Statistical First Release

NEET Statistics - Quarterly Brief – Quarter 1 2013

Introduction

This note sets out the available statistics on young people not in education, employment or training (NEET) and young people not in education or training (NET) from three data sources:

i) Participation Statistical First Release (SFR)

These are the authoritative national estimates of NEET and NET rates. They are published annually in the 'Participation in Education, Training and Employment by 16-18 Year Olds in England' SFR. These data are only available annually and cannot be disaggregated to sub-national levels. These were updated in February 2013 to take account of revised 2011 Census data, published by the Office for National Statistics (ONS).

ii) Quarterly Labour Force Survey (LFS)

Analysis of the LFS allows in-year estimates to be made of NEET and NET trends as well as estimates for other age groups, including 16-24, 18-24 and 19-24. The quarterly LFS estimates cannot be directly compared with the headline Participation SFR series which is based on more detailed but less timely data. This LFS data has not yet been reweighted to reflect ONS's revised population estimates based on the 2011 Census. The ONS are due to complete this work in 2014.

The methodology used to produce these data has been revised to ensure harmonisation with the new ONS UK NEET estimates published for the first time today. Further information about this change and the impact on previously released data can be found in the Harmonised NEET Methodology paper available [here](#).

The most recent LFS based estimates for NEET, from Quarter 1 2013, are shown in the following table along with 2011 and 2012 data.

Table: NEET rates for different age cohorts: England Q1 2011 – Q1 2013

	Quarter 1 2011	Quarter 1 2012	Quarter 1 2013	% point change from Q1 2012 to Q1 2013
Age 16	5.2%	6.2%	4.6%	-1.6
Age 17	7.9%	9.0%	6.0%	-3.1*
Age 18	12.2%	13.7%	13.8%	+0.1
Age 16-18	8.4%	9.7%	8.2%	-1.4
Age 19-24	18.6%	18.8%	18.2%	-0.6
Age 16-24	15.4%	15.9%	15.1%	-0.8

Source: Labour Force Survey Quarter 1

* Change is statistically significant

iii) Local Authorities' Client Caseload Information System (CCIS).

CCIS is the database that local authorities use to record the activity of young people aged 16-19 resident in their area. Data can be aggregated to provide estimates for local authorities and regions within England.

The data from all three sources cover England.

Section 1- Trends. Focuses on the key trends in the NEET and NET data series for 16-18 year olds.

Section 2- Methodology and Notes. Explains the methodology used to derive the different series, and gives guidance on their usage.

Section 3- Tables. Contains four tables showing numbers and percentages for the key data series on NET and NEET.

1. Trends

Historical Context

Understanding the historical trends in NEET rates is an important part of placing current performance in perspective. The chart below shows the NEET Participation SFR measure from 1985 along with the LFS NEET measure back to 2000 (the furthest back the LFS methodology can be applied consistently).

Since the fall in the proportion of NEET in the mid-1990s, the 16-18 NEET rate has tended to fluctuate at around 9-10%.

Chart 1: NEET historical series for 16-18 year olds: England, end 1985 - end 2012

Source: Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England' and analysis of Labour Force Survey (LFS).

