PURPOSE AND SCOPE OF THE MANUAL

The Comptrollers' Statewide Accounting Management System Procedures Manual (SAMS Manual) has been developed to assist State agencies with the operation of the statewide accounting system. Documented in this manual are the fiscal policies, accounting principles, controls, operating procedures and reporting requirements for the Statewide Accounting Management System.

Proper use of this manual will assist management of State agencies by:

indicating the method to be used for the processing of accounting information between State agencies and the Office of the Comptroller,

documenting the statewide accounting processing required so that the execution of the procedures is not completely dependent on an individual,

providing a training device and reference material for operating and supervisory personnel, and

providing a source of information to help eliminate uncertainties and confusion caused by verbal communications.

ORGANIZATION OF THE SAMS MANUAL

The SAMS Manual presents to all State agencies a standardized approach to finance and accounting matters within the area of authority of the Comptroller. The standardized approach used to provide SAMS users with access to procedures contained herein was to prepare the manual in the following format:

1. Section

The section number groups major related material together, such as Accounting Principles, Warrants and Payroll. The sections are numbered sequentially with allowance for expansion, such as 03, 05, 07, etc.

2. Sub-Section

The sub-sections within each section are generally arranged according to the following format and page numbering:

SYSTEM OVERVIEW	10
INPUT DOCUMENT PROCEDURES	20
OUTPUT DOCUMENT PROCEDURES	30
CONTROL PROCEDURES	40
REFERENCE OR SUPPLEMENTAL	50

The System Overview sub-section is devoted to a general description of the system discussed in the section. It includes the information necessary for an individual to acquire a general understanding of the system.

The Input Document Procedures sub-section explains the steps necessary to prepare the input to the system. These procedures include the forms to be used, the coding of accounting transactions, verification of the footings and calculation, the review and approval steps required and the distribution of the source document copies.

The Output Document Procedures sub-section describes each report produced by the system. These procedures describe how to interpret and use the information provided by the accounting system.

The Control Procedures sub-section describes the specific control procedures to be performed by operating personnel. Included in this sub-section are input controls to insure that all data is correctly entered into the system and the output controls to insure that the information printed on the report is complete and accurate.

The Reference or Supplemental sub-section contains reference material or other material which does not conform to the organization or scope of the above sub-sections.

3. Procedure

All procedures are numbered sequentially with allowance for expansion, such as 10, 20, 30, etc.

The first page number designates the page number of the procedure followed by the total number of pages in the procedure.

Following each procedure are exhibits (if applicable) of the material explained in the procedure. Each exhibit will be designated by a letter such as 01.10.20-A and 02.30.10-B. These exhibits will be arranged sequentially from A to Z.

4. Effective Date

The effective date designates the date on which the procedure becomes effective according to the rules and regulations issued by the Comptroller.

REVISION AND MAINTENANCE OF THE SAMS MANUAL

The SAMS Manual has been designed to facilitate the adding of new procedures and the revising of existing procedures. A master control copy of the procedures will be maintained by the Systems Administration Department of the Comptroller's Office. This Department will be responsible for updating the manual and distributing the new or corrected procedures to the State agencies.

All users of this manual are encouraged to recommend revisions to any part of the manual. Following this procedure is a Change Request Form for recording and submitting suggested changes to the Comptroller's Office. Recommended revisions should be sent to:

Comptroller's SAMS Manual Coordinator
Office of the Comptroller
325 West Adams Street
Springfield, Illinois 62704-1871

REVISION NUMBER

Whenever a procedure is revised, all revised pages will be updated and will include the year and the revision number. The first two digits of the revision number designate the fiscal year of issuance of the revision, and the next three numbers are the revisions made during the fiscal year numbered sequentially, such as:

01-001
01-002

Each new or revised page will have a vertical line in the left margin to identify specific items of change. Examples of the identification are the lines which highlight the above changes. When a completely new procedure is issued to an existing section, the term "new" will be recorded as the revision number.

REVISION CONTROL

Revised SAMS material is issued and distributed as attachments to consecutively numbered Procedure Bulletins. (See Exhibit 01.10.20-B for an example of a Procedure Bulletin.) These

Bulletins are designed to give instructions for the insertion and removal of pages, to state the purpose of the new or revised material and to specify any regulations or published instructions which are superseded. Upon receipt of each Procedure Bulletin, the recipients should place their initials following the Bulletin number on the "Remove/Insert" pages. The remove/insert pages should then be filed to document the Manual's update. A break in the continuity of "initialed" Bulletins may indicate missing issues. Each manual holder is encouraged to file all new material promptly and to call to the attention of the Comptroller's SAMS Manual Coordinator any matters that require amendment, change or revision.

AGENCY SAMS MANUAL COORDINATOR

Each agency should designate an Agency SAMS Manual Coordinator who is familiar with the agency's operations. The Coordinator's name, address and telephone number should be sent to the Comptroller's SAMS Manual Coordinator. The agency should notify the Comptroller's SAMS Manual Coordinator in writing of any change in this assignment.

All manuals and Procedure Bulletins will be sent to the Agency SAMS Manual Coordinator, who will have responsibility for distributing them to all holders of the SAMS Manual within the agency.

Suggested Procedures for the Agency SAMS Manual Coordinator:

maintain an up-to-date record of the assignment of each complete and subsidiary manual in the agency,

evaluate all agency requests for additional manuals in accordance with distribution policies,

periodically determine if all manuals in the agency are kept up-to-date and used sufficiently to warrant continued maintenance, and

reassign the SAMS Manual as necessary to achieve maximum utilization of manuals assigned to the agency.

SAMS DISTRIBUTION POLICY

This manual is designed to be a reference bank for State agencies. Accordingly, the manual should be assigned to positions and not to individuals. When an employee leaves a position to which a manual is assigned, the manual should be left for his successor.

The manual has been segmented in a manner which will permit distribution of photostatic copies of certain sections to specialized units within a State agency. For example, the Payroll Section could be furnished to individual payroll clerks of the agency, or the Voucher and Pre-Audit Section could be furnished to individual voucher clerks of the agency.

1. Additional Copies

Requests for additional copies of the SAMS Manual or a particular section of the manual should be channeled through the Agency SAMS Manual Coordinator, who will forward them to the Comptroller's SAMS Manual Coordinator. Considerable time can be saved in receiving additional manuals if all requests contain a reason for the request. Requests for additional manuals should be based on the following general guidelines.

- a. A copy of the SAMS Manual should be readily available to employees whose work is concerned with its content and who make frequent reference to it.
- b. The SAMS Manual is available on the Comptroller's web site.
- c. Whenever possible, the manual should be kept at a central point for reference and use by several employees.
- d. Consider using a subsidiary Section rather than a complete manual.

SUB-SECTION	OVERVIEW OF THE STATEWIDE ACCOUNTING SYSTEM	EFFECTIVE DATE January 1, 2005
PROCEDURE	OVERVIEW OF THE OFFICE OF THE COMPTROLLER	REVISION NUMBER 05-002

OVERVIEW OF THE OFFICE OF THE COMPTROLLER

The Comptroller is the State's Chief Fiscal Control Officer.

The Illinois Constitution of 1970 provided for the establishment of the Office of the Comptroller in 1973 to assume the duties of the former Auditor of Public Accounts, a position abolished by the new Constitution. The Comptroller's Act, defining the duties and responsibilities of the Comptroller's Office, was passed by the General Assembly in 1972. The first Comptroller, George W. Lindberg, was elected and took office in January 1973.

