

## **TAMU Project**

**Energy Consumption Data Quality Assurance/Quality  
Control Assessment Report for the  
Month of July 2017**

**Prepared for**

**Utility & Energy Services  
Division of Administration  
Texas A&M University**

**August 2017**

## Acknowledgements

The TAMU energy consumption and data analysis report for the month of July 2017 is a collaborative effort from the personnel of the Utilities & Energy Services, Texas A&M University and the Energy Systems Laboratory, Texas A&M Engineering Experiment Station.

The authors of this report would like to thank Ms. Yasuko Sakurai, Mr. Alec Pointer at the Utilities & Energy Services for providing energy consumption data and valuable information related to the building operation. Ms. Xiaoli Li, Ms. Kimberly Jones, Mr. Hongxiang Fu, and Ms. Alaina Ruffin members of the Building Performance Analytics group in Energy Systems Laboratory contributed to this month report of consumption analysis for TAMU buildings. For information regarding to the TAMU Data Analysis project please contact the Building Performance Analytics Group Leader Dr. Juan-Carlos Baltazar.

## **Executive Summary**

This report analyzes the energy use data collected from 595 meters in 206 buildings and complexes (approximately 20,468,000 GSF) on the campus of Texas A&M University in College Station, Texas. The report consists of five sections: 1) The summary of the monthly energy consumption per meter ID, 2) The quality control and assurance analysis of incorrect or incomplete energy use patterns, 3) Energy consumption time series plots, 4) Energy Balance plots, and 5) Energy Balance plots with filled-in consumption data. Section one contains the summary of monthly energy consumption for each of the TAMU buildings. Section two includes the reviews on each of those building energy use patterns that presented problems in the metered data. Section three and four are a collection of the plots generated for the energy use analysis, as reference to indicate and validate the quality of the metered energy data. The Section five includes the energy balance plots with filled-in energy data.

Figure III-109 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Munnerlyn Astronomy & Space Sciences Engineering during	

the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	234
Figure III-110 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Computing Services Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	234
Figure III-111 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for DPC Annex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	235
Figure III-112 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Beutel Health Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	235
Figure III-113 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heldenfels Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	236
Figure III-114 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Blocker building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	236
Figure III-115 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Clements Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	237
Figure III-116 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Haas Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	237
Figure III-117 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for McFadden Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	238
Figure III-118 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Neeley Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	238
Figure III-119 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Hobby Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	239
Figure III-120 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Wisenbaker Engineering Research Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	239
Figure III-121 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for McNew Laboratory during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	240
Figure III-122 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Soil Testing Labs during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	240

Figure III-123 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Entomology Research Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	241
Figure III-124 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TVMC-Small Animal Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	241
Figure III-125 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Laboratory Animal Care Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	242
Figure III-126 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Vivarium III during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	242
Figure III-127 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Medicine Administration during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	243
Figure III-128 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas Vet Med Diagnostic Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	243
Figure III-129 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Forest Science Laboratory Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	244
Figure III-130 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Small Animal Hospital during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	244
Figure III-131 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Utilities Energy Office Annex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	245
Figure III-132 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Biological Control Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	245
Figure III-133 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Physical Plant Administration & Shops during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	246
Figure III-134 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Anatomic Pathology during the Month of July	

2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	246
Figure III-135 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Large Animal Hospital during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	247
Figure III-136 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	247
Figure III-137 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Buzbee Leadership Learning Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	248
Figure III-138 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for H. Grady Ash, Jr. '58 Leadership Learning Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	248
Figure III-139 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Plank LLC during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	249
Figure III-140 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Ash II LLC during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	249
Figure III-141 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Hullabaloo Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	250
Figure III-142 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - Laundry at the Gardens during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	250
Figure III-143 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens J during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	251
Figure III-144 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens K during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	251
Figure III-145 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens L during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	252

Figure III-146 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens F during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	252
Figure III-147 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens G during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	253
Figure III-148 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens H during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	253
Figure III-149 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens M during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	254
Figure III-150 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens N during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	254
Figure III-151 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens P during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	255
Figure III-152 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens Q during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	255
Figure III-153 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Utilities & Energy Services Business Office during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	256
Figure III-154 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Kleberg Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	256
Figure III-155 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heep Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	257
Figure III-156 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cater-Mattil Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	257
Figure III-157 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Reynolds Medical Sciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	258

Figure III-158 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Rosenthal Meat Science & Technology Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	258
Figure III-159 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Horticulture-Forest Science Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	259
Figure III-160 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Biochemistry-Biophysics Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	259
Figure III-161 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Price Hobgood Ag. Engineering Research Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	260
Figure III-162 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Medical Sciences Library during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	260
Figure III-163 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Wehner Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	261
Figure III-164 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for West Campus Library Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	261
Figure III-165 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Southern Crop Improvement Greenhouse during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	262
Figure III-166 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Borlaug Center for Southern Crop Improvement during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	262
Figure III-167 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TX School of Rural Public Health during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	263
Figure III-168 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Nuclear Magnetic Resonance Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	263
Figure III-169 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Interdisciplinary Life Sciences Building during the Month of	

July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	264
Figure III-170 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture and Life Sciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	264
Figure III-171 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for AgriLife Services Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	265
Figure III-172 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture Public Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	265
Figure III-173 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture Program Visitors Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	266
Figure III-174 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Physical Education Activity Program Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	266
Figure III-175 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Human Clinical Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	267
Figure III-176 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cain Garage during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	267
Figure III-177 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Olsen Field at Bluebell Park during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	268
Figure III-178 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Reed Arena and Cox-McFerrin Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	268
Figure III-179 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cox-McFerrin Center for Aggie Basketball during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	269
Figure III-180 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for West Campus Parking Garage during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX.....	269

Figure III-181 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Student Recreation Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	270
Figure III-182 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 1 and White Creek Apts Activity Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	270
Figure III-183 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 2 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	271
Figure III-184 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 3 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	271
Figure III-185 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Gilchrist TTI Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	272
Figure III-186 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for International Ocean Discovery Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	272
Figure III-187 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Offshore Technology Research Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	273
Figure III-188 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for George Bush Presidential Library & Museum during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	273
Figure III-189 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Allen Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	274
Figure III-190 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Annenberg Presidential Conference Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	274
Figure III-191 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TTI Headquarters during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	275
Figure III-192 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Engineering Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	275

Figure III-193 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for General Services Complex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	276
Figure III-194 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for New TVMDL during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	276
Figure III-195 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Office of the State Chemist Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	277
Figure III-196 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Vet Med Research Bldg Addition during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	277
Figure III-197 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Medicine Building 1, 2, and 3 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	278
Figure III-198 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas Institute for Genomic Medicine during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	278
Figure III-199 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas A&M Institute for Preclinical Studies A during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	279
Figure III-200 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for National Center for Therapeutics Manufacturing during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	279
Figure III-201 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Multi-Species Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	280
Figure III-202 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for NCTM Manufacturing Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX .....	280
Figure IV-1 Emerging Technologies Building TAMU BLDG # 270 Energy Balance Plot during July 2017 .....	282
Figure IV-2 Liberal Arts and Arts & Humanities Building TAMU BLDG # 275 Energy Balance Plot during July 2017 .....	282
Figure IV-3 Wells Residence Hall TAMU BLDG # 290 Energy Balance Plot during July 2017 .....	283

Figure IV-4 Rudder Residence Hall TAMU BLDG # 291 Energy Balance Plot during July 2017.....	283
Figure IV-5 Eppright Residence Hall TAMU BLDG # 292 Energy Balance Plot during July 2017.....	284
Figure IV-6 Appelt Residence Hall TAMU BLDG # 293 Energy Balance Plot during July 2017.....	284
Figure IV-7 Lechner Residence Hall TAMU BLDG # 294 Energy Balance Plot during July 2017.....	285
Figure IV-8 Mitchell Inst. for Fundamental Phys & Astronomy TAMU BLDG # 296 Energy Balance Plot during July 2017 .....	285
Figure IV-9 CE TTI Office & Lab Building TAMU BLDG # 325 Energy Balance Plot during July 2017 .....	286
Figure IV-10 Bright Aerospace Building TAMU BLDG # 353 Energy Balance Plot during July 2017 .....	286
Figure IV-11 Davis Football Player Development Center TAMU BLDG # 358 Energy Balance Plot during July 2017 .....	287
Figure IV-12 Architecture Building B TAMU BLDG # 359 Energy Balance Plot during July 2017.....	287
Figure IV-13 Architecture Building B&C TAMU BLDG # 359 Energy Balance Plot during July 2017 .....	288
Figure IV-14 Bright Football Complex TAMU BLDG # 361 Energy Balance Plot during July 2017.....	288
Figure IV-15 Kyle Field TAMU BLDG # 367 Energy Balance Plot during July 2017 .....	289
Figure IV-16 Chemistry Building Addition TAMU BLDG # 376 Energy Balance Plot during July 2017 .....	289
Figure IV-17 Koldus Building TAMU BLDG # 383 Energy Balance Plot during July 2017 .....	290
Figure IV-18 Sanders Corps of Cadets Center TAMU BLDG # 384 Energy Balance Plot during July 2017 .....	290
Figure IV-19 Jack E. Brown Chemical Engineering Building TAMU BLDG # 386 Energy Balance Plot during July 2017 .....	291
Figure IV-20 Richardson Petroleum Engineering Building TAMU BLDG # 387 Energy Balance Plot during July 2017 .....	291
Figure IV-21 James J. Cain'51 and Mechanical Engineering Office Building TAMU BLDG # 391 Energy Balance Plot during July 2017.....	292
Figure IV-22 Underwood Residence Hall TAMU BLDG # 394 Energy Balance Plot during July 2017 .....	292
Figure IV-23 Langford Architecture Center Building A TAMU BLDG # 398 Energy Balance Plot during July 2017 .....	293
Figure IV-24 Spence Hall Dorm 1 TAMU BLDG # 400 Energy Balance Plot during July 2017 .....	293

Figure IV-25 Spence Hall, Briggs Hall, and Ash II LLC TAMU BLDG # 400 Energy Balance Plot during July 2017 .....	294
Figure IV-26 Kiest Hall Dorm 2 TAMU BLDG # 401 Energy Balance Plot during July 2017 .....	294
Figure IV-27 Kiest Hall, Fountain Hall, and Plank LLC TAMU BLDG # 401 Energy Balance Plot during July 2017 .....	295
Figure IV-28 Briggs Hall Dorm 3 TAMU BLDG # 402 Energy Balance Plot during July 2017 .....	295
Figure IV-29 Fountain Hall Dorm 4 TAMU BLDG # 403 Energy Balance Plot during July 2017 .....	296
Figure IV-30 Gainer Hall Dorm 5 TAMU BLDG # 404 Energy Balance Plot during July 2017 .....	296
Figure IV-31 Gainer Hall, Leonard Hall and Ash LLC TAMU BLDG # 404 Energy Balance Plot during July 2017 .....	297
Figure IV-32 Lacy Hall - Dorm 6 TAMU BLDG # 405 Energy Balance Plot during July 2017 .....	297
Figure IV-33 Lacy Hall - Dorm 6, Harrell Hall and Leadership Learning Center TAMU BLDG # 405 Energy Balance Plot during July 2017.....	298
Figure IV-34 Leonard Hall - Dorm 7 TAMU BLDG # 406 Energy Balance Plot during July 2017.....	298
Figure IV-35 Harrell Hall - Dorm 8 TAMU BLDG # 407 Energy Balance Plot during July 2017.....	299
Figure IV-36 Whitley Hall - Dorm 9 TAMU BLDG # 408 Energy Balance Plot during July 2017.....	299
Figure IV-37 White Hall - Dorm 10 TAMU BLDG # 409 Energy Balance Plot during July 2017.....	300
Figure IV-38 Harrington Hall - Dorm 11 TAMU BLDG # 410 Energy Balance Plot during July 2017 .....	300

## **II. Data Analysis: Energy Use Estimation and Observation**

## II-1 Meters with Missing Energy Consumption Data

During the month of July 2017, 42 meters in 21 buildings and complexes have missing daily data. The missing data have been filled in using consumption models based on the past data if available or using linear interpolation or some sort of average, and the monthly consumption has been estimated with the filled-in daily consumption. Table II-1 is the list of meters with missing data.

Table II-1 Meters with missing data during July 2017

\* Monthly consumption evaluated from the cumulative data is not affected by the missing data.

\*\* See Table II-2 for the estimated consumption.

\*\*\* Consumption is not estimated because reliable consumption model is not available.

NA: Not available

## II-2 Meters with Estimated Consumption for Problematic Data

During the month of July 2017, 48 meters in 33 buildings have estimated daily consumption because the recorded consumption is found to be problematic or questionable. For each of these meters, alternative consumption has been estimated using the best possible method. Table II-2 lists these meters with indications of the days with estimated data. Detailed descriptions for individual cases follow.

Table II-2 Meters with problematic data during July 2017

Table II-2 Meters with problematic data during July 2017 (*Continued*)

Notes: The colored cells means the consumption for the day appears to be problematic. The letter in the colored cell indicates the method for estimation. M: model, F: multiplication factor, L: linear interpolation, A: average, and C: correction of the reset cumulative reading

## Lechner Residence Hall (TAMU Bldg #294)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002285	31	7/1/2017 – 7/31/2017	Model
HHW	002289	31	7/1/2017 – 7/31/2017	Model

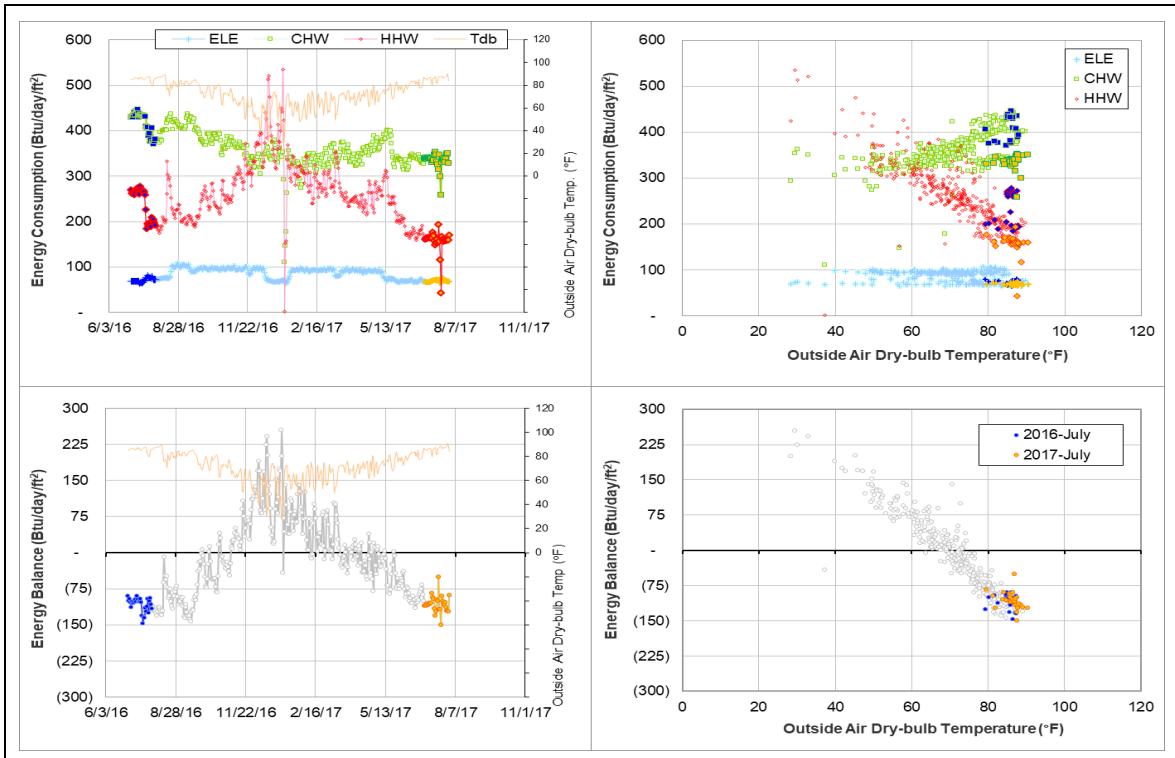

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level is lower than the level during the past year.	5/21/2017 – ongoing
HHW	The consumption level is lower than the level during the past year.	5/26/2017 – ongoing

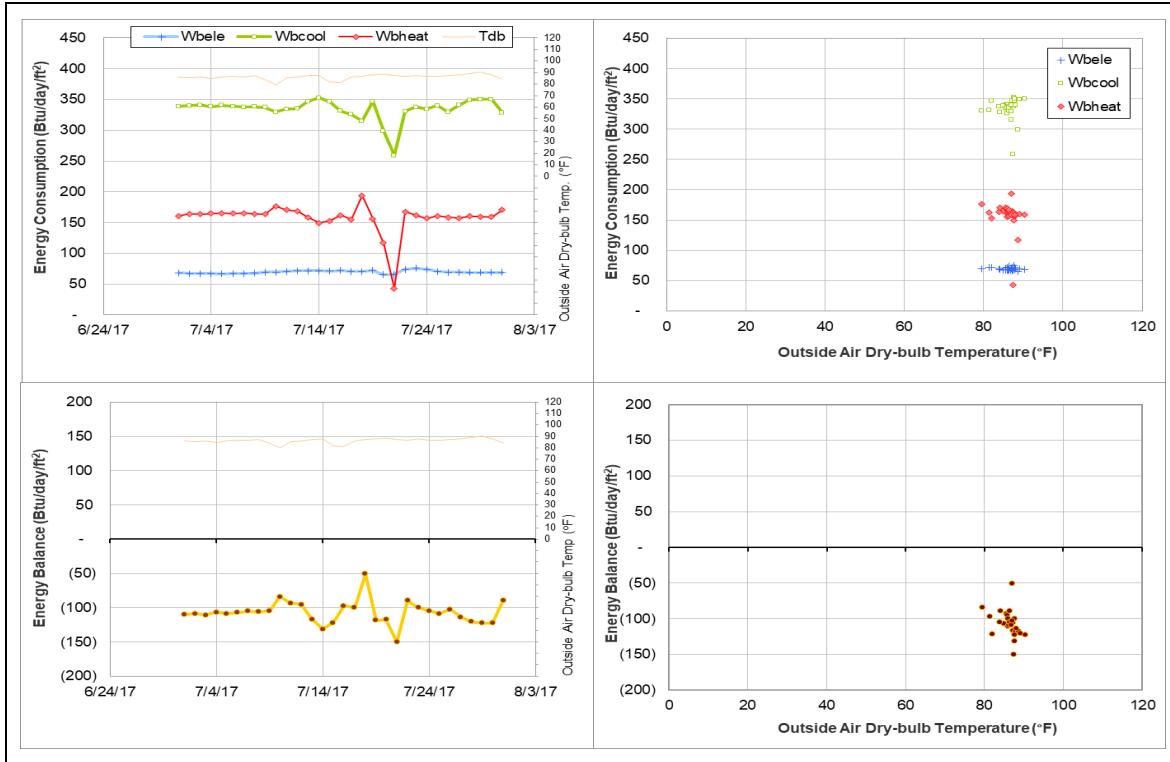

### Quantitative descriptions and comments

The CHW consumption level is about 100 Btu/day/ft<sup>2</sup> lower than the previous year starting around 5/21/2017. The HHW consumption level is also about 100 Btu/day/ft<sup>2</sup> lower than the previous year starting around 5/26/2017. Both CHW and HHW are estimated by model for the whole month.

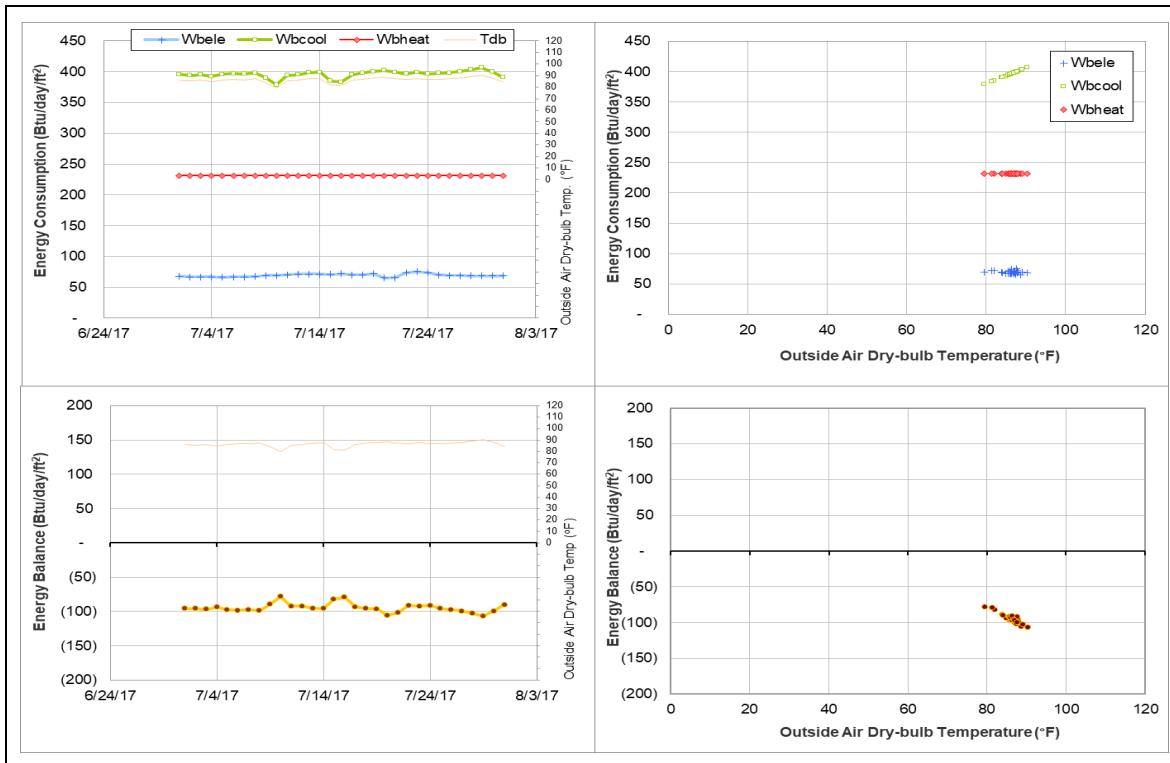

### Explanatory Figure: 13 months energy balance plot with original data.

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## CE TTI Office & Lab Building (TAMU Bldg #325-385)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	009123	31	7/1/2017 – 7/31/2017	Model

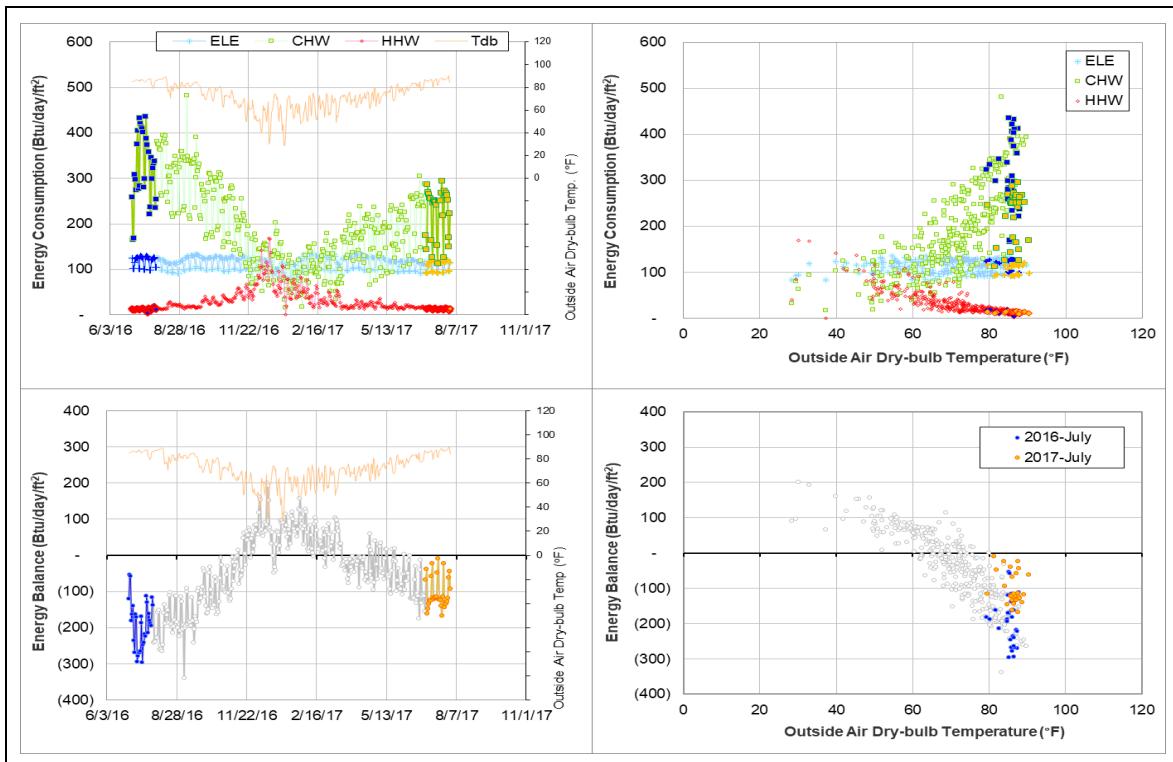

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level is lower than the level during the past year.	1/1/2017 – Ongoing

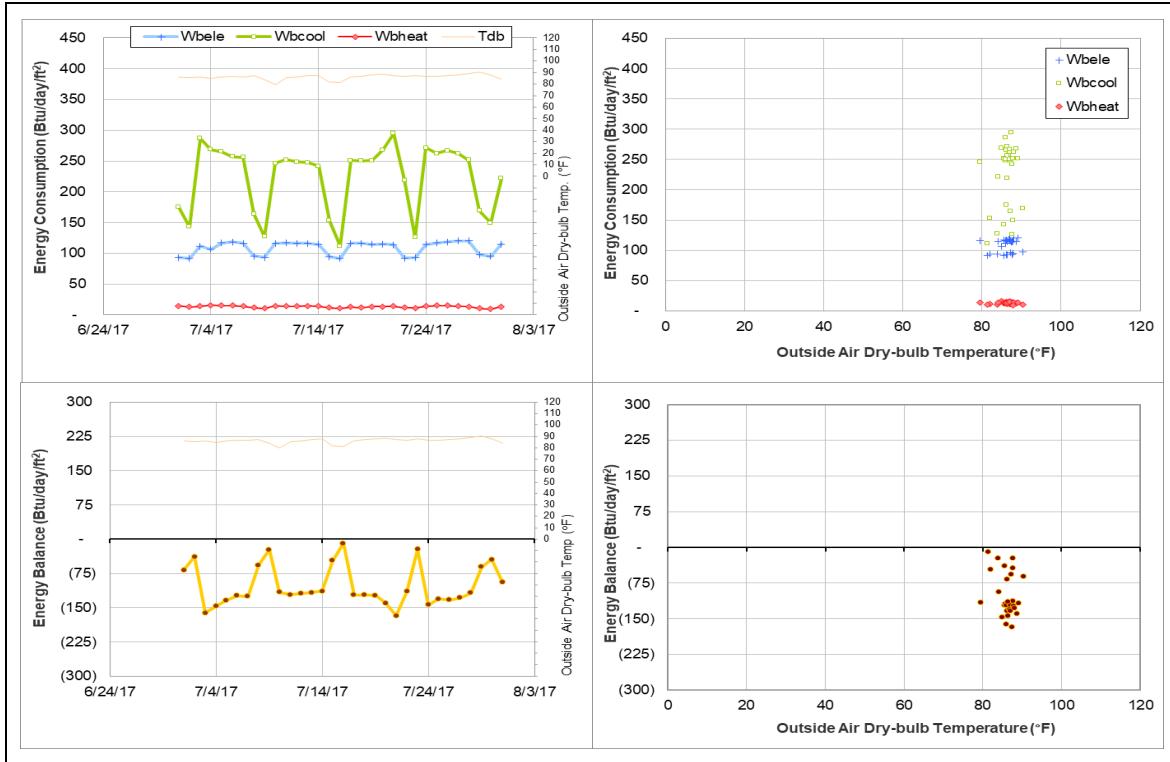

### *Quantitative descriptions and comments*

CHW consumption gradually dropped to a level that is lower than the past year by 50 – 75 Btu/day/ft<sup>2</sup>. No obvious sensor reading behavior anomaly is observed. The whole month is estimated using a model.

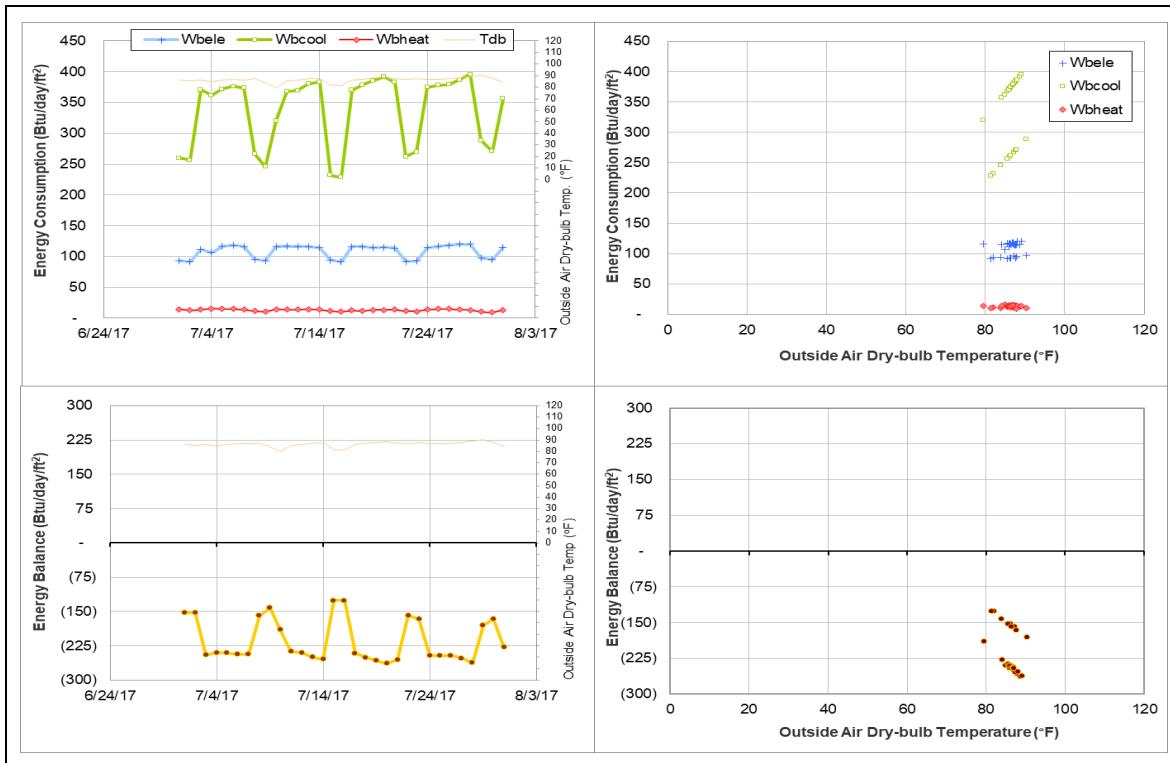

### *Explanatory Figure: 13 months energy balance plot with original data.*

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## Koldus Building (TAMU Bldg #383)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	002874	31	7/1/2017 – 7/31/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
HHW	The metered values appear to be faulty.	3/8/2017, 3/12/2017 – ongoing

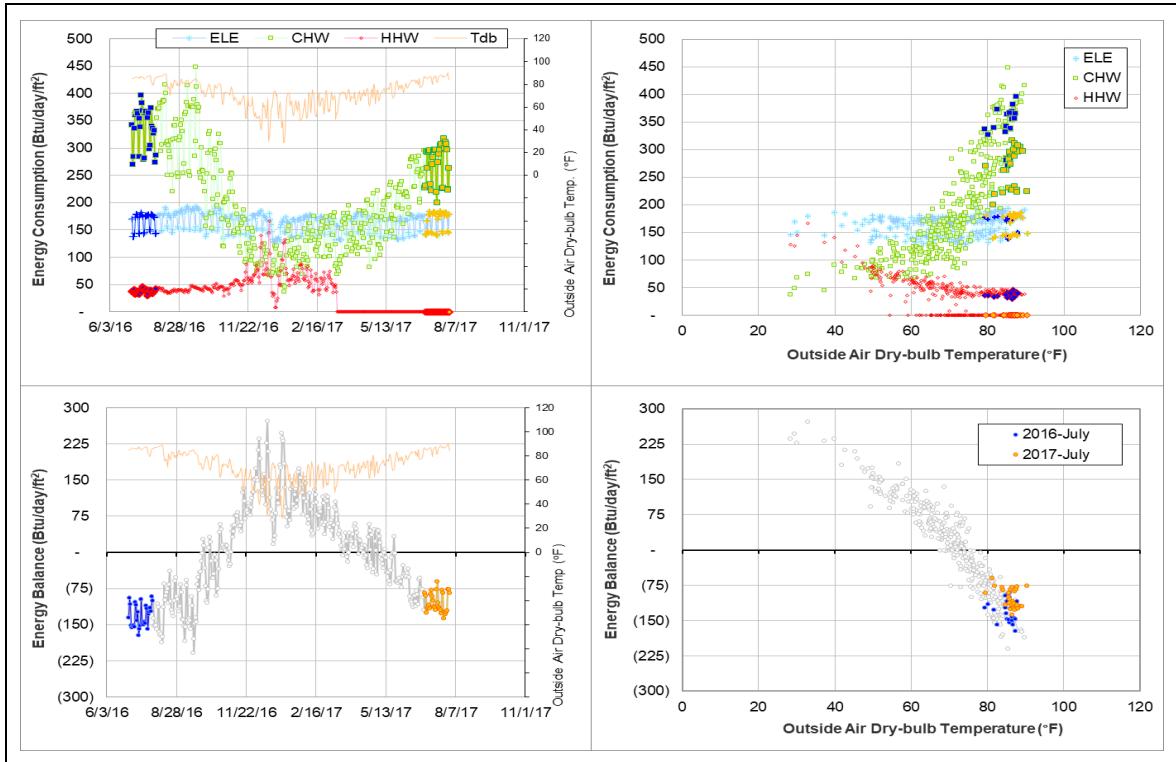

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
HHW	002874	3/8/2017, 3/12/2017 – 7/31/2017	Flow rate	Near zero
		3/14/2017 – 4/13/2017, 4/21/2017 – 4/30/2017	Delta-T	Zero

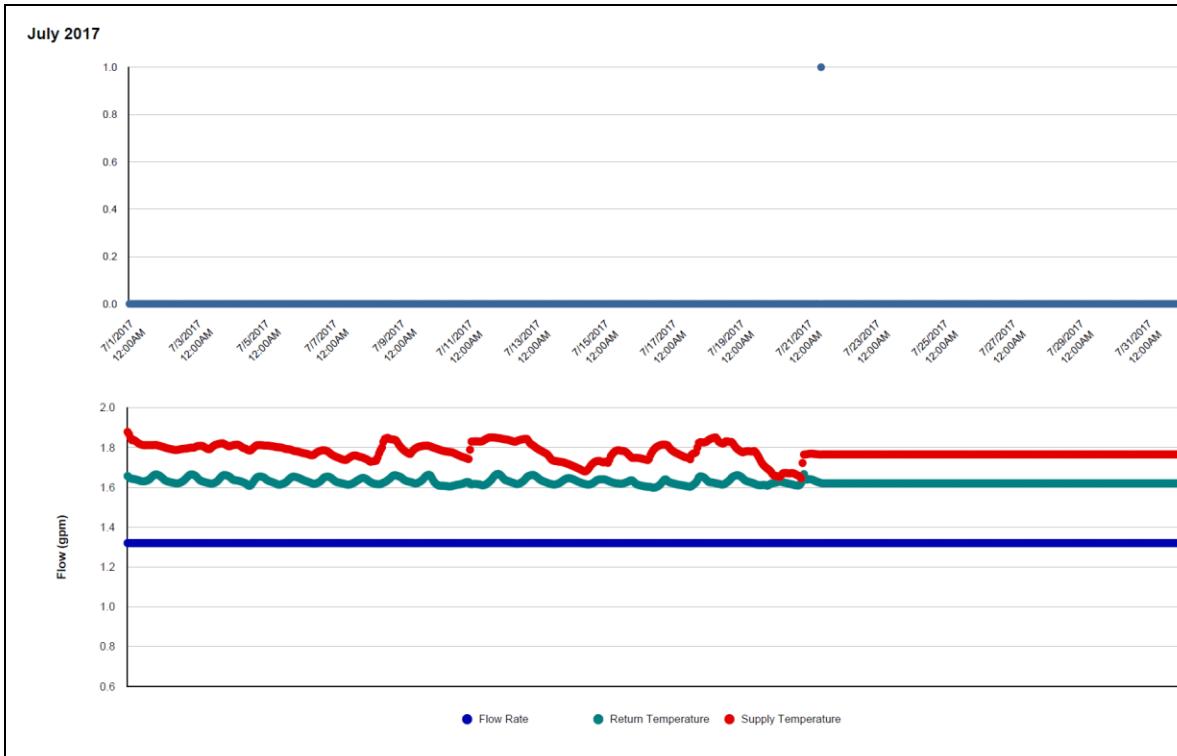

### Quantitative descriptions and comments

The HHW consumption dropped to zero on part of 3/8/2017 as well as 3/12/2017 – 7/31/2017 due to a flow rate near zero. The delta T was zero from 3/14/2017 – 4/13/2017 and 4/21/2017 – 4/30/2017. The consumption was estimated by model for the whole month of July.

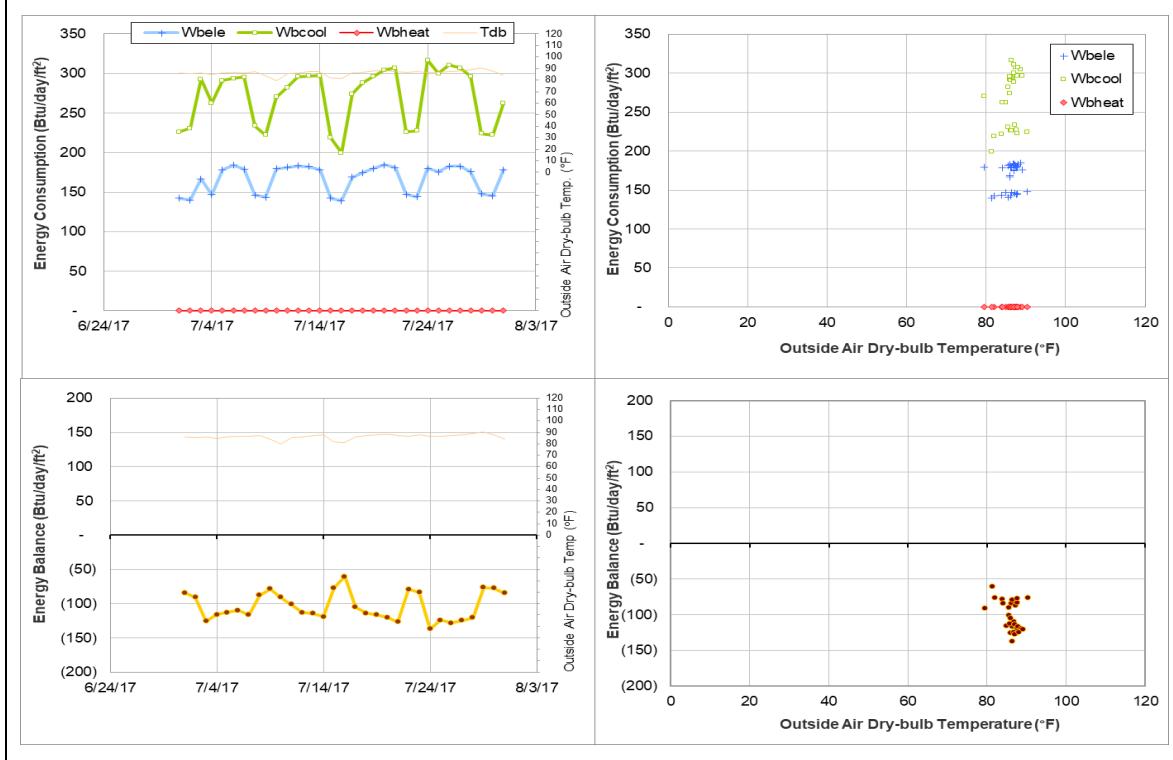

### Explanatory Figure: 13 months energy balance plot with original data.

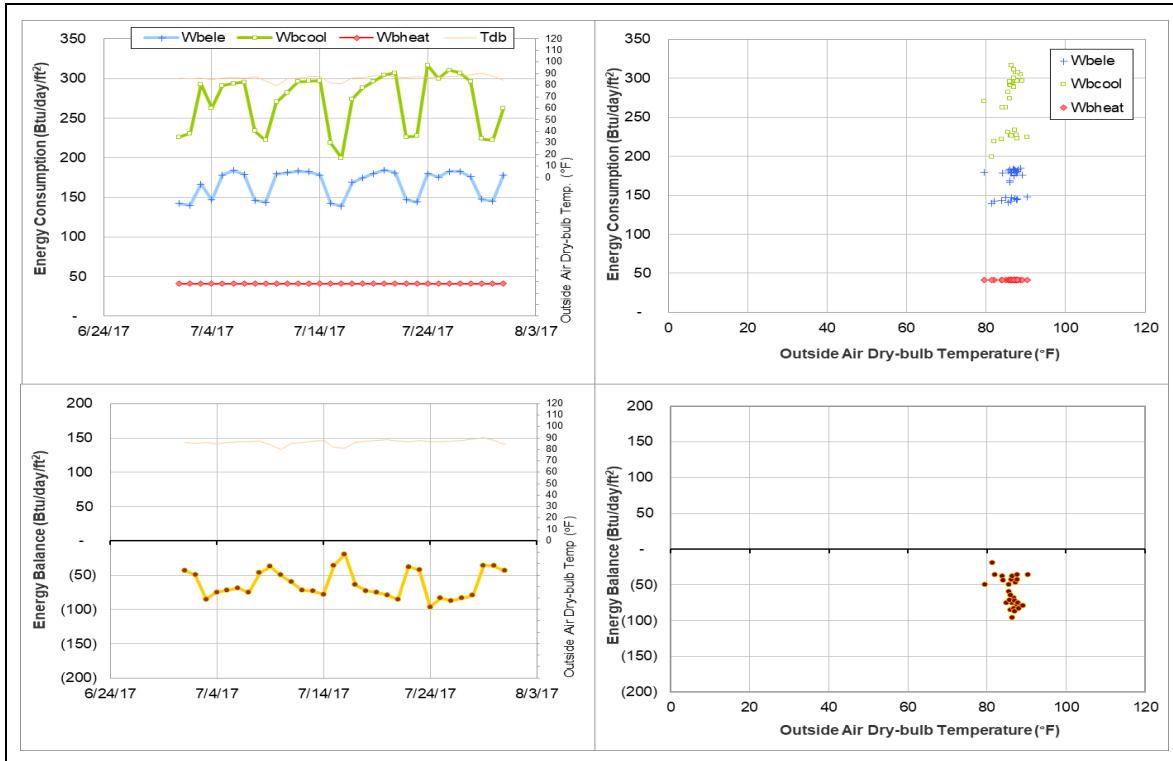

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## Plank LLC (TAMU Bldg #1404)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	009372	17	7/15/2017 – 7/31/2017	Model
HHW	009376	17	7/15/2017 – 7/31/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level is decreasing gradually.	7/15/2017 – 7/31/2017
HHW	The consumption level is decreasing gradually.	7/15/2017 – 7/31/2017

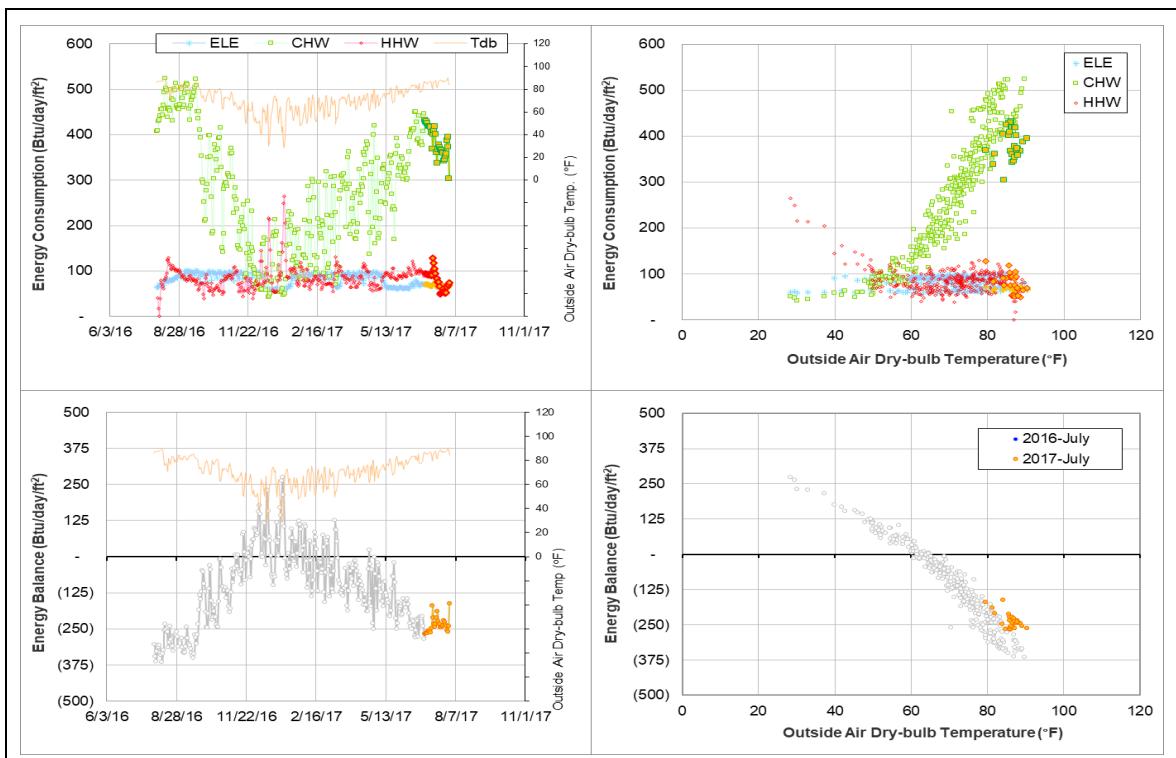

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
CHW	009372	7/15/2017 – 7/31/2017	Flow rate	Decreased
HHW	009376	7/15/2017 – 7/31/2017	Flow rate	Decreased

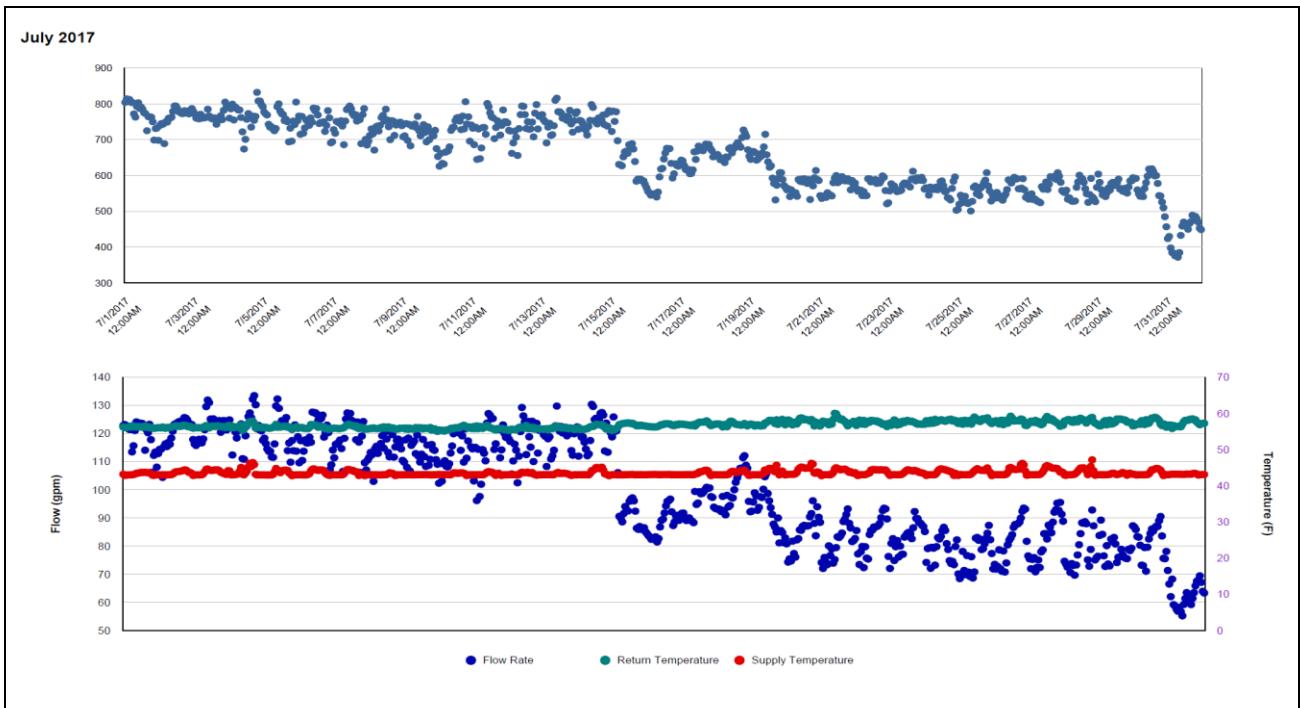

### Quantitative descriptions and comments

The CHW and HHW consumption started decreasing on 7/15/2017 due to a decrease in flowrate. The CHW flowrate decreased by 40 GPM and the HHW flow rate decreased by 8 GPM between 7/15/2017 and 7/31/2017. Both CHW and HHW consumption is estimated by models for the indicated period.

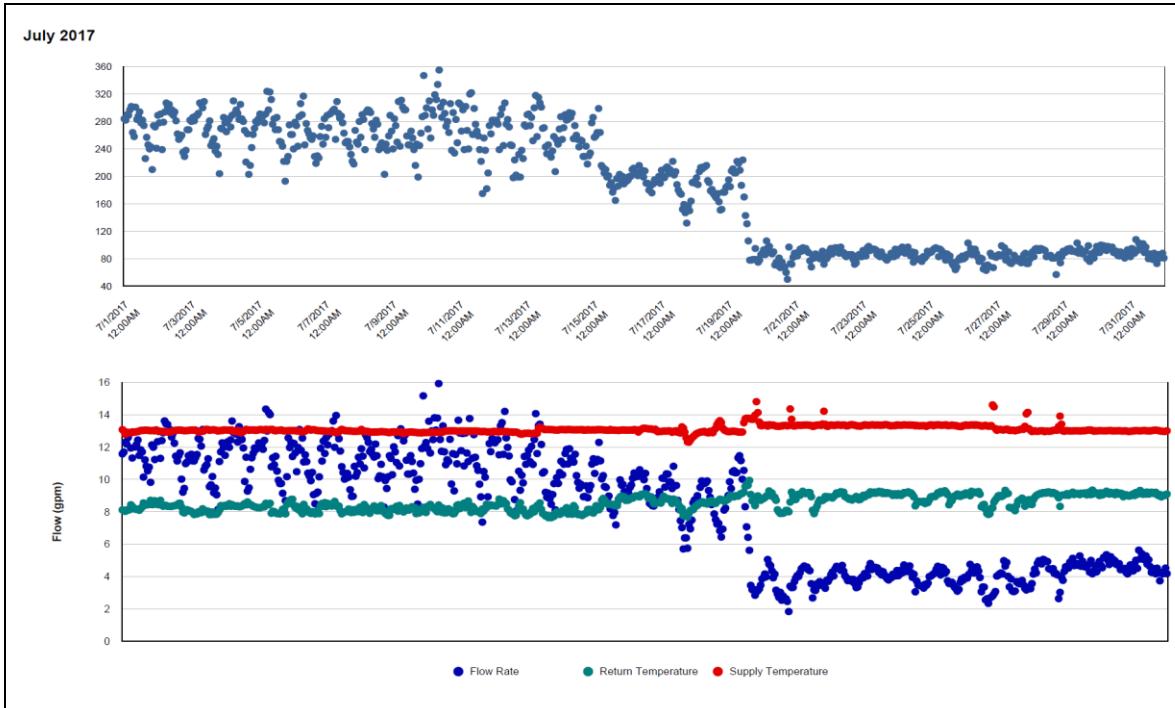

### Explanatory Figure: 13 months energy balance plot with original data.(Kiest Hall, Fountain Hall, and Plank LLC TAMU Bldg #401-403-1404)

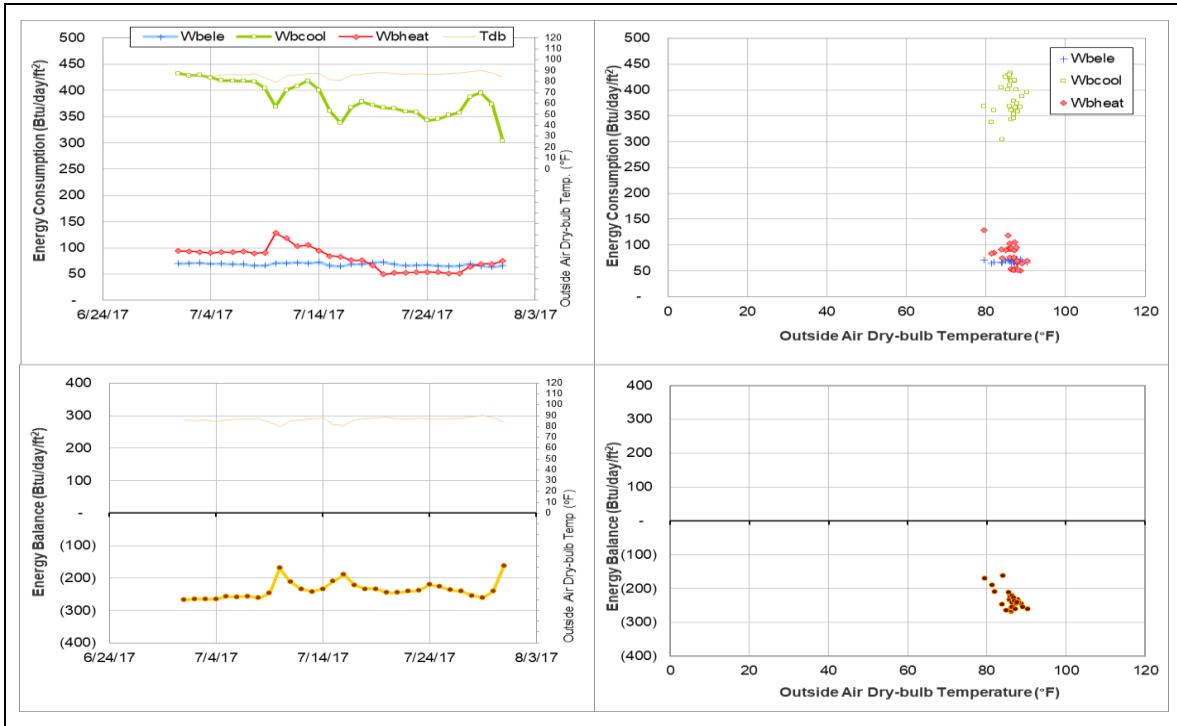

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017 - Plank LLC TAMU Bldg #1404)**

**Energy balance plot using the estimated data for the month of analysis. (Kiest Hall, Fountain Hall, and Plank LLC TAMU Bldg #401-403-1404)**

## Briggs Hall – Dorm 3 (TAMU Bldg #402)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	009324	31	7/1/2017 – 7/31/2017	Model

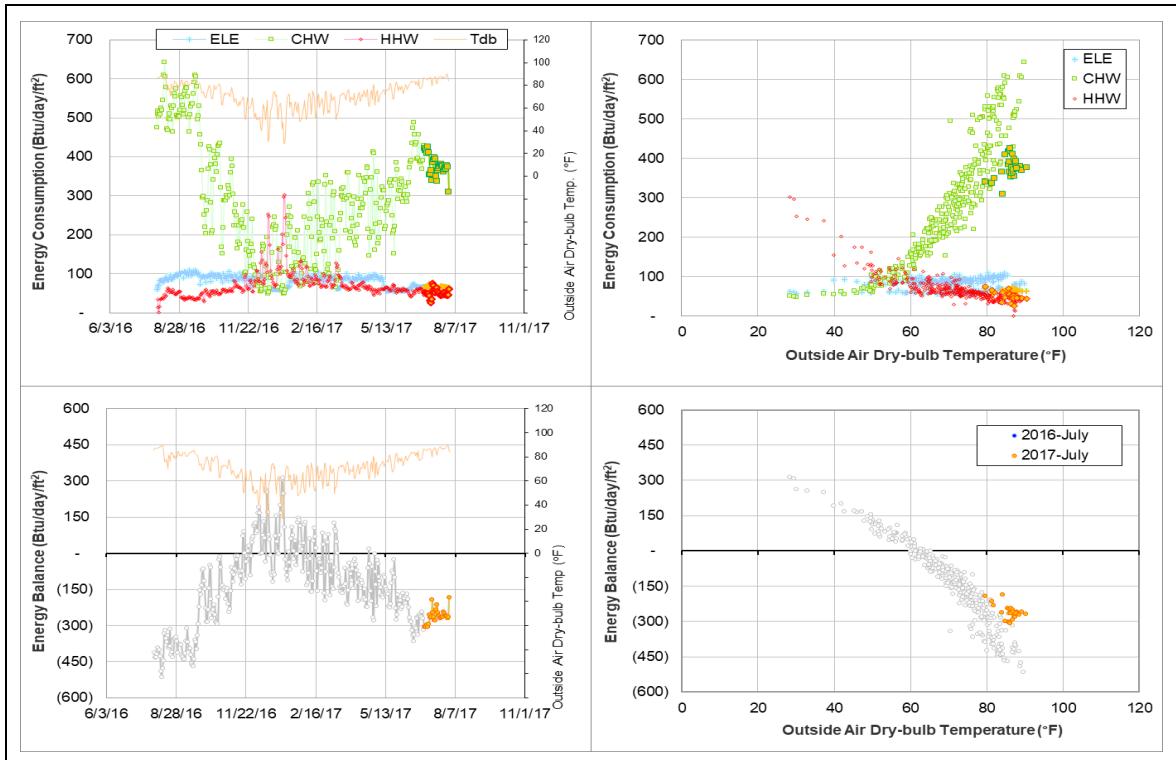

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level is lower than the level during the past year.	7/1/2017 – 7/31/2017

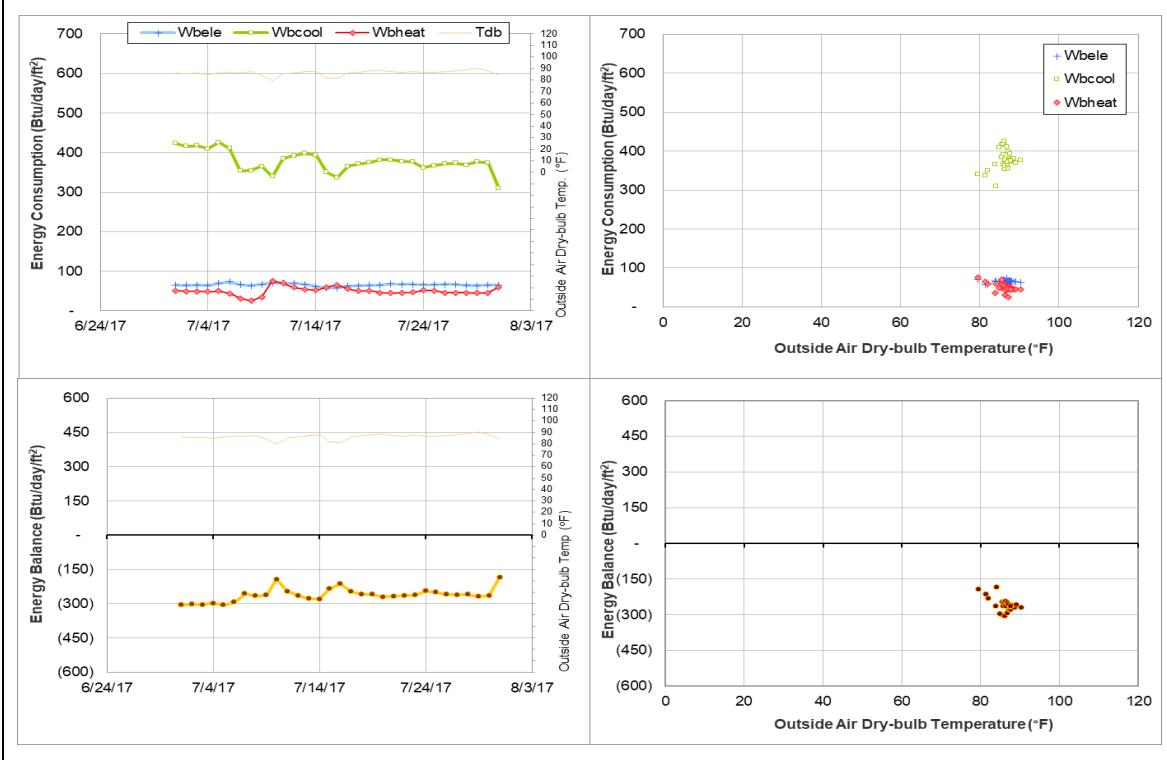

### Quantitative descriptions and comments

The CHW consumption is lower than the past year by about 200 Btu/day/ft<sup>2</sup>. No obvious sensor reading behavior anomaly is observed. The whole month is estimated using a model.

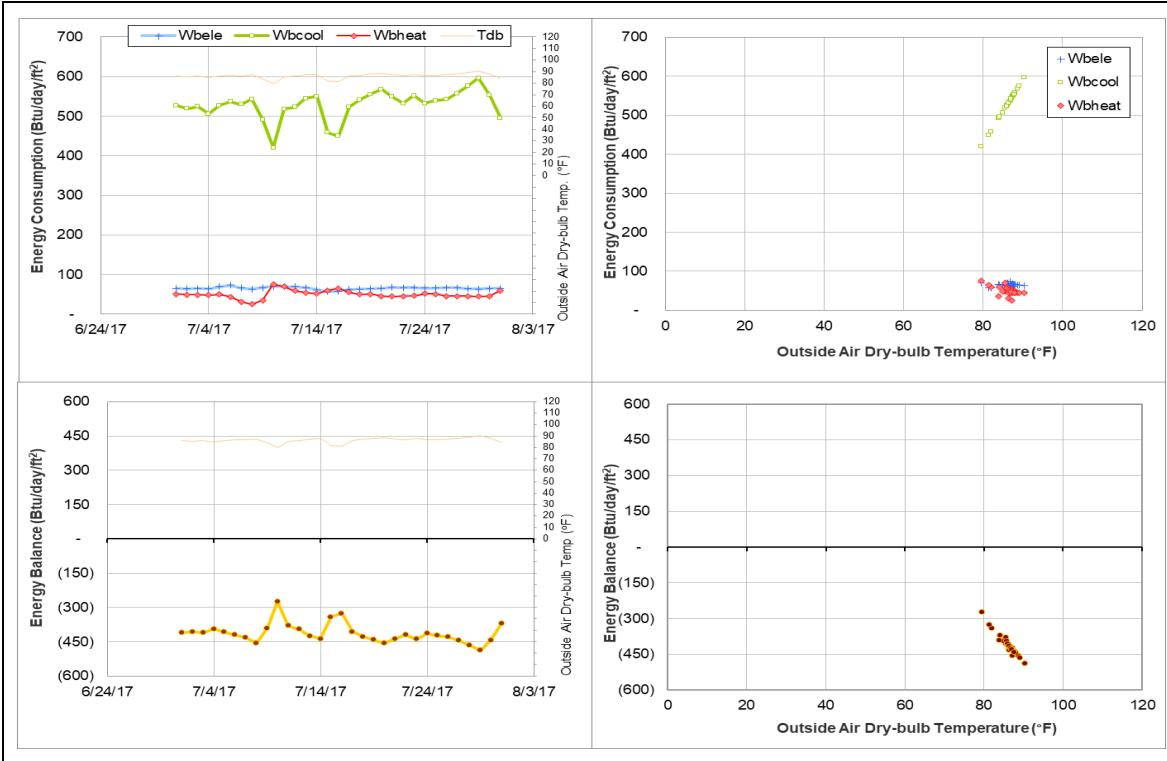

### Explanatory Figure: 13 months energy balance plot with original data.

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## Gainer Hall – Dorm 5 (TAMU Bldg #404)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	009356	31	7/1/2017 – 7/31/2017	Model

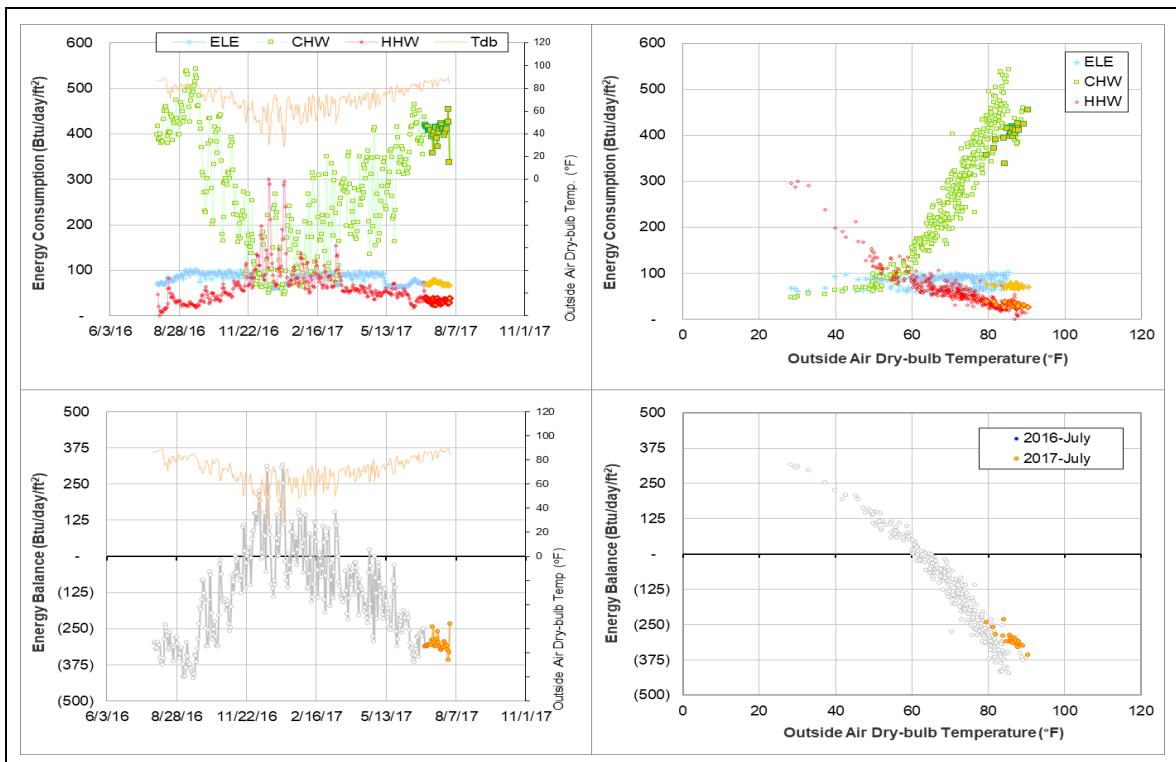

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level is lower than the level during the past year.	7/1/2017 – 7/31/2017

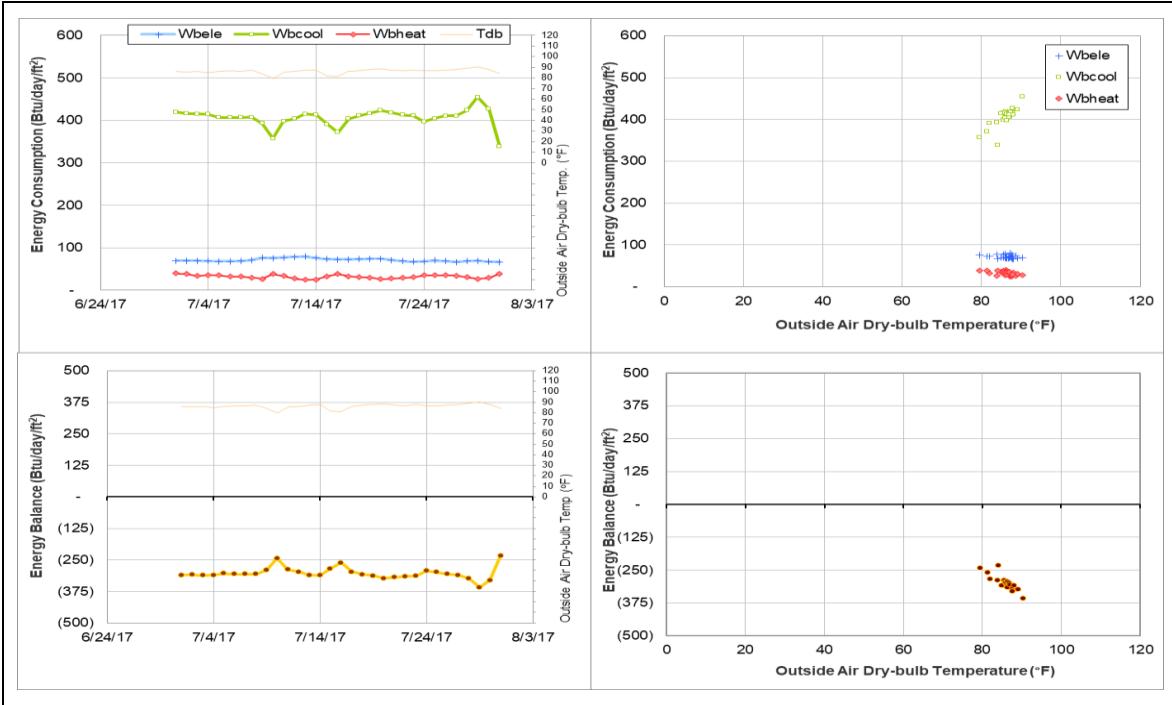

### Quantitative descriptions and comments

The CHW consumption is lower than the past year by about 150 Btu/day/ft<sup>2</sup>. No obvious sensor reading behavior anomaly is observed. The whole month is estimated using a model.

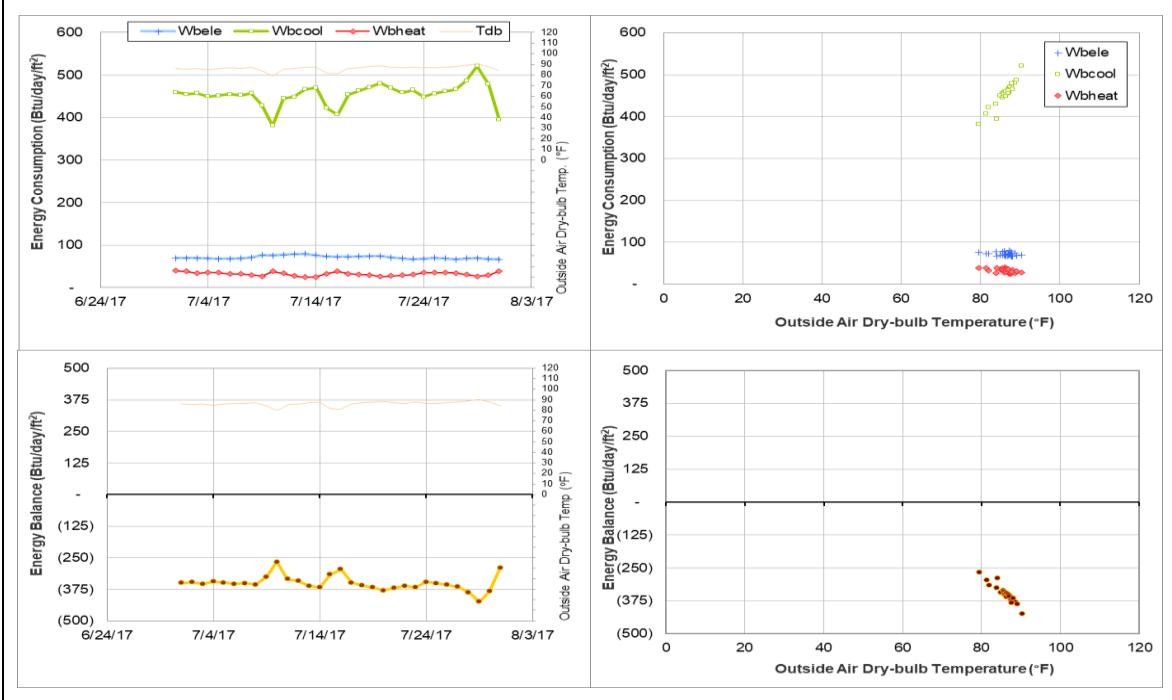

### Explanatory Figure: 13 months energy balance plot with original data.(Gainer Hall, Leonard Hall and Ash LLC TAMU Bldg #404-406-1403)

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any. (Gainer Hall, Leonard Hall and Ash LLC TAMU Bldg #404-406-1403)**

## Whitely Hall – Dorm 9 (TAMU Bldg #408)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002079	11	7/21/2017 – 7/31/2017	Model
HHW	002083	11	7/21/2017 – 7/31/2017	Average

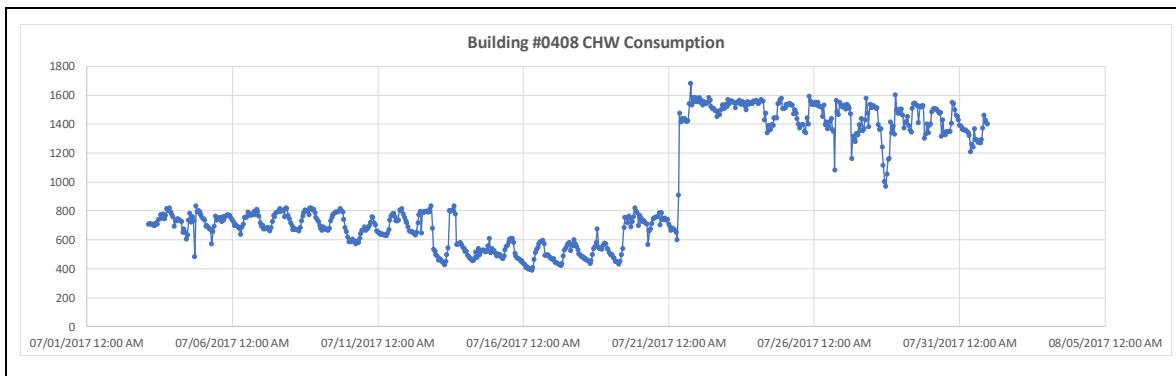

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	Abnormal patterns are observed.	7/21/2017 – 7/31/2017
HHW	Abnormal patterns are observed.	7/21/2017 – 7/31/2017

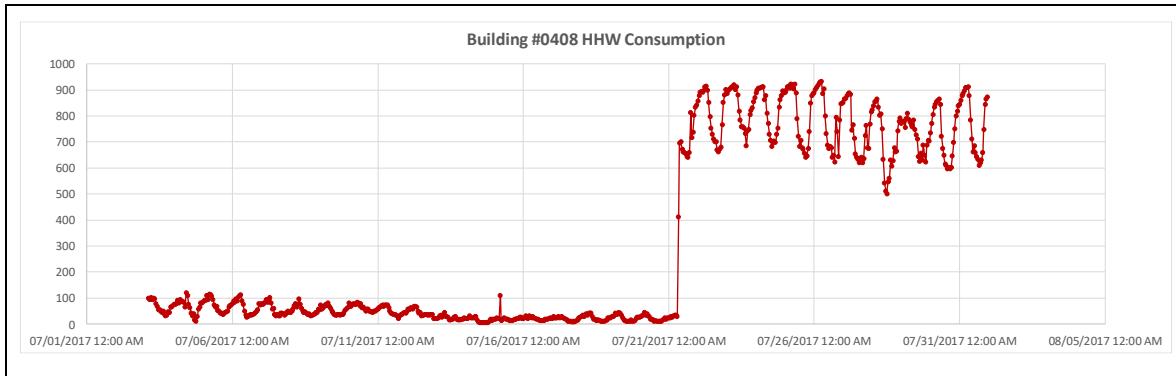

### *Quantitative descriptions and comments*

The CHW and HHW consumption was abnormally high from 7/21/2017 – 7/31/2017. CHW consumption appears to be doubled while HHW consumption appears to be larger by a factor of 24. These days are estimated by a model for CHW and an average for HHW. See also section II-3.

### *Explanatory Figure: Time series plot for CHW consumption*

### *Explanatory Figure: Time series plot for HHW consumption*

## Leggett Residence Hall (TAMU Bldg #419)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002218	4	7/28/2017 – 7/31/2017	Model
HHW	002222	11	7/21/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	Abnormal patterns are observed.	7/28/2017 – 7/31/2017
HHW	Abnormal patterns are observed.	7/21/2017 – 7/31/2017

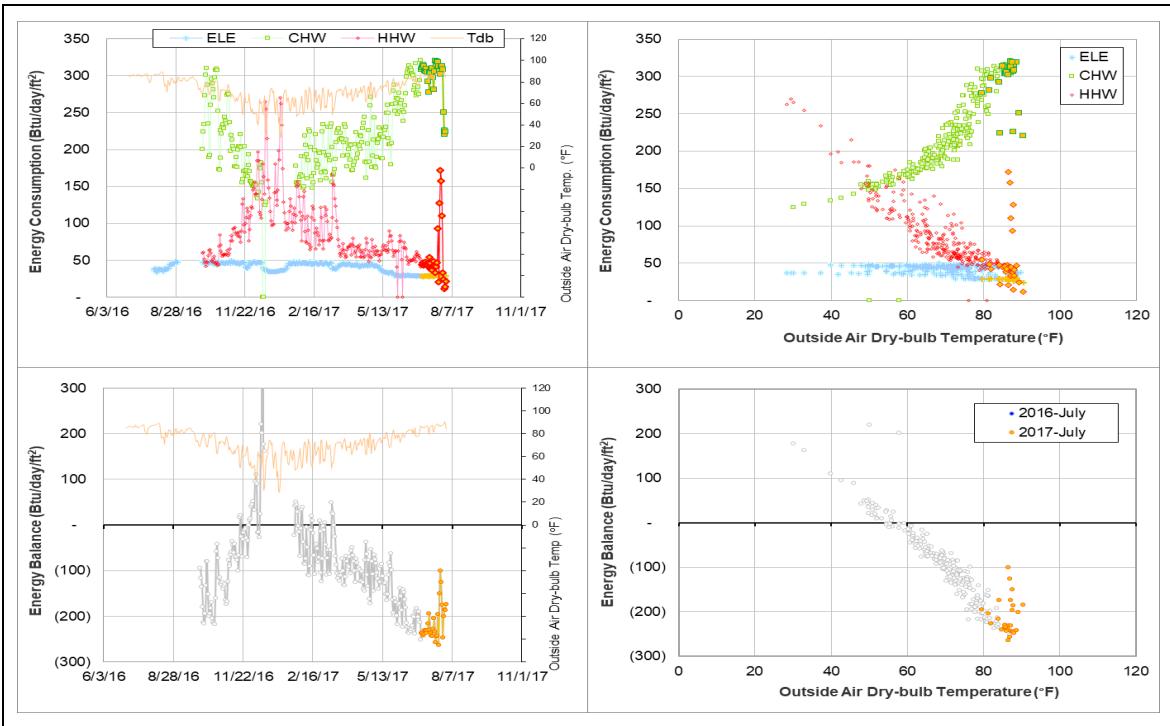

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
CHW	002218	7/28/2017 – 7/29/2017	Flow rate	Decreased
		7/30/2017 – 7/31/2017	Delta-T	Decreased
HHW	002222	7/21/2017 – 7/29/2017	Flow rate	Spikes
		7/30/2017 – 7/31/2017	Delta-T	Decreased

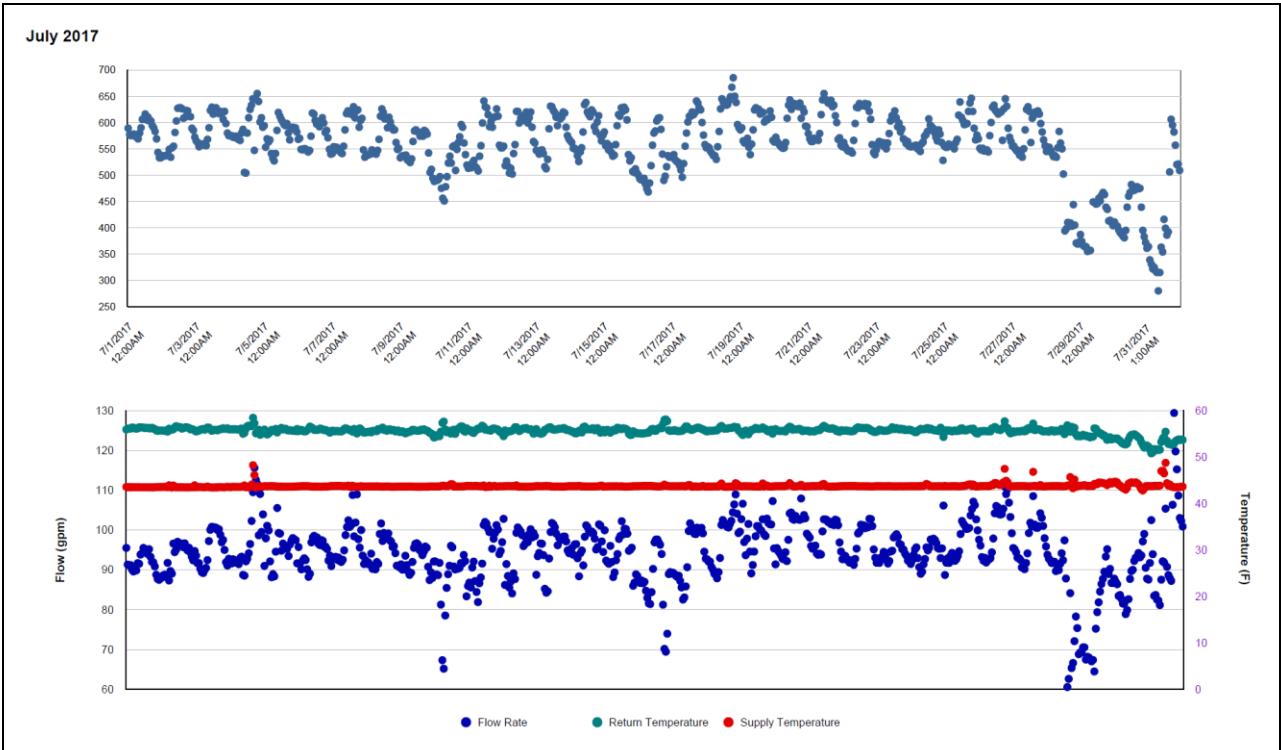

### *Quantitative descriptions and comments*

The CHW consumption dropped starting 7/28/2017 due to a decrease in flow rate followed by a decrease in delta-T on 7/30/2017. The HHW consumption increased starting 7/21/2017 due to several spikes in the flow rate followed by a decrease in delta-T on 7/30/2017. The specified days are estimated using a model.

