CORRECTION

Open Access

Correction to: A randomized controlled trial of an intervention delivered by mobile phone app instant messaging to increase the acceptability of effective contraception among young people in Tajikistan

Ona McCarthy^{1*}, Irrfan Ahamed¹, Firuza Kulaeva², Ravshan Tokhirov², Salokhiddin Saibov², Marieka Vandewiele³, Sarah Standaert³, Baptiste Leurent⁴, Phil Edwards¹, Melissa Palmer¹ and Caroline Free¹

Correction

After publication of the original article [1], it came to the authors' attention that there is a typo in the Results section. The following section should have read as follows:

Participants' report of physical violence during the study.

Overall, 0.85% (4/470) reported that they experienced physical violence since being in the study (0.41% in the control and 1.32% in the intervention, **Pearson's chi2 $p = 0.28$**).
