Chair: Associate Professor Ma'rof Redzuan, PhD

Faculty: Human Ecology

The present thesis is an investigation of participation, social capital and farmer's economic empowerment (FEE) in agricultural production cooperatives (APCs) in the rural area in Isfahan Province in Iran. It aims to develop a framework for empowerment to analyze farmer's economic empowerment.

This current thesis begins with an exploration of empowerment and it argues about the concept and philosophy and theories of empowerment. It then builds a conceptual framework of farmer's economic empowerment. Using this framework, three elements of farmer's economic empowerment (FEE) are outlined as follow: enterprise development of farmers, financial assets and marketing strategies. It continues with an explanation of dimensions of participation, subjective and objective participation. Then, it builds a conceptual framework for social capital.

Using this framework, three core elements of social capital are considered as follow: social trust, social relations and social solidarity.

The main survey was conducted during the winter 2010 and spring 2011. Ten agricultural production cooperatives (APCs) have been chosen as samples. All of these APCs have more than 15 years background from date of establishment and have covered 42 villages with 5365 members in rural area in Isfahan Province. In this study, based on Krejcie and Morgan formula, the sample size is 400 farmers who participate in 10 APCs. The primary data has gathered by questionnaires from 400 farmers as the members of mentioned APCs.

The results of the ANOVA test showed that there were significant statistical differences between some demographic variables groups for contributing farmer's economic empowerment. The findings also demonstrate that among seven socio-economic variables, which were studied in current research, education, annual income and cultivated land size were the variables influencing in economic empowerment of farmers. Education had the most impact among this three. It is concluded that education plays an important role in increasing economic empowerment. In the other words among the socio-economic variables, education is the most contributing factor on economic empowerment of farmers.

Results of analyzing of data showed that there was a significant relationship between participation and social capital, as independent variables and farmer's economic empowerment (FEE) as dependent variable ($p=.00$, & $p=.00$).

Three proxies of social capital and two proxies of participation were measured in this study, among which social trust appeared as the contributing factor or key function of economic empowerment. It was the most significant social capital variable which contributed to the level of overall economic empowerment of members of APCs. Objective participation, subjective participation and social solidarity were also found to be the key factors in enhancing the farmer's economic empowerment. It is concluded that social trust and social solidarity as two dimensions of social capital and participation are positively affecting on economic empowerment of farmers in agricultural production cooperatives in Isfahan Province in Iran.

Abstrak Tesis dikemukakan kepada Senat Universiti Putra Malaysia sebagai memenuhi keperluan untuk ijazah Doktor Falsafah

**PENYERTAAN, MODAL SOSIAL DAN PEMERKASAAN EKONOMI KALANGAN
PETANI DALAM KOPERASI PENGELUARAN PERTANIAN DI DAERAH ISFAHAN,
IRAN**

Tesis ini merupakan satu penyelidikan terhadap penyertaan, modal sosial dan pemerksaan ekonomi petani (FEE) dalam koperasi pengeluaran pertanian (APCs) di kawasan luar bandar di daerah Isfahan di Iran. Ia bertujuan untuk mereka bentuk satu rangka kerja pemerksaan bagi menganalisa pemerksaan ekonomi petani.

Tesis ini dimulakan dengan penerokaan terhadap Seterusnya ia menggariskan konsep dan falsafah pemerksaan dan membahaskan mengenai teori pemerksaan. Ia kemudiannya membina rangka kerja konsep pemerksaan ekonomi petani. menggunakan rangka kerja ini, tiga elemen memperksakan ekonomi petani (FEE) digariskan seperti berikut: pembangunan perusahaan petani, aset kewangan dan strategi pemasaran.

modal sosial dan membina kerangka konsep bagi modal sosial. Menggunakan rangka kerja ini, tiga elemen teras modal sosial adalah seperti berikut: kepercayaan sosial, perhubungan sosial dan perpaduan sosial. Ini diteruskan dengan penerangan dimensi penyertaan, penyertaan subjektif dan objektif. Kaji selidik telah dijalankan pada musim sejuk 2010 dan musim bunga 2011. Sepuluh koperasi pengeluaran pertanian (APCs) telah dipilih sebagai sampel. Semua APCs telah mempunyai lebih daripada 15 tahun pengalaman daripada tarikh penubuhan dan telah meliputi 42 kampung dengan 5365 ahli di kawasan luar bandar di daerah Isfahan. Dalam kajian ini, berdasarkan formula Krejcie dan Morgan, saiz sampel ialah 400 petani yang menyertai dalam 10 APCs. Data primer telah dikumpul dengan menggunakan soal selidik daripada 400 petani yang menjadi ahli dalam APCs.