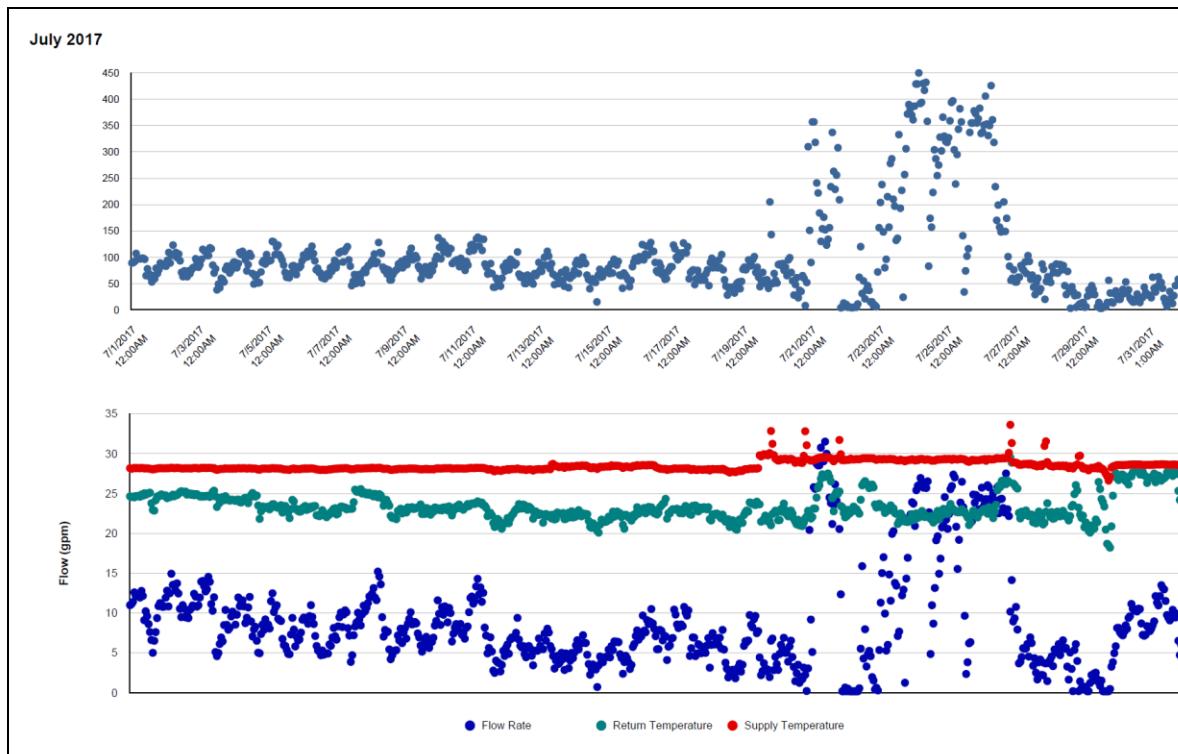

**Explanatory Figure: 13 months energy balance plot with original data. (The plot is rescaled to remove the spikes.)**

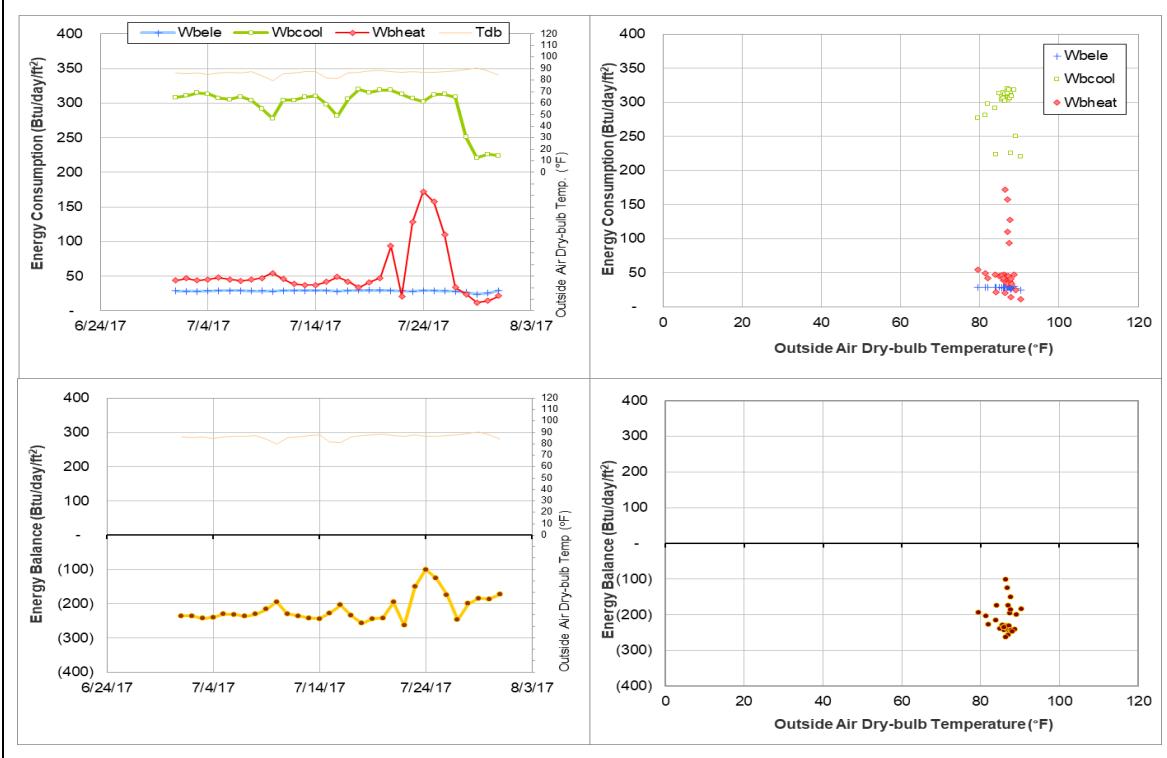

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017)**

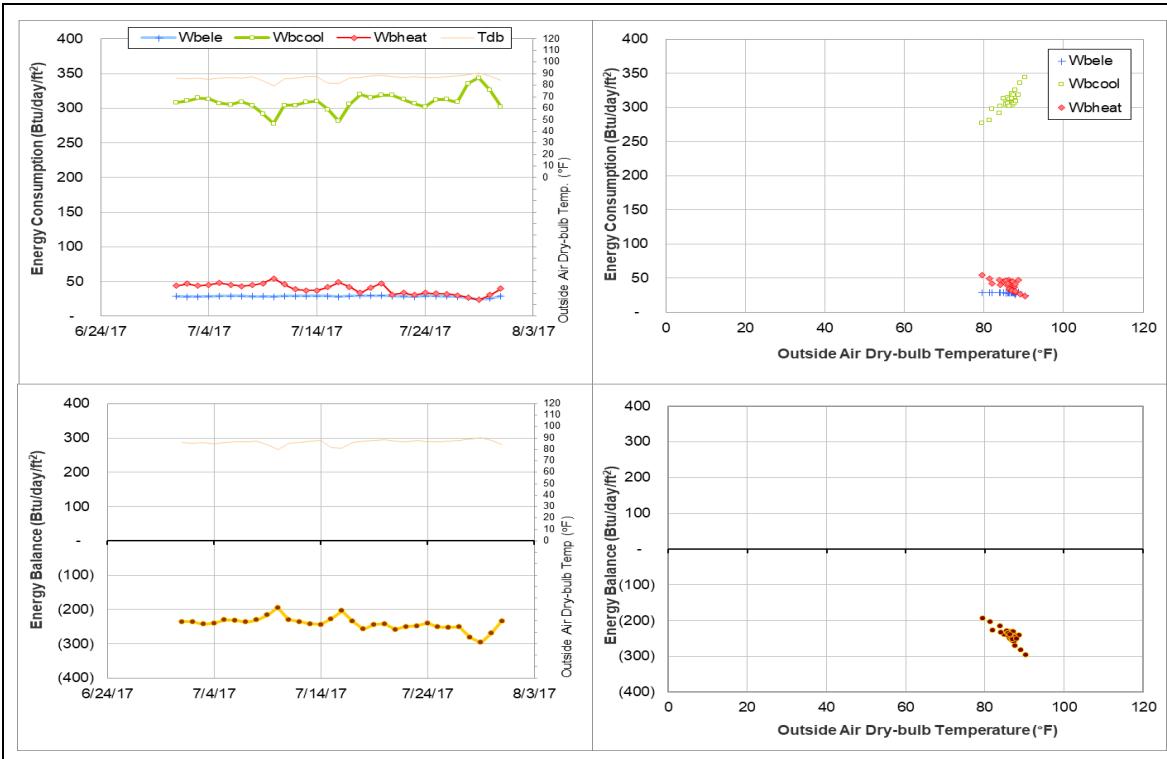

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## Dunn Residence Hall (TAMU Bldg #442)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002519	4	7/8/2017 – 7/10/2017, 7/15/2017	Model
HHW	002515	2	7/13/2017 – 7/14/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption dropped for a short period.	7/8/2017 – 7/10/2017, 7/15/2017
HHW	The consumption dropped for a short period.	7/13/2017 – 7/14/2017

### Changes in sensor readings related to the detected issues

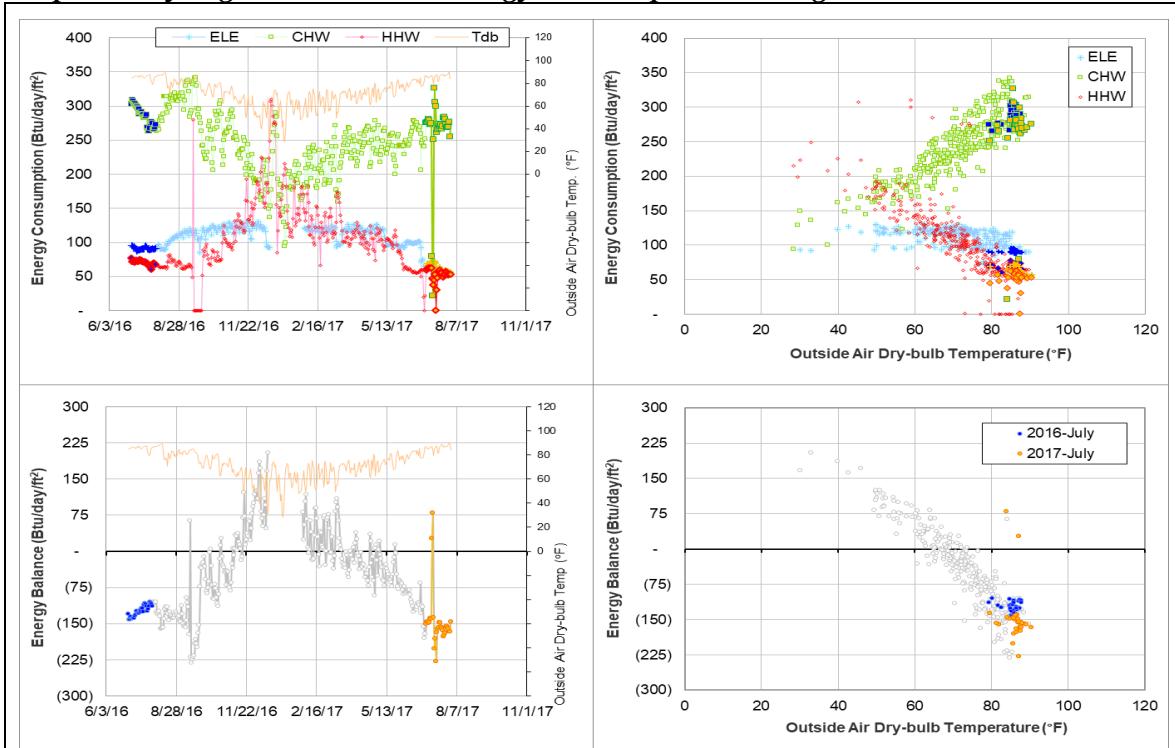

Energy Type	Meter ID	Period	Type	Description
CHW	002519	7/8/2017 – 7/10/2017, 7/15/2017	Flow rate	Decreased to near zero
HHW	002515	7/13/2017 – 7/14/2017	Delta-T	Negative

### Quantitative descriptions and comments

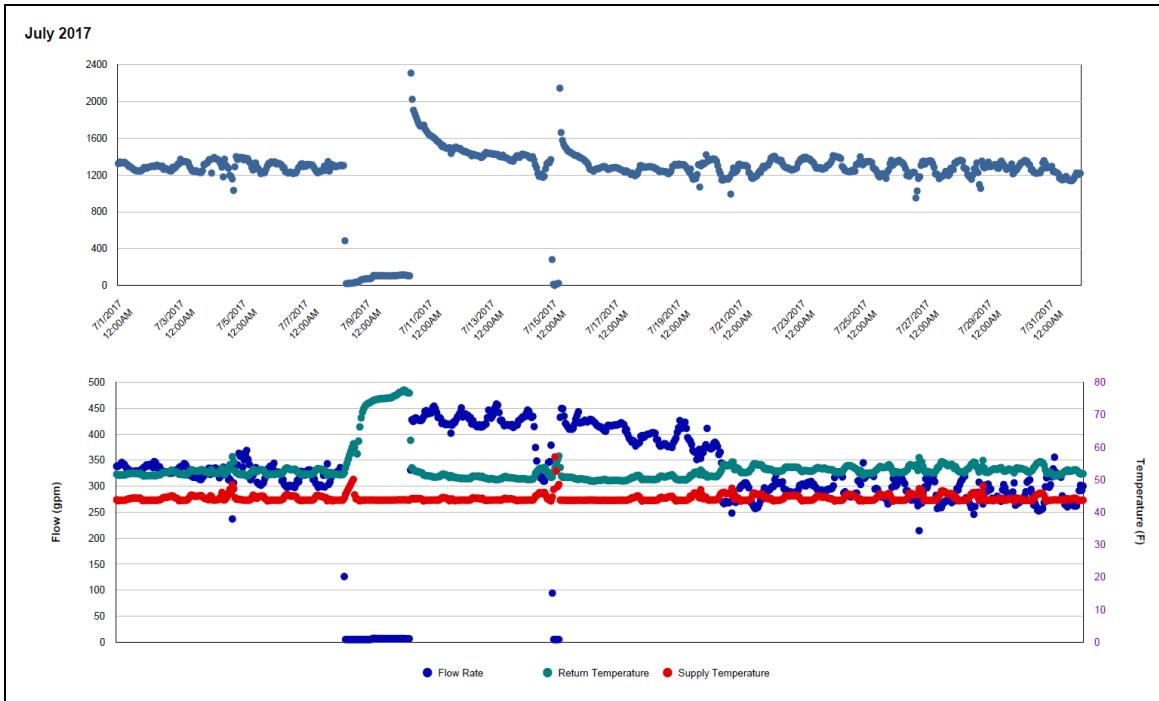

The CHW flow rate decreased to near zero value from 7/8/2017 – 7/10/2017 and 7/15/2017. The CHW consumption was estimated by model for these days.

The HHW supply temperature decreased below the return temperature resulting in a negative Delta-T during 7/13/2017 – 7/14/2017. The HHW consumption was estimated by model for these days.

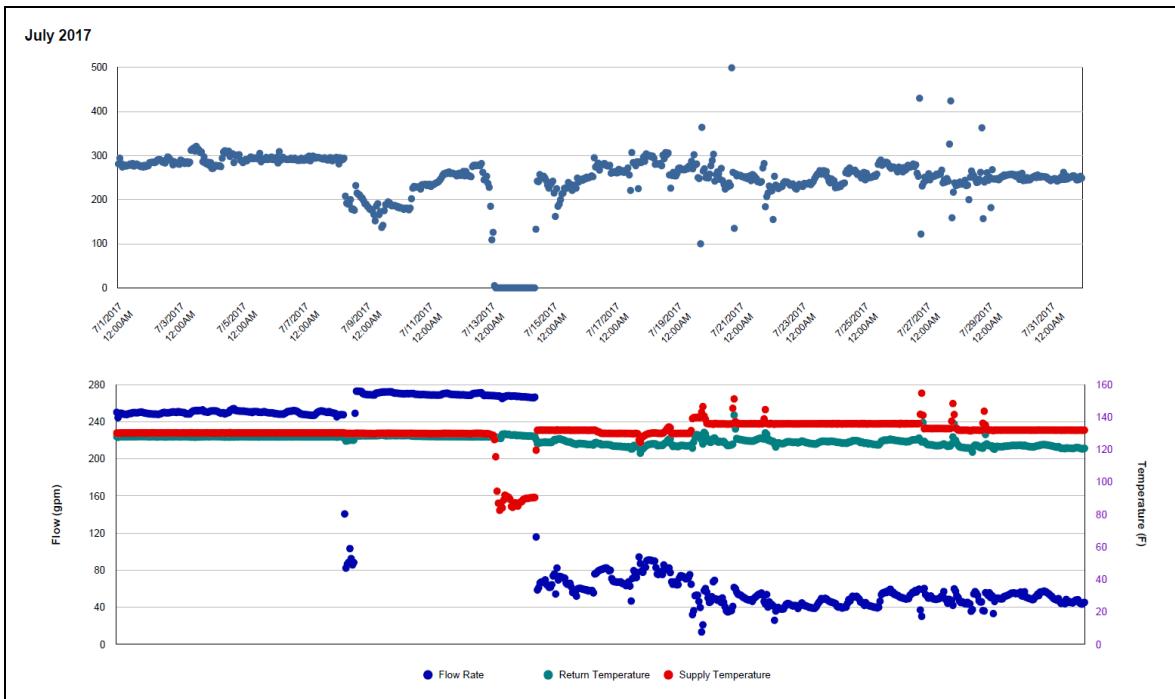

### Explanatory Figure: 13 months energy balance plot with original data

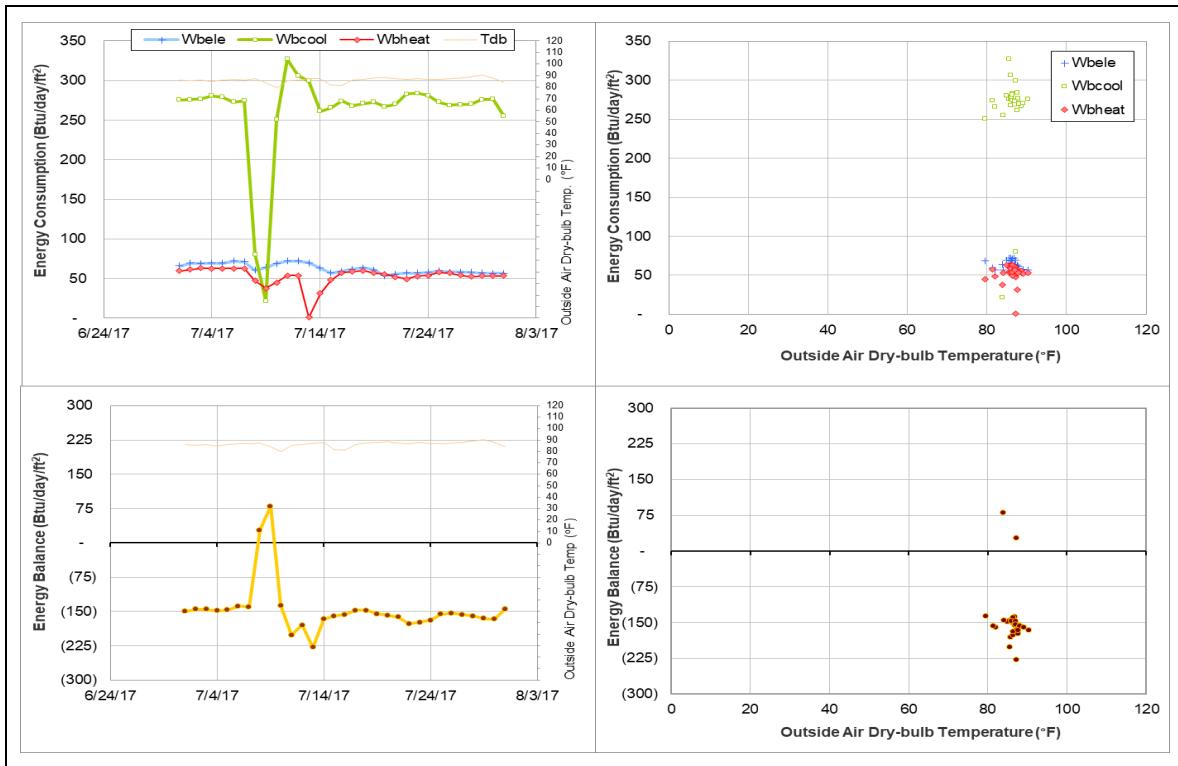

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office (CHW meter during July 2017)**

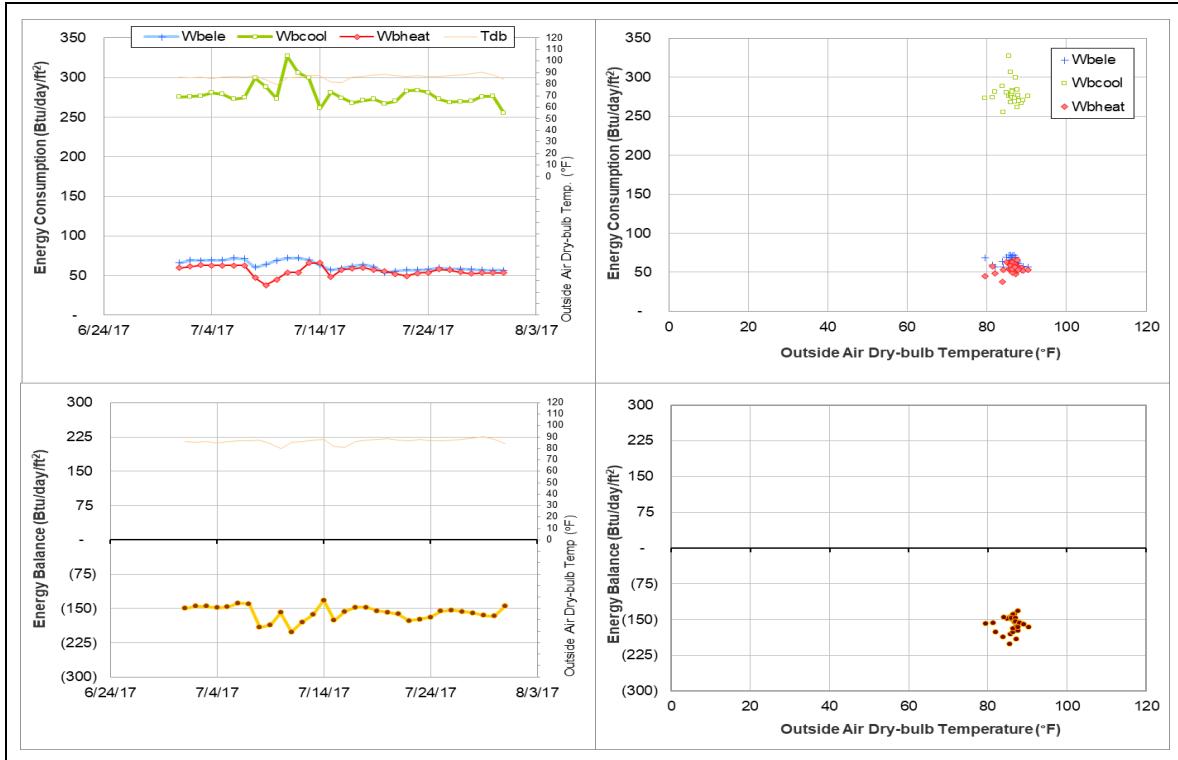

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office (HHW meter during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

## Oceanography & Meteorology Building (TAMU Bldg #443)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	006388	27	7/1/2017 – 7/27/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level is higher than the level during the past year.	6/12/2017 – 7/27/2017

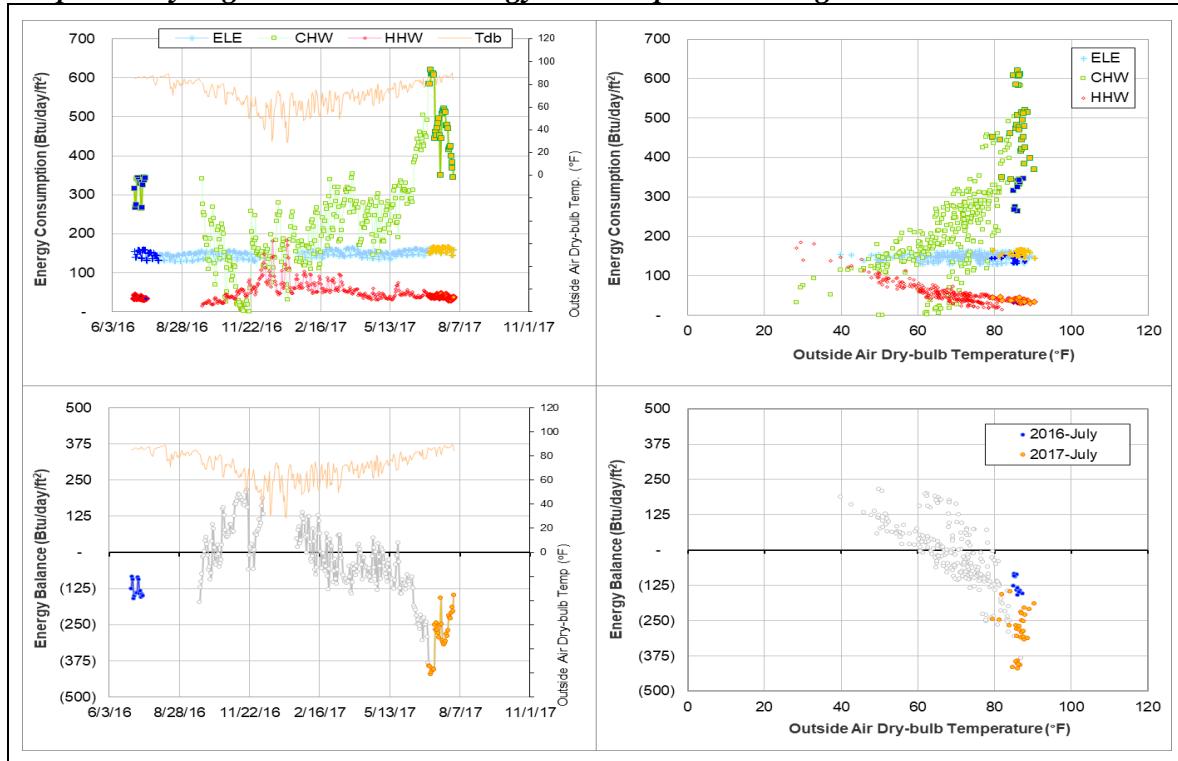

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
CHW	006388	6/12/2017 – 7/27/2017	Flow rate	Increased

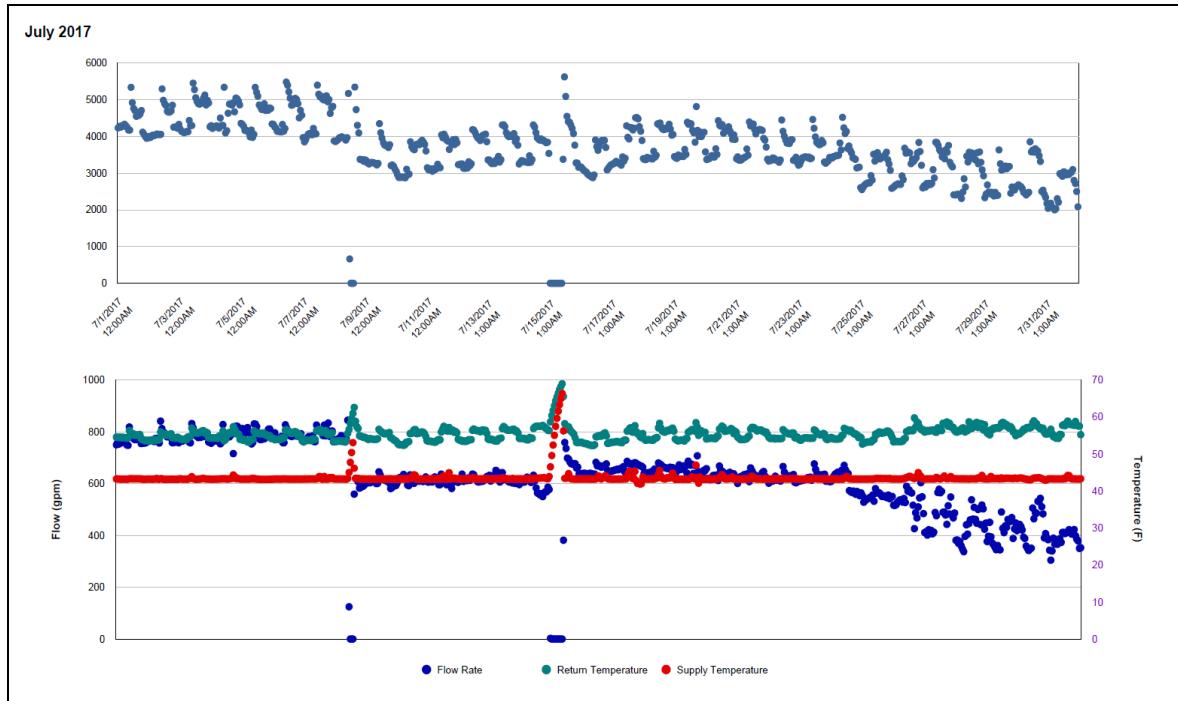

### *Quantitative descriptions and comments*

Starting 6/12/2017, the CHW consumption pattern increased around 100 Btu/day/ft<sup>2</sup>. The flow rate appears to have gradually increased during June from around 350 gpm to 650 gpm. In July, the flow rate began to decrease and the CHW consumption pattern returned to the previous pattern level on 7/28/2017. The CHW consumption was estimated by model for this period.

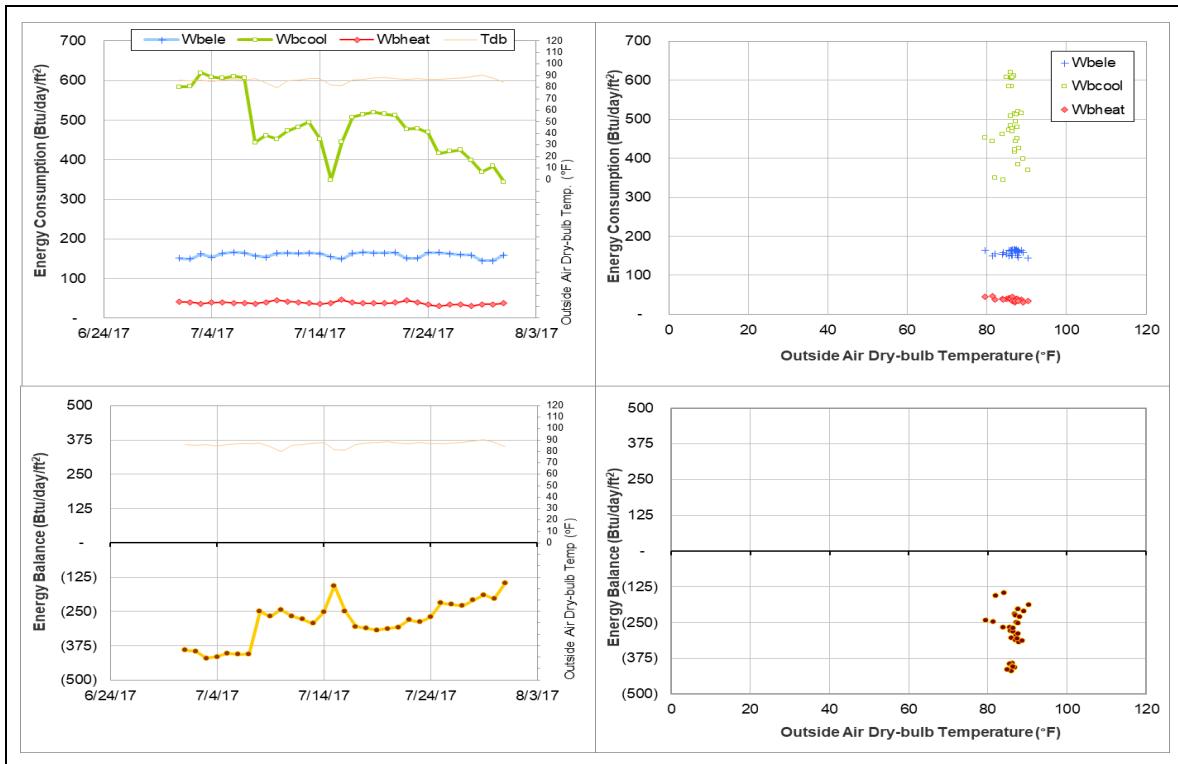

### *Explanatory Figure: 13 months energy balance plot with original data*

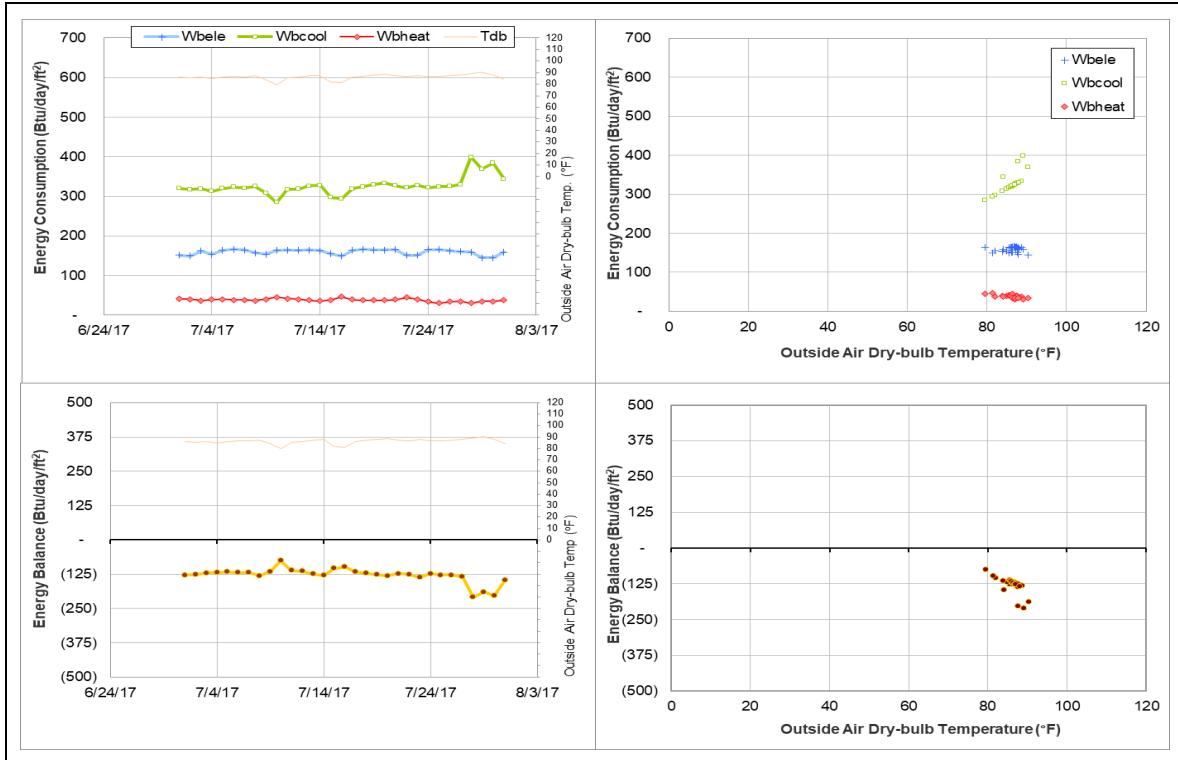

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office (CHW meter during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis**

## Rudder Theatre Complex (TAMU Bldg #446)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
ELE	002977	31	7/1/2017 – 7/31/2017	Model
ELE	002980	31	7/1/2017 – 7/31/2017	Model
CHW	004297	31	7/1/2017 – 7/31/2017	Model
HHW	004309	31	7/1/2017 – 7/31/2017	Model

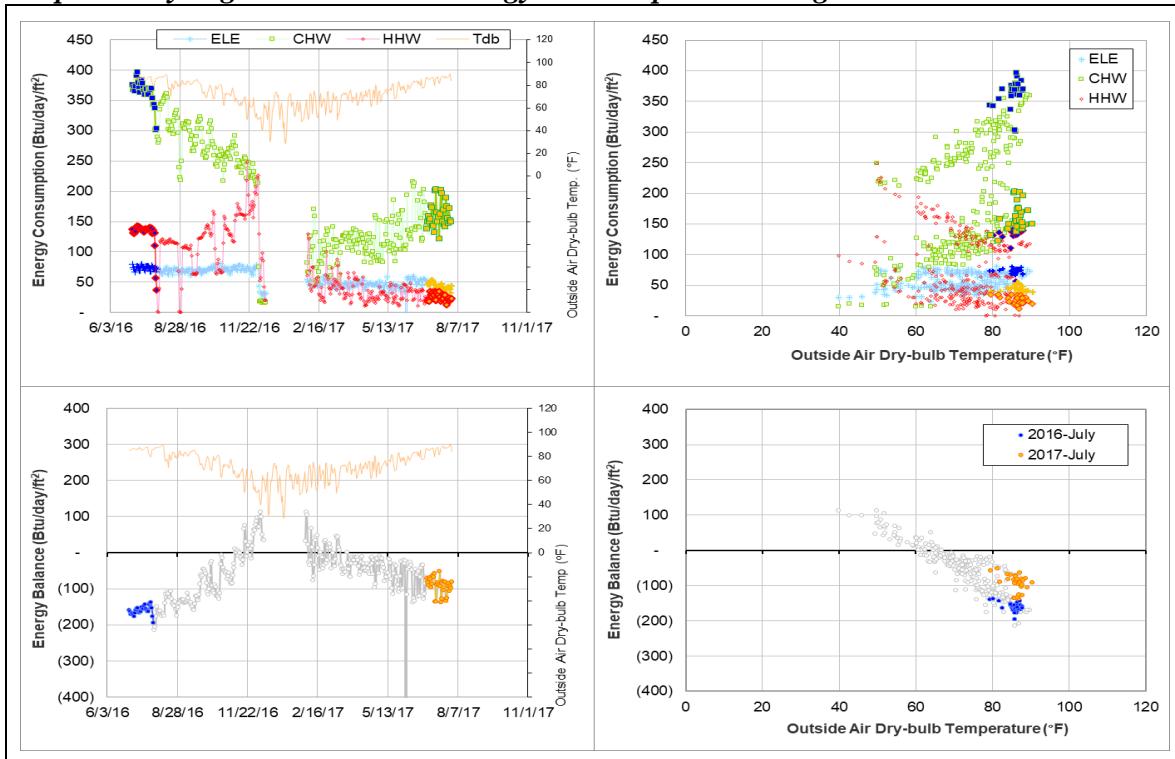

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
ELE	The consumption level has decreased suddenly.	2/1/2017 – Ongoing
ELE	The consumption level has decreased suddenly.	2/1/2017 – Ongoing
CHW	The consumption level has decreased suddenly.	2/1/2017 – Ongoing
HHW	The consumption level has decreased suddenly.	2/1/2017 – Ongoing

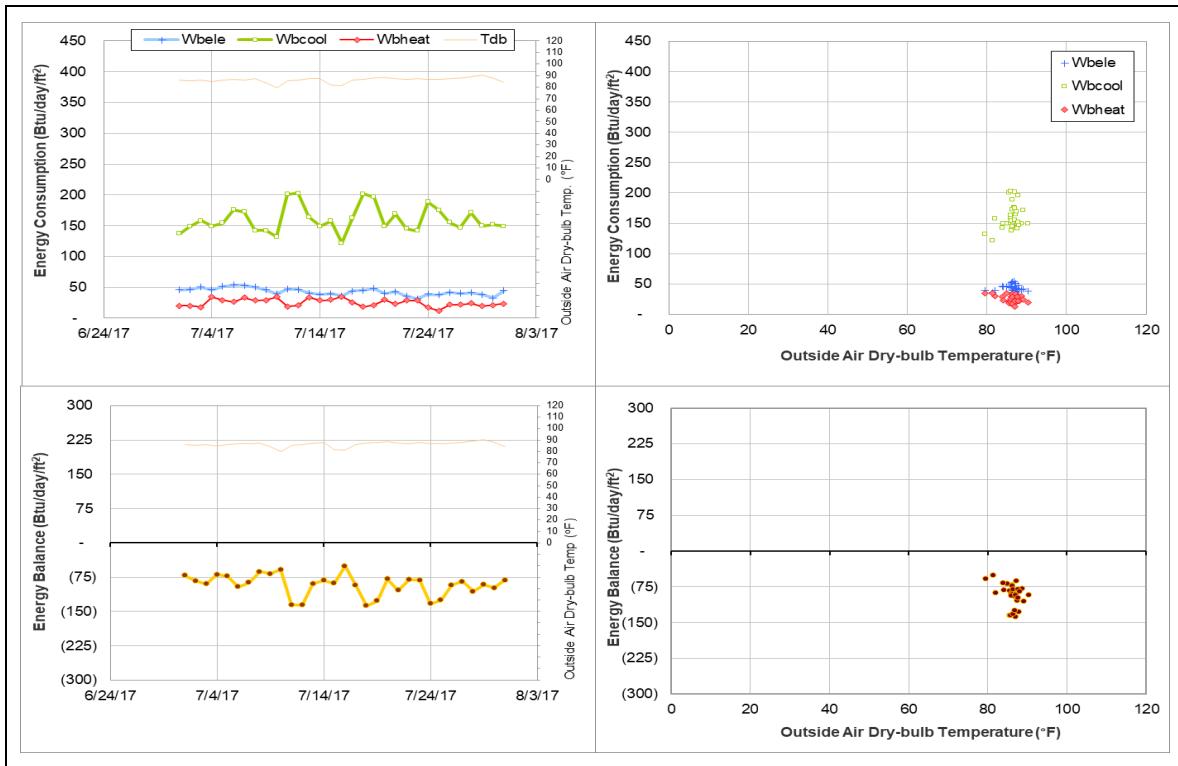

### Quantitative descriptions and comments

ELE, CHW, and HHW consumption dropped during the winter break of last year (2016-2017) and again during the winter break in 2015-2016. This drop is not suspected to be a meter malfunction since a decrease would be expected during break periods and that the data from 2015-2016 winter suggests that the consumption went back to the normal level around 1/25/2016. However, the data following 2016-2017 winter has not yet returned to the normal level. The energy balance of this building does not show separate patterns for these two levels. The whole month is estimated using a model for ELE, CHW, and HHW.

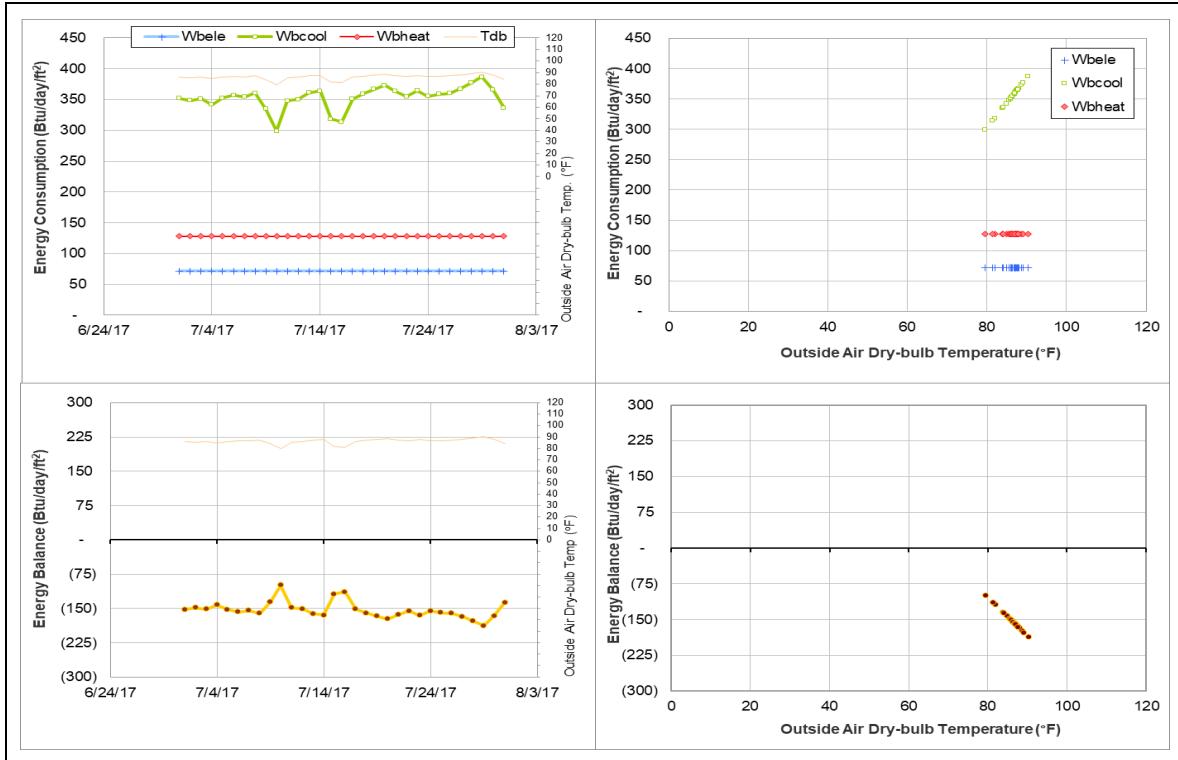

### Explanatory Figure: 13 months energy balance plot with original data

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis**

## Aston Residence Hall (TAMU Bldg #447)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002474	31	7/1/2017 – 7/31/2017	Model
HHW	002470	7	7/8/2017 – 7/14/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level has decreased suddenly.	6/25/2017 – Ongoing
HHW	The consumption level has increased suddenly.	7/8/2017 – 7/14/2017

### *Changes in sensor readings related to the detected issues*

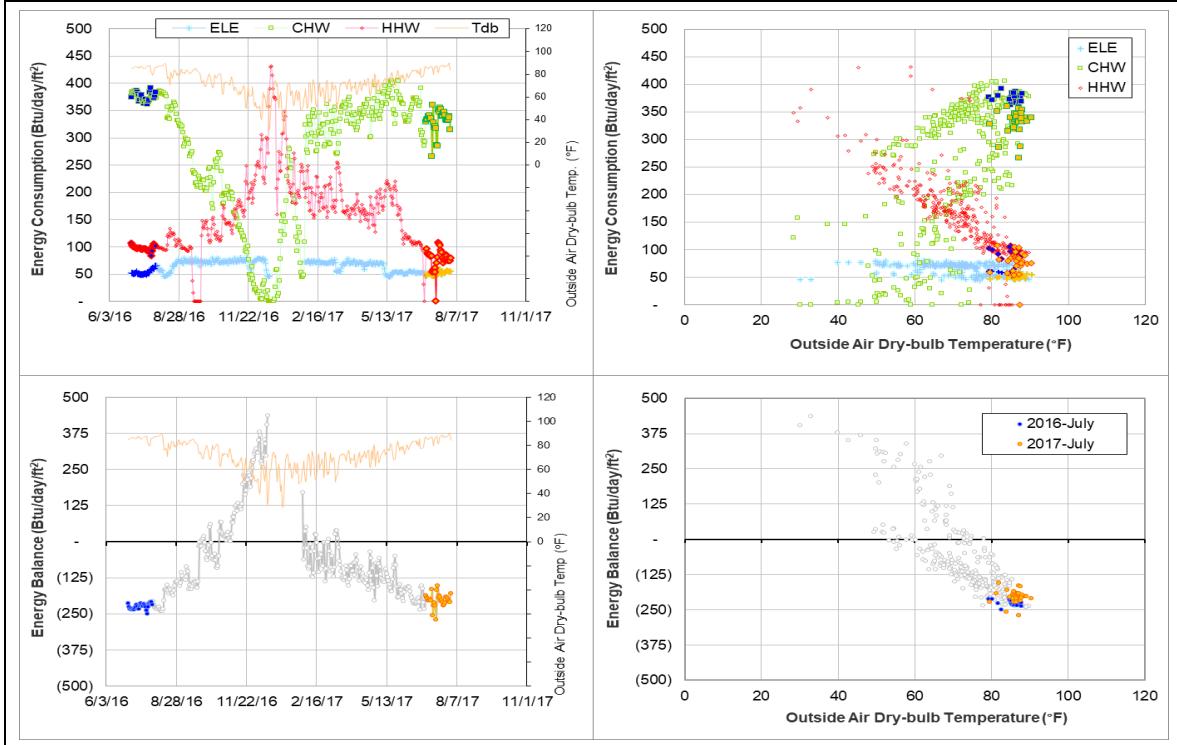

Energy Type	Meter ID	Period	Type	Description
CHW	002474	6/25/2017 – Ongoing	Flow rate	Decreased
			Delta-T	Increased
HHW	002470	7/8/2017 – 7/14/2017	Flow rate	Decreased
		7/13/2017 – 7/14/2017	Delta-T	Negative

### *Quantitative descriptions and comments*

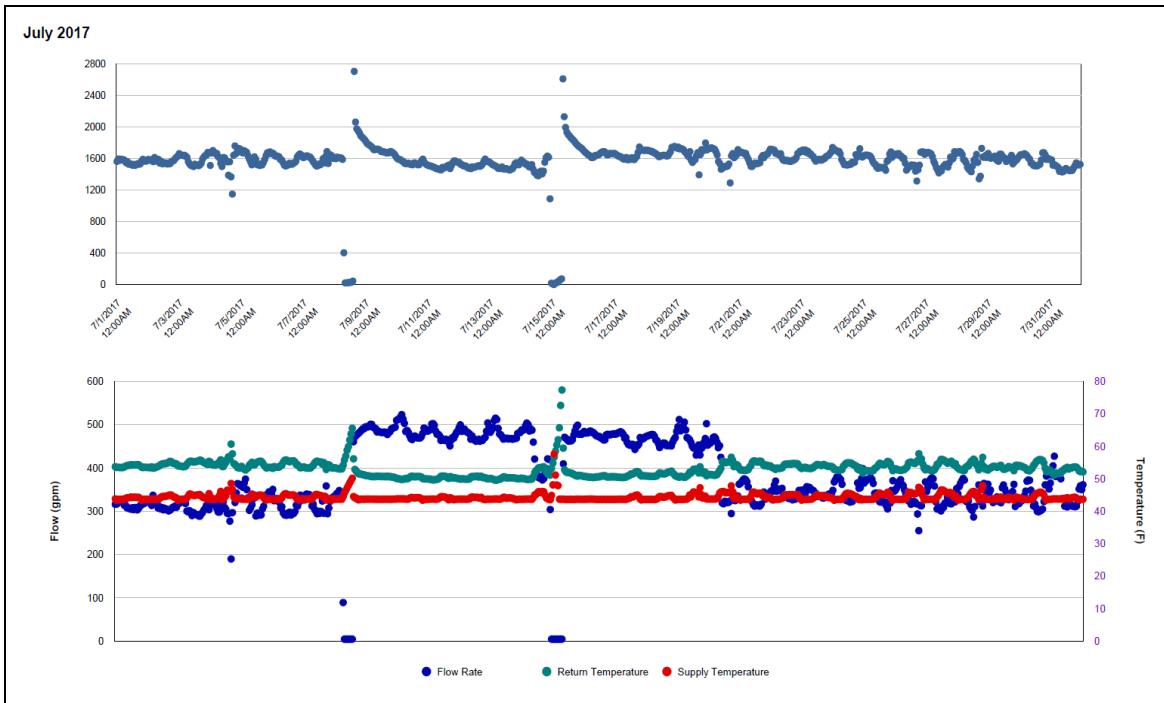

The CHW flow rate decreased by 50% starting on 6/25/2017. Although the Delta-T increased by almost 10°F, these changes resulted in an overall decrease in energy consumption. The CHW consumption for this period was estimated by model.

The HHW flow rate decreased from ~270 gpm to 40 gpm and below for 7/8/2017 – 7/14/2017. The supply temperature also drops below the return temperature resulting in a negative Delta-T for 7/13/2017 – 7/14/2017. The HHW consumption was estimated by model for these days.

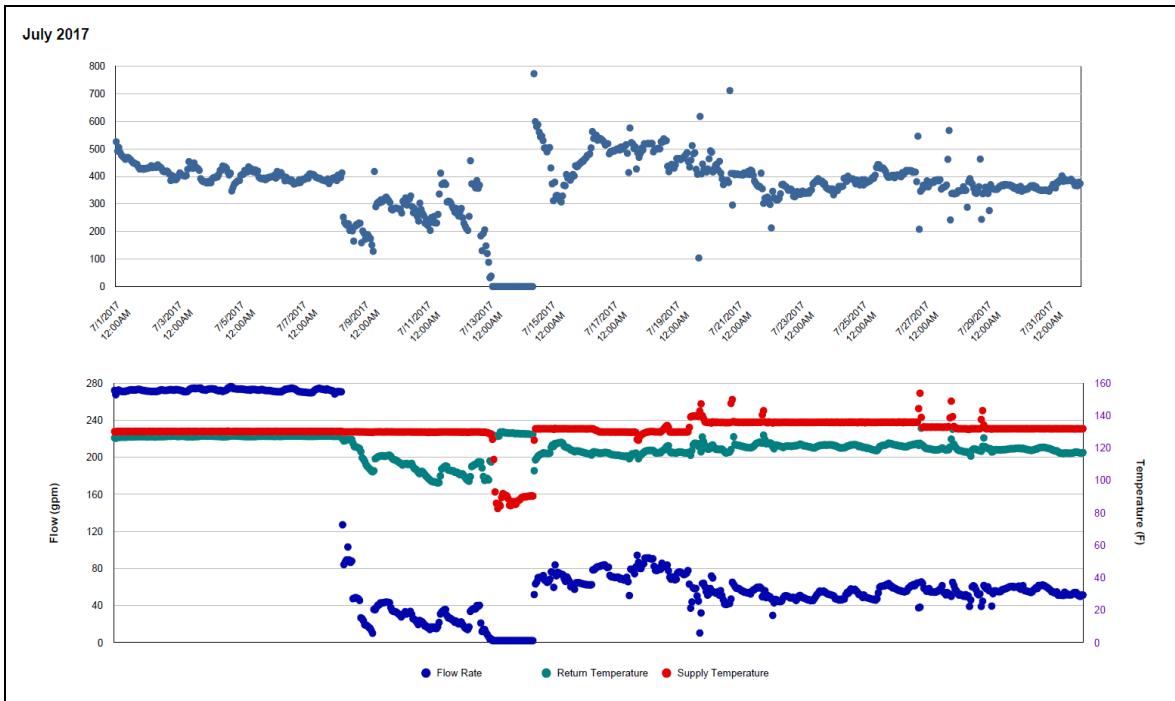

**Explanatory Figure: 13 months energy balance plot with original data**

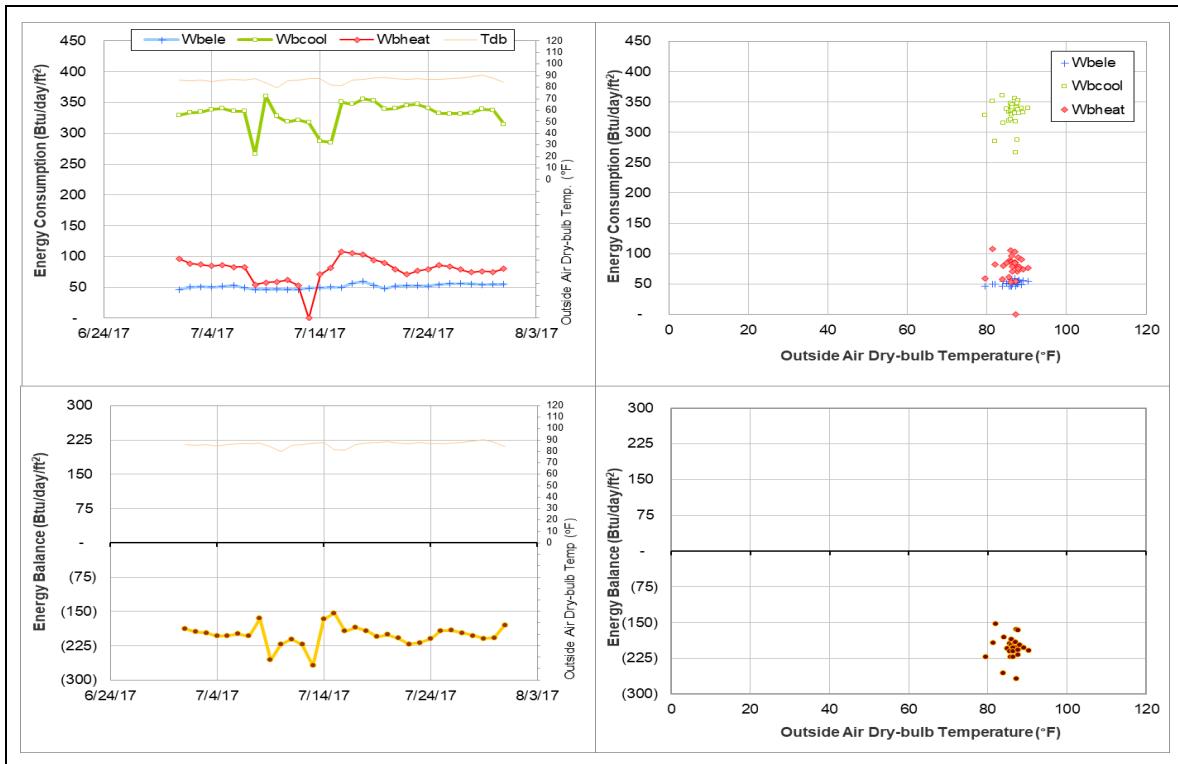

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office (CHW meter during July 2017)**

## Adams Band Hall (TAMU Bldg #448)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002555	9	7/1/2017, 7/24/2017 – 7/31/2017	Model
HHW	002566	8	7/24/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level is higher than the level during the past year.	6/1/2017 – 7/24/2017
	The consumption level is lower than the level during the past year.	7/24/2017 – 7/31/2017
HHW	The consumption level has decreased suddenly.	7/24/2017 – 7/31/2017

### *Changes in sensor readings related to the detected issues*

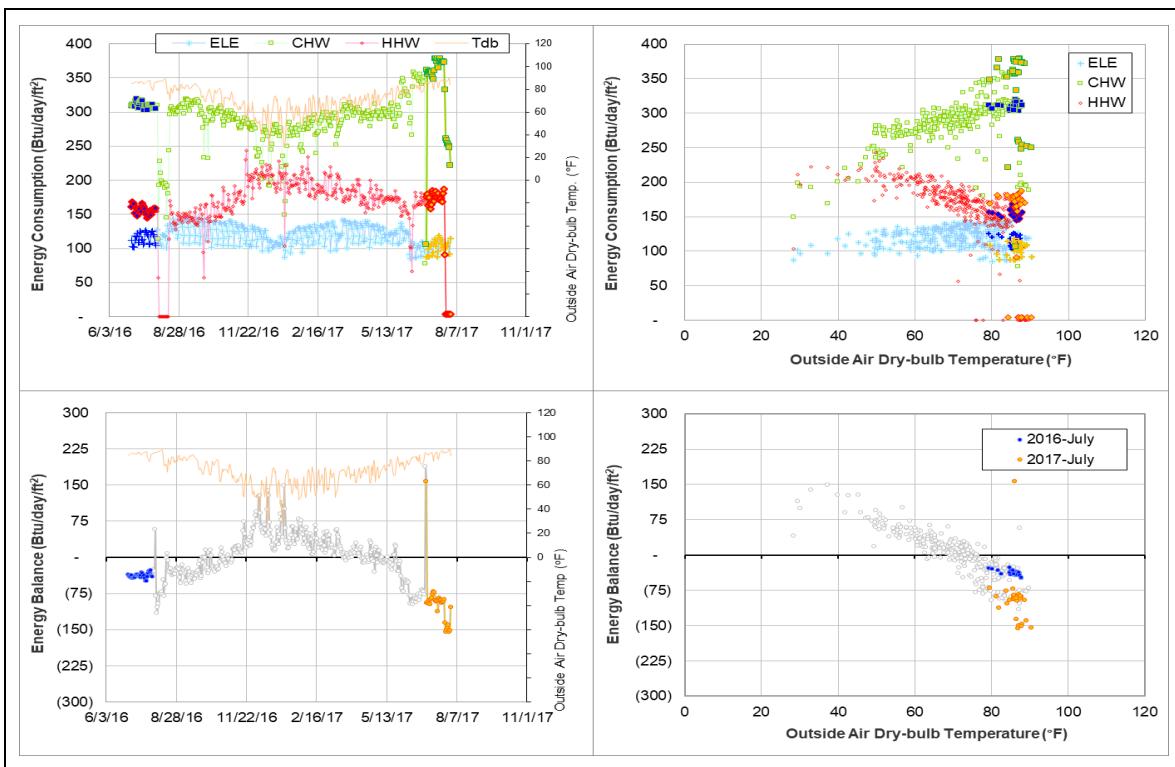

Energy Type	Meter ID	Period	Type	Description
CHW	002555	6/30/2017 – 7/1/2017	Flow rate	Decreased to zero
		7/1/2017 – 7/24/2017	Flow rate	Decreased
		7/24/2017 – 7/31/2017	Delta-T	Decreased
HHW	002566	7/24/2017 – 7/31/2017	Flow rate	Decreased to zero

### *Quantitative descriptions and comments*

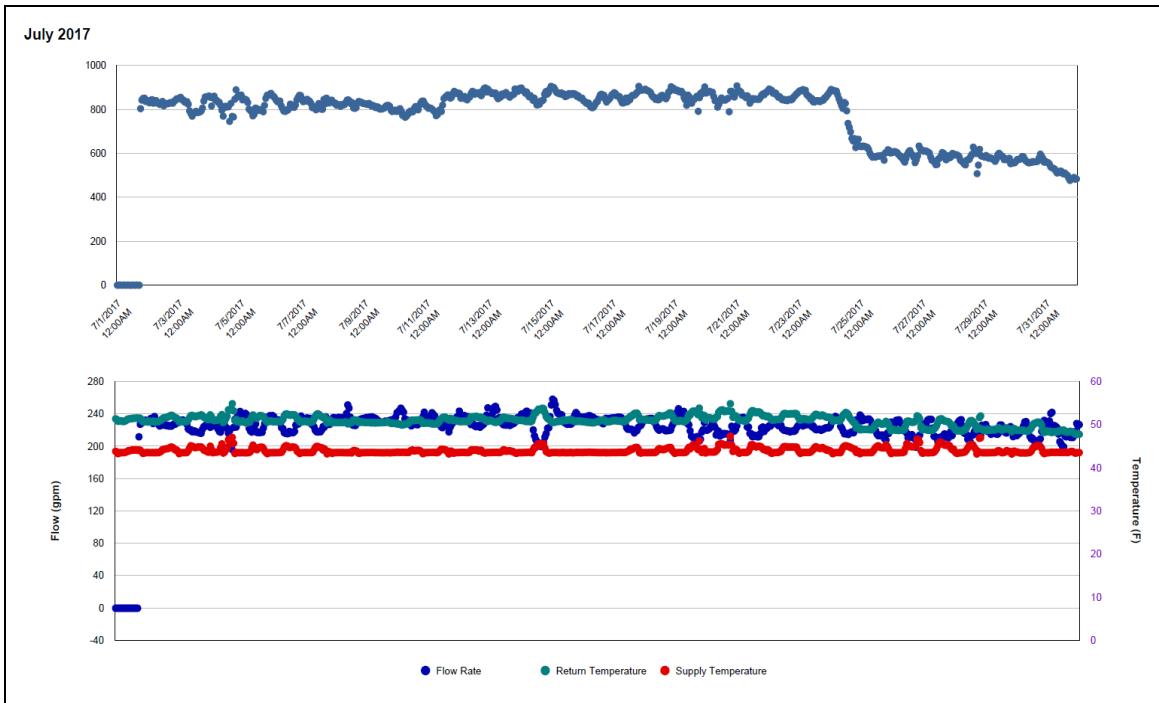

The CHW consumption pattern for June 2017 is 50 Btu/day/ft<sup>2</sup> higher than June 2016. The CHW flow rate appears to be at a consistent level in June 2017 where in the previous year, the flow rate varied throughout the day. For a short period during 6/30/2017-7/1/2017, the flow rate decreased to near zero value. Starting on 7/24/2017, the return temperature decreased resulting in a consumption level 60 Btu/day/ft<sup>2</sup> lower than July 2016. The CHW consumption was estimated by model.

The HHW consumption decreased during 7/24/2017 – 7/31/2017. During this period the HHW flow rate appears to decrease to zero or near zero values. The HHW consumption was estimated by model for this period.

## TAES Annex Building (TAMU Bldg #457)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	005913	4	7/14/2017 – 7/17/2017	Model
HHW	005917	4	7/14/2017 – 7/17/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption dropped for a short period.	7/14/2017 – 7/17/2017
HHW	The consumption dropped for a short period.	7/14/2017 – 7/17/2017

### Changes in sensor readings related to the detected issues

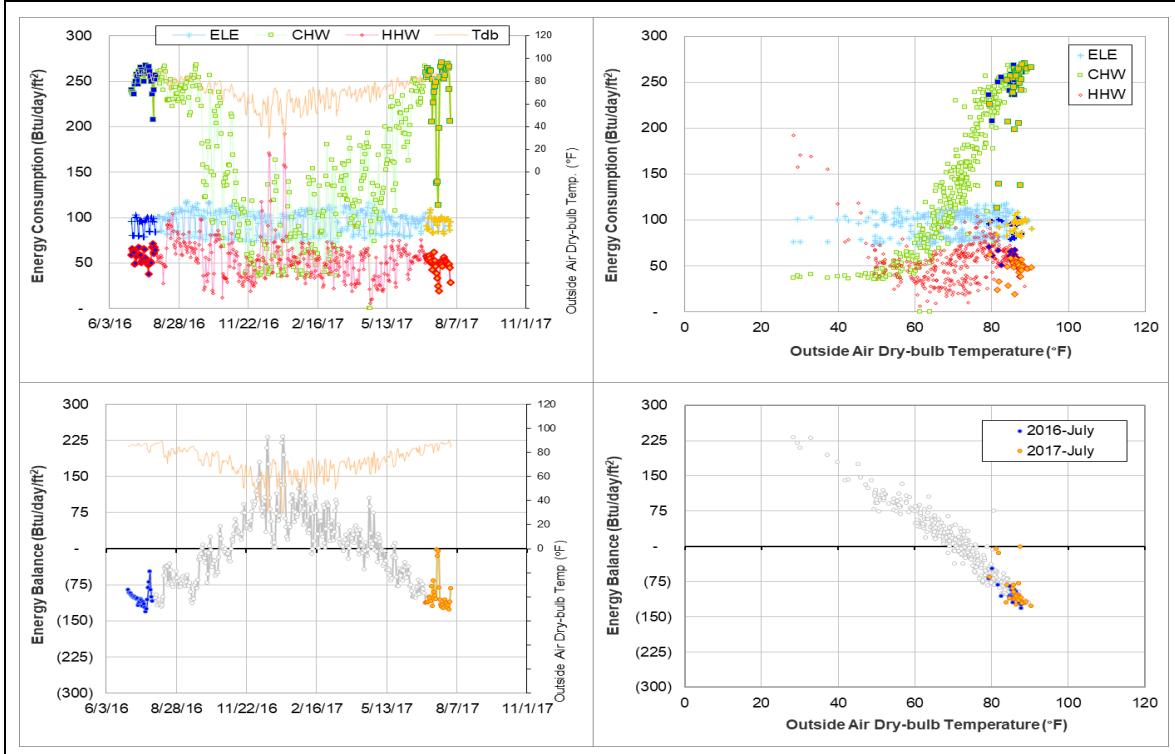

Energy Type	Meter ID	Period	Type	Description
CHW	005913	7/14/2017 – 7/17/2017	Flow rate	Decreased
			Delta-T	Decreased
HHW	005917	7/14/2017 – 7/17/2017	Flow rate	Decreased
			Delta-T	Decreased

### Quantitative descriptions and comments

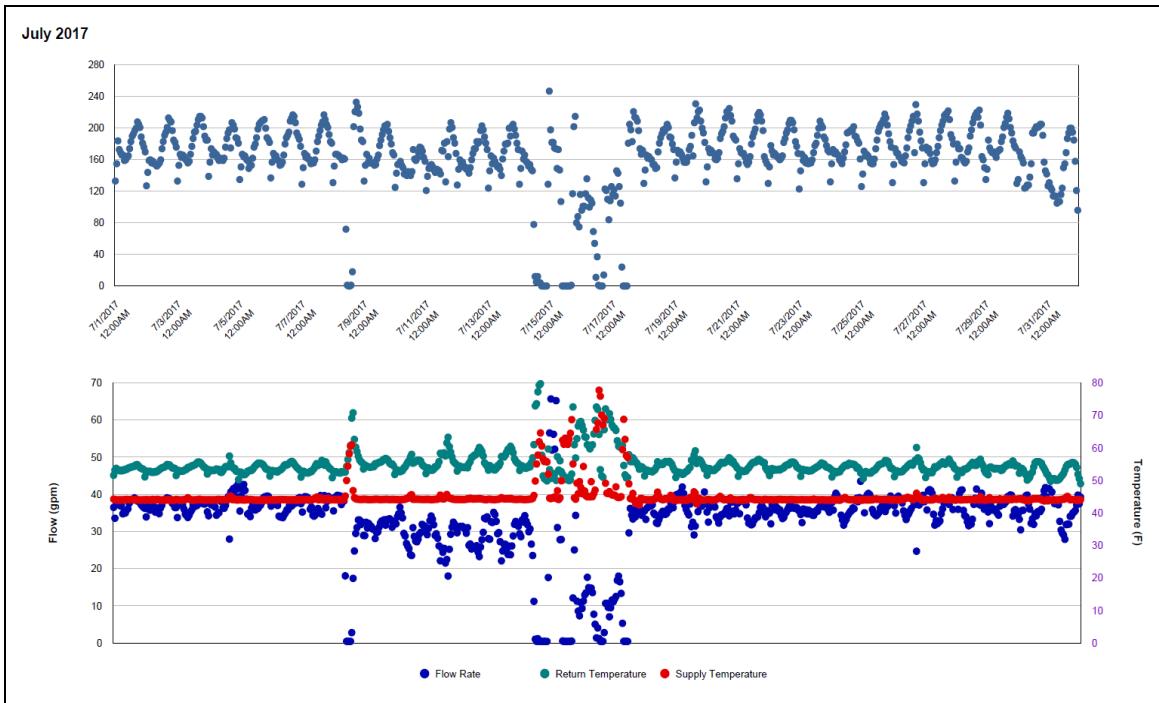

The CHW consumption dropped during 7/14/2017 – 7/17/2017. The flow rate and Delta-T both decreased. The CHW consumption was estimated by model for this period.

Also, the HHW consumption dropped during the same period, 7/14/2017 – 7/17/2017. Both the flow rate and Delta-T decreased. The HHW consumption was estimated by model for this period.

**Energy balance plot using the estimated data for the month of analysis**

## Halbouty Geosciences Building (TAMU Bldg #490)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	006896	18	7/14/2017 – 7/31/2017	Model
HHW	006900	18	7/1/2017 – 7/18/2017	Model
HHW	006917	31	7/1/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level has increased suddenly.	7/14/2017 - Ongoing
HHW	The consumption level has decreased suddenly. (#006900)	5/19/2017 – 7/18/2017
HHW	The consumption level has decreased suddenly. (#006917)	5/27/2017 – Ongoing

### *Changes in sensor readings related to the detected issues*

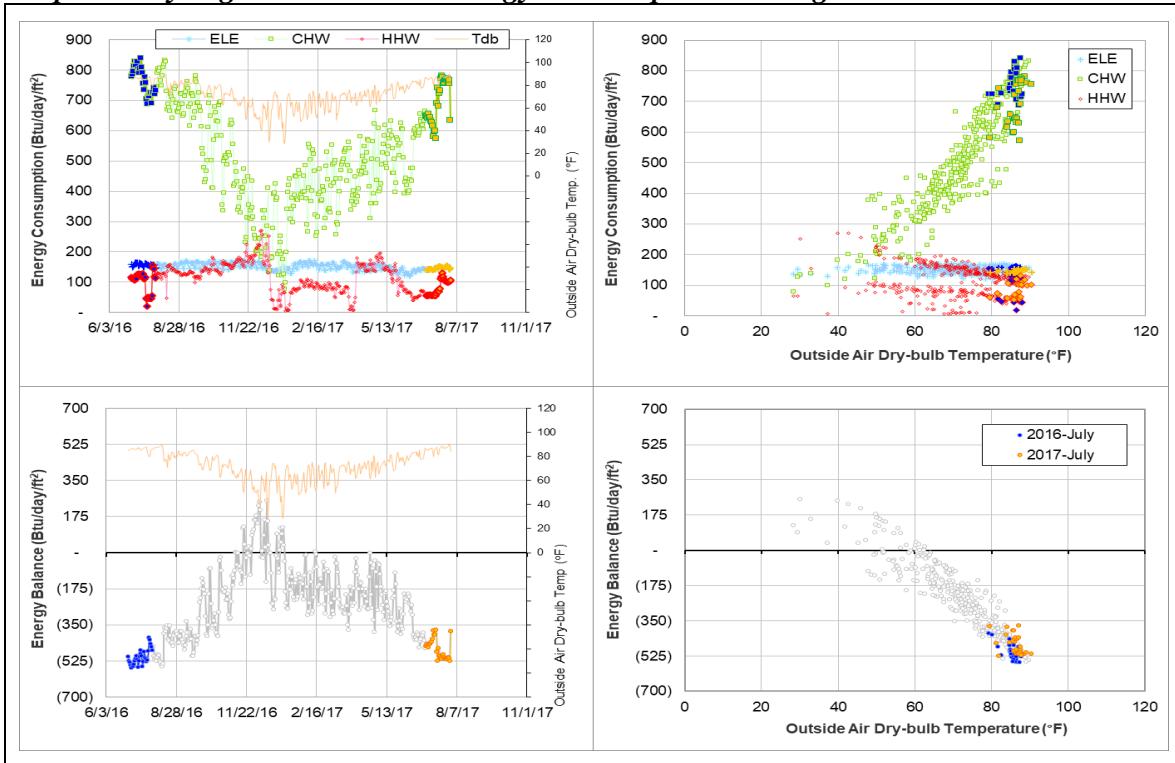

Energy Type	Meter ID	Period	Type	Description
CHW	006896	7/14/2017 – Ongoing	Flow rate	Increased
HHW	006900	5/19/2017 – 7/18/2017	Flow rate	Decreased
HHW	006917	5/30/2017 – 6/15/2017	Delta-T	Decreased to zero
		6/15/2017 – Ongoing	Flow rate	Decreased to zero

### *Quantitative descriptions and comments*

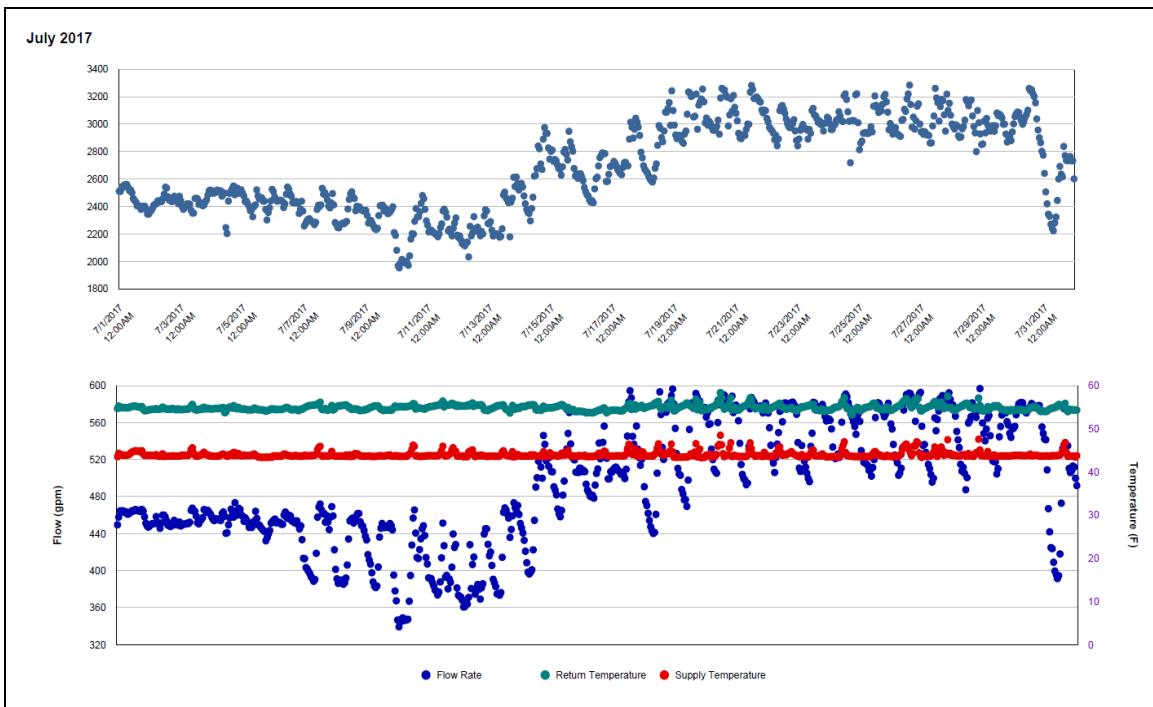

The CHW consumption pattern increased by 100 Btu/day/ft<sup>2</sup> starting 7/14/2017. The flow rate increased from 400 - 480 gpm to 500 - 600 gpm. around this time as well. The CHW consumption was estimated by model for this period.

There are two HHW meters for this building. Meter #006900 experienced a decrease in flow rate by up to half starting 5/19/2017 until 7/18/2017. HHW meter #006917 experienced a decrease to near zero Delta-T for the period 5/30/2017 – 6/15/2017 and then a decrease in flow rate to zero or near zero for the period 6/15/2017 – 7/31/2017. The HHW consumption was estimated for both meters by model.

## Utilities & Energy Services Central Office (TAMU Bldg #496)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	006933	3	7/25/2017 – 7/27/2017	Average

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
HHW	The consumption dropped for a short period.	7/25/2017 – 7/27/2017

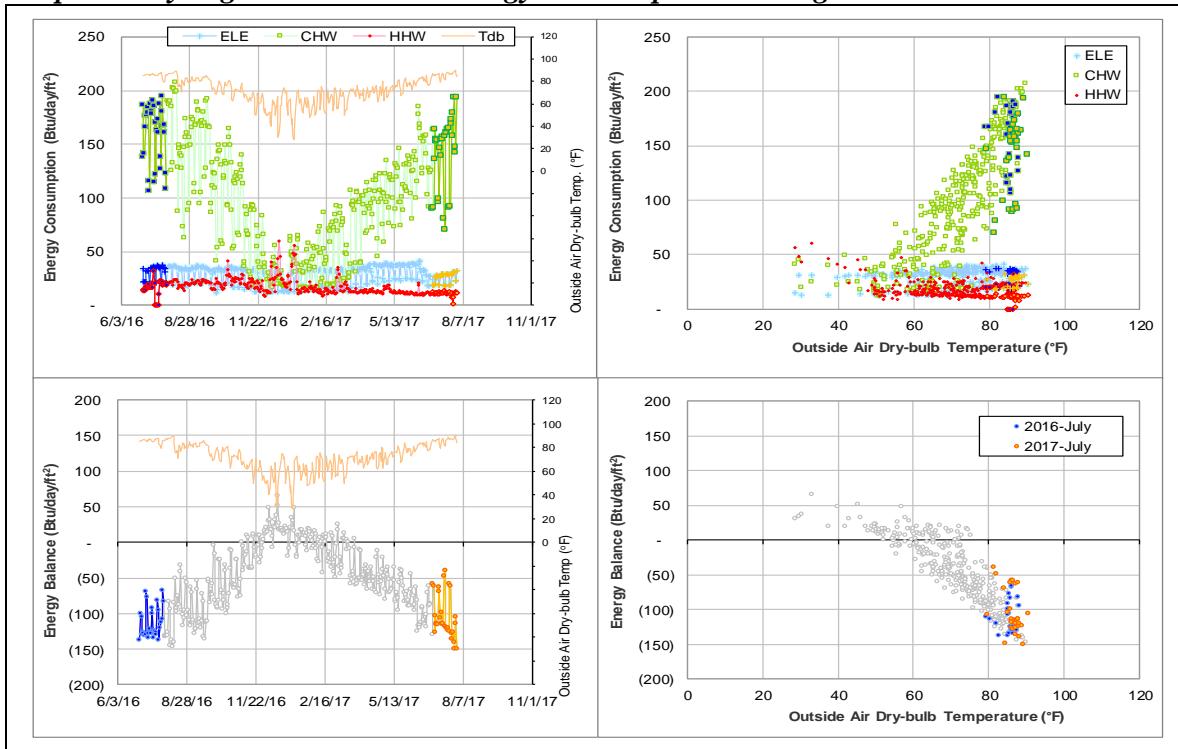

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
HHW	006933	7/25/2017 – 7/27/2017	Delta-T	Zero

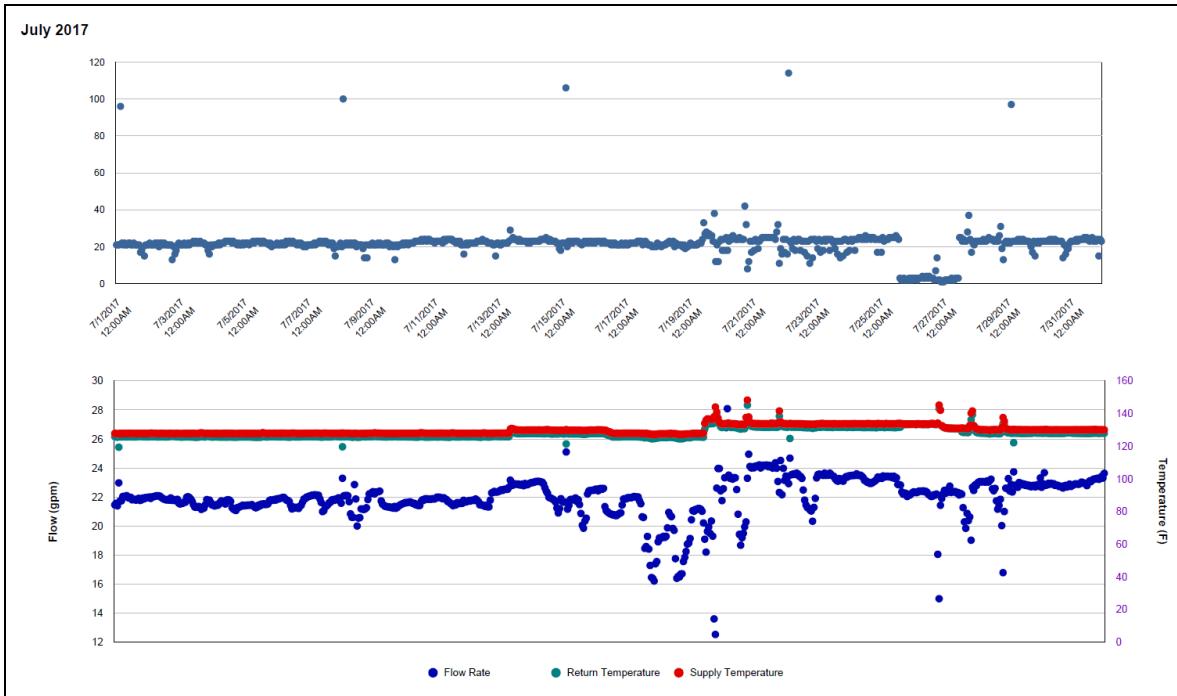

### Quantitative descriptions and comments

HHW Delta-T became zero or near zero during 7/25/2017 – 7/27/2017, resulting in a sudden drop of HHW consumption. These days are estimated by taking average of the current month. See also Section II-3.

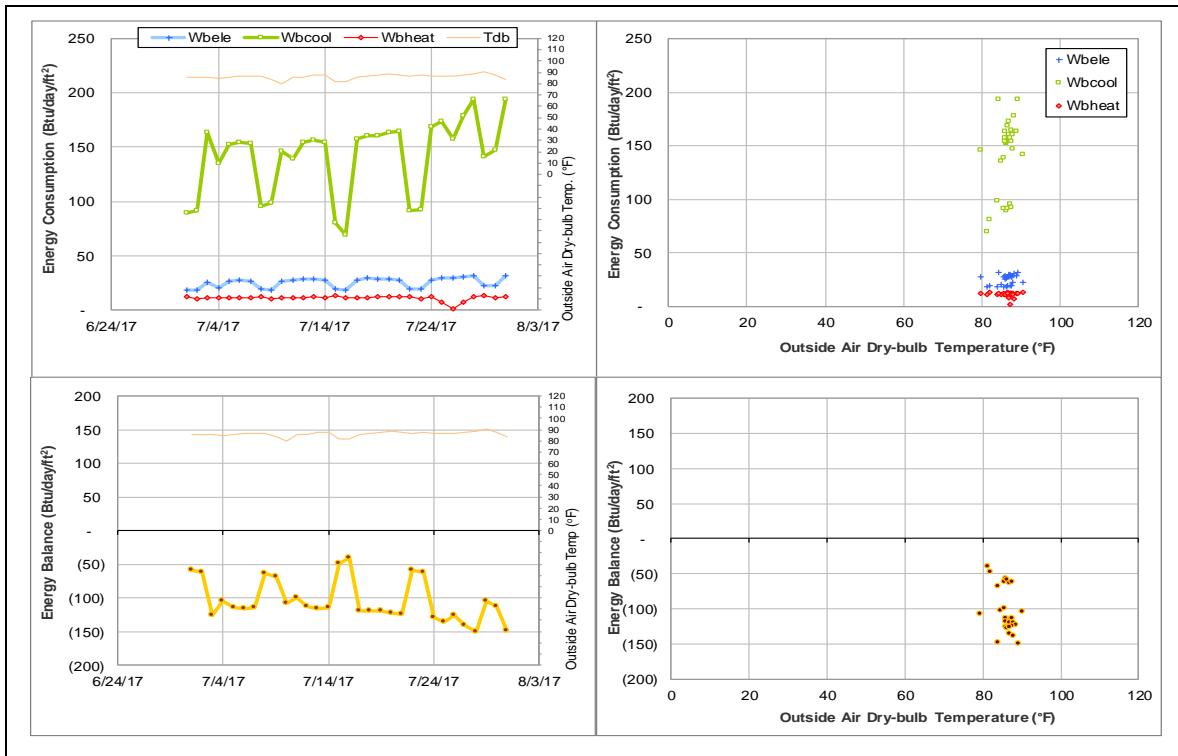

### Explanatory Figure: 13 months energy balance plot with original data.

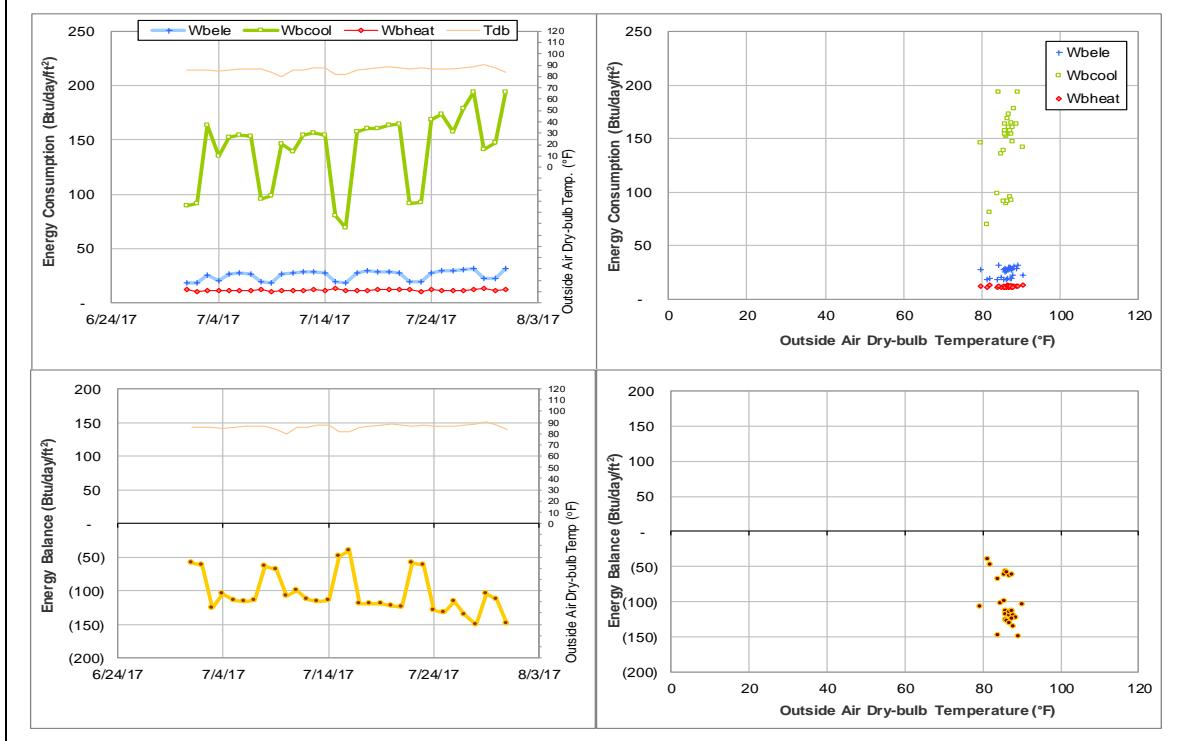

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis**

## Heep Laboratory Building (TAMU Bldg #511)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	005821	31	7/1/2017 – 7/31/2017	Model
HHW	005825	31	7/1/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The metered values appear to be faulty.	4/1/2017 – Ongoing
HHW	The consumption level has decreased suddenly.	5/8/2017 – Ongoing

### *Changes in sensor readings related to the detected issues*

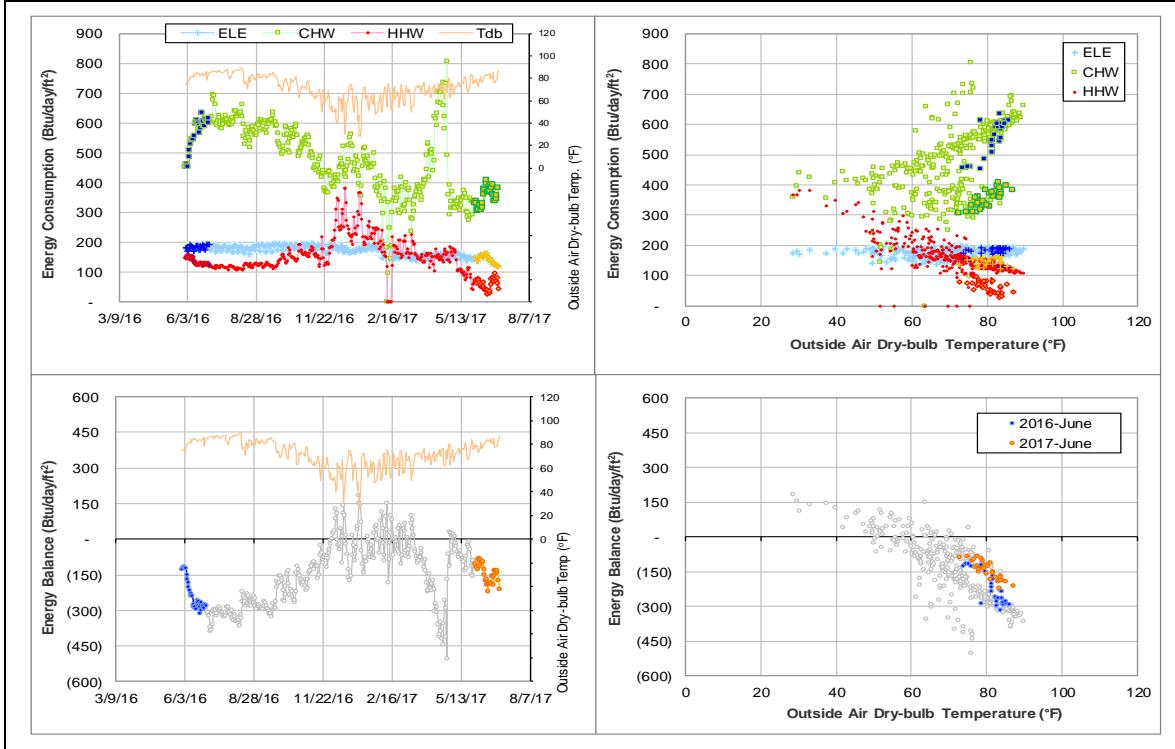

Energy Type	Meter ID	Period	Type	Description
CHW	005821	4/1/2017 – Ongoing	Supply Temp	Faulty – drifted
HHW	005825	5/8/2017 – 7/9/2017	Flow rate	Low
		7/10/2017 – Ongoing	Flow rate	Fluctuates
			Return temp	High
		7/19/2017 – Ongoing	Supply temp	High

### *Quantitative descriptions and comments*

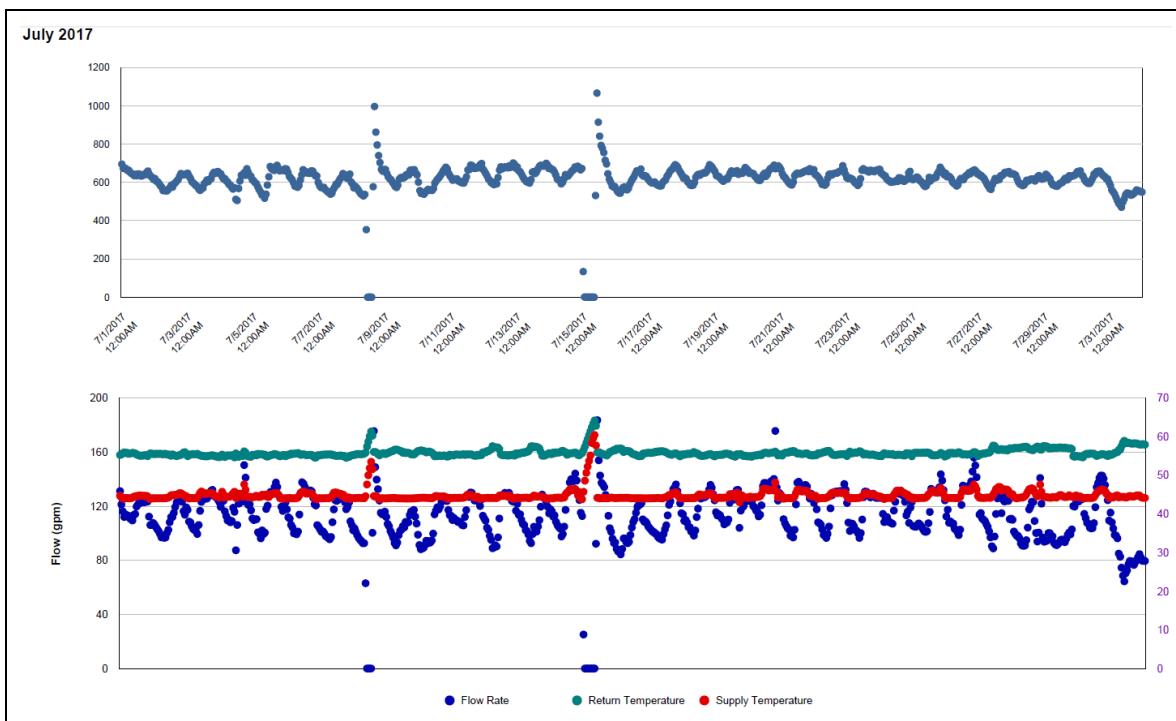

The CHW supply temp sensor appears to be faulty. The supply temp readings started to drift in the end of March 2017 and decreased to 35°F during April 2017. On 4/27/2017, the supply temp value jumped to 44°F. By comparing this value with the two hydrologically closest buildings #0471 Pavilion and #0444 Peterson, it is suspected that this meter is still under-calibrated (See the explanatory figure). The CHW of the whole month is estimated by model.

The HHW flow sharply dropped on 5/8/2017 from 20 – 25 gpm to 10 – 15 gpm, resulting in a significant decrease in HHW consumption. This decrease did not occur in the previous year but is suspected to be the plant setback. The meter readings started to fluctuate since 7/10/2017. The flow reading had a sudden increase and Delta-T decreased as the return temp became higher. The combined effect is a slight increase in consumption, but the level is still lower than the level before 5/8/2017. There is also an increase in supply temp which is suspected to be due to the plant operation. The HHW of this month is estimated by model.

