*Digital Notebooks - how to provide solutions for researchers*

TU Delft Library  
16<sup>th</sup> March 2018

# Outline

---

- Trial overview
- Background: systems at Cambridge
- ELN and repository integration
- Benefits & challenges
- Next steps
- For discussion: future solutions?

# Trial overview (I)

---

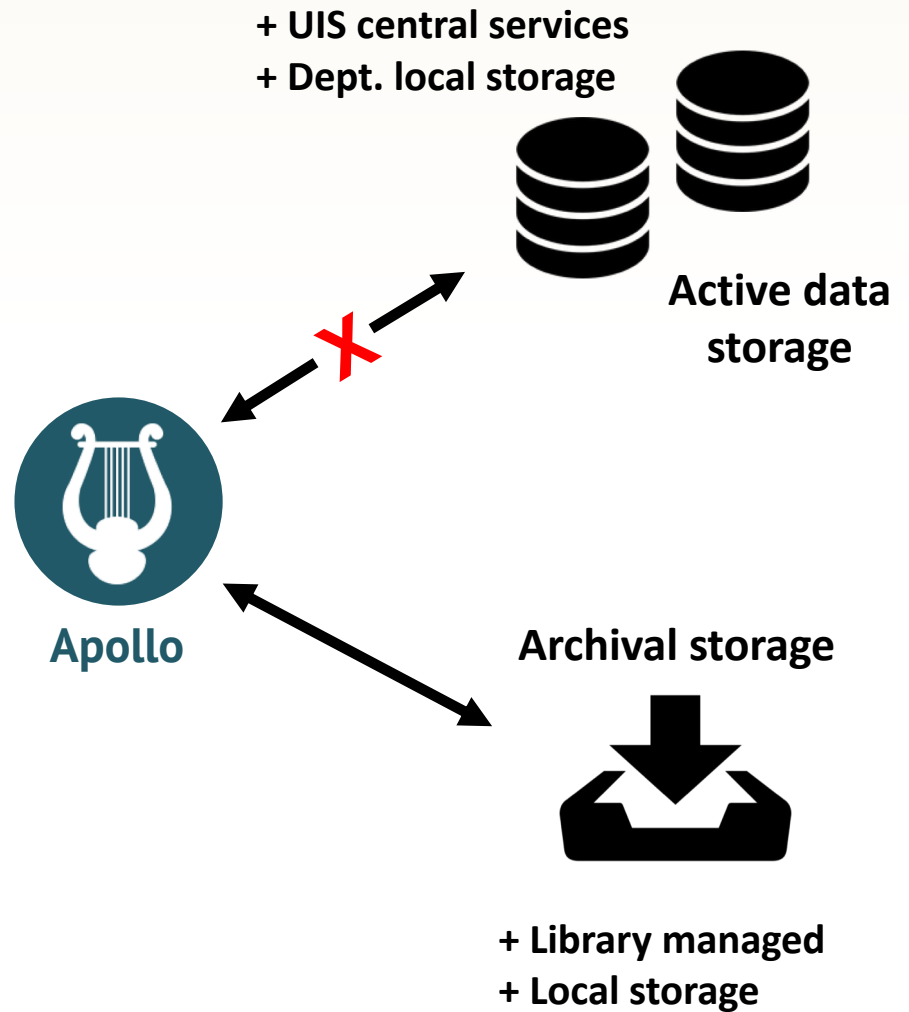

- Exploratory work of main ELN solutions
  - Particular focus on a set of features:
    - Authentication mechanisms
    - Multi-platform and mobile device support
    - **Storage options**
    - **Export options**
    - Licensing models