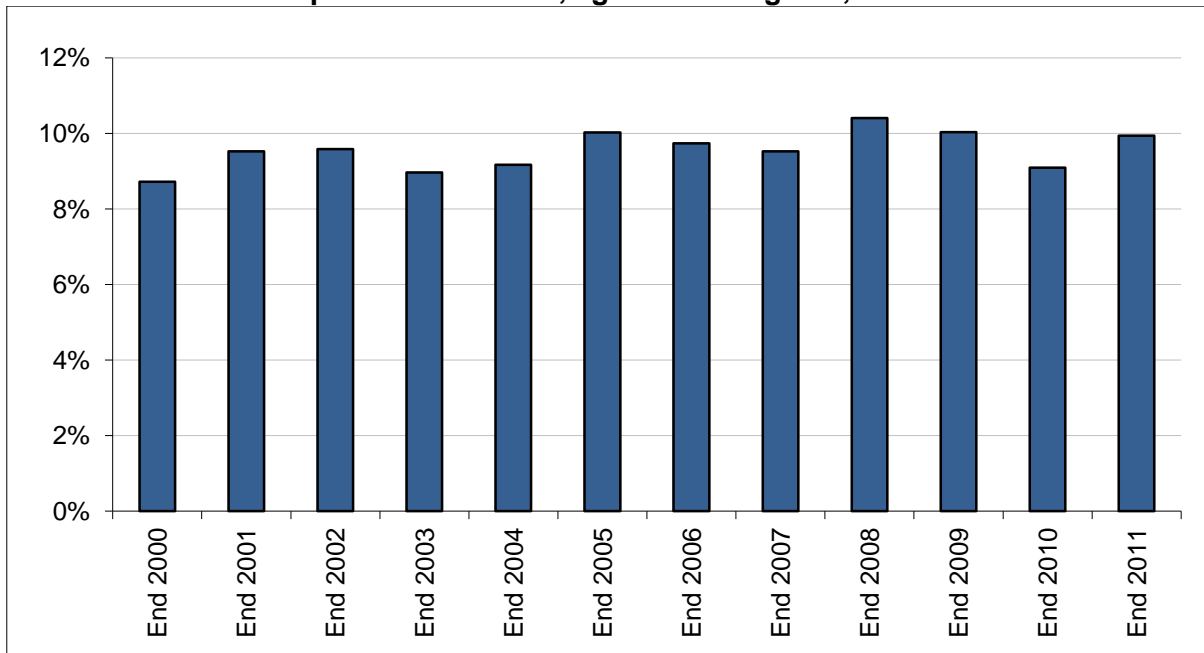

Note: There is a break in the SFR time-series in 1994 due to changes in the source of further and higher education data. The pre-1994 data sources produced slightly higher NEET estimates for 16-18 year olds than later sources.

a. NEET Participation SFR series (last updated February 2013)

The Department's Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England' (link [here](#)) is the primary source of national data on 16-18 year olds NEET.

The latest Participation SFR NEET rate for 16-18 year olds, at end 2011, was 9.9%, a rise of 0.8 percentage points from 9.1% at end 2010. The rise was a result of the employment rate of 16-18 year olds NET falling, despite participation in education and training increasing. Participation in education and training has risen every year since end 2001, from 75.3% to 83.1% at end 2011. However, the impact of increasing participation on the proportion NEET is counter-balanced by a falling employment rate of those 16-18 year olds not in education and training (NET). The employment rate for 16-18 year olds NET over the same period fell from 61.4% to 41.3%.