## All Faiths Chapel (TAMU Bldg #512)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	004288	12	7/20/2017 – 7/31/2017	Model
HHW	004293	31	7/1/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level has decreased suddenly.	7/20/2017 – Ongoing
HHW	The consumption level has decreased suddenly. Scattering data are observed.	4/26/2017 – Ongoing 6/1/2017 – Ongoing

### *Changes in sensor readings related to the detected issues*

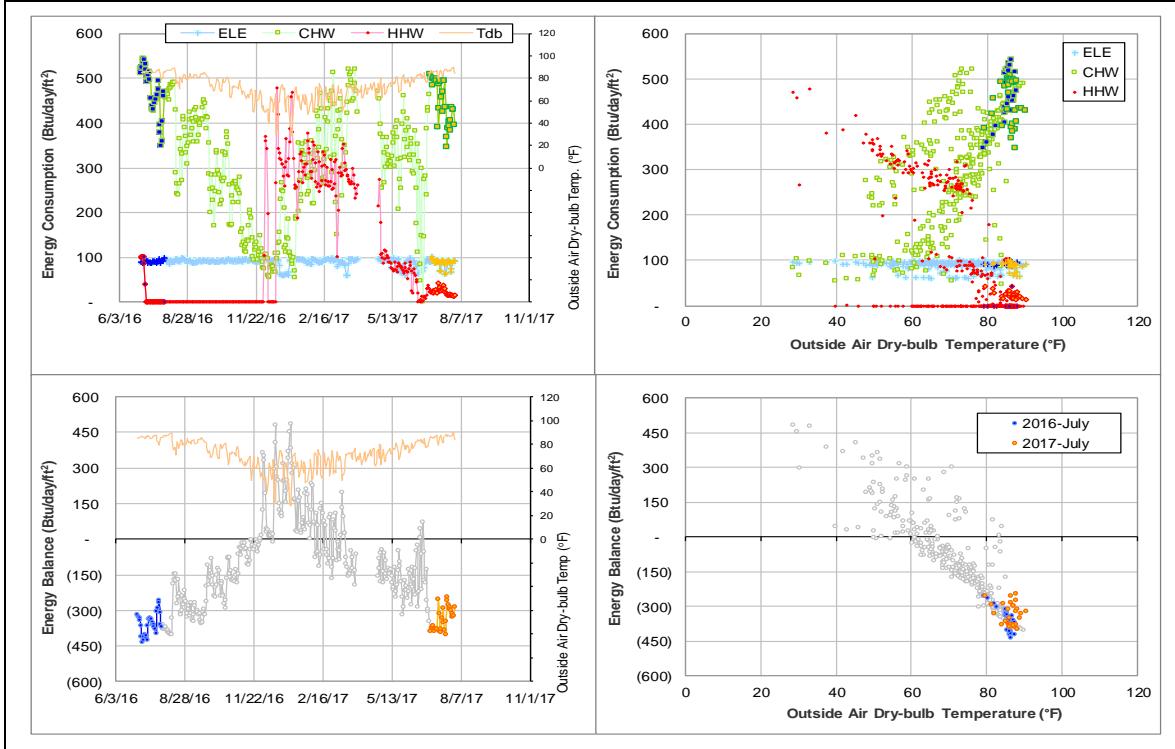

Energy Type	Meter ID	Period	Type	Description
CHW	004288	7/20/2017 – Ongoing	Return temp, flow rate	Low
HHW	004293	6/16/2017 – Ongoing	Delta-T	Zero or near zero

### *Quantitative descriptions and comments*

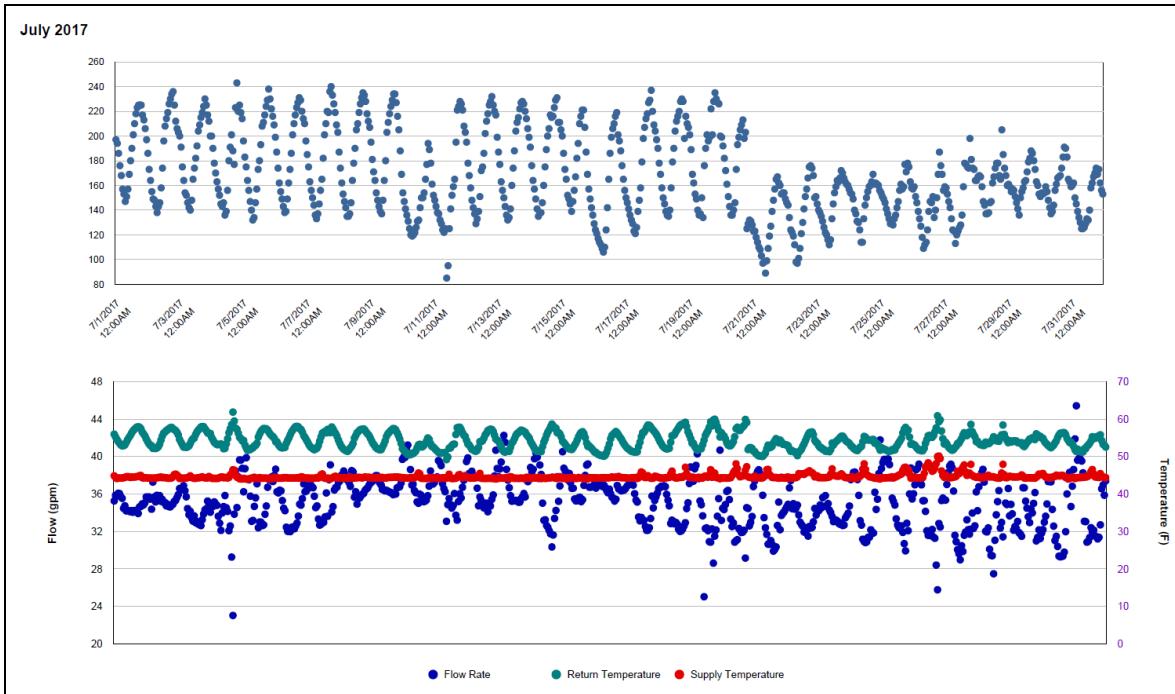

CHW return temperature decreased on 7/20/2017 resulting in a lower delta-T. The flow rate also dropped slightly as its lower bound became slightly lower. This period is estimated by model.

HHW flow rate and both temperatures had been very unstable and have had multiple periods of anomaly during June 2017. The Delta-T became very small since 6/16/2017. The HHW of the whole month is estimated by model.

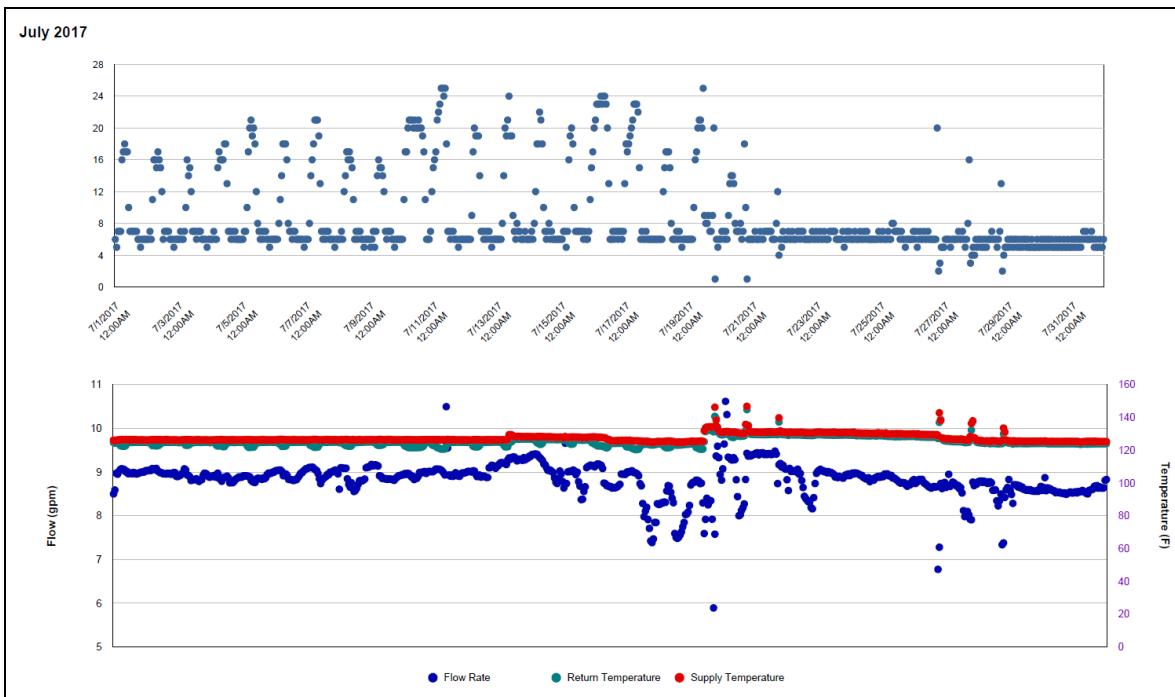

**Explanatory Figure: 13 months energy balance plot with original data.**

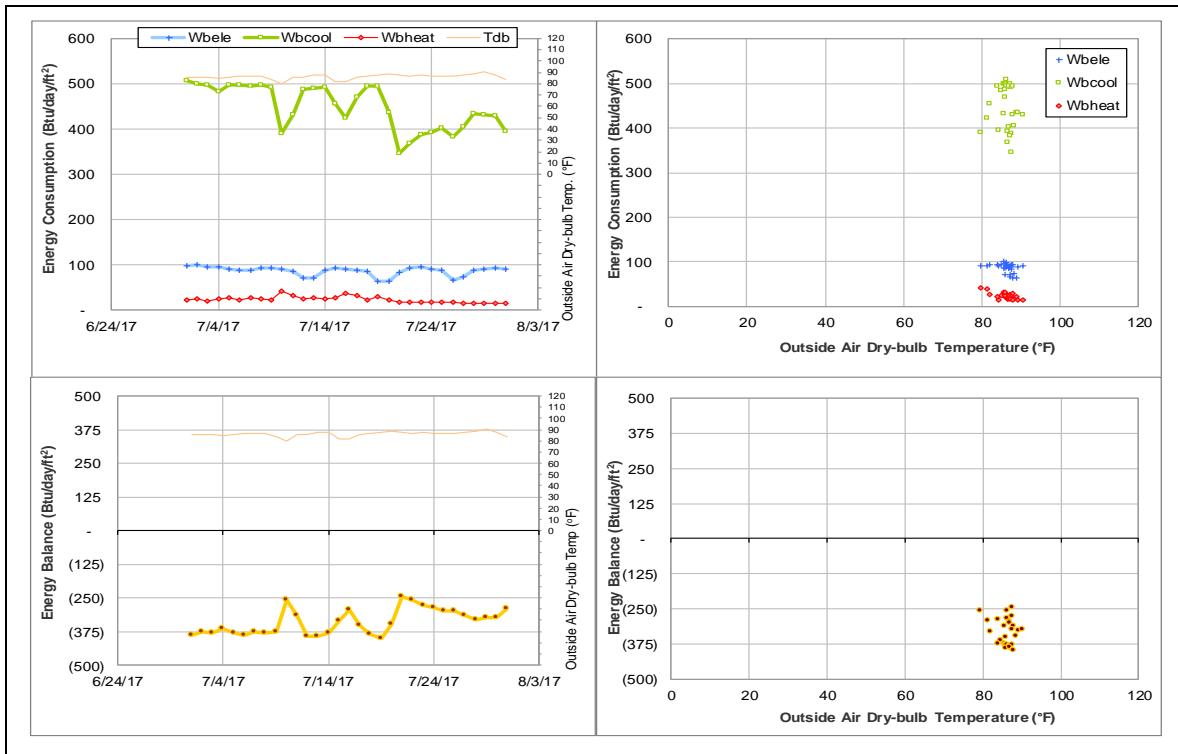

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017)**

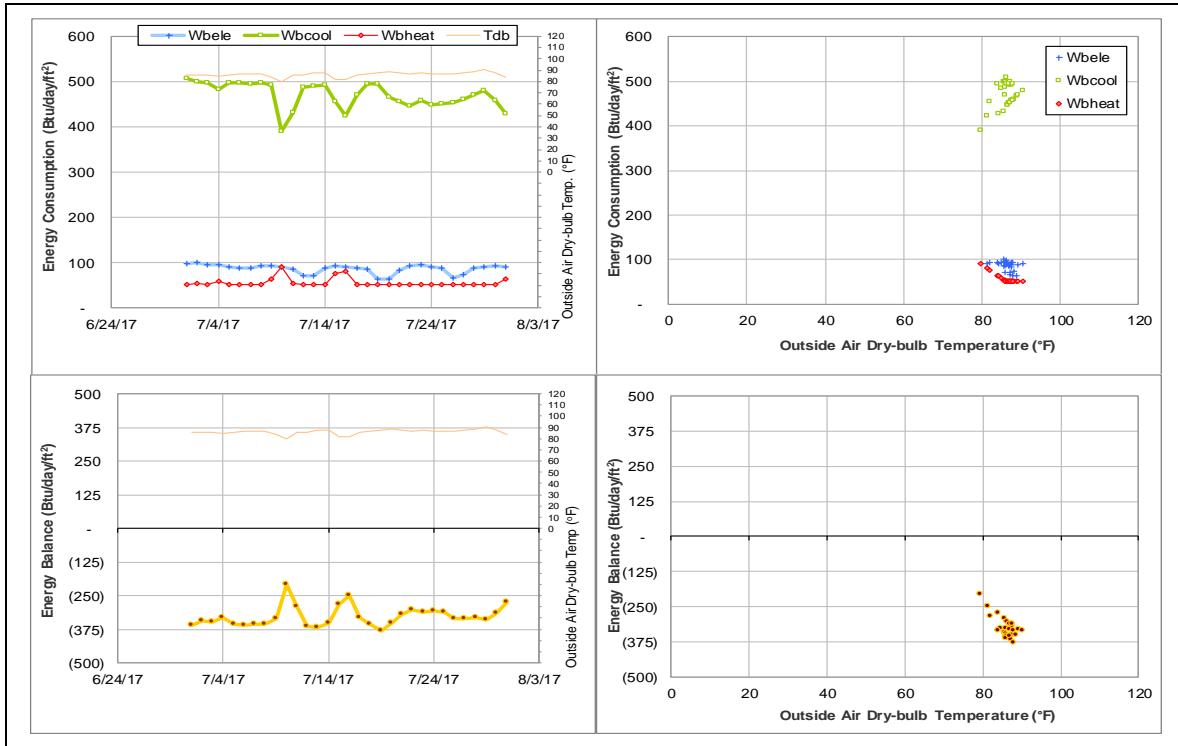

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

## Doherty Building (TAMU Bldg #513)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002898	31	7/1/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level is lower than the level during the past year.	7/1/2017 – Ongoing

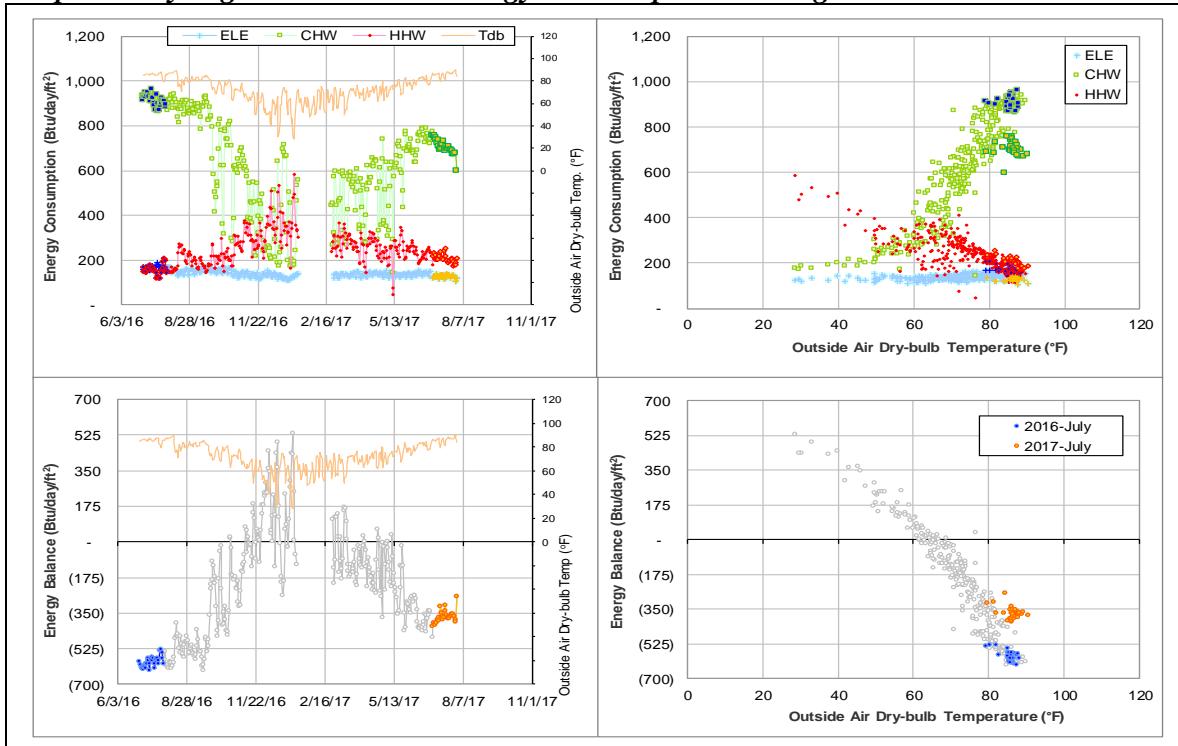

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
CHW	002898	7/1/2017 – 7/31/2017	Flow rate	Decrease gradually

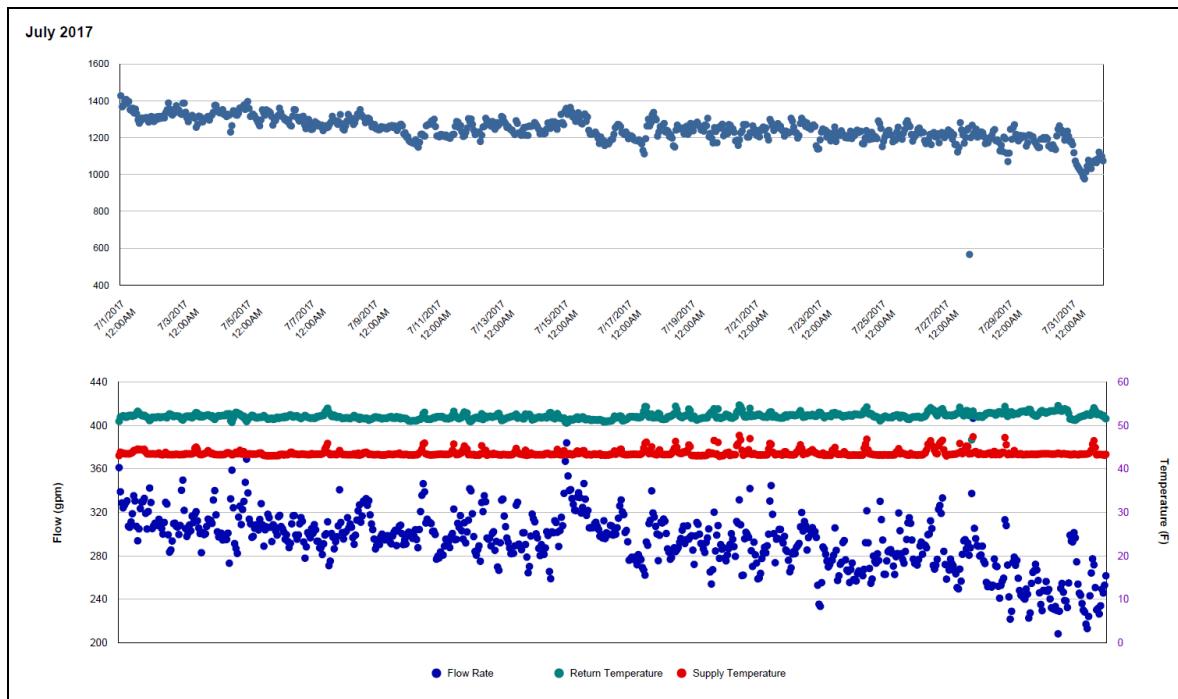

### *Quantitative descriptions and comments*

CHW flow rate started to slide down slowly since 7/1/2017 from 300 – 340 gpm at the beginning of the month to 210 – 280 gpm at the end. The consumption level is seen about 200 Btu/day-ft<sup>2</sup> lower than the last year. The whole month is estimated by a model.

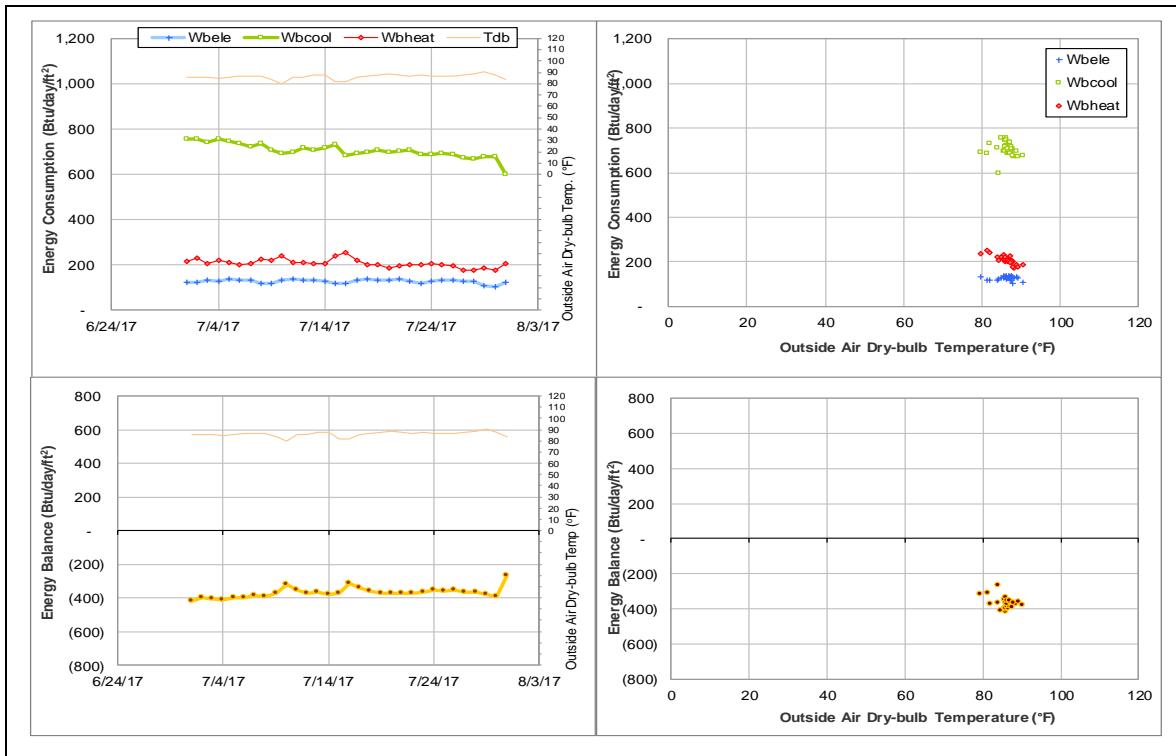

### *Explanatory Figure: 13 months energy balance plot with original data.*

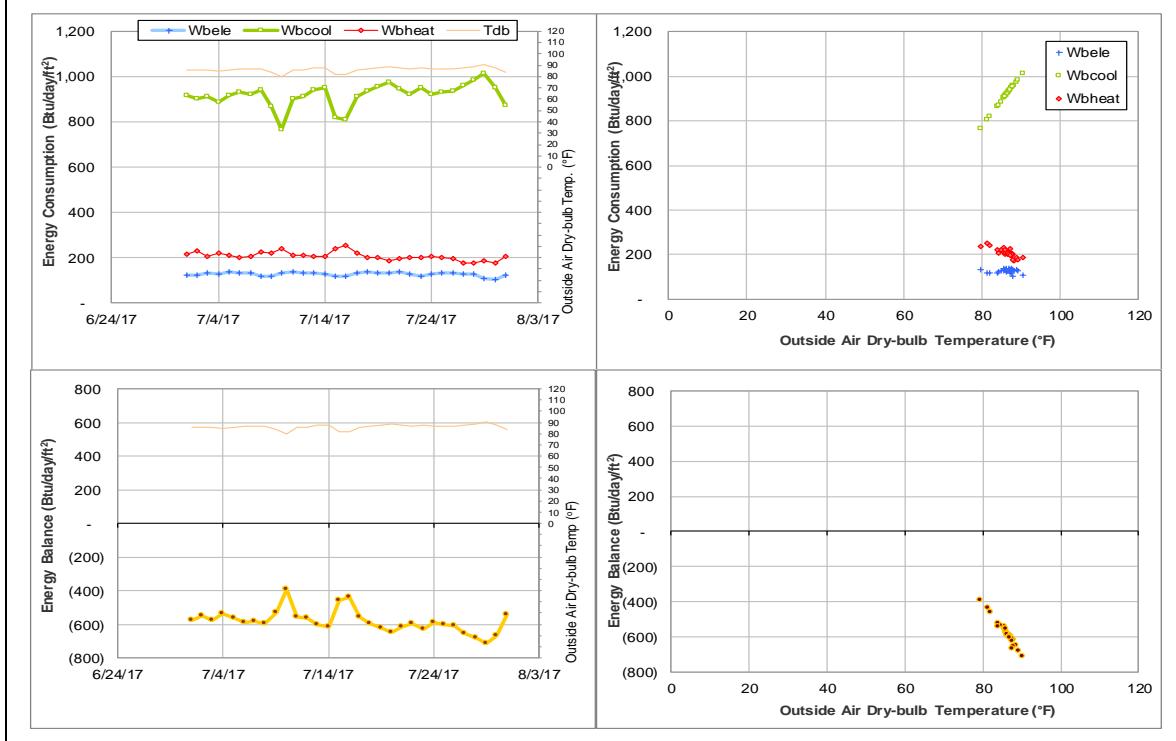

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017)**

## Computing Services Center (TAMU Bldg #516)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	003959	31	7/1/2017 – 7/31/2017	Average

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level has increased suddenly.	6/19/2017 – Ongoing

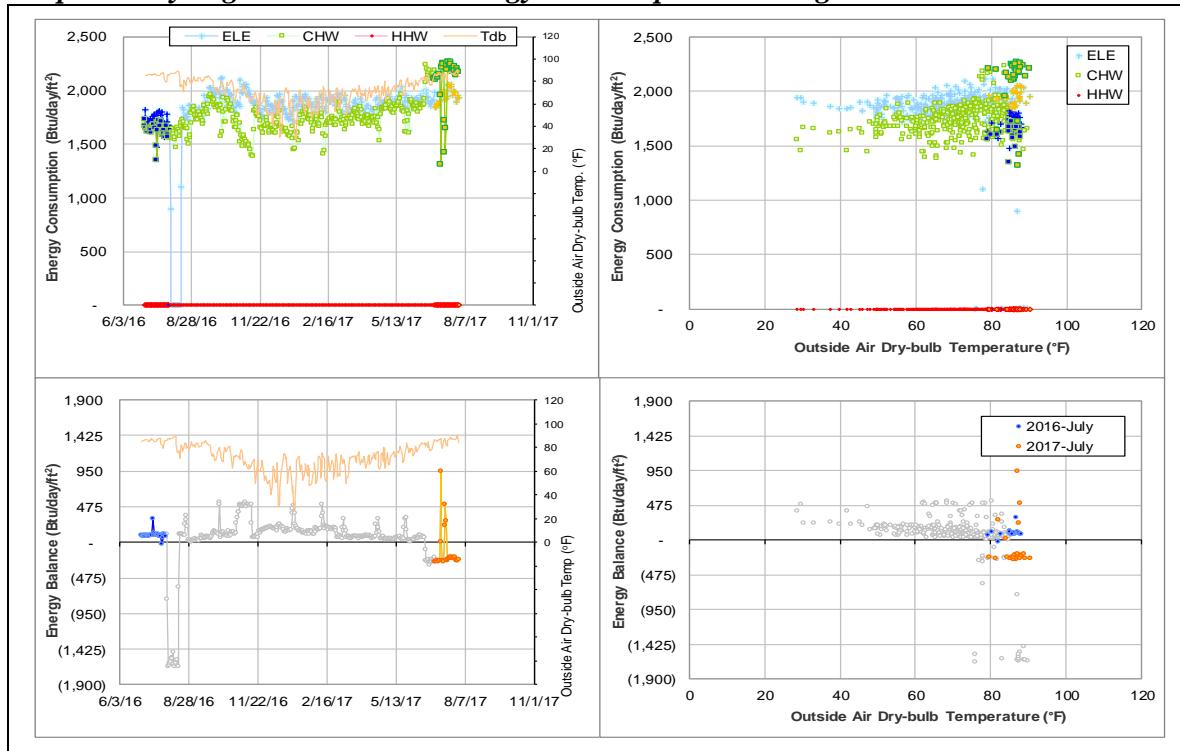

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
CHW	003959	6/19/2017 – Ongoing	Flow rate	High

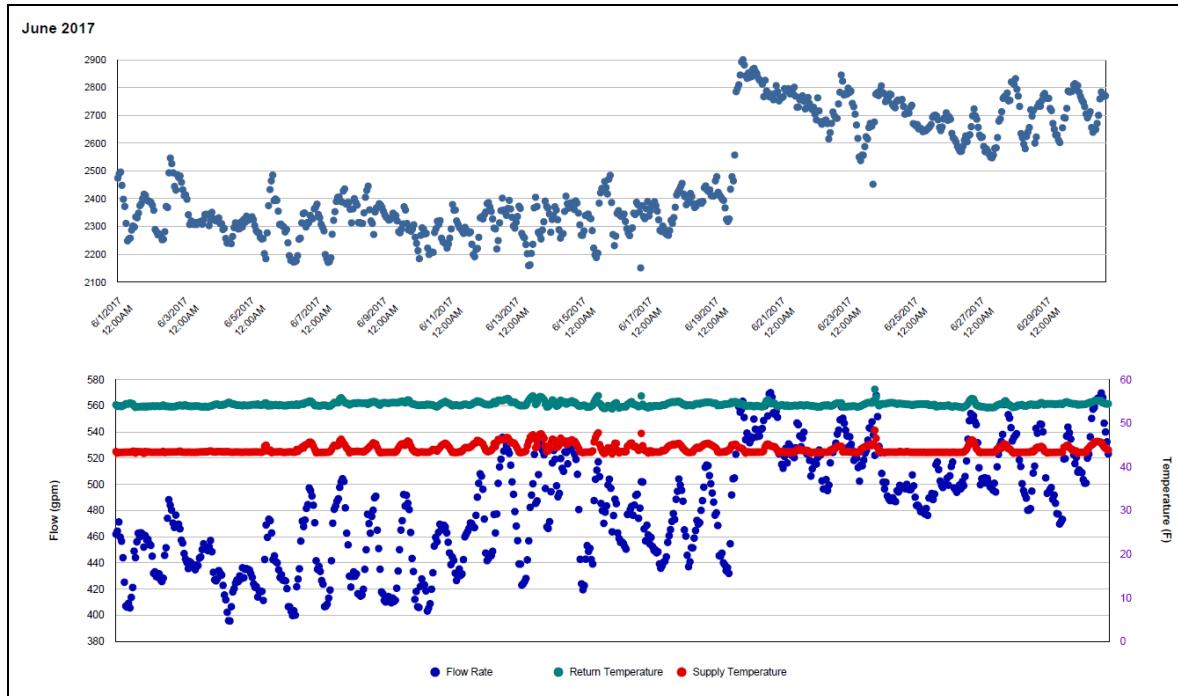

### *Quantitative descriptions and comments*

CHW flow rate increased from the range of 400 – 520 gpm to 480 – 560 gpm since 6/19/2017 resulting in a significant increase in CHW consumption. The consumption is estimated by taking average over the other days of this month.

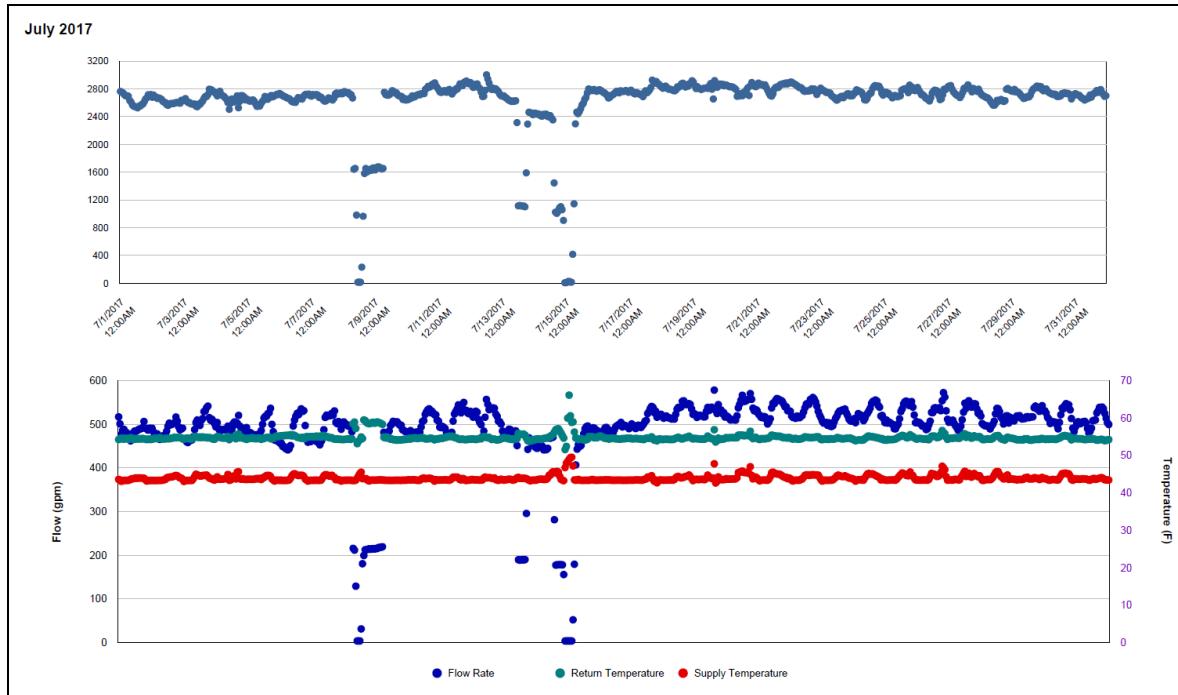

### *Explanatory Figure: 13 months energy balance plot with original data.*

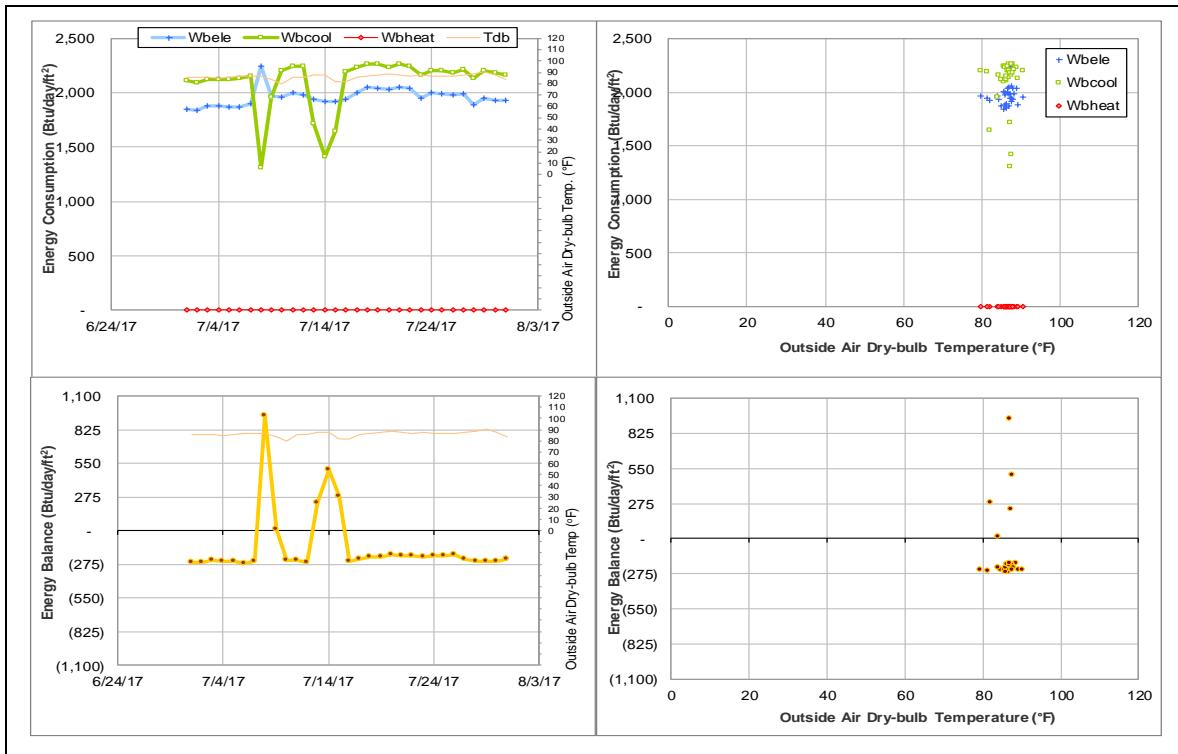

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during June 2017)**

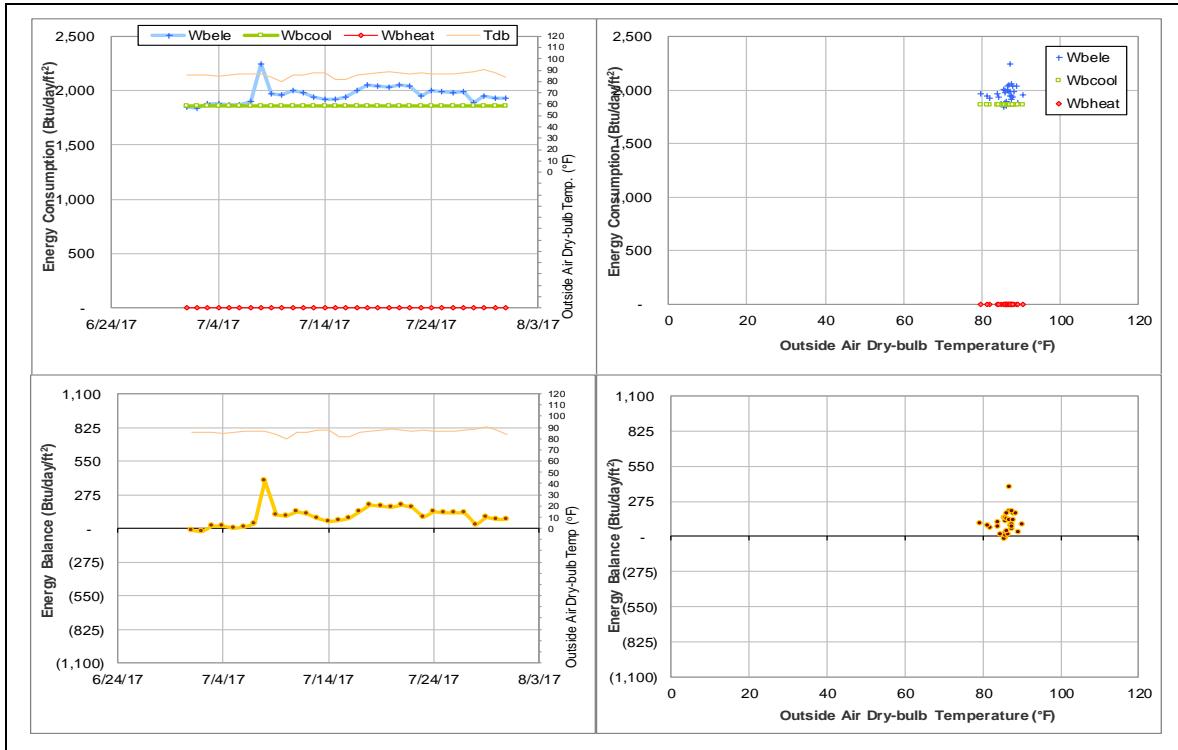

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017)**

## Beutel Health Center (TAMU Bldg #520)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	003933	31	7/1/2017 – 7/31/2017	Model

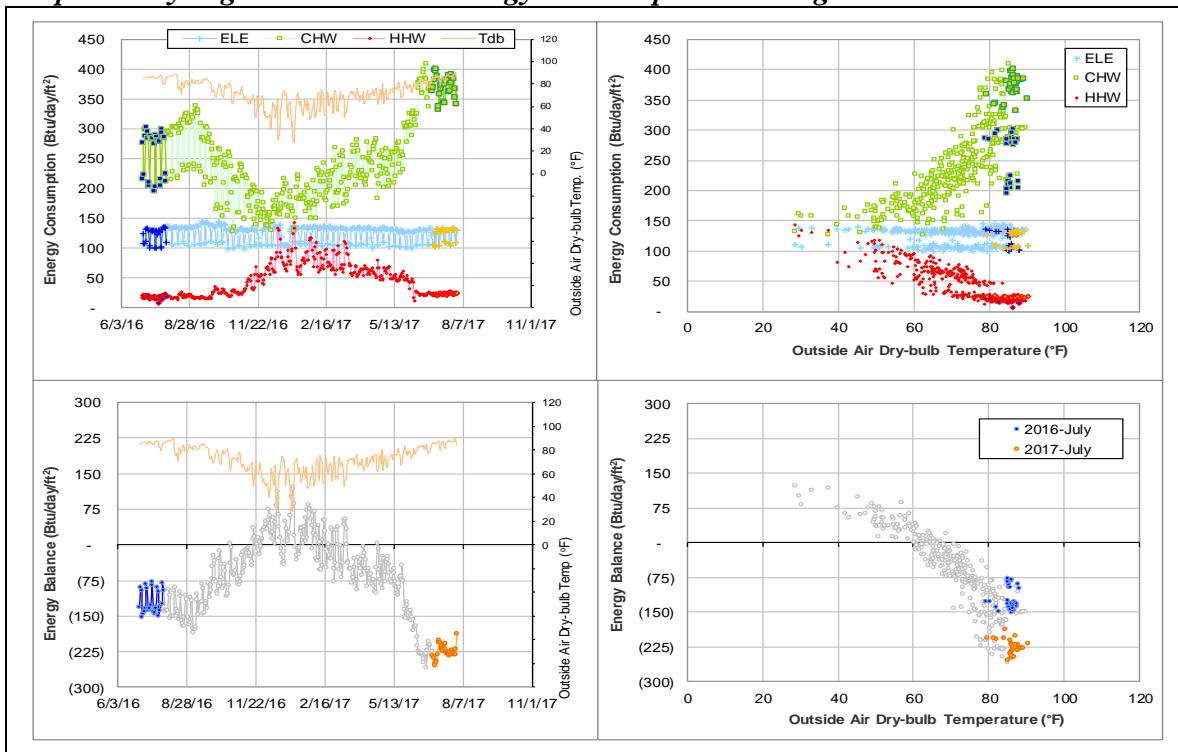

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level is higher than the level during the past year.	6/1/2017 – Ongoing

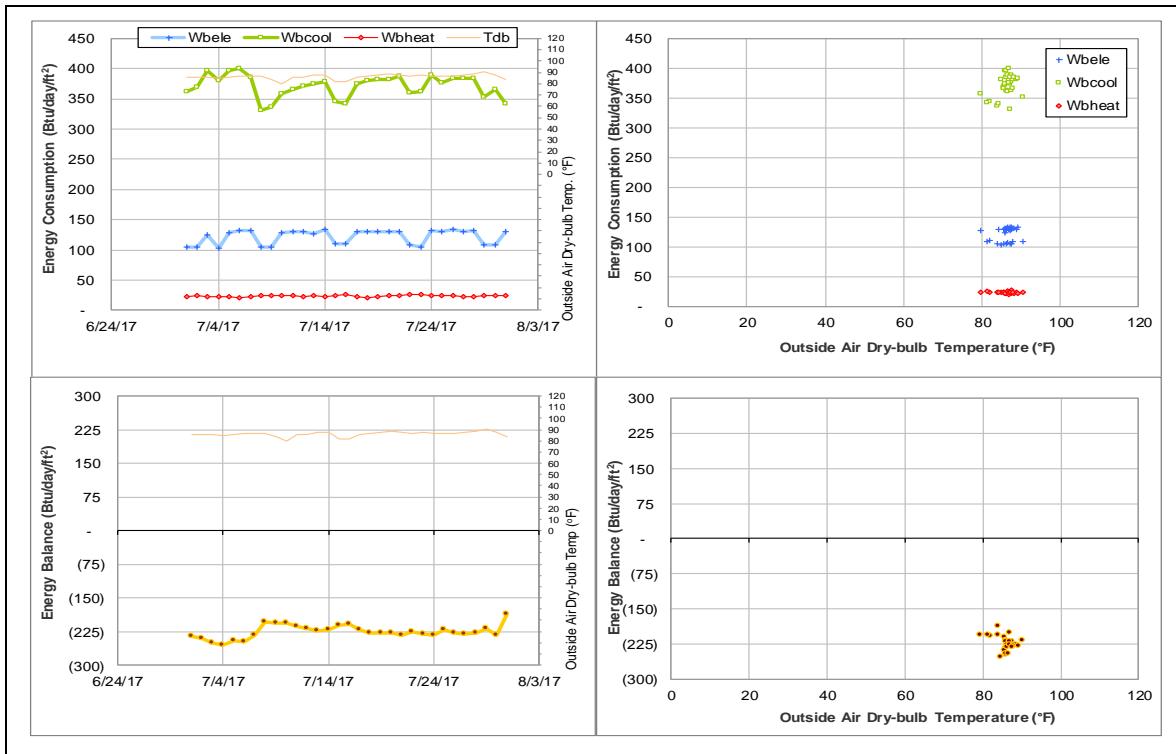

### Quantitative descriptions and comments

CHW consumption of June this year is 50 – 100 Btu/day-ft<sup>2</sup> higher than the previous year. There is no obvious meter reading anomaly observed. The consumption of this month is estimated by model.

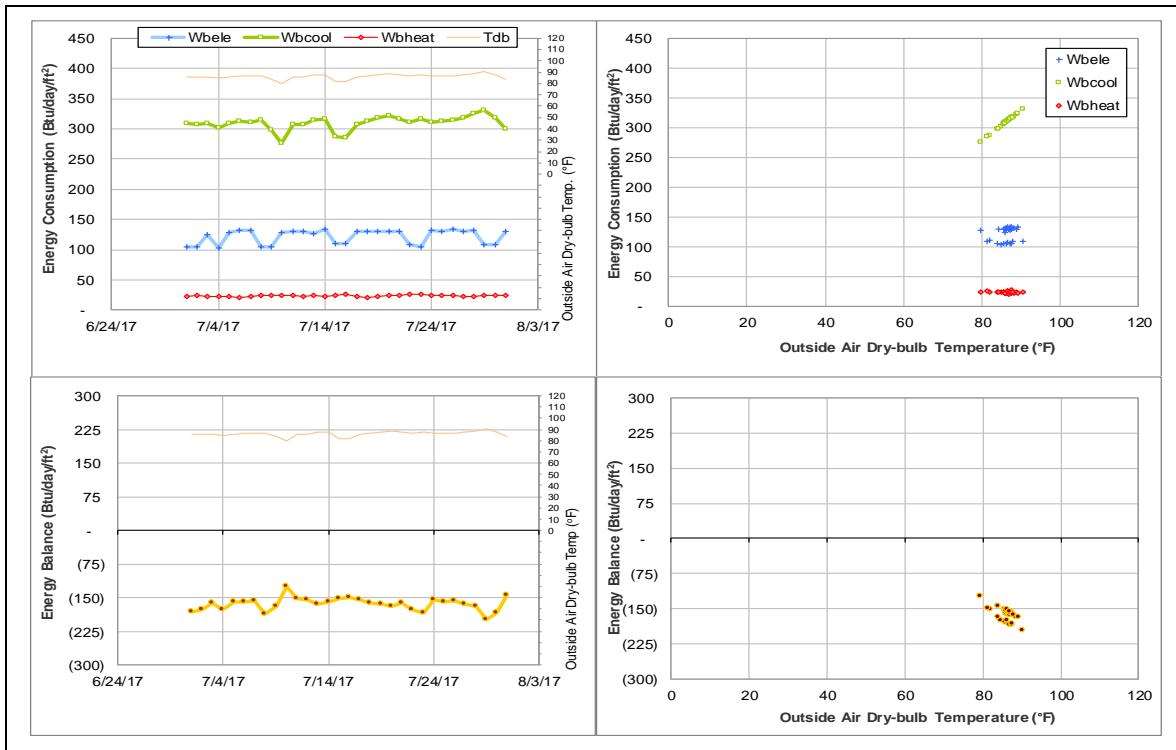

### Explanatory Figure: 13 months energy balance plot with original data.

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis**

## Clements Residence Hall (TAMU Bldg #548)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	002740	2	7/20/2017 – 7/21/2017	Average

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
HHW	The consumption dropped for a short period.	7/20/2017 – 7/21/2017

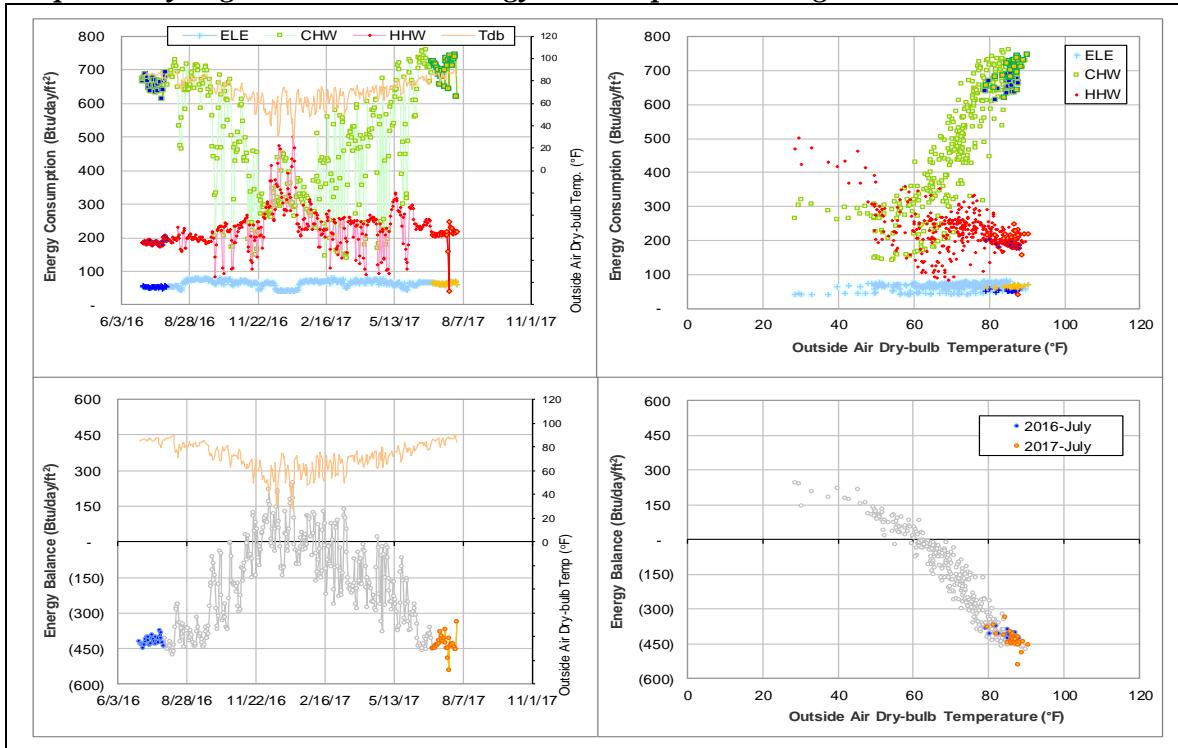

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
HHW	002740	7/20/2017 – 7/21/2017	Flow rate	Zero

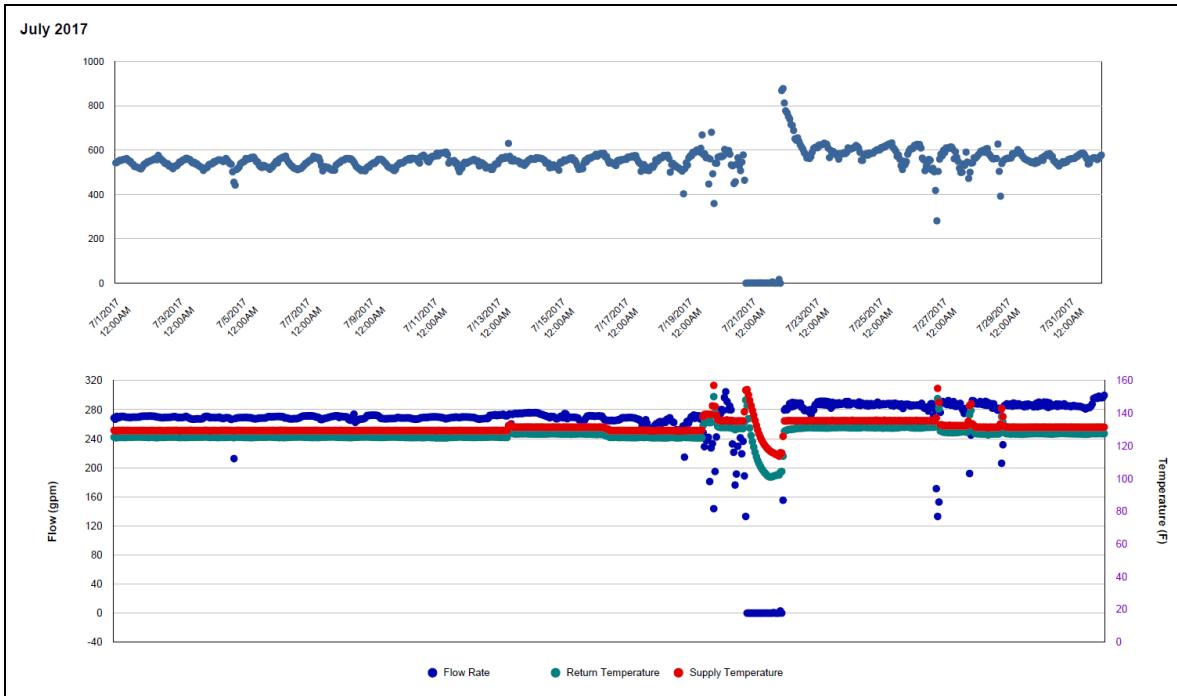

### *Quantitative descriptions and comments*

HHW flow rate dropped to zero during 7/20/2017 – 7/21/2017, resulting in a sudden drop of HHW consumption. These days are estimated by taking average of the current month.

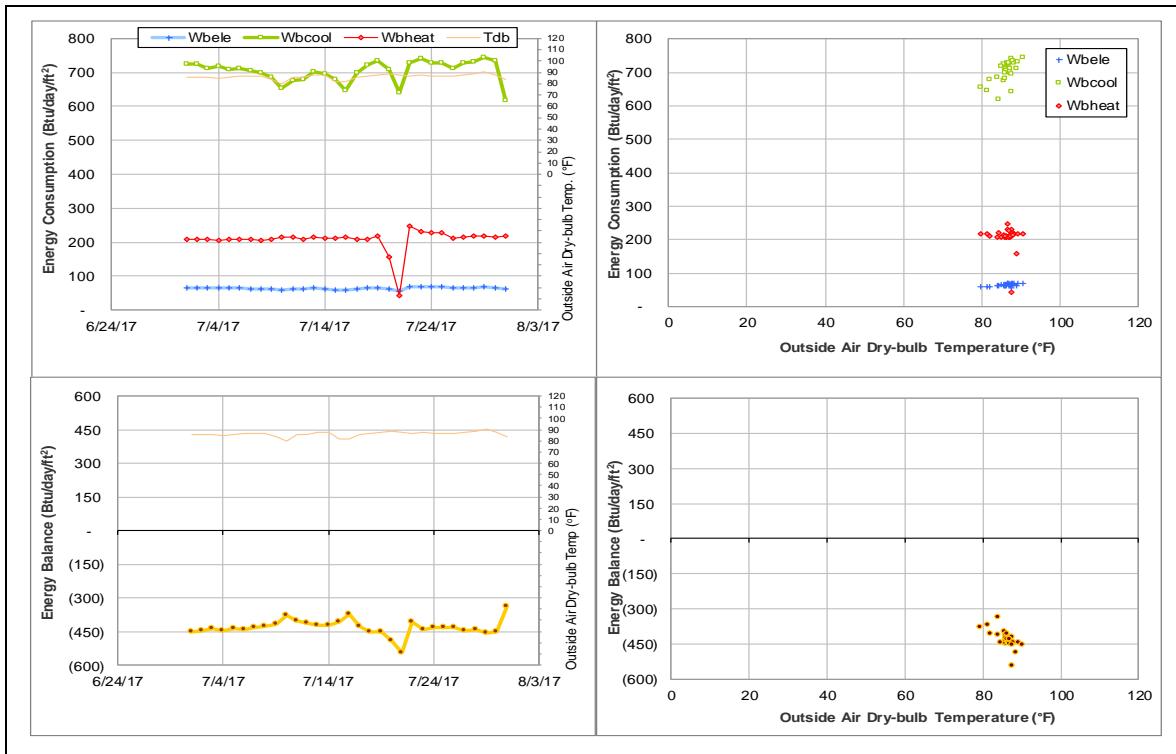

### *Explanatory Figure: 13 months energy balance plot with original data.*

## McFadden Residence Hall (TAMU Bldg #550)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	002188	6	7/22/2017 – 7/27/2017	Model
HHW	002192	10	7/22/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The metered values appear to be faulty.	7/22/2017 – 7/27/2017
HHW	The metered values appear to be faulty.	7/22/2017 – 7/27/2017
	The consumption increased for a short period.	7/28/2017 – 7/30/2017
	The consumption level has decreased suddenly.	7/31/2017 – Ongoing

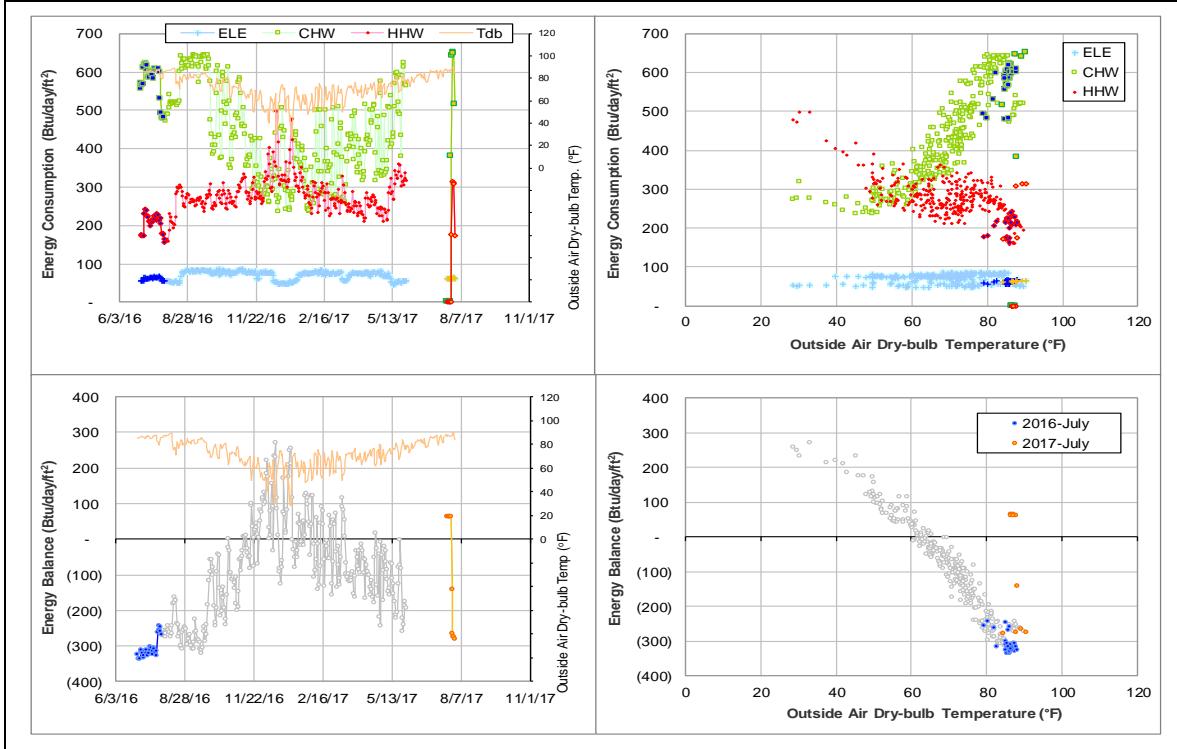

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
CHW	002188	7/22/2017 – 7/27/2017	Flow rate, supply temp, return temp	Faulty – constant
HHW	002192	7/22/2017 – 7/27/2017	Flow rate, supply temp, return temp	Faulty – constant
		7/28/2017 – 7/30/2017	Flow rate	High
		7/31/2017 – Ongoing	Flow rate	Zero

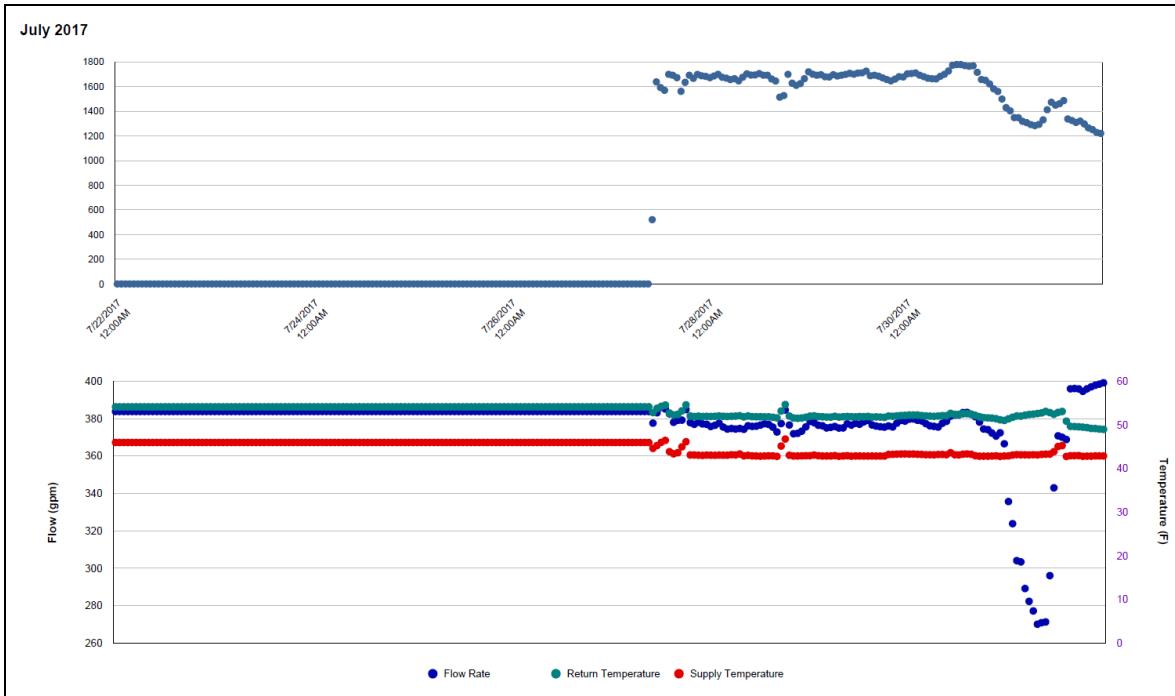

### *Quantitative descriptions and comments*

Both CHW and HHW consumption was missing during 6/1/2017 – 7/21/2017. After the missing, all meter readings remained constant during 7/22/2017 – 7/27/2017. CHW readings appear normal since 7/28/2017. HHW readings, however, showed higher flow rate (180 gpm) on 7/28/2017 – 7/30/2017 compared to last year (160 gpm). Its flow rate dropped to zero on 7/31/2017.

## Southern Crop Improvement Greenhouse (TAMU Bldg #1512)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
ELE	005931	31	7/1/2017 – 7/31/2017	Model

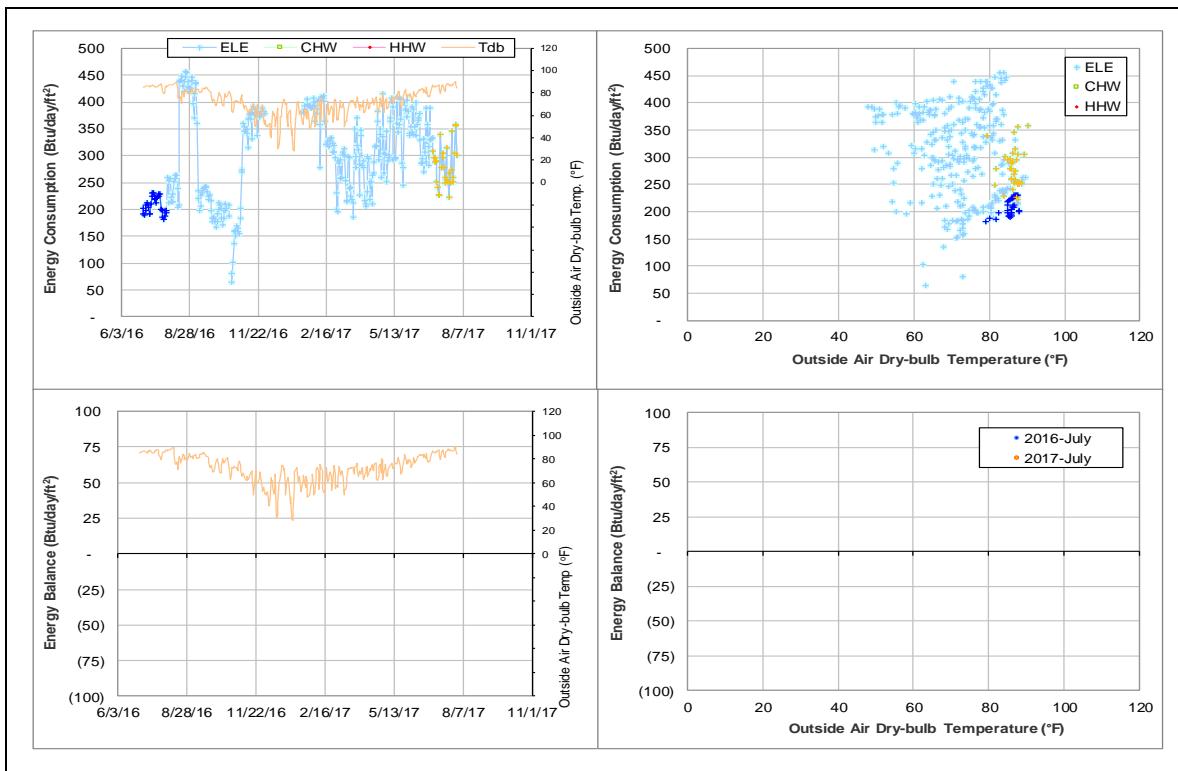

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
ELE	The ELE consumption increased.	1/19/2017 – Ongoing

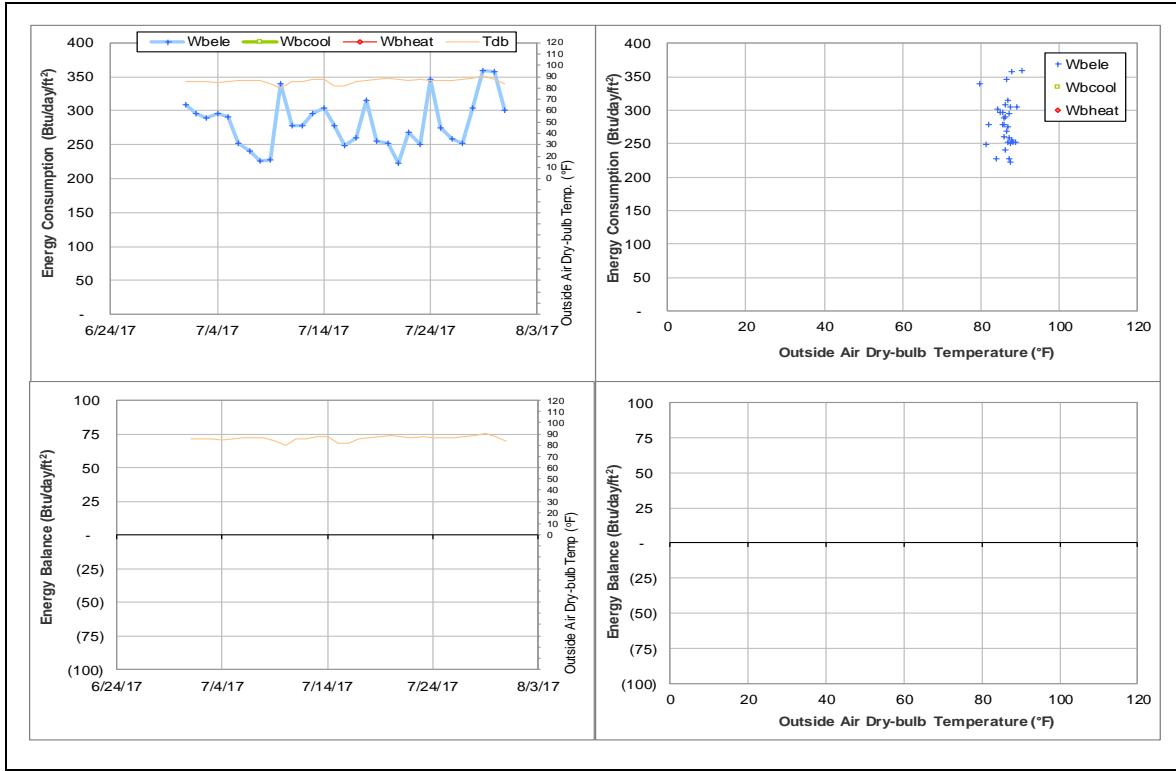

### Quantitative descriptions and comments

The ELE consumption level has changed frequently since July 2015 as shown in the time series. During the period of 1/22/2017 – 2/15/2017 it increased to the higher consumption pattern but then dropped again. The ELE consumption is estimated using a model based on data during 7/1/2014 – 6/30/2015 when the consumption was stable.

## TX School of Rural Public Health (TAMU Bldg #1518, 1519, 1520)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
ELE	005274	30	7/1/2017 – 7/31/2017	Switch with 005275
ELE	005275	30	7/1/2017 – 7/31/2017	Switch with 005274

### Detected issues in the energy balance and/or the consumption data

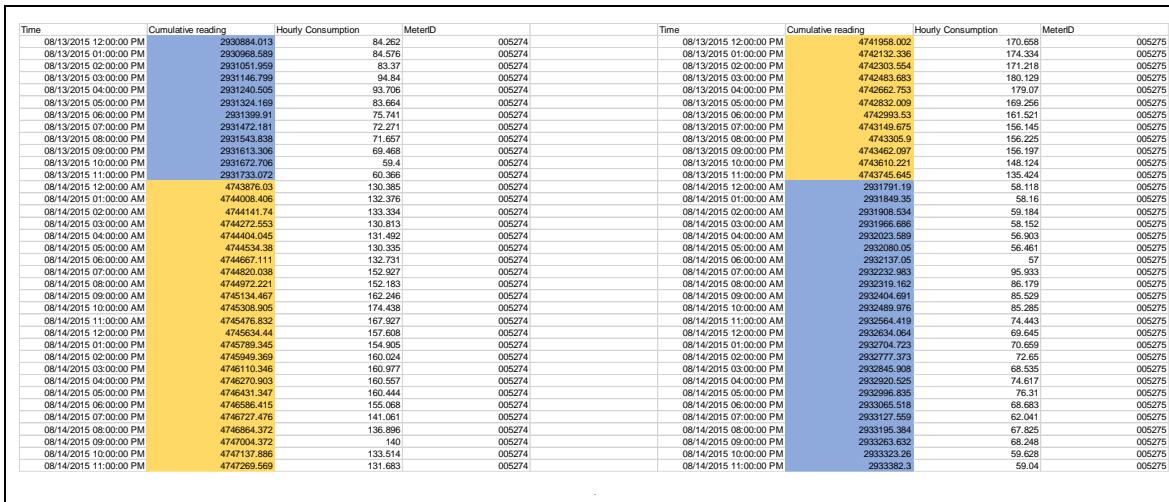

Data Type	Description of data behaviors	Period
ELE (005274)	The consumption level increased largely.	8/14/2015 - ongoing
ELE (005275)	The consumption level decreased largely.	8/14/2015 - ongoing

### Comments

ELE meter ID# 005274 serves TX School of Rural Public Health B and ELE meter ID# 005275 is for TX School of Rural Public Health C.

The ELE consumption levels for these two meters had a sudden change on 8/14/2015. The consumption level for meter ID# 005274 increased by approximate 80 kWh/h (~ 100%) and the consumption level for meter ID# 005275 decreased by around 80 kWh/h (~50%). The change observed on 8/14/2015 12:00 AM (see below explanatory figure) suggests that the two meters were switched and may need to be investigated.

HHW	006294	6/29/2017 – 7/7/2017	Flow rate	High

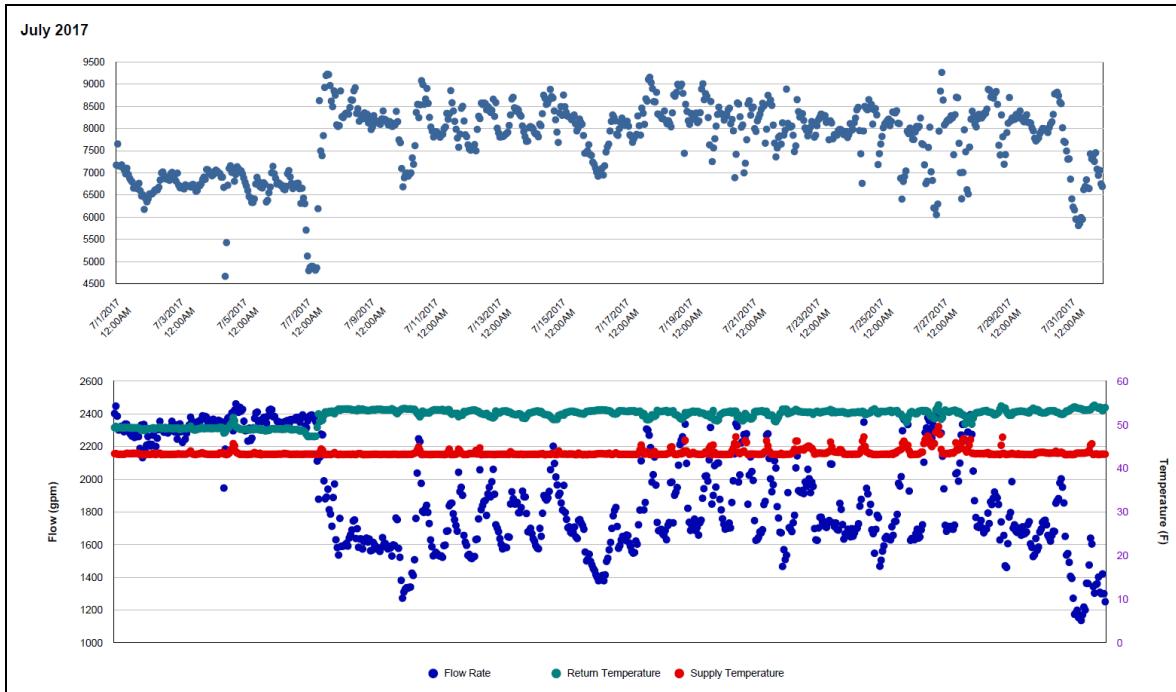

### *Quantitative descriptions and comments*

CHW flow rate increased from its normal 1400 – 2000 gpm level to 2200 – 2400 gpm during 6/29/2017 – 7/7/2017, and the return temperature decreased during the period. The combined effect is a decrease in CHW consumption. HHW flow rate had a slight increase from 90 – 100 gpm to 100 – 140 gpm during the same period. These days are estimated by model.

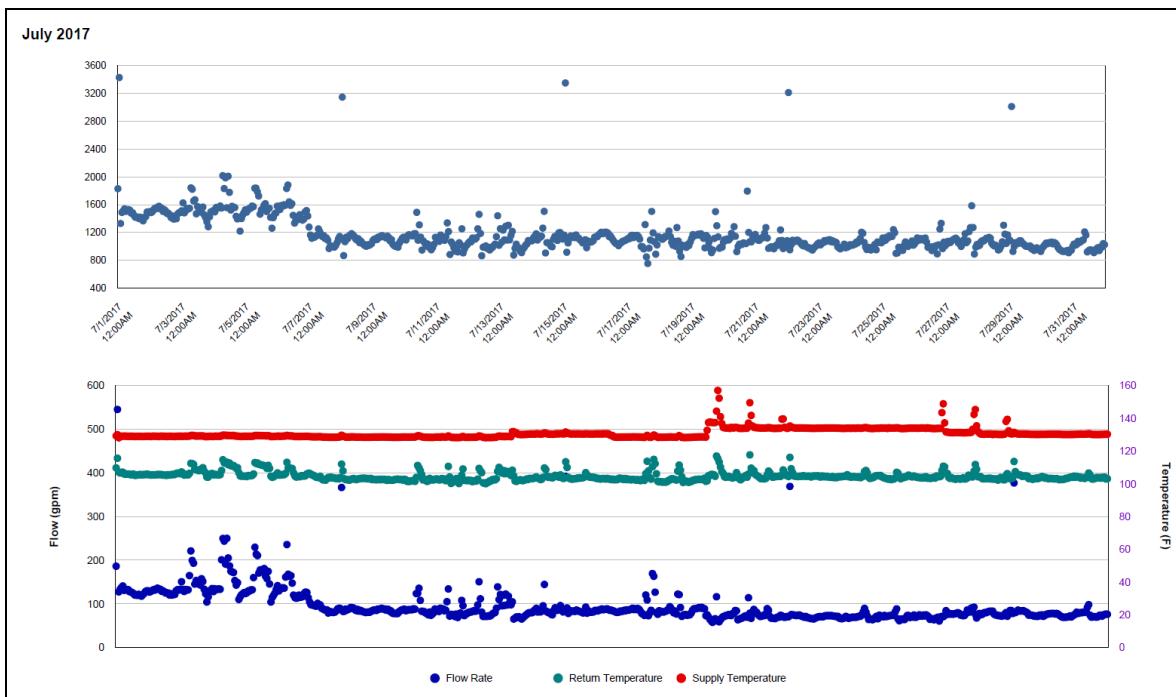

### *Explanatory Figure: 13 months energy balance plot with original data.*

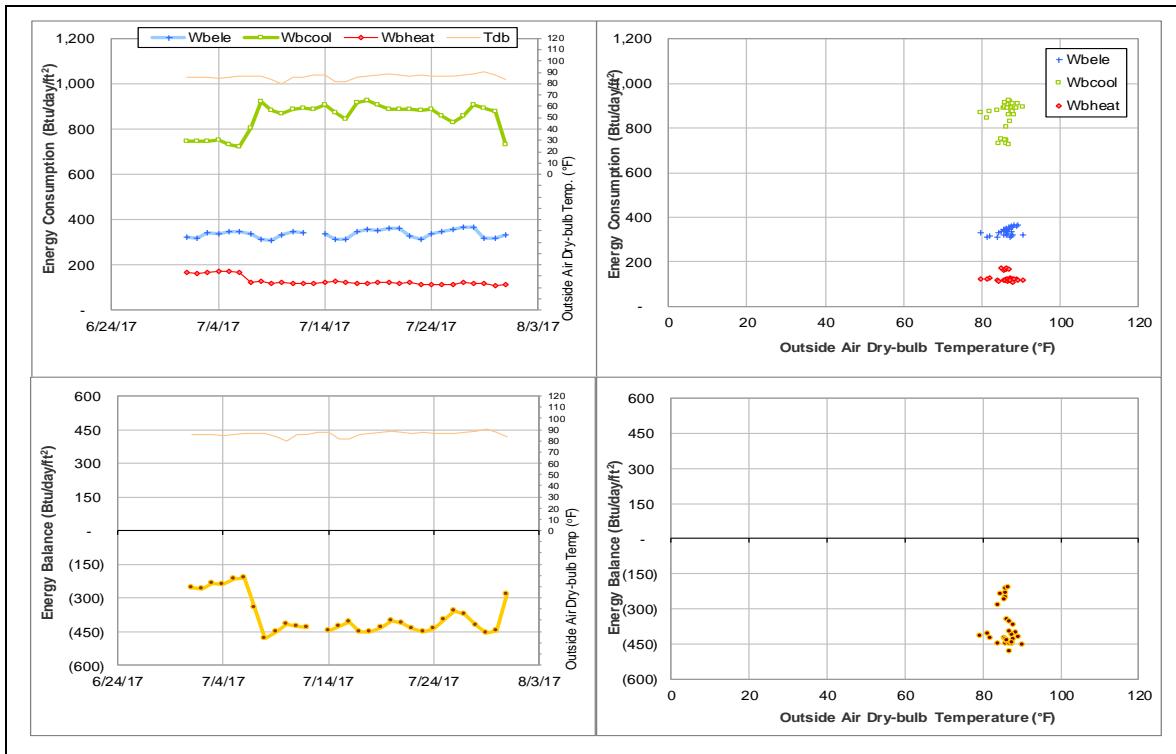

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (CHW during July 2017)**

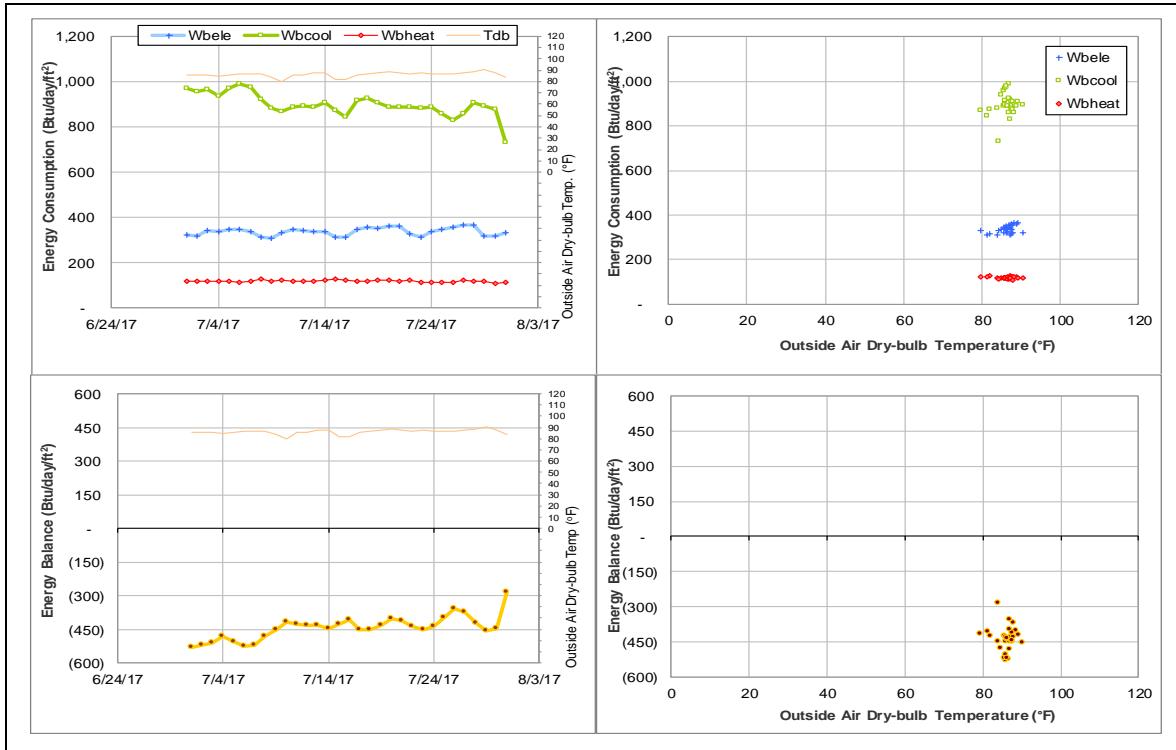

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis**

## AgriLife Services Building (TAMU Bldg #1536)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	007573	15	7/17/2017 – 7/31/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
HHW	The consumption level has increased suddenly.	7/17/2017 – Ongoing

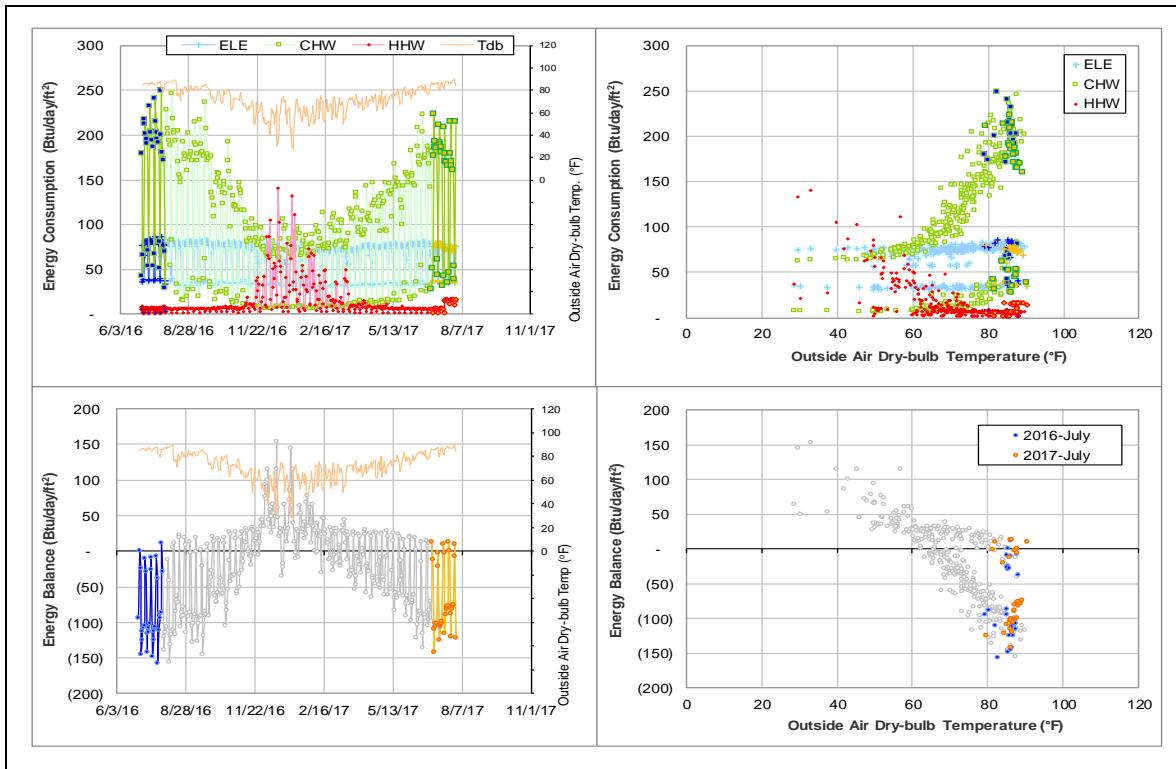

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
HHW	007573	7/17/2017 – Ongoing	Flow rate	Increase
			Delta-T	Decrease

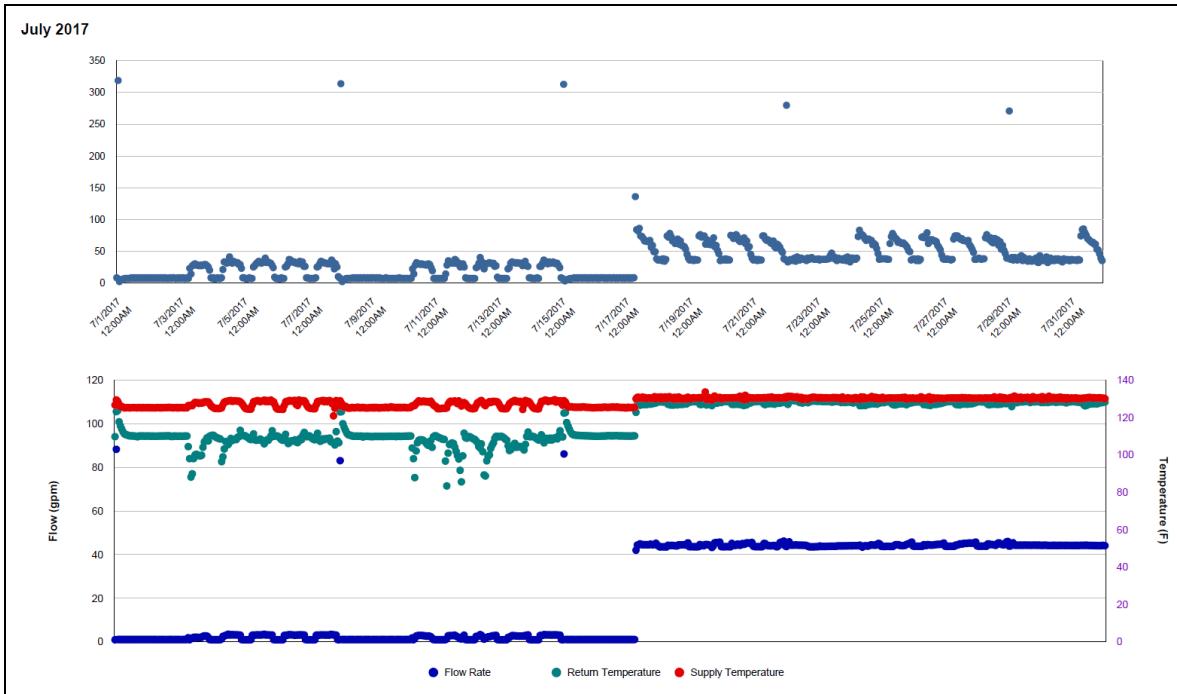

### Quantitative descriptions and comments

The flow of HHW suddenly increased from a near zero level to slightly higher than 40 gpm. Delta-T significantly decreased at the same time. The combined effect is a sudden increase of HHW consumption. These days are estimated by model.

