

FOR KENYAN KIDS

SERDANG: A group of students from Universiti Putra Malaysia's Faculty of Science and Food Technology has created a product called Vit-A-Go, a mango rich in Vitamin A, aimed at solving the problem of Vitamin A deficiency among Kenyan children. The product has won them the first prize in the "Developing Solutions for Developing Countries" competition held from June 25 to 28 at the Vegas Convention Centre, in the United States. –