In addition to the former duties of the Auditor of Public Accounts, the Comptroller was assigned the following new responsibilities:

- preparation of meaningful and comprehensive statewide fiscal reports for use by State management personnel and other individuals interested in statewide fiscal activities,
- processing of warrants for income tax refunds and state universities' payrolls to facilitate the capturing of fiscal information and to centralize the warrant preparation function,
- development and issuance of statewide accounting procedures and principles for use by all State agencies to improve the classification and reporting of fiscal information, and
- maintenance of the State's fiscal accounts.

The Office of the Comptroller provides fiscal control over State spending through its voucher approval and warrant writing functions. Each day, warrants totaling millions of dollars are written on funds held by the State Treasurer. It is the Comptroller's responsibility to determine that the claims against the State are valid prior to issuing the applicable warrants.

Statewide fiscal information is primarily captured as a by-product of the Comptroller's vouchering and warrant writing systems. This information is then summarized for management reporting purposes.

DESCRIPTION OF SAMS

The Comptroller's Statewide Accounting Management System (SAMS) operates through interaction and cooperation between State agencies and the Comptroller's Office. An important function of the Comptroller's Office is to verify and approve all requests for payments to be made from funds held by the State Treasurer and to prepare financial reports necessary for fiscal management at both the individual agency and statewide levels.

Agencies participate in the operation of SAMS by submitting to the Comptroller such information as:

vouchers, requesting the Comptroller to approve payment to a vendor for goods or services rendered;

payroll information, requesting the Comptroller to prepare payroll checks for an agency;

receipt deposits, requesting the Comptroller to deposit monies with the State Treasurer;

monthly and yearly financial information reports which the Comptroller uses to prepare financial statements for all fund groups;

fund creations, deletions or transfers, requesting the Comptroller to create or delete a Treasurer-held fund or to transfer monies from one fund to another;

reversions, requesting the Comptroller to prohibit spending within an appropriation/expenditure account;

obligations, informing the Comptroller of an agency's intent to make an expenditure; and/or

appropriation transfers, requesting the Comptroller to transfer spending authority from one appropriation to another.

PROCEDURE	DESCRIPTION OF SAMS	REVISION NUMBER 02-001

The Comptroller's Office uses several computer systems which, taken together, allow the Comptroller's Office to maintain the official accounting records of the State of Illinois. At the center of these various systems is SAMS, the Statewide Accounting Management System. SAMS records and tracks the receipts, disbursements, account balances and other transaction information for all Treasury-held funds. In addition, SAMS writes all commercial warrants.

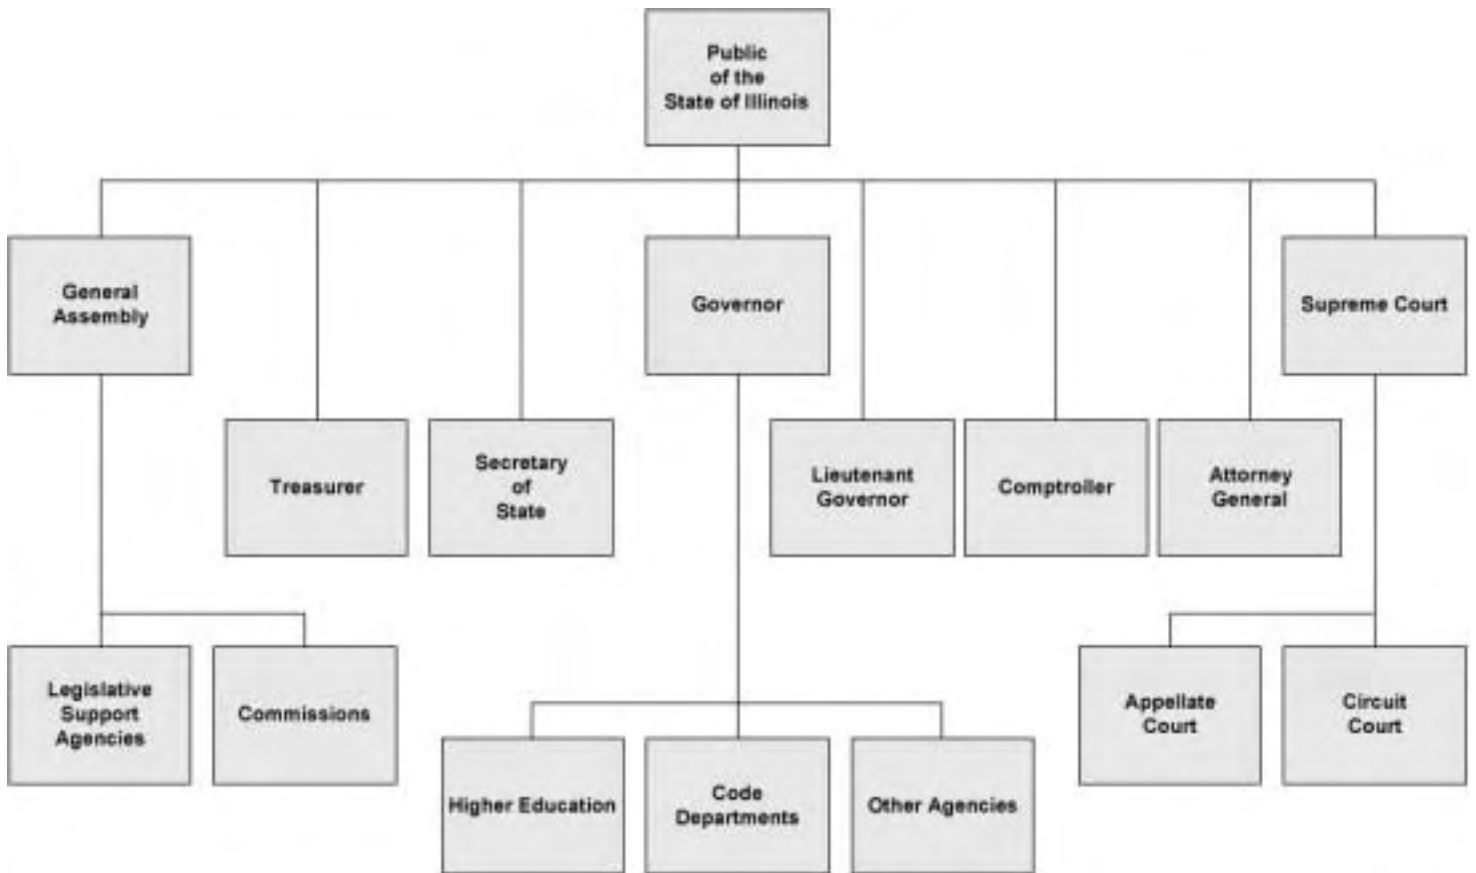

There are also separate warrant-writing systems that interface with SAMS at a summary and detail level while maintaining information that pertains to their functional areas. These interfacing systems are: payroll, retirement, public aid, State income tax refunds and replacement warrants. All warrants are sent to the State Treasurer for approval and signature prior to mailing them. Finally, the Comptroller's Office has developed an electronic funds system to accommodate those payees who desire to be paid electronically.

A diagram illustrating the functions discussed above is presented in Exhibit 01.10.40-A. Exhibit 01.10.40-B presents a simplified table of organization for the State government of Illinois.

PROCEDURE	USER RESPONSIBILITIES	REVISION NUMBER 02-001

USER RESPONSIBILITIES

The types of responsibilities a person has regarding the Comptroller's Statewide Accounting Management System (SAMS) depend upon the position within an agency and the size of the agency. In the case of larger agencies, the responsibilities may be clearly segregated as to agency head, chief accounting officer, accounting supervisors, accountants, etc. In the case of smaller agencies, such a delegation of responsibilities may not be feasible due to the limited number of persons in the agency.