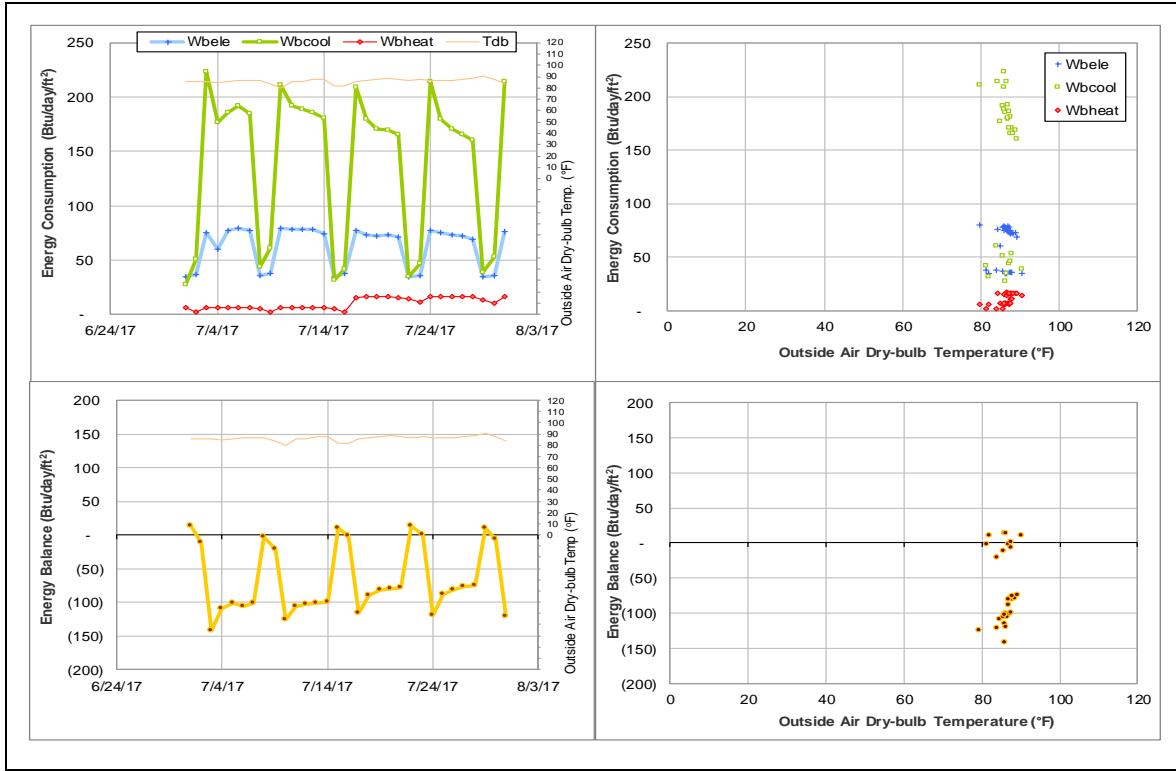

### Explanatory Figure: 13 months energy balance plot with original data.

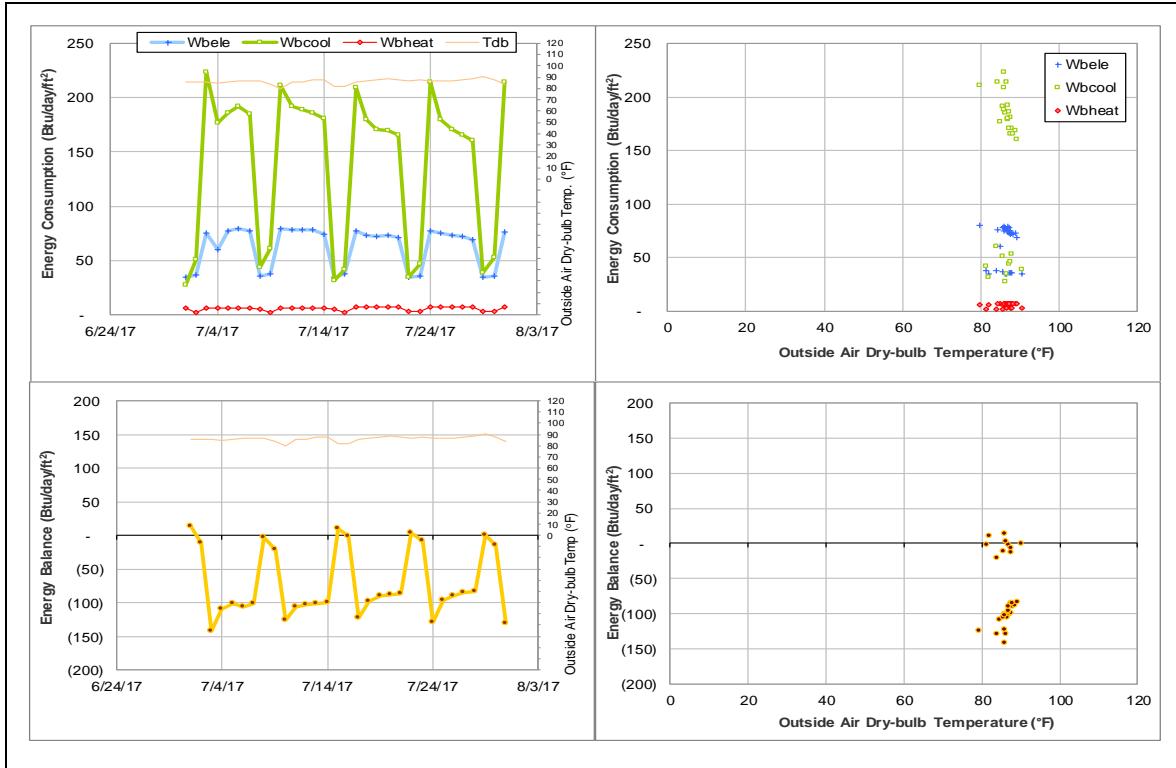

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## West Campus Parking Garage (TAMU Bldg #1559)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
CHW	004322	31	7/1/2017 – 7/31/2017	Model
HHW	004327	31	7/1/2017 – 7/31/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
CHW	The consumption level has decreased suddenly.	3/10/2017 – Ongoing
HHW	The consumption level is increasing gradually.	6/30/2017 – Ongoing

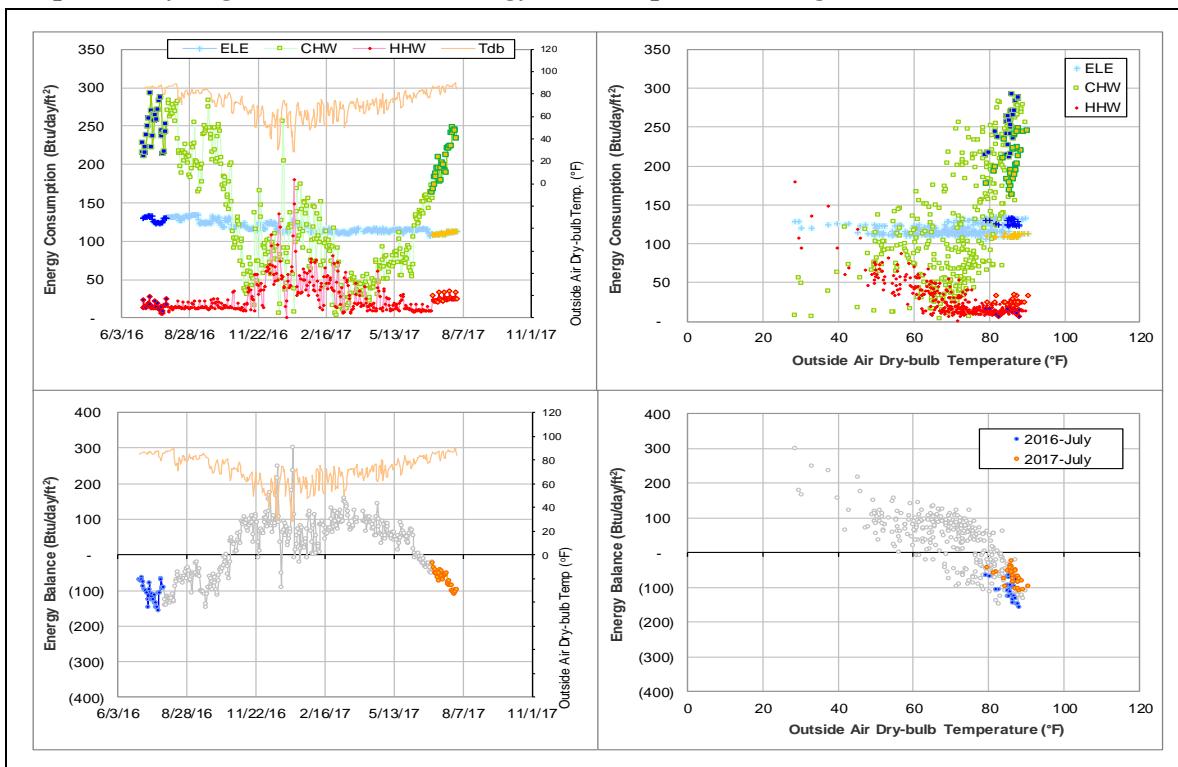

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
CHW	004322	3/10/2017 – Ongoing	Flow rate	Low
HHW	004327	6/30/2017 – Ongoing	Flow rate	high

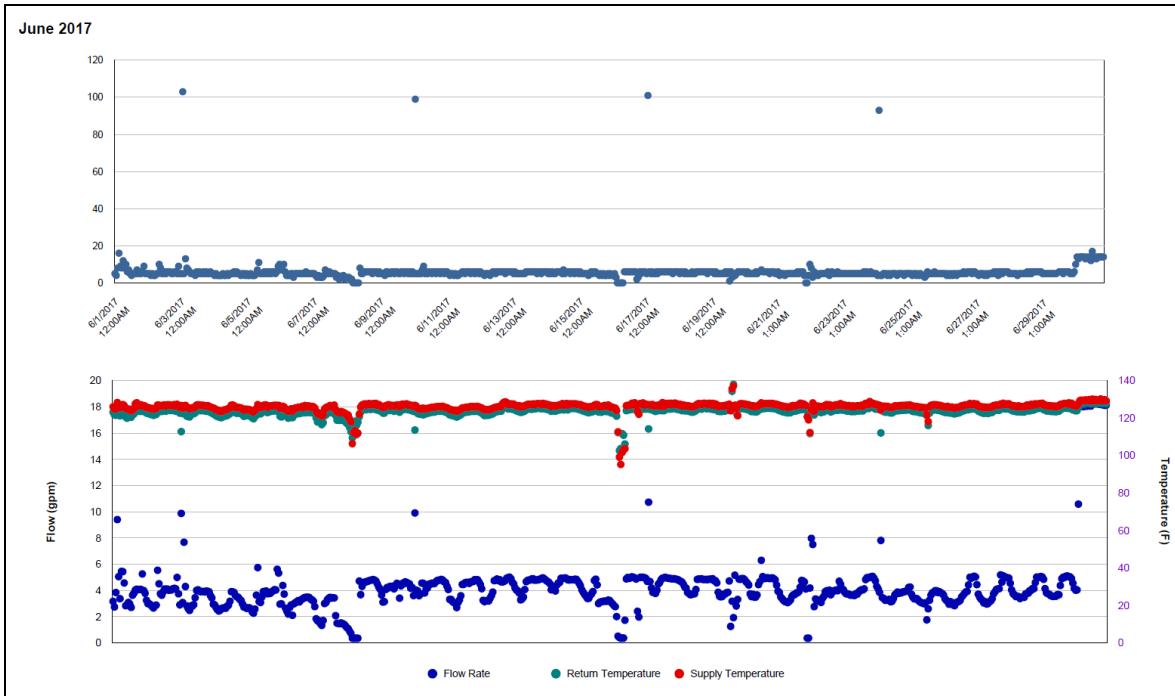

### Quantitative descriptions and comments

The CHW flow rate had been severely scattered during 11/6/2016 – 3/9/2017. The flow rate also dropped from 10 – 20 gpm range before the scattering period to 8 – 12 gpm after the period. HHW flow rate significantly increased from 2 – 6 gpm to about 18 gpm since 6/30/2017. The consumption of this month is estimated using a model based on the data of 6/1/2015 – 5/31/2016.

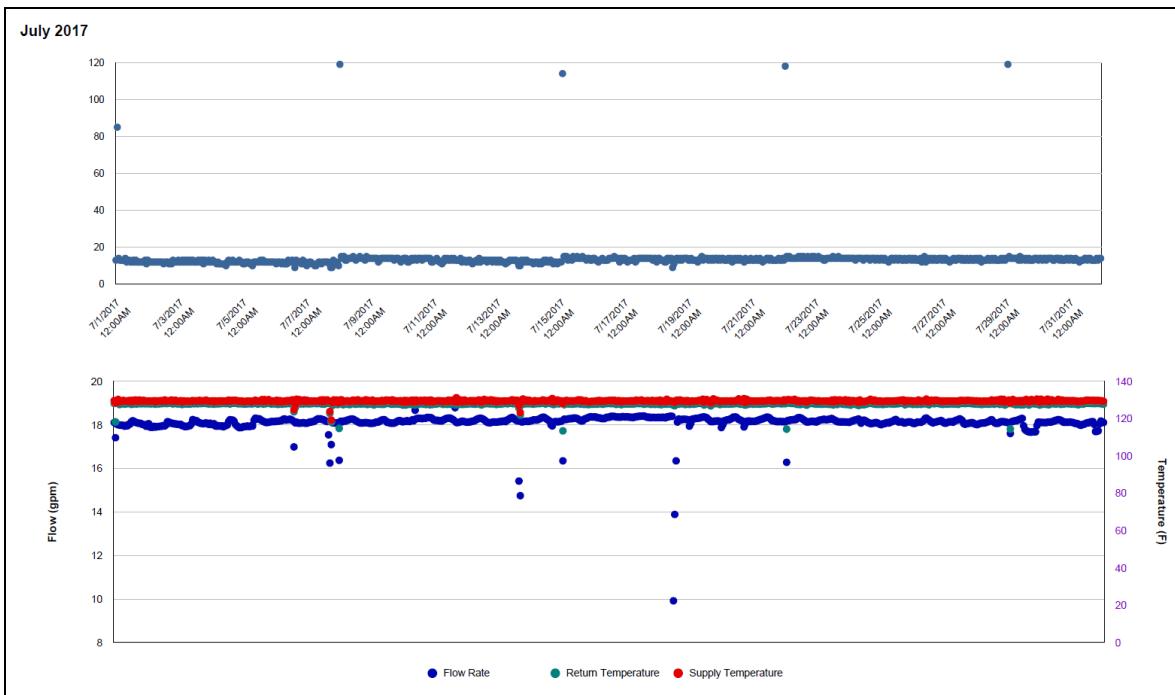

### Explanatory Figure: 13 months energy balance plot with original data

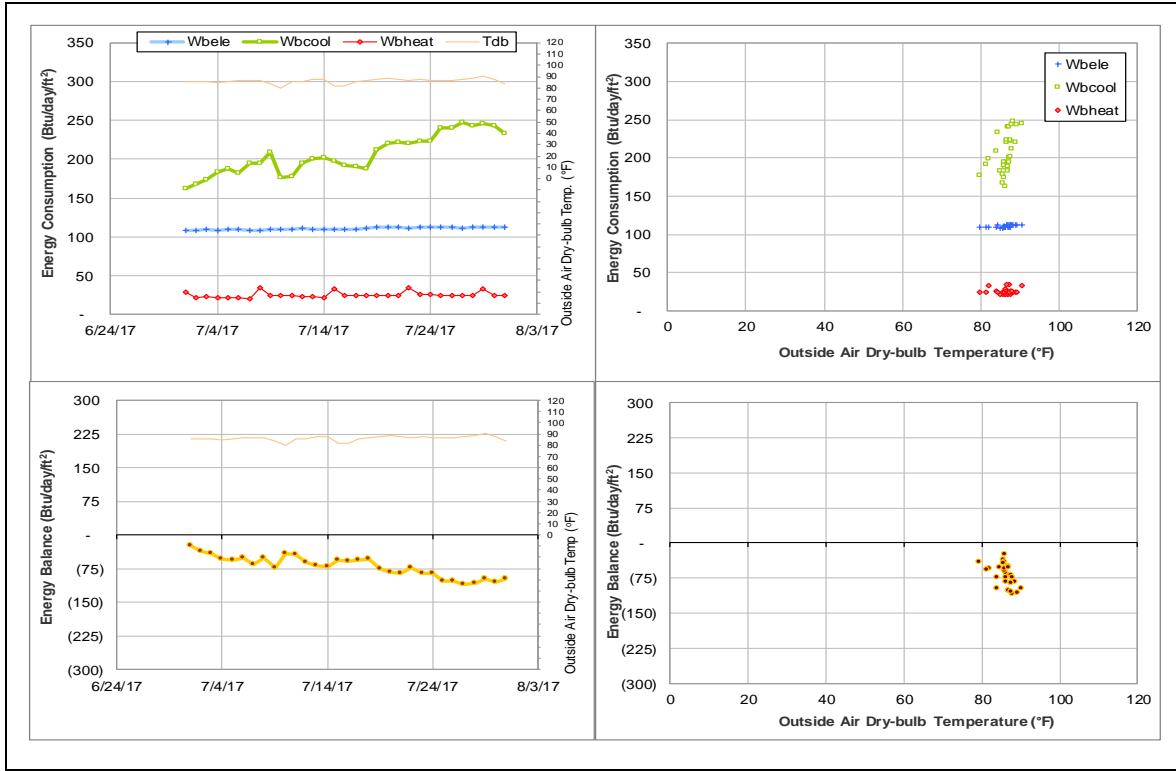

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during June 2017)**

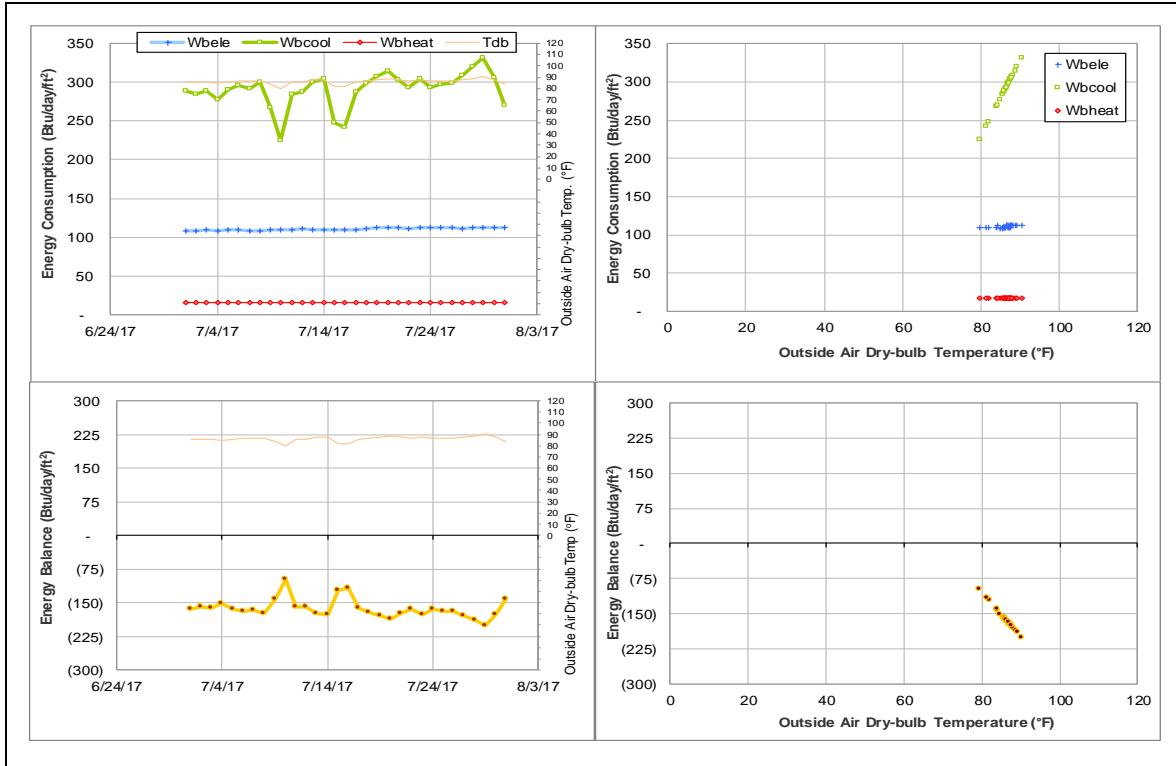

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## George Bush Presidential Library & Museum (TAMU Bldg #1606)

### Estimated data

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	002812	31	7/1/2017 – 7/31/2017	Model

### Detected issues in the energy balance and/or the consumption data

Data Type	Description of data behaviors	Period
HHW	The consumption level has increased suddenly.	6/8/2017 – Ongoing

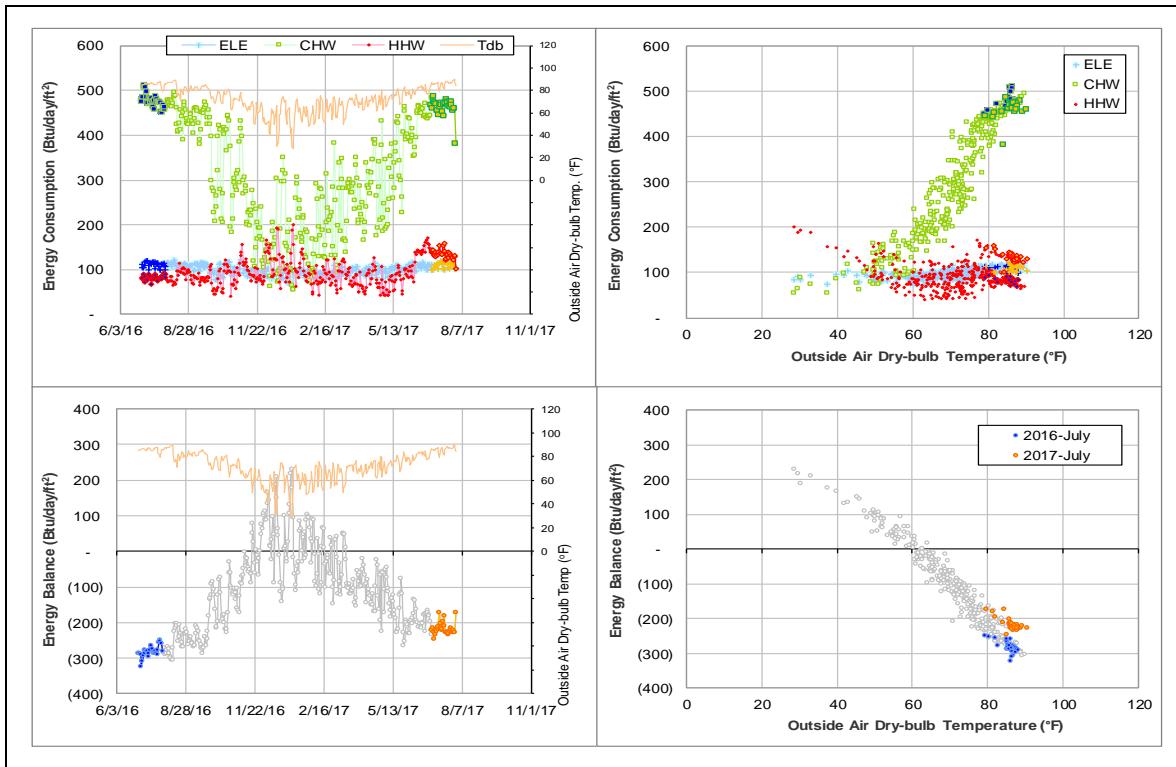

### Changes in sensor readings related to the detected issues

Energy Type	Meter ID	Period	Type	Description
HHW	002812	6/8/2017 – Ongoing	Return temp	Low

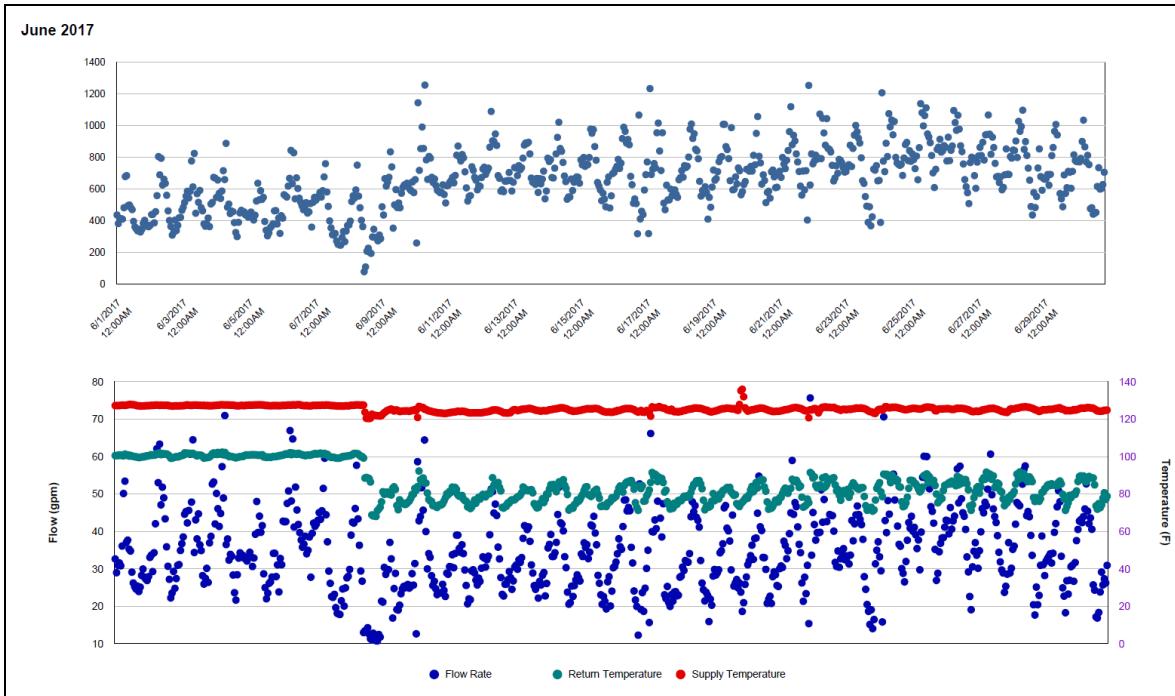

### Quantitative descriptions and comments

Return temperature of HHW dropped on 6/8/2017. Delta-T thus increased from about 30°F to 40 – 50°F. As there is no significant change in flow rate, HHW consumption increased significantly. The whole month is estimated by model.

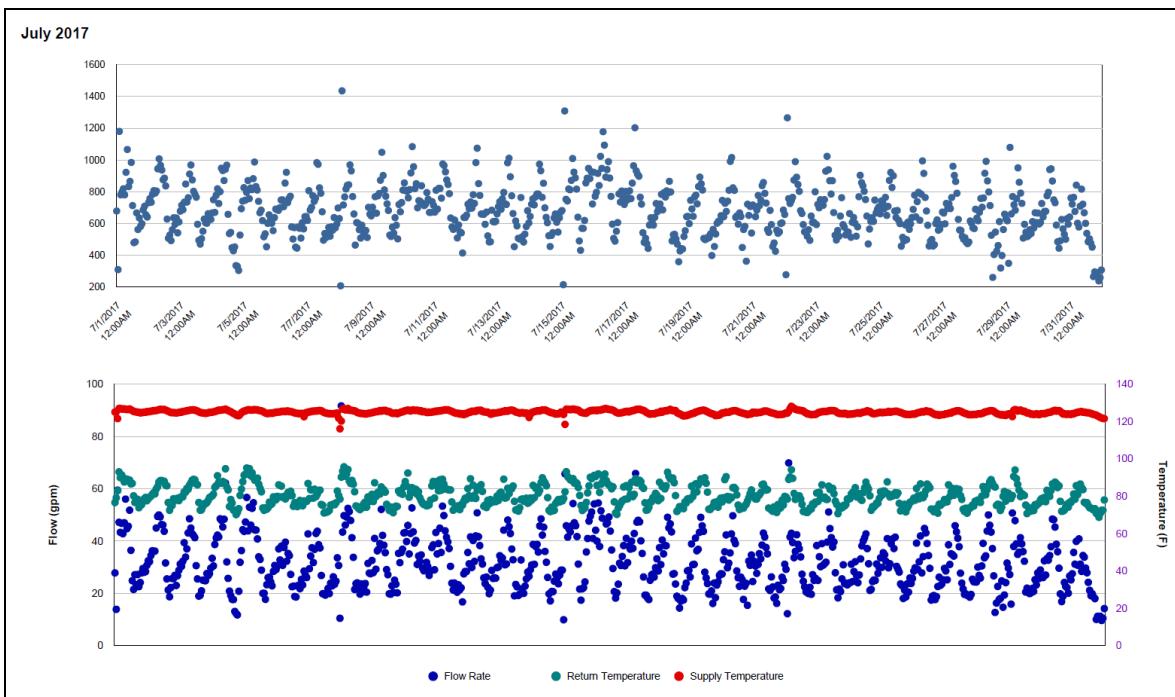

### Explanatory Figure: 13 months energy balance plot with original data.

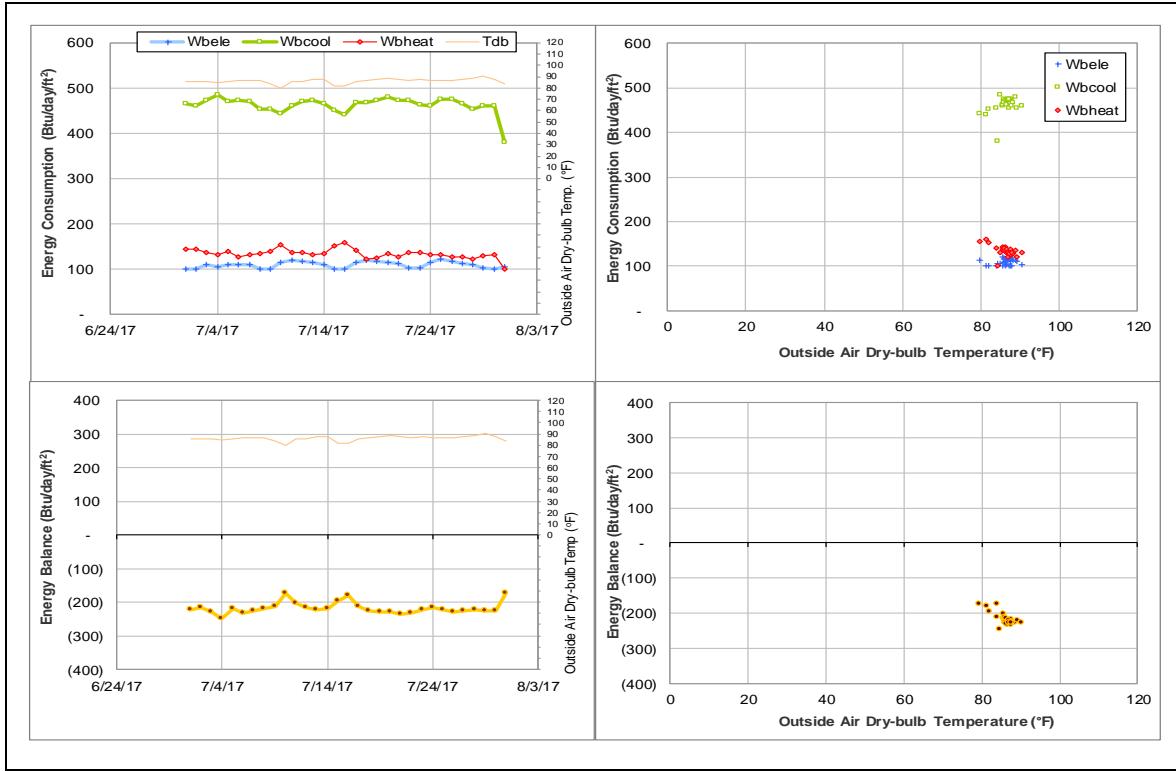

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during June 2017)**

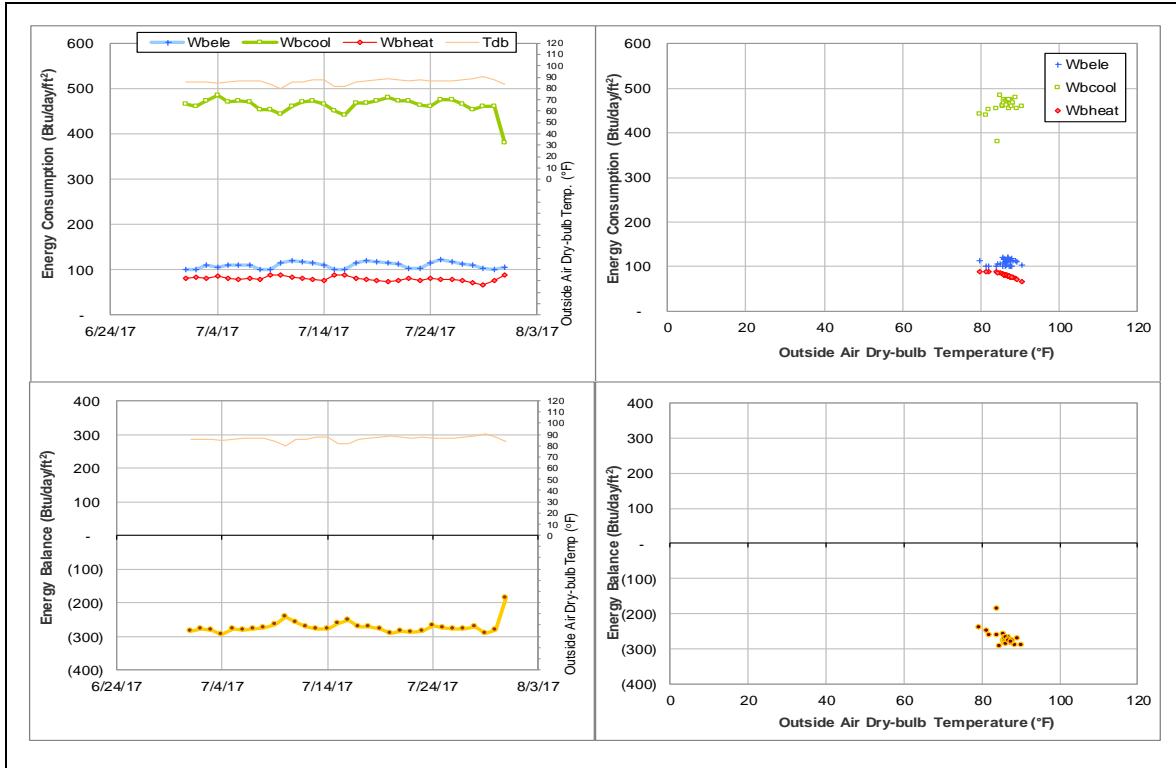

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## Multi-Species Research Building (TAMU Bldg #1911)

### *Estimated data*

Energy Type	Meter ID	Number of Days	Period	Estimation Method
HHW	009133	19	7/13/2017 – 7/31/2017	Model

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
HHW	The consumption level has decreased suddenly.	7/13/2017 – Ongoing

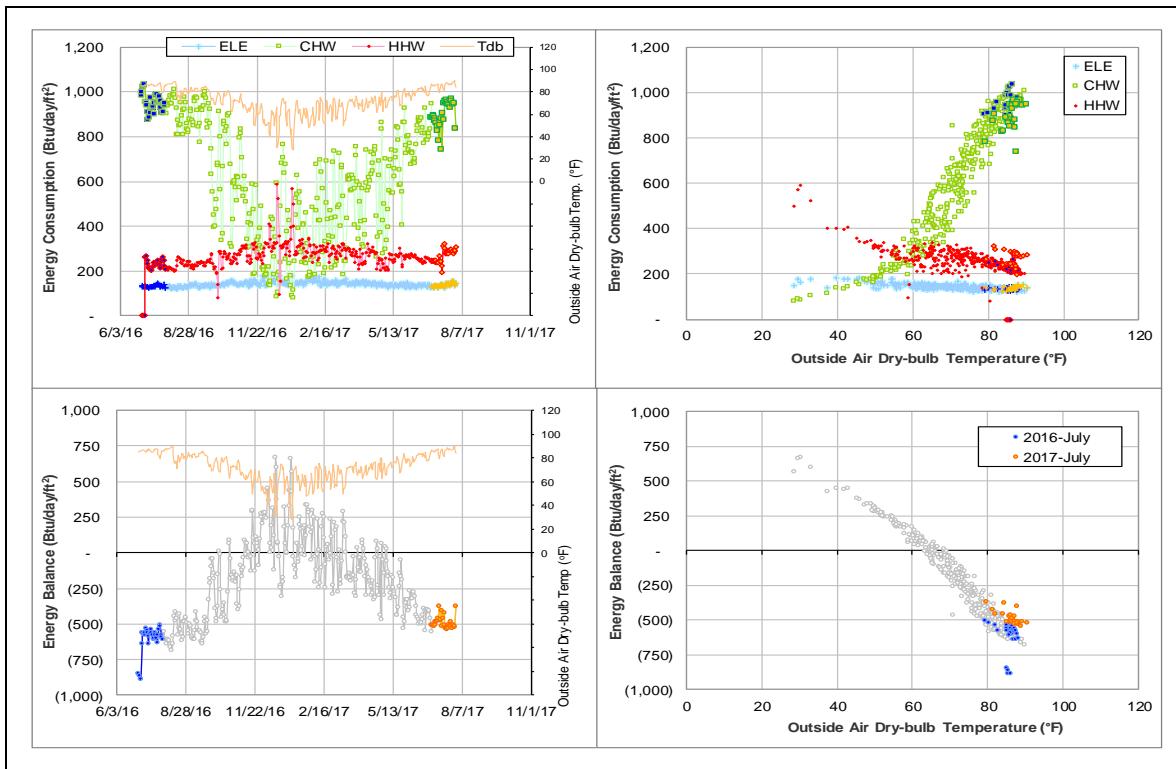

### *Changes in sensor readings related to the detected issues*

Energy Type	Meter ID	Period	Type	Description
HHW	009133	7/13/2017 – Ongoing	Return temp	Low

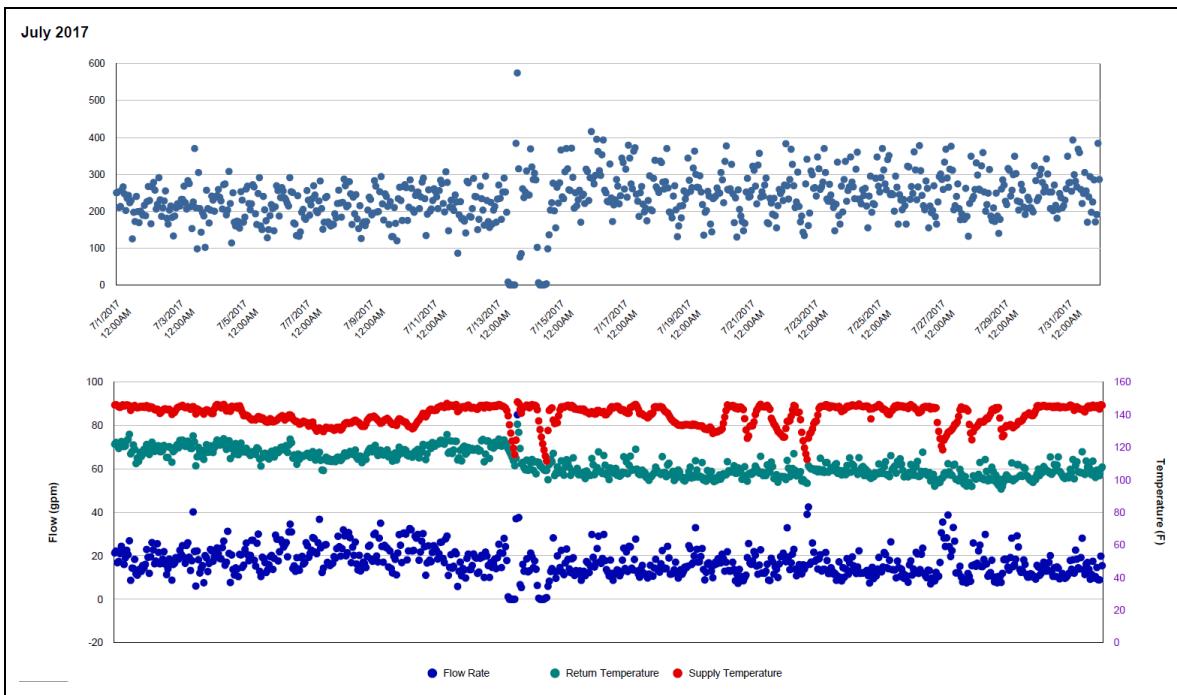

### *Quantitative descriptions and comments*

Return temperature of HHW decreased on 7/13/2017, resulting in a larger Delta-T and hence higher HHW consumption. This period is estimated by model.

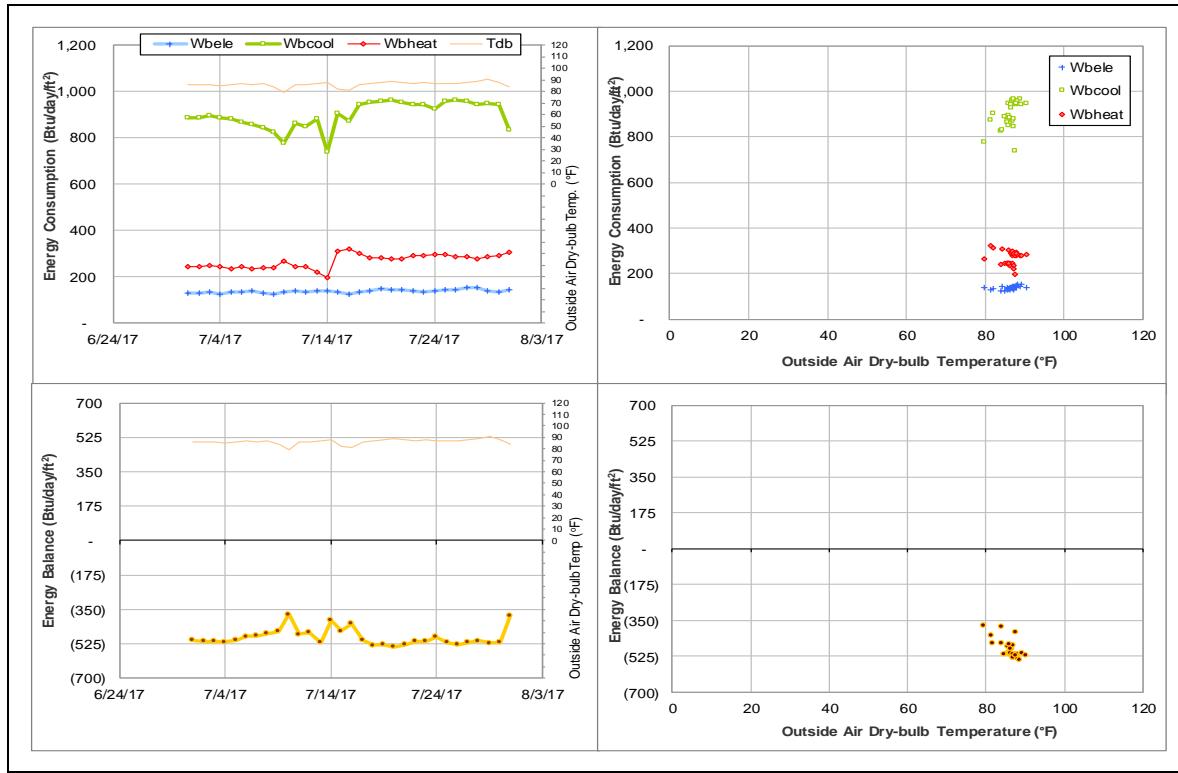

### *Explanatory Figure: 13 months energy balance plot with original data.*

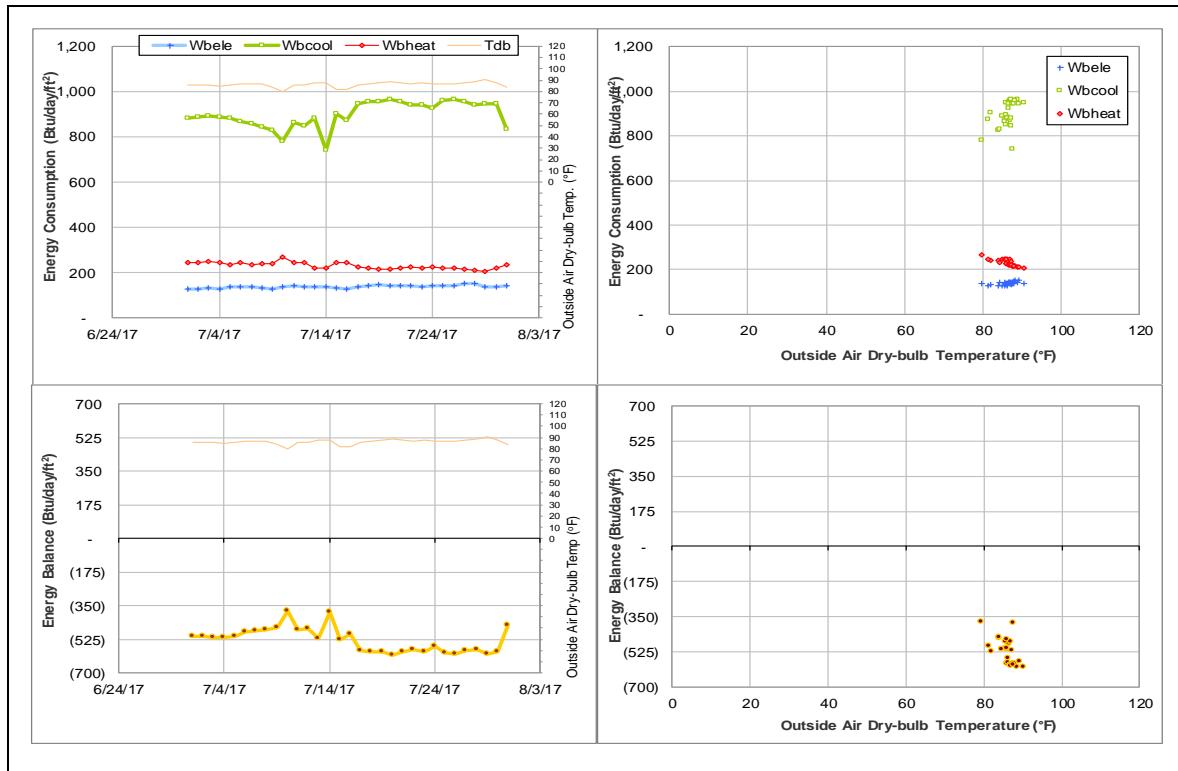

**Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW during July 2017)**

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

**Energy balance plot using the estimated data for the month of analysis.**

## II-3 Meters with Significant Issues in Energy Consumption Data

In this section, significant issues in the data behavior are described. On the contrary to the section II-2, alternative consumption is not estimated for some reasons: presence of continuous problems since the beginning of the data acquisition, unbalanced energy uses in the past data, changes in the consumption patterns without evidence of data problems, etc. Table II-3 gives a list of meters included in this section.

Table II-3 Meters with significant issues in the consumption data during July 2017

Building No.	Building Name	MeterID	Type	Building No.	Building Name	MeterID	Type

## Wells Residence Hall (TAMU Bldg #290)

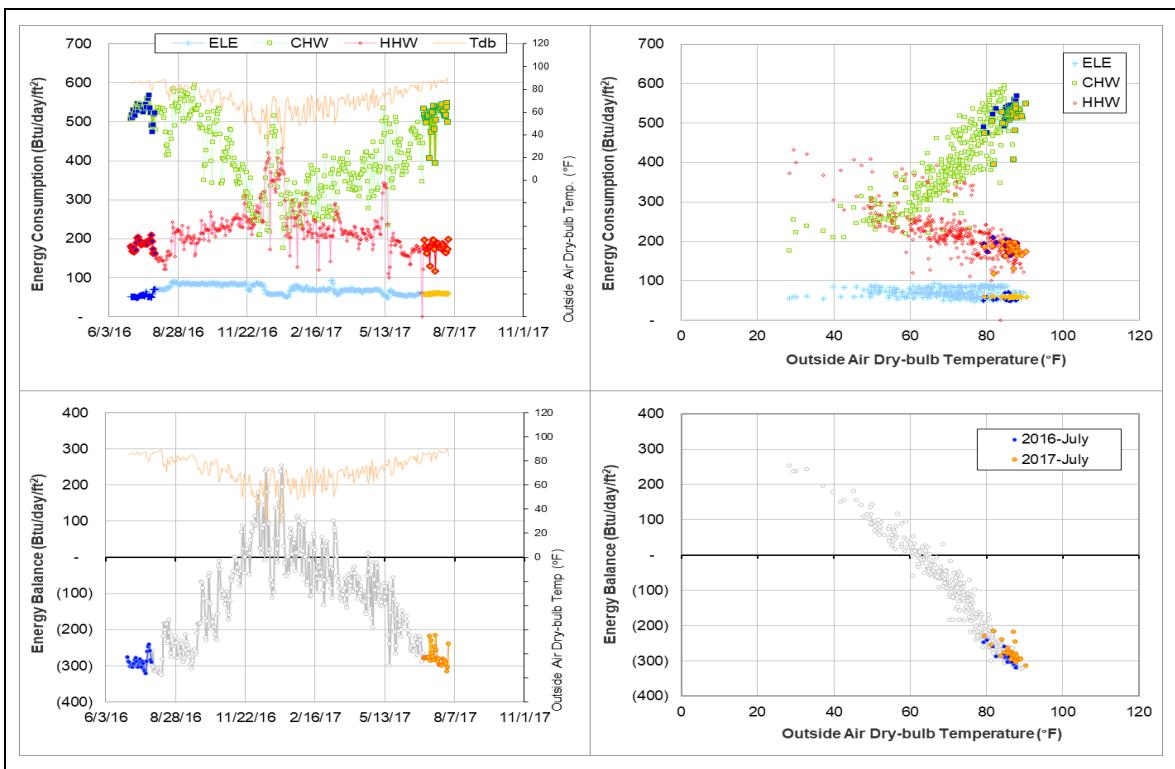

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The energy balance level is low. The cross-point temperature is around 60°F.	For several years

### *Comments*

This building has a low level of energy balance load with the cross-point temperature around 60°F. The low E<sub>BL</sub> level suggests an imbalance of metered energy use in the building, but we are not able to determine the cause.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Appelt Residence Hall (TAMU Bldg #293)

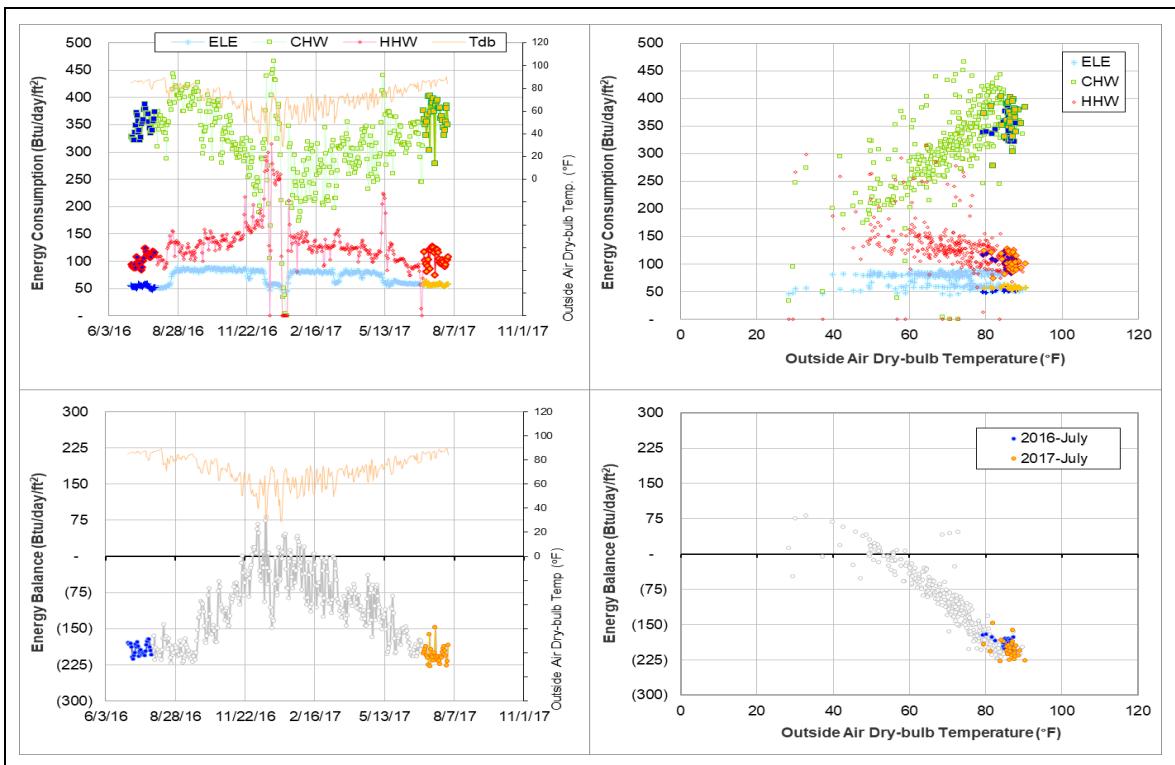

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW and HHW	The consumption level changes frequently	Since December 2014
Energy Balance	The energy balance decreased and the cross-point temperature is around 55°F.	Since January 2015

### *Comments*

Both the CHW and HHW consumption levels have been unstable and changing frequently. The energy balance load was low with the cross-point temperature around 55°F. The low  $E_{BL}$  level suggests an imbalance of metered energy use in the building, but we are not able to determine the cause.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Bright Building (TAMU Bldg #353)

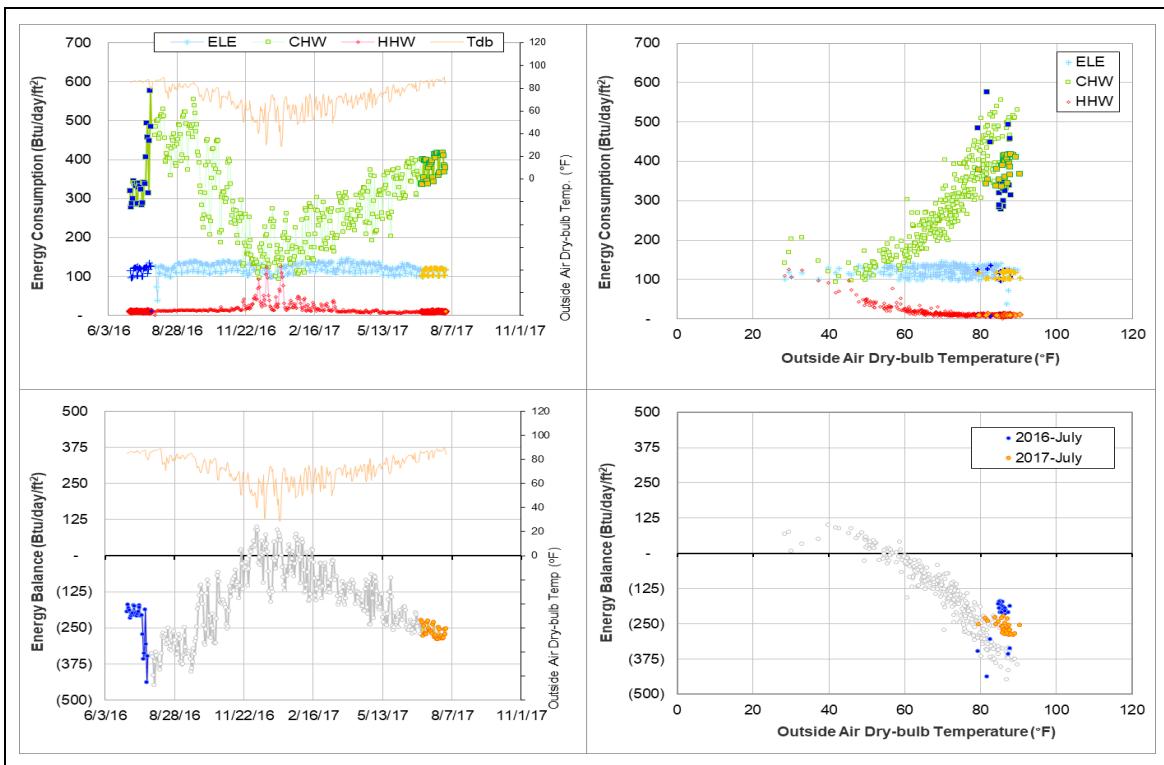

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The energy balance level has been low for years. The cross-point temperature was in the range of 40 - 70 °F.	For several years
CHW	The consumption pattern changed.	Since July 2016

### *Comments*

The energy balance load ( $E_{BL}$ ) of this building has varied but always been low (the cross-point temperature was between 40°F and 70°F) for years. CHW consumption increased greatly on 7/21/2016 and switched to a new pattern with a steeper slope.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Bright Football Complex (TAMU Bldg #361)

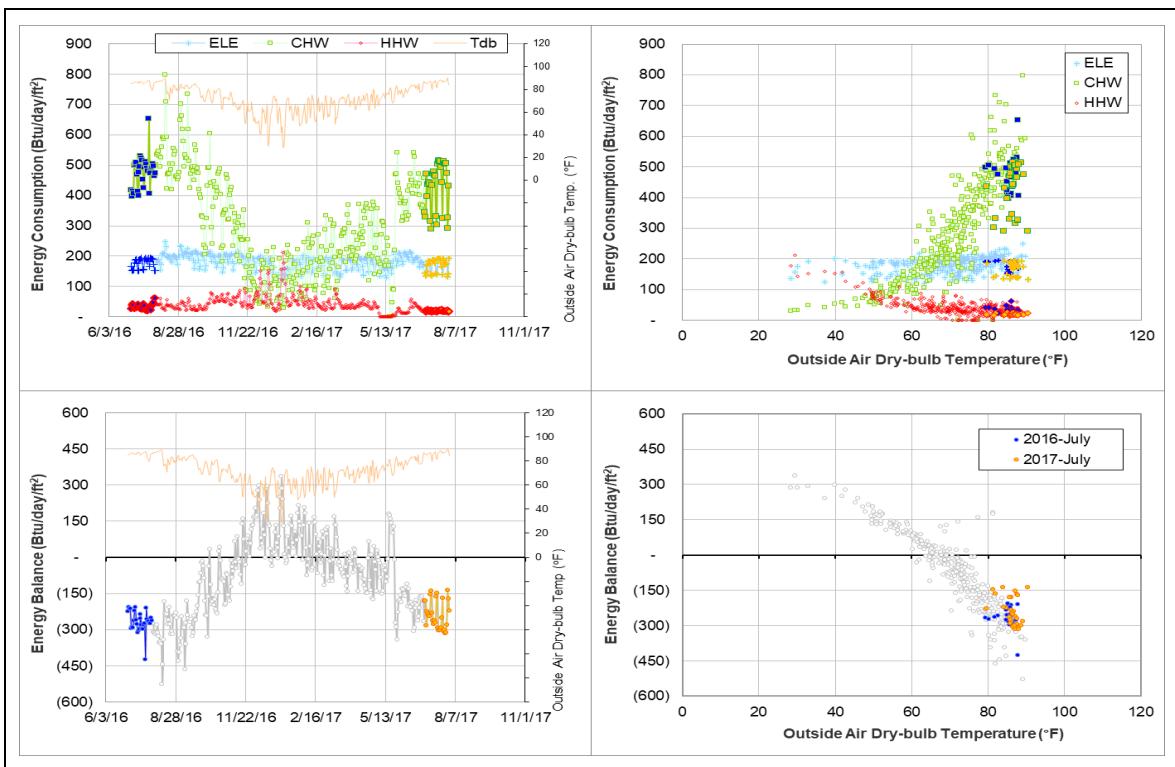

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	Weekend consumption level decreased	July 2017

### *Comments*

The CHW consumption has a weekday/weekend pattern during July 2017 however the weekend consumption is around 75 – 100 Btu/day/ft<sup>2</sup> lower than the previous year. Also, there is not a weekday/weekend pattern during the previous months. No obvious sensor reading behavior anomaly is observed.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Underwood Residence Hall (TAMU Bldg #394)

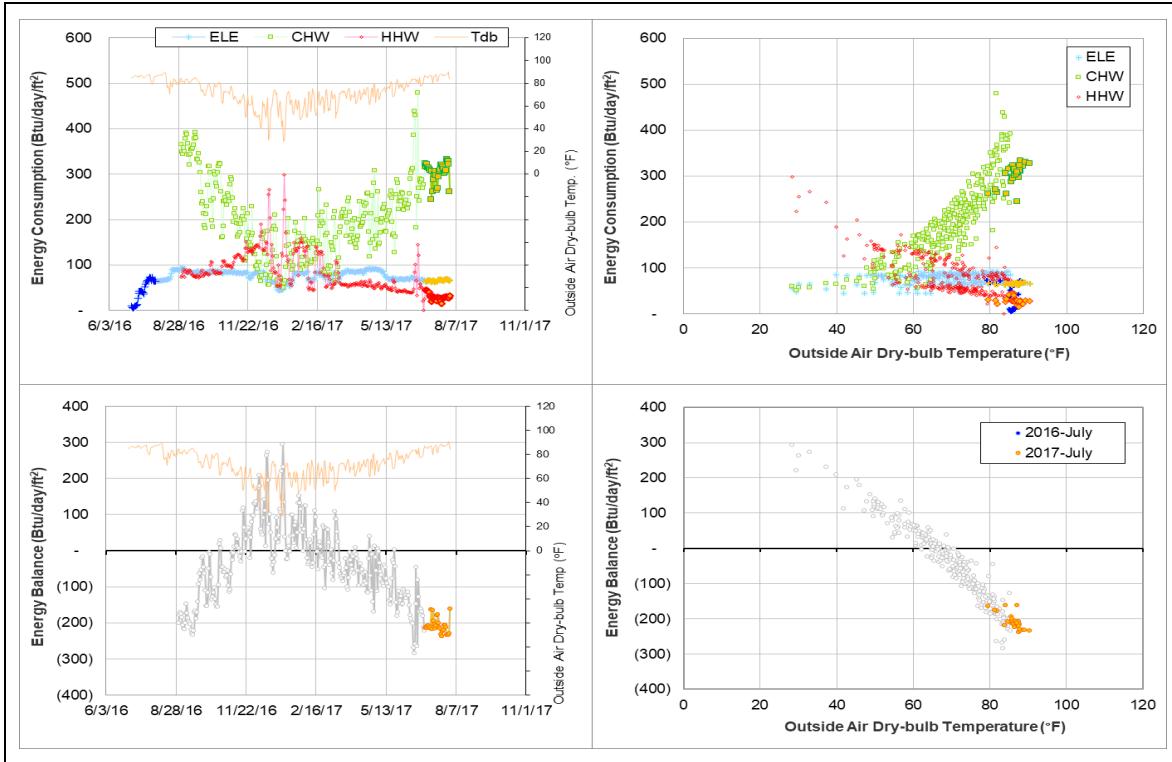

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption pattern is unstable.	9/1/2016 - ongoing
HHW	The consumption pattern is unstable.	9/1/2016 - ongoing

### *Comments*

The CHW and HHW consumption has decreased since the data return in September 2016. There seem to be two different patterns forming. More data is needed to see how the pattern develops.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Langford Architecture Center Building A (TAMU BLDG #398)

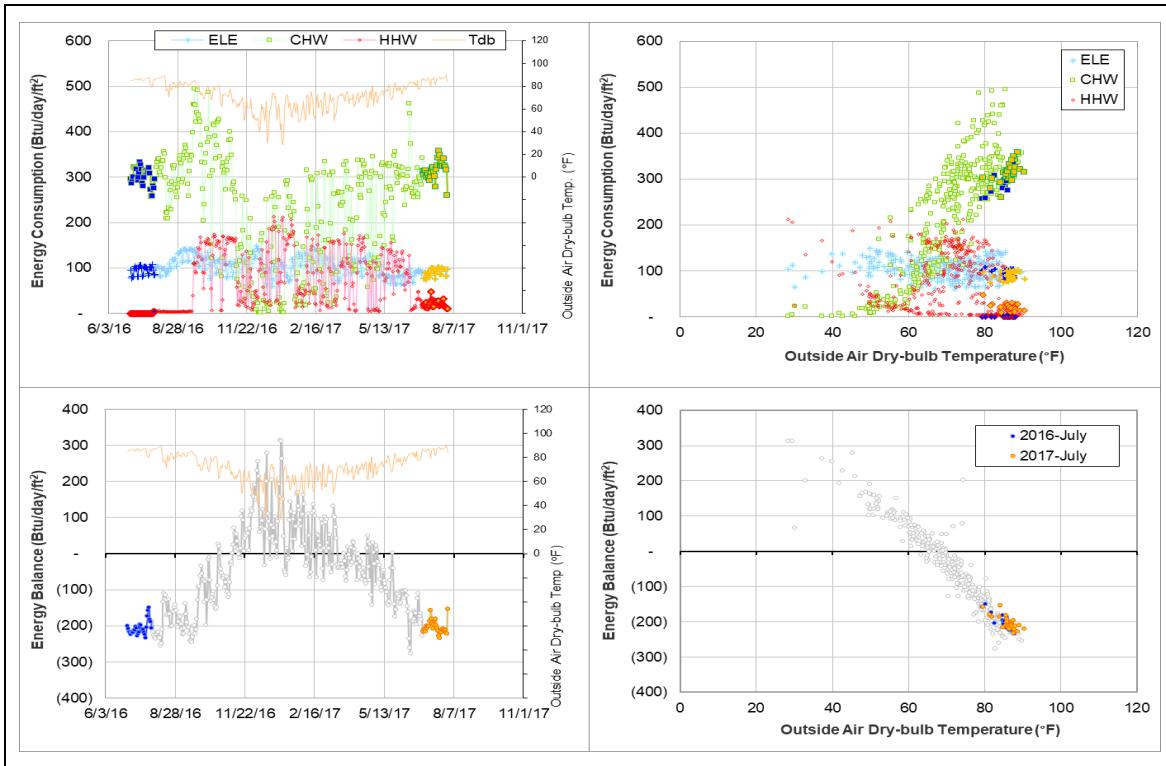

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW and HHW	The consumption has been fluctuating greatly.	For several years

### *Comments*

CHW and HHW consumption has been unstable for several years. HHW flow rate can be seen going up and down between a maximum level and a very low level. The energy balance, however, is not disturbed during these fluctuations.

### *Explanatory Figure: 13 months energy balance plot with original data*

**Whitely Hall – Dorm 9 (TAMU Bldg #408), White Hall – Dorm 10 (TAMU Bldg #409), Harrington Hall – Dorm 11 (TAMU Bldg #410), and Utay Hall – Dorm 12 (TAMU Bldg #411)**

***Detected issues in the energy balance and/or the consumption data***

Data Type	Description of data behaviors	Period
All utilities	Abnormal patterns are observed.	5/1/2017 – ongoing

***Comments***

These four dormitory buildings have undergone renovations during the last year starting in May 2016. The data became available for May 2017. However, there are abnormal patterns for the consumption of all utilities for these four dormitory buildings. Furthermore, there are several gaps in the data. There was not enough information available to estimate the data with models therefore averages were used to estimate all missing consumption for the month of May. The ELE patterns were stable starting in June 2017 and not estimated. The CHW consumption was estimated by models starting in June 2017 but the HHW consumption was still estimated by averages for any missing or problematic data.

## Leggett Residence Hall (TAMU BLDG #419)

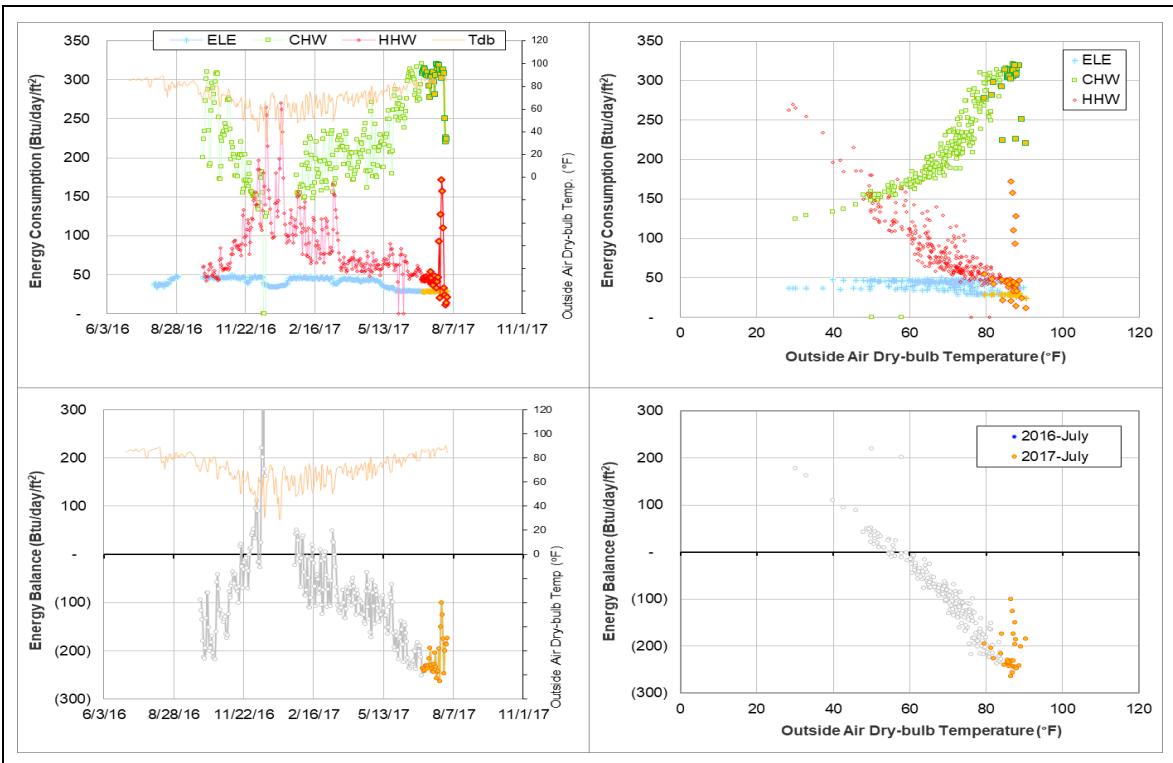

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE	The consumption decreased after the missing period.	Since October 2016
CHW	The consumption increased after the missing period.	Since October 2016
HHW	The consumption decreased after the missing period.	Since October 2016
EB	The cross-point moved from 68°F to 55°F.	Since October 2016

### *Comments*

After the missing period from May to October 2016, ELE and HHW consumption decreased and CHW consumption increased. EB cross-point moved from 68°F to 55°F since then.

### *Explanatory Figure: 13 months energy balance plot with original data (The plot is rescaled to remove the spikes.)*

## Mosher Residence Hall (TAMU Bldg #433)

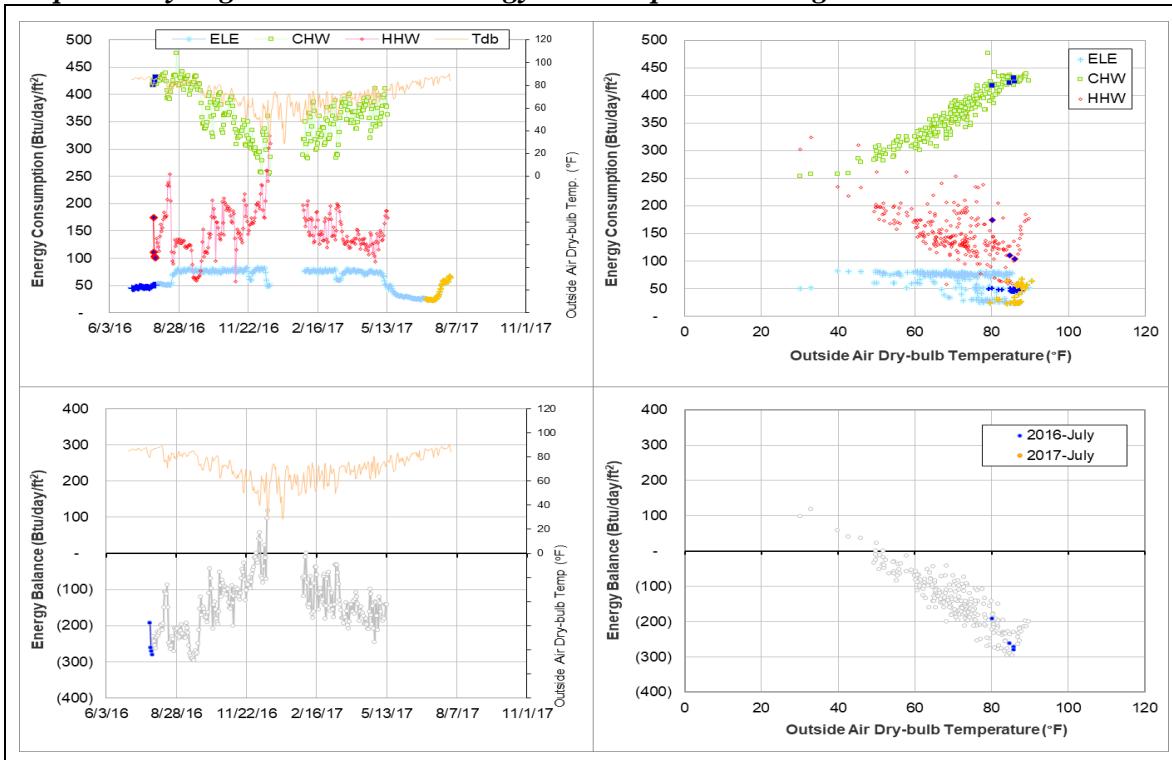

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level gradually increased.	Since 2015
HHW	The consumption level gradually decreased.	Since 2015
ELE	The consumption level suddenly decreased.	Since January 2016
Energy Balance	The cross-point temperature is lower than 50°F.	Since 2015

### *Comments*

The ELE meter (MID 009083) replaced old meter (MID 000290) since January 2016. After that, the consumption decreased from 105 Btu/day/ft<sup>2</sup> to 80 Btu/day/ft<sup>2</sup> (approximately 25%). At near 40°F compared to 11/2014, CHW increased slightly by about 25 Btu/day/ft<sup>2</sup> and HHW decreased slightly by about 25 Btu/day/ft<sup>2</sup>. HHW started to scatter since 5/2016 (shortly before the missing period). The cross-point temperature decreased further from near 55°F to lower than 50°F now. Starting 5/15/2017, the CHW and HHW meter data has not been available. This recent change in data is believed to be due to building renovation.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Oceanography & Meteorology Building (TAMU Bldg #443)

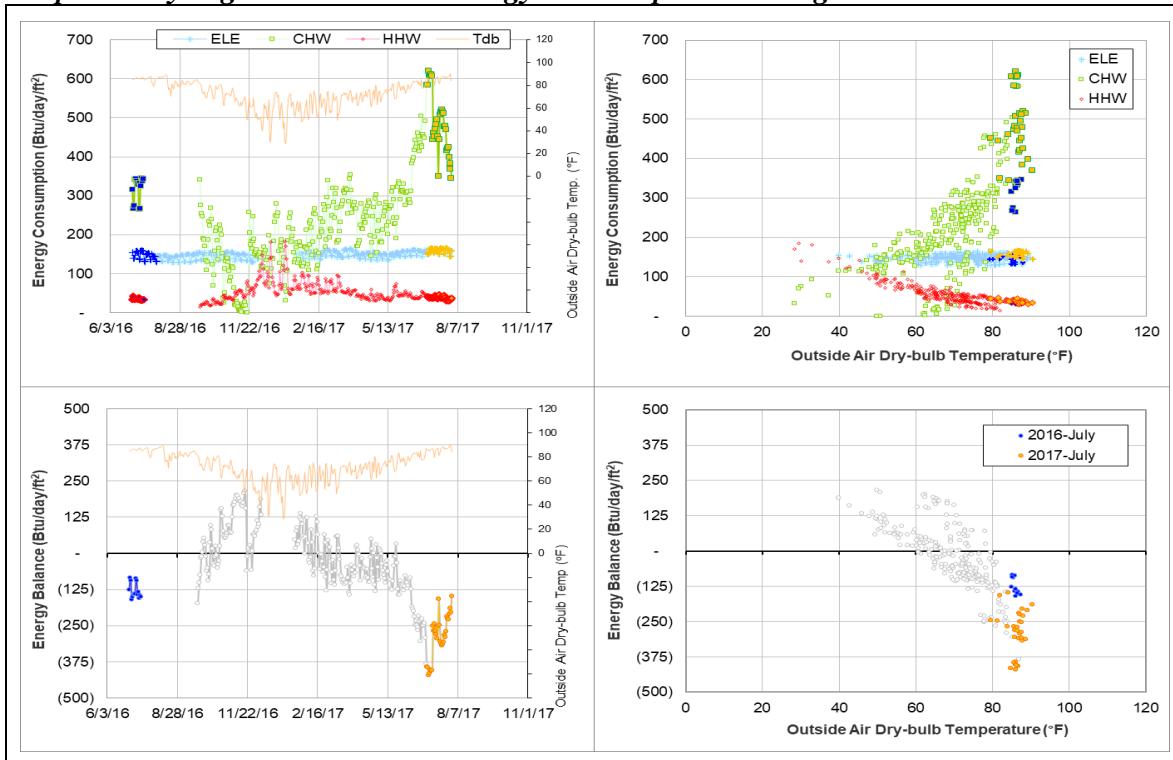

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption significantly decreased after a missing period.	September 2016 – October 2016
	The consumption increased suddenly.	Since November 2016
HHW	The consumption significantly decreased after a missing period.	Since September 2016
Energy Balance	The cross-point temperature moved from 75°F to 62°F.	Since November 2016

### *Comments*

Both CHW and HHW consumption decreased significantly in September 2016 due to changes in Delta-T including negative values for CHW Delta-T. Starting 11/22/2016, the CHW Delta-T became positive but the consumption showed a sharp increase causing the energy balance cross-point temperature to move from 75°F to 62°F.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## DPC Annex (TAMU Bldg #517)

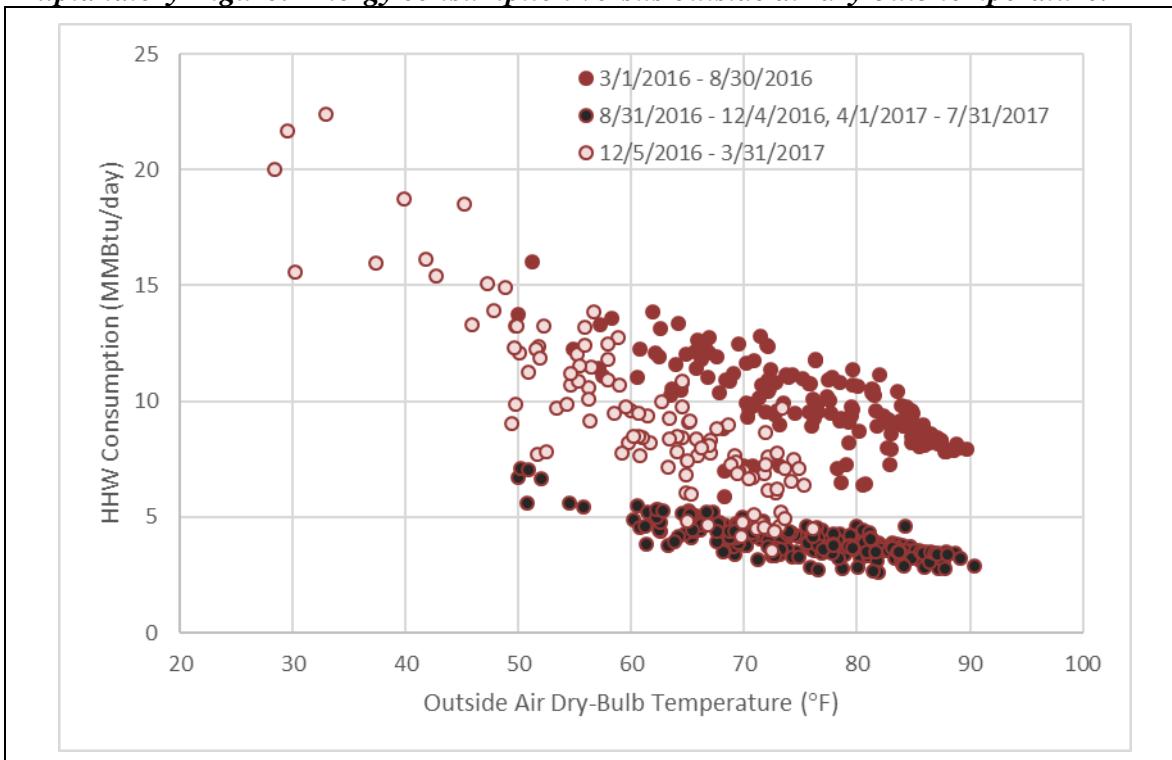

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
HHW	The HHW consumption level decreased.	8/31/2016 – Ongoing

### *Comments*

Starting 8/31/2016, the HHW consumption level decreased dropping clearly below the main pattern until 12/4/2016. The data from 12/5/2016 to 3/31/2017 appears between the main pattern and the lower pattern. However, starting April 2017 the data returned to the lower pattern. This does not appear to be a meter issue. More data is needed to see how the pattern continues.

### *Explanatory Figure: Energy consumption versus outside air dry-bulb temperature.*

## Psychology Building (TAMU Bldg #463)

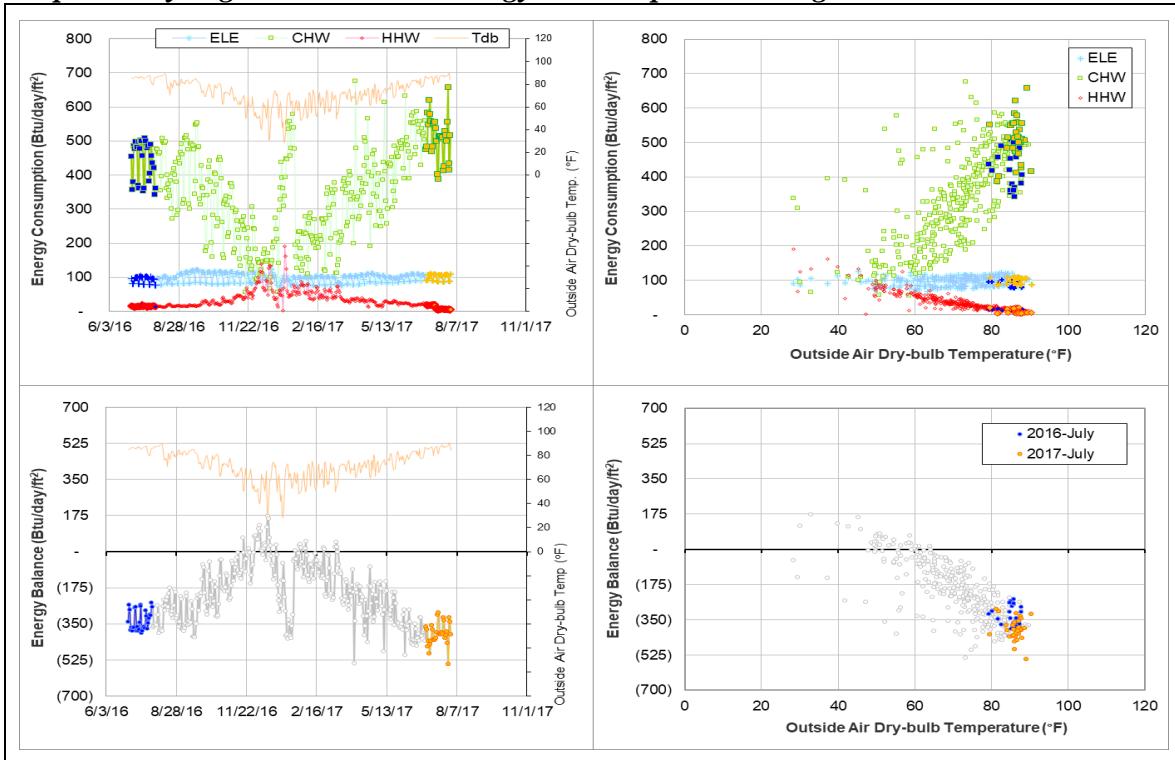

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The pattern is scattered and the level is low.	Ongoing after ESCO implementation in 2011
CHW	The consumption pattern versus ambient temperature scatters.	

### *Comments*

The CHW consumption pattern versus ambient temperature started to scatter after ESCO implementation in 2011. The CHW consumption level is high with a CHW temperature differential around 20°F, which is high for an office building with conventional HVAC systems. The building had energy efficiency improvements by ESCO during the period of 5/9/2011–8/19/2011.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## State Chemist Building (TAMU Bldg #464)

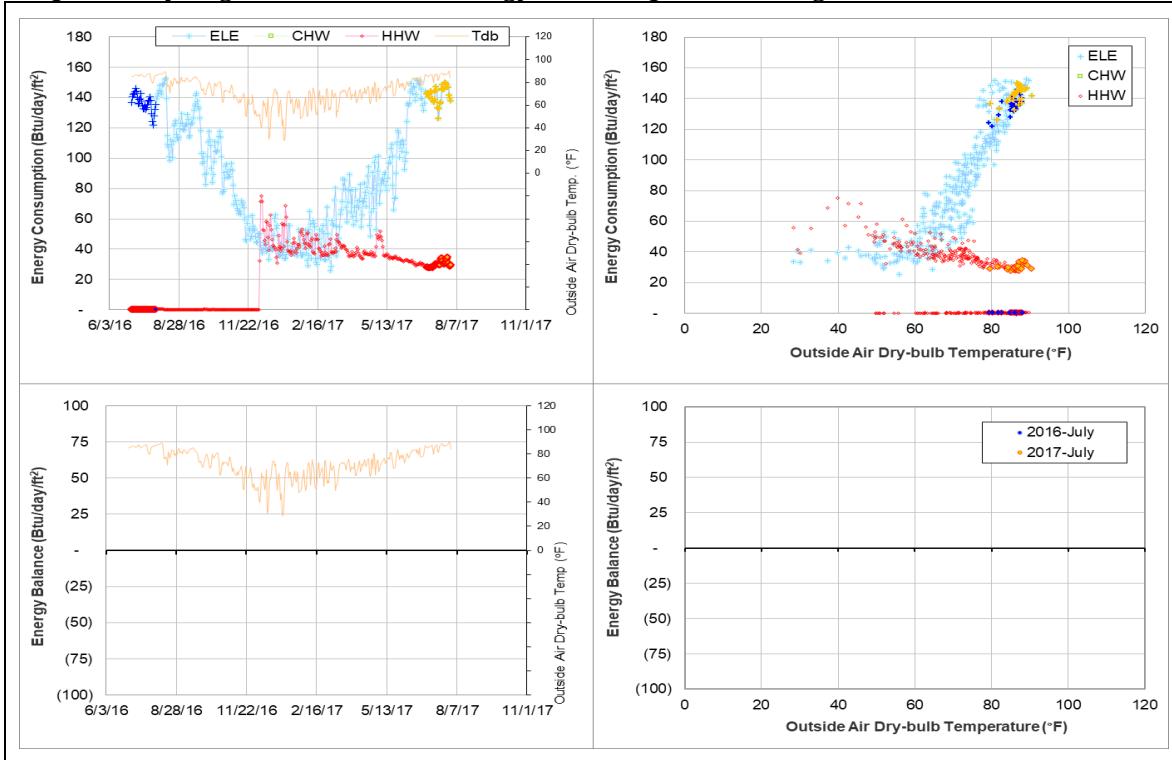

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE	The consumption level is lower than the level during the past year.	11/20/2016 – 6/7/2017
	The consumption level is higher than the level during the past year.	6/7/2017 – Ongoing

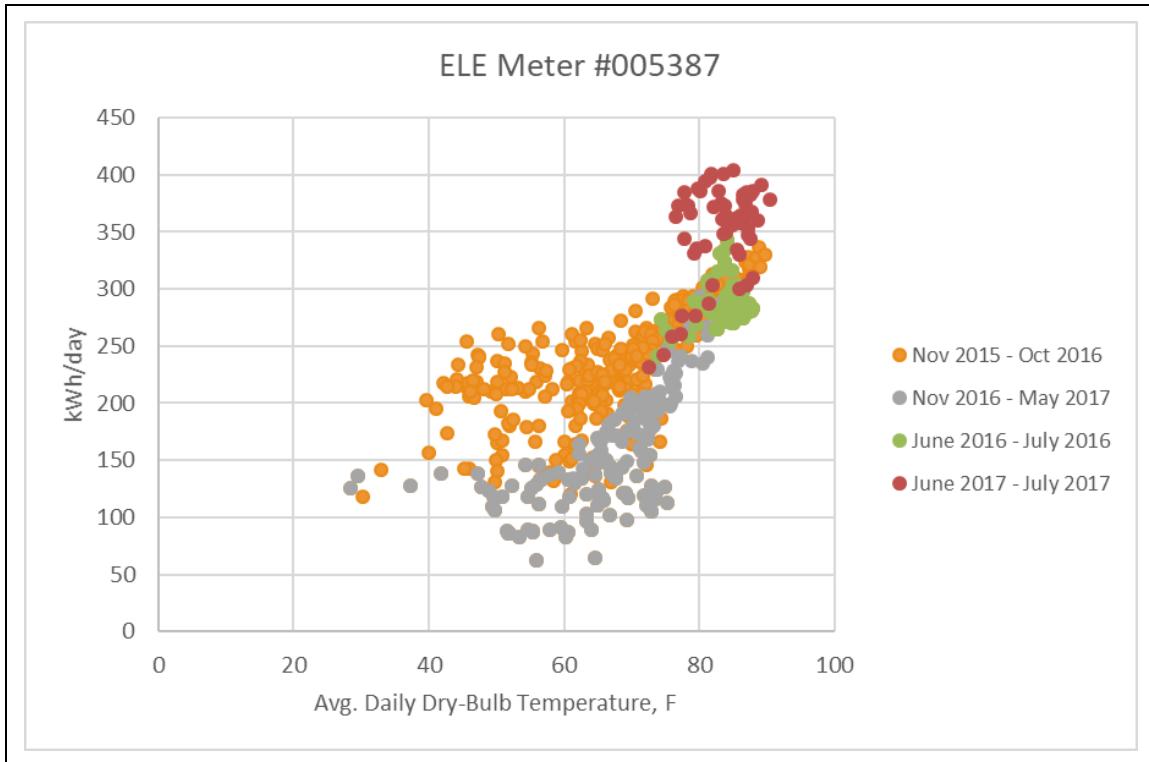

### *Comments*

There are two ELE meters (#005837 and #005839) for this building. Starting in November 2016, the level for meter #005837 has decreased and the data appears scattered. Compared to April 2016, the average daily kWh for April 2017 has decreased by ~60 kWh. The decrease in this meter can be masked in the 13-month plot that shows the total of the two ELE meters combined. Recently, starting 6/7/2017, the average daily kWh increased by ~100 kWh compared to the consumption pattern before November 2016. Explanatory figures showing the change before and after November 2016 are provided below. Since the combined electric consumption is within the 13-month pattern this month, no estimation was made.