# Trial overview (II)

---

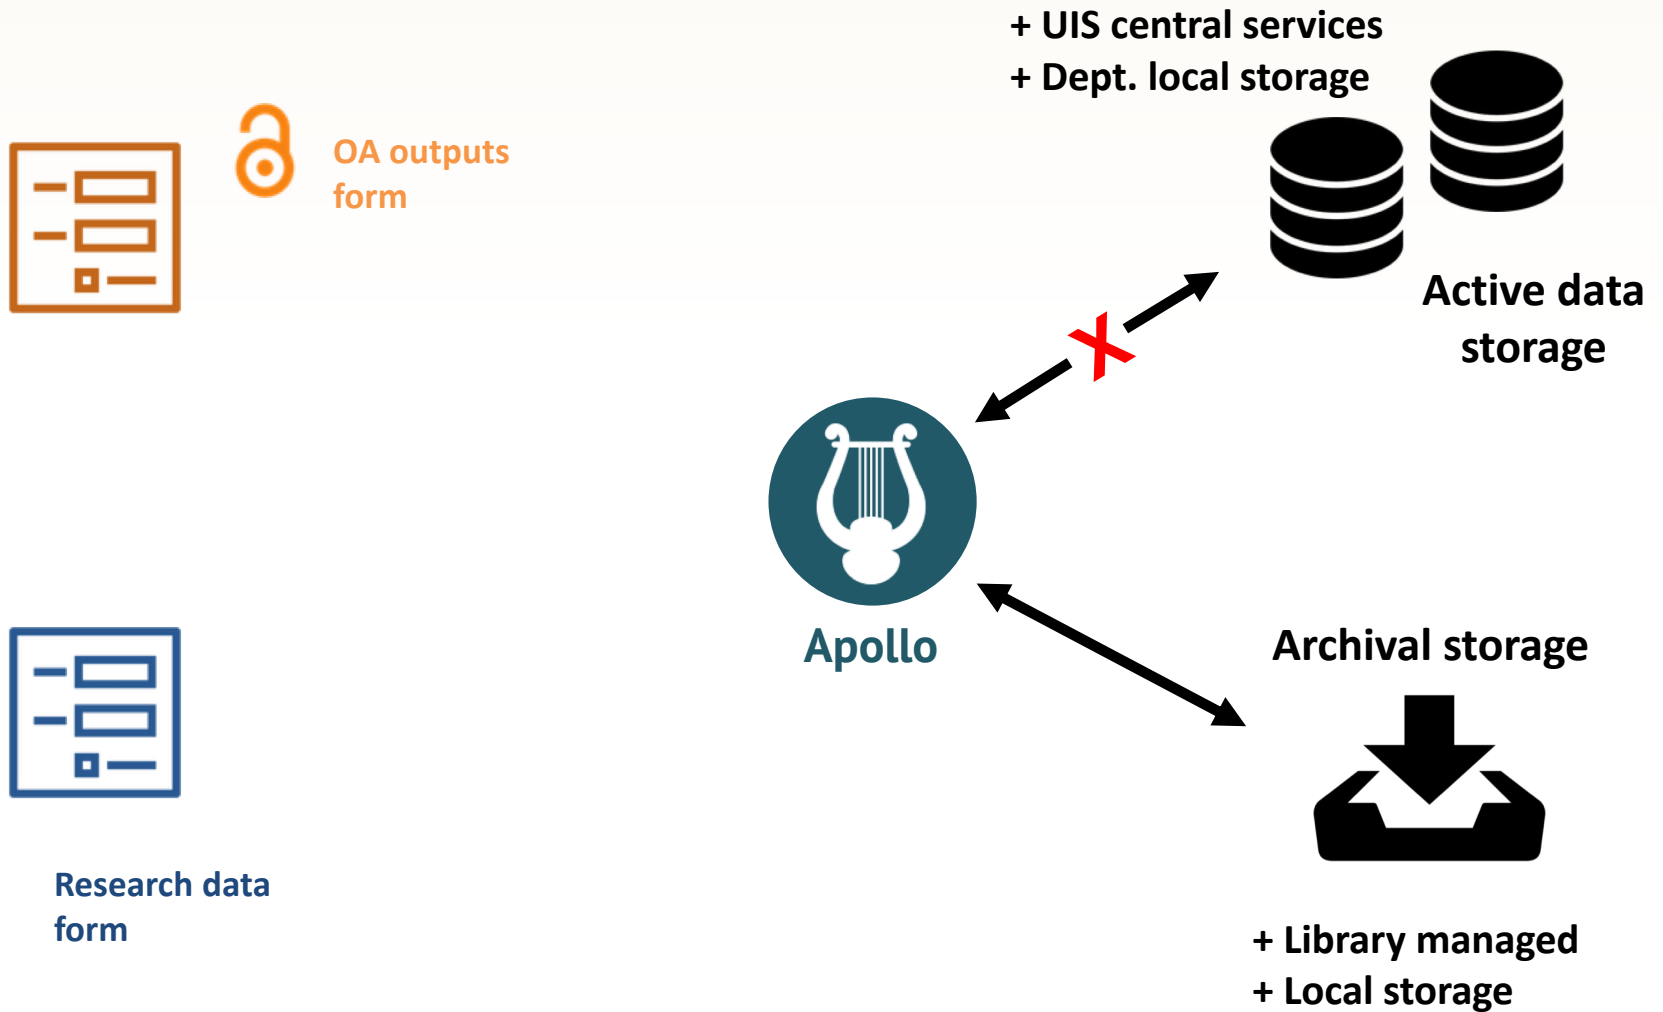

- Four ELN providers were shortlisted
  - LabArchives
  - RSpace
  - Scinote
  - OSF
- Meeting providers and discuss trial participation and product features
  - Focus on export options: integration with repositories