Hasil daripada ujian ANOVA menunjukkan bahawa terdapat perbezaan statistik yang signifikan antara beberapa kumpulan pembolehubah demografi dalam menyumbang kepada modal sosial, penyertaan dan pemeraksanaan ekonomi petani. Hasil kajian juga menunjukkan dalam kalangan tujuh pembolehubah sosio-ekonomi yang dikaji dalam kajian ini, hanya pendidikan merupakan pembolehubah yang mempengaruhi ketiga-tiga pembolehubah bersandar. Ini menyimpulkan bahawa pendidikan memainkan peranan yang penting dalam meningkatkan modal sosial, penyertaan dan pemeraksanaan ekonomi.

Keputusan analisis data menunjukkan bahawa terdapat hubungan yang signifikan antara modal sosial dan penyertaan sebagai pembolehubah tidak bersandar dan pemeraksanaan ekonomi petani (FEE) sebagai pembolehubah bersandar ($p=.00$, & $p=.00$).

Tiga proksi modal sosial dan dua proksi penyertaan telah diukur di dalam kajian ini, dimana kepercayaan muncul sebagai faktor penyumbang atau fungsi utama pemerksaan ekonomi. Ia merupakan pembolehubah modal sosial yang paling signifikan yang menyumbang kepada tahap keseluruhan pemerksaan ekonomi ahli APCs.

Penyertaan objektif dan penyertaan subjektif juga didapati menjadi faktor utama dalam pemerksaan ekonomi petani. Dapat disimpulkan bahawa kepercayaan social dan penyertaan secara positifnya mempengaruhi pemerksaan ekonomi petani dalam koperasi pengeluaran pertanian di daerah Isfahan di Iran.

ACKNOWLEDGEMENT

First and foremost, I praise Allah, the almighty for providing me this opportunity and granting me the capability to proceed successfully. Indeed without God's help and will, nothing is accomplished.

I would like to acknowledge the contributions of respondent farmers who had provided the information that was essential for success of this project.

My most sincere appreciation is extended first, to my advisor Assoc. Prof. Dr. Ma'rof Redzuan for his ever ready guidance, support and helpful advice and friendship throughout of my PhD. Program. By having confidence in me, Dr. Ma'rof taught me to have confidence in myself and to this, I am grateful.

I would also like to thank my committee members, Dr. Zahid Emby and Dr. Sarjit for their assistance and diligent review and contributions to make this thesis the best it could be.

I want to express my gratitude and deepest appreciation to my beloved wife, Faezeh, my lover son, Saeid and my lovely sweet daughter, Shakiba for their great patience. We were far from each other with closed hearts during my PhD Program. Actually, without their supports and encouragements, I could not have finished this work; therefore, I am also grateful for my lovely uncle. I can just say thanks for everything and may Allah give them all the best in return.

Not forgotten, my appreciation to my best friends in Malaysia Dr. Seyed Mohammad Hashemi and Dr. Hamid Reza Najj for their supports and knowledge regarding my thesis. I am also grateful to Dr. Ilham Shahamandi, Dr. Mojtaba Mohammadpour, and Dr. Majid Arfaei Moghadam for their friendly assistances and supports.

I would like to express my appreciation to the Chancellor of Kashan University, Dr. Abbas Ketabi and to vice chancellors, and to Dr. Saeid Golabi the former vice chancellor of the University and to Dr. Mohsen Niazi, Dean of Social Sciences Department and all academic members of the department for their supports and helps towards my postgraduate affairs.

I owe my deepest gratitude to one of my best friend in my hometown Mr. Ali Reza Molaghanbari for his knowledge, potentials and capacities. He is a versatile. I am also grateful to Mr. Meysam Navabipour. Both of them support me in this study as much as possible.

Sincere thanks to all my friends and colleagues at Kashan University, especially Hamid Reza Peyvandi, for his kindness and moral support, Mohsen Safavi, Karim Siadat and Mohammad Ahangeryan for their supports.

Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of the project. Dr. Seyyed Javad Sadatinejad (former Chancellor of University of Kashan), Dr. Ebrahim Koochaki, Dr. Naser Tahghighi, Dr. Mohammad Ganji, Dr. Keyvan Torabi, Dr. Abbas Zeraat (Faculty Dean of Human sciences in KU), Dr. Ali Rahimi, Dr. Mohammad Reza Mozdianfard, Dr. Hosein Sattar, Saeid Hallajbashi, Jafar Sayeh Aftabi, Hosein Tovfighi, Abbas Neshastehsaz, Javad Daghigh, Misses. Zahra Ahmadi, Fatima Ansarizadeh,