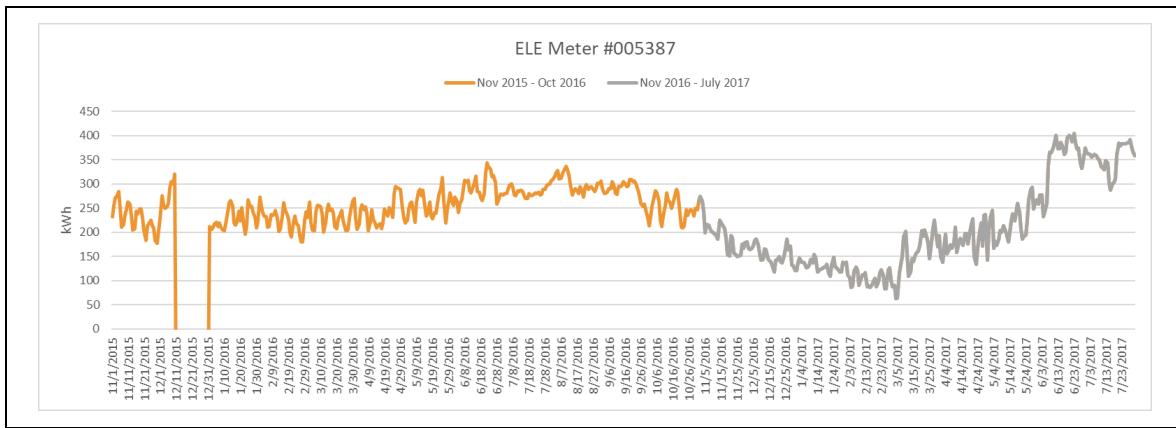

### *Explanatory Figure: 13 months energy balance plot with original data.*

**Explanatory Figure: Scatter plot of daily ELE energy consumption for meter #005837 versus outside dry-bulb temperature.**

**Explanatory Figure: Times series plot of hourly ELE energy consumption for meter #005837. The series in grey represents the recent data from November 2016 through July 2017.**

## Biological Sciences Building - East (TAMU Bldg #467)

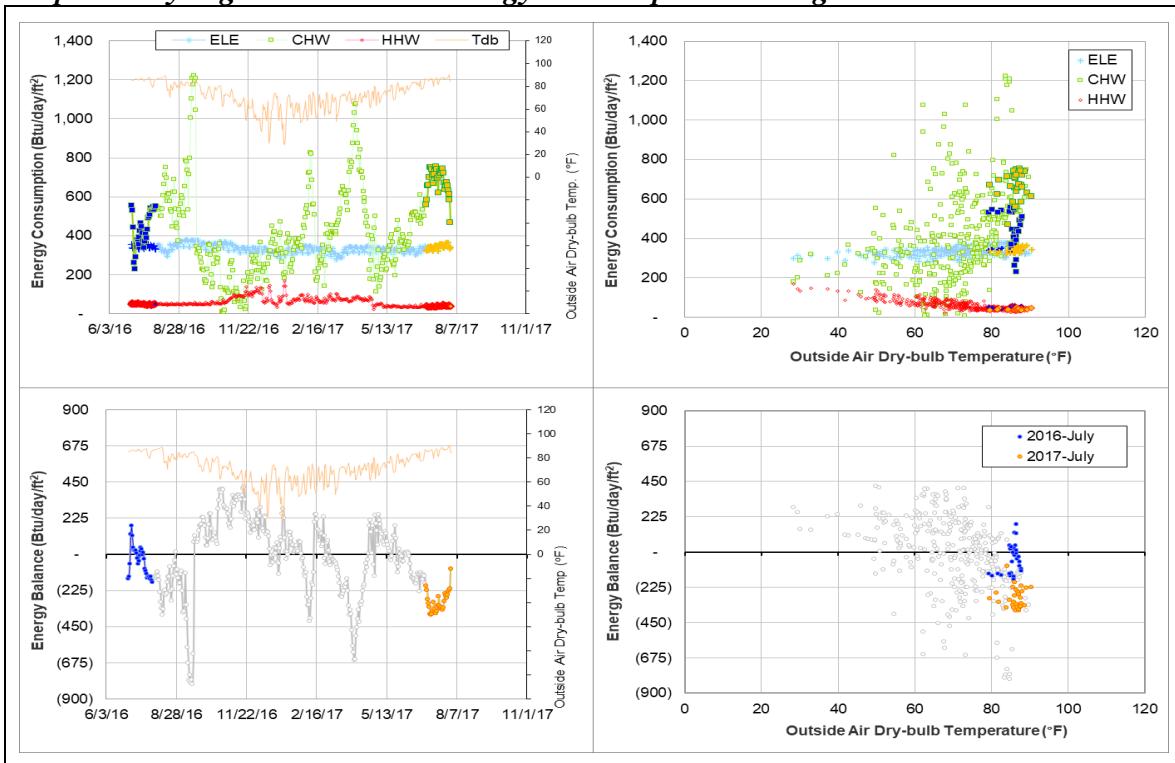

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The metered values appear to be faulty.	8/6/2016 – Ongoing

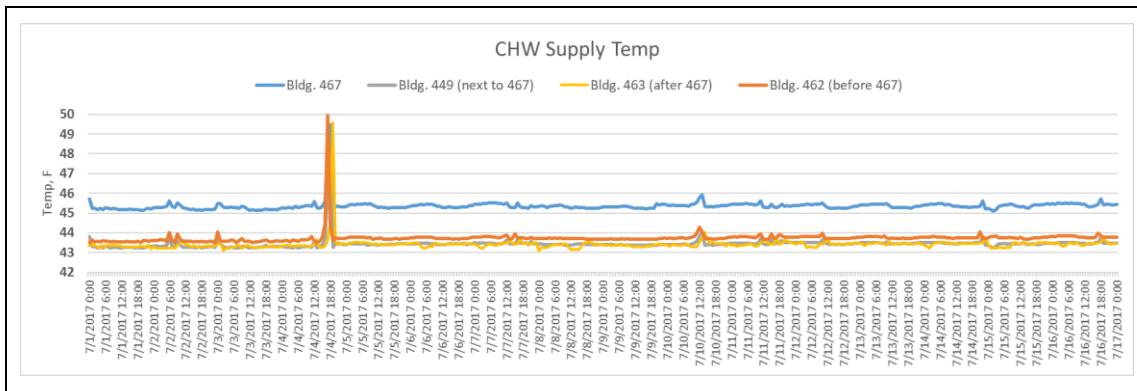

### *Comments*

The CHW supply temperature readings for this building started to decrease on 8/6/2016 while all adjacent buildings have stable supply temperatures at around 42°F. The supply temperature had a period of obviously erroneous values of 20°F during 9/10/2016 – 9/20/2016, and then increased to 45°F range. The explanatory figure below shows the supply temperature for Bldg. #467 and the surrounding Bldgs. #462, #449, and #463. The temperature sensor for Bldg. #467 shows to be almost two degrees higher than its neighboring buildings. Since the CHW consumption is within the 13-month pattern this month, no estimation was made.

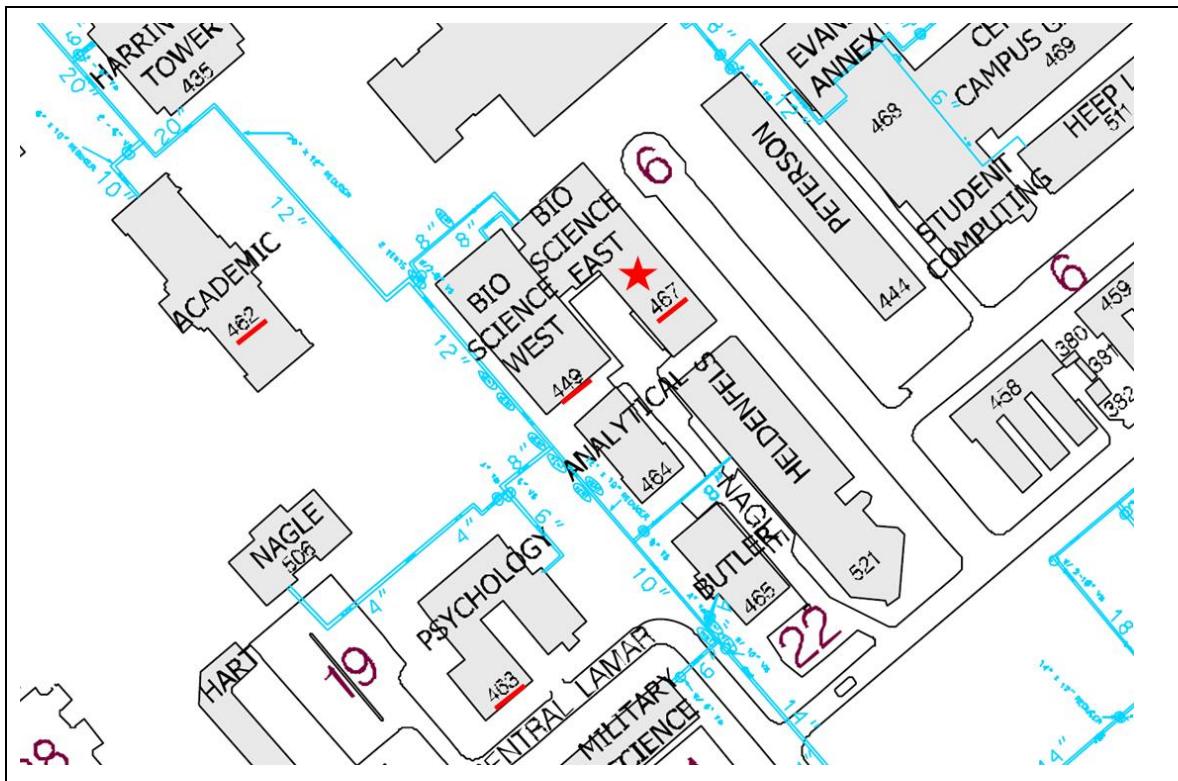

### *Explanatory Figure: 13 months energy balance plot with original data.*

**Explanatory Figure: Time series plot of hourly average CHW supply temperature for Bldgs. #467 Biological Sciences East, #462 Academic, #449 Biological Sciences West, and #463 Psychology. (July 2017)**

**Explanatory Figure: CHW distribution with Bldgs. #467 Biological Sciences East, #462 Academic, #449 Biological Sciences West, and #463 Psychology highlighted.**

## Scoates Hall (TAMU Bldg #478)

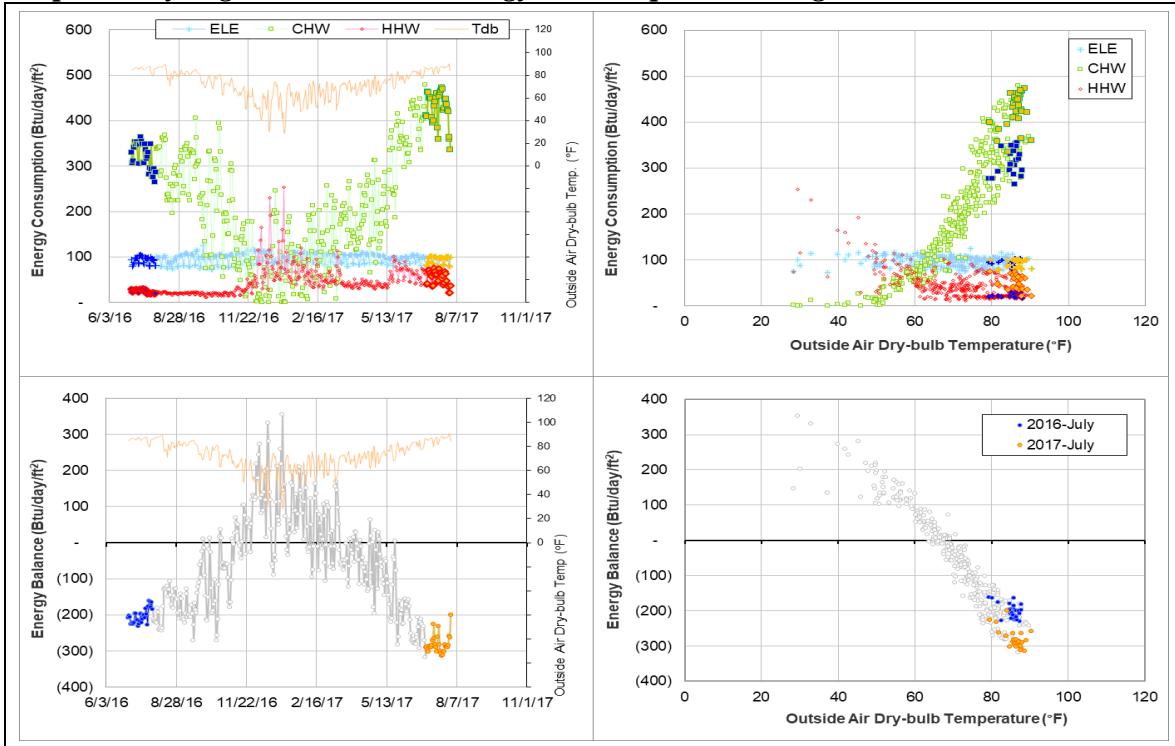

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level is higher than the level during the past year.	5/1/2017 – Ongoing
HHW	The consumption level is higher than the level during the past year.	5/1/2017 – Ongoing

### *Comments*

Starting in May 2017, the CHW and HHW consumption pattern has started to increase in higher outside temperatures. A more distinct HHW weekday/weekend setback has also appeared. The energy balance has also decreased by about 100 Btu/day/ft<sup>2</sup>.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Fermier Hall (TAMU Bldg #482)

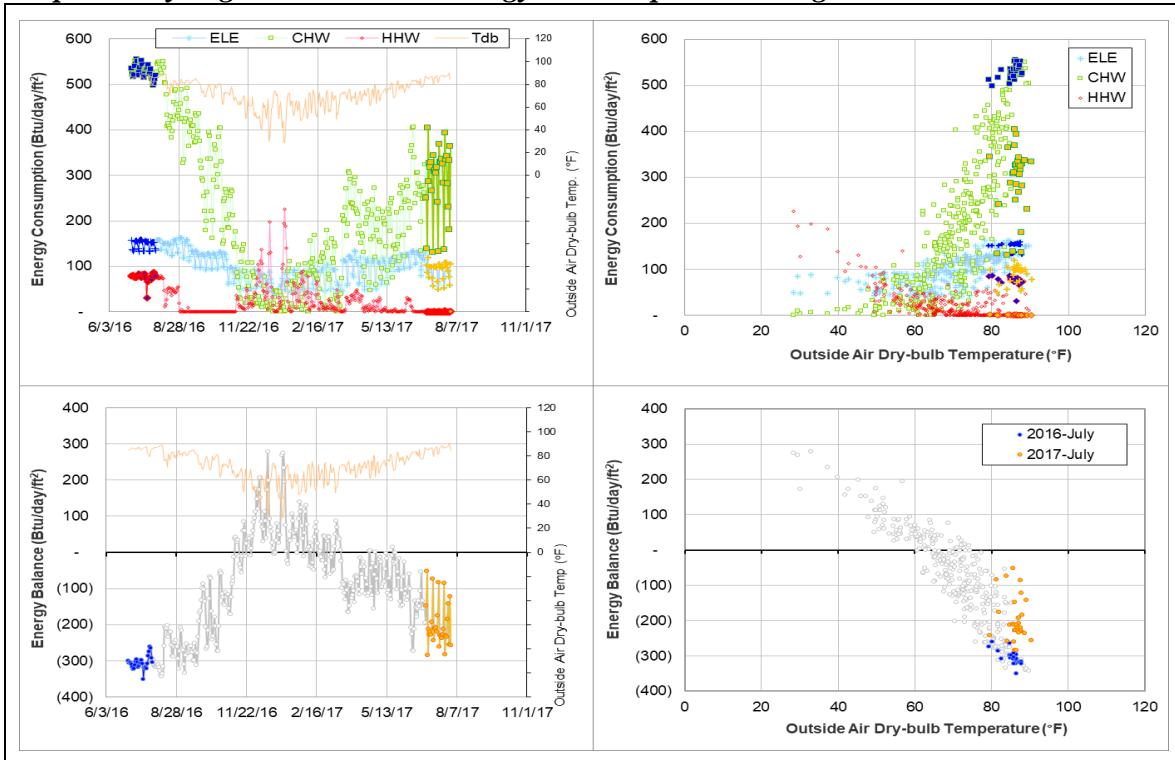

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW/HHW	The consumption level has significantly decreased.	6/24/2016 – Ongoing

### *Comments*

CHW and HHW of this building decreased significantly in steps since 6/24/2016. Since the energy balance plot has retained its pattern up to 12/23/2016, the drop may be due to a decrease in usage. The CHW consumption during winter break (12/23/2016 – 12/31/2016) is lower than the recent pattern but does not appear to be a meter issue. This building is in the ESCO list. The decrease in consumption level could be related to it.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Chemistry Building (TAMU Bldg #484)

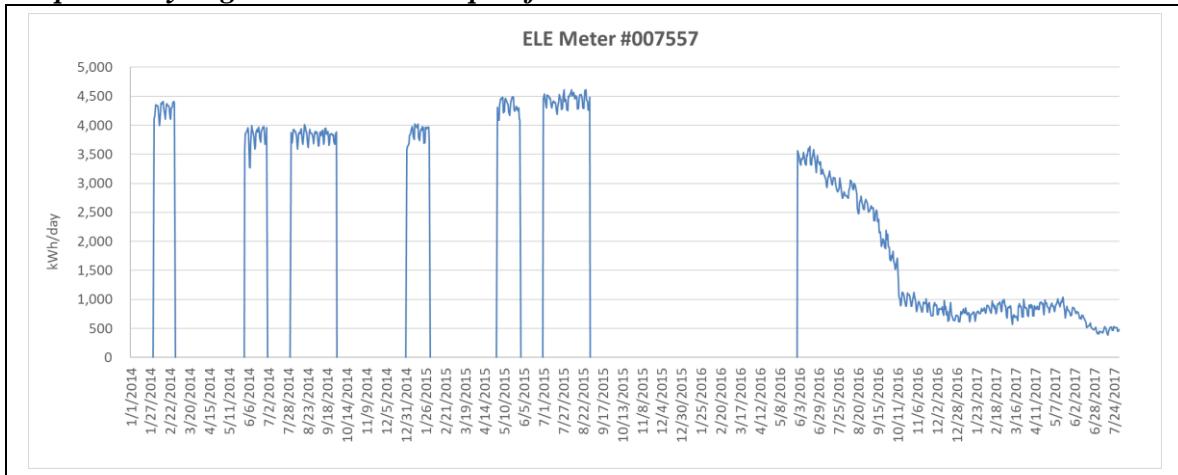

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE #007557	The ELE consumption level has decreased significantly for meter #007557.	6/1/2016 – Ongoing

### *Comments*

There are four ELE meters for this building. The consumption for ELE meter #007557 decreased gradually from 6/1/2016 to 8/31/2016 then more significantly in September and October 2016. This change appears to relate to building renovations.

### *Explanatory Figure: Times series plot for meter #007557*

## Civil Engineering Building (TAMU Bldg #492)

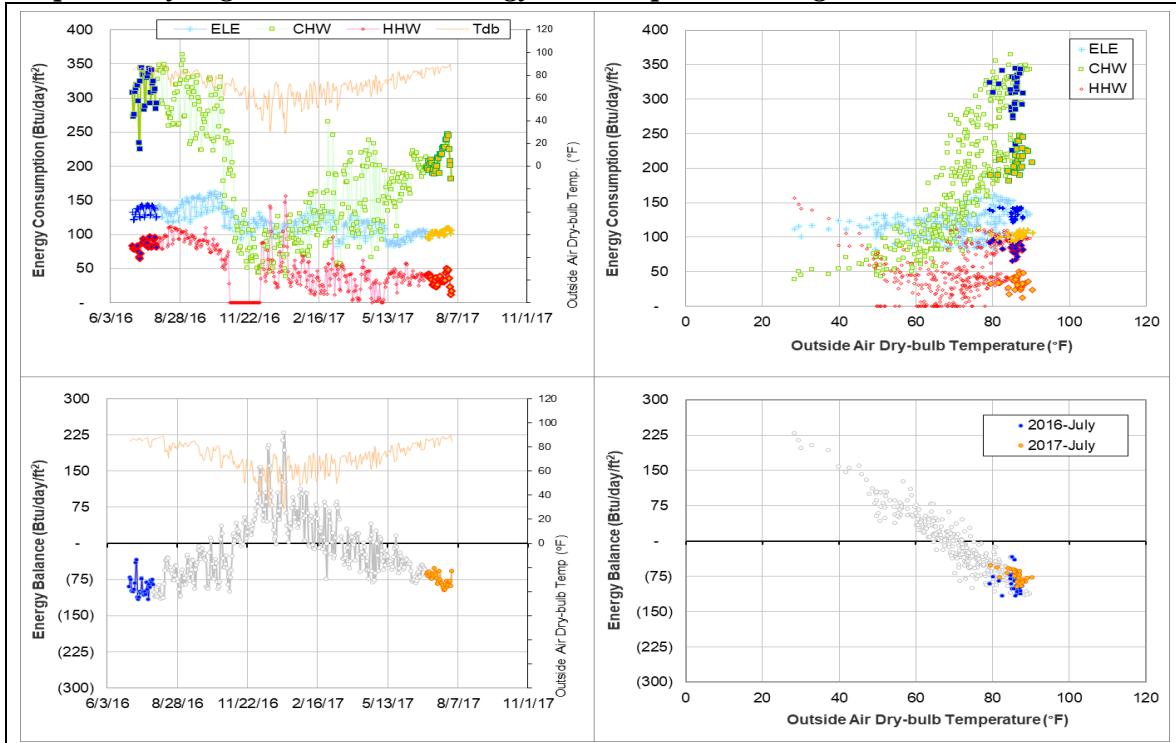

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW/HHW	The consumption level decreased.	10/29/2016 – Ongoing.

### *Comments*

Starting 10/29/2016, the CHW and HHW consumption levels decreased and continued to remain low. Excluding HHW meter issue from 10/29/2016 – 12/7/2016 (zero flow rate and near zero delta-T), the lower consumption levels may be due to ESCO.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Utilities & Energy Services Central Office (TAMU Bldg #496)

### *Detected issues in the energy balance and/or the consumption data*

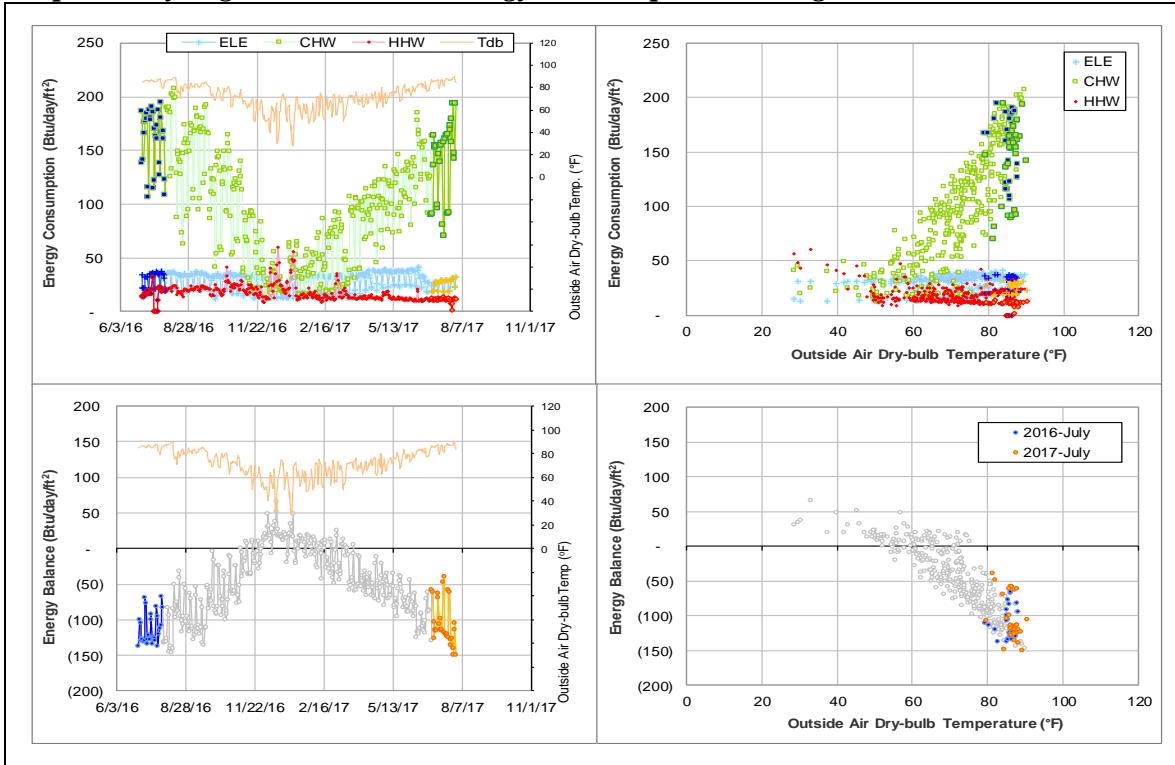

Data Type	Description of data behaviors	Period
ELE, CHW, and HHW	The energy use per unit floor area is low compared to other buildings.	Since the data became available on 7/1/2012

### *Comments*

The peak electric use intensity is around 0.65 W/ft<sup>2</sup>, which is small for an office building on campus. The delta-T for HHW seems to be small for years. The CHW and HHW consumption per unit floor area also seem to be low. It is possible that the GSF on file (46,110 ft<sup>2</sup>) includes substantial unoccupied or unconditioned areas. The CHW consumption during the winter break period (12/23/2016 – 12/31/2016) is lower than previous winter break periods but does not appear to be a meter issue.

The energy balance scatter is due to the consumption level changes for CHW and HHW. The cross-point temperature of the energy balance is in the range of 50 to 75°F. See also Section II-2.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Engineering Innovation Center (TAMU Bldg #499)

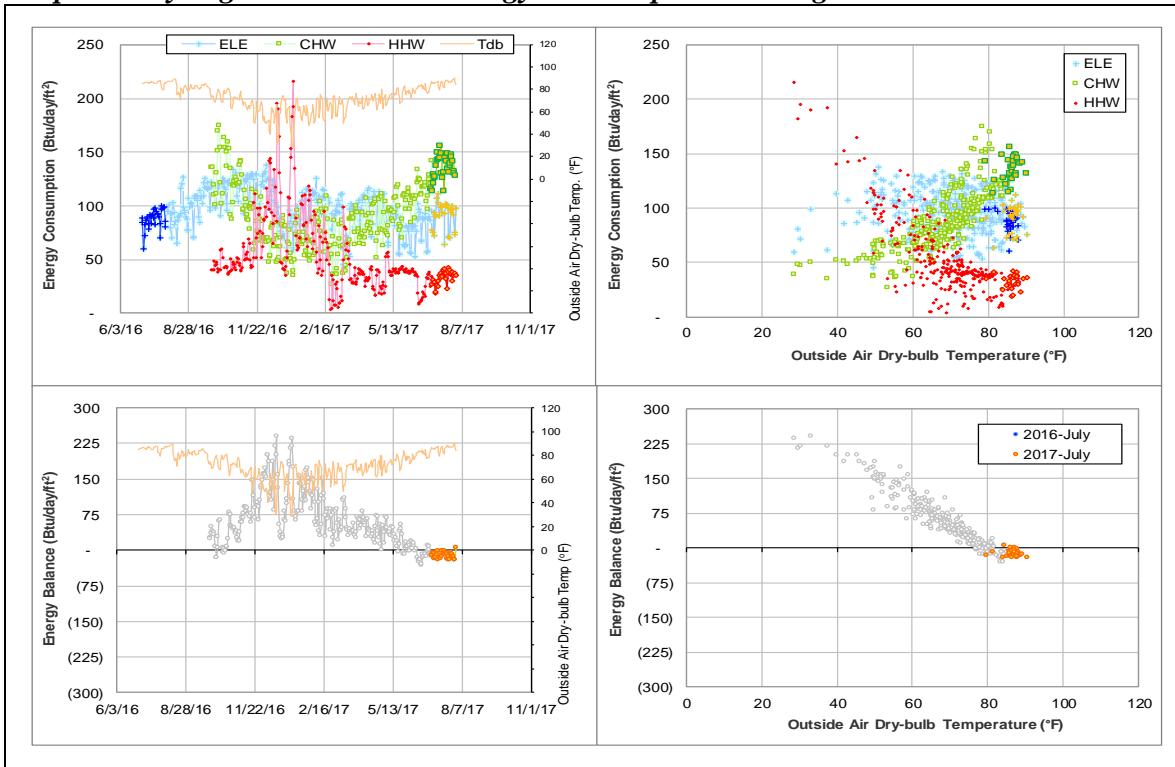

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The cross-point temperature is high, around 80°F.	For years
CHW	The consumption level is low compared to the ELE and HHW consumption.	For years

### *Comments*

The cross-point temperature of energy balance for this building is high, around 80°F. The CHW consumption is relatively low when compared to the ELE and HHW consumption and could be the reason for the high cross-point temperature. See also Section II-2.

### *Explanatory Figure: 13 months energy balance plot with original data.*

## Nagle Hall (TAMU Bldg #506)

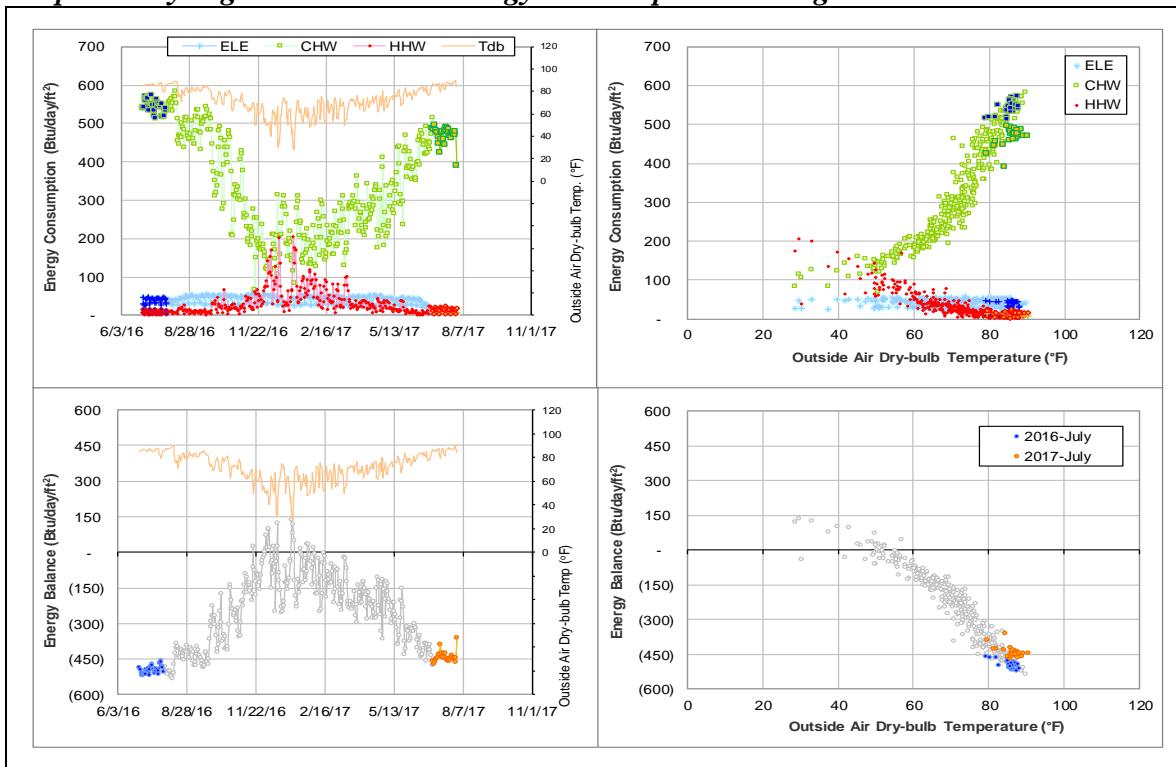

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The level was low and the cross-point temperature is around 50°F.	Since the data became available
ELE	The consumption per unit floor area is smaller than those for other similar office buildings, and has been decreasing gradually in the past 4 years.	Since the data became available

### *Comments*

The ELE consumption is lower than 50 Btu/day/ft<sup>2</sup>, lower than the typical level of 100 Btu/day/ft<sup>2</sup> for typical office buildings on campus. This might be a metering error that this meter might not cover the whole building or it is erroneously factored.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Blocker Building (TAMU Bldg #524)

### *Detected issues in the energy balance and/or the consumption data*

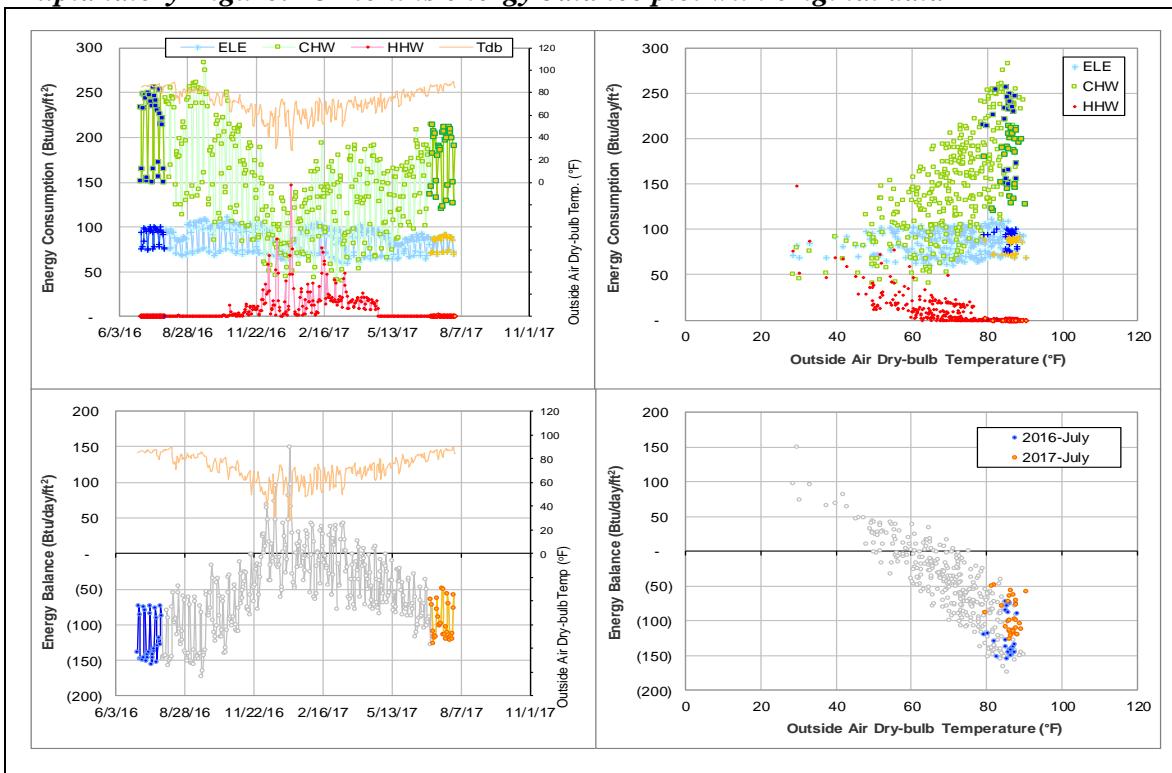

Data Type	Description of data behaviors	Period
CHW	The consumption decreased and is about 50 Btu/day-ft <sup>2</sup> (25%) lower than the level of the past year.	Since May 2017
HHW	The consumption level is low.	Past several years

### *Comments*

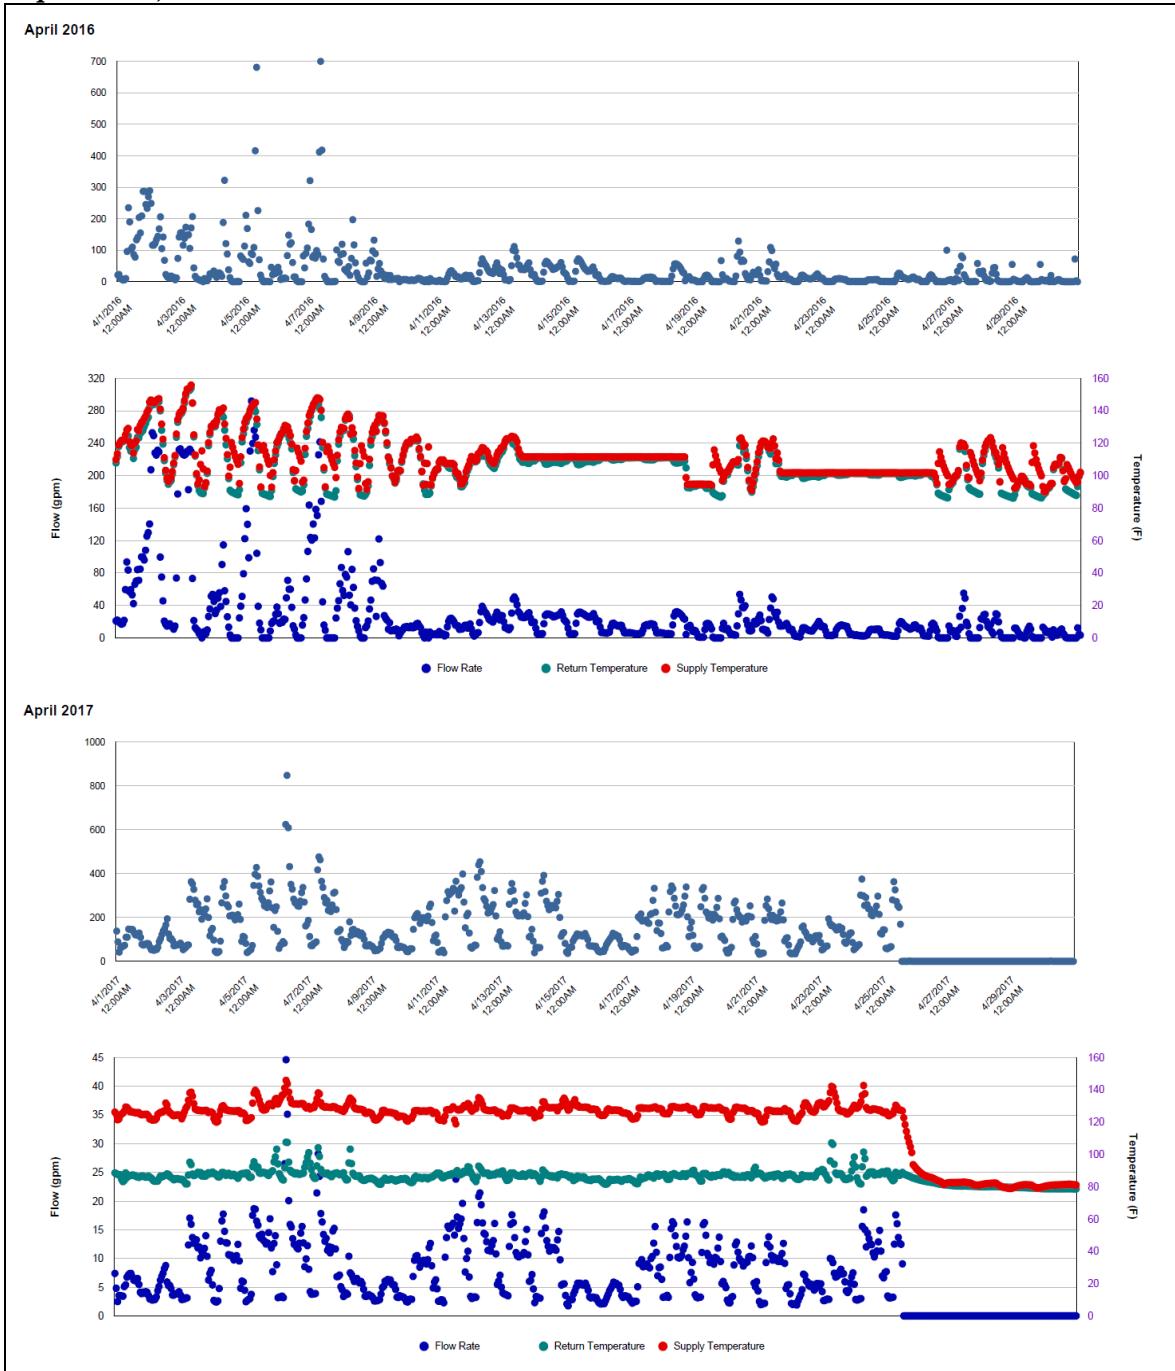

The cross-point of temperature of energy balance had been lower than 60°F for years. But the recent decrease of CHW pulled energy balance up and now it crosses between 60 and 70°F.

The delta-T and consumption level for HHW seemed low for the past couple of years and started to change in an unstable fashion in February 2017. The explanatory figures below show the change in Delta-T from April 2016 and April 2017. HHW seemed closed off since the end of April. This increase also contributed to the higher and more reasonable cross-point of energy balance. It continues to seem closed off during the non-heating season.

### *Explanatory Figure: 13 months energy balance plot with original data*

**Explanatory Figure: Time series plots of hourly HHW energy consumption, flow rate, and supply and return temperatures from the utilities office. (Top: April 2016; Bottom: April 2017)**

## McNew Laboratory (TAMU Bldg #740)

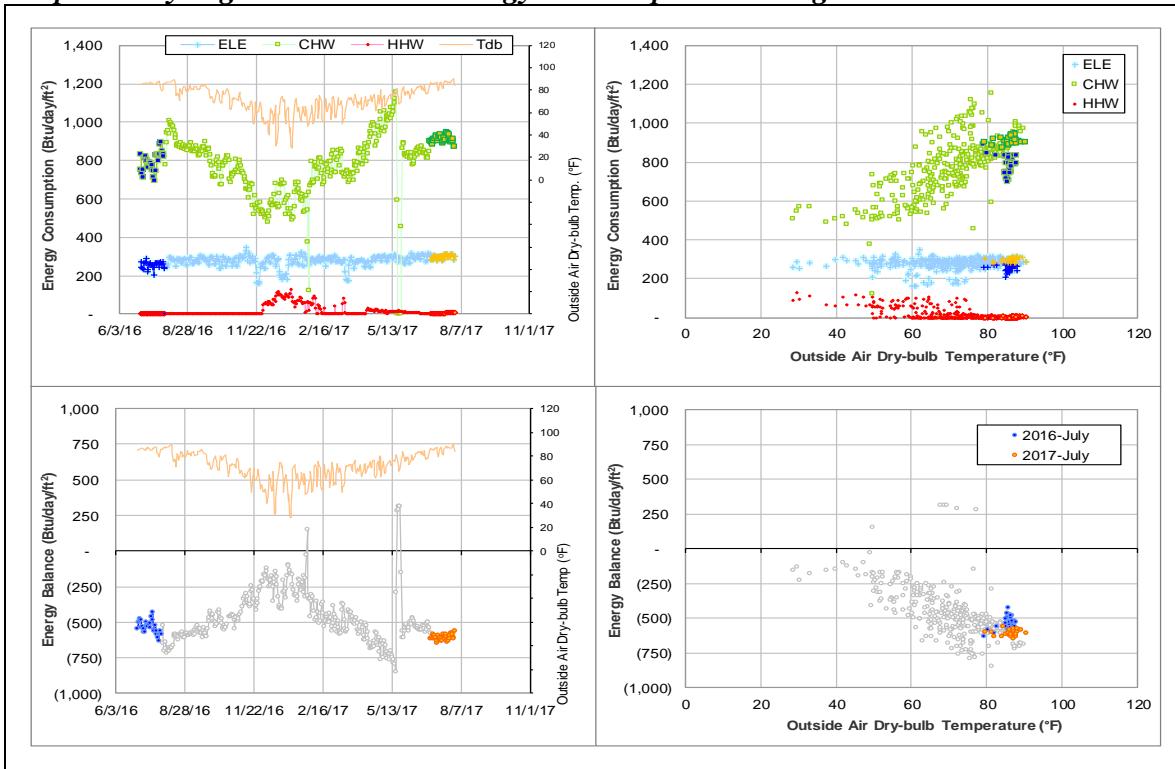

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The energy balance pattern level is low.	Past several years
HHW	The consumption level seems low.	Past several years

### Comments

The energy balance level has consistently been low and does not even reach a cross-point temperature. Since 2013, there has been a large decrease in HHW use. After that, HHW consumption decreased gradually year by year. Recently, the CHW has increased starting February 2017, causing the energy balance to reduce even more. More information is needed to help identify the reason causing the low energy balance for this building.

### *Explanatory Figure: 13 months energy balance plot with original data*

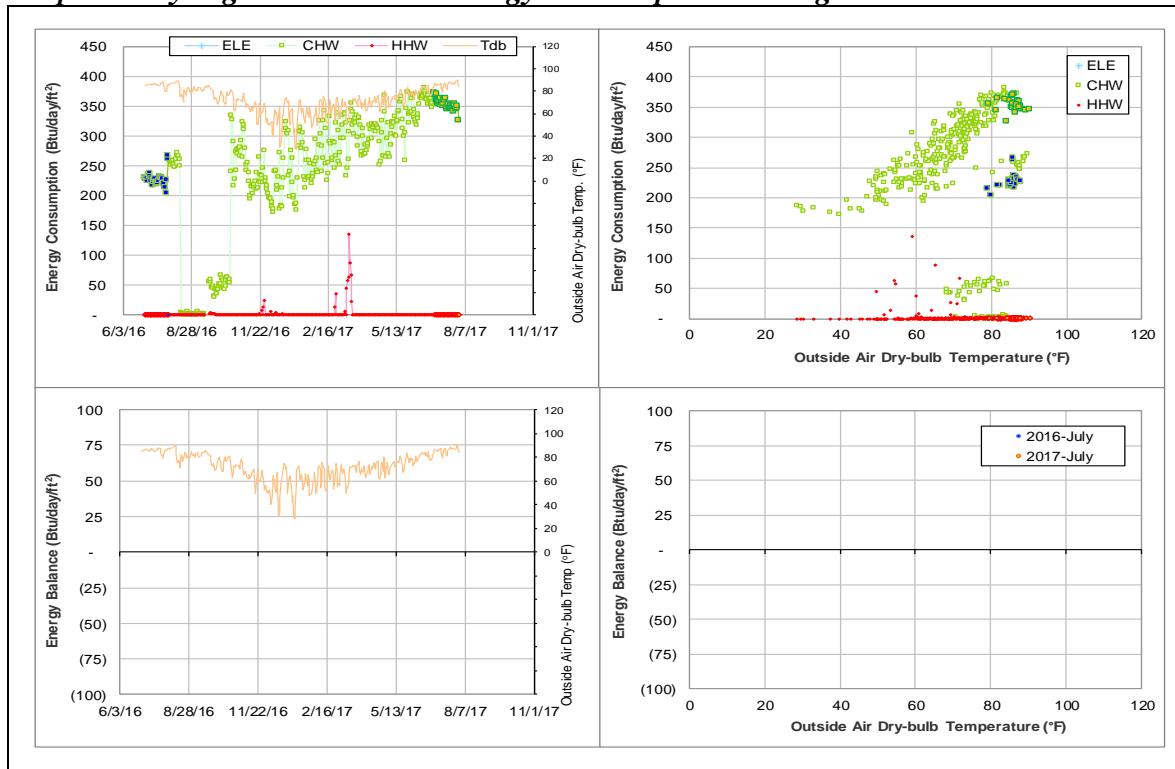

## TVMC-Small Animal Building (TAMU Bldg #880)

Data Type	Description of data behaviors	Period
HHW	The daily consumption is zero or nearly zero for the majority of the days during the year.	Since the data became available in October 2008

### Comments

The daily HHW consumption pattern is zero or nearly zero for the majority of the days for years. Because the HHW consumption level appears unstable since the data became available, a valid consumption model for this meter has not been created.

**Explanatory Figure: 13 months energy balance plot with original data**

## Texas Vet Med Diagnostic Lab (TAMU Bldg #1041)

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE	Decrease after missing periods	Since May 2017
CHW HHW	Still missing as ELE data recovered	Since July 2016

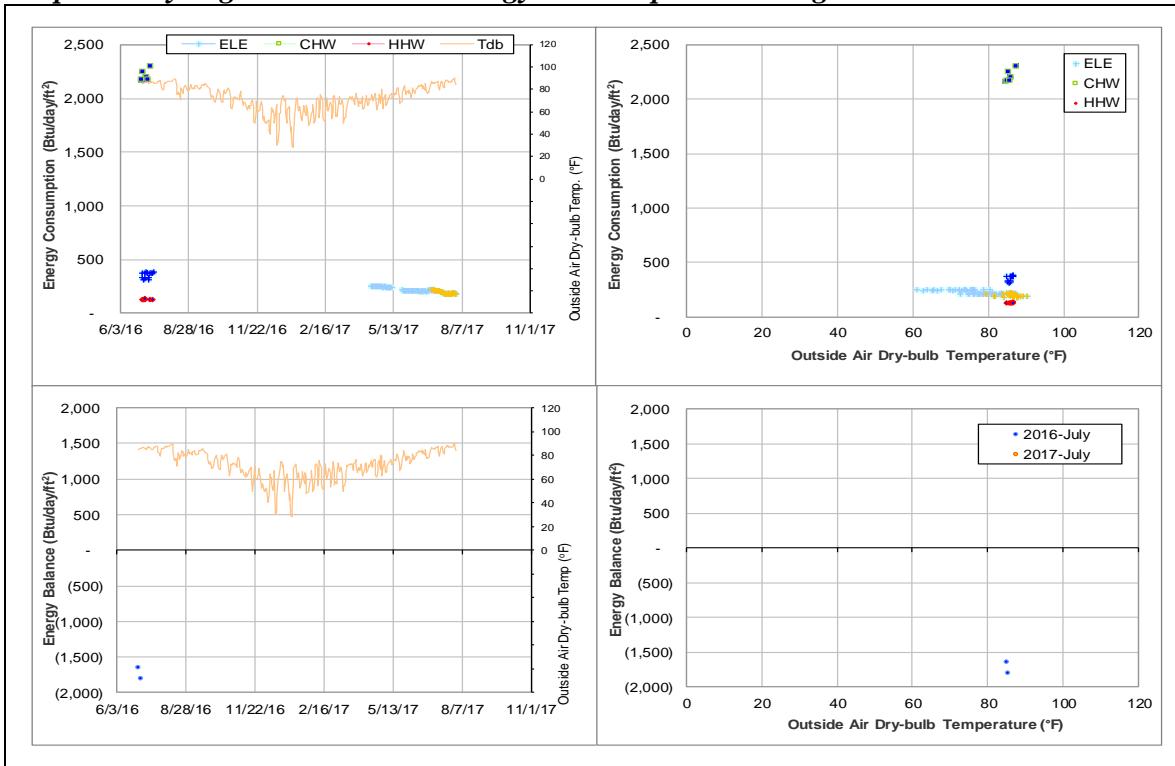

### *Comments*

This building has six MID's in total (two for each utility type) and they had gone missing since 7/14/2016. The two ELE meters restarted taking data on 3/27/2017.

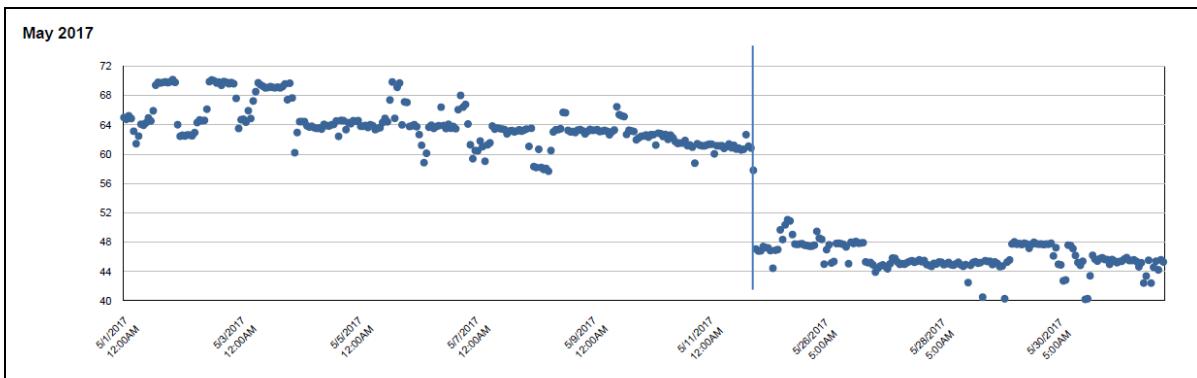

ELE MID 001466 decreased from a level ranging from 110 to 180 kWh/h to a stable 100 kWh/h level. ELE MID 001539 decreased from a level ranging from 100 to 130 kWh/h to 64 – 72 kWh/h level, and decreased further after a short missing period of 5/12/2017 – 5/24/2017 to 45 kWh/h. This building's total ELE consumption decreased by 33% in daily average value.

CHW and HHW data are still missing. To reflect the decreased level as ELE suggests, CHW and HHW consumption is estimated by first using models based on 8/1/2015 – 7/13/2016 data and then scaling down to 66%.

### *Explanatory Figure: 13 months energy balance plot with original data*

**Explanatory Figure: Time series plots of hourly energy consumption from the utilities office. (ELE MID 001539 during May 2017)**

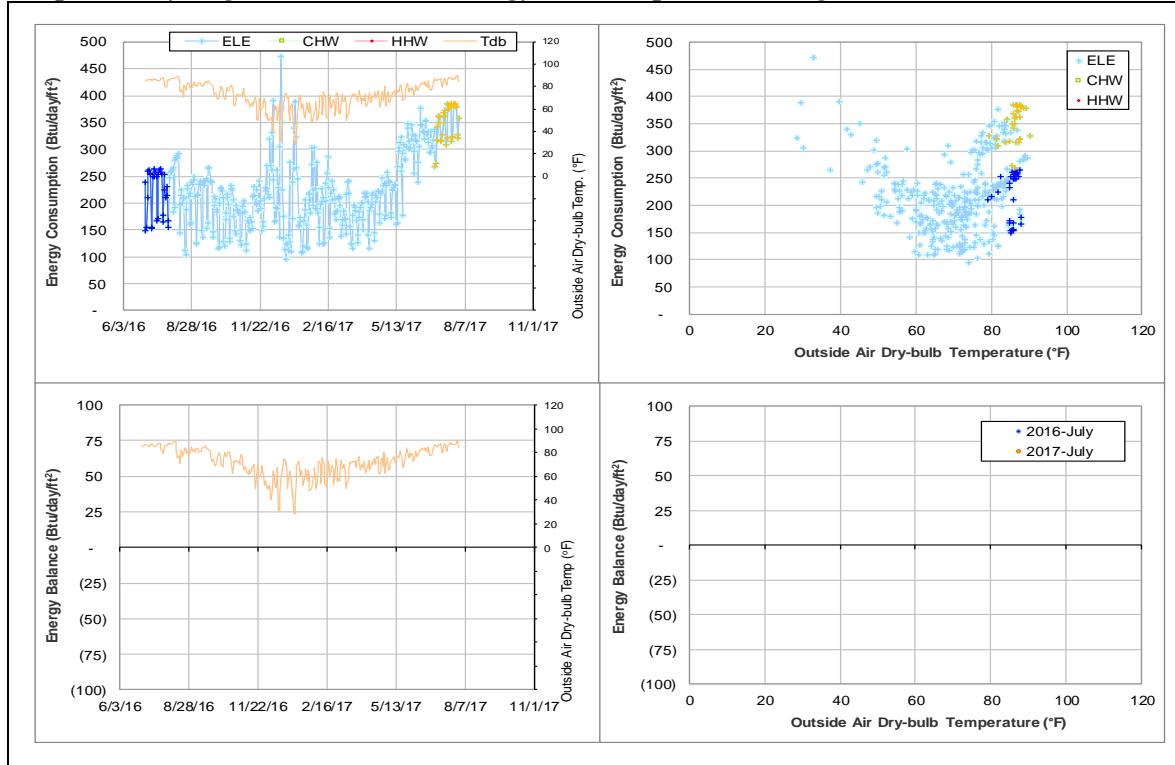

## Utilities Energy Office Annex (TAMU Bldg #1089)

Data Type	Description of data behaviors	Period
ELE	The consumption increased significantly.	Since 5/15/2017

### Comments

The daily ELE consumption significantly increased since 5/15/2017 by more than 100 Btu/day-ft<sup>2</sup>. There is no obvious faulty meter readings.

**Explanatory Figure: 13 months energy balance plot with original data**

## Physical Plant Administration & Shops (TAMU Bldg #1156)

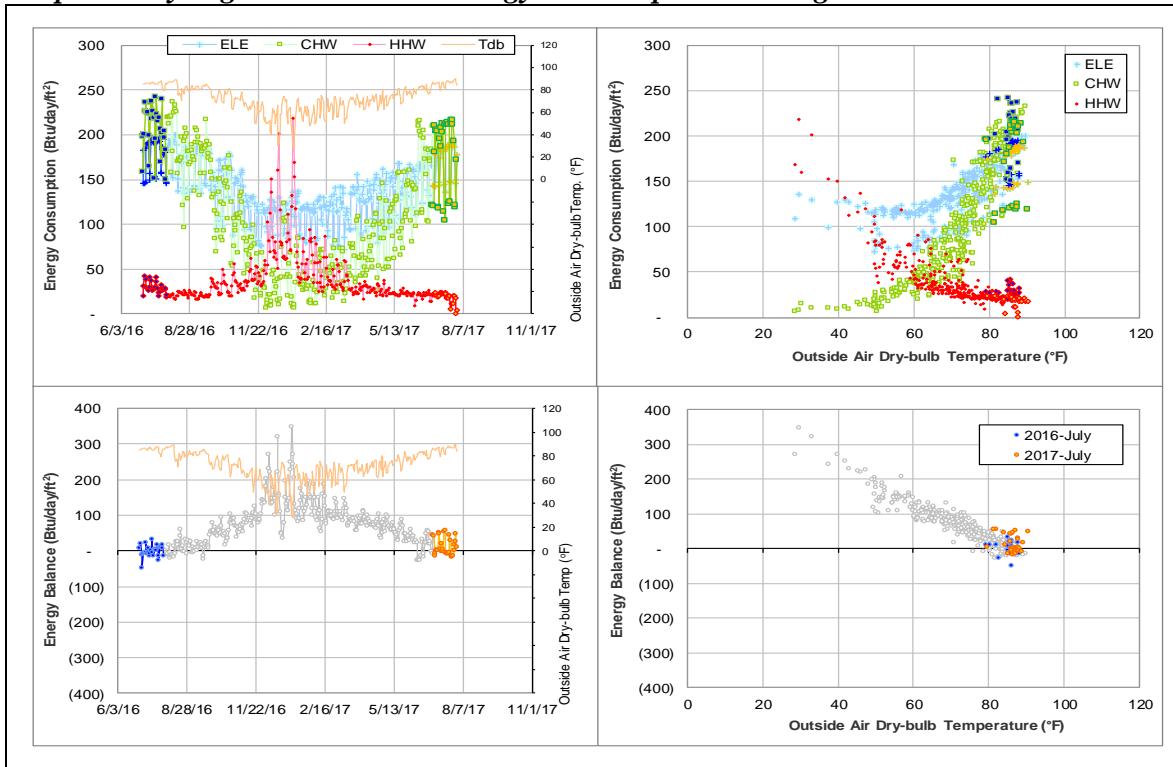

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The cross-point temperature is as high as 85°F.	Since 7/1/2014 when ELE became available
CHW	The consumption level seems low compared to the ELE and HHW use level.	Since the data became available on 7/1/2012.
	The weekend level decreased to farther from weekday level.	Since 2017.

### *Comments*

The electricity is not available until 7/1/2014. CHW consumption level seems low compared to the ELE and HHW use level, but the CHW consumption has a clean and stable pattern since the data became available on 7/1/2012. More information is needed to identify which type of utility causes the high cross-point temperature. It is possible that the GSF on file ( $101,704 \text{ ft}^2$ ) includes substantial unoccupied or unconditioned areas. Since 2017, the weekday and weekend separation of CHW consumption patterns have a larger split.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Utilities & Energy Services Business Office (TAMU Bldg #1497)

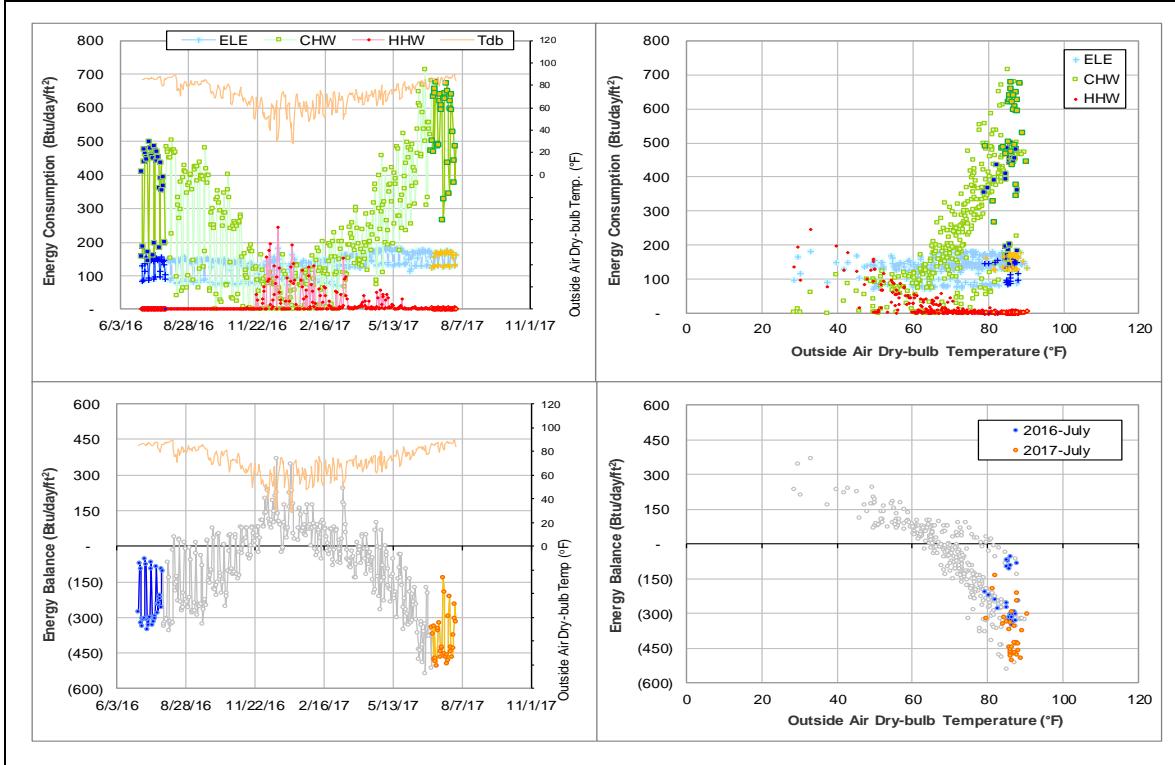

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	Weekend consumption level decreased	Since July 2017.

### *Comments*

The weekend CHW consumption level deceased. The CHW weekday/weekend pattern has been changing occasionally since 2015. There is no obvious faulty meter observed.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Medical Sciences Library (TAMU Bldg #1509)

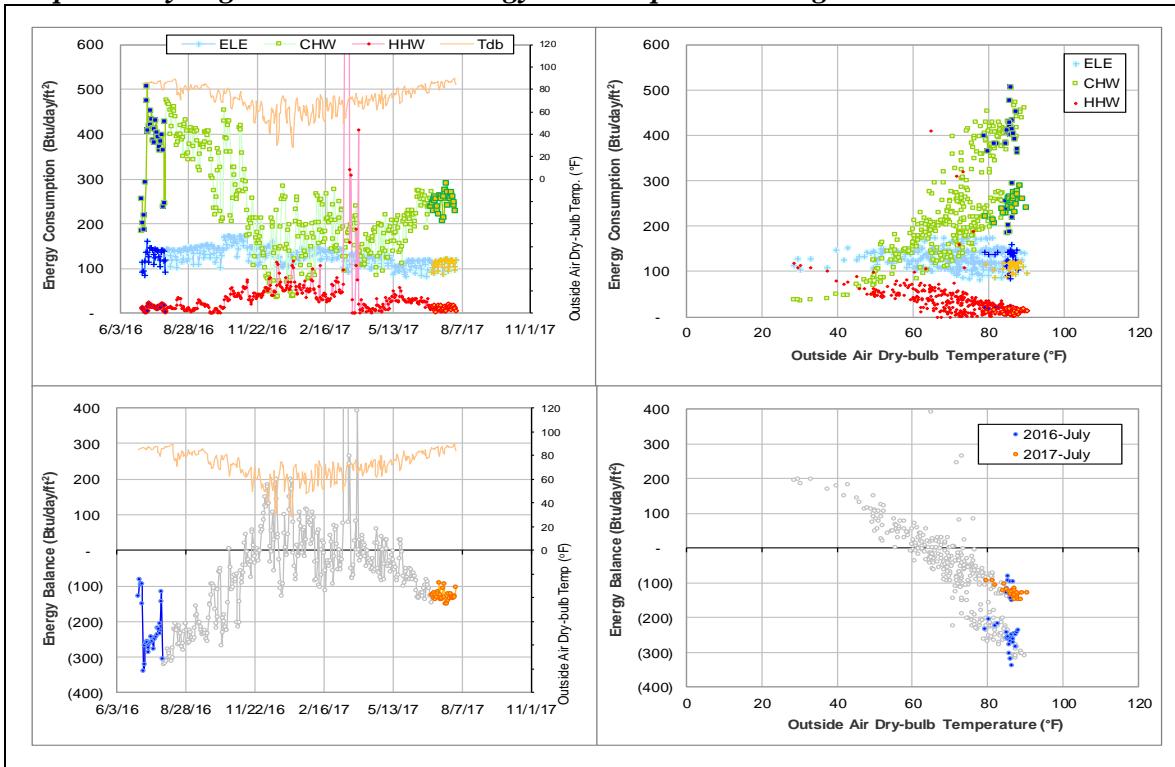

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	Decreased and a new pattern is suspected	Since 3/24/2017.

### *Comments*

CHW flow rate has been unstable for a long time. On 3/24/2017, the flow rate dropped to and remained at the 20 – 80 gpm level, which is significantly lower than the beginning of Mar 2017 at near 300 gpm. The CHW consumption thus has a considerable decrease in the following months. This building is on the ESCO list, which is a probable cause of the change. More data are needed to verify new pattern.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Agriculture Public Building (TAMU Bldg #1537)

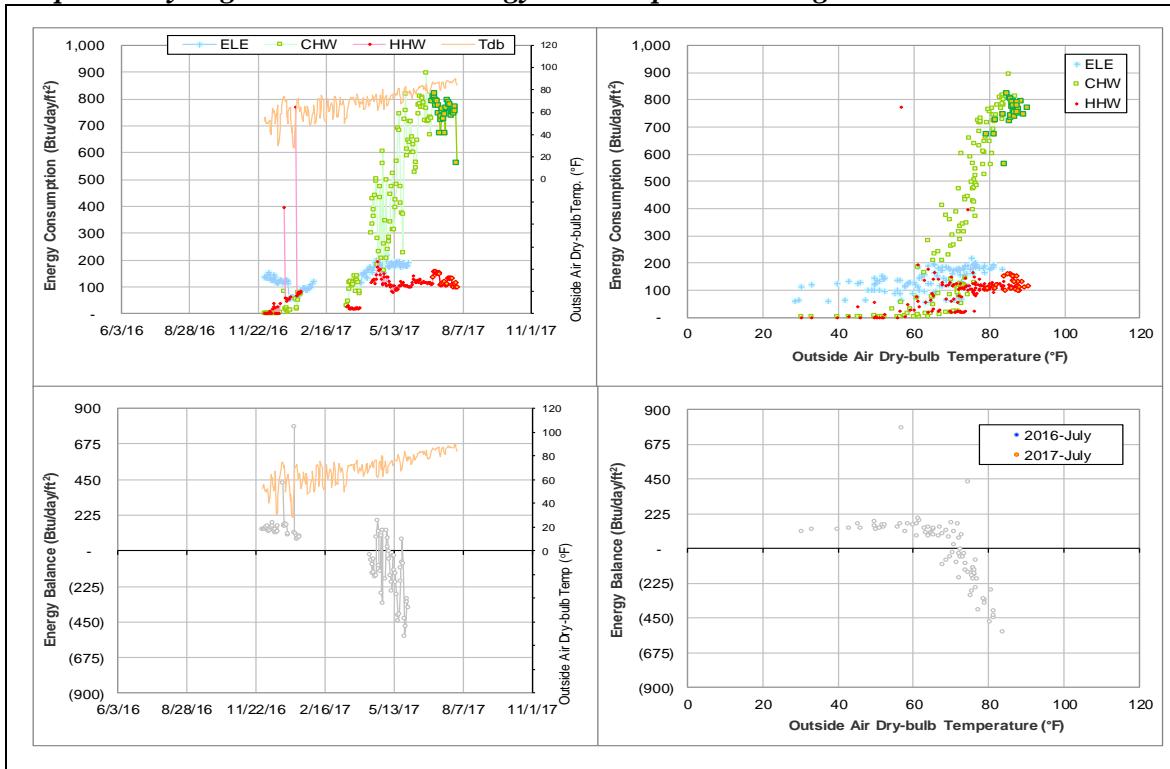

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE, CHW, HHW	MID changed.	Since July 2017.

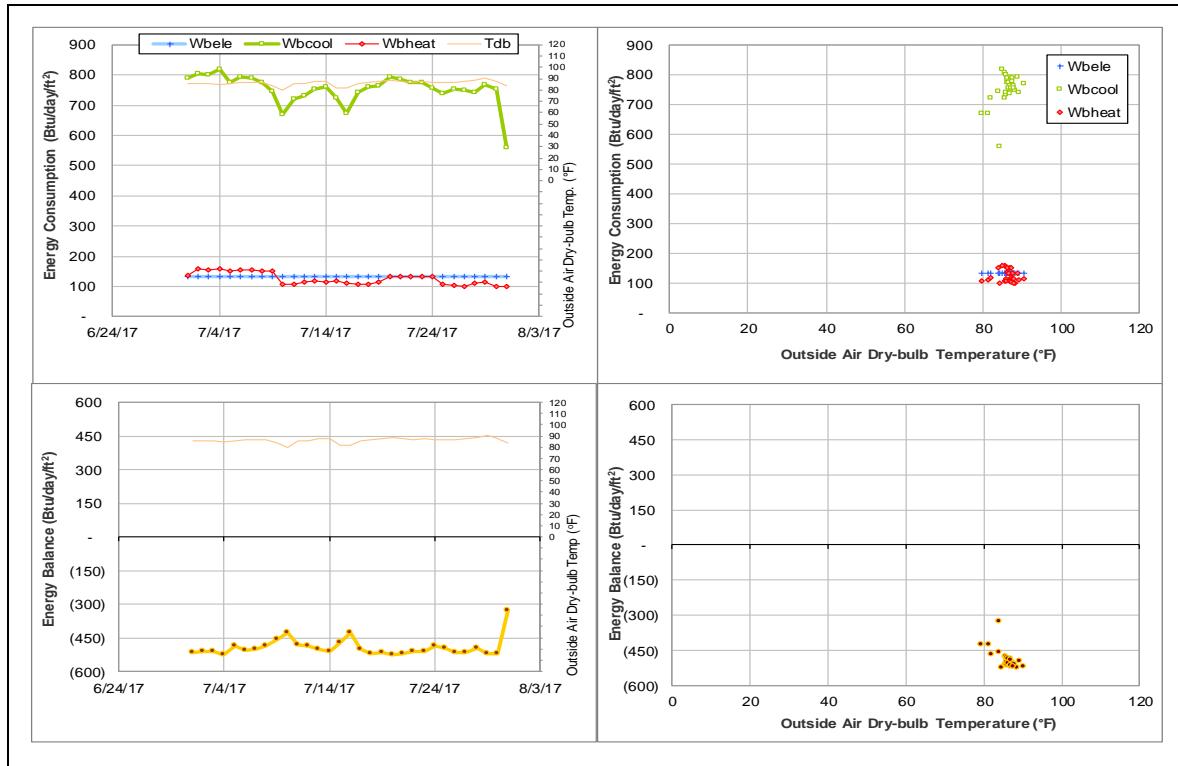

### *Comments*

The MID's of this building changed from ELE 009620 & 009621, CHW 009622, and HHW 009623 to ELE 009982, CHW 009983, and HHW 009984. The ELE consumption of this whole month is missing. The consumption is estimated using combined consumption of the models of the previous two MID's.

### *Explanatory Figure: 13 months energy balance plot with original data*

**Energy balance plot using the original data for the month of analysis. Missing data have been filled in, if any.**

## Cox-McFerrin Center for Aggie Basketball (TAMU Bldg #1558)

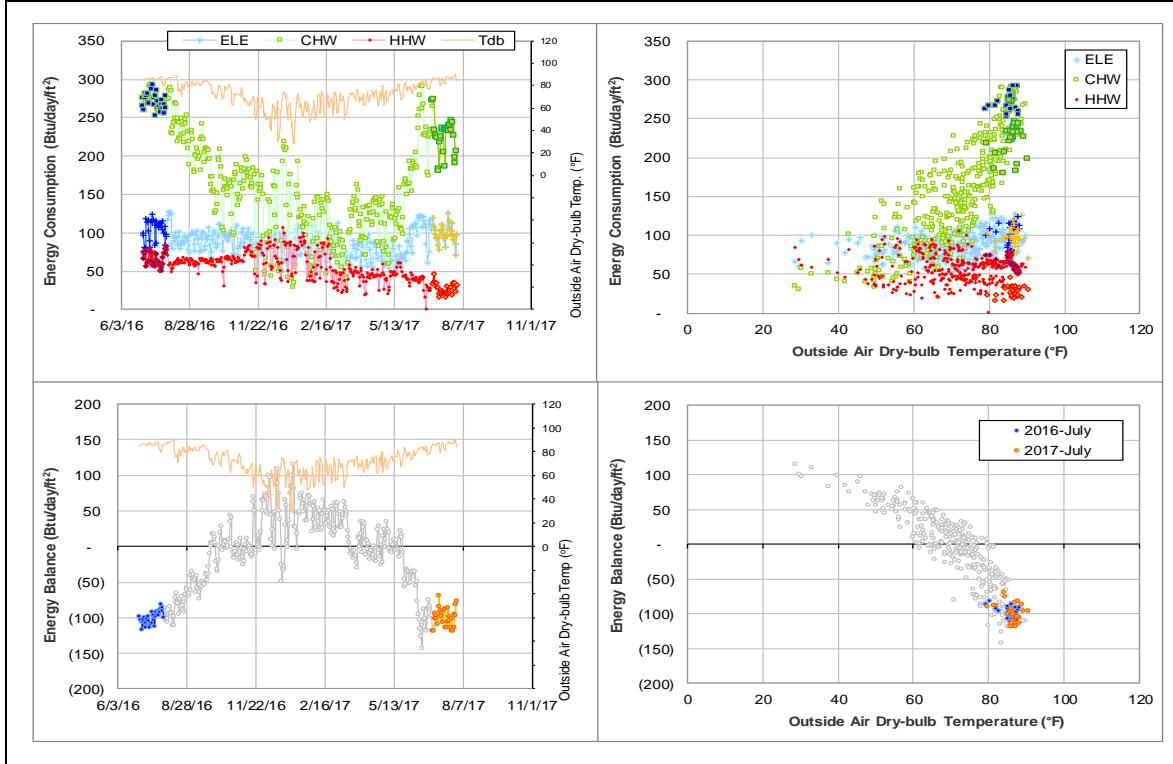

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
HHW	Consumption pattern is not weather dependent.	11/5/2016 – Ongoing

### *Comments*

The HHW pattern remains scattered and does not appear to be weather dependent.

### *Explanatory Figure: 13 months energy balance plot with original data*

## International Ocean Discovery Building (TAMU Bldg #1601)

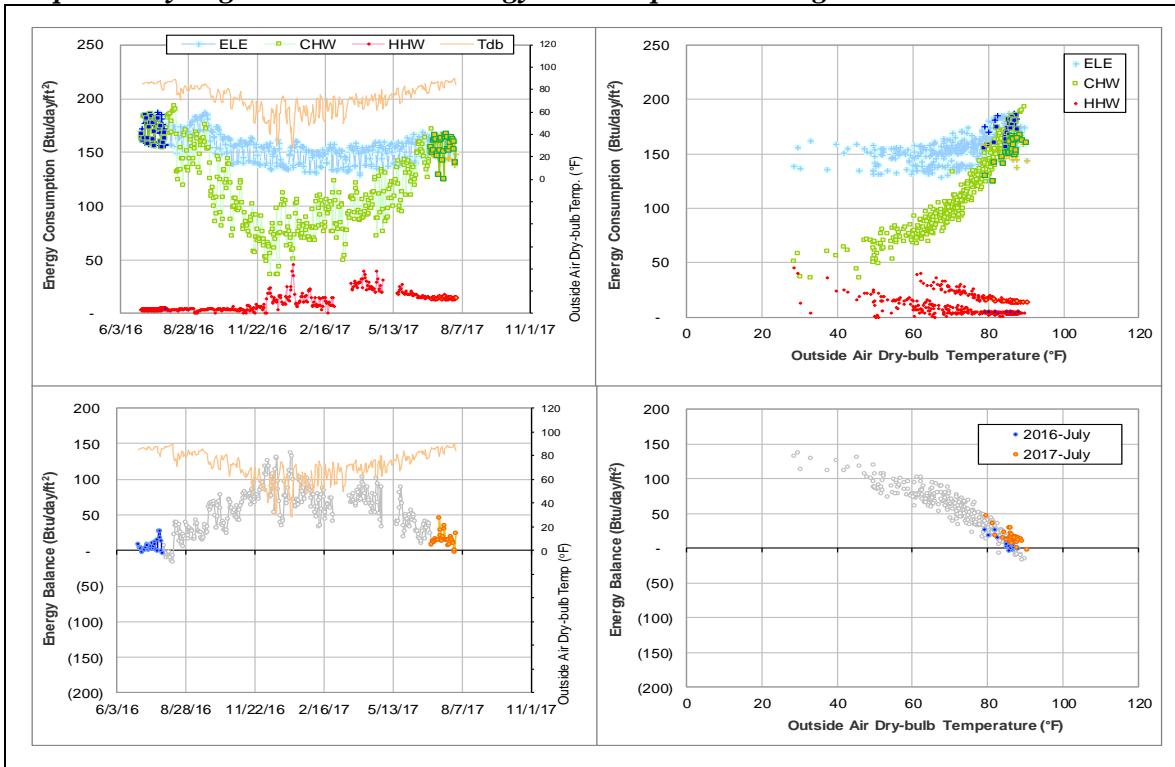

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
Energy Balance	The cross-point is high, around 85°F.	Since data became available in Feb 2015
HHW	A new MID 009829 is discovered.	3/21/2017

### *Comments*

The cross-point temperature is high for this building, around 85°F. The daily CHW consumption for last year is 36 – 200 Btu/day/ft<sup>2</sup>. The CHW consumption level is low compared to ELE and HHW levels. This building might have its own chillers. A new HHW MID 009829 is discovered and has two or three times the consumption of the older HHW MID 008145, resulting a considerable increase in measured HHW consumption.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Offshore Technology Research Center (TAMU Bldg #1604)

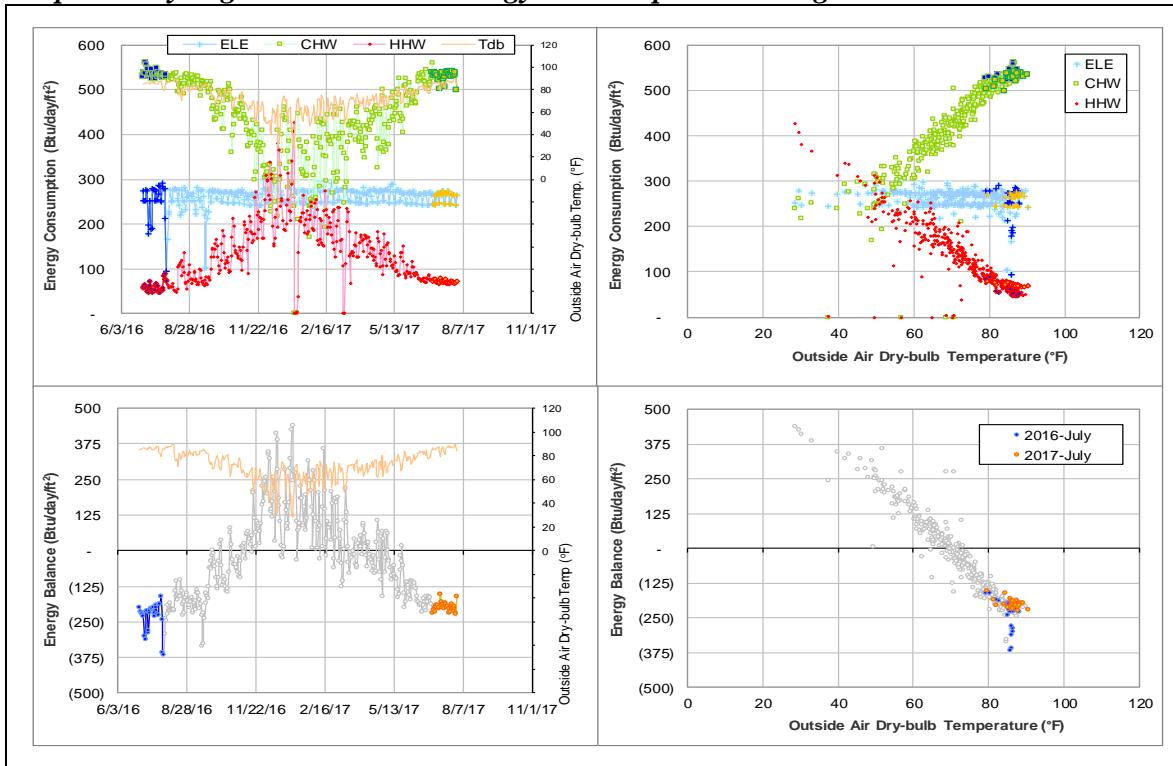

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
ELE MID 006660	Consumption is zero for most of the time.	2/1/2015 – Ongoing

### *Comments*

The electric consumption for MID 006660 has been zero for most of the time it has been available since 2/1/2015. This meter is suspected to measure consumption for a specific piece of equipment that only runs occasionally.

### *Explanatory Figure: 13 months energy balance plot with original data*

## Observation of Several Residence Halls (HHW)

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
HHW	The consumption dropped for a short period	7/21/2017 – 7/22/2017

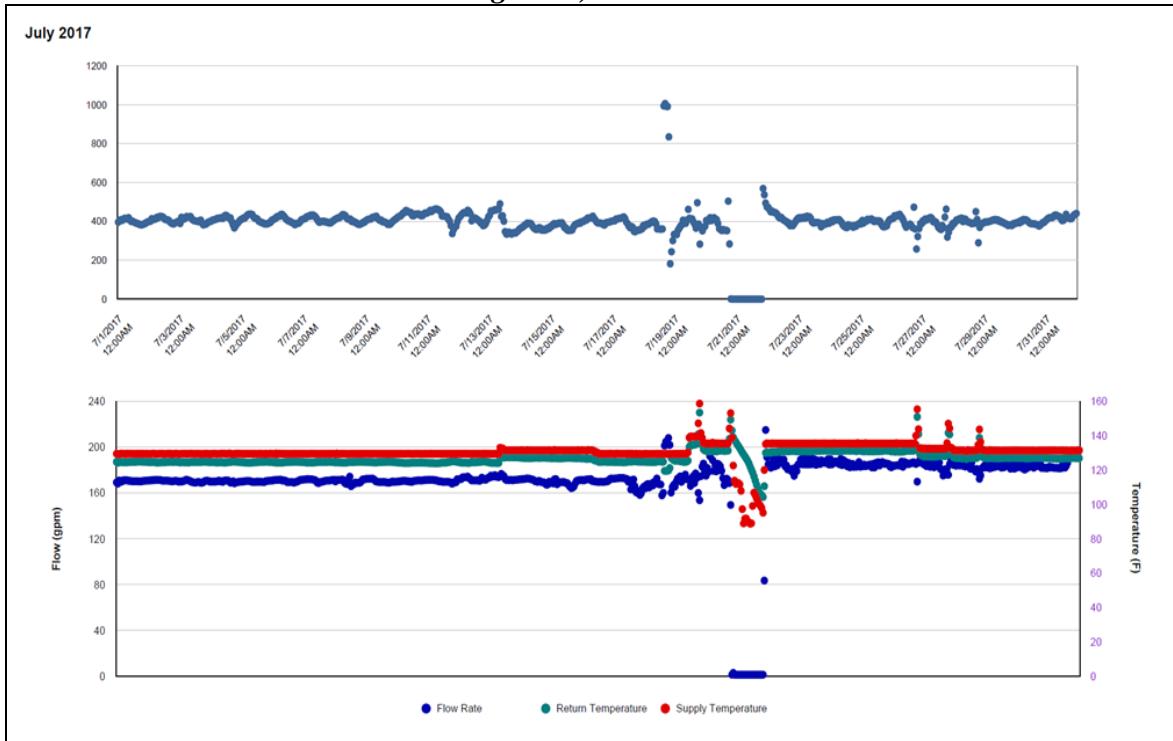

### *Comments*

For several residence halls in the area near the University Drive & Wellborn Rd intersection, the HHW consumption dropped to zero due to a zero flow rate on the evening of 7/20/2017 until the evening of 7/21/2017, as shown for Lechner Residence Hall TAMU Bldg #294 below as an example.

### Building List:

Lechner Residence Hall TAMU Bldg #294  
 Moses Residence Hall TAMU Bldg #412  
 Davis-Gary Residence Hall TAMU Bldg #415  
 Walton Residence Hall TAMU Bldg #422  
 Clements Residence Hall TAMU Bldg #548

### *Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. (HHW consumption for Lechner Residence Hall TAMU Bldg #294)*

## Observation of Several Main Campus Buildings (CHW)

### *Detected issues in the energy balance and/or the consumption data*

Data Type	Description of data behaviors	Period
CHW	The consumption level decreased for a short period.	7/8/2017, 7/15/2017

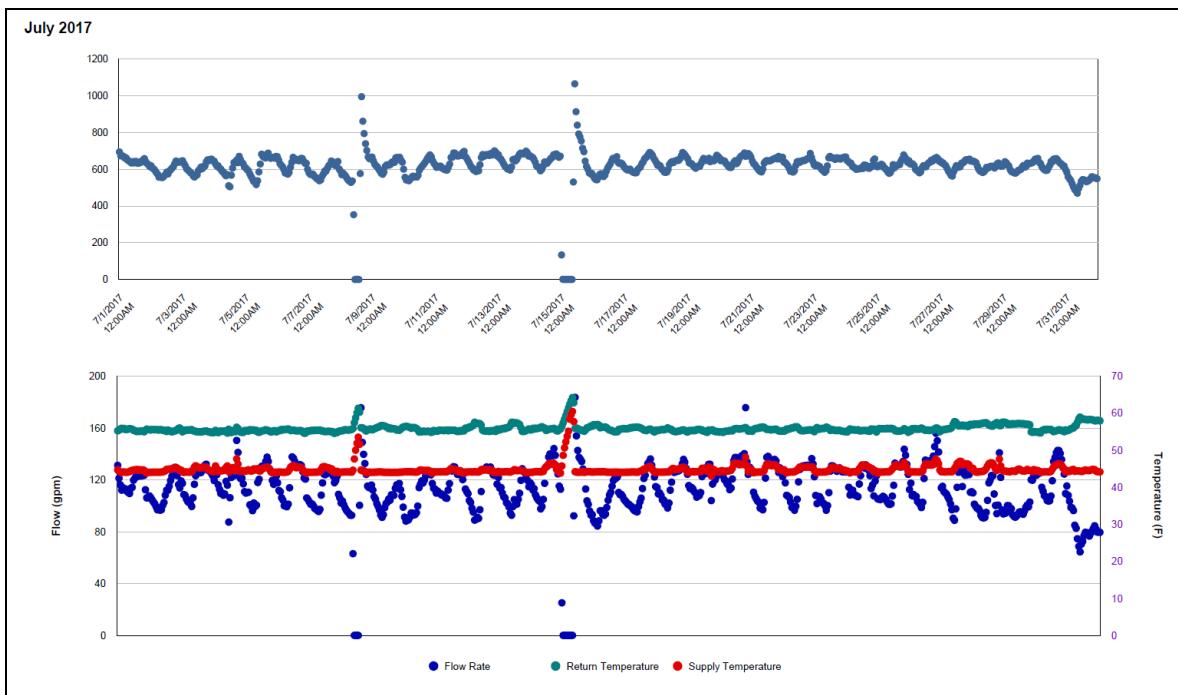

### *Comments*

Several buildings on the east-southeast of main campus experienced a drop in CHW consumption for a few hours on 7/8/2017 and 7/15/2017. Some of the buildings included in this group are listed below. The flow rate appears to decrease to zero and the supply and return temperatures drift to warmer values (see explanatory figure below). The meter does not appear to be faulty and since these two periods are of short duration, any estimations would not have a significant impact on the overall consumption.