Chart 2: NEET Participation SFR series, age 16-18: England, end 2000 – end 2011

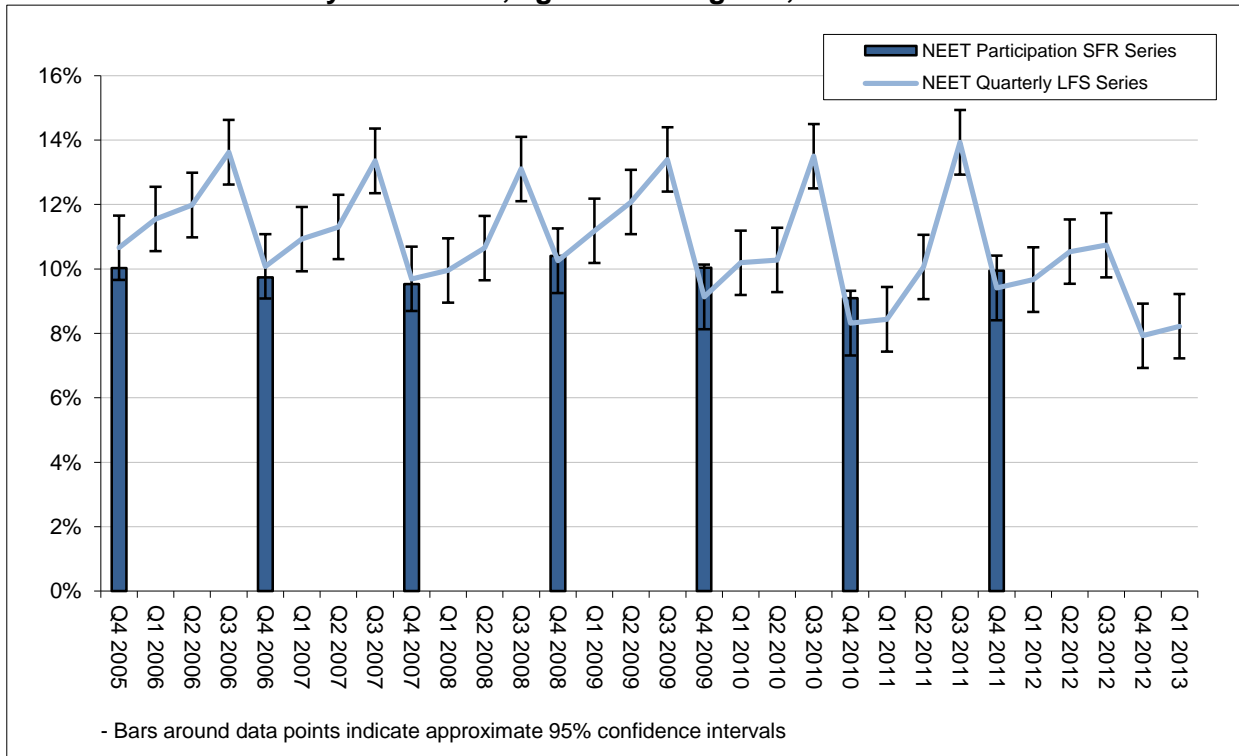

Source: Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England'

b. NEET quarterly LFS series (last updated May 2013)

We can monitor trends in NEET rates between the publications of the Participation SFR series using quarterly LFS data.

The trend data for 16-18 year olds shows seasonal patterns that reflect the academic year: lower rates in autumn (Quarter 4, October to December) followed by a gradual rise in spring and early summer (Quarters 1 & 2, January to June) with a peak in late summer (Quarter 3, July to September).

Chart 3: NEET Quarterly LFS Series, age 16-18: England, Q4 2005 – Q1 2013

Source: Quarterly Labour Force Survey and Participation SFR.
 Note: End 2012 SFR data will be available in June 2013.

The latest data show that the proportion of 16-18 year olds NEET decreased by 1.4 percentage points to 8.2% in the first quarter of 2013, compared to the first quarter of 2012. This decrease was not statistically significant.

This decrease of 1.4 percentage points was driven broadly equally by two factors; an increase in participation in education and training, and an increase in the NET employment rate. The participation rate has risen 1.7 percentage points, from 83.7% in Quarter 1 2012, to 85.3% in Quarter 1 2013. At the same time, the NET employment rate for 16-18 increased by 3.2 percentage points, from 40.8% in Quarter 1 2012, to 43.9% in Quarter 1 2013.

There had been some evidence of increasing seasonality in the NEET data, seen by comparing quarter 4 troughs to the following quarter 3 peak (roughly the same cohort of people). The difference between Quarter 4 2008 and Quarter 3 2009 was 3.1 percentage points; between Quarter 4 2009 and Quarter 3 2010 it was 4.4 percentage points; and between Quarter 4 2010 and Quarter 3 2011 it was 5.6 percentage points. However, the increase between Quarter 4 2011 to Quarter 3 2012 was just 1.3 percentage points.