The following paragraphs briefly describe the responsibilities users of the SAMS system may want to assume. These responsibilities are not intended to be all-inclusive, but are guidelines to follow.

Agency Heads

Agency heads have the overall responsibility to see that the fiscal management programs and procedures prescribed by the Comptroller are carried out. Depending on the size of the agency, the agency head may have a wide range of responsibilities. These could range from being familiar with detail processing procedures to being in a review position where he would evaluate operating results with his management staff.

Agency Accountants

Agency accountants may have the operating responsibility of supervising and training the clerical staff who perform the actual document processing. For effective training and supervision, agency accountants should have a thorough knowledge of the various invoice-voucher, receipt deposit and other forms as well as reference material, such as the charts of accounts. The review and resolution of SAMS-generated agency reconciliation reports may also be the responsibility of the chief accountant of the agency.

Agency Clerical Personnel

Agency clerical personnel usually work under the direct supervision of agency accountants who determine their specific duties and responsibilities in preparing SAMS input documents. Clerical employees will want to be thoroughly knowledgeable in operating procedures necessary for the proper performance of their duties.

"In accordance with generally accepted accounting principles applicable to Government the Comptroller shall develop and prescribe for the use of all State agencies a uniform accounting system, applying the encumbrance method of accounting and so designed as to insure compliance with all legal and constitutional requirements including those respecting the receipt and expenditure of and the accountability for public funds...."

It further states:

"...'State agencies' or 'agencies' mean all departments, officers, authorities, public corporations and quasi-public corporations, commissions, boards, institutions, State colleges and universities and all other public agencies created by the State, other than units of local government and school districts. The Comptroller shall keep accounts with respect to each State agency which shall accurately reflect the receiving, expending or contracting for the receipt or expenditure of money or other assets on behalf of the State and shall keep accounts of all amounts which may be paid into or out of the State treasury or held or paid out by the State Treasurer..."

As a result of these two directives, the Statewide Accounting Management System has been developed for use by all State agencies in order to provide meaningful financial information .

INTRODUCTION

This section provides the reader with background on the internal control evaluation and certification guidelines process. It defines the purpose and scope, and provides a background of the Fiscal Control and Internal Auditing Act legislation.

On October 31, 1989, House Bill 2031 was enacted into law as the [Fiscal Control and Internal Auditing Act](#) (the "Act" or "FCIAA.") This Act serves to repeal its predecessor Internal Auditing Act, and provides a framework for improving the systems of internal fiscal and administrative control within State government.

FCIAA contains four articles. Articles one and two revise the requirements for the Chief Internal Auditor's position, update the requirements for mandated audits, and establish an Internal Audit Advisory Board.

Article 3 addresses "fiscal control", and establishes new internal control guidelines and certification requirements. Specifically, Article 3 sets into law the current responsibility of state agencies to establish a system of internal fiscal and administrative controls. The FCIAA guidelines, which are to be established by the Comptroller in consultation with the Department of Central Management Services and approved by the Legislative Audit Commission, require the chief executive officers of all State agencies to annually certify to the Auditor General whether or not the systems of internal fiscal and administrative control fully comply with the FCIAA. The Illinois Supreme Court is permitted to establish its own procedures for annually assessing the adequacy of internal controls for state-funded activities of the judicial branch.

The Office of the Comptroller was required by this Act to establish by March 1, 1990, guidelines for: 1) state agencies to evaluate their systems of internal fiscal and administrative controls to determine whether the systems comply with the requirements of the Act, and 2) the certification by chief executive officers as required by the Act. The Act requires that all state agencies establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that:

1. Resources are utilized efficiently, effectively, and in compliance with applicable law;
2. Obligations and costs are in compliance with applicable law;

PURPOSE AND SCOPE

Fiscal Control and Internal Auditing Act of 1989

The [Fiscal Control and Internal Auditing Act of 1989](#) (FCIAA) requires each Illinois State agency to establish, maintain, and annually evaluate internal control systems sufficient to provide reasonable assurance of accountable government. Agency internal control systems must reasonably assure compliance with applicable law and effective agency management.

FCIAA requires certain designated State agencies to establish full time internal auditing programs and generally encourages the use of professional internal auditing programs as means of helping assure effective internal control systems.

FCIAA requires agency chief executive officers ("ACEOs") to annually certify to the effectiveness of agency internal control systems and, if applicable, to identify, plan, and schedule needed refinements.

FCIAA also requires the Comptroller, in consultation with the Director of Central Management Services, to establish guidelines for the required annual internal control evaluation and certification.

These guidelines are set forth and explained in this section, the following sections and related [supplement to Procedure 2](#).

ACEOs, Internal Control Systems, and Internal Auditing

The Act fixes responsibility for establishing, maintaining, and evaluating agency internal control systems squarely on ACEOs. ACEOs have very challenging jobs. They are expected to meet complex and often conflicting public needs with scarce resources.

ACEOs are expected to be problem solvers, responsive and responsible managers, effective people motivators, and statesmen who effectively balance the needs of their most direct constituents with the needs of the larger community.

ACEOs need effective internal control systems and professional internal auditing both defensively and offensively as means of assuring adherence to sound management principles.

Most ACEOs do not initially have sophisticated internal control systems or internal auditing backgrounds. These guidelines are intended to help ACEOs approach their internal control and internal auditing responsibilities and opportunities more assertively, effectively, and efficiently.

Internal Controls Defined

Broadly defined, internal controls are all of the means employed by an ACEO in managing his or her agency. That is, internal controls are all of the means used by the ACEO in getting agency personnel to achieve agency objectives.

Effective internal controls assure reasonable adherence to sound management principles. Internal control weaknesses or deficiencies indicate violations of one or more basic management principles.

Any internal control system can always be improved. Identified needs for internal control system refinements should be viewed cooperatively as management opportunities, rather than negatively as indications of past problems.

Professional Internal Auditors Are Internal Control Experts

FCIAA holds ACEOs responsible for establishing, maintaining, and evaluating agency internal control systems. To effectively meet these responsibilities, ACEOs need competent advice. Professional internal auditors with adequate resources are invaluable to an ACEO in this regard.

It takes detailed expertise in management principles and specialized information gathering, processing, and reporting skills to effectively establish and evaluate internal control systems. Professional internal auditors are management science and internal control systems examination and evaluation experts.

Wise ACEOs insist on having at their side a competent and independent chief internal auditor with adequate financial and policy resources and a commitment to professional ethics and standards.

Distinguishing Internal Auditors From External Auditors

Auditing is an independent examination and evaluation of something performed to provide an objective second opinion. Effective auditing enhances confidence in management and accountability processes. Internal and external auditing have related but distinctly different confidence enhancing roles.

Internal auditing is management oriented. Internal auditors are management team members who report to ACEOs and who are responsible for assuring that ACEOs are in a position to make optimally informed decisions.

External auditing is oversight oriented. External auditors report to other branches and levels of government and the public in the interest of assuring effective legislative and public oversight of government activities.

Distinguishing Internal Auditors From Line Managers

Agency Chief Executive Officers are fully responsible for establishing, maintaining, and annually evaluating agency internal control systems. Line managers and internal auditors are responsible for helping ACEOs meet these responsibilities.

ACEOs delegate day to day responsibilities for establishing and maintaining effective agency internal control systems to their line managers. Establishing and maintaining internal control systems are line management responsibilities, not internal auditor responsibilities.

Line managers should thoroughly document agency internal control systems in a narrative file. Any changes in programs, applicable law, job descriptions, responsibility assignments, etc. should be recorded in this file on a timely basis.