#### **Building List:**

Wells Residence Hall TAMU Bldg #290  
 Eppright Residence Hall TAMU Bldg #292  
 Applet Residence Hall TAMU Bldg #293  
 Underwood Residence Hall TAMU Bldg #394  
 Dunn Residence Hall TAMU Bldg #442  
 Evans Library TAMU Bldg #468  
 Pavilion Building TAMU Bldg #471  
 Animal Industries Building TAMU Bldg #472  
 Heep Laboratory Building TAMU Bldg #511  
 Ash II LLC Building TAMU Bldg #1405

***Explanatory Figure: Time series plots of hourly energy consumption, flow rate, and supply and return temperatures from the utilities office. CHW consumption for Bldg #511 Heep Laboratory.***

### **III. Time Series Plots for July 2017 Consumption**

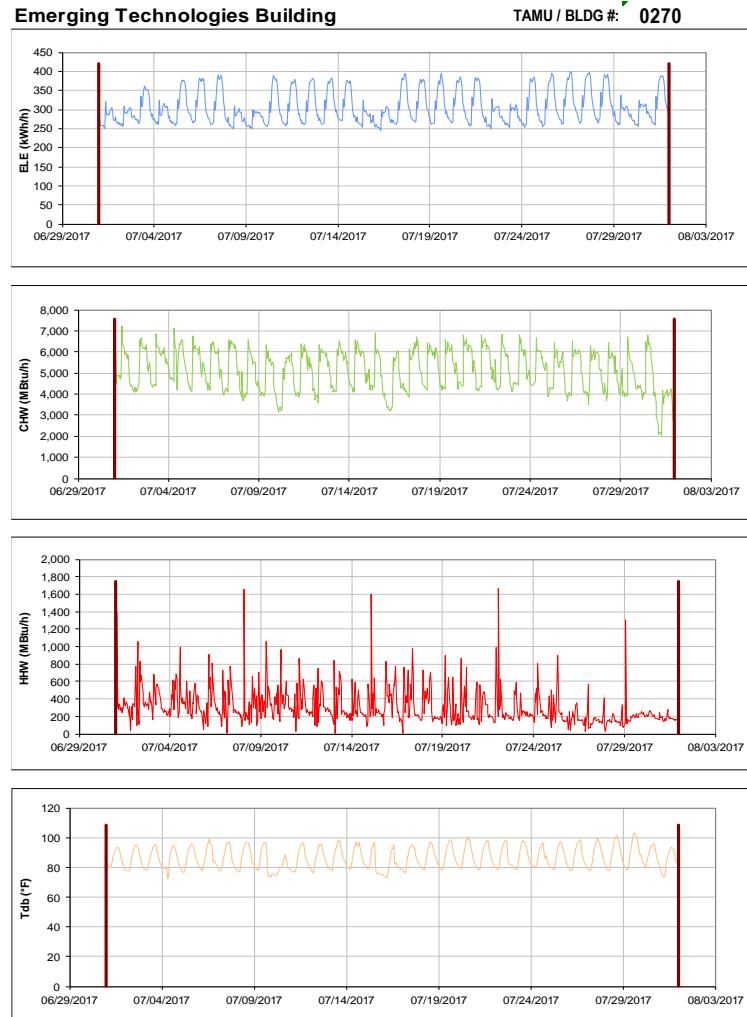

Figure III-1 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Emerging Technologies Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-2 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Liberal Arts and Arts & Humanities Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

TAMU / BLDG #: 0478

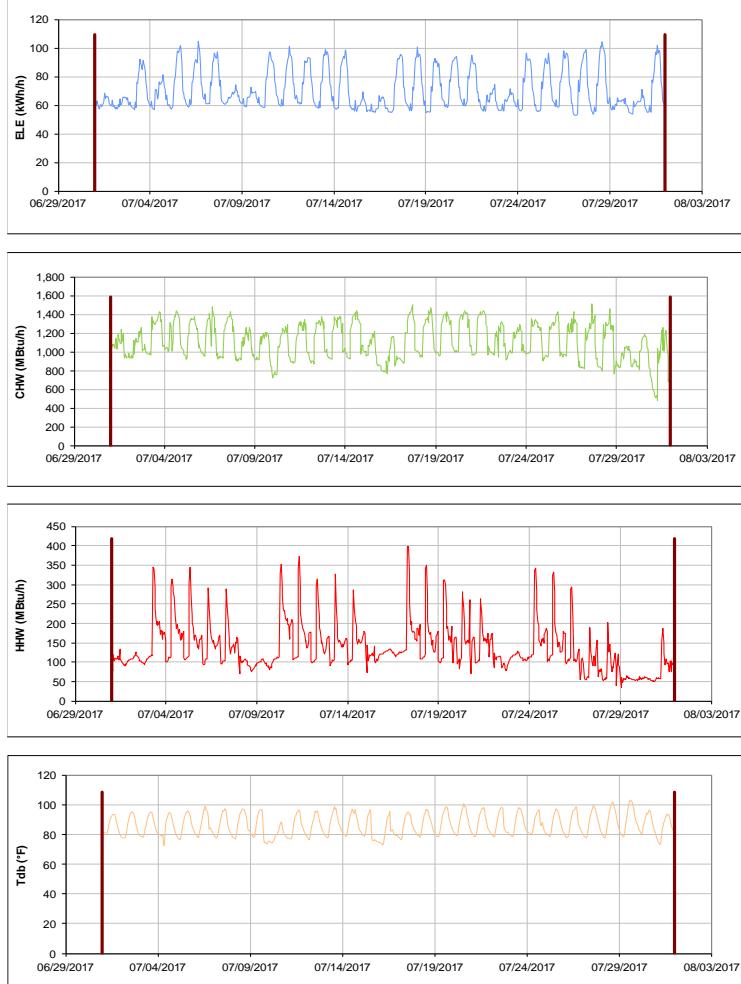

Figure III-90 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Scoates Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

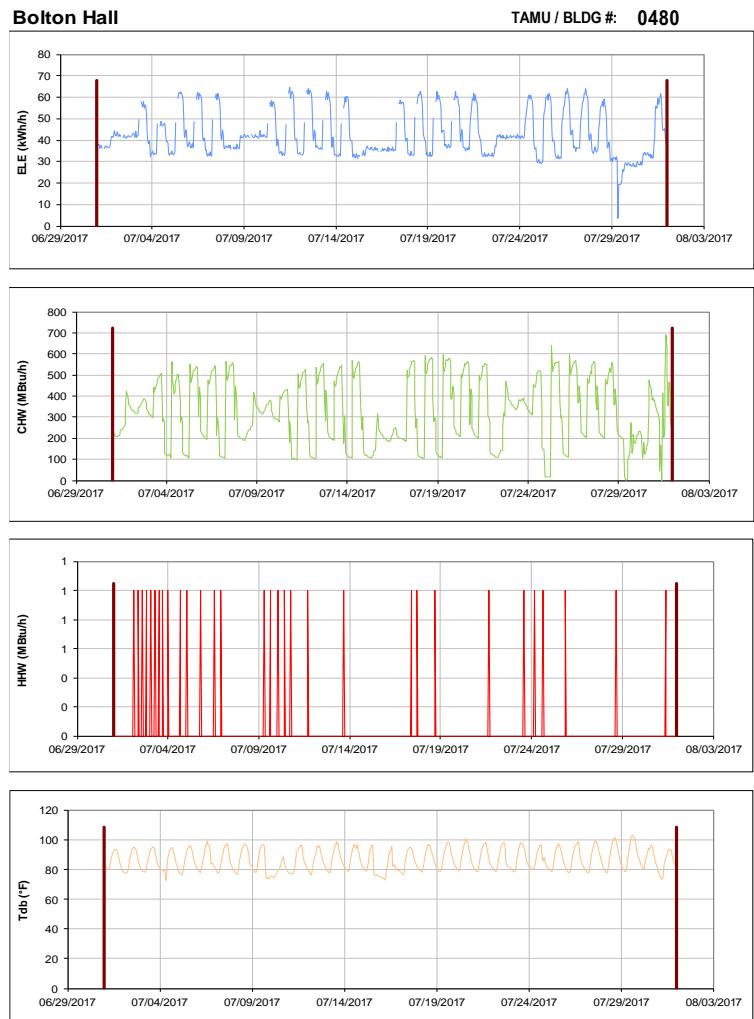

Figure III-91 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Bolton Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

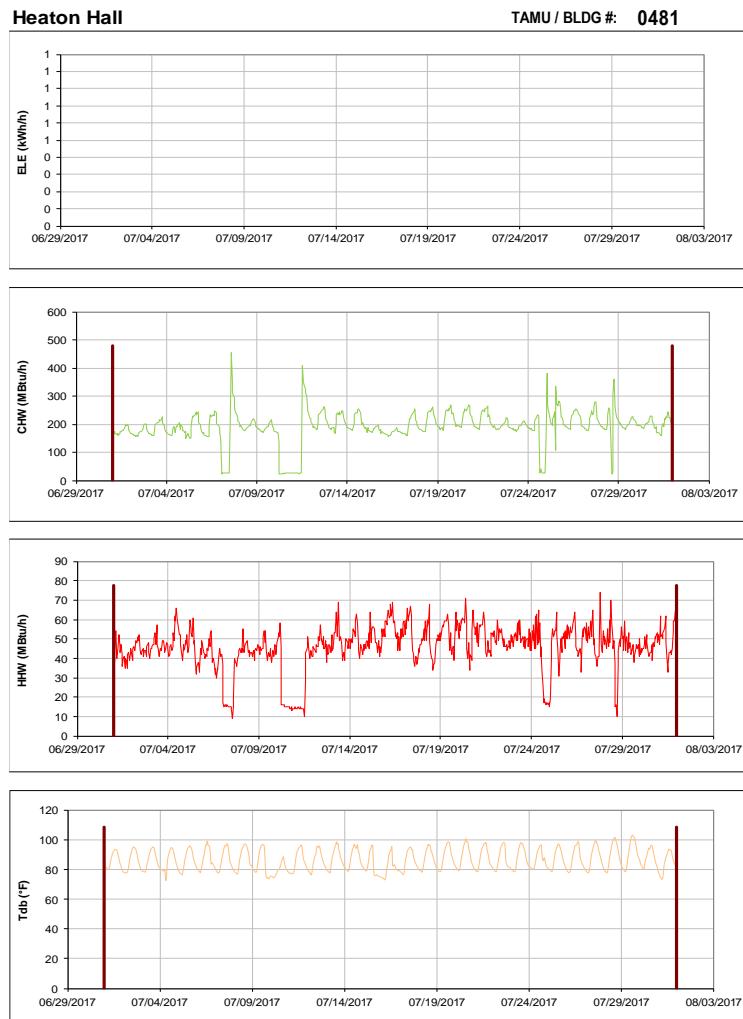

Figure III-92 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heaton Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

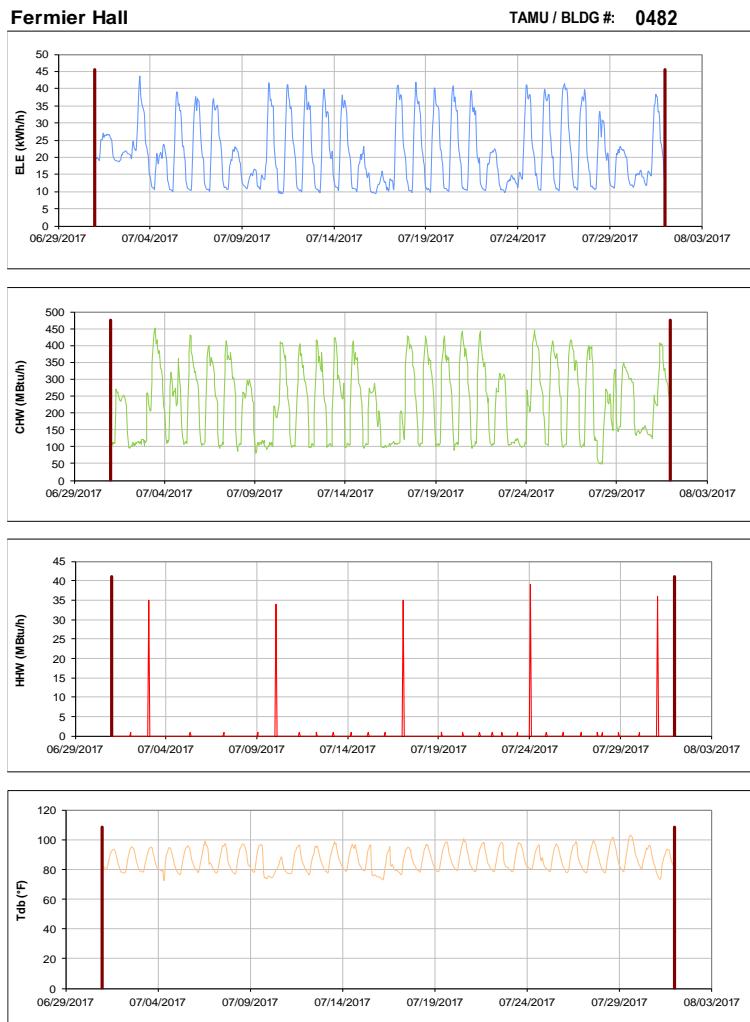

Figure III-93 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Fermier Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-94 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Thompson Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

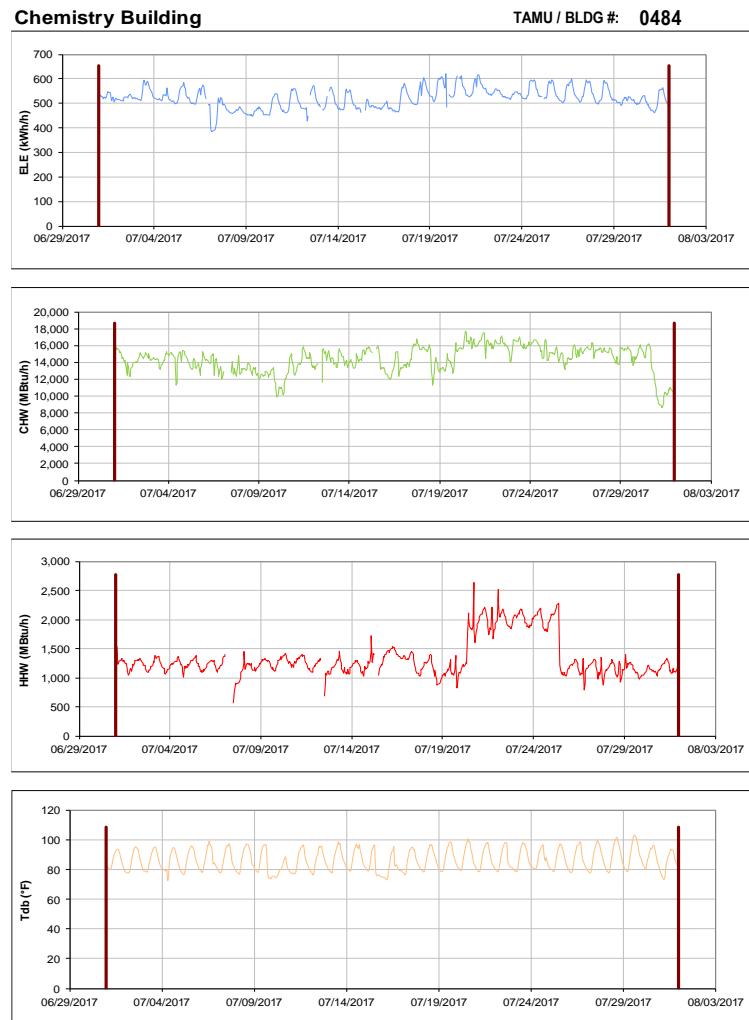

Figure III-95 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Chemistry Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

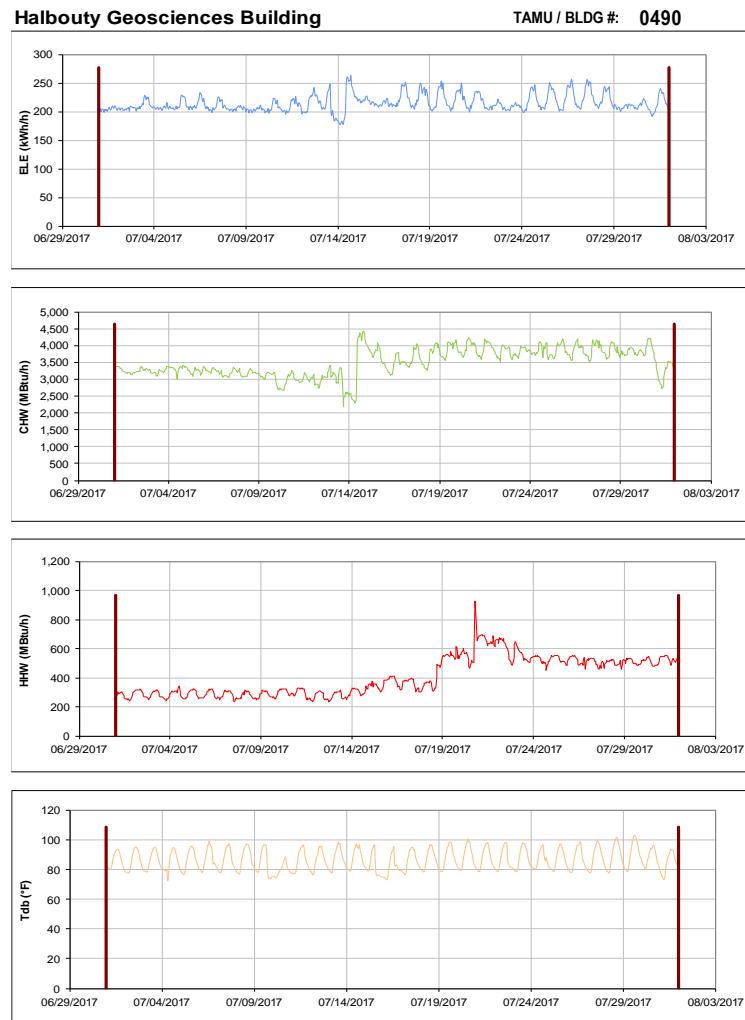

Figure III-96 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Halbouty Geosciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

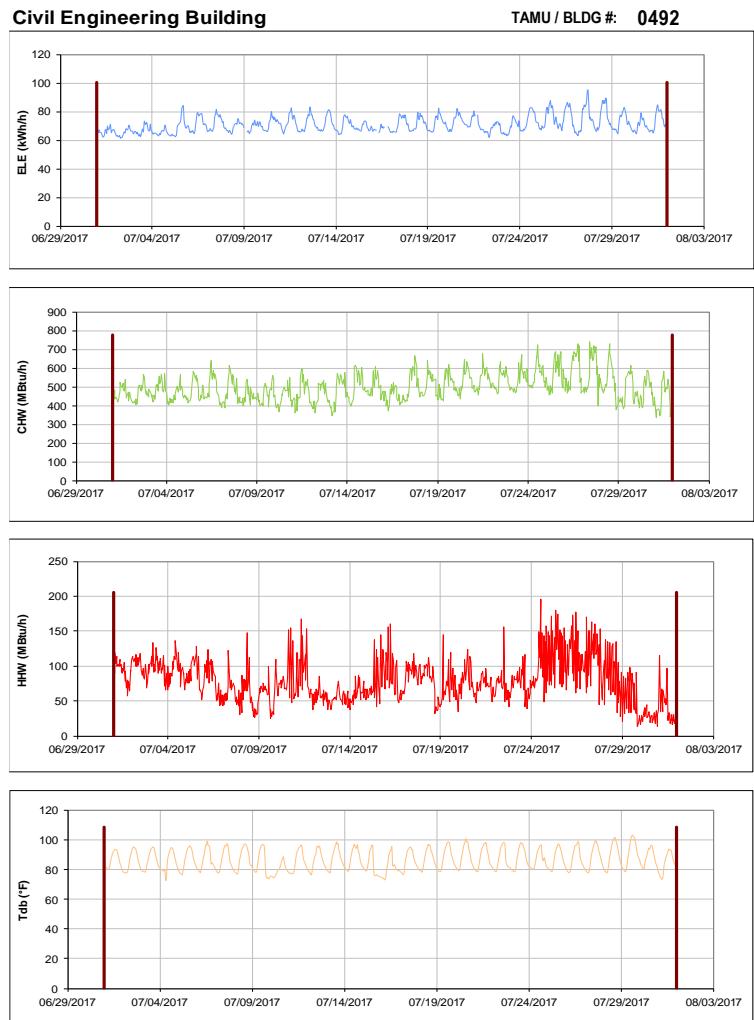

Figure III-97 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Civil Engineering Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-98 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Sbisa Dining Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

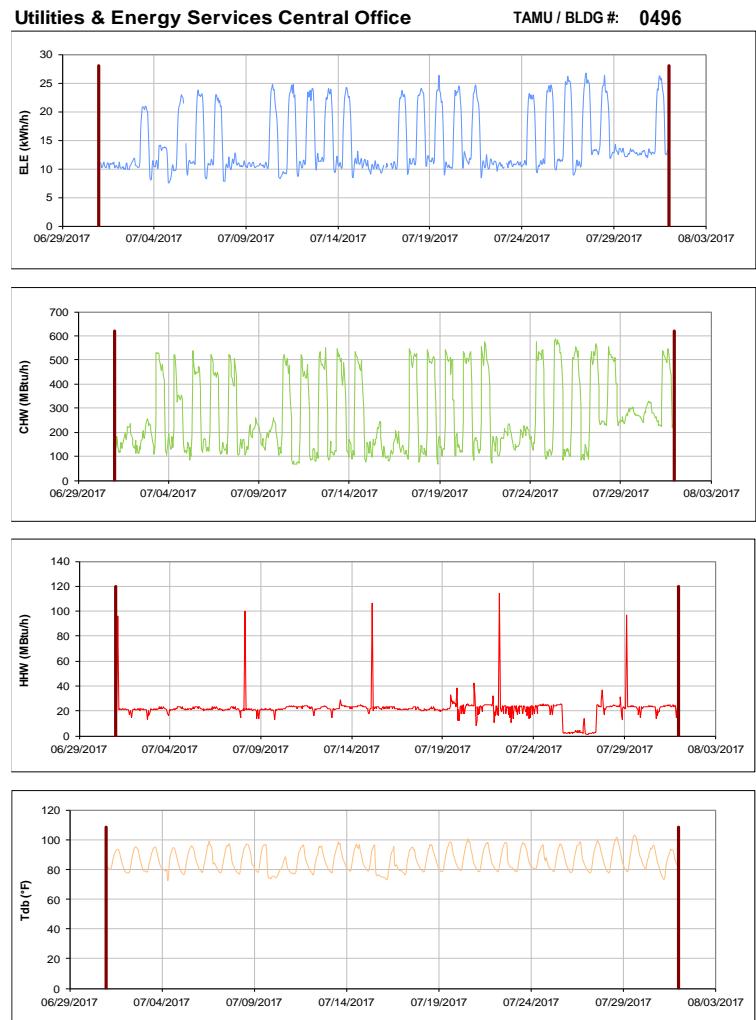

Figure III-99 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Utilities & Energy Services Central Office during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

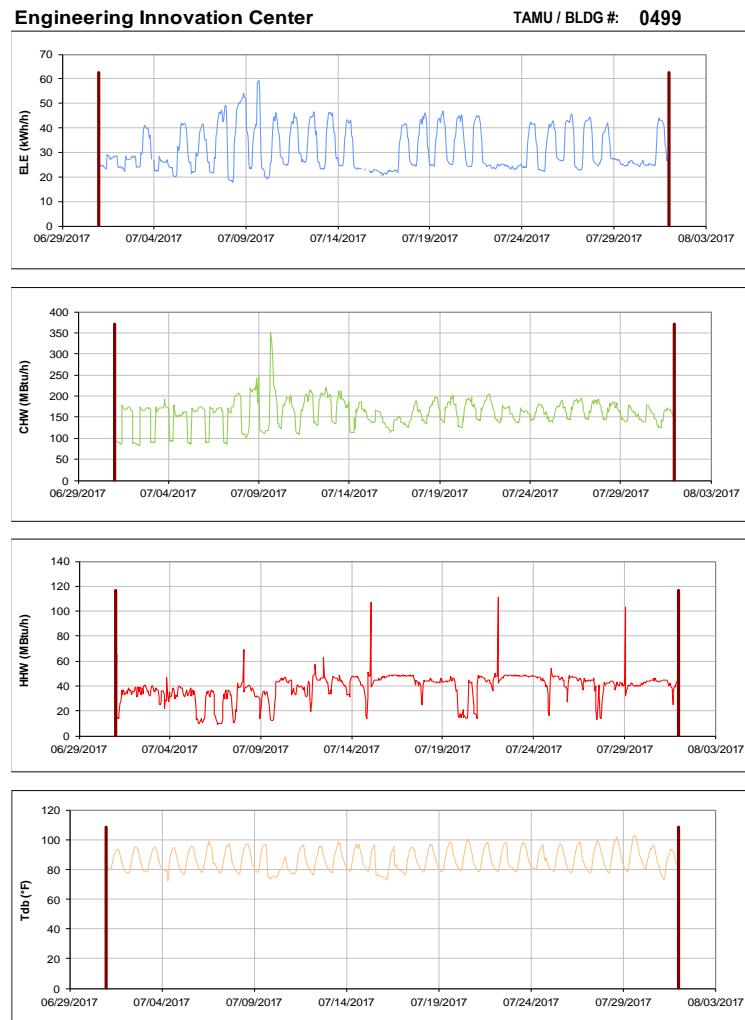

Figure III-100 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Engineering Innovation Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Concrete Materials Laboratory**

TAMU / BLDG #: 0501

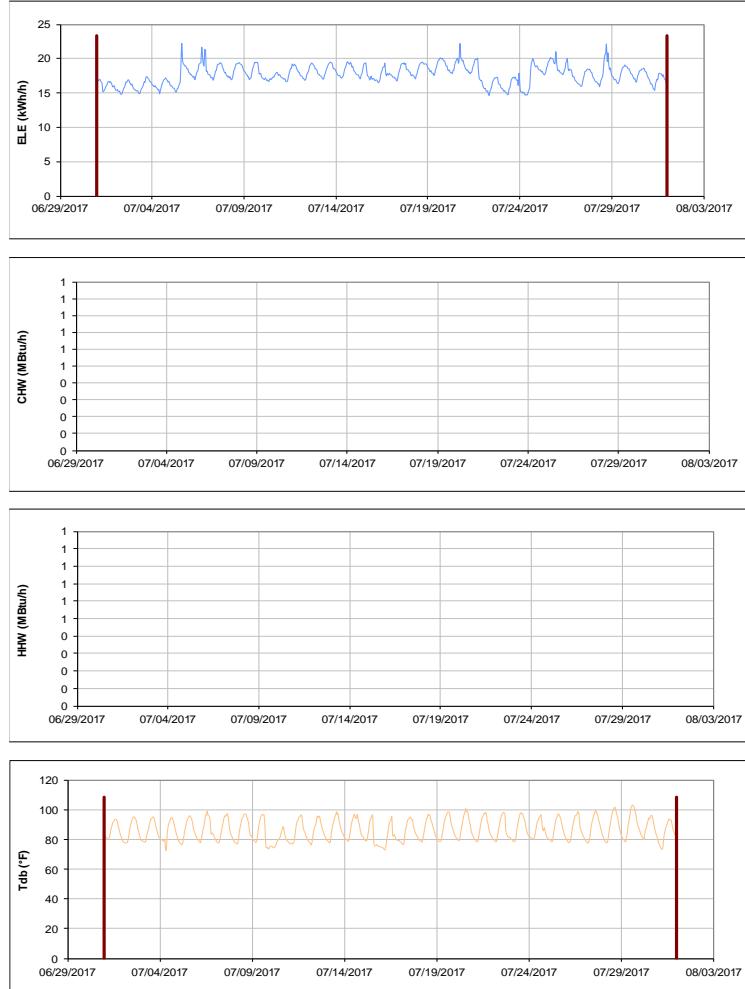

Figure III-101 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Concrete Materials Laboratory during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Nagle Hall**

TAMU / BLDG #: 0506

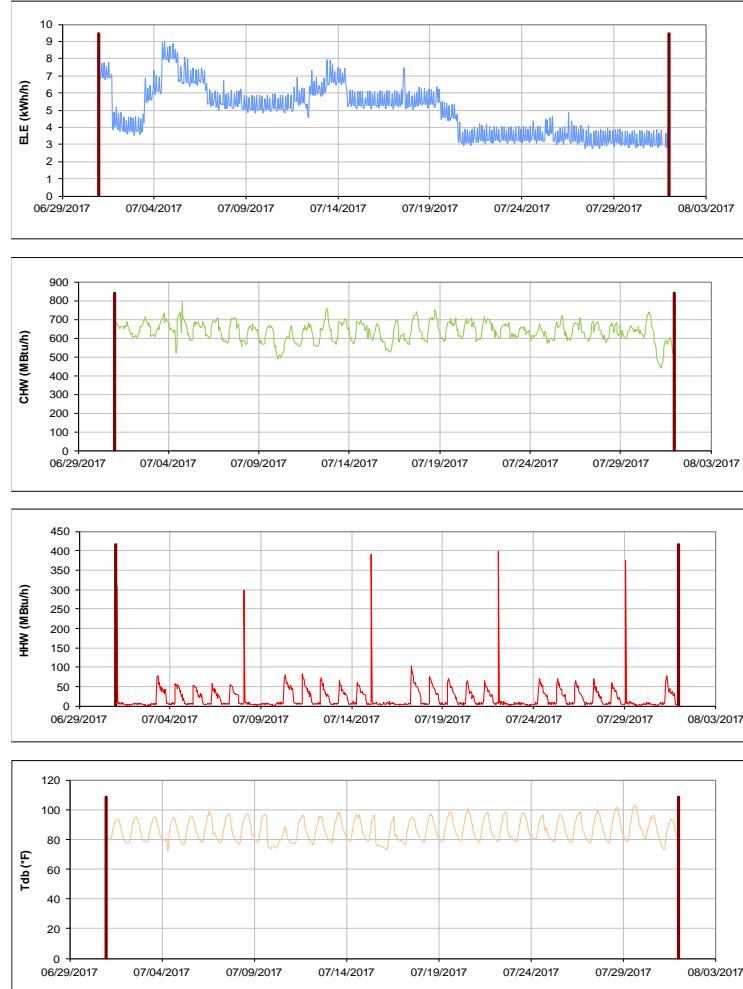

Figure III-102 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Nagle Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

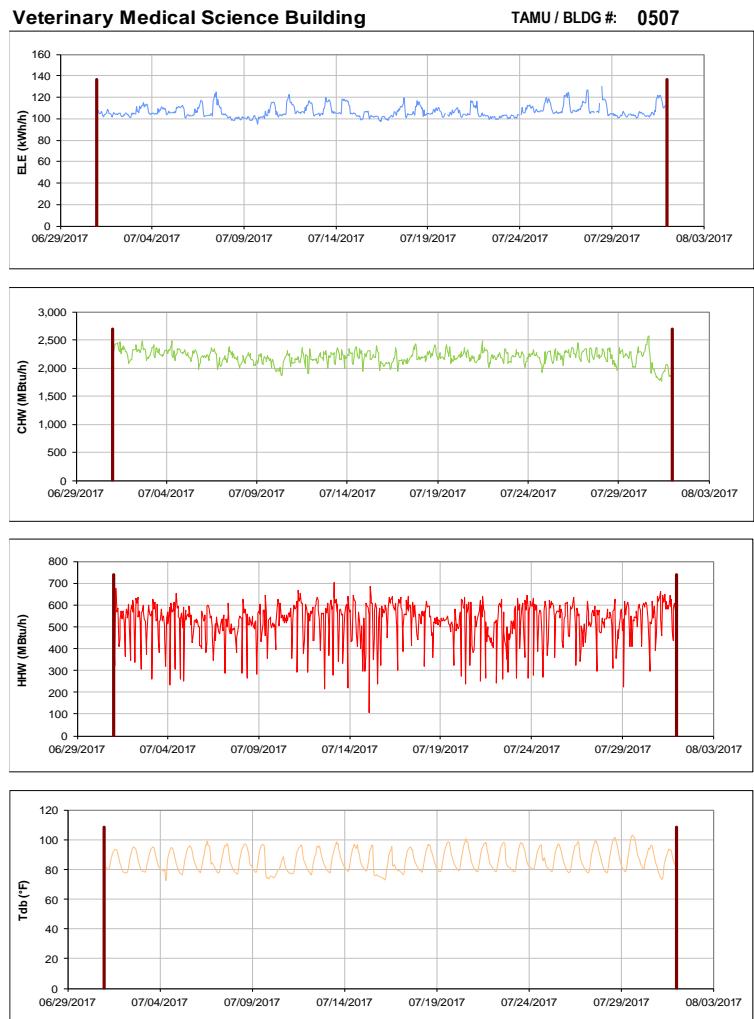

Figure III-103 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Medical Science Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

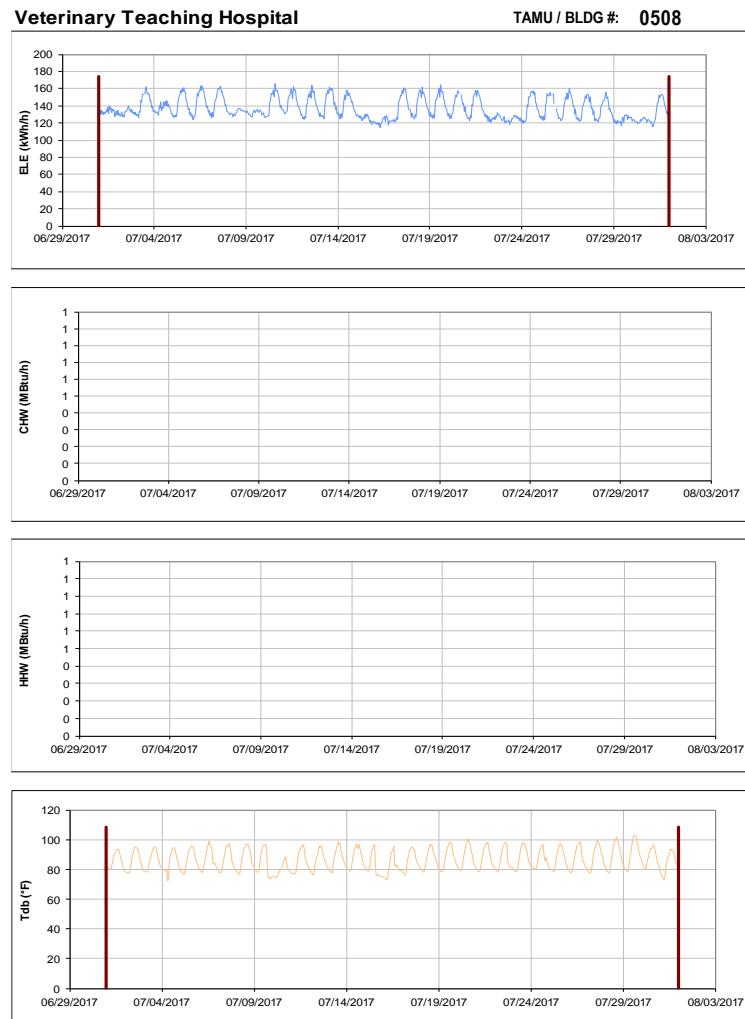

Figure III-104 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Teaching Hospital during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

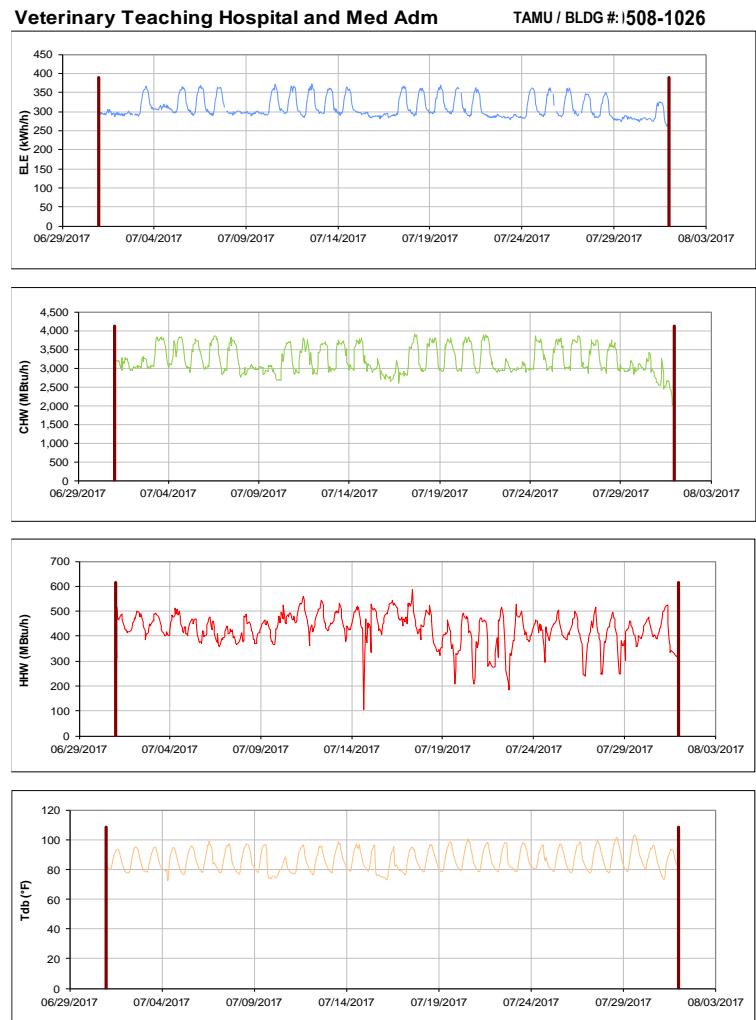

Figure III-105 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Teaching Hospital and Med Adm during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

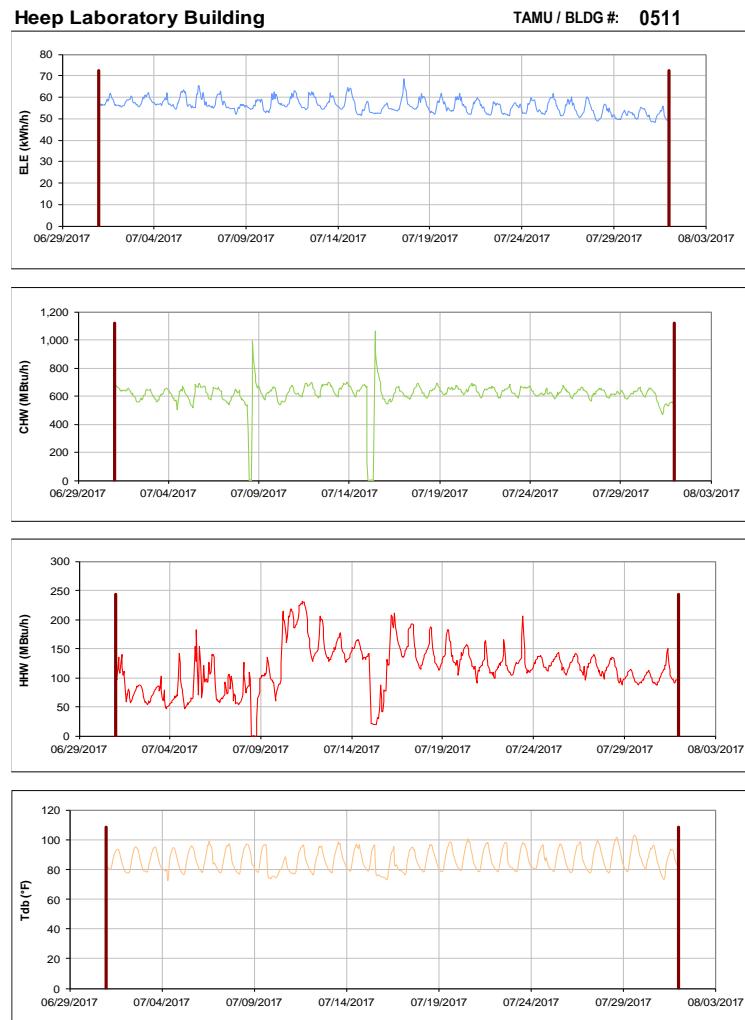

Figure III-106 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heep Laboratory Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

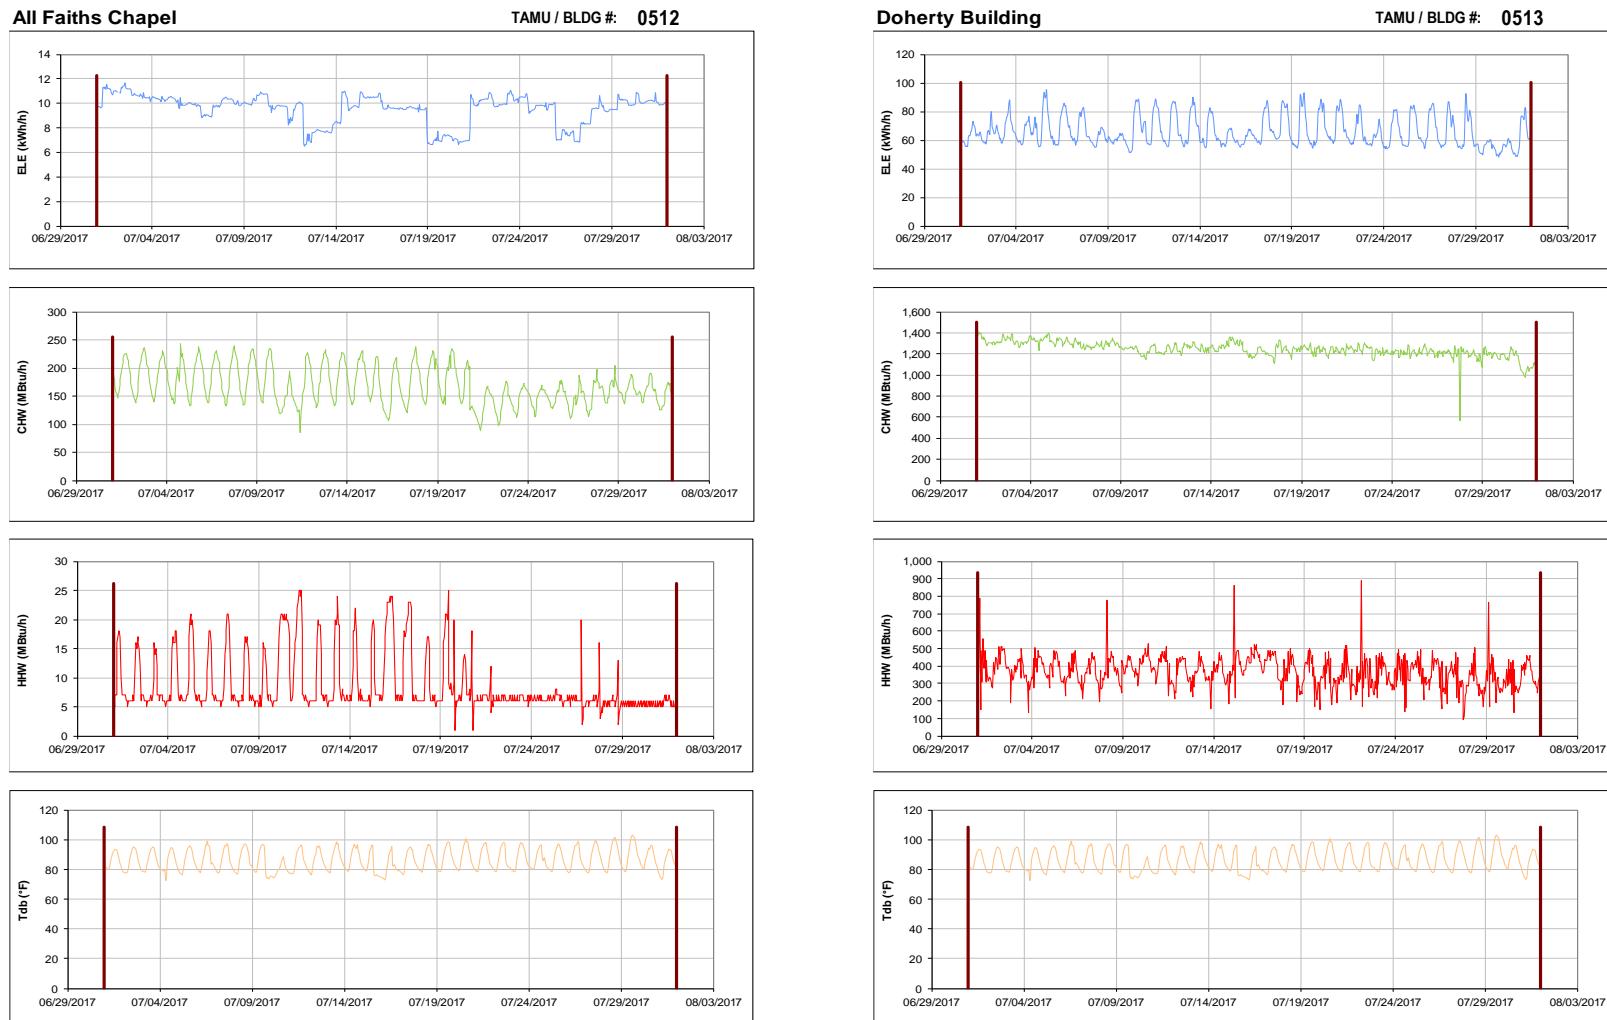

Figure III-107 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for All Faiths Chapel during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-108 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Doherty Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Munnerlyn Astronomy & Space Sciences Engineering** TAMU / BLDG #: 0514

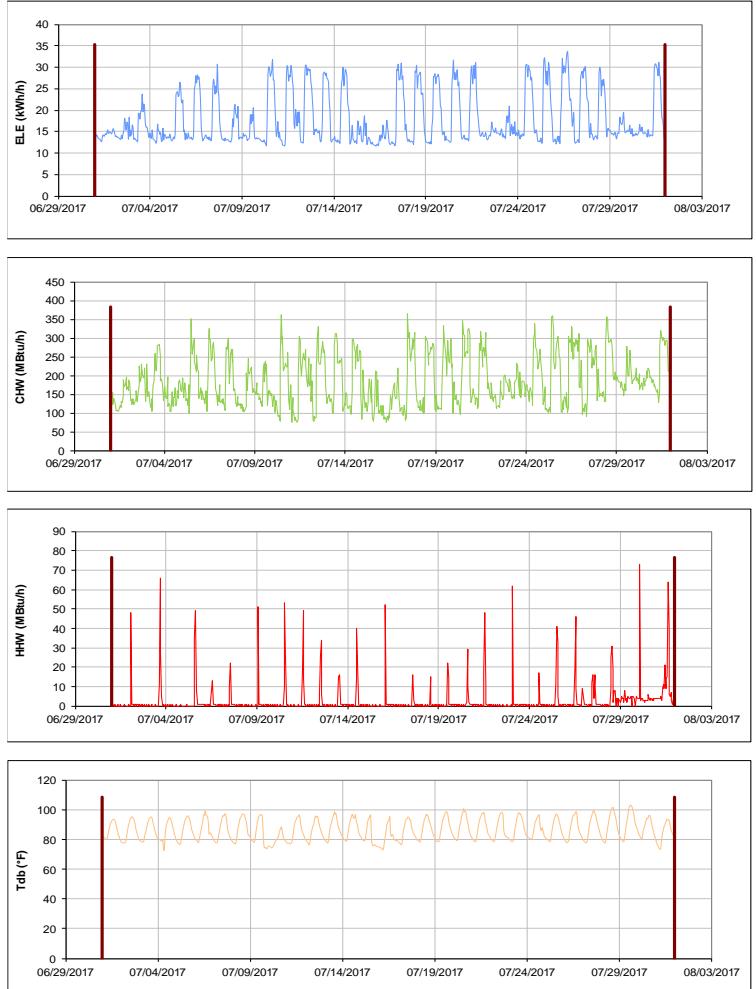

Figure III-109 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Munnerlyn Astronomy & Space Sciences Engineering during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Computing Services Center**

TAMU / BLDG #: 0516

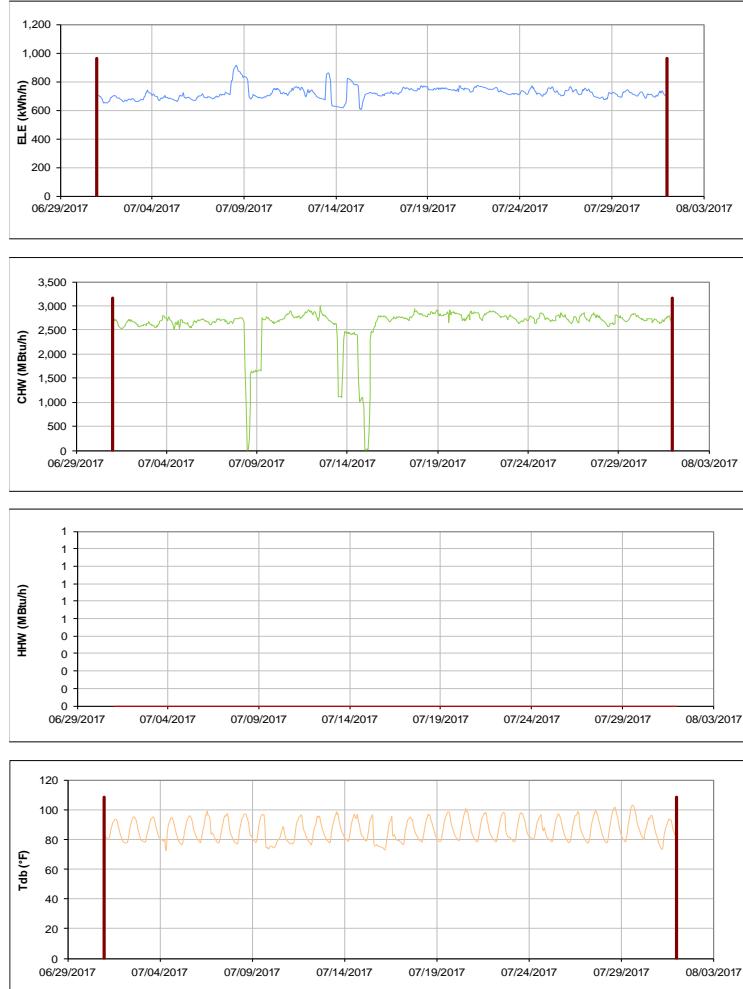

Figure III-110 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Computing Services Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**DPC Annex**

TAMU / BLDG #: 0517

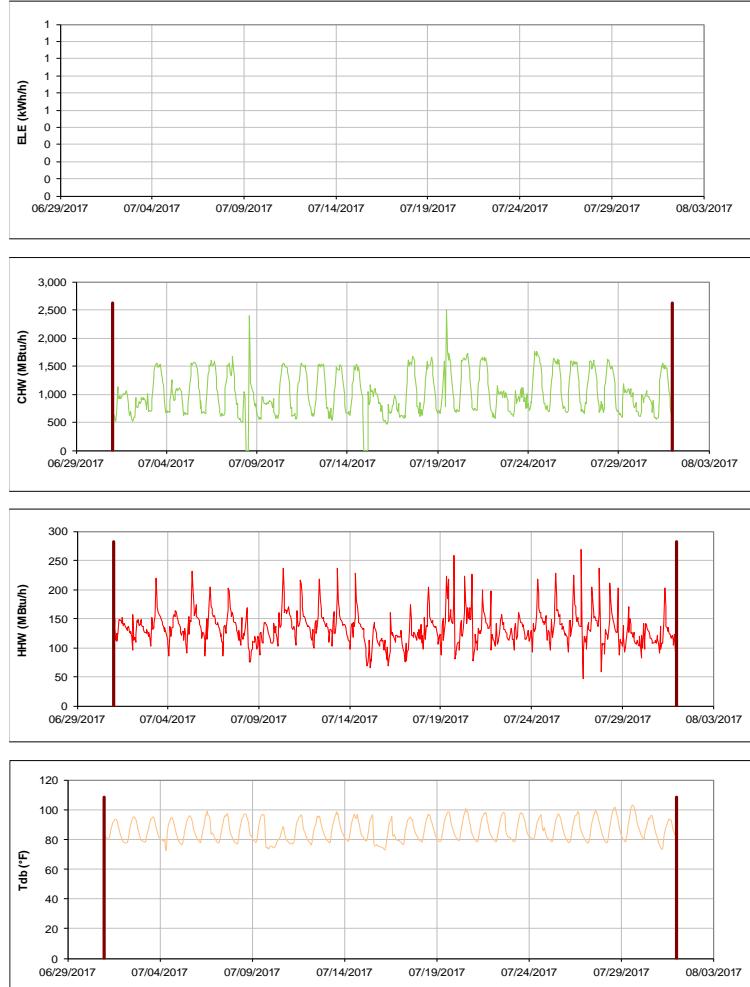

Figure III-111 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for DPC Annex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Beutel Health Center**

TAMU / BLDG #: 0520

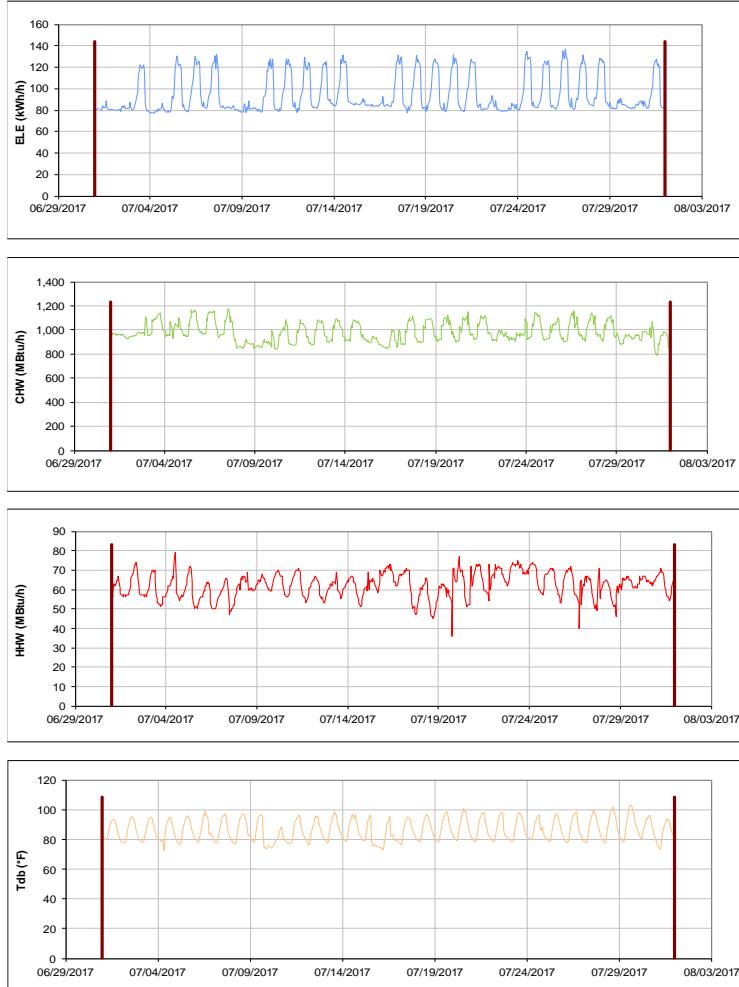

Figure III-112 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Beutel Health Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

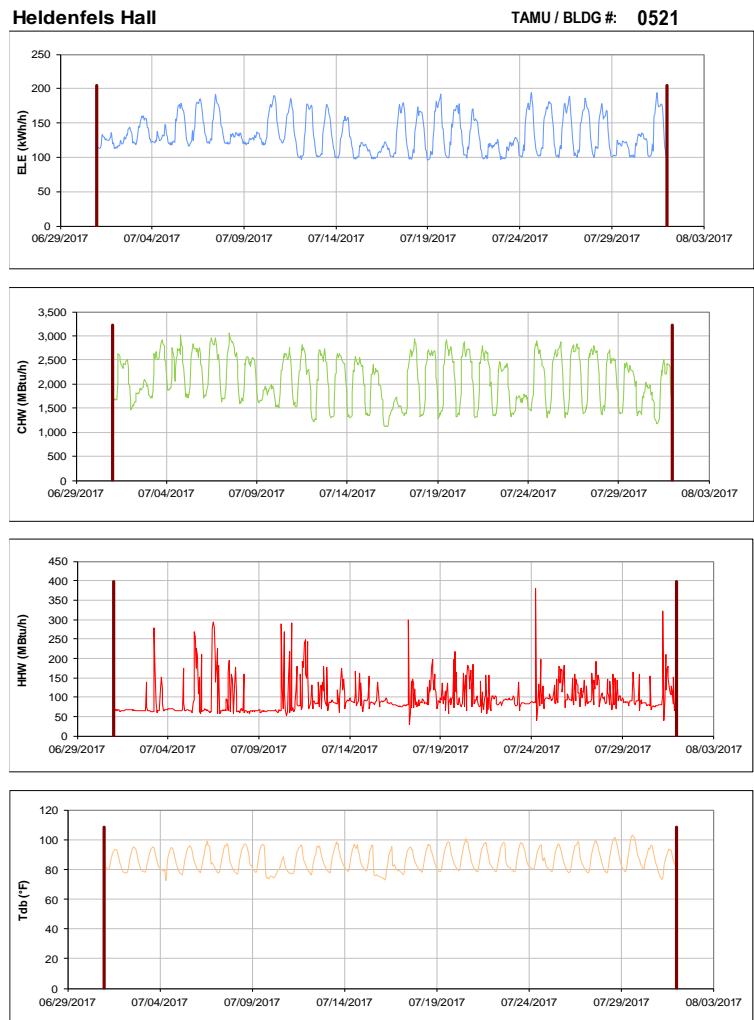

Figure III-113 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heldenfels Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

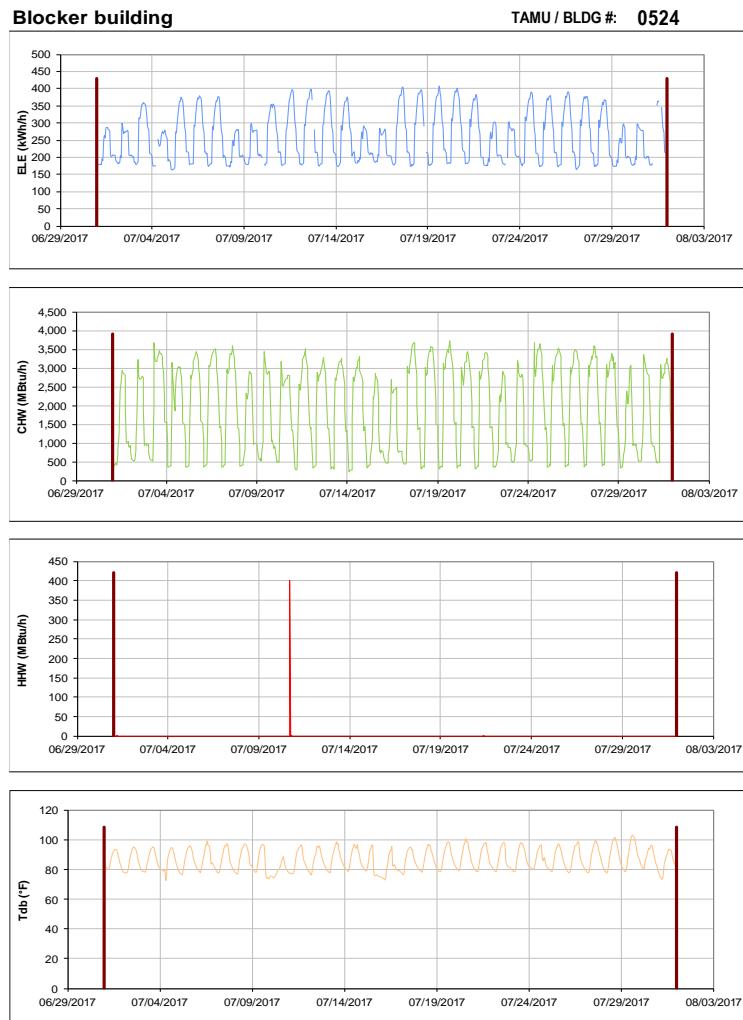

Figure III-114 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Blocker building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

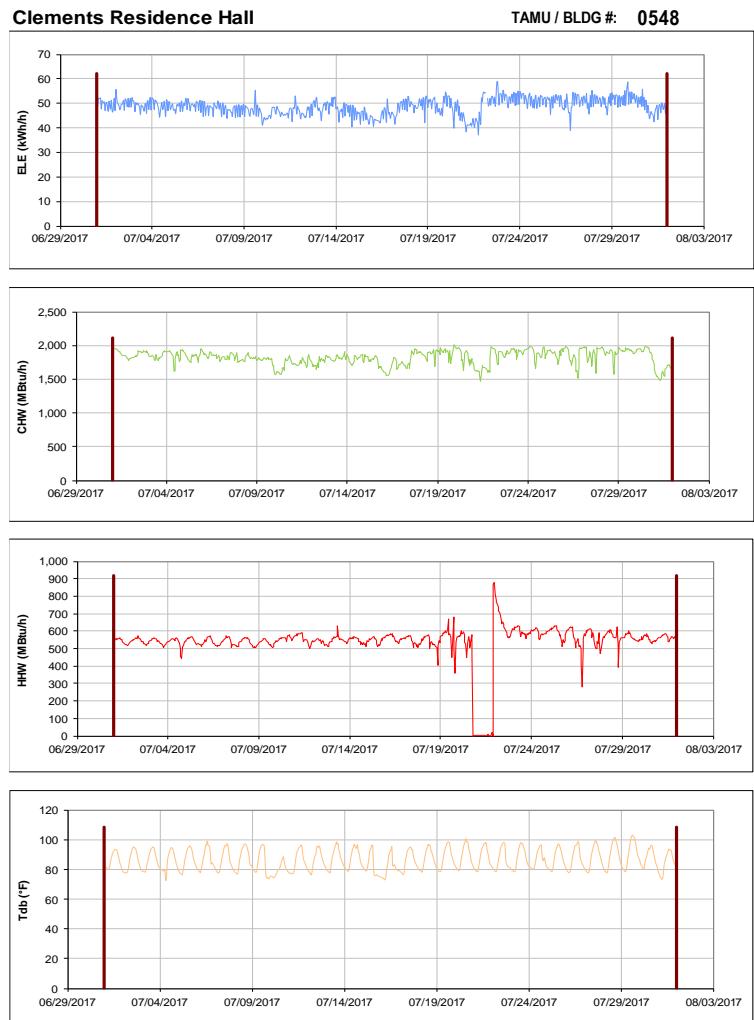

Figure III-115 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Clements Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

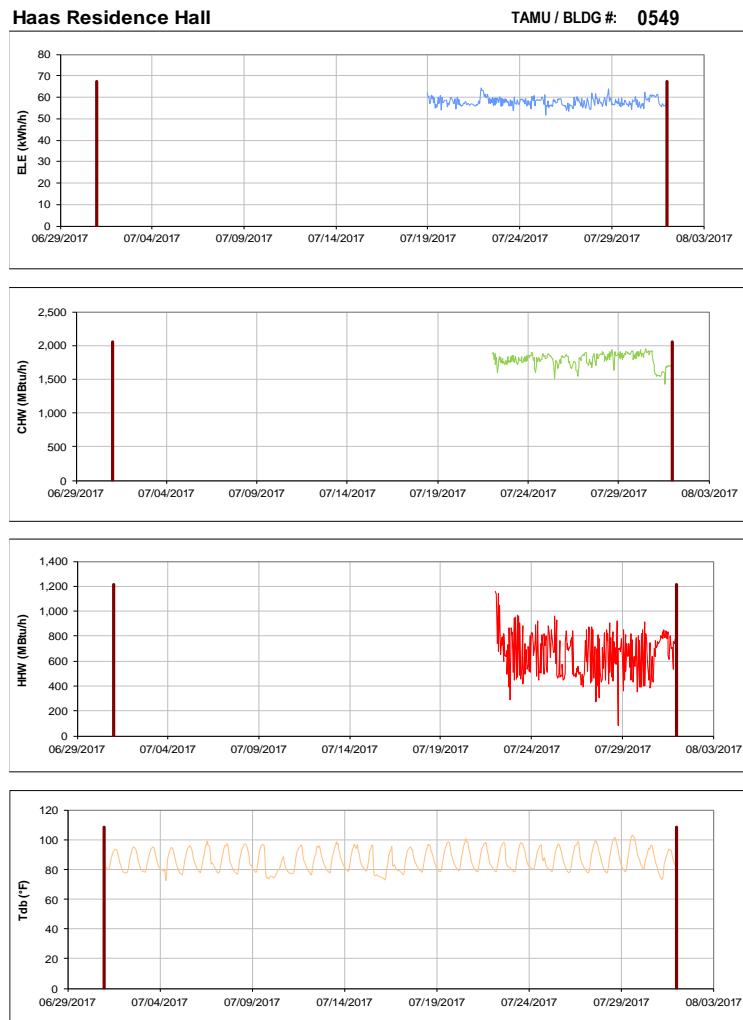

Figure III-116 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Haas Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

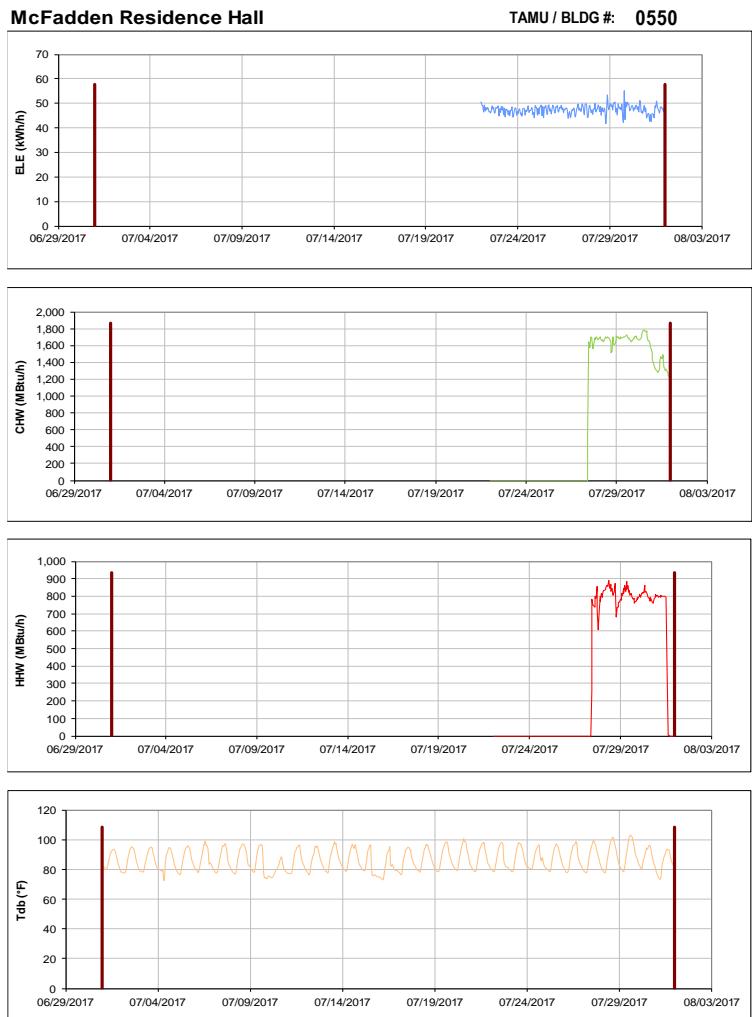

Figure III-117 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for McFadden Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-118 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Feeley Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

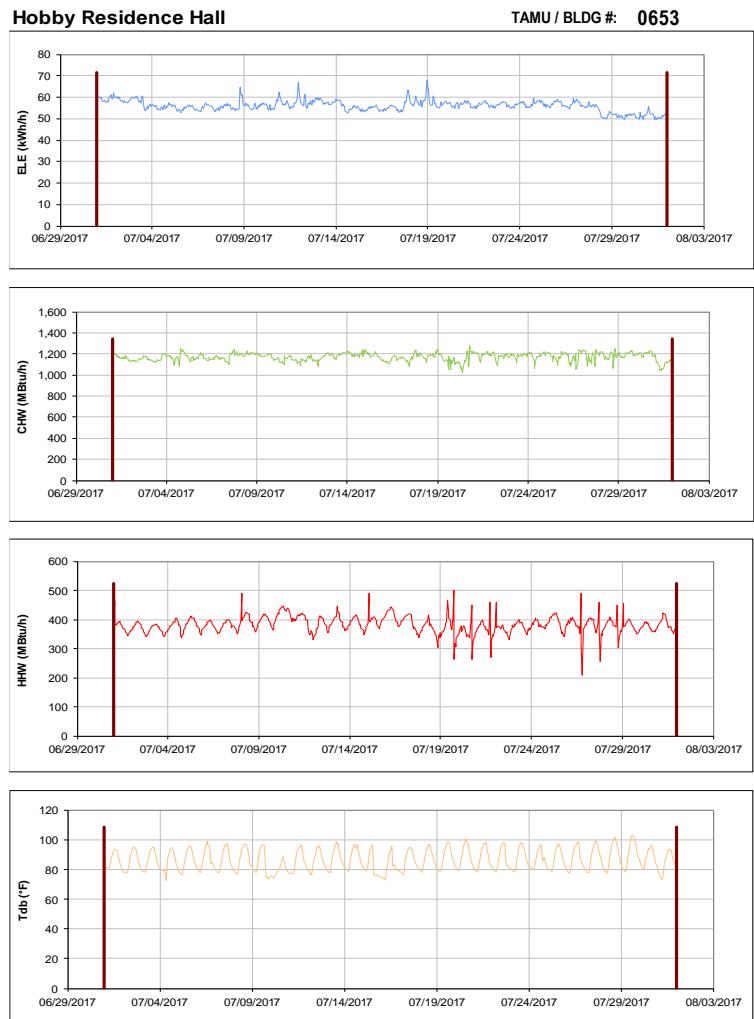

Figure III-119 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Hobby Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

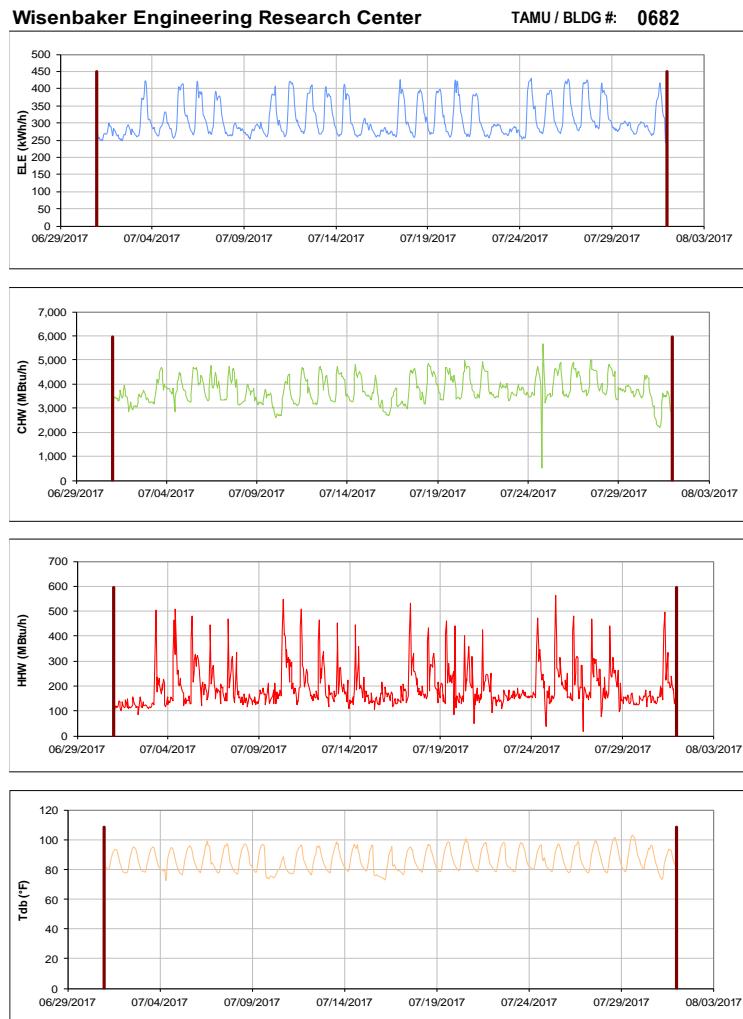

Figure III-120 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Wisenbaker Engineering Research Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

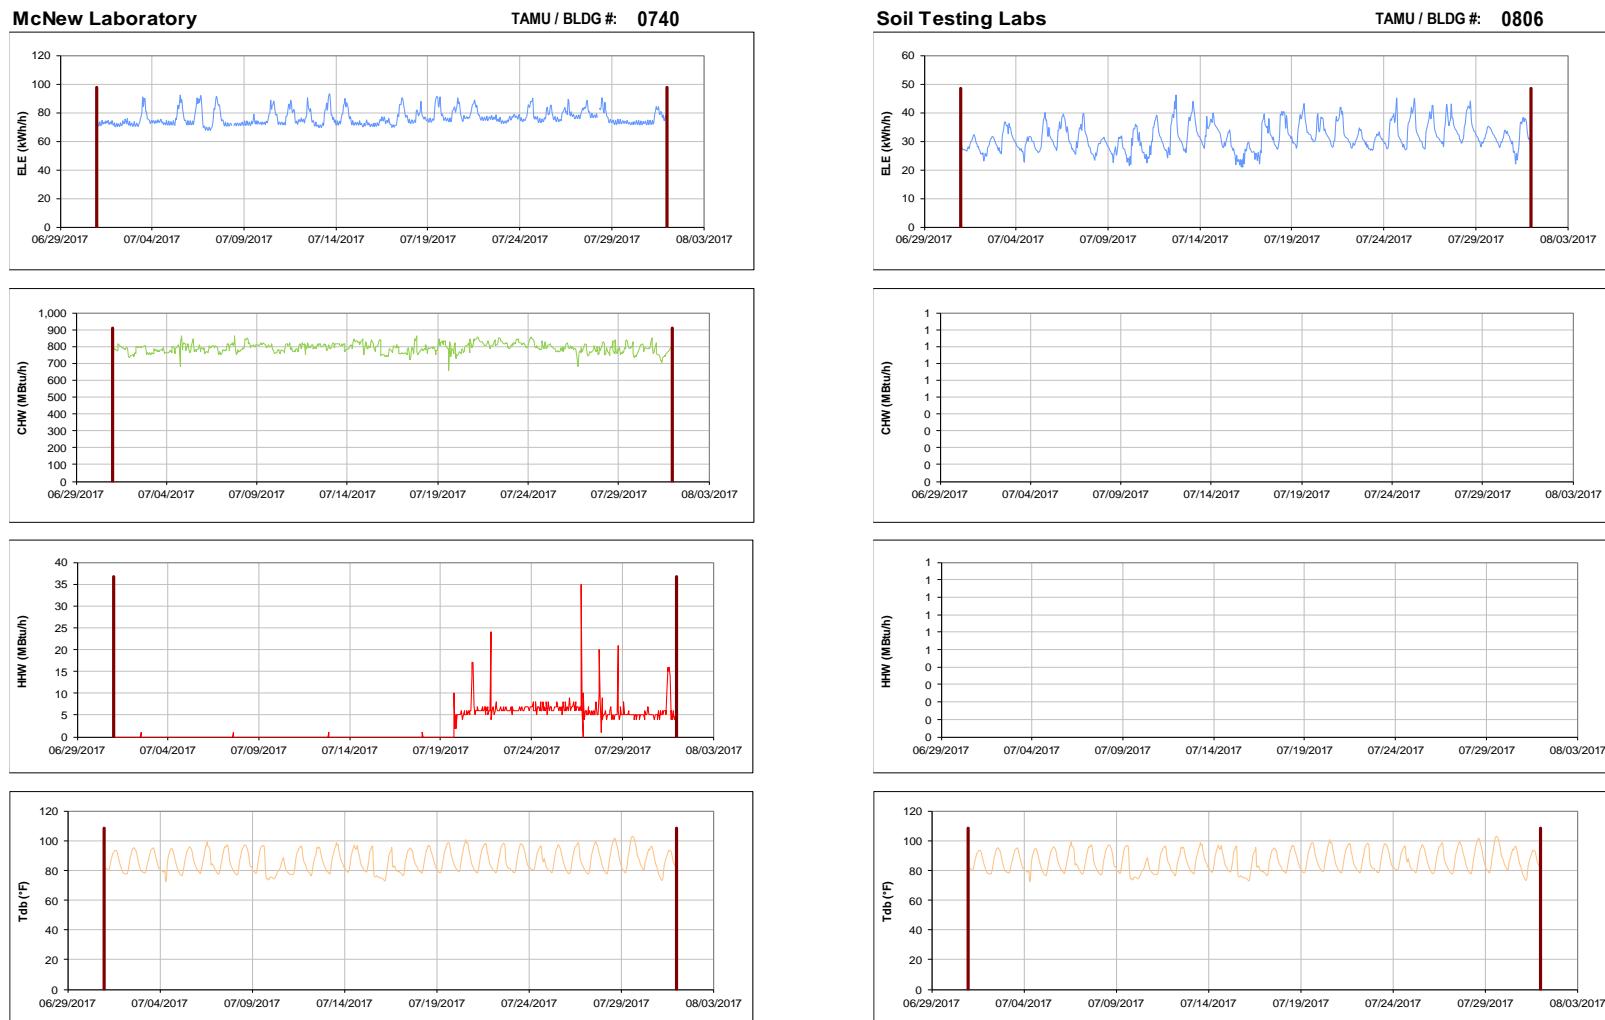

Figure III-121 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for McNew Laboratory during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-122 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Soil Testing Labs during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Entomology Research Lab**

TAMU / BLDG #: 0815

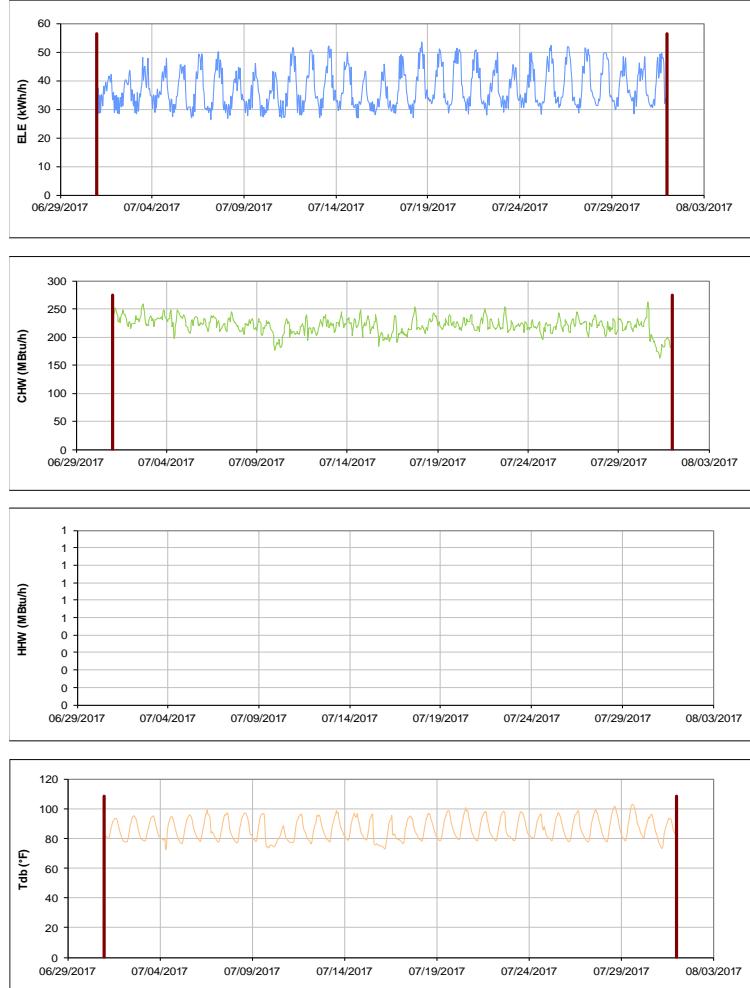

Figure III-123 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Entomology Research Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**TVMC-Small Animal Building**

TAMU / BLDG #: 0880

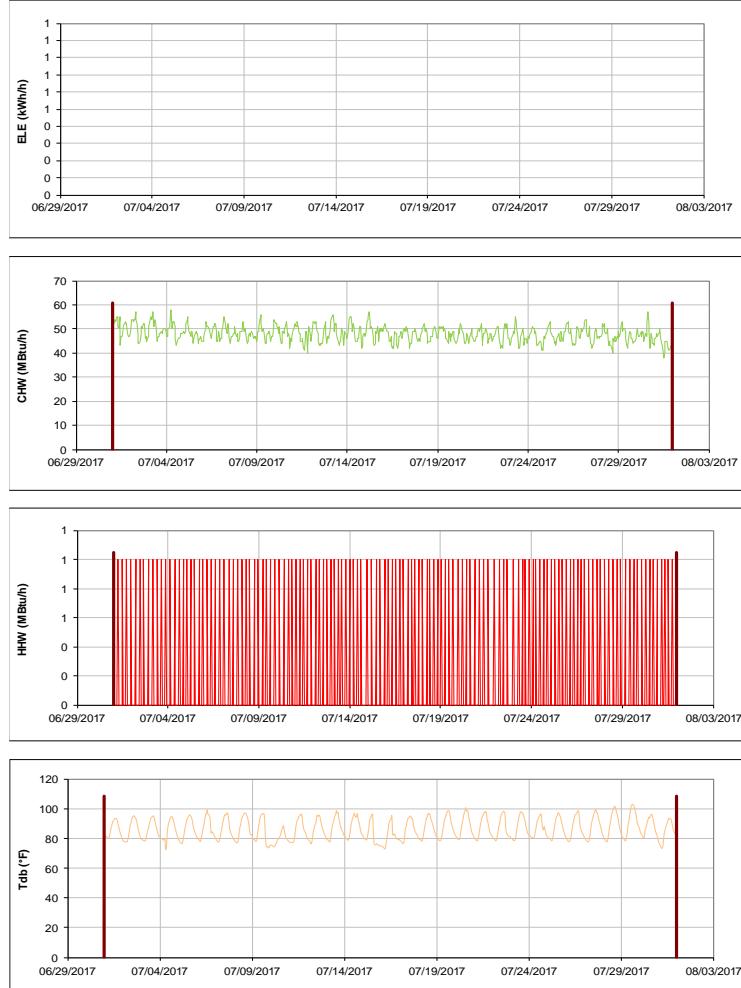

Figure III-124 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TVMC-Small Animal Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Laboratory Animal Care Building**

TAMU / BLDG #: 0972

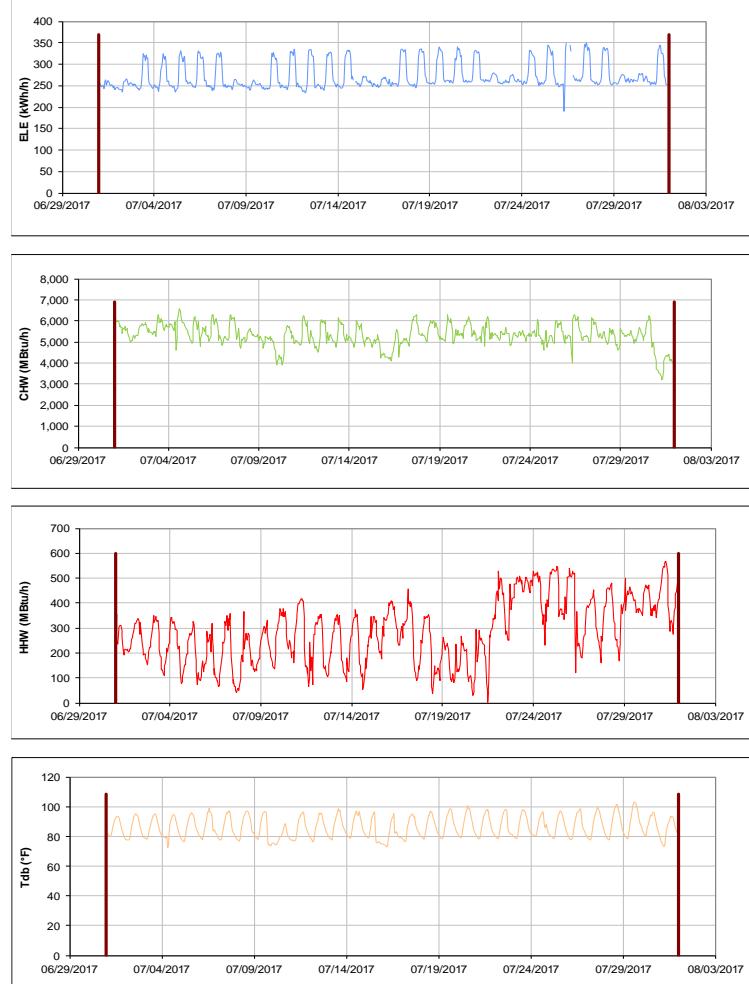

Figure III-125 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Laboratory Animal Care Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Vivarium III**

TAMU / BLDG #: 1020

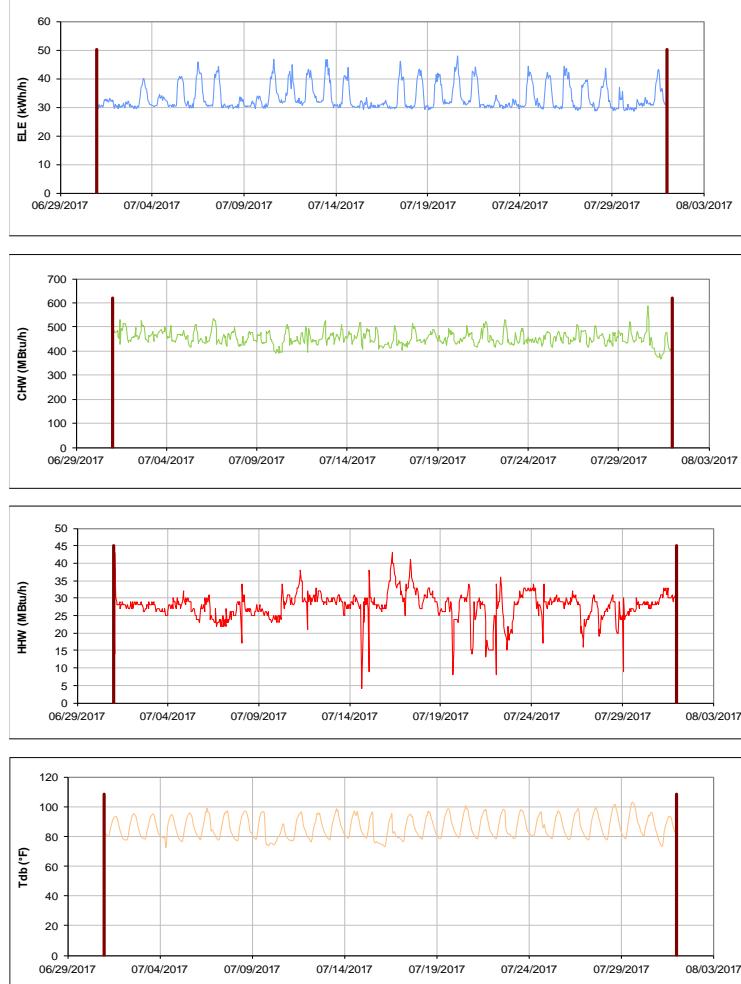

Figure III-126 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Vivarium III during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Veterinary Medicine Administration**

TAMU / BLDG #: 1026

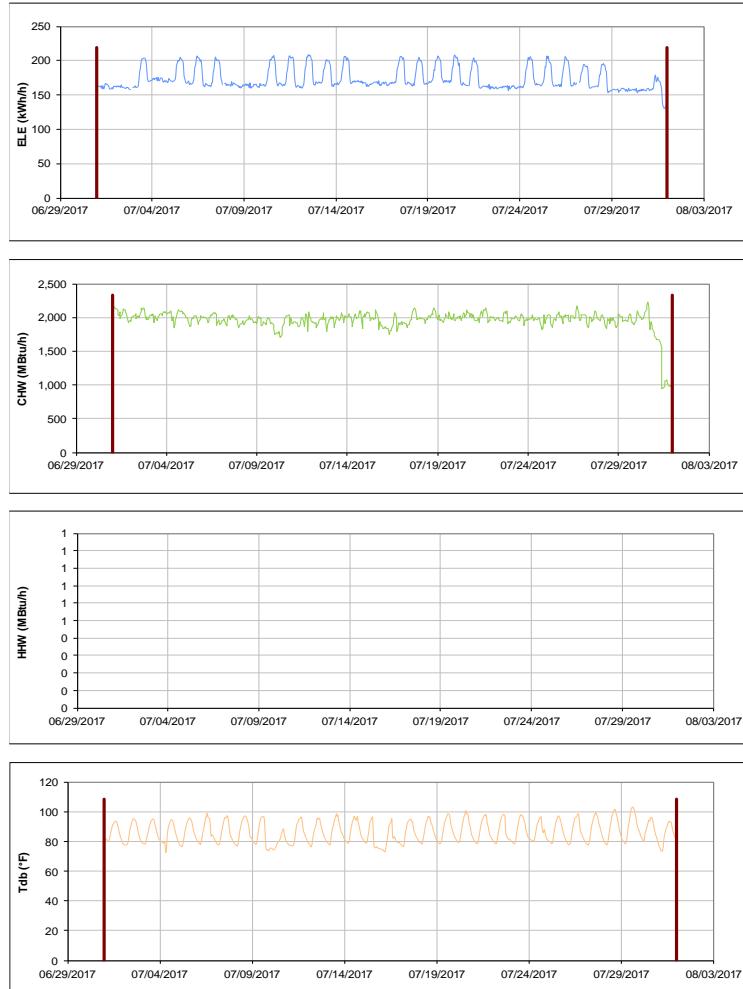

Figure III-127 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Medicine Administration during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Texas Vet Med Diagnostic Lab**