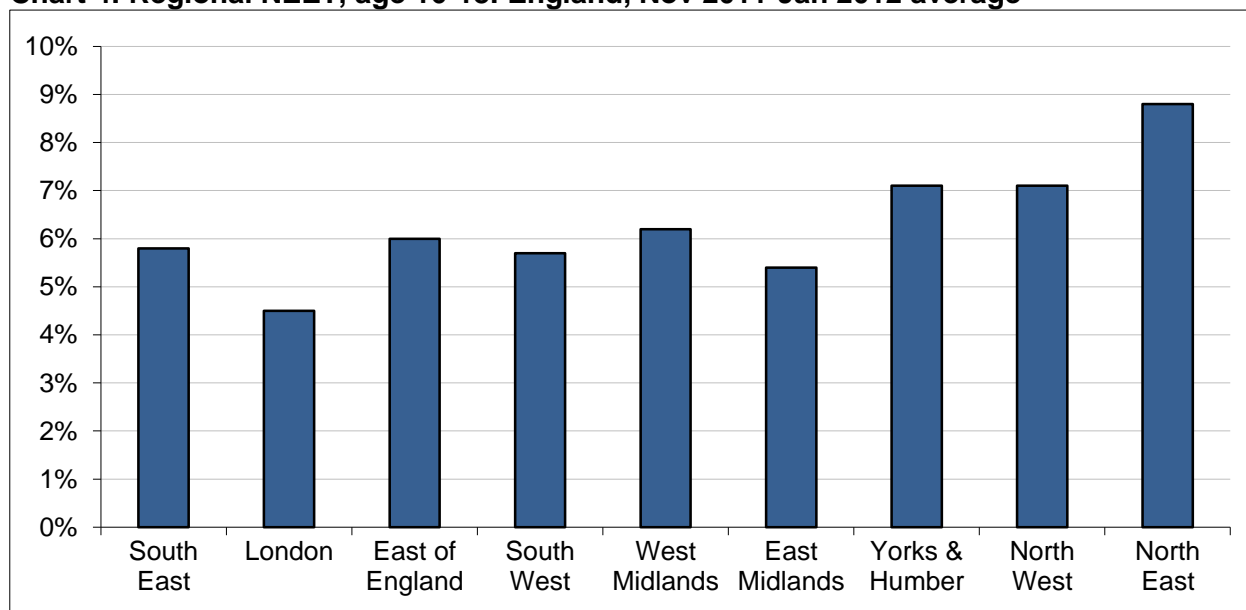

c. Regional NEET (last updated April 2012)

The regional picture on 16-18 NEET is taken from Local Authorities' Client Caseload Information System (CCIS).

CCIS data indicates that the northern regions have higher NEET rates, i.e. Yorkshire and Humberside, North West and North East, within England. In comparison, London and East Midlands have the lowest NEET rates.

Note that CCIS data tend to show a lower percentage NEET than either the Participation SFR or LFS data sources.

Chart 4: Regional NEET, age 16-18: England, Nov 2011-Jan 2012 average

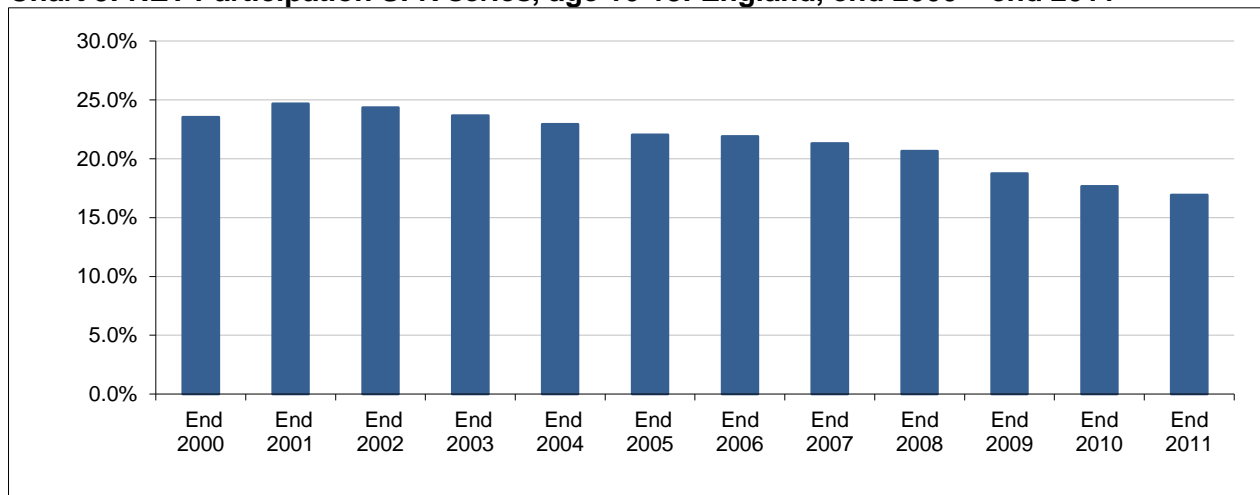

Source: Client Caseload Information System

Note: Local Authority CCIS data are published annually. In addition, regional NEET estimates for 16-24 year olds based on the LFS are now published as supplementary tables alongside this Quarterly Brief. Both publications appear on the DfE website: [Link Here](#).

d. NET Participation SFR series (last updated February 2013)

When examining NEET data, it is also important to contextualise it with data on the proportion of young people not in education or training (NET). These data are also taken from the SFR 'Participation in Education, Training and Employment by 16-18 Year Olds in England'.

Chart 5: NET Participation SFR series, age 16-18: England, end 2000 – end 2011

Source: Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England'