# Background: systems at Cambridge (I)

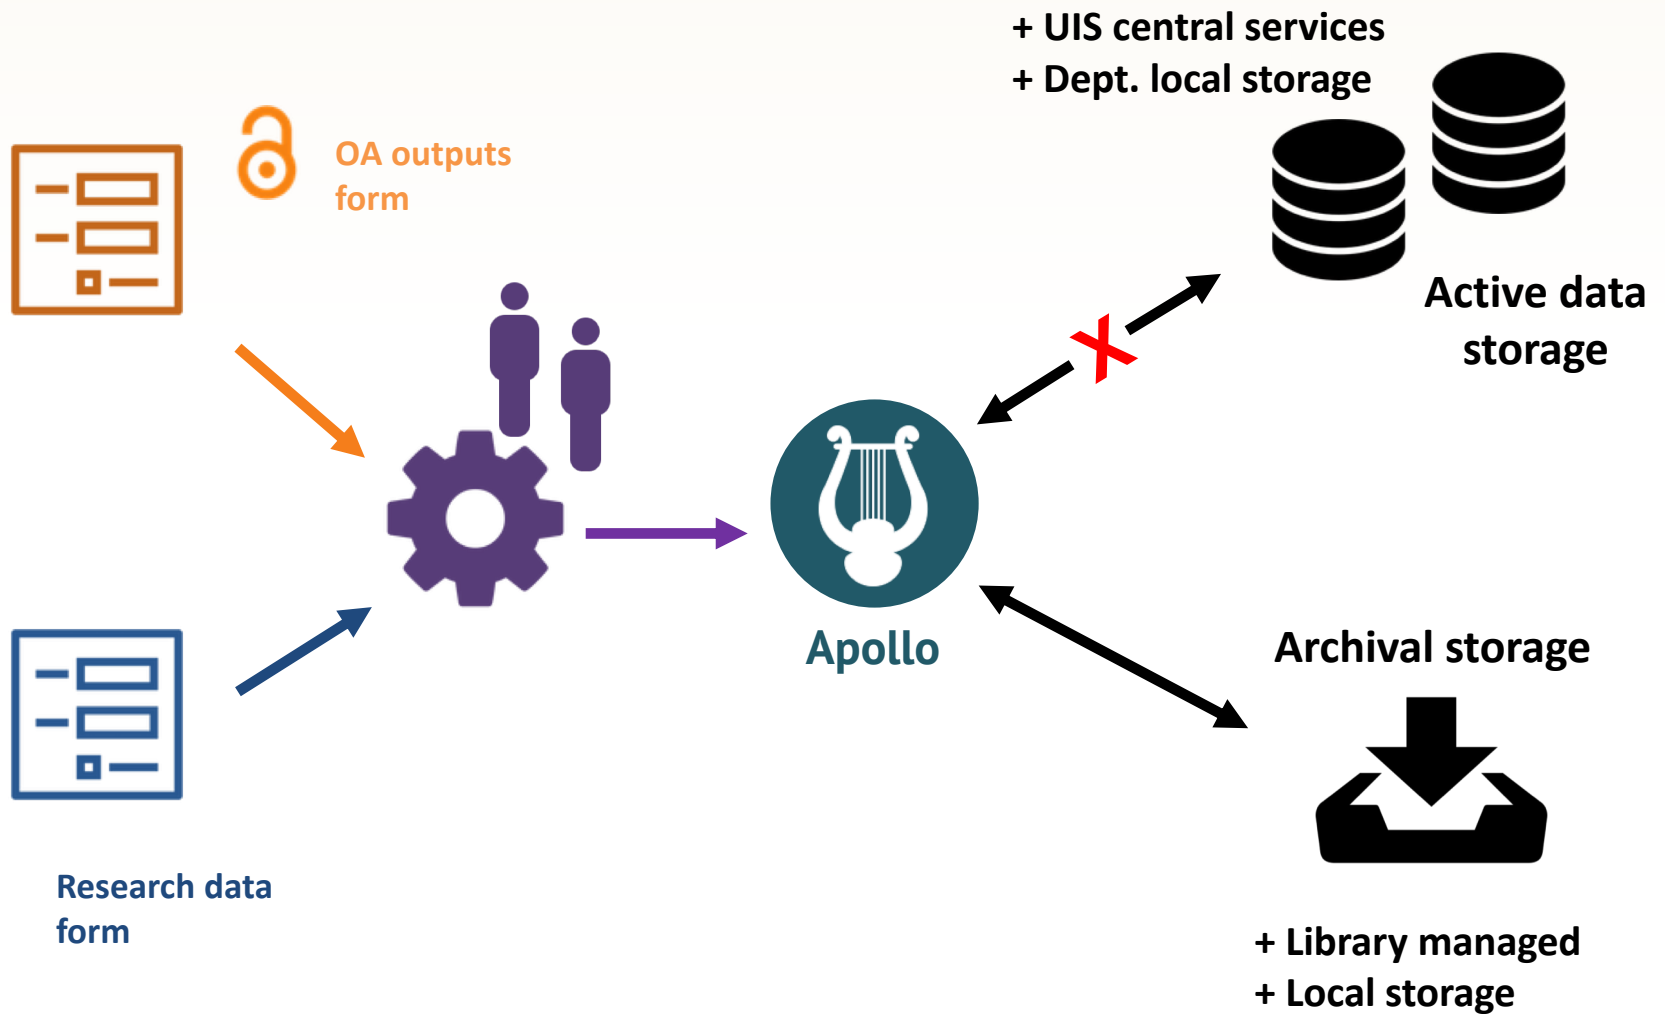

**Prior to repository upgrade: disconnected systems**

# ELN and repository integration

---

Data, file links &  
metadata deposit  
via ELN

Apollo

- **RSpace**
  - Dedicated Cambridge instance (v1.48.0)
  - Shibboleth Single Sign-on
  - Cloud storage
- **Apollo repository**
  - DSpace platform (v5.6)
  - Open-source
  - Local storage
  - Trial “staging” instance

# ELN and repository integration: deposit

---

- The deposit process ...
  1. Users select notebook / files to be exported,
  2. Users provide minimal metadata
  3. Notebook is packaged and sent to the repository
- [Demo](#) time!

# Benefits & challenges

---

## Benefits

- Suppress the need for yet another platform for research data sharing and long-term storage
- Better data curation: datasets are curated during the research process
  - Internal links, underpinning data and documentation are exported