Internal auditors should be independent of line managers and free of line management responsibilities. In this way, internal auditors can provide ACEOs with objective evaluations of agency internal control systems.

What Type of Annual Internal Control Evaluation is Required?

There is no one "right" way to evaluate internal control systems. Rigid rules and extensive prescriptions of mandatory evaluation procedures are generally counterproductive of effective evaluations.

The acceptability of particular approaches to annual internal control evaluations is determined by their results. Effective internal control evaluations enlighten agency chief executive officers and line managers and produce steadily improving internal control systems.

Determination of the appropriate specific form and content of agency annual internal control evaluations is necessarily a matter of professional judgment. However, they should always provide persuasive evidence to support conclusions as to the effectiveness of existing controls and needed refinements.

Agency annual internal control evaluations should be designed to assure that agency internal control systems meet the internal control objectives identified in the Act. They should determine the extent

to which agency internal control systems assure adherence to sound general management principles, adherence to sound governmental management principles, and compliance with applicable law.

Do Agency Internal Control Systems Meet the Objectives Identified in the Act?

FCIAA requires the annual evaluation of the extent to which agency internal control systems assure that:

1. Resources are utilized efficiently, effectively, and in compliance with applicable law;
2. Obligations and costs are in compliance with applicable law;
3. Funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation;
4. Revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and
5. Funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist.

Do Agency Internal Control Systems Assure Adherence to Basic Management Principles?

Sound management entails persistence in a refining cycle of planning, controlling, and evaluating activities focusing at all times on both goals and objectives and the means used to achieve them. In management science literature, the term control is used both narrowly to describe the central controlling element of the planning, controlling, and evaluating management cycle and more broadly to describe the entire cycle.

Clear goals and objectives are established, and means reasonably likely to achieve them are planned. The planned means are used to control operations in the attempt to achieve the established goals and objectives. Both goals and objectives and means are systematically evaluated and refined on an ongoing basis in light of experience and circumstances.

Annual agency internal control evaluations should determine the extent to which agency internal control systems assure refining persistence in this basic management cycle.

Do Agency Internal Control Systems Assure Adherence to Governmental Management Principles?

Sound governmental management entails the identification and prioritization of public needs, the justification of planned and actual government activities in terms of prioritized public needs, and the establishment of formal funding policies that fairly and candidly determine which present and future taxpayers pay for which government activities.

Annual agency internal control evaluations should determine the extent to which agency internal control systems assure sound government management.

Do Agency Internal Control Systems Assure Compliance With Applicable Law?

In our system of government, the people are sovereign and the responsibilities for planning, controlling, and evaluating government activities are shared by separate branches and levels of government. Government activities are authorized and constrained by laws designed to assure effective legislative and public oversight and accountable government.

Annual agency internal control evaluations should determine the extent to which agency internal control systems assure compliance with applicable law.

Where applicable law is contradictory or otherwise counterproductive of sound management, ACEOs are responsible for informing the public and other branches and levels of government.

Are Needed Refinements in Agency Internal Control Systems Effectively Communicated?

ACEOs should state on their annual internal control system certifications whether agency internal control systems meet the internal control objectives identified in FCIAA on the date of the certification.

Where agency internal control systems do not provide reasonable assurance of sound management and compliance with applicable law, the Act requires ACEOs to identify, plan, and schedule needed refinements in their annual internal control certifications.

ACEO annual internal control certifications should be clear and to the point. To the extent possible, they should be stated in a positive tone and in positive terms. For each needed refinement, the ACEO's annual internal control certification should clearly and concisely communicate the condition observed, the criteria used to evaluate the condition, its effect on internal control system effectiveness, and the cause of the condition.

Who Should Perform Annual Agency Internal Control Evaluations?

ACEOs, their line managers, and internal auditors all have roles in annual agency internal control evaluations. ACEOs are fully responsible for assuring effective annual evaluations. Line managers and internal auditors are responsible for helping them meet that responsibility.

Line managers should review findings from prior internal and external audits and determine the extent to which they have been resolved. They should also review needed refinements in agency internal control systems identified in prior annual evaluations and determine the extent to which they have been affected.

Line managers can and should also use appropriately designed internal control checklists and questionnaires to help themselves understand the nature and importance of effective internal controls and to help determine the extent to which needed controls are in place, adequately designed, and effectively applied.

However, since no one can objectively evaluate their own performance, there are limits to the effectiveness with which line managers can evaluate agency internal control systems. Competent and independent internal auditors have the technical expertise and objectivity that are required for effective internal control evaluations.

Evaluations in Agencies With Sufficient Internal Auditing Resources

Agencies with professional internal audit units with sufficient resources will generally already be, in effect, performing the annual internal control evaluations required by the Act. In such agencies, internal auditors will already be performing audits of agency internal control systems pursuant to the two-year internal audit cycle contemplated by the Act.

Reliance on relevant audit work performed in these cycles for purposes of the required annual evaluations is altogether appropriate. The Act's requirement for annual internal control evaluations is not intended to require redundant evaluation work. On the contrary, it is intended to encourage ACEOs to establish and thoughtfully employ professional management oriented internal auditing programs on an ongoing basis.

Agency chief internal auditors should be responsible for advising ACEOs on the establishment and maintenance of effective internal control systems and for coordinating and overseeing the annual internal control evaluation.

ACEOs and chief internal auditors should work together to assure the availability of sufficient competent audit resources and the development and implementation of a responsive and responsible agency internal audit program.

Evaluations in Other Agencies

Agencies with internal audit units lacking sufficient resources should re-evaluate their approach to internal auditing. Agencies presently lacking professional internal auditing capabilities should investigate opportunities for obtaining them. In the meantime, these agencies should seek internal auditing assistance from the Department of Central Management Services, as provided for in FCIAA.

Agencies without professional internal auditing capabilities must nevertheless perform annual internal control evaluations consistent with these guidelines. The sample evaluation program, procedures, and checklists included in the detailed guidelines document and supplement portions of these guidelines should prove helpful in these instances.

Guidelines Manual and Related Supplement

The detailed evaluation program, and specific procedures and checklists set forth in the following sections and separate detailed checklist, illustrate just one of many possible approaches to the annual internal control evaluations required by the FCIAA.

There is no intent in these guidelines to suggest that the manual's specific approach is mandatory or optimum. They are intended primarily to assist ACEOs and line managers in agencies lacking sufficient competent internal auditing resources.

Importance of ACEO Attitudes Toward Internal Controls and Internal Auditing

The most critical step toward effective agency internal control systems is convincing line managers that effective internal controls are in their own, the agency's, and the public's best interests.

ACEOs must lead by example with respect to internal control systems. Sustained effective internal control systems are possible only where ACEOs maintain and demonstrate a positive and insistently supportive attitude toward them and toward internal auditing.

Line managers take their cues from their ACEOs. Where line managers are not convinced that effective internal controls are the top priority of the ACEO, effective internal controls won't be their top priority either.

Continuing Education Essential to Effective Internal Control Systems

Agency chief executive officers are responsible for assuring that their line managers understand the nature, purposes, and importance of effective internal control systems.

To assist agency chief executive officers in meeting this responsibility, the Internal Audit Advisory Board created by the Act should consider developing annual continuing professional education sessions for agency chief executive officers. ACEOs should attend and participate personally, and bring their chief internal auditor and key line managers with them.

These sessions should be designed to inform and enlighten ACEOs regarding their internal control responsibilities and opportunities. They should also be designed to encourage closer professional relationships between agency chief executive officers and chief internal auditors.