TAMU / BLDG #: 1041

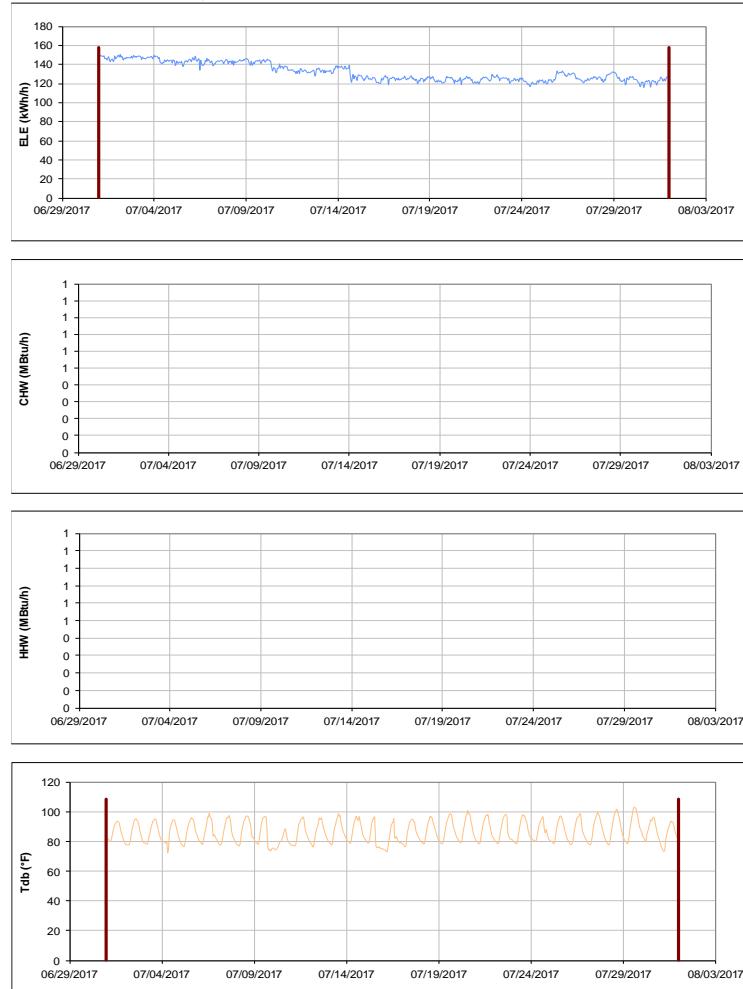

Figure III-128 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas Vet Med Diagnostic Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

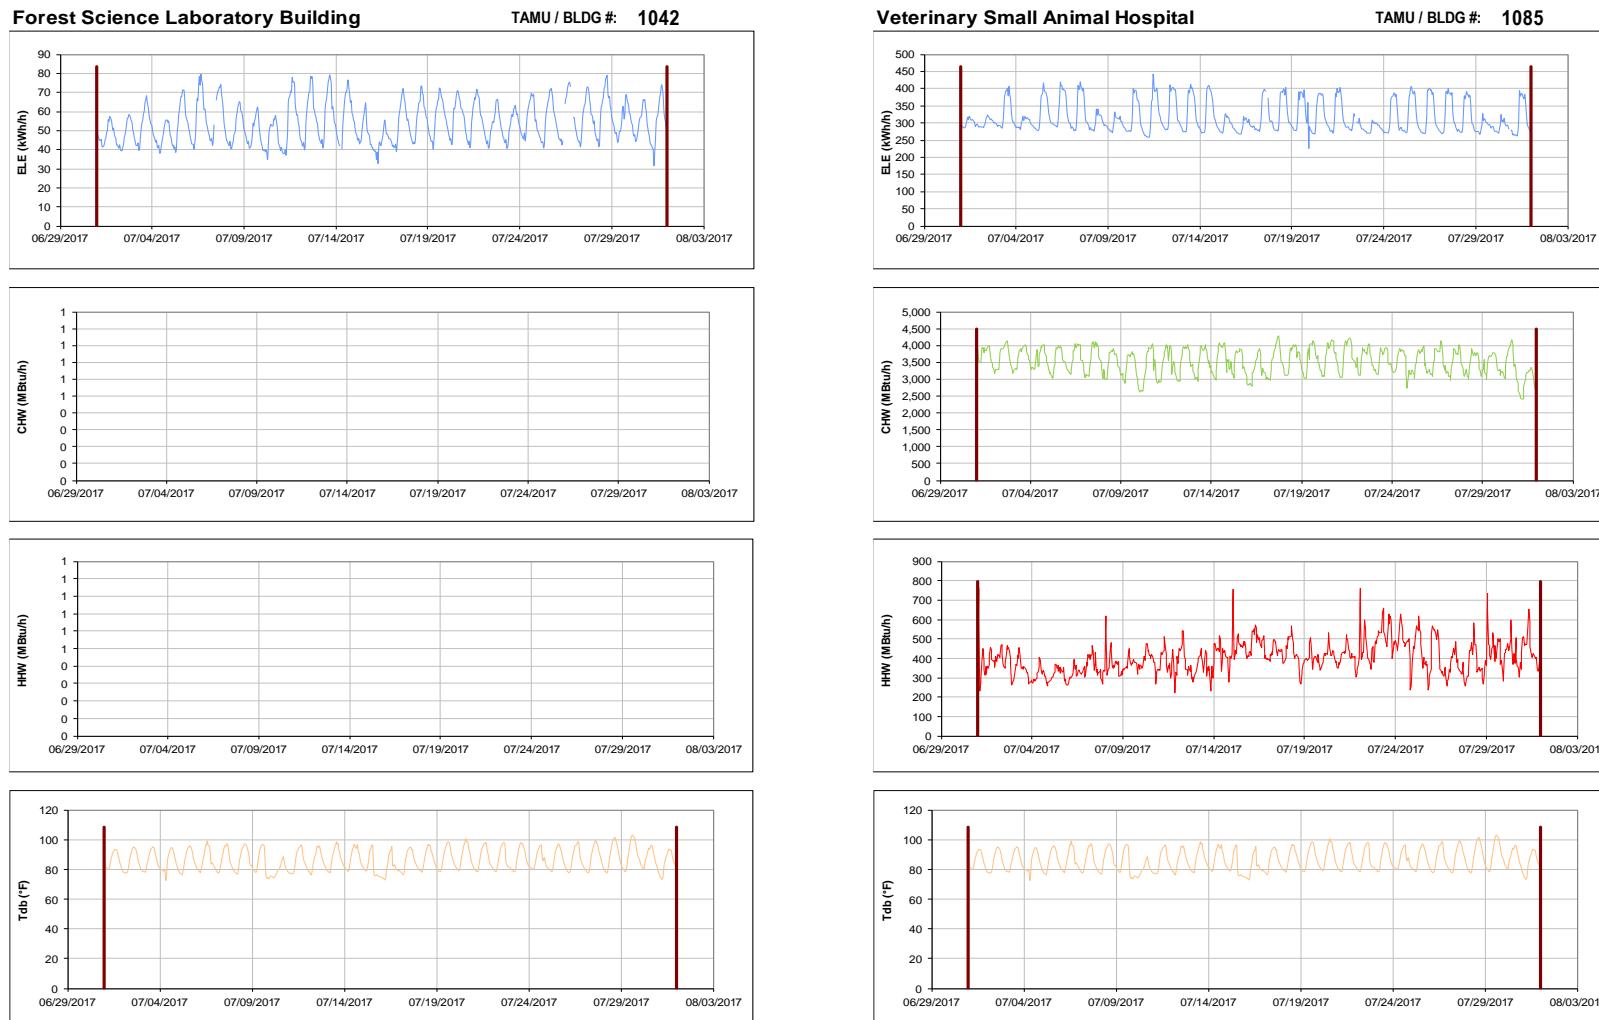

Figure III-129 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Forest Science Laboratory Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-130 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Small Animal Hospital during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Utilities Energy Office Annex**

TAMU / BLDG #: 1089

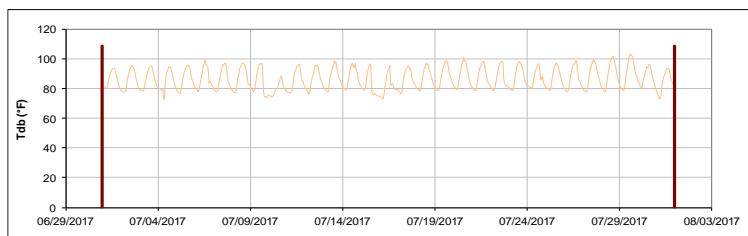

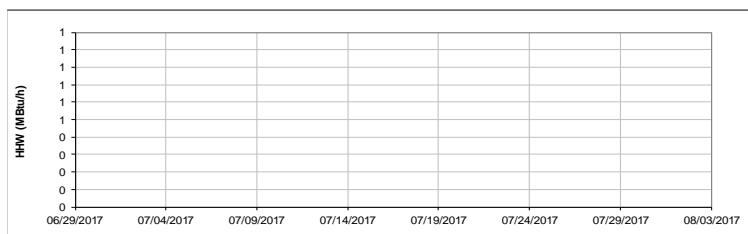

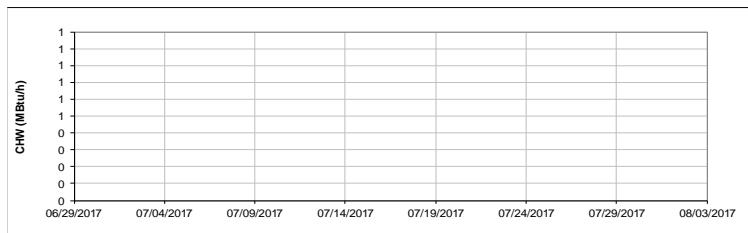

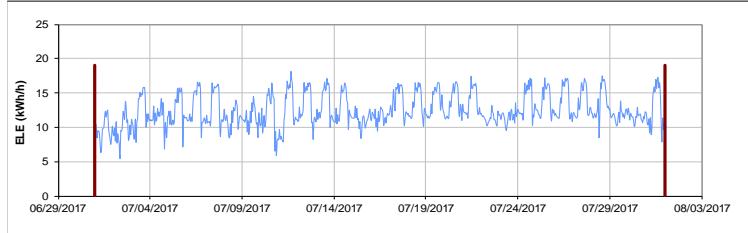

Figure III-131 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Utilities Energy Office Annex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Biological Control Facility**

TAMU / BLDG #: 1146

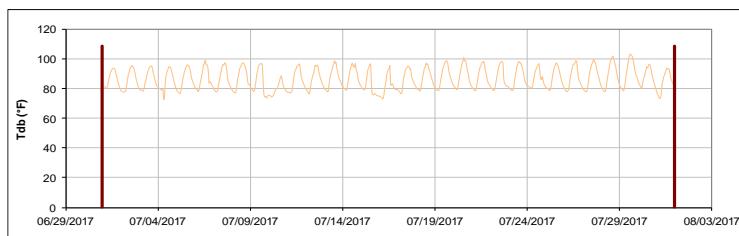

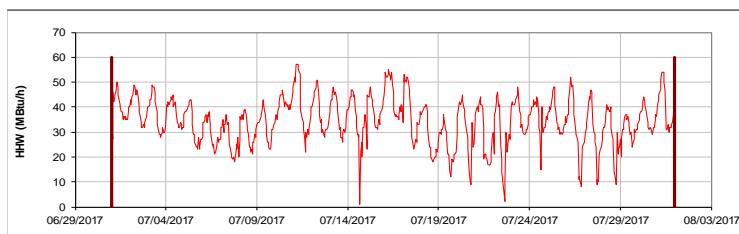

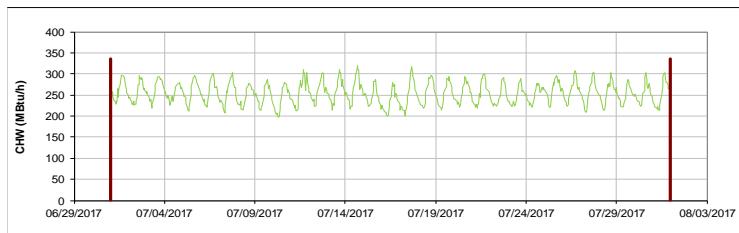

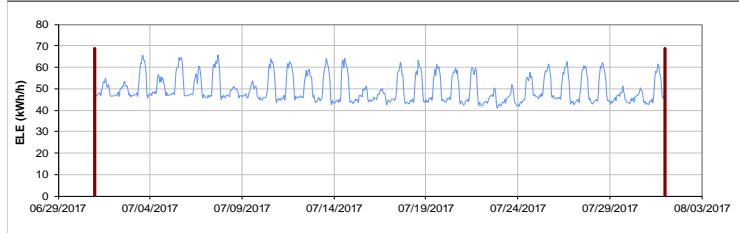

Figure III-132 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Biological Control Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

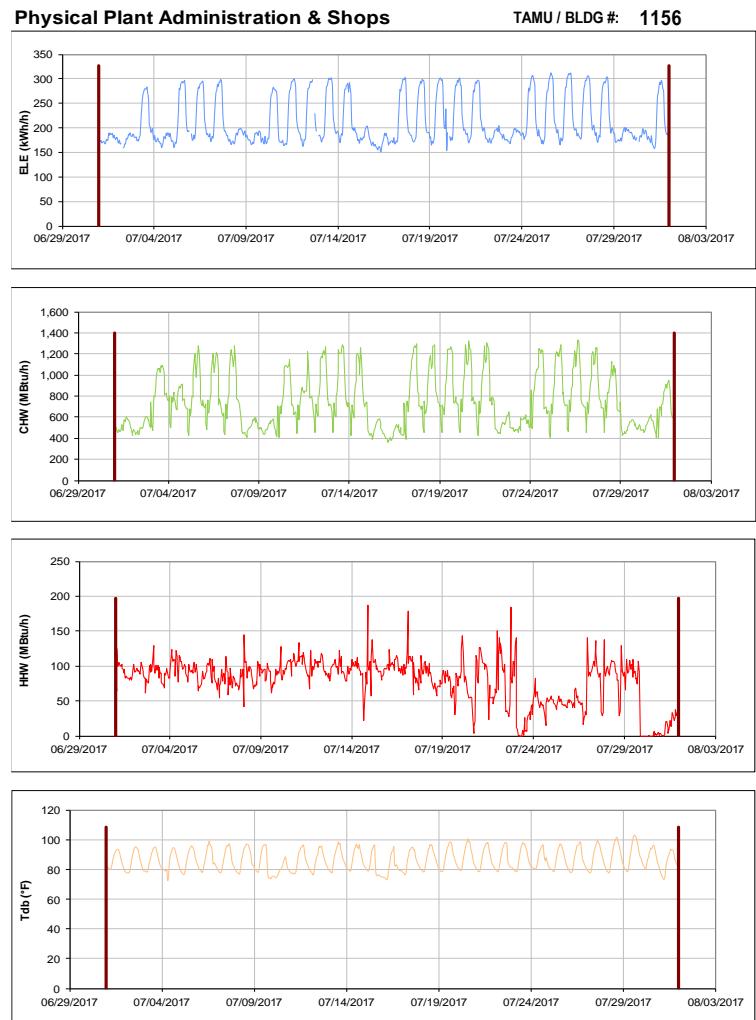

Figure III-133 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Physical Plant Administration & Shops during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

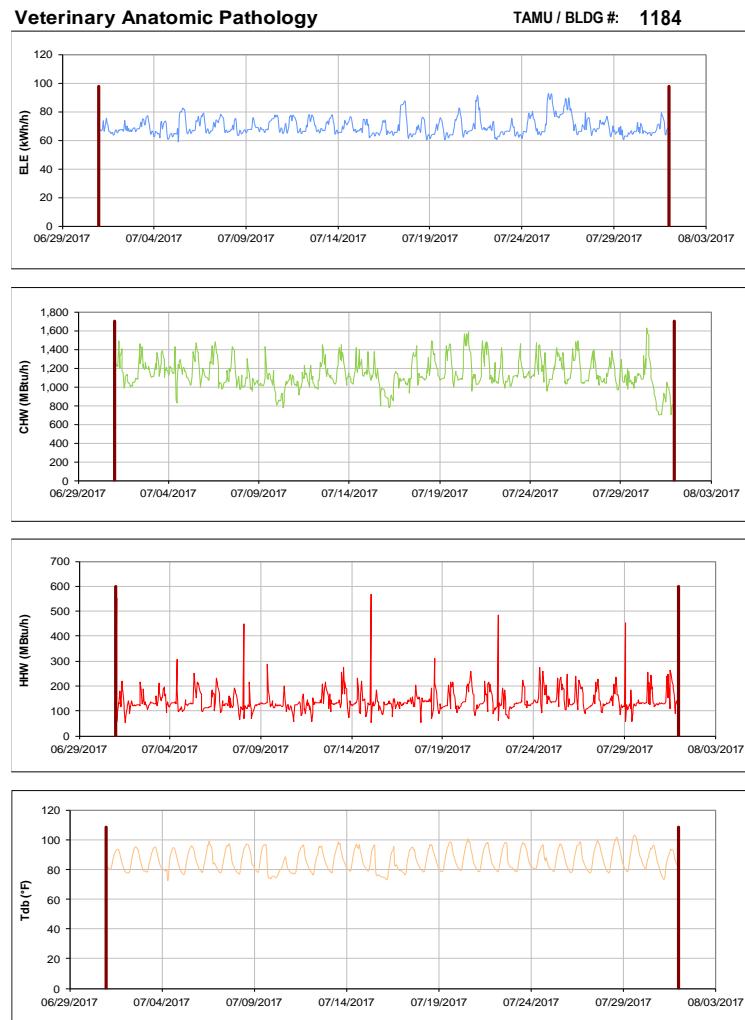

Figure III-134 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Anatomic Pathology during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Veterinary Large Animal Hospital**

TAMU / BLDG #: 1194

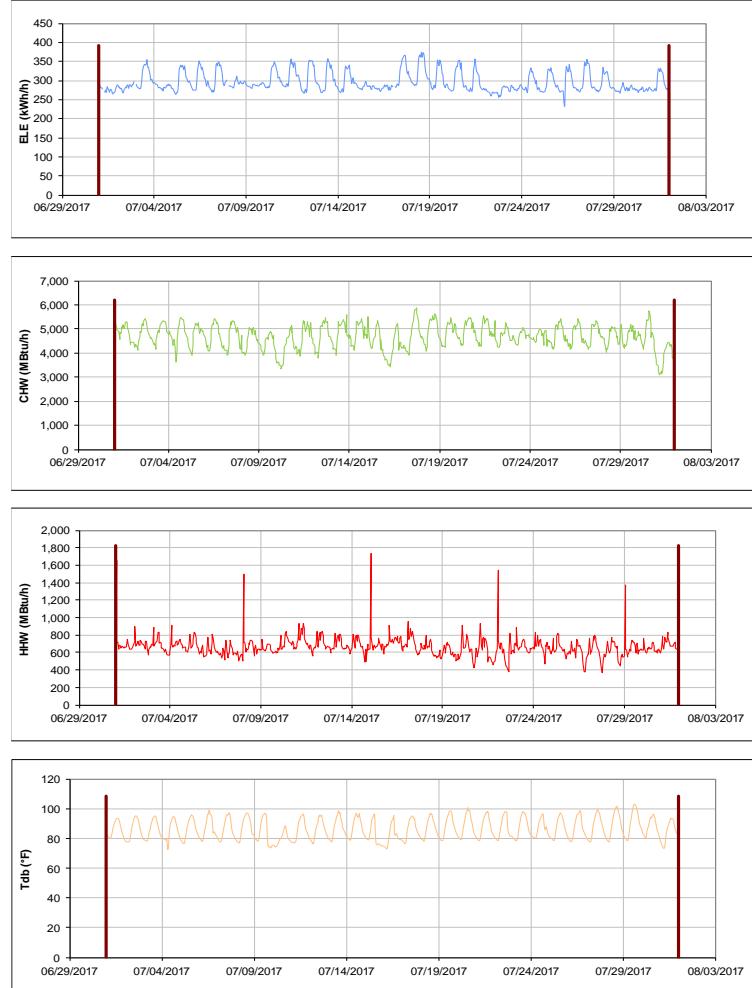

Figure III-135 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Large Animal Hospital during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Veterinary Research Building**

TAMU / BLDG #: 1197

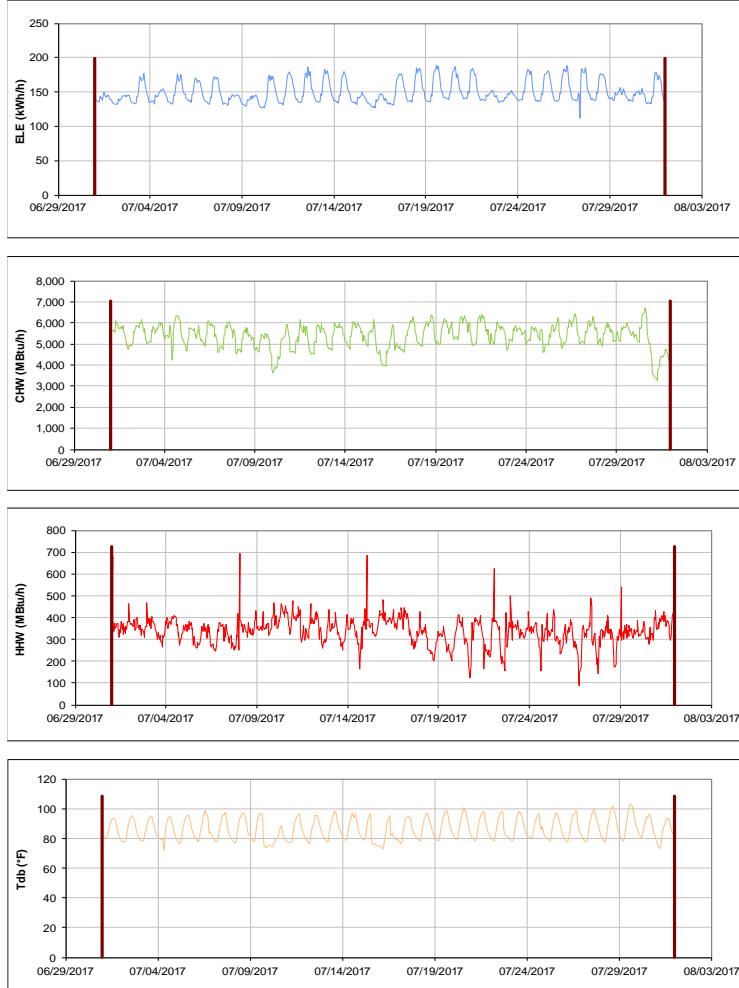

Figure III-136 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Buzbee Leadership Learning Center**

TAMU / BLDG #: 1402

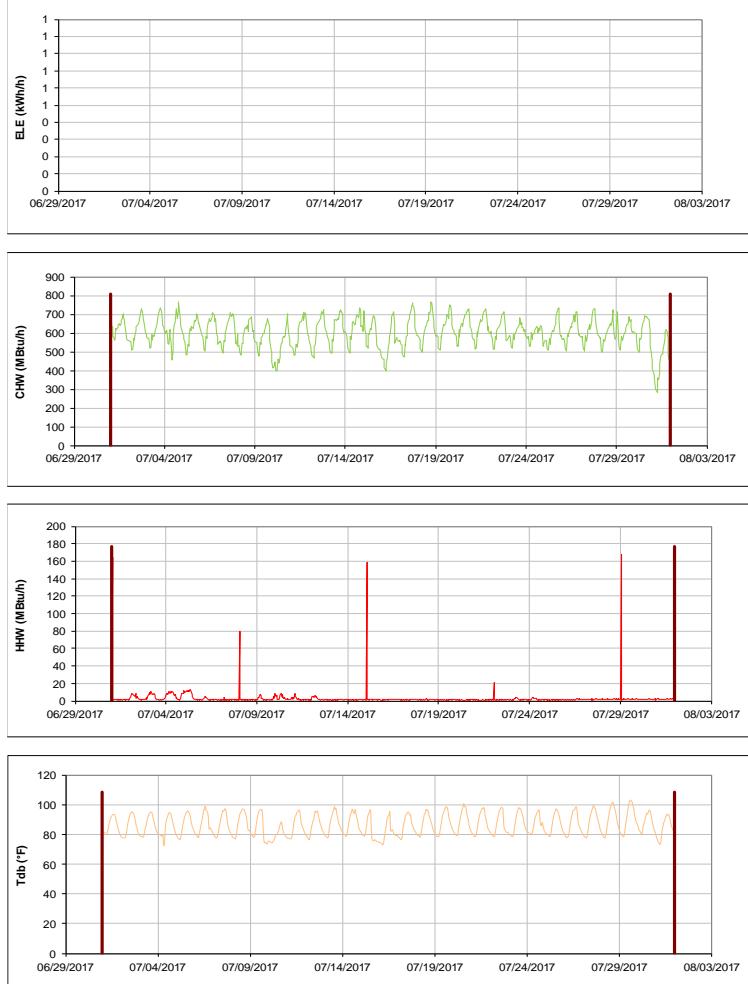

Figure III-137 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Buzbee Leadership Learning Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**H. Grady Ash, Jr. '58 Leadership Learning Center**

TAMU / BLDG #: 1403

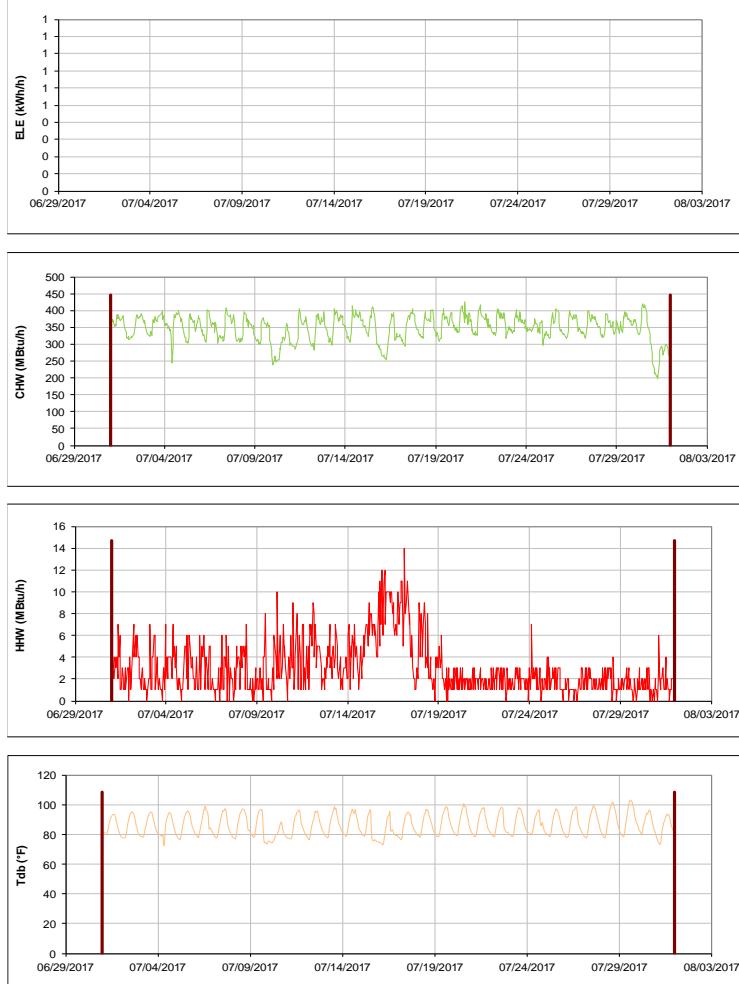

Figure III-138 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for H. Grady Ash, Jr. '58 Leadership Learning Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

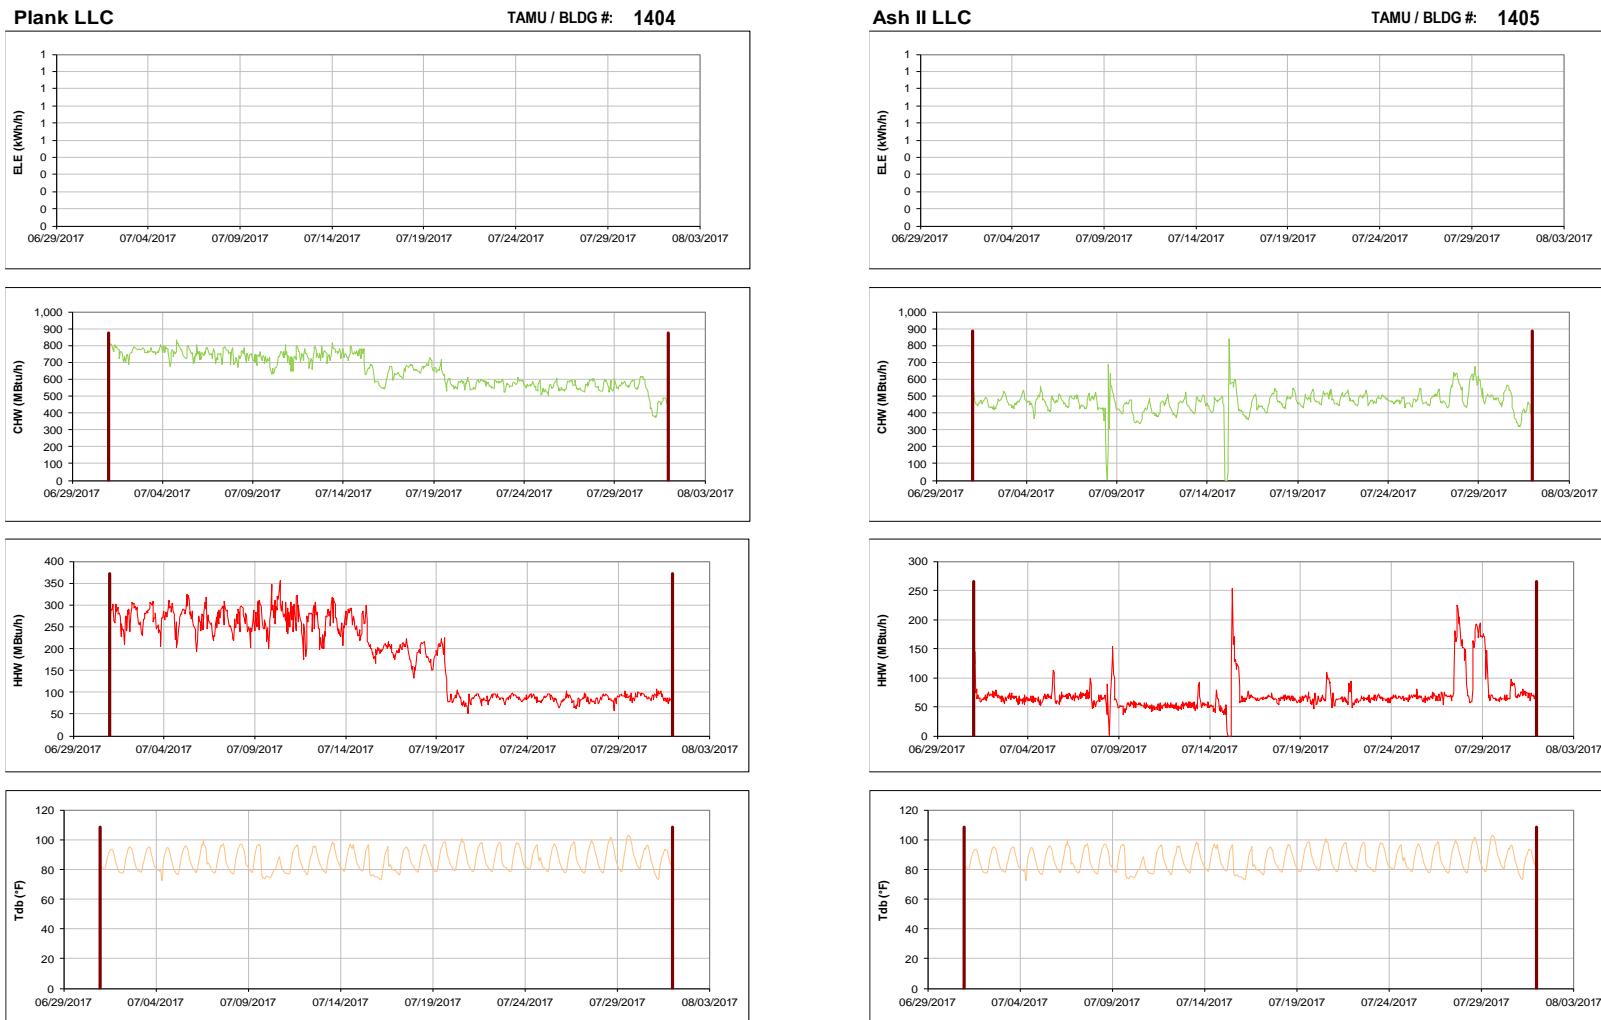

Figure III-139 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Plank LLC during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-140 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Ash II LLC during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Hullabaloo Residence Hall**

TAMU / BLDG #: 1416

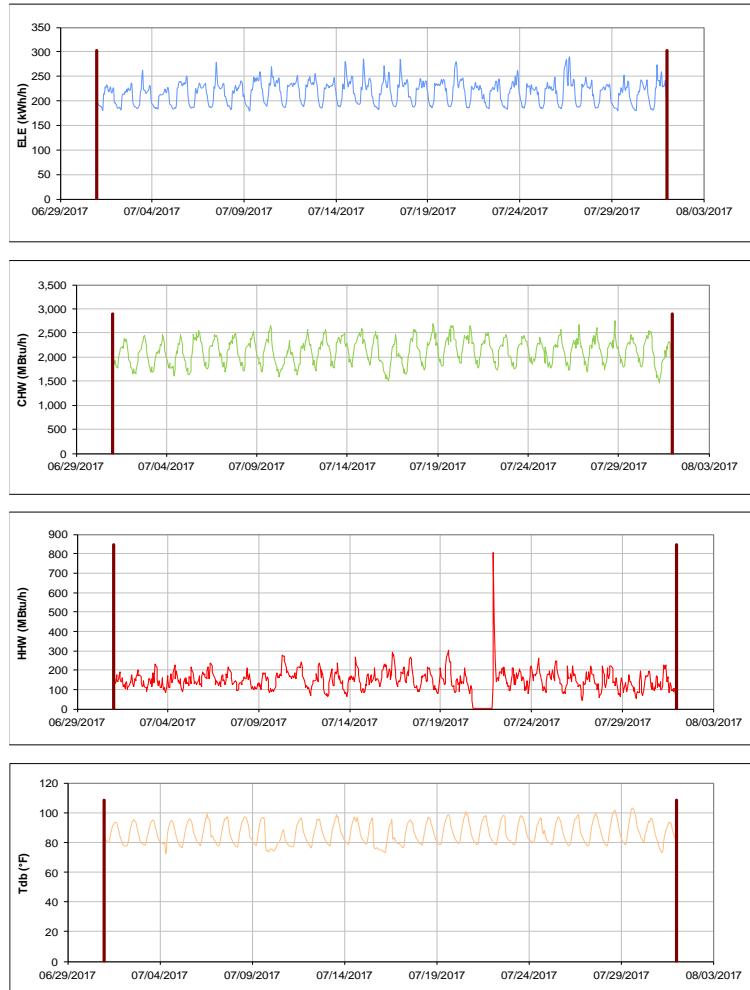

Figure III-141 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Hullabaloo Residence Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**University Apartments - Laundry at the Gardens**

TAMU / BLDG #: 1450

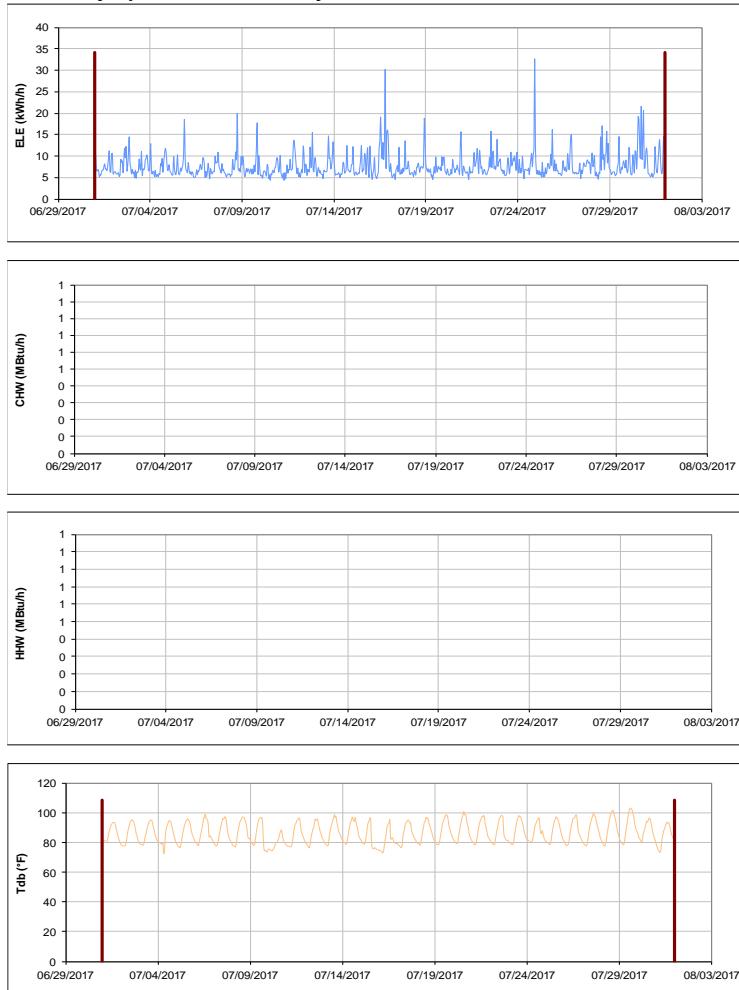

Figure III-142 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - Laundry at the Gardens during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

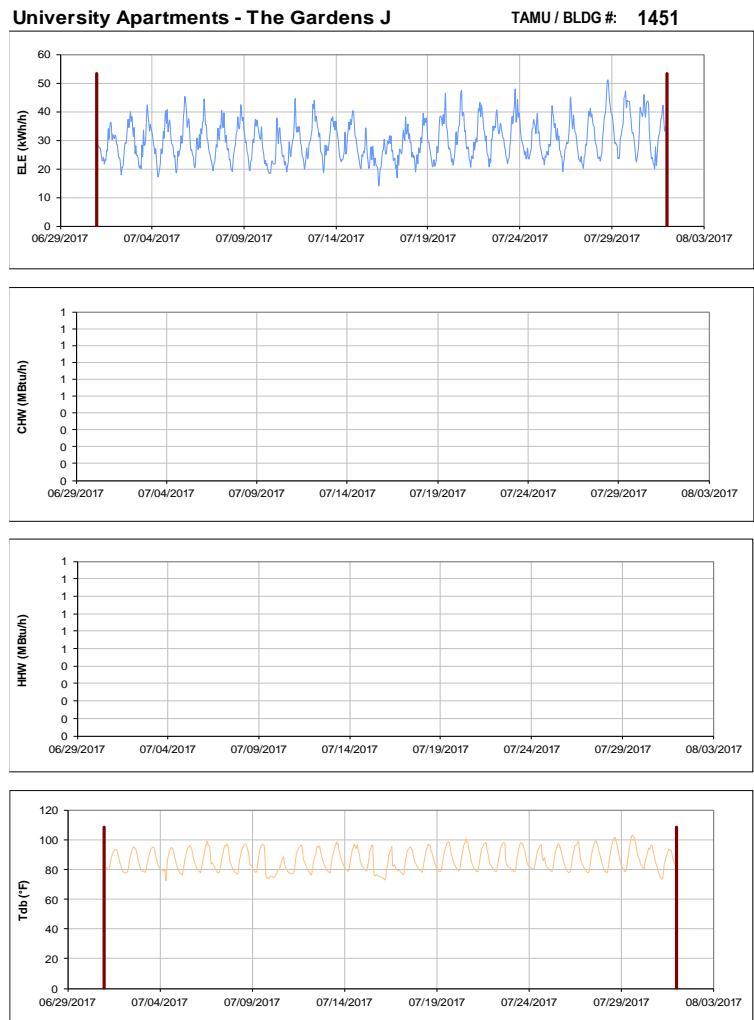

Figure III-143 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens J during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

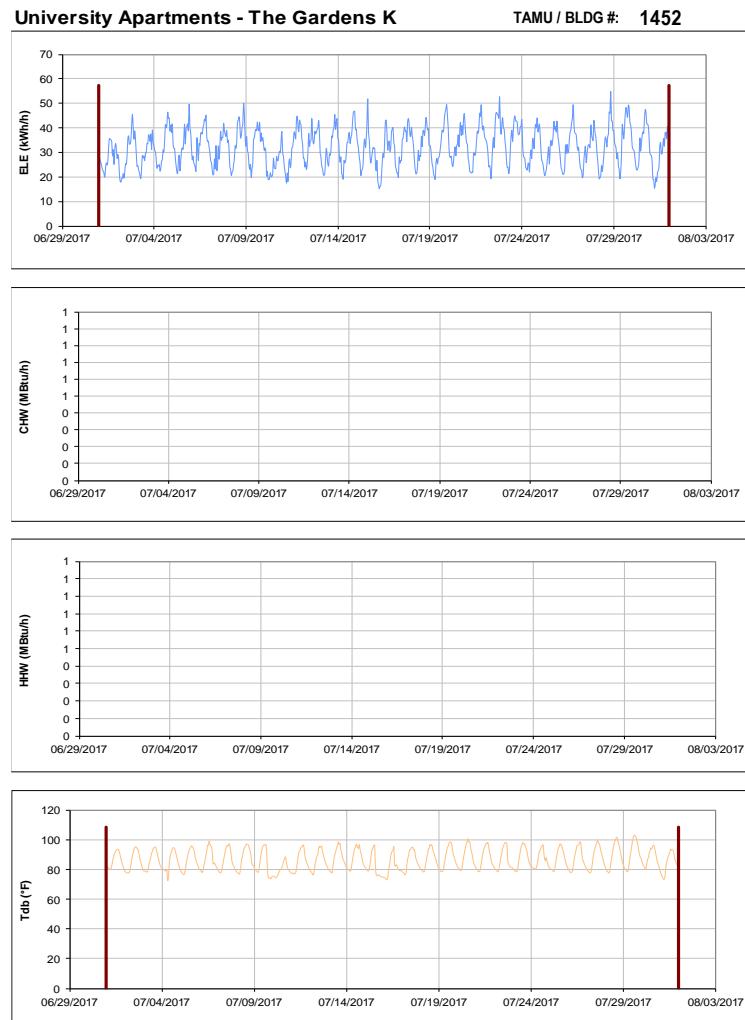

Figure III-144 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens K during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

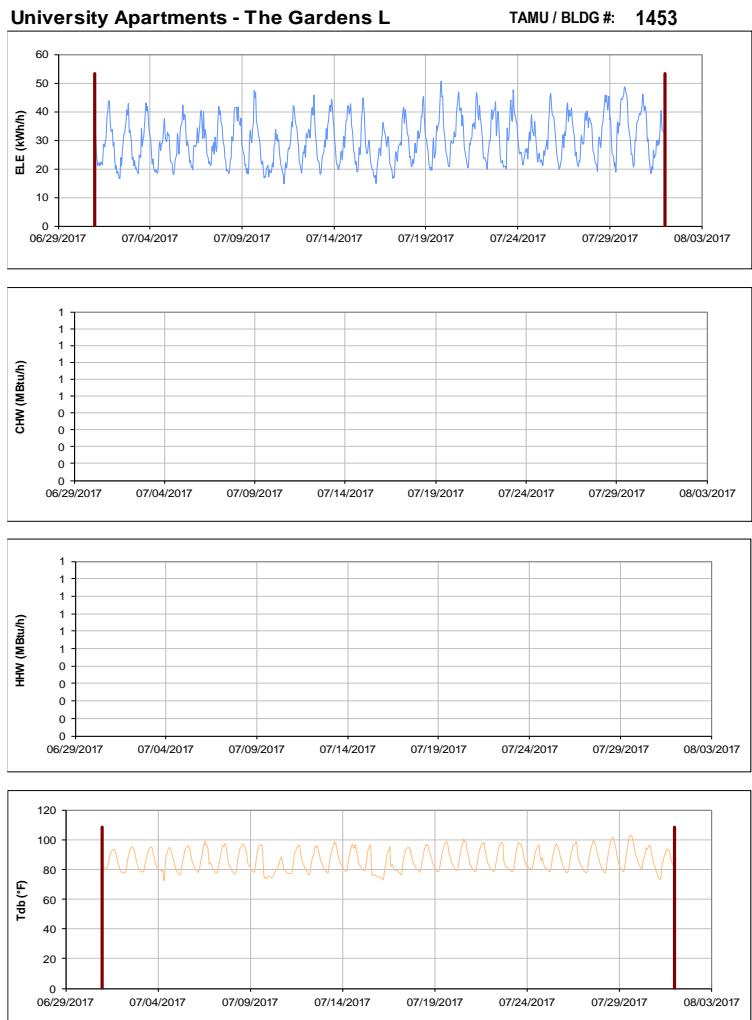

Figure III-145 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens L during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

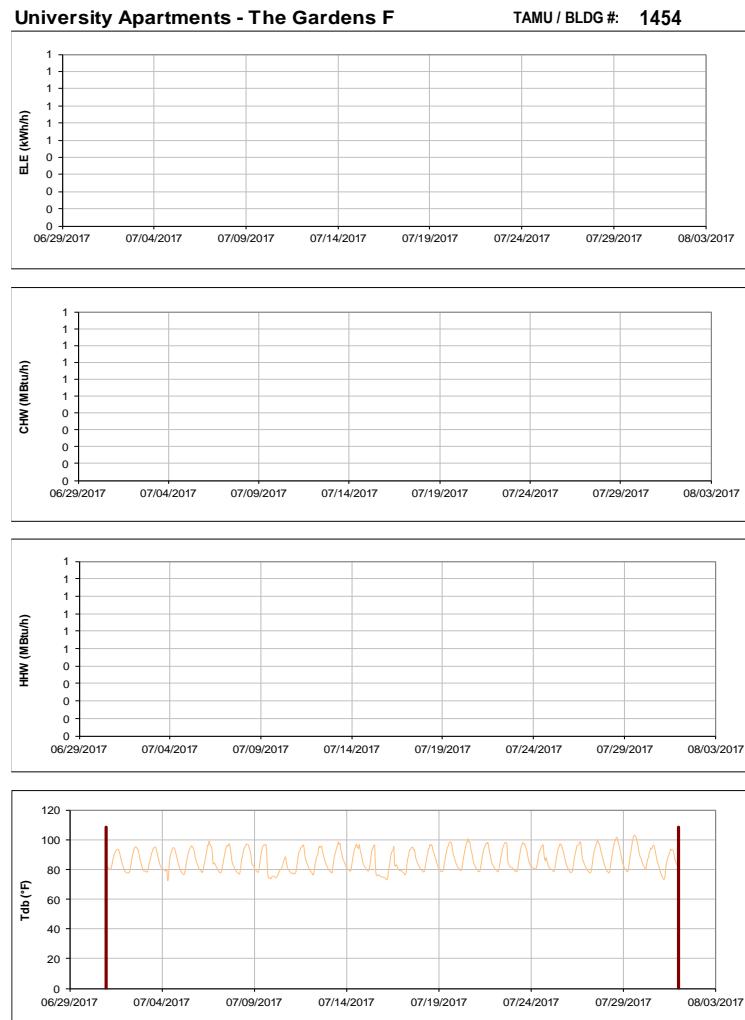

Figure III-146 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens F during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**University Apartments - The Gardens G**

TAMU / BLDG #: 1455

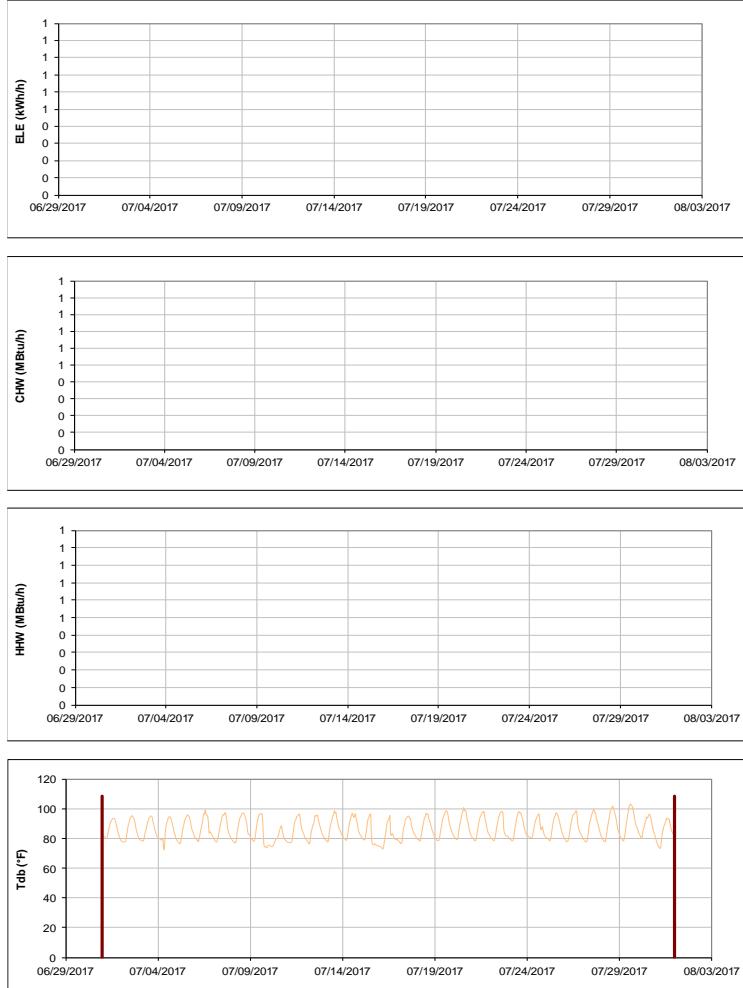

Figure III-147 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens G during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**University Apartments - The Gardens H**

TAMU / BLDG #: 1456

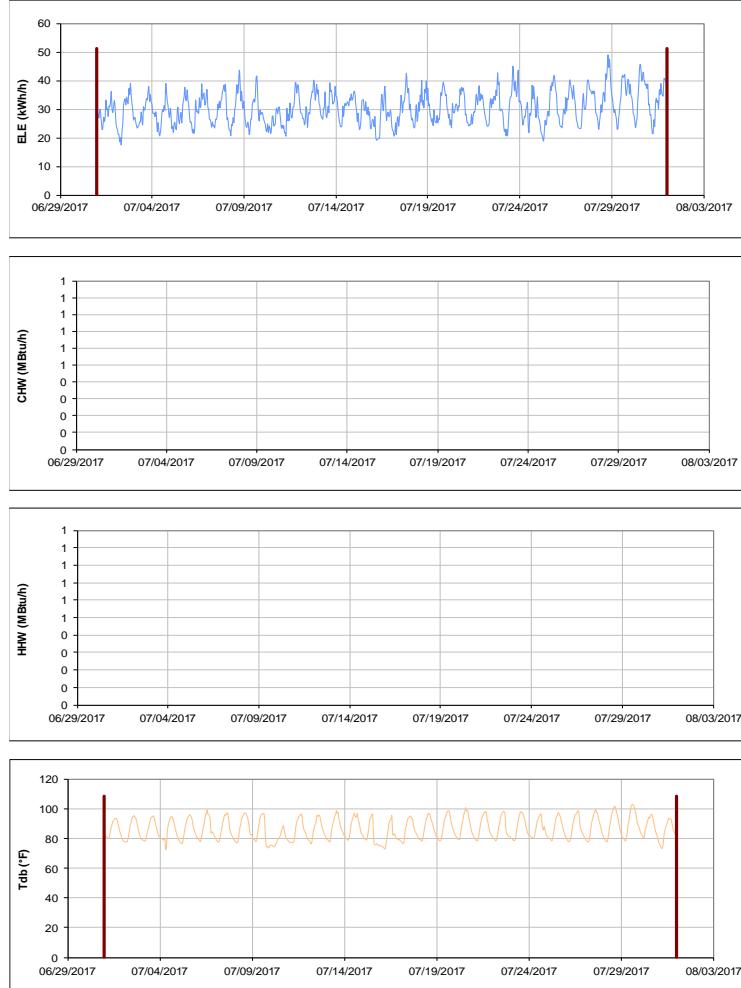

Figure III-148 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens H during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

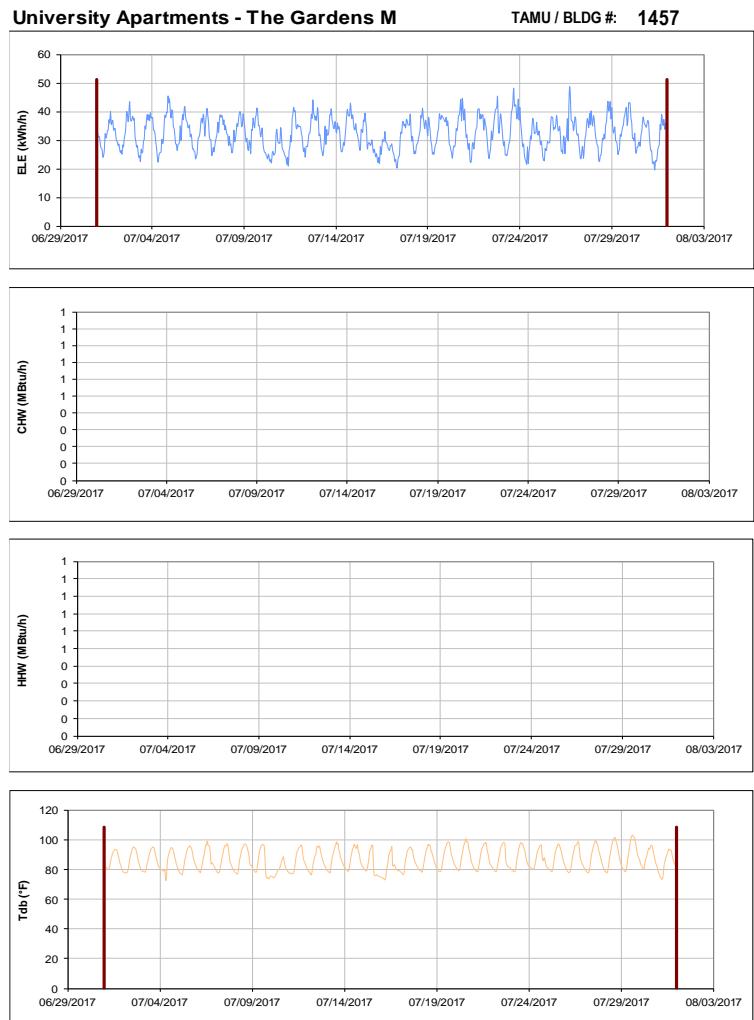

Figure III-149 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens M during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

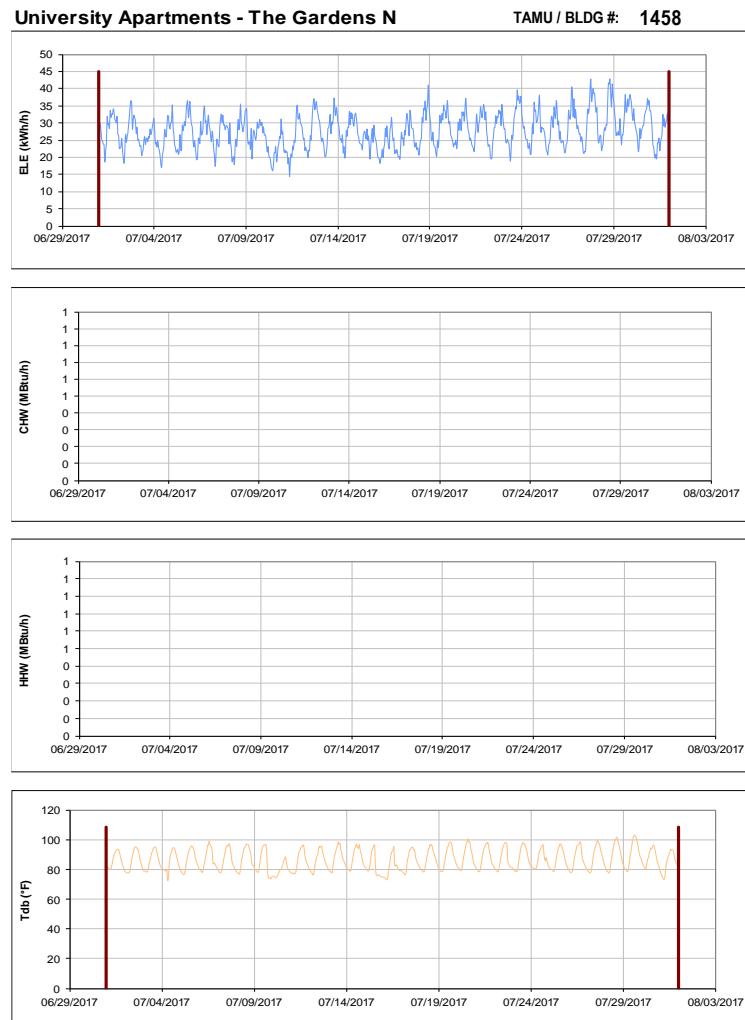

Figure III-150 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens N during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

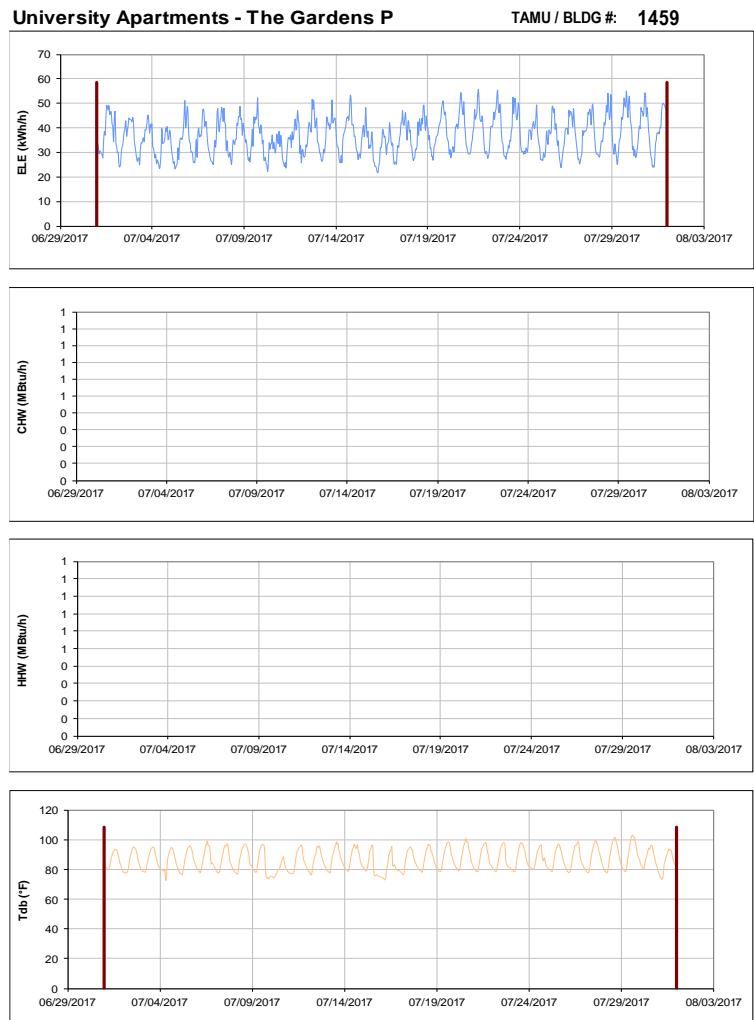

Figure III-151 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens P during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

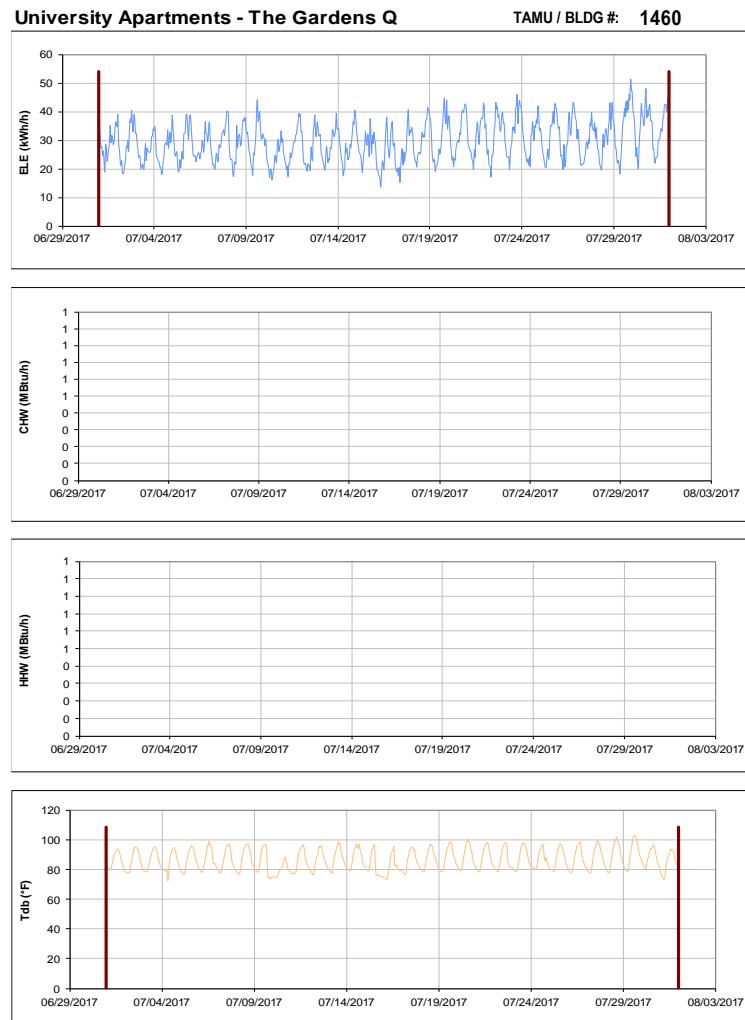

Figure III-152 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for University Apartments - The Gardens Q during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Utilities & Energy Services Business Office**

TAMU / BLDG #: 1497

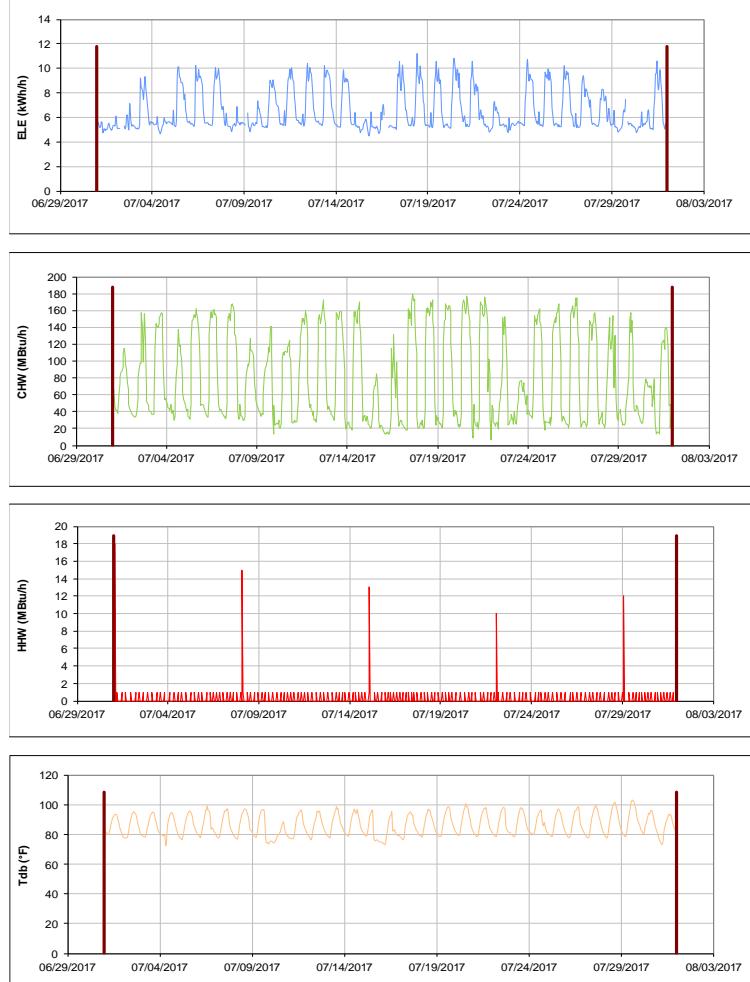

Figure III-153 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Utilities & Energy Services Business Office during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Kleberg Center**

TAMU / BLDG #: 1501

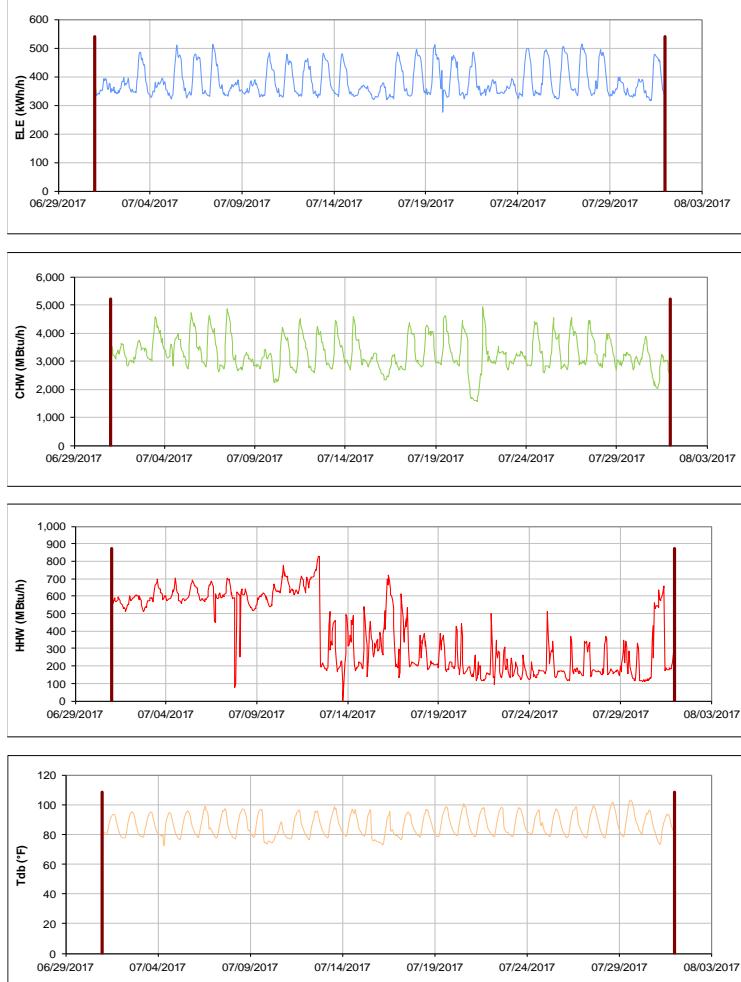

Figure III-154 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Kleberg Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

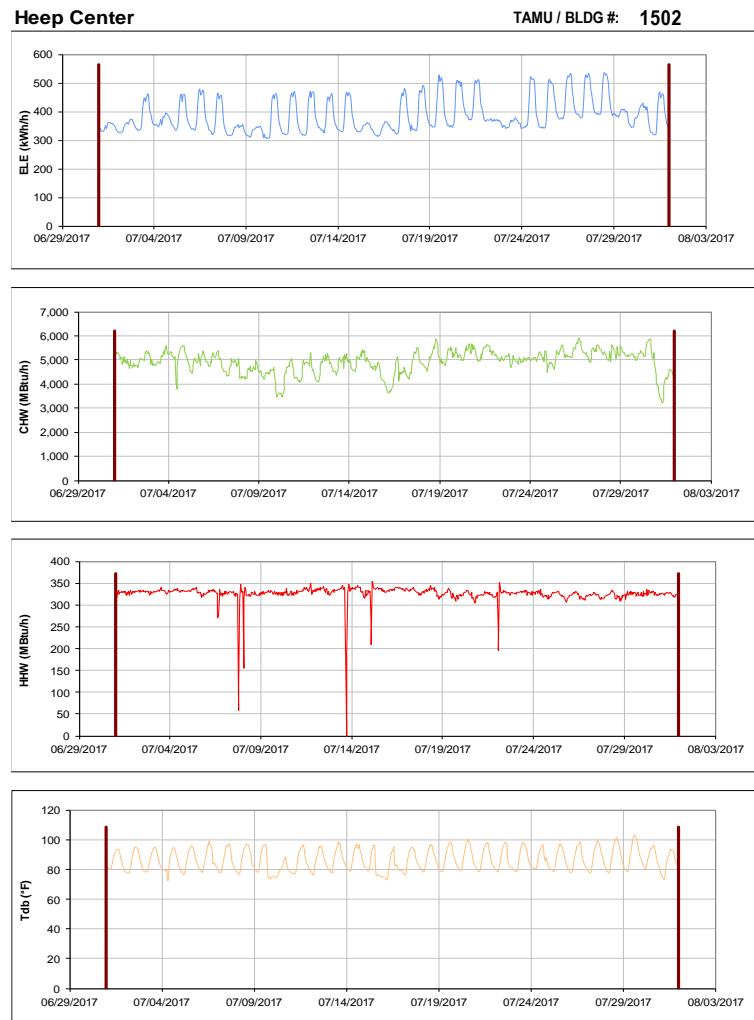

Figure III-155 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Heep Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

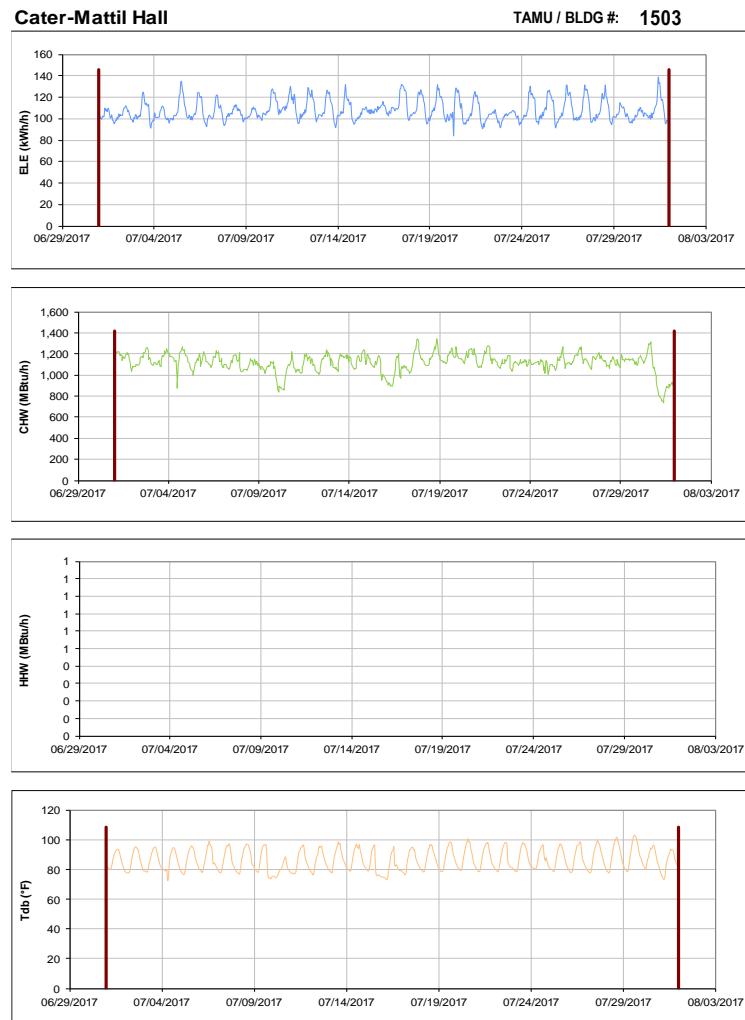

Figure III-156 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cater-Mattil Hall during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

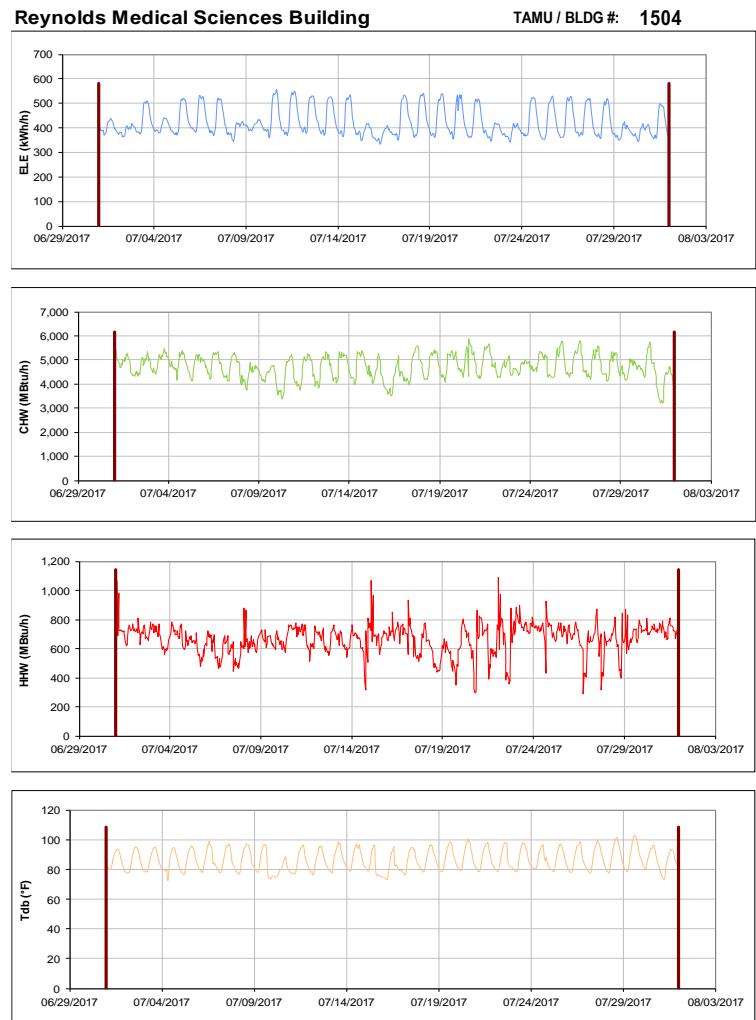

Figure III-157 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Reynolds Medical Sciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

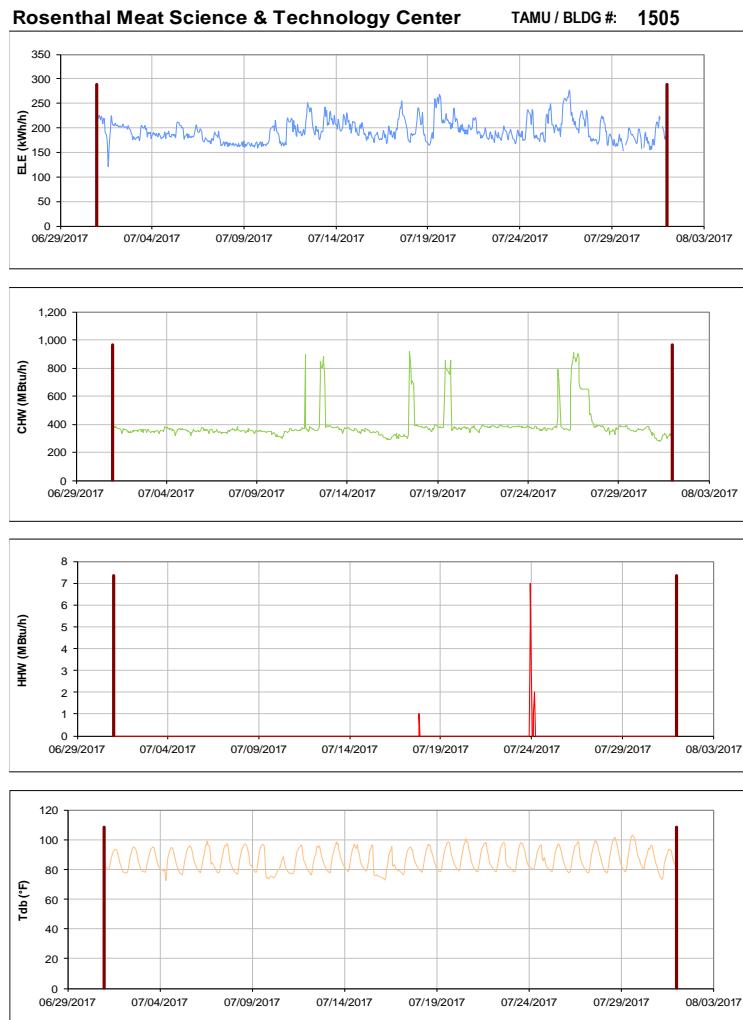

Figure III-158 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Rosenthal Meat Science & Technology Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

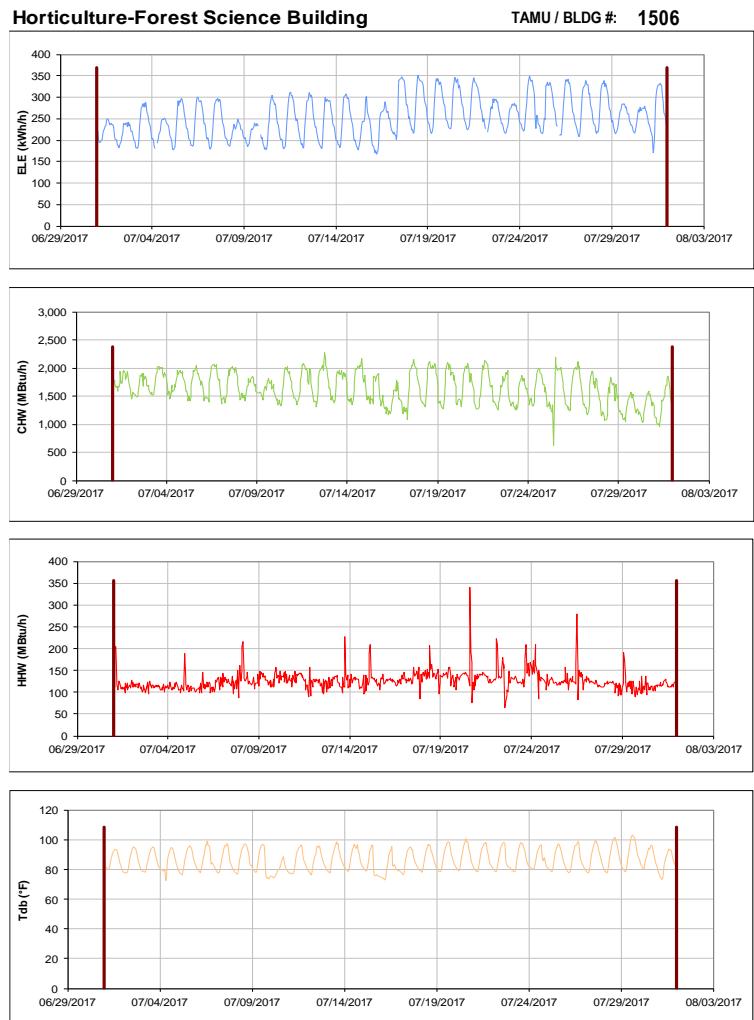

Figure III-159 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Horticulture-Forest Science Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

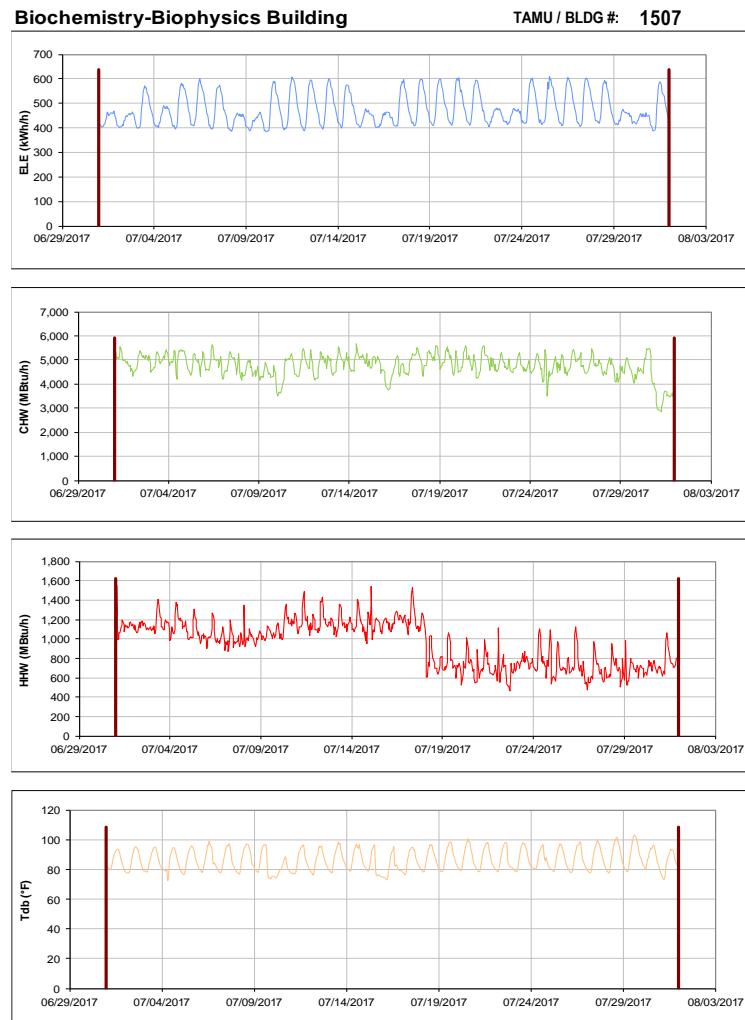

Figure III-160 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Biochemistry-Biophysics Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

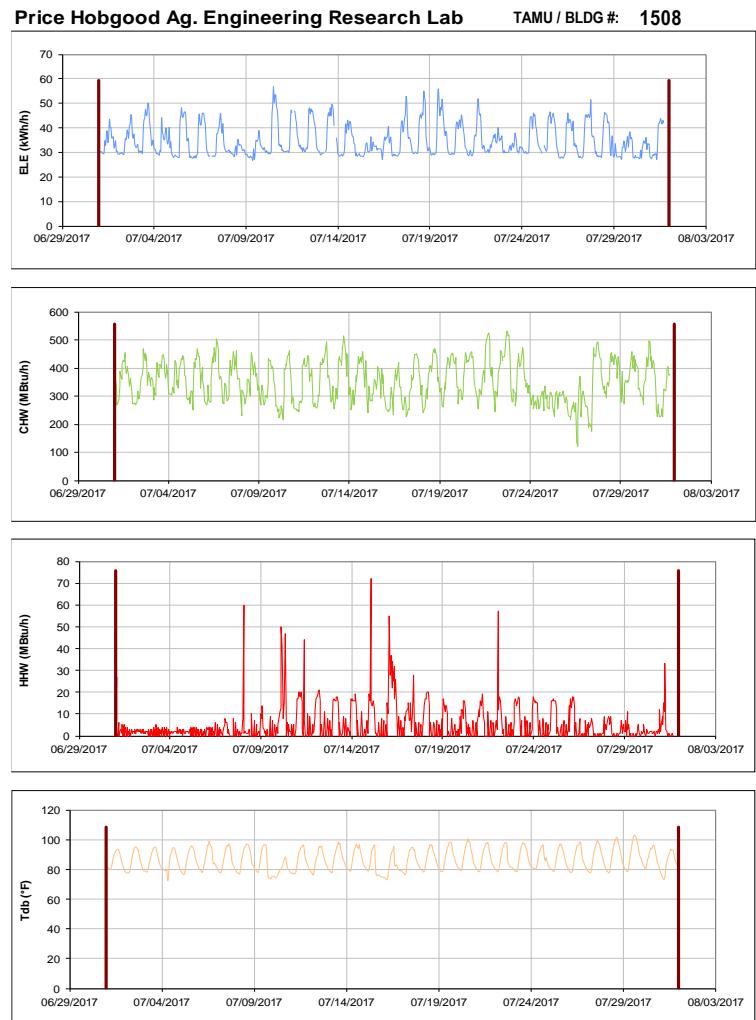

Figure III-161 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Price Hobgood Ag. Engineering Research Lab during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

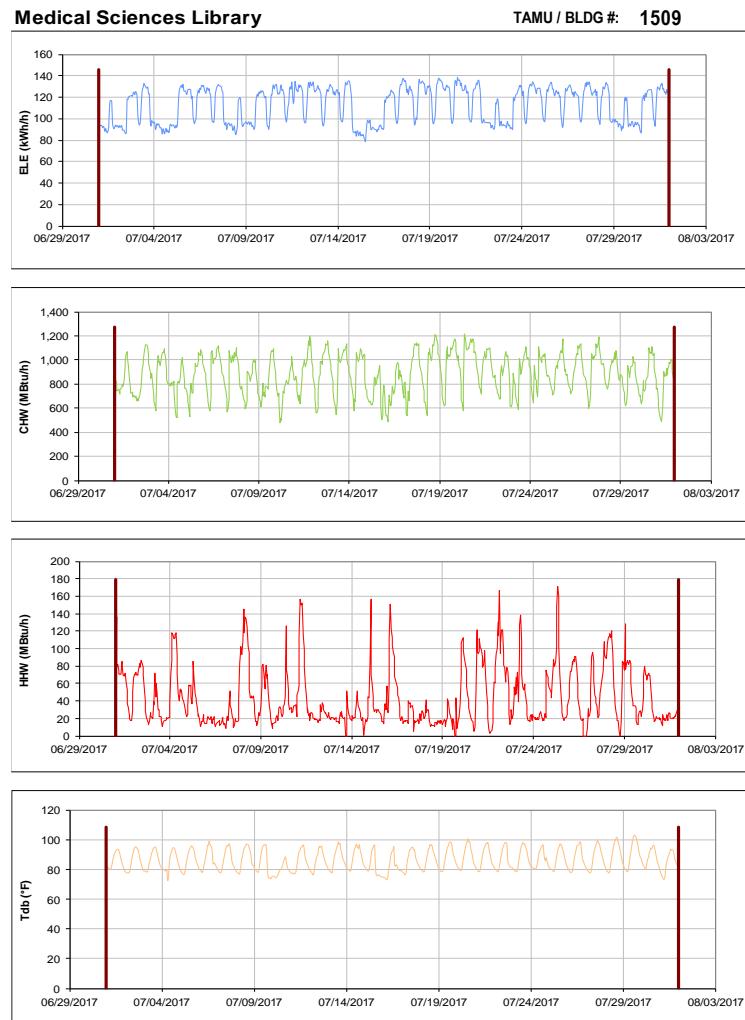

Figure III-162 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Medical Sciences Library during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-163 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Wehner Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

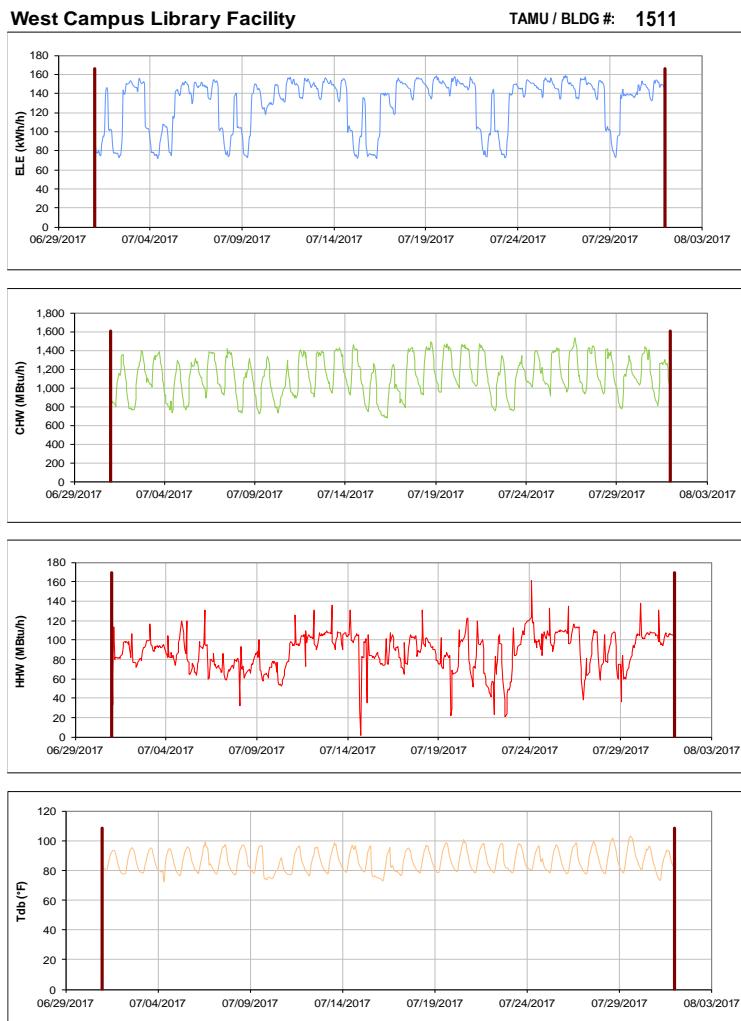

Figure III-164 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for West Campus Library Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

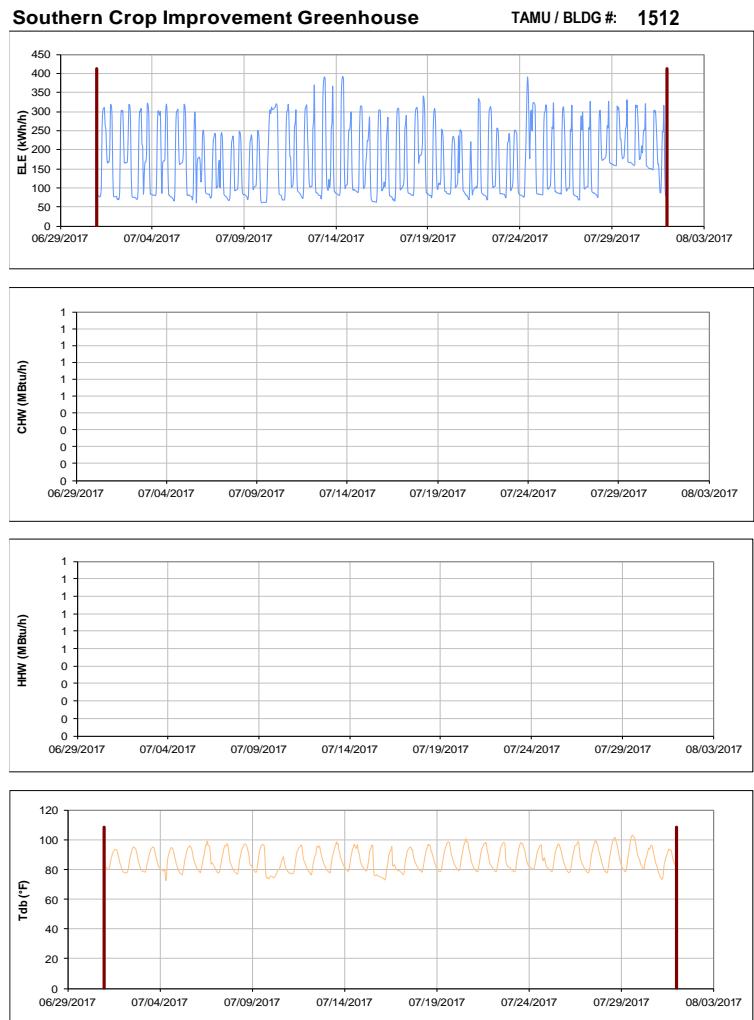

Figure III-165 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Southern Crop Improvement Greenhouse during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