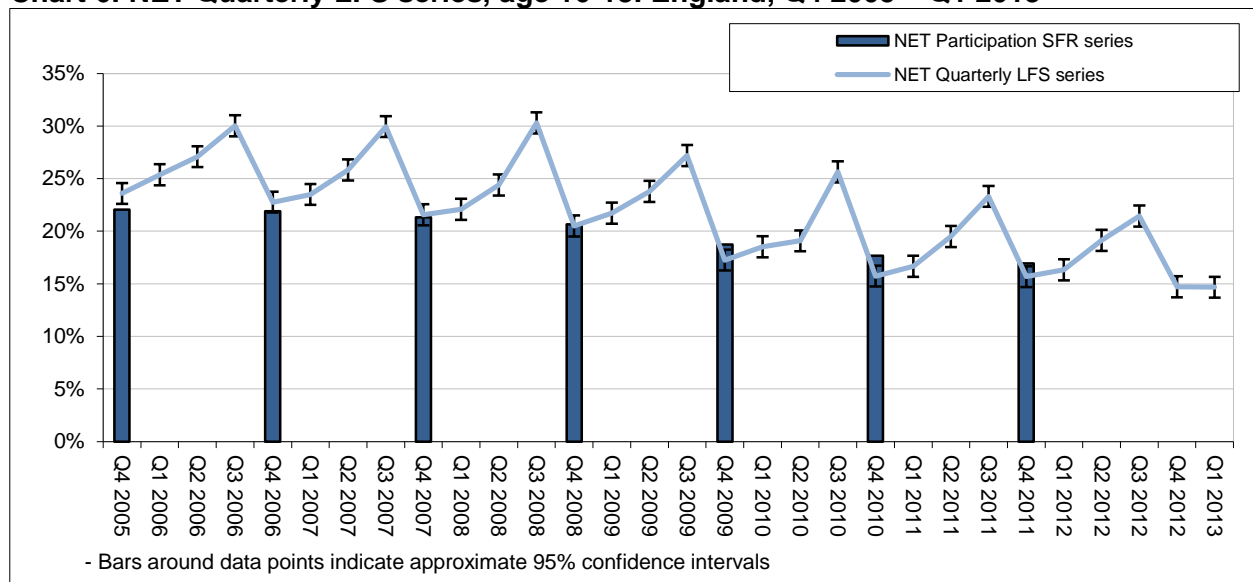

The latest Participation SFR NET rate, for end 2011, was 16.9%. This is the lowest Participation SFR NET rate for 16-18 year olds since consistent records began in 1994, and the tenth successive annual fall since 2001.

e. NET quarterly LFS series (last updated May 2013)

As with the NEET data, we can look at the in-year NET trend data using the quarterly LFS. The NET series shows the same seasonal pattern as the NEET series.

The proportion of 16-18 year olds NET fell by 1.7 percentage points to 14.7% in the first quarter of 2013, compared to 16.3% in the first quarter of 2012. Although this was not statistically significant, it was the lowest quarter 1 rate since consistent records began in 2001, and the proportion NET has steadily decreased, by 11.1 percentage points, since 2005.

Chart 6: NET Quarterly LFS series, age 16-18: England, Q4 2005 – Q1 2013

Source: Quarterly Labour Force Survey and Participation SFR.
 Note: End 2012 SFR data will be available in June 2013.

2. Methodology and Notes

a. NEET and NET Participation SFR series

Description	These data give the definitive measures for 16-18 NEET and NET rates in England.
Uses	These series should be used as the national time series for 16-18 year olds NEET and NET in England. The NET series should be used as context for any NEET data.
Geographical Coverage	England
Age coverage	Academic age 16 to 18
Published source	Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England'
Primary sources	The Schools' Census Pupil Level Annual Schools' Census The Individualised Learner Record (ILR) Higher Education Statistics Agency (HESA). Higher Education Students Early Statistics (HESES) Labour Force Survey Mid-year estimates and projections of population from the Office for National Statistics (ONS)
Last period covered	End 2011
Last published	February 2013 (include revised population estimates based on Census 2011)
Next published	June 2013

b. NEET and NET quarterly LFS series

Description	These series are quarterly estimates of NEET and NET amongst young people from the LFS. They are not directly comparable with the Participation SFR measure. However, these statistics are produced using the same methodology as the ONS UK NEET estimate. Full details are published in a technical specification available here .
Uses	These series provide more timely data on the recent trends in NEET and NET since the last Participation SFR. Trends should be assessed by comparing the current quarter with the same quarter in the previous year to account for seasonal effects. Quarter on quarter changes, i.e. Quarter 4 to Quarter 1, should not be quoted. The NET series should be used as context for any NEET data.
Geographical coverage	England
Age coverage	Academic age 16 to 24
Published source	Quarterly Labour Force Survey
Primary sources	Quarterly Labour Force Survey
Last Period Covered	Quarter 1 2013
Last published	May 2013. Backseries revised to reflect modifications to the NET /NEET derivations. (Does not include revised population estimates based on Census 2011)
Next published	August 2013