STATUTORY REFERENCE

The statutory authority requiring the Comptroller to establish procedures for State agencies to evaluate their systems of internal fiscal and administrative controls and for certification by State agency chief executive officers is contained in the Fiscal Control and Internal Auditing Act ([30 ILCS 10/1001](#)).

AN ACT in relation to the fiscal control and internal auditing of State agencies, repealing the Internal Auditing Act. P.A. 86-936, amendatory veto overridden Oct. 31, 1989, eff. Jan. 1, 1990.

ARTICLE 1. GENERAL PROVISIONS

1001. Short title. This Act may be cited as the Fiscal Control and Internal Auditing Act.

1002. Public policy. It is the policy of this State that the chief executive officer of every State agency is responsible for effectively and efficiently managing the agency and establishing and maintaining an effective system of internal control.

1003. Definitions.

(a) "Designated State agencies" include the offices of the Secretary of State, the State Comptroller, the State Treasurer, and the Attorney General, the State Board of Education, the State colleges and universities, the Illinois Toll Highway Authority, the Illinois Housing Development Authority, and other State agencies designated by the Governor under Section 2001.¹

(b) "State agency" means that term as defined in the Illinois State Auditing Act, as now or hereafter amended,² except the judicial branch which shall be covered by subsection (c) of Section 2001 and Section 3004 of this Act.³

(c) "Chief executive officer" includes, respectively, the Secretary of State, the State Comptroller, the State Treasurer, the Attorney General, the State Superintendent of Education, such chief executive officers as are designated by the governing board of each State college and university, the executive director of the Illinois Toll Highway Authority, and the executive director of the Illinois Housing Development Authority, as well as the chief executive officer of each other State agency.

ARTICLE 2. INTERNAL AUDITING

2001. Program of internal auditing.

(a) Each designated State agency shall establish a full-time program of internal auditing. The Governor shall designate State agencies under this Act not later than April 1 of each odd numbered year. The designations shall be filed with the Index Division of the Office of the Secretary of State as a public record. The Legislative Audit Commission may make formal recommendations to the Governor that the Governor designate other State agencies under this Act.

(b) The chief executive officer of a State agency is not relieved from the responsibility for maintaining an effective internal control system merely because that State agency is not designated and required to have a full-time program of internal auditing under this Act. Agencies which do not have full-time internal audit programs may have internal audits performed by the Department of Central Management Services.

(c) The Supreme Court will establish by its rulemaking authority or by administrative order a full-time program of internal auditing of State-funded activities of the judicial branch, which is consistent with the intent of this Article.

2002. Qualifications of chief internal auditor.

(a) The chief executive officer of each designated State agency shall appoint a chief internal auditor with a bachelor's degree, who is either:

(1) a certified internal auditor by examination or a certified public accountant and who has at least 4 years of progressively responsible professional auditing experience; or

(2) an auditor with at least 5 years of progressively responsible professional auditing experience.

(b) The chief internal auditor shall report directly to the chief executive officer and shall have direct communications with the chief executive officer and the governing board, if applicable, in the exercise of auditing activities. All chief internal auditors and all full-time members of an internal audit staff shall be free of all operational duties.

2003. Internal auditing program requirements.

(a) The chief executive officer of each designated State agency shall ensure that the internal auditing program includes:

(1) A two-year plan, identifying audits scheduled for the pending fiscal year, approved by the chief executive officer before the beginning of the fiscal year. By September 30 of each year the chief internal auditor shall submit to the chief executive officer a written report detailing how the audit plan for that year was carried out, the significant findings, and the extent to which recommended changes were implemented.

(2) Audits of major systems of internal accounting and administrative control conducted on a periodic basis so that all major systems are reviewed at least once every 2 years. The audits must include testing of:

(A) the obligation, expenditure, receipt, and use of public funds of the State and of funds held in trust to determine whether those activities are in accordance with applicable laws and regulations; and

(B) grants received are made by the designated State agency to determine that the grants are monitored, administered, and accounted for in accordance with applicable laws and regulations.

(3) Reviews of the design of major new electronic data processing systems and major modifications of those systems before their installation to ensure the systems provide for adequate audit trails and accountability.

(4) Special audits of operations, procedures, programs, electronic data processing systems, and activities as directed by the chief executive officer or by the governing board, if applicable.

(b) Each chief internal auditor shall have, in addition to all other powers or duties authorized by law, required by professional ethics or standards, or assigned consistent with this Act, the powers necessary to carry out the duties required by this Act.

2005. Internal Audit Advisory Board.

(a) An 11 member Internal Audit Advisory Board is created.

(b) The composition of the Board shall be as follows:

- (1) the chief internal auditor of the Department of Central Management Services;
- (2) the chief internal auditor of the Office of the State Comptroller;
- (3) the chief internal auditor of the Office of the Secretary of State;

INTERNAL CONTROLS IN GOVERNMENT

INTERNAL CONTROL DEFINED

Internal control is the overall plan of organization and all the coordinate methods a government uses to: safeguard its assets; ensure the reliability of its accounting data; promote efficient operations and ensure compliance with established governmental policies, laws, regulations and contracts.

A system of internal control pertains to more than the functions of accounting and financial reporting in State agencies. It pertains to the operation of each and every function of State government; all Constitutional Officers and State agencies. It pertains to your agency. In these guidelines, the word "agency" refers to any executive branch agency, independent agency, or other establishment of State of Illinois government except the judicial branch. (See the glossary for a complete definition of State "agency".)

Control Systems

Control systems embrace two elements: administrative controls and internal accounting (fiscal) controls. **Administrative controls** are the broad controls on all activities which officials use to accomplish their objectives (e.g., planning, organization, productivity monitoring and improvement, and quality control) economically, efficiently, and effectively. **Fiscal controls** are the controls on authorizing, processing, recording, and reporting transactions. Fiscal controls are part of the administrative controls environment.

Administrative controls are typically designed to encourage adherence to managerial policies and to promote operational efficiency. Fiscal controls deal primarily with safeguarding assets and the accuracy and reliability of financial reports. The two elements of control frequently overlap. For example, procedures designed to assure timely assessment, billing and collection of revenues help to safeguard assets and also promote efficiency. Internal audits or special productivity reports, which test compliance with established fiscal and administrative controls or objectives, are important ingredients of a system of internal control.

Fiscal and administrative controls are most effective when:

1. Key control duties and responsibilities are separated among different employees,

2. Responsibilities of all personnel are assigned and clearly communicated,
3. There exists checks and balances on clerical activities, with a minimum duplication of effort, and
4. Feedback mechanisms such as special reports, internal audits, etc. are monitored to assure conformance over time.

Perhaps the best way to understand the concept of internal control is to speculate "What can go wrong with my operation?" and "What can I do to prevent it?" Some examples are as follows:

What Can Go Wrong?

- | <u>Problem</u> | |
|----------------|---|
| 1. | Payment for materials or services not received. |
| 2. | Vendors complain about late payments of invoices. |

What Can I Do To Prevent It?

- | <u>Prevention</u> | |
|-------------------|--|
| 1. | Make certain that invoices are prepared for payment only after there is adequate documentation supporting the ordering and receipt of the materials or services verified by separate individuals. |
| 2. | Documentation supporting the ordering and receipt of materials or services should be promptly forwarded to the individual responsible for payment who promptly verifies and processes the invoice for payment. |

<p>4. Payroll checks are issued to individuals who never worked for the agency.</p>	<p>4. Payroll processing should be based upon authorized positive time records. Time records should be verified by supervisors who are in positions to know that services were rendered to the agency.</p>

In summary, internal control is the plan of organization and methods and procedures adopted by management at all levels to insure that:

- Resource use is consistent with laws, regulations and policies,
- Resources are safeguarded against waste, loss, and misuse, and
- Reliable data is obtained, maintained and fairly disclosed in reports for decision makers.

