 8 pit falls. set in Beaver Meadow

B. Wolff set 31 in beaver meadow

6 *P. maniculatus* and 1 *Microtus mexicanus*

Natalie and Travis P. 40 traps talus slope 4 *P. maniculatus*  
2 *N. mexicana*

(7)

During the day we were preparing the animals and at six fifty we left the camp toward Albuquerque.

On the way back we saw another elk. We arrived at 8<sup>30</sup> pm. to the UNM parking place.

October 23, 1992 New Mexico: Bernadillo Co; Albuquerque

We start the trip to Sevilleta Biological Station at 2 pm. The crew is form by 16 people. We took the exit 175. *Tadarida brasiliensis* was saw under the overpass.

Then we took Exit 169 to La Jeta State Game Refuge and Sevilleta Field Station about 60 miles from Albuquerque South. We arrived at 3<sup>25</sup> pm.

when we arrive Dr Yates divided the crew into two groups one group will go to Sepultura Canyon to set webs and the other group will set sherman lines in different places.

I was assing to the second group. We took the road I-25 North and the exit 175 East (Bernardo). About 7 miles we made a turn to the right (pole marked 173) and we head south. 2 miles more we made left at a fork and we took a dirtly road heading east, and then half a mile we head south again.

I start a line where pine trees were next to a river bank. I put 80 sherman trap. 40 next to trees and 40 next to the river. see photos of the area.

I place 40 traps at the edge of  
the grass area next to the trees

Same place. At the end of the foresty area  
there is a river bank.

| 54.4 | Right at fork in road heading south                          |
| 60.2 | Continue south at fork in road                               |
| 63.0 | Rocky habitat where Pat Zwartjes & Guy Herbert trapped       |
| 63.2 | Right at fork in road heading southwest                      |
| 66.8 | Open grassland where Phillip Glass and Brendon Wolff trapped |
| 67.0 | Right at fork in arroyo                                      |
| 67.1 | Saccatone Grassland, Los Alamos Canyon. Tamarisk in arroyo   |

## Trap Record

(13)

<u>24 October, 1992</u>	Jennifer. K. Frey	63 Traps	Field Station Lat 34°21'17.3"N Lon 106°53'8.0"W Alt 1533 m	5 Peromyscus eremicus? 5 Neotoma albigena 2 Dipodomys ordii 1 Dipodomys merriami 2 Perognathus flavescens 2 Peromyscus maniculatus
	Suzy. C. Peurach	37 Small Shermans	Saccatone Grassland Los Alamos Canyon Lat 34°18'16.9"N Lon 106°46'48.0"W Alt 1537 m	3 Peromyscus leucopus 2 Reithrodontomys megalotis 3 Sigmodon hispidus? 1 Neotoma albigena
	L. Marcelo. Zalles	80 Traps	Saccatone Grassland Los Alamos Canyon Tamarisk Lat 34°18'16.9"N Lon 106°46'48.0"W Alt 1537 m	10 Peromyscus leucopus 1 Reithrodontomys megalotis 1 Dipodomys ordii 1 Neotoma albigena
	Terry L.. Yates, E. Rudin, Angela Day	9 Tomahawks	Saccatone Grassland, Los Alamos Canyon Lat 34°18'16.9"N Lon 106°46'48.0"W Alt 1537 m	2 Neotoma albigena
	Jorge. Salazar & Scott. L. Gardner	99 Shermans	Saccatone Grassland, Los Alamos Canyon Lat 34°18'16.9"N Lon 106°46'48.0"W Alt 1537 m	4 Dipodomys merriami 2 Neotoma albigena 2 Onychomys leucogaster 6 Peromyscus maniculatus(?)
	Jennifer. Miyashiro, et. al	144 Traps	Sepultura Canyon Web #1 Lat 34°18'17"N Lon 106°36'30"W Alt 1825 m	2 Perognathus flavus 2 Dipodomys merriami 1 Chaetodipus intermedius
	Jennifer Miyashiro, et. al,	144 Traps	Sepultura Canyon Web #2 Lat 34°18'17"N Lon 106°36'30"W Alt 1825 m	1 Onychomys leucogaster 1 Dipodomys ordii 2 Chaetodipus intermedius 1 Neotoma albigena 1 Dipodomys merriami 1 Peromyscus truei
	Jennifer. Miyashiro, et. al.	144 Traps	Sepultura Canyon Web #3 Lat 34°18'17"N Lon 106°36'30"W Alt 1825 m	2 Perognathus flavus 2 Peromyscus leucopus 5 Dipodomys ordii 1 Peromyscus truei 1 Neotoma albigena 1 Dipodomys spectabilis

We went back at 8 pm. and we were waiting for the other crew. They arrived at 10<sup>30</sup> pm.

October 24 1992 Sandstone Grassland.

New Mexico: Bernalillo Co; Los Alamos Canyon

Lat. 34°18'16.9"N Lon 106°46'48.0"W alt 1537 m.

I caught 10 Peromyscus leucopus, 1 Reithrodontomys megalotis, 1 Dipodomys ordii and 1 Neotoma albigula. En el grupo the average from 279 Sherman traps was 19% of capture and Dr. Yate set 9 tomahawks and he caught 2 Neotomas (22.2%).

The other group of Sepultura set 3 webs and caught 24 animals (432 shermans) (5.55% capture).

October 25 1992 Yesterday our group went to the Sepultura

Canyon where the 3 webs were set before. We renew the bite and set the Sherman traps again. During the night was very cold and rain about 4 hours continuously so we think we won't catch many animals. but from the 3 webs (432 shermans) we caught 27 animals (6.25%).

I was working pulling tissues all the time and I start karyotyping too. I did not prepare any animal this time.

When we came back from the field we arrange everything and we came back to Albuquerque.

25 October, 1992