c. Regional NEET

Description	<p>This series is a 3 month average snapshot estimate of the regional NEET rate taken from the Local Authority Client Caseload Information System (CCIS) data. It is neither directly comparable with the LFS nor the Participation SFR series due to the use of 'currency' rules. The activity status of young people in education or employment is not actively checked every month, but has a shelf life depending on the type of educational course or the nature of the employment.</p> <p>For young people whose currency is lapsed a historical assumption is made on the proportion NEET, taking into account their previously reported activity.</p> <p>The combination of both factors leads to estimates of NEET in the CCIS data that tend to be lower than those estimated from the LFS or those reported in the annual Participation Statistical First Release (SFR).</p>
Uses	This series shows the data, aggregated in regions, used by Local Authorities to inform local activity and target setting.
Geographical Coverage	England
Age coverage	Academic age 16 to 18 (previously calendar age)
Published source	Management information published on the DfE website as policy data: 16- to 18-year-olds NEET
Primary sources	Client Caseload Information System (CCIS)
Last Period Covered	November 2011 – January 2012 average.
Last published	April 2012
Next published	Due June 2013

d. Scheduled revisions to previously published statistics

Labour Force Survey (LFS) datasets are routinely reweighted in line with population estimates. The most recent update introduced a new weighting variable, PWT11, to LFS datasets from Quarter 3 2009 onwards.

The PWT11 weights do not reflect the most recent population estimates for England and Wales, announced by the Office for National Statistics (ONS) on 16th July 2012. ONS plan to release LFS data (from 2001 onwards) reweighted in line with the 2011 Census, in 2014.

ONS have produced a comparison of the 2011 Census and the LFS labour market indicators which can be found at the following link: <http://www.ons.gov.uk/ons/rel/census/2011-census/key-statistics-for-local-authorities-in-england-and-wales/rpt-labour.html>

In contrast, this Statistical Release reproduces statistics from the DfE '[Participation in Education, Training and Employment by 16-18 Year Olds in England](#)' SFR which rely on mid-year population estimates which have been revised based on the 2011 Census.

e. National Statistics Publication

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

e. Equivalent statistics from the Welsh Assembly Government, Scottish Government and the Office for National Statistics (ONS)

	Welsh Assembly Government (WG)	Scottish Government (SG)	Office for National Statistics (ONS)
Description	1. Annual SFR statistics produced in a method analogous to the DfE annual SFR.	1. Statistics based on the Annual Population Survey (APS).	1. Monthly Labour Force Survey (LFS) statistics for young people not in full-time education and not in employment -Table 14 from the Labour Market Statistics bulletin.
	2. Quarterly Statistics based on the Annual Population Survey (APS). Definition of NEET corresponds to that used in the DfE NEET Quarterly Brief	2. Annual school leaver statistics	2. Quarterly Statistics based on the Labour Force Survey (LFS). Definition of NEET corresponds to that used in the DfE NEET Quarterly Brief.
	3. Pupil destinations based on Careers Wales Survey.	3. Combination of DWP benefits data and school leaver destinations	
Uses	1. Regarded as the definitive measure of headline NEET estimates in Wales.	1. National estimates of NEET.	1. Part of wider labour market statistics; rolling 3-month average both seasonally-adjusted and not seasonally-adjusted; roughly equivalent to NEET but will include some young people in part-time education.
	2. Timely data; regional or single-age estimates based on averaging 3 years of data.	2. Proportion of young people in 'positive destinations'. The complement is roughly equivalent to NEET, but will include some young people in part-time education.	2. UK estimate, seasonally adjusted.
	3. Local area estimates of NEET.	3. Local area estimates of NEET.	
Geographical Coverage	Wales	Scotland	United Kingdom (UK)
Age coverage	Academic age 16-18, 19-24 (SFR); academic age 16-18, 19-24 (APS); interviews in October following Year 11 (Careers Wales)	Actual age 16-19.	Actual age 16-17 and 18-24.
Published source	1. Welsh Government Participation of Young People in Education and the Labour Market, 2010 and 2011 (provisional)	1. Local Area Labour Markets in Scotland: Statistics from the Annual Population Survey 2012	1. Labour Market Statistics - May 2013
	2. Young People Not in Education, Employment or Training (NEET), Year to 31 Dec 2012	2. Summary statistics for attainment, leaver destinations and healthy living, No. 2: 2012 Edition	2. ONS UK NEET, May 2013
	3. Pupil Destinations from Schools in Wales, 2012	3. More Choices More Chances