INTERNAL CONTROL STANDARDS

Internal control provides management with reasonable assurance that 1) financial and other resources are safeguarded from unauthorized use or disposition; 2) transactions are executed in accordance with related authorizations; 3) financial and statistical records and reports are reliable; 4) applicable laws, regulations, policies and contractual/grant provisions are adhered to; and 5) resources are effectively and efficiently managed.

To accomplish these objectives, certain basic standards must be present in any effective system of internal control. The general standards are: reasonable assurance of achieving control objectives, supportive attitude, competent personnel, and control objectives and techniques. Specific standards which are central to the standard of control objectives and techniques involve: documentation; recording of transactions and events; execution of transactions and events; separation of duties; adequacy of supervision; access to and accountability for resources; and, efficient and effective use of resources. An explanation of each basic standard follows:

Reasonable Assurance

Internal control systems shall provide reasonable, but not absolute, assurance that the objectives of the system will be accomplished. This standard recognizes that the cost of internal controls should not exceed the benefits derived. Reasonable assurance means a satisfactory level of confidence given considerations of costs, benefits and risks.

Supportive Attitude

Executives, managers and employers must maintain and demonstrate a positive and supportive attitude toward internal controls at all times. This means that all individuals will be attentive to internal control matters and take steps to promote the effectiveness of the controls.

Competent Personnel

Executives, managers and employees must have high standards of personal and professional integrity and must be competent, by education, training and experience to discharge their responsibilities.

Control Objectives and Techniques

Internal accounting and administrative control objectives to be identified or developed for each agency's activity must be logical, applicable and reasonably complete. This recognizes the uniqueness of each agency and requires the objectives and techniques be tailored to an agency's operations. Techniques are the mechanisms by which objectives are achieved. They include, but are not limited to such things as specific policies, procedures, plans of organization (including separation of duties), and physical arrangements (such as locks and fire alarms). Techniques must be structured to insure that the control objectives are being achieved. Techniques must be effective and efficient.

Documentation

Written procedures and flowcharts must be prepared to adequately document the internal control systems and processes for authorizing, executing, and recording transactions. Such documentation must be easily accessible for examination.

Recording of Transactions and Events

Transactions must be recorded as executed, and be properly classified. This means that financial transactions and significant program activities and events must be promptly and accurately recorded if they are to be useful to management in controlling operations and making decisions.

This applies to all of the processes associated with the transaction or event, including its initiation and authorization, all aspects while it is in process, and its final classification in all levels of summary records of the State. Proper classification is the organization and format of information or summary records from which reports and statements are prepared.

Execution of Transactions and Events

Agencies must maintain independent evidence that authorizations are issued by persons acting within the scope of their authority and that transactions and events conform with the terms of the authorizations. Management's decisions to exchange, transfer, use or commit resources for specified purposes are covered by this standard. This evidence assures that only valid transactions and other events are entered into. The conditions and terms of authorization should be clearly communicated to managers and employees.

Separation of Duties

Key duties and responsibilities such as authorizing, processing and recording transactions or events, issuing or receiving assets, making payments and reviewing or auditing transactions should be separated among individuals to minimize the risk of loss. Internal control relies largely on eliminating opportunities to conceal errors or irregularities. No one individual should control all key aspects of a transaction or event. Duties and responsibilities should be assigned systematically to a number of individuals to ensure that effective checks and balances are in place and are routinely practiced. The work of one employee serves to verify that of another and any errors which occur tend to be detected promptly.

Adequacy of Supervision

Qualified and continuous supervision must be provided to achieve internal control objectives. This means that supervisors must review and approve the assigned work of their staffs. They must provide necessary guidance and training to their staffs to minimize errors, waste, and wrongful acts and to achieve specific management policies and directives.

Access to and Accountability for Resources

Access to resources and records must be limited to authorized individuals. Supervisors must assign accountability for the custody and use of resources. Supervisors must periodically reconcile resources to the related records of accountability. The frequency of the comparison shall be based on the vulnerability of the asset.

Efficient and Effective Use of Resources

Resources are to be used as economically as possible. This happens when actual program output is achieved at the lowest reasonable cost. Program managers should develop administrative techniques which measure the efficiency and effectiveness of organizational performance. Periodically, performance data should be compared with realistically established goals, objectives, and statutory mandates.

The remaining sections of these guidelines provide suggestions to assist agencies in evaluating and improving their accounting and administrative control systems and procedures.

**INTERNAL FISCAL AND ADMINISTRATIVE
CONTROL REVIEW OBJECTIVES**

This section identifies and describes internal fiscal and administrative control objectives associated with the eleven major event/transaction cycles commonly found in Illinois State agencies.

The purpose of this section is to help agency chief executive officers identify the major event/transaction cycles and associated control objectives that need to be considered when performing internal control reviews. The list is neither all-inclusive nor mandatory. Agencies will probably operate transaction/event cycles not included on the list and certainly not operate all cycles included in the list. Also, all internal control objectives listed may not be appropriate for a particular situation.

Accordingly, each agency should use this list as a guide to identify appropriate transaction/event cycles and develop internal control objectives for its programs and administrative functions that are consistent with the overall objectives and requirements of the FCIAA and these guidelines.

In establishing control objectives and control techniques, as well as in performing internal control reviews, agencies should be mindful of the inherent limitations (budget constraints, statutory and regulatory restrictions, staffing limitations, etc.) which hamper effective agency action. The lack of achievement of control objectives due to these systematic limitations or cost-effectiveness considerations cannot and should not be considered deficiencies in internal controls.

Further, Illinois State agency chief executive officers should consult with their Internal Auditor(s) when planning the FCIAA internal control review to obtain appropriate input from internal auditing professionals and ensure adequate consideration of the impact of ongoing work performed by the agency's Internal Auditor(s) on the level of effort required to conduct the FCIAA review.

Every effort should be made to build upon the work performed by internal auditors when conducting the FCIAA internal control review.

MAJOR EVENT/TRANSACTION CYCLES

The major transaction cycles commonly found in Illinois State agencies include the following:

1. Agency Organization and Management
2. Administrative Support Services
3. Budgeting, Accounting and Reporting

- (2) A commitment to the establishment and maintenance of a system of internal control exists.

- (3) Appropriate controls exist to detect unauthorized use of the system.
- (4) Outputs are produced accurately, completely and timely.

The following presents internal control review objectives for those agencies that segment their activities into operations cycles:

OPERATIONS CYCLES

The operations cycles are intended to encompass the agency's program activities that are subject to these guidelines. The differences in agency missions make it impossible to develop a representative list of operations cycles and corresponding control objectives. Hence, each agency/agency component should examine its own programs and define the appropriate transaction/event cycles and control objectives.

The following are the operations cycles for some typical government programs and the internal control objectives for these cycles.

Production Activities

The primary internal control objectives normally associated with production activities include the following:

- (1) A production plan is authorized defining the products to be manufactured, the timing and quantities of production, and the needed inventory levels.
- (2) Lead time schedules are timely and accurate and permit realistic due dates.
- (3) Product quality and engineering standards exist and are monitored to ensure that quality products are produced as efficiently as possible.
- (4) Production controls exist to ensure that the plant is operating with the optimum mix of resources including labor, equipment and materials.
- (5) Production controls exist to prevent the manufacture of unauthorized products or quantities of products.
- (6) Resources used and products completed are timely and accurately reported.
- (7) Production costs are computed accurately and recorded timely.
- (8) Recorded balances of inventory, property and related activity are periodically substantiated and evaluated.