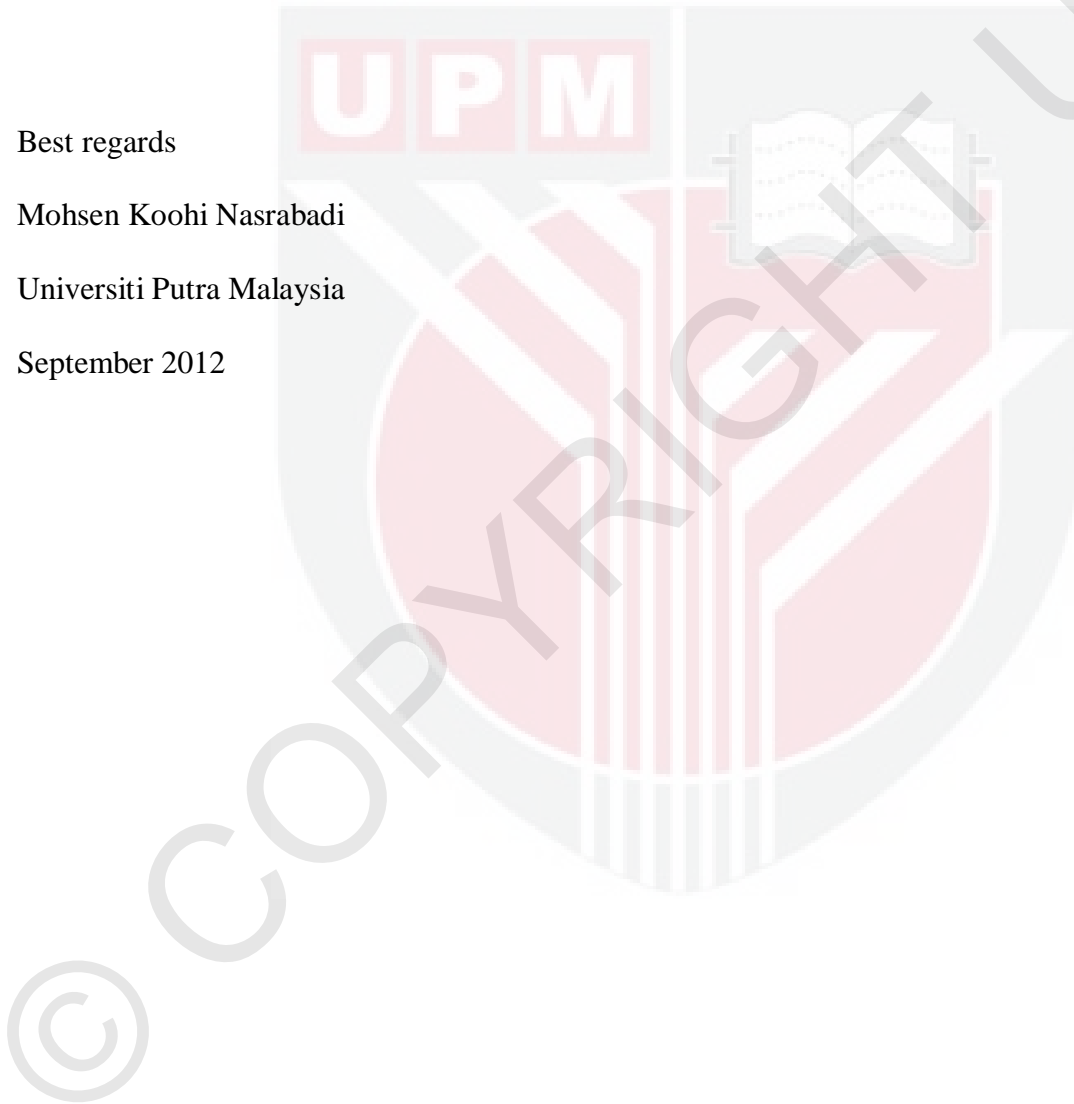

Shahla Mohammadi, Mr. Mohsen Kermani, Ali Mahmudzadeh, and Mohammad Dalal Khorasani, Missis. Firuzeh Keshavarzi, Mr. Reza Ziarati, Mr. Ehsan Ziarati, My brother Islam, My nephews Hosein, Hassan and Abbas Gholami, Mohammad and Mehdi Davoodi, Mohammad Hosein Koochi, Mohammad Reza, Ali and Mohammad Hosein ijadi, Ali Reza Damyar, my best friends Mehdi Bagheri, Ismaeel Koochaki, Ali Ranjkesh, shokrollah, and Hassan Kheradmandi, Missis. Masumeh Koochi, and all individuals whom I've forgotten his/her names.

Best regards

Mohsen Koochi Nasrabadi