## Challenges

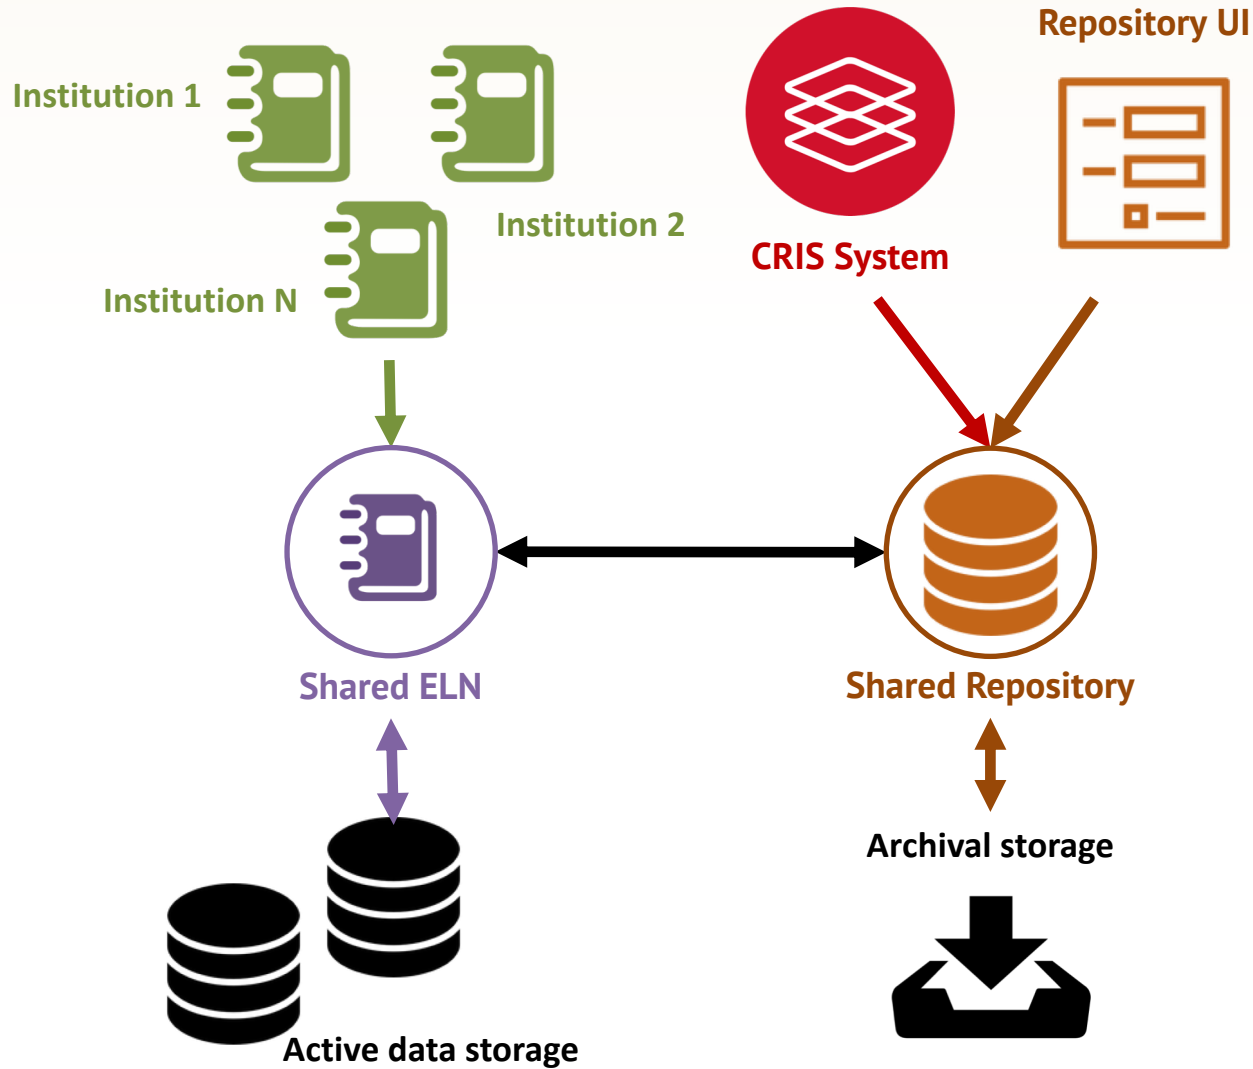

- Coping with large datasets
- De-centralised active data stores
- Preserving the ELN structure in the repository