Loans and Loan Guaranties

The primary internal control objectives normally associated with loans and loan guidelines include the following:

- (1) Applications for loans and loan guaranties are evaluated for appropriateness of eligibility, collateral, and other qualifying criteria prior to approval

CERTIFICATION BY CHIEF EXECUTIVE OFFICERS

This section discusses the FCIAA requirements for certification by chief executive officers as to the adequacy of their agency's systems of internal fiscal and administrative control.

PURPOSE OF THE FCIAA CERTIFICATION

The certification provides evidence that the chief executive officer of each State agency (ACEO) is cognizant of the importance of internal control and is fully responsible for its necessary evaluation and improvement processes. The certification process assures the ACEO that the agency has established and is maintaining a system of internal fiscal and administrative controls (control system) that provides reasonable assurances that:

1. Resources are utilized efficiently, effectively, and in compliance with applicable law;
2. Obligations and costs are in accordance with applicable law;
3. Funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation;
4. Revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and,
5. Funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist.

RESPONSIBILITIES OF THE CHIEF EXECUTIVE OFFICER

In addition to executing the powers and discharging the duties vested by law in his/her respective agency, the ACEO is responsible for the establishment and maintenance of the control system within his/her agency. This responsibility includes ensuring that the control system is documented and evaluated, and on the basis of that evaluation, certifying annually the status of the agency's control

system (i.e., whether it complies with FCIAA, Article 3, Section 3001.) Accordingly, in an evaluation of internal fiscal and administrative controls, the ACEO and his/her management team should provide a control environment that facilitates:

1. Identifying risks inherent in the agency and the potential for errors and irregularities.
2. Monitoring achievement of internal control objectives.
3. Monitoring compliance with specific internal controls to assure compliance with legal and regulatory requirements (e.g., budgeting, purchasing, contracting, leasing, expenditure control, personnel and payroll, property and equipment, inventory control, revenues and receivables, cash, petty cash, local funds, EDP, grant administration, etc.)
4. Evaluating costs and benefits of internal control system improvements.
5. Initiating revisions in laws and policies to improve controls or eliminate unnecessary controls.

CERTIFICATION PROCEDURES

As head of a State agency, the ACEO is responsible for the agency's systems of internal controls and therefore must ensure that adequate controls exist, and that they are implemented in a cost effective manner and in conformity with applicable statutory mandates. The process of attaining assurances regarding the adequacy of the agency's control system is the evaluation process. To fulfill his/her responsibilities, the ACEO must be knowledgeable of and involved in the evaluation of internal controls to the extent necessary to facilitate an efficient and effective evaluation.

There are a number of resources within an agency from which the ACEO can obtain assistance or rely upon in the conduct of the FCIAA evaluation. These are:

Agency Internal Auditors - Internal auditors normally review internal control structures and report the results of their reviews to the highest levels of management in organizations. Internal auditors are a valuable resource to the agency and

**STATE OF ILLINOIS
OFFICE OF THE COMPTROLLER**

SECTION	INTERNAL CONTROLS	PROCEDURE - PAGE NO. 02.50.30 3 of 6

should provide technical guidance and oversight for all aspects of the evaluation process in each agency.

Agency Managers - This group of individuals is responsible for managing all administrative, programmatic, and operational functions within an agency.

A combination of the two - Assembling a FCIAA review team with representatives from each of the above areas could greatly enhance the overall scope and depth of understanding about agency operations needed to perform a comprehensive FCIAA evaluation. The FCIAA review team could serve as the internal control coordinators and assist the agency head by coordinating and managing the agency's internal control evaluations.

The following should be given consideration by ACEOs in performing the FCIAA evaluation:

Competence

Reviewers should have high standards of personal and professional integrity and are competent, as to education, training and experience, to perform evaluations.

Scheduling

Scheduling should take into consideration, resource availability, statutory and other administrative requirements, cyclical operations, and other factors. It is essential, however, that work is completed in time to provide a basis for the preparation and submission of the annual certification report on May 1. Internal control evaluations should ordinarily be conducted annually, and, in larger agencies, throughout the year and throughout subsequent years. This is necessary because the degree of compliance with established procedures may deteriorate over time, and changes in conditions may require changes in controls.

Documentation/reporting

Results of the evaluation should be clearly documented by the reviewer.

The approach presented in these guidelines establishes upward lines of communication for the results of the evaluation process (Exhibit 02.50.30-A). The ACEO should consider receiving the following for all transaction/event cycles evaluated:

- A. Evaluation Letter to the ACEO (See Procedure 02.50.50, Appendix A.)

An evaluation letter prepared by the FCIAA reviewers which

summarizes the results of the FCIAA review should be provided to the ACEO. This letter will serve as the reviewers' representation that systems of internal control were evaluated in accordance with established guidelines and if applicable, all weaknesses were reported in the form of a Corrective Action Plan.

B. Corrective Action Plan (See Procedure 02.50.50, Appendix B.)

The Corrective Action Plan is used to document identified internal control weaknesses. Specifically, the Corrective Action Plan outlines:

- The transaction/event cycle.
- A description of the weakness.
- Cause of weakness.
- Reasons why weakness cannot be corrected.
- Cost of weakness.
- Cost and benefits of corrective action.
- Materiality of weakness.
- Corrective action scheduled.

C. Certification Review Checklist (See Procedure 02.50.50, Appendix C.)

This document identifies determinations that the ACEO should make prior to signing the Certification.

In conjunction with the documentation and reporting of the evaluation, a system should be developed by each agency to track the status of all identified weaknesses.

CERTIFICATION REPORTING

Section 3003 of FCIAA requires that by May 1 of each year, the chief executive officer, shall, on the basis of an evaluation conducted in accordance with guidelines established under Section 3002 of the Act, prepare and transmit to the Auditor General a certification that:

1. The systems of internal fiscal and administrative controls of your State agency fully comply with the requirements of the Fiscal Control and Internal Auditing Act (See Procedure 02.50.50, Appendix A); or
2. The systems of internal fiscal and administrative controls of your State agency do not fully comply with the requirements of the Fiscal Control and Internal Auditing Act, (See Procedure 02.50.50, Appendix A).

FCIAA further requires that if the agency's systems do not fully comply with the requirements of this Act, the certification shall include a report describing any material weaknesses in the agency's system(s) of internal fiscal and administrative controls and a plan and schedule for correcting the weaknesses, or a statement of the reasons why the weaknesses cannot be corrected.

The FCIAA certification letter should consist, at a minimum, the following five basic elements:

1. A statement that internal fiscal and administrative controls were evaluated in accordance with guidelines established by the Comptroller in consultation with the Director of Central Management Services.
2. A statement of the objectives of an internal control system as outlined in the Fiscal Control and Internal Auditing Act Article 3, Section 3001.
3. A statement outlining the concept of reasonable assurance.
4. A statement of compliance or noncompliance.
5. A statement regarding required attachments.

The statute requires that a summary of material weaknesses and attendant corrective action plan(s) must be prepared and provided to the Auditor General.

A corrective action plan must be prepared for each material weakness noted in the control system (See Procedure 02.50.50, Appendix B.) For example, if while doing an evaluation of internal controls of the payroll, personnel, and purchasing systems, a material weakness was noted in each system, three separate corrective action plans would be prepared.

If an agency is unable to correct a particular control weakness, a statement of the reasons why the weakness cannot be corrected, must be provided to the Auditor General.