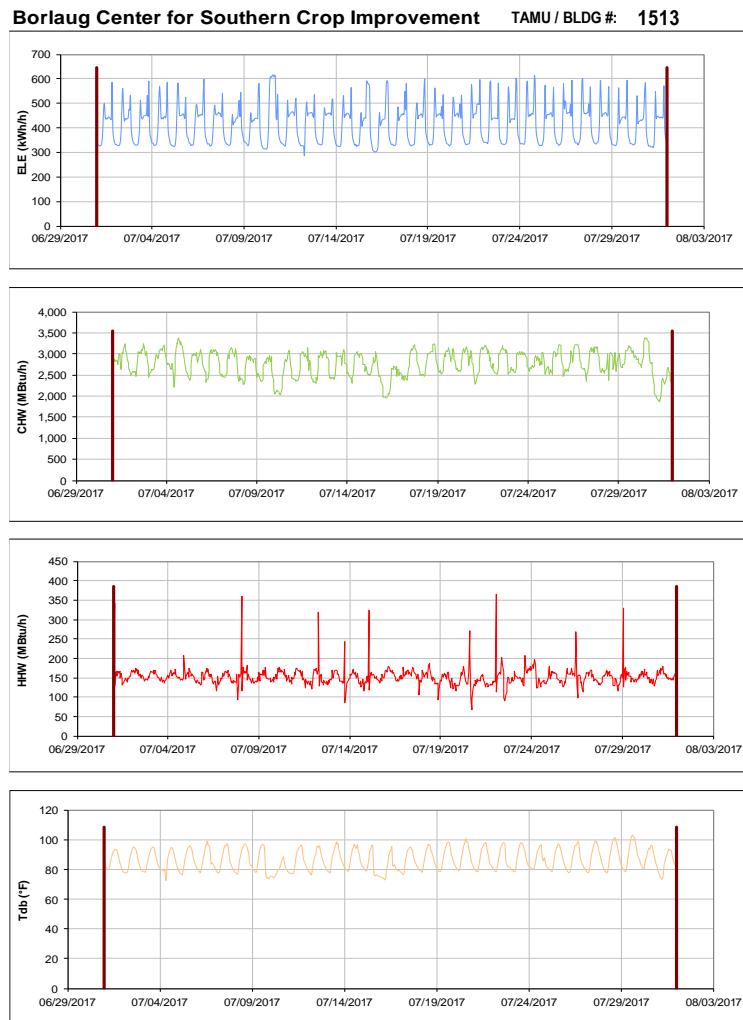

Figure III-166 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Borlaug Center for Southern Crop Improvement during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**TX School of Rural Public Health**

TAMU / BLDG #: 1518

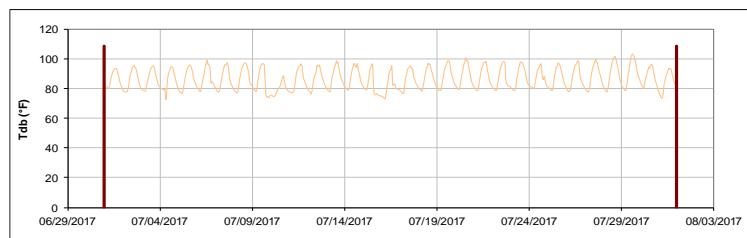

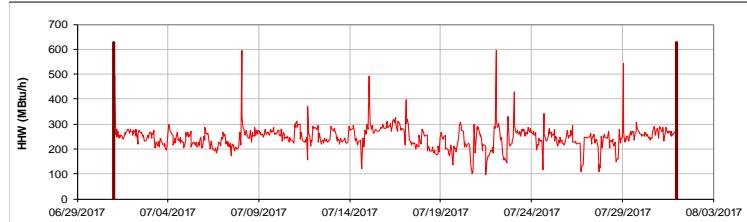

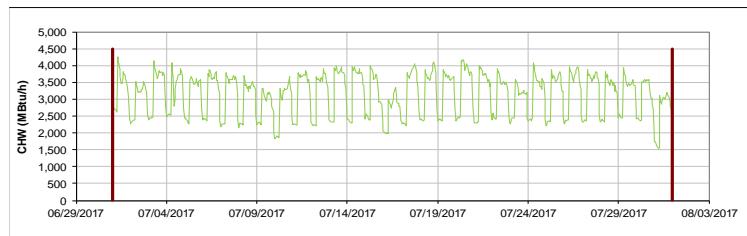

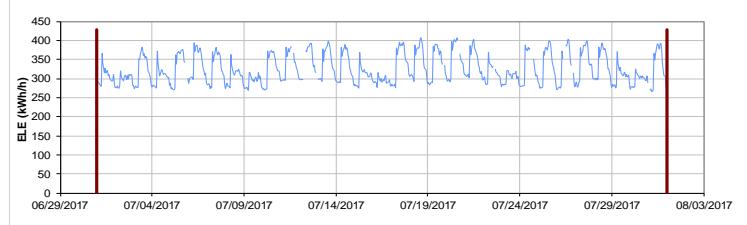

Figure III-167 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TX School of Rural Public Health during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Nuclear Magnetic Resonance Facility**

TAMU / BLDG #: 1525

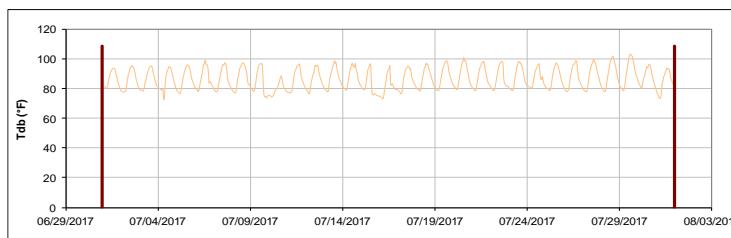

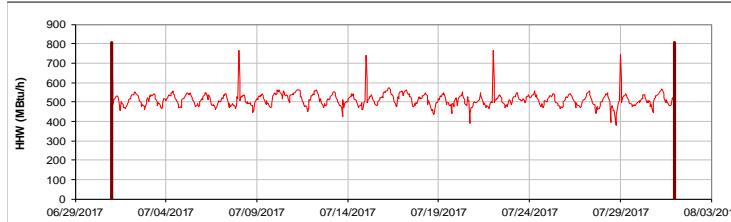

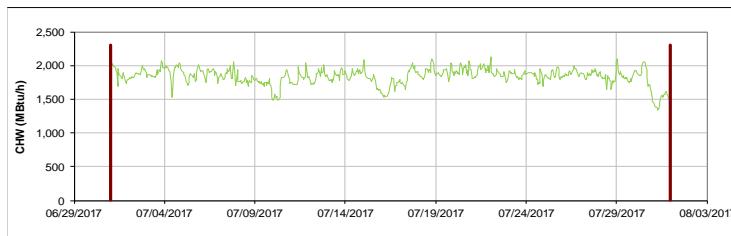

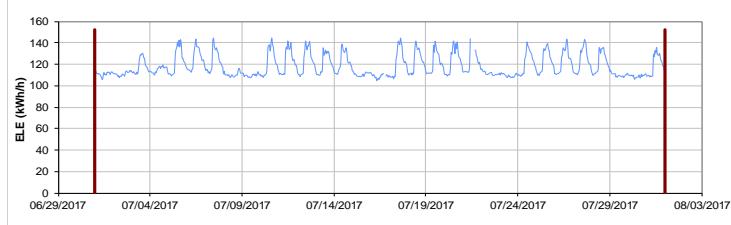

Figure III-168 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Nuclear Magnetic Resonance Facility during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

Figure III-169 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Interdisciplinary Life Sciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

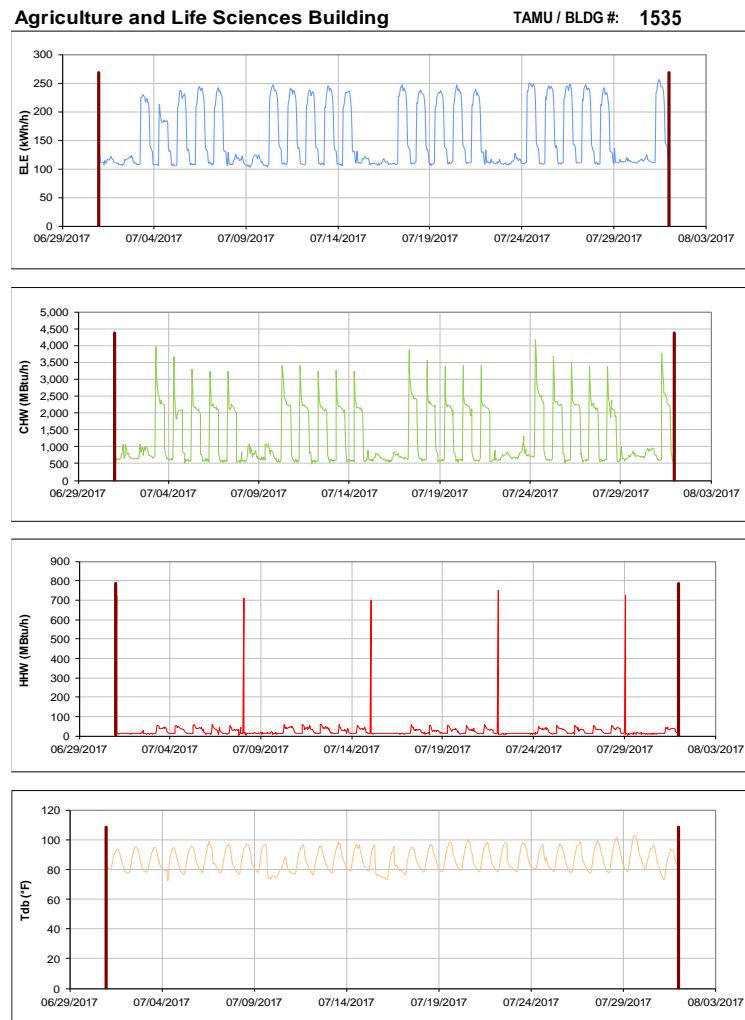

Figure III-170 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture and Life Sciences Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**AgriLife Services Building**

TAMU / BLDG #: 1536

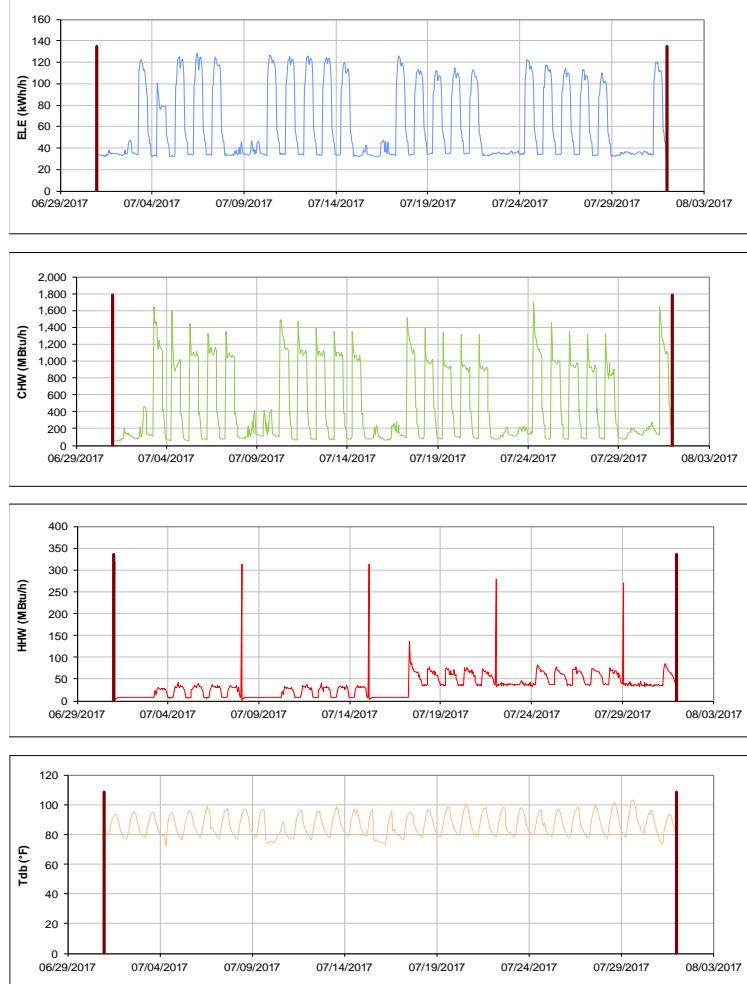

Figure III-171 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for AgriLife Services Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Agriculture Public Building**

TAMU / BLDG #: 1537

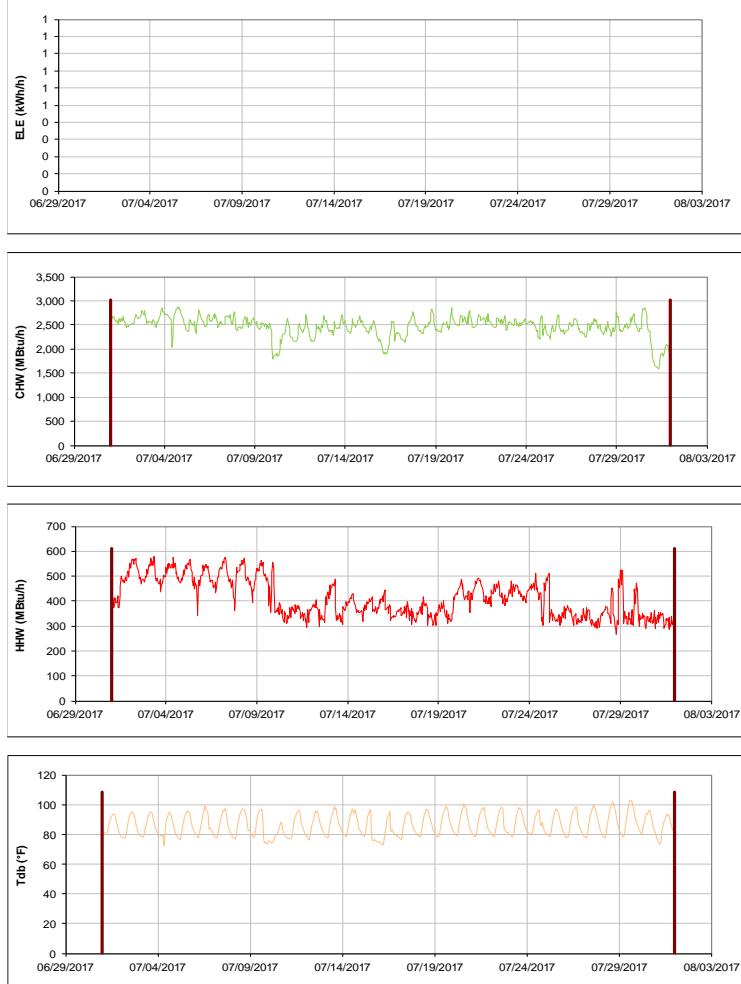

Figure III-172 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture Public Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

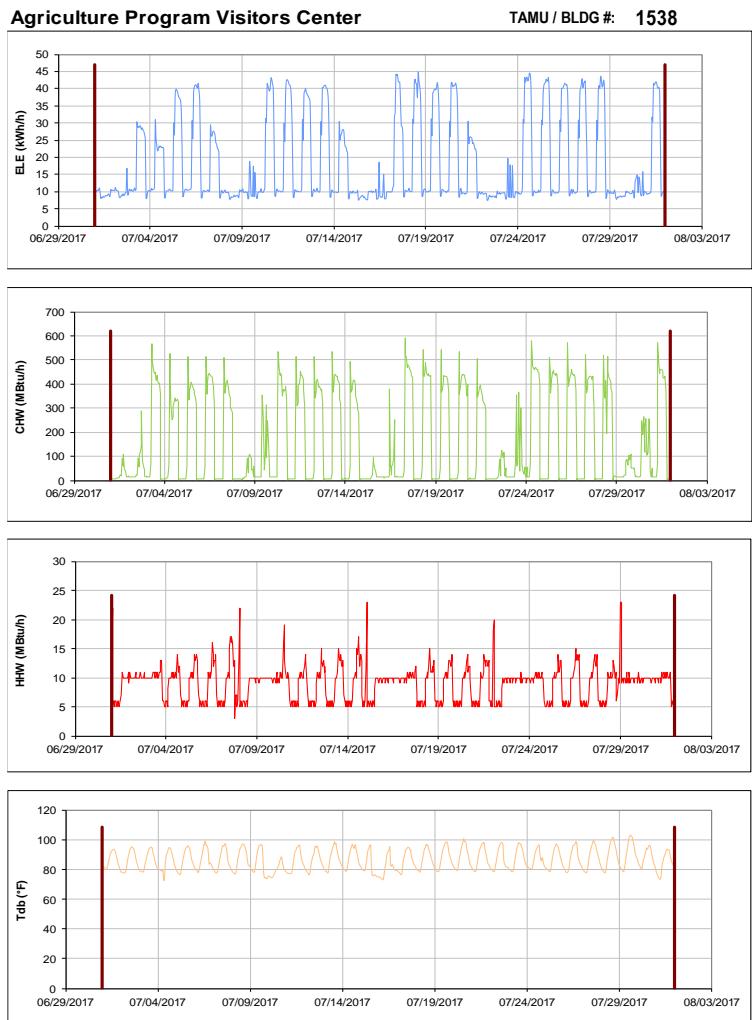

Figure III-173 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Agriculture Program Visitors Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

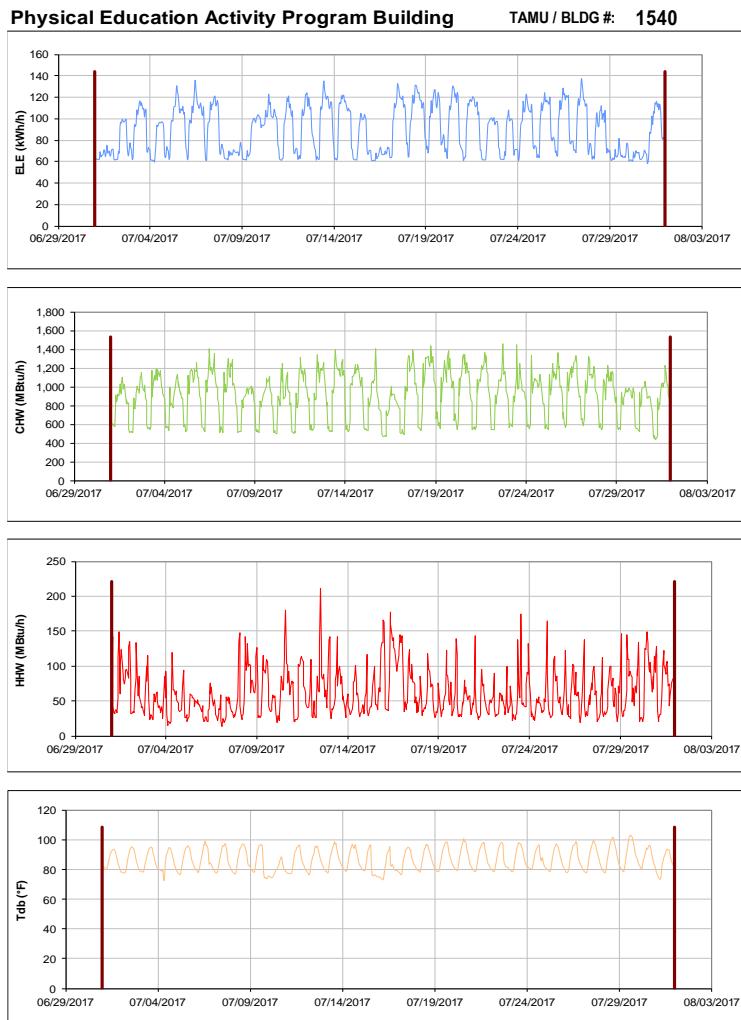

Figure III-174 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Physical Education Activity Program Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

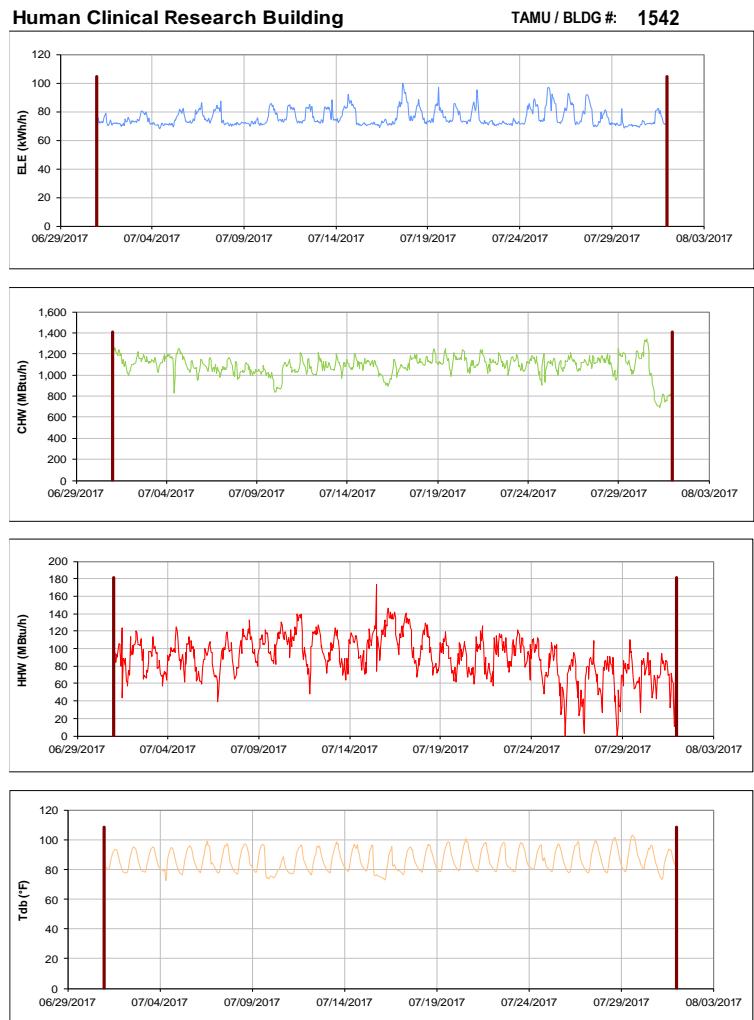

Figure III-175 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Human Clinical Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

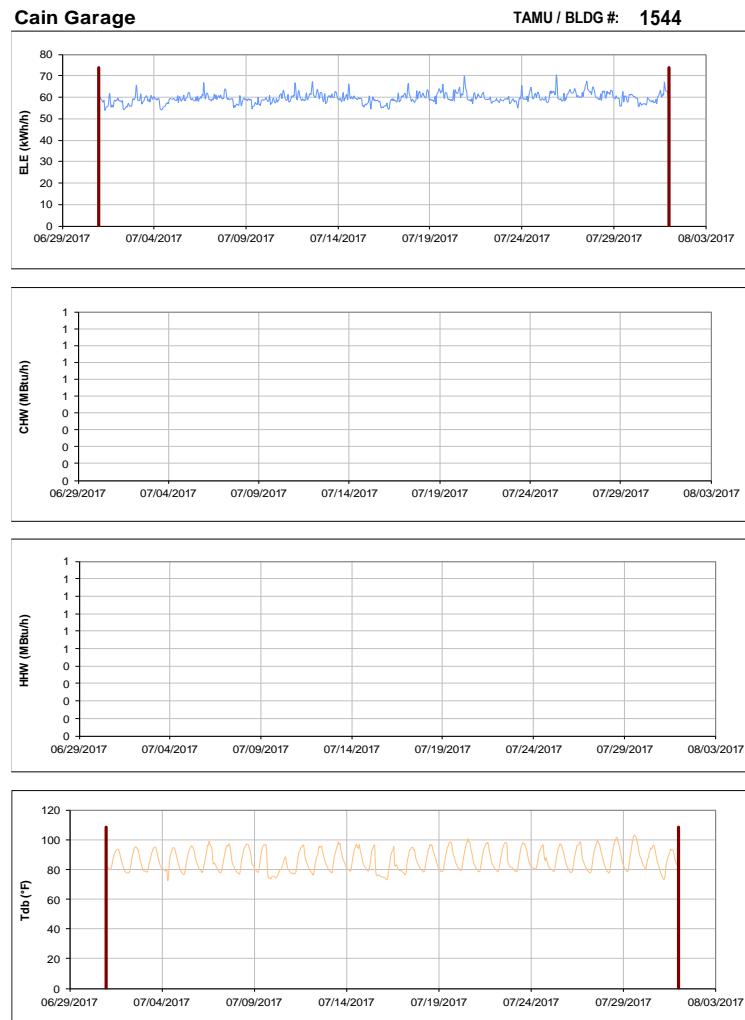

Figure III-176 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cain Garage during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Olsen Field at Bluebell Park**

TAMU / BLDG #: 1550

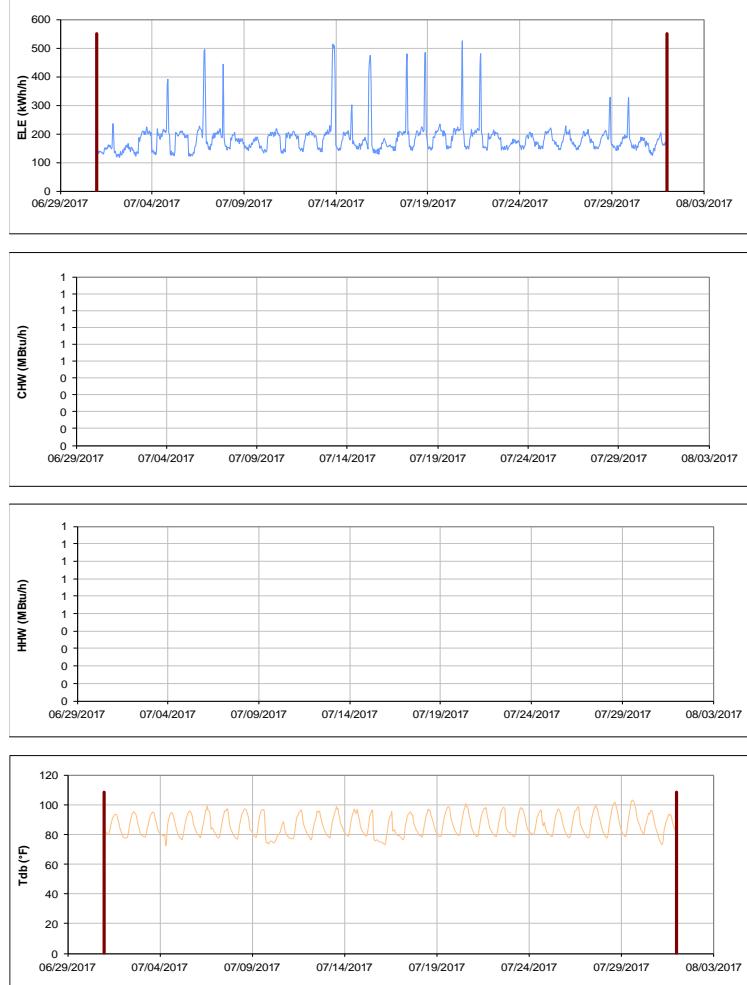

Figure III-177 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Olsen Field at Bluebell Park during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Reed Arena and Cox-McFerrin Center**

TAMU / BLDG #: 554-1558

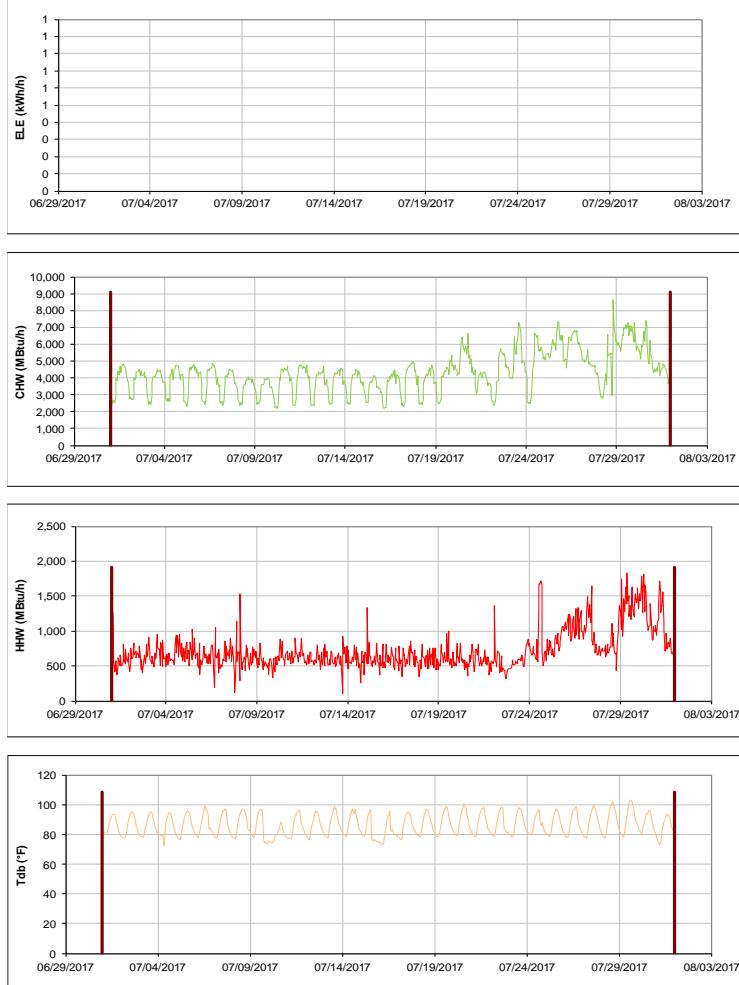

Figure III-178 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Reed Arena and Cox-McFerrin Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

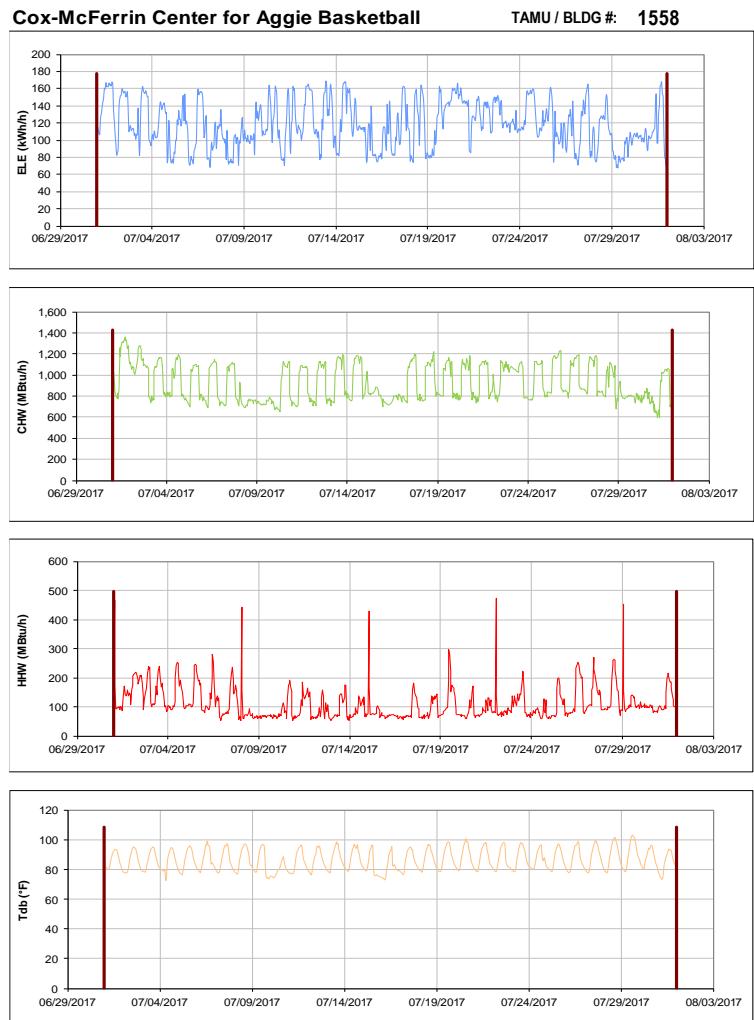

Figure III-179 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Cox-McFerrin Center for Aggie Basketball during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

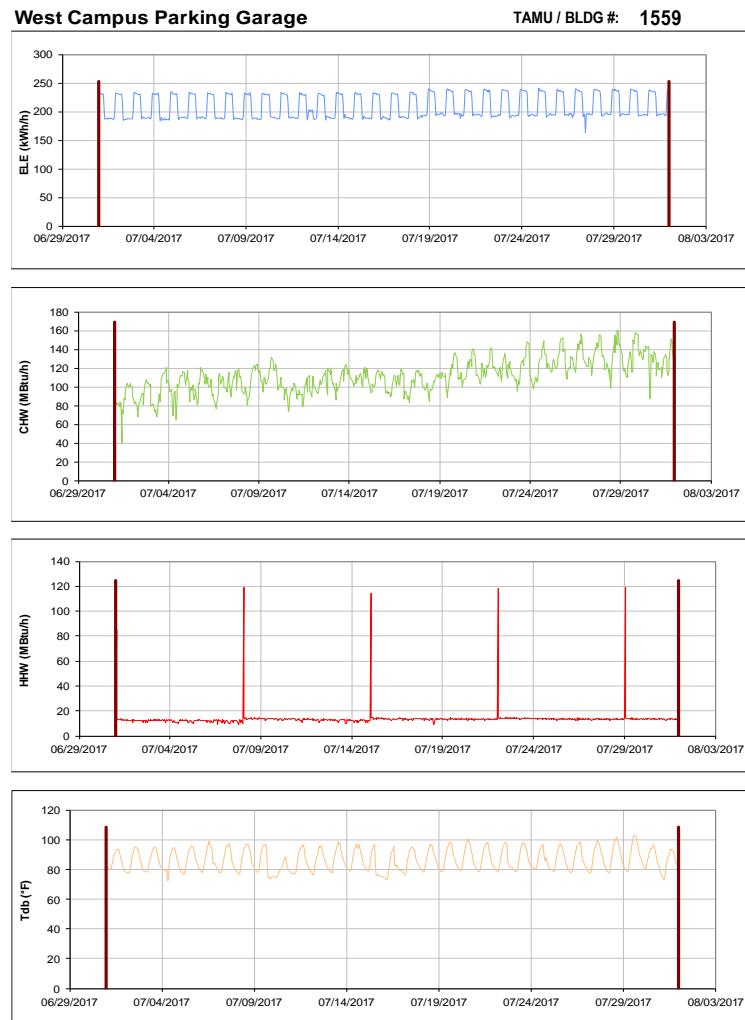

Figure III-180 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for West Campus Parking Garage during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Student Recreation Center**

TAMU / BLDG #: 1560

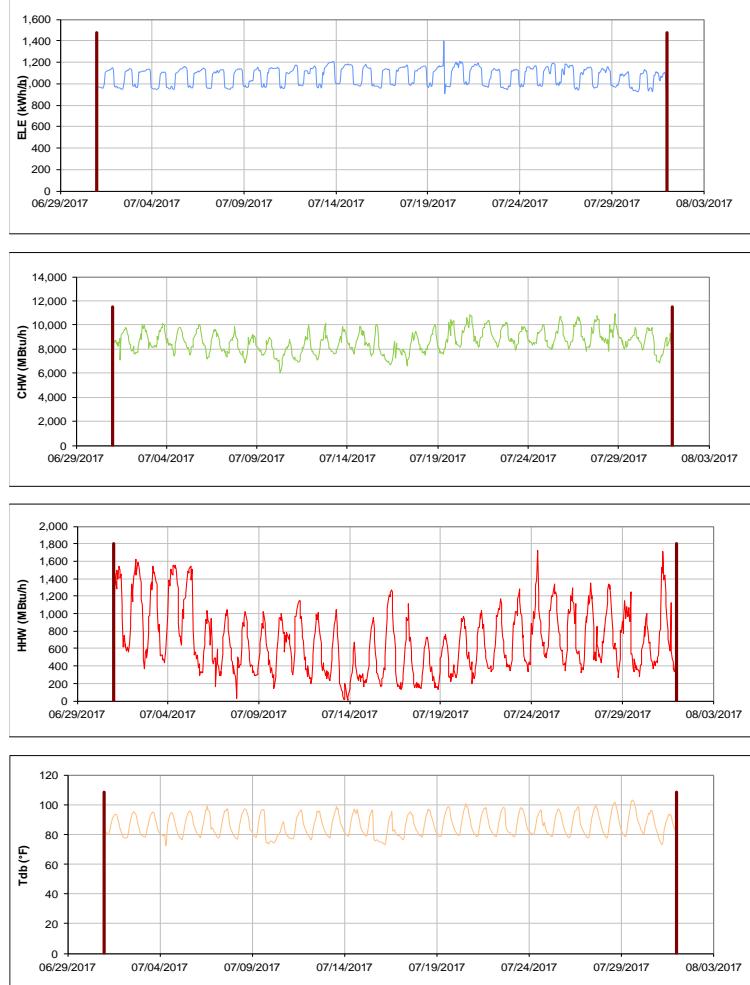

Figure III-181 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Student Recreation Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**White Creek Apartment 1 and White Creek Apts Activity**

TAMU / BLDG #: 589-1590

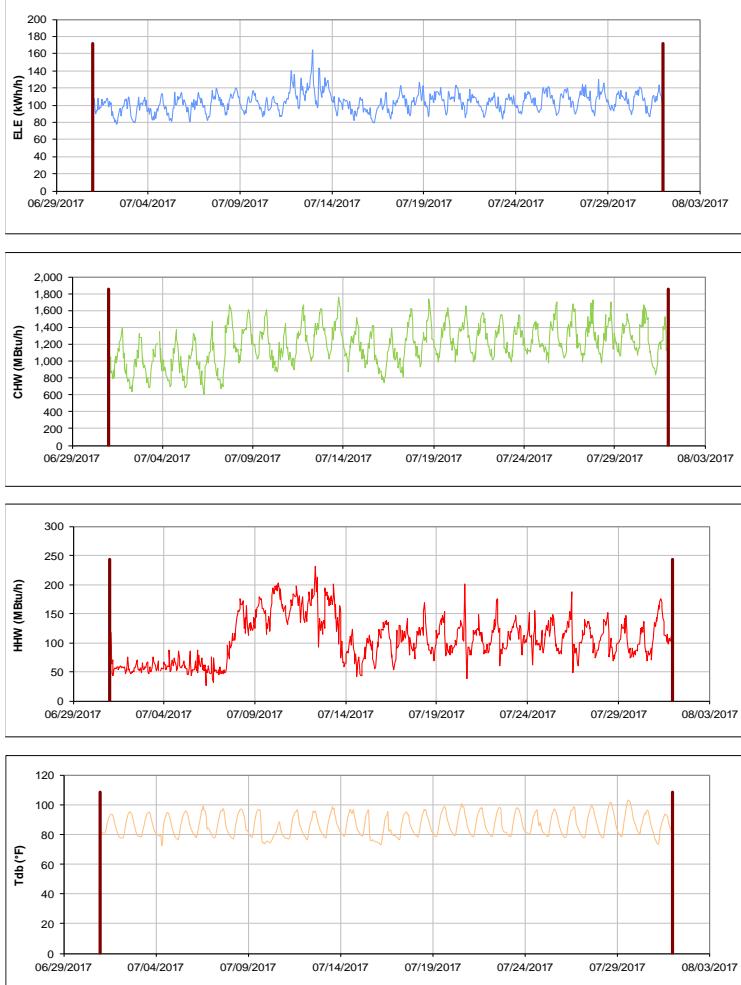

Figure III-182 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 1 and White Creek Apts Activity Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**White Creek Apartment 2**

TAMU / BLDG #: 1591

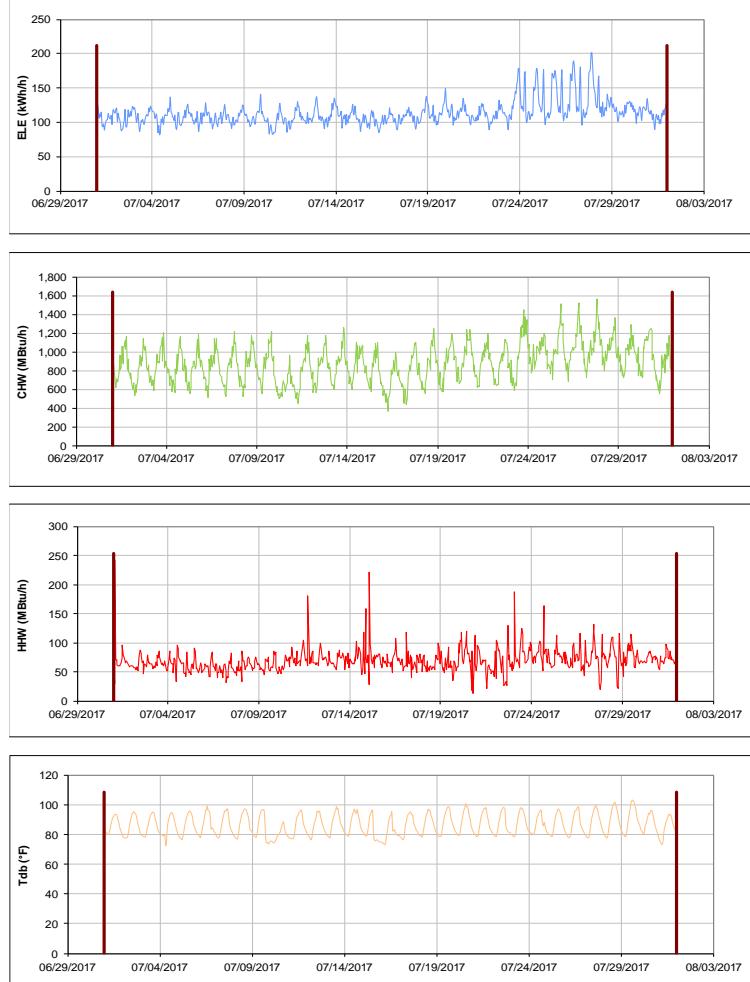

Figure III-183 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 2 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**White Creek Apartment 3**

TAMU / BLDG #: 1592

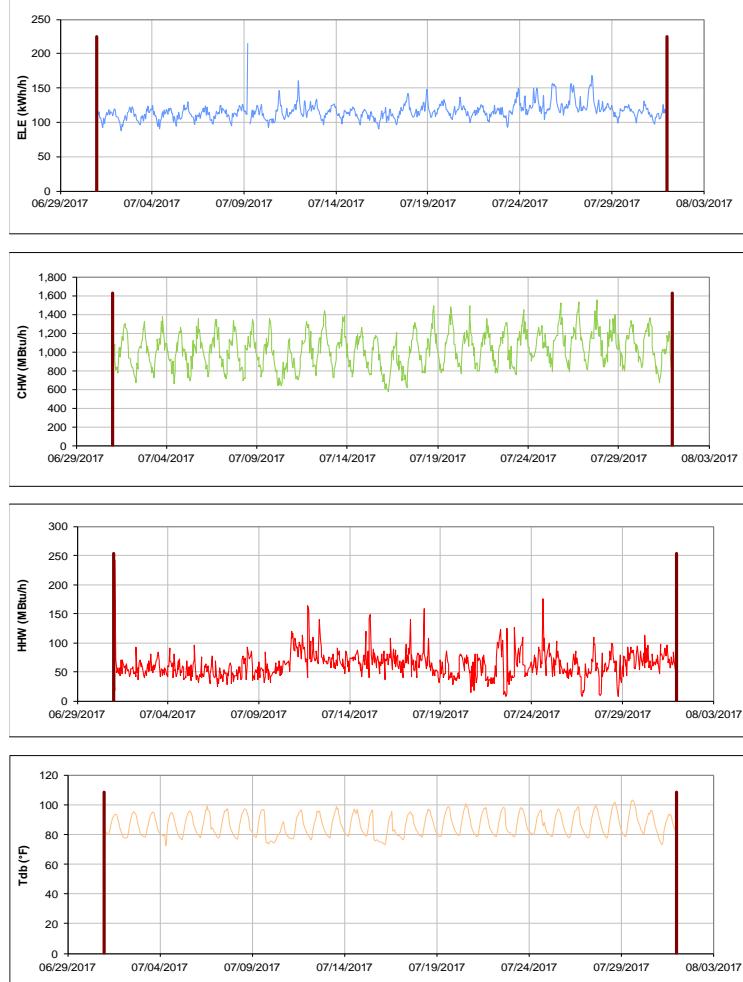

Figure III-184 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for White Creek Apartment 3 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

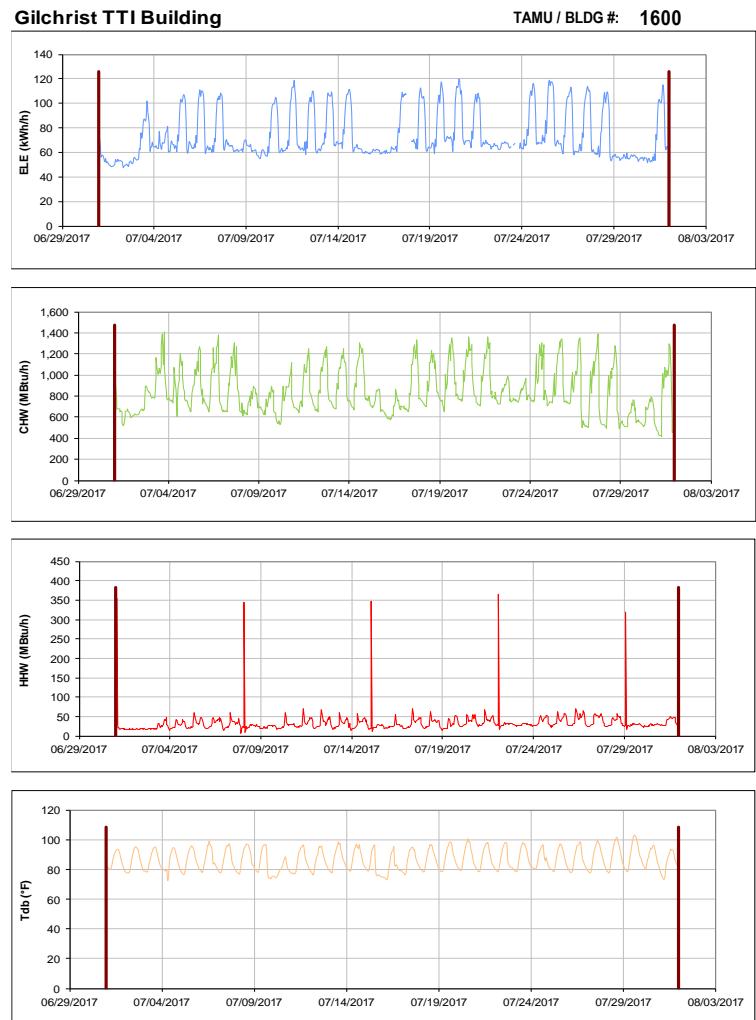

Figure III-185 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Gilchrist TTI Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

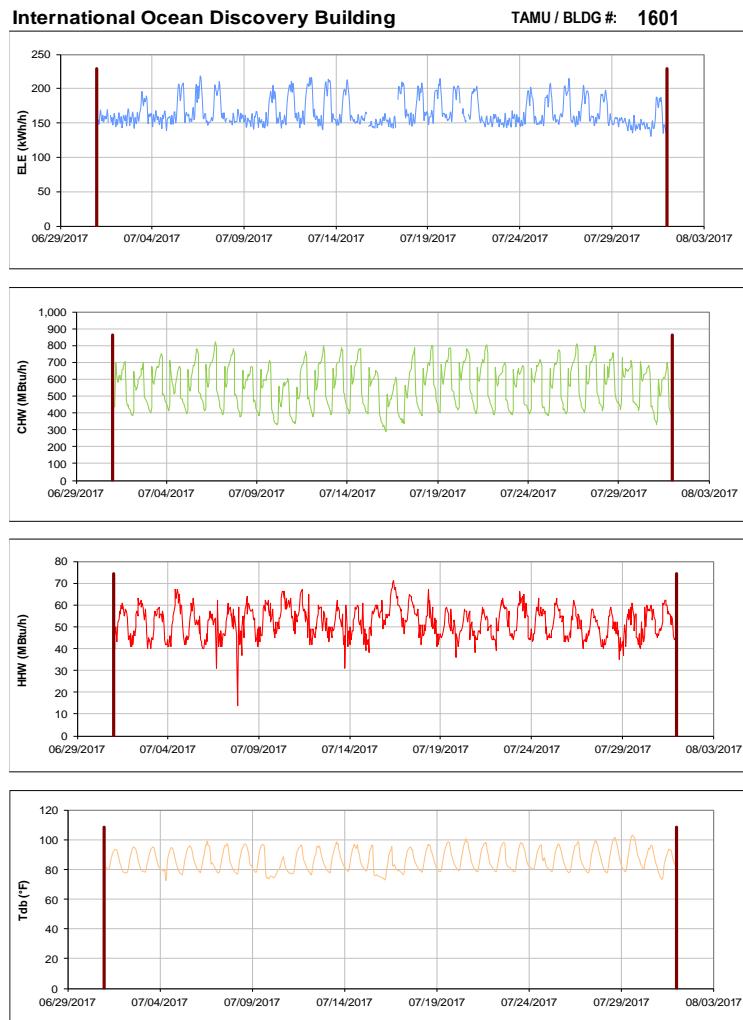

Figure III-186 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for International Ocean Discovery Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

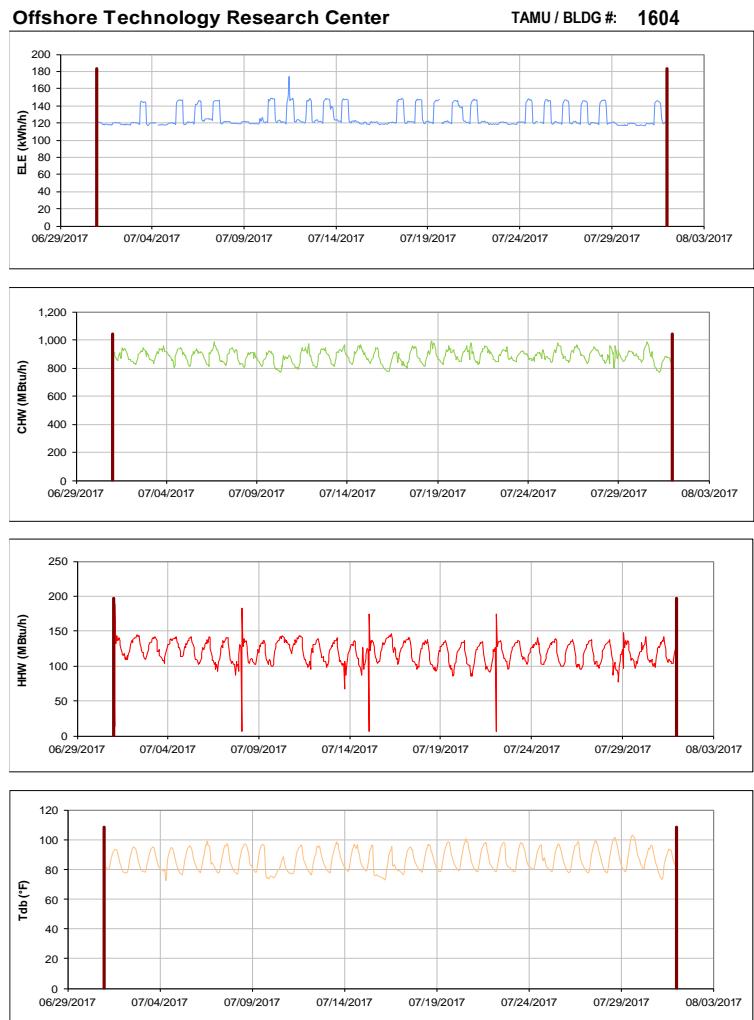

Figure III-187 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Offshore Technology Research Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

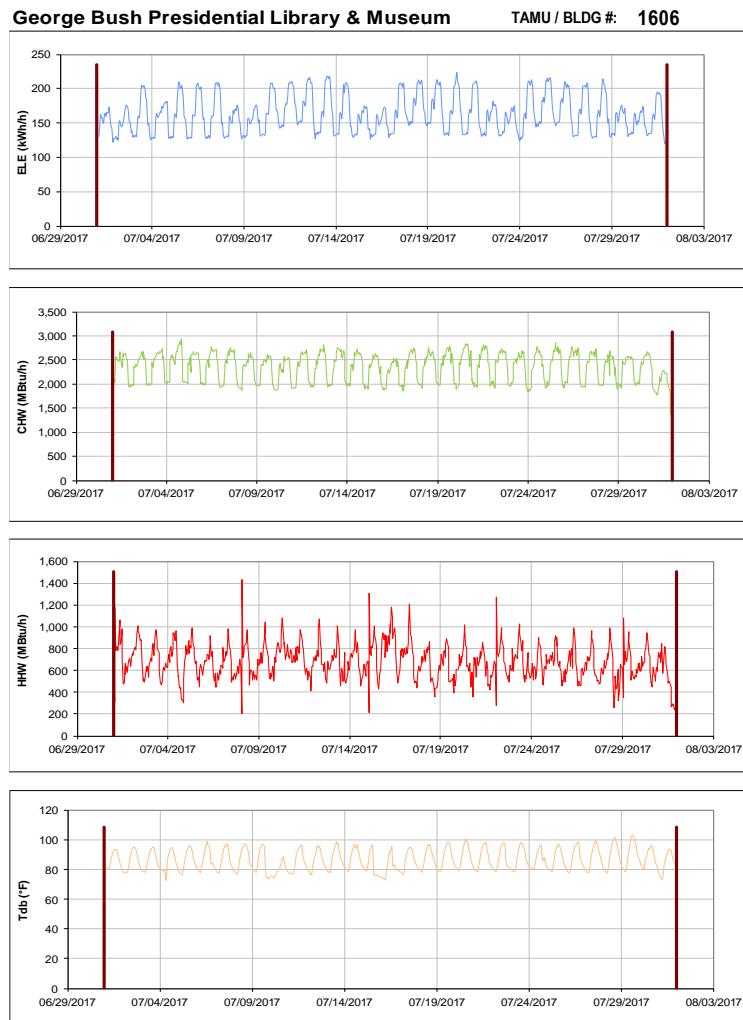

Figure III-188 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for George Bush Presidential Library & Museum during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

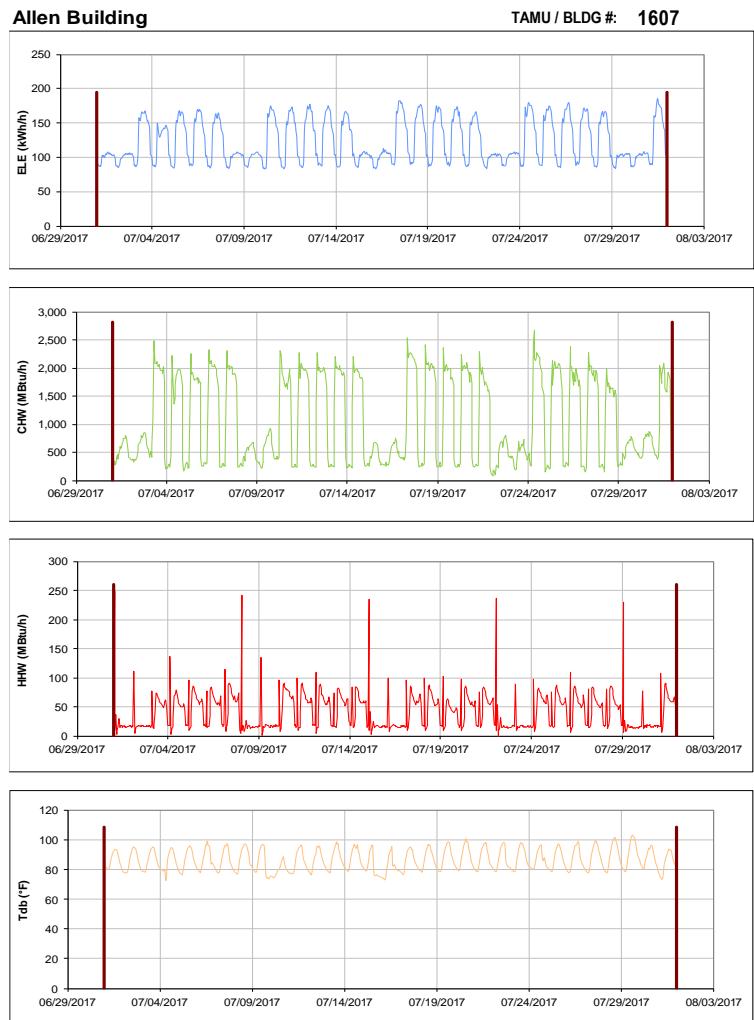

Figure III-189 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Allen Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

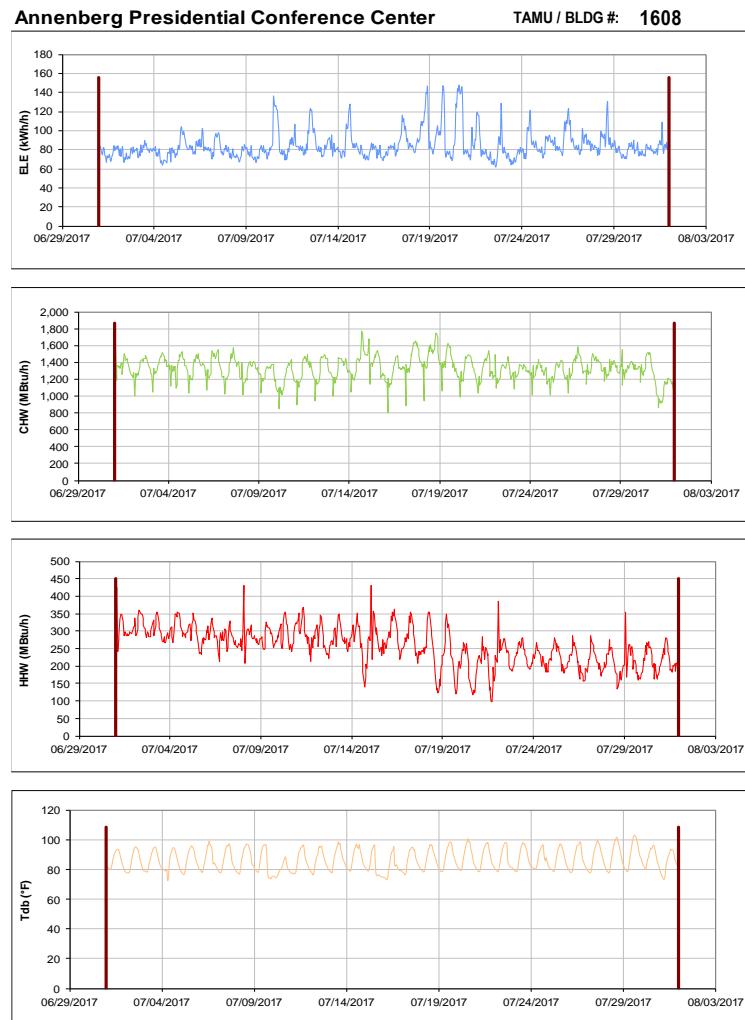

Figure III-190 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Annenberg Presidential Conference Center during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

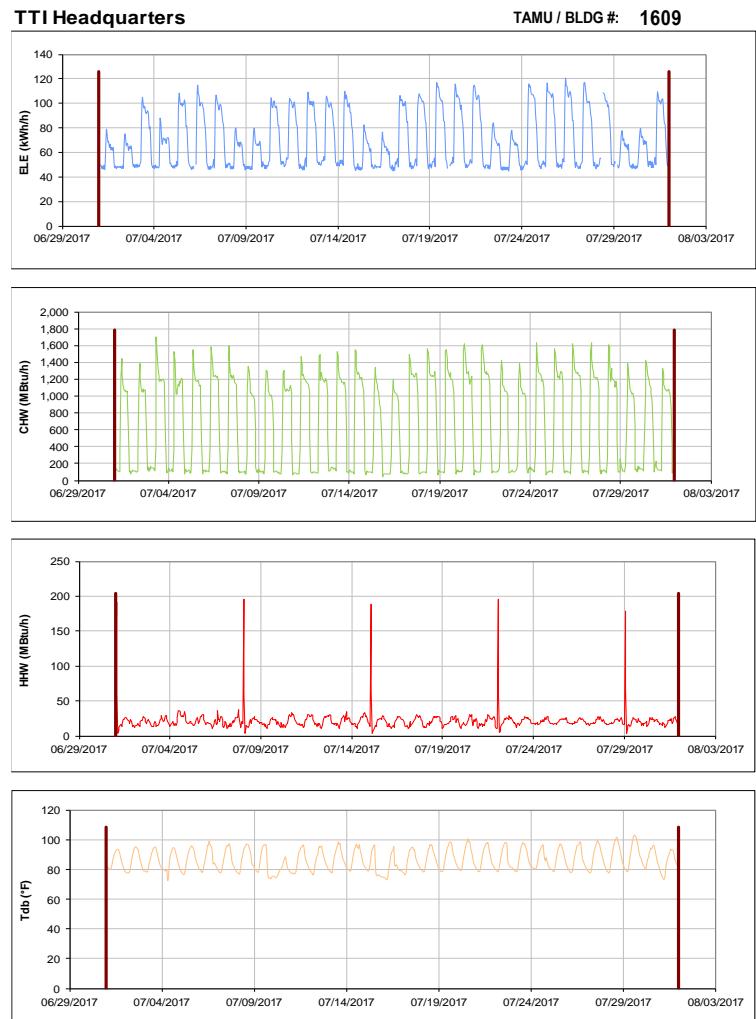

Figure III-191 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for TTI Headquarters during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

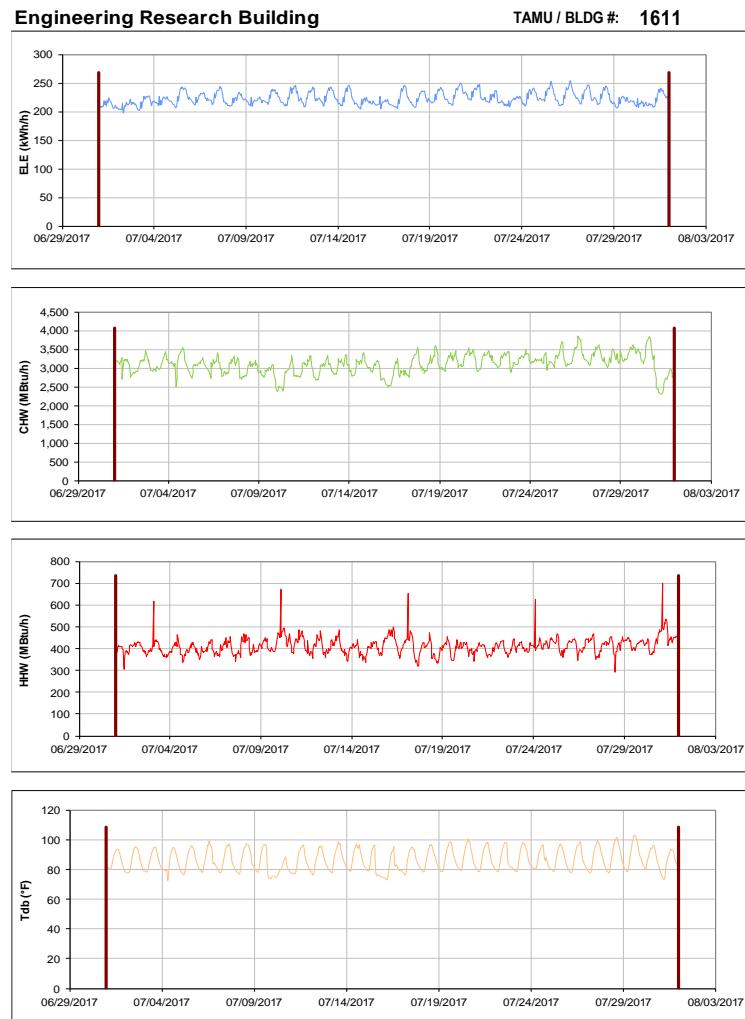

Figure III-192 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Engineering Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

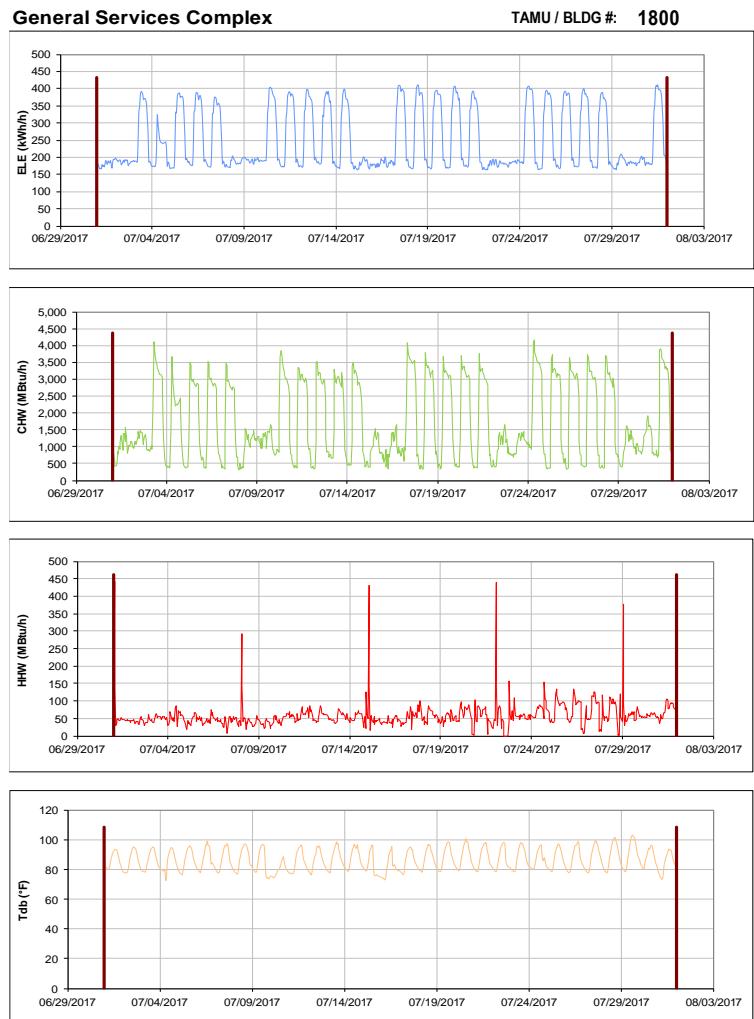

Figure III-193 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for General Services Complex during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

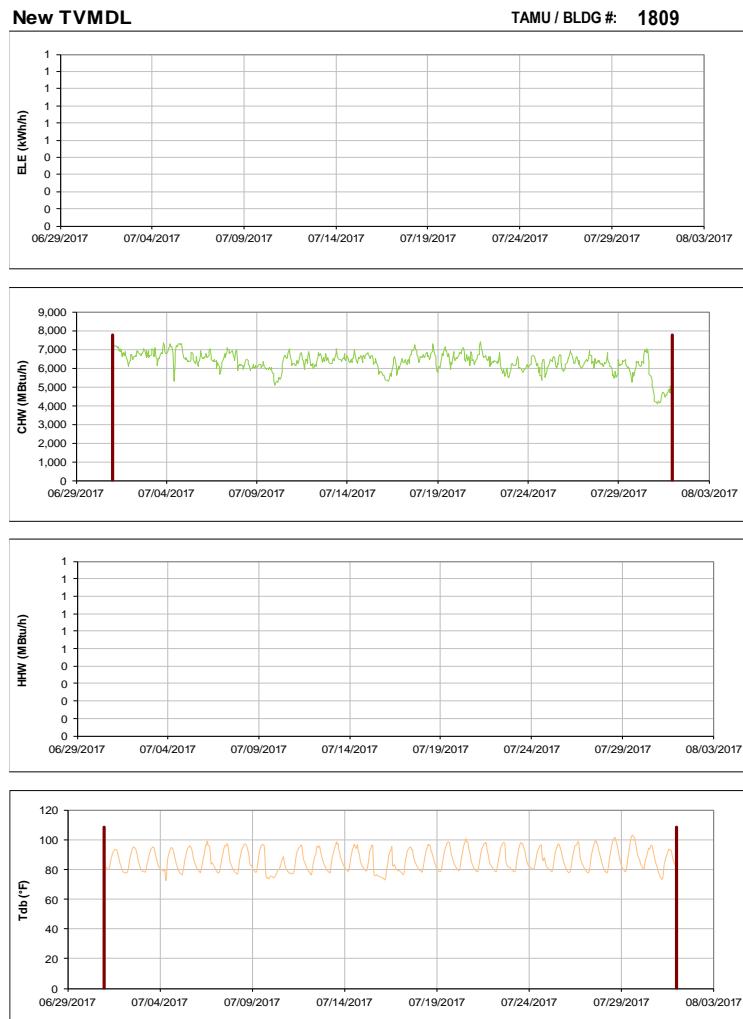

Figure III-194 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for New TVMDL during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Office of the State Chemist Building**

TAMU / BLDG #: 1810

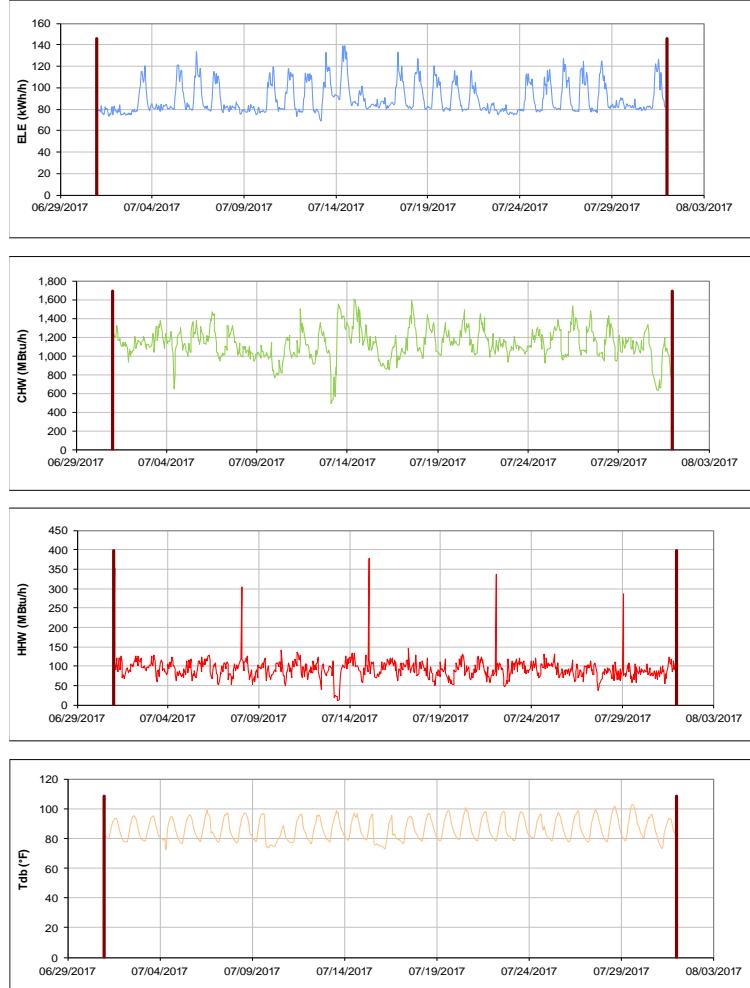

Figure III-195 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Office of the State Chemist Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Vet Med Research Bldg Addition**

TAMU / BLDG #: 1811

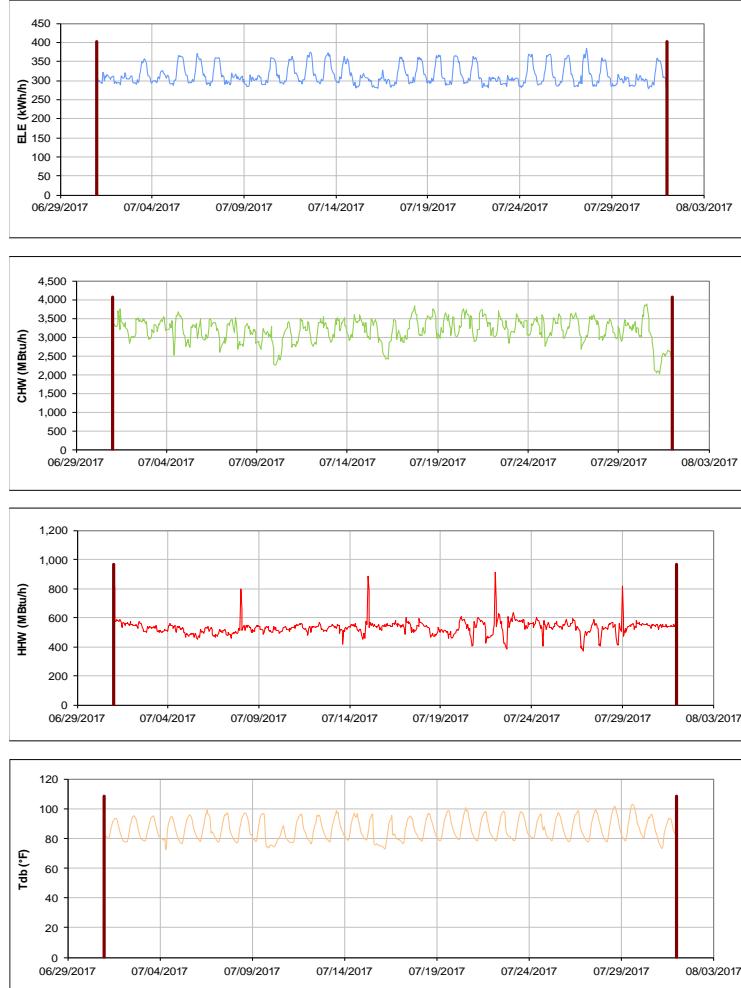

Figure III-196 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Vet Med Research Bldg Addition during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

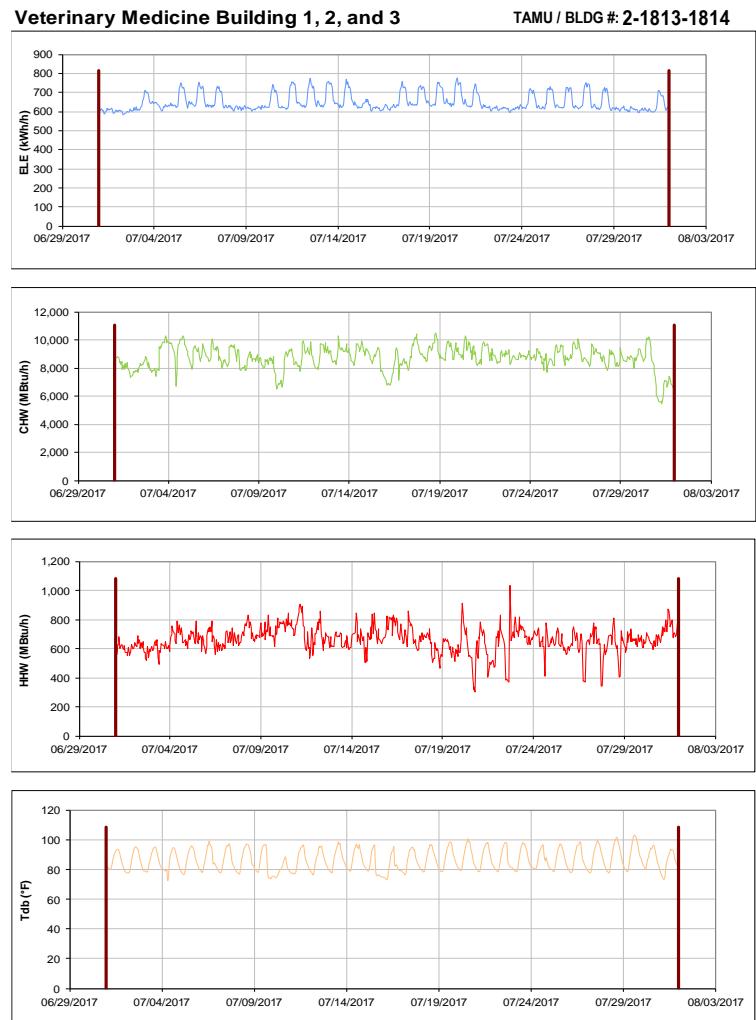

Figure III-197 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Veterinary Medicine Building 1, 2, and 3 during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

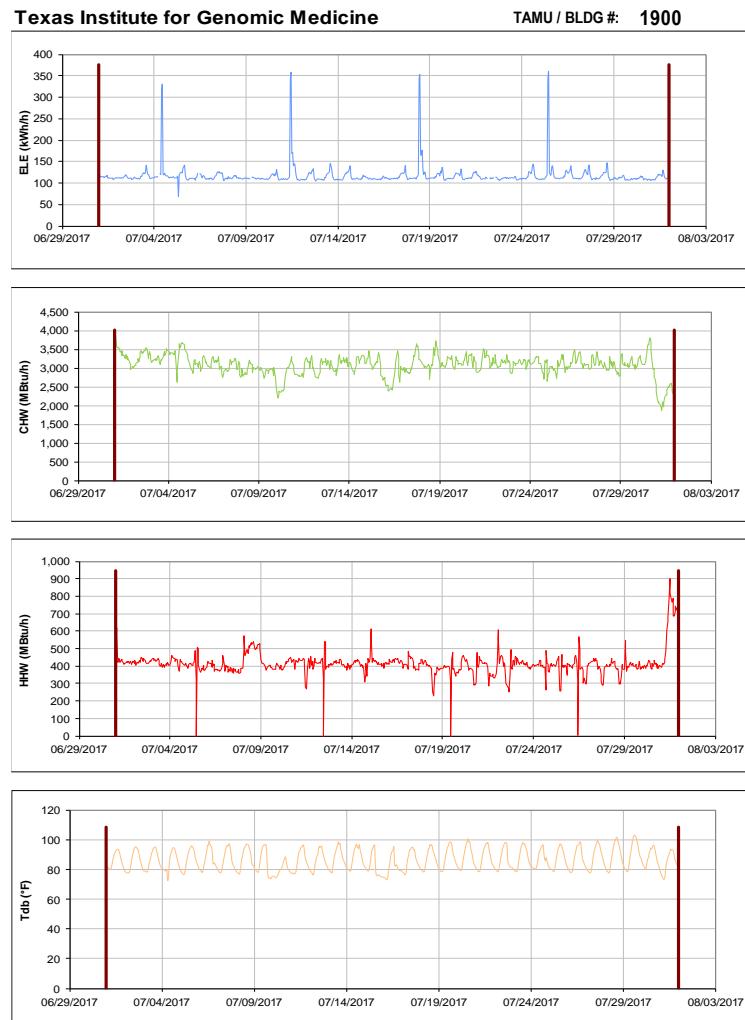

Figure III-198 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas Institute for Genomic Medicine during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

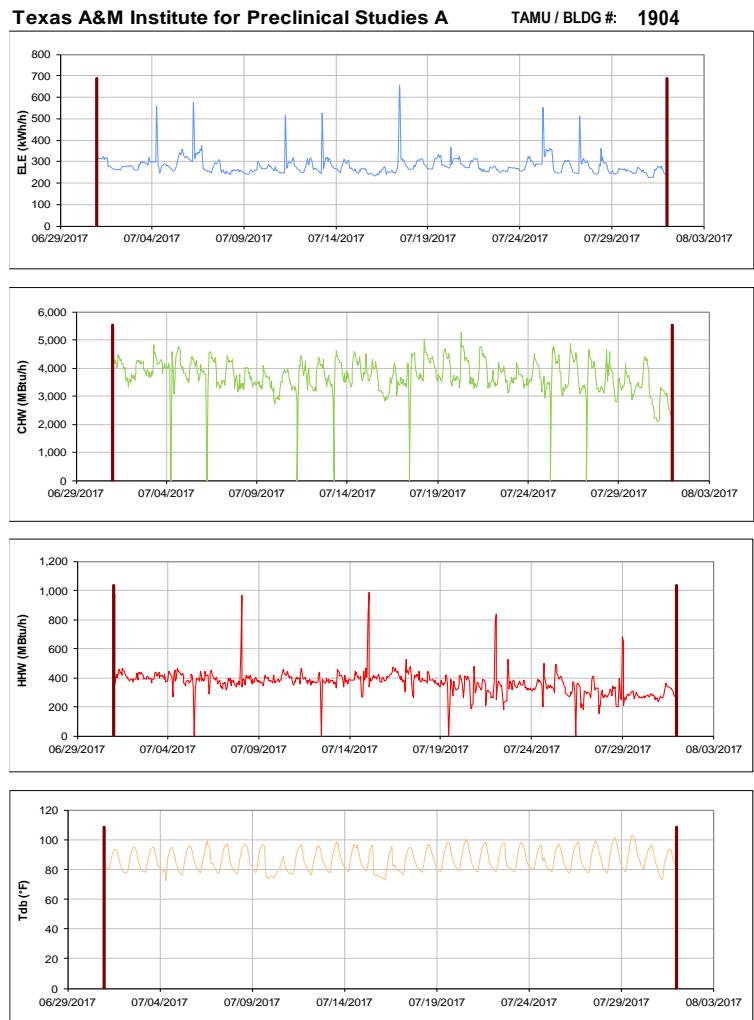

Figure III-199 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Texas A&M Institute for Preclinical Studies A during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

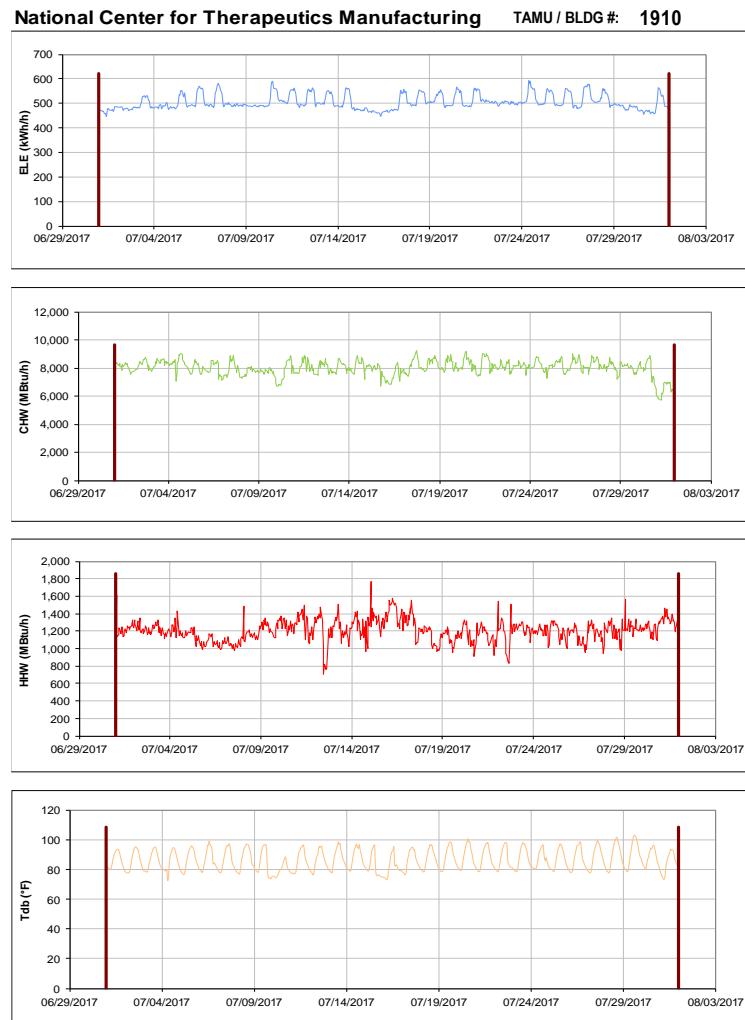

Figure III-200 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for National Center for Therapeutics Manufacturing during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**Multi-Species Research Building**

TAMU / BLDG #: 1911

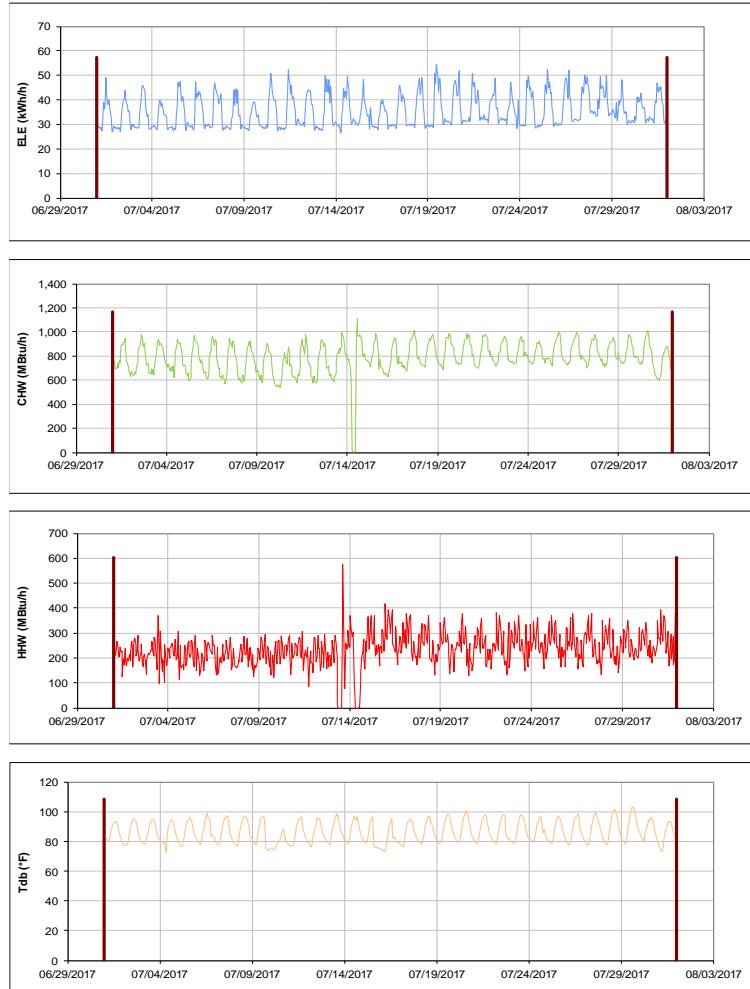

Figure III-201 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for Multi-Species Research Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

**NCTM Manufacturing Building**

TAMU / BLDG #: 10226

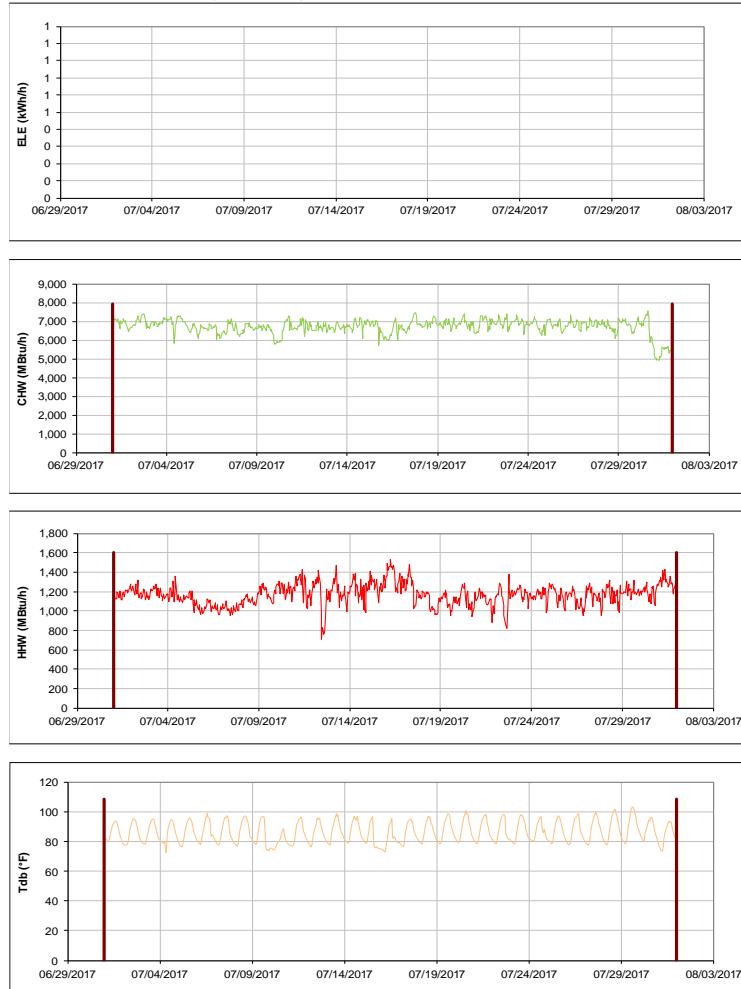

Figure III-202 Hourly Whole Building Electricity, Chilled Water, and Hot Water Consumption for NCTM Manufacturing Building during the Month of July 2017 and the Corresponding Hourly Outdoor Dry Bulb Temperature for College Station, TX

## **VI. Appendix**

ENERGY ANALYSIS GROUP

**ENERGY SYSTEMS LABORATORY**

TEXAS A&M ENGINEERING EXPERIMENT STATION

**Project:** TAMU Energy Consumption QC/QA Analysis\*

**Report:** Energy Consumption Data Quality Assurance/Quality Control  
Assessment Report for the Month of July 2017

**Prepared for:**

**Utility & Energy Services**

**Division of Administration**

**Texas A&M University**

**Authors:** Xiaoli Li, Kimberly Jones, Hongxiang Fu, Alaina Ruffin

**Dr. Juan-Carlos Baltazar, and Dr. David Claridge**

**Date:** August 2017

\* For information on this report please contact Dr. Juan-Carlos Baltazar.