# Next steps

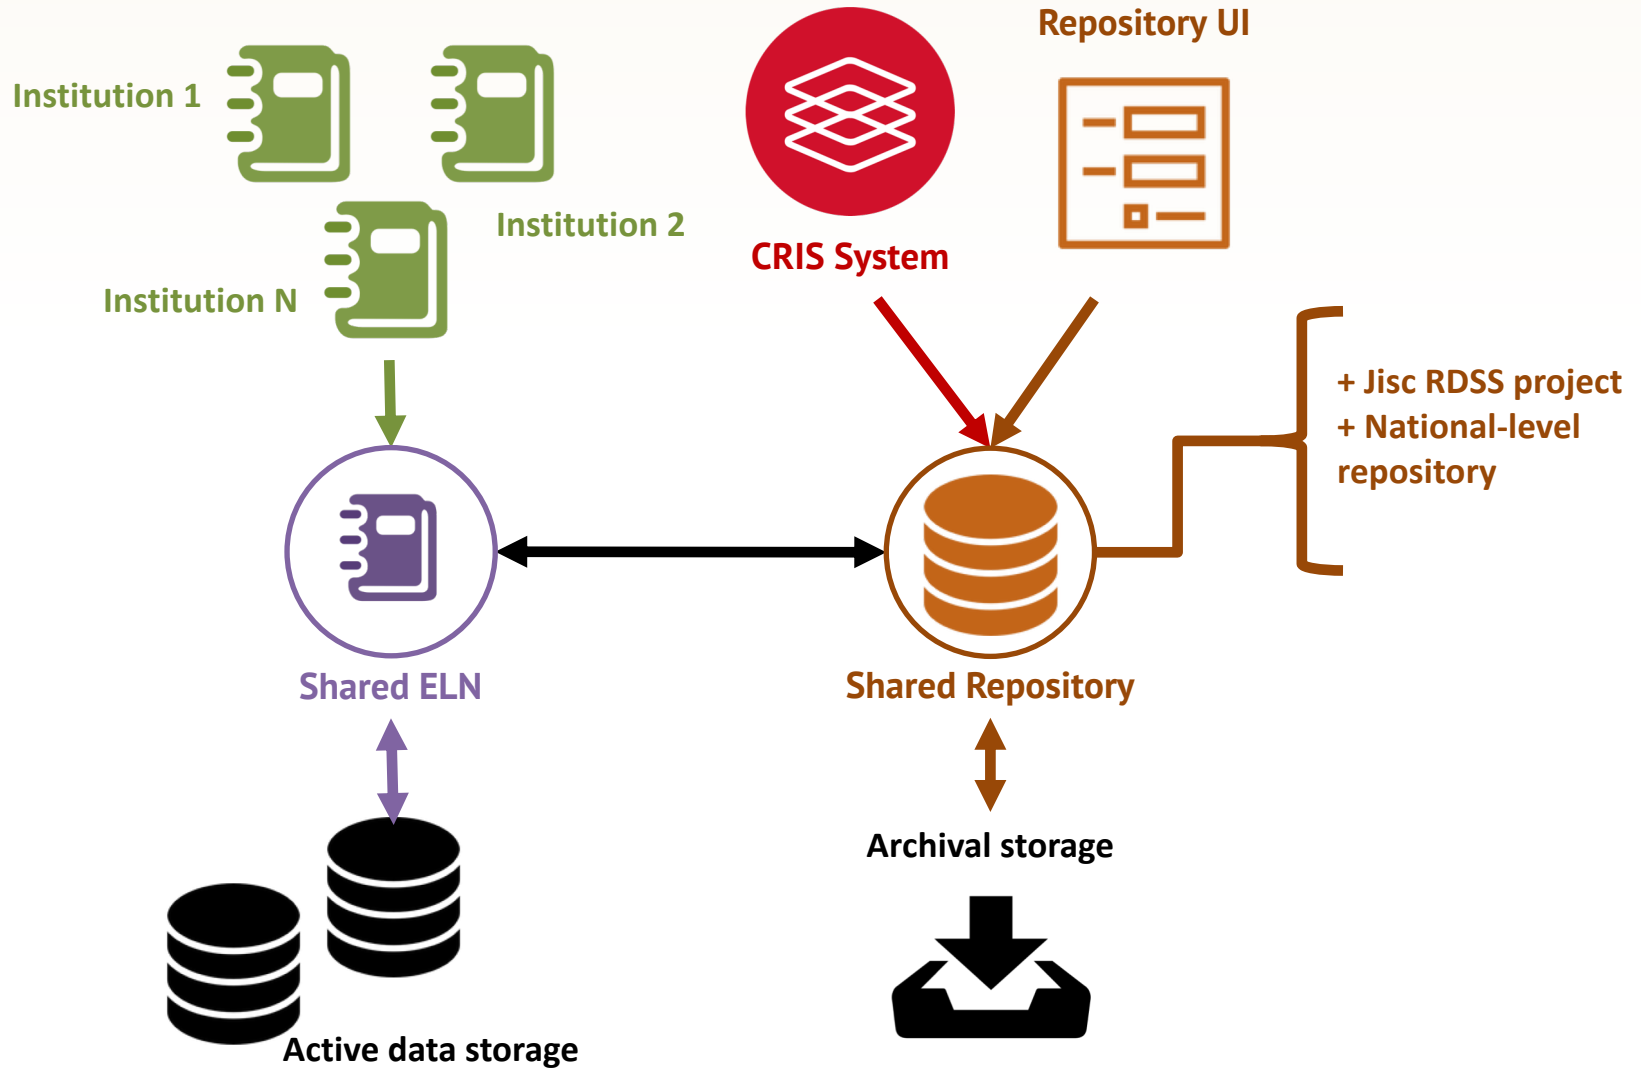

---

- Focus of the integration between active research data and archival data storage
- Develop a pilot with researchers currently using Rspace
  - Research groups currently using the community edition
  - Shown interest in knowing more about repositories
- Jisc Research Data Shared Service (RDSS)

# Future solutions?