EVALUATION OF INTERNAL CONTROLS

PURPOSE OF THE FCIAA INTERNAL CONTROL EVALUATION

The purpose of the FCIAA internal control evaluation is to enable the chief executive officer of each State of Illinois agency to prepare and transmit to the Auditor General a certification that:

- 1) The systems of internal fiscal and administrative controls of the State agency fully comply with the requirements of FCIAA; or
- 2) The systems of internal fiscal and administrative controls of the State agency do not fully comply with the requirements of FCIAA.

STATE CONTROL STRUCTURE AND AGENCY RESPONSIBILITIES

This section discusses the control environment of the State of Illinois and describes the responsibilities of State agencies in assuring proper internal controls are in place and are operative.

Responsibilities

The control environment in Illinois, like that of most other states, is complex. The State constitution and laws establish the framework for our control structure. For example, the Governor, the Comptroller, the Attorney General, the Secretary of State and the Treasurer exercise control at the highest levels. The Governor allocates resources to operate programs consistent with program objectives. The Comptroller, the State's chief fiscal control officer, prescribes the form and methods of keeping certain accounts. The Attorney General, as the chief legal counselor of the State, is responsible for advising state agencies regarding the correct interpretation of the laws and for enforcing the laws of the State. The Secretary of State's responsibilities include administering the State's motor vehicle and securities laws, acting as the State librarian, and maintaining the State Archives and capitol complex, among other duties. The Treasurer has the responsibility for cash management. The President of the Senate and the Speaker of the House of Representatives are presiding officers of their respective houses and jointly administer the legislative branch.

Some controls are exercised by statewide elected officials and some controls are exercised by operating agencies. Elected officials disseminate policies, procedures and detailed technical guidance to operating agencies by statute and by management directives. This is accomplished through the preparation and distribution of manuals, memoranda, and other formal communicae.

PROCEDURE EVALUATION OF INTERNAL CONTROLS

REVISION NUMBER

01-001

The specific control responsibilities associated with FCIAA are as follows:

Governor - Internal control is primarily a management responsibility of the Governor. He has management/ enforcement authority over State agencies and can allocate resources where necessary.

Comptroller - The State Comptroller's Office promulgates accounting and financial reporting policies and procedures, provides SAMS training and technical guidance to agencies on fiscal control and accounting matters.

Auditor General - Under FCIAA, the Auditor General will receive the annual internal control certification letter/report from State agencies. The Auditor General is required by law to make financial, compliance and performance audits. Such audits, by their nature, require the Auditor General to review the internal control structure of the State agencies, and his reports contain recommendations for improvements in internal controls. The Auditor General will continue the normal statutory audits which include a review of internal controls. These examinations by the Auditor General, as well as those of the Internal Auditors, are valuable tools for responsible agency personnel. To the extent internal controls have been evaluated by the auditors, their examinations will help management understand the degree to which controls are functioning.

Constitutional Offices also function as operating agencies in carrying out their responsibilities. Therefore, good systems of internal control are the responsibility of each and every Constitutional Officer, agency, or unit of State government.

In addition to developing controls to assure compliance with control agency manuals, State agencies must also develop controls for situations unique to them. Each State agency must make sure its internal controls are consistent with its own mission and organizational structure and with Statewide controls.

Transactions and events are initiated at the operating agency level and, therefore, the remainder of this manual is targeted to the documentation and evaluation of the control structure within each State agency.

EVALUATION AND IMPROVEMENT

Executives and managers of the State's agencies are responsible for maintaining an adequate internal control structure. Earlier sections of these guidelines establish broad coverage of internal control structure, and of internal control as the framework for efficiency and economy in State government. An internal control structure concerns not only the financial and administrative activities of an agency, but also the agency's related programs and operational activities. To summarize, an internal control structure consists of the following:

INTERNAL CONTROL STRUCTURE

Financial/Accounting Controls - The controls on authorizing, processing, recording, and reporting transactions (which operate within the broader control environment of administrative controls). For example: authorization and classification of expenditures under established guidelines. These guidelines should be clearly defined, documented, approved by appropriate authorities, and communicated. Contracts must be entered into the accounting systems in a timely manner. Timely payments to contractors/vendors must be based on proper invoices approved by authorized persons and reconciled with ordering and receiving documents.

Administrative Controls - The broad controls on all activities carried out by officials to accomplish their objectives. Primarily, these activities concern planning, organization, productivity monitoring, improvement and quality control activities. For example: the planning and budgeting activity should be synchronized with the management reporting system. Budget and management reports should be in the same format, at the same level of detail and contain data classified in a manner consistent with the plans/budgets and should display planned and actual results. Agencies should hire and train competent qualified personnel. The plan or organization should provide for an appropriate segregation of functions. Determining need for contracts, seeking prospective contractors, negotiating contracts, and authorizing payments to contractors are activities which should be separated.

Program and Operational Controls - The controls on planning and accomplishing the agency's missions and objectives. For example: Procedures exist to develop policies and procedures. Results of agency activities are regularly evaluated; and procedures exist for periodically evaluating the agency's/organization's method of operation (centralized vs. decentralized organization structure).

Programmatic controls are directly linked to financial internal controls (financial accounting and administrative controls) as an important part of the overall internal control structure of each State agency.

Evaluations And Reporting

There are several ways to evaluate and report on internal controls. These guidelines provide one effective approach based on five proven techniques applied in complex entities similar to the State of Illinois. **This is only one of many acceptable approaches to conducting the FCIAA review.** It has been developed at a level of detail sufficient for use by those agencies without an established or effective internal audit program.

In all cases, efforts should be made to build upon the work of agency internal and external auditors in determining the nature and scope of necessary FCIAA internal control review work. The five step process is summarized as follows:

1. Organizing the Evaluation - Assigning responsibilities for all participants to assure that each agency completes the appropriate analysis and reports. It concerns: planning, directing, and controlling the evaluation process; and tracking the status of the evaluation and corrective actions and other information necessary to manage the process.
2. Segmenting the Agency - Is usually required because agencies and institutions are too large to be included in a single control evaluation and because agencies' programs are too diverse to be included in a single comprehensive review. It is recommended that each agency be segmented into organizational or functional components, each identified as a "review entity".
3. Conducting Internal Control Reviews - For the selected internal control entities, conduct internal control reviews to ensure that the defined control objectives and techniques are functioning as intended. Then develop recommendations to correct weaknesses in either the design or functioning of the Internal control structure.
4. Taking Corrective Action - The reported recommendations resulting from the internal control reviews are analyzed and corrective actions

are scheduled if the anticipated cost of implementing the recommendation will not exceed the expected benefit. (See Procedure 02.50.30)

5. Preparing Annual Certification Reports - Each agency combines the results of each of its review entity internal control reviews into an annual certification report to the Auditor General. The report reflects the current status of each agency's internal control structure. A copy of the annual certification report and all supporting documentation will be maintained in each agency for use by the Auditor General, Legislative Audit Commission, and other appropriate State authorities. (See Procedure 02.50.30)

ORGANIZING THE EVALUATION

As previously explained, the first technique of the internal control evaluation is to organize the evaluation process. It is critical that an agency, whether large or small, carefully organize and assign responsibilities to ensure that the evaluation, improvement and reporting on internal controls is effective. Key considerations should include, among other things, the following:

1. Assigning responsibilities,
2. Internal reporting,
3. Documentation,
4. Personnel and supervision, and
5. Scheduling the evaluation process.

Assignment of Responsibility

Each participant in the evaluation process must be identified and responsibilities clearly assigned to prevent confusion and provide an orderly method for collecting and reporting information. Responsibility for the internal control evaluations should be assigned to the lowest supervisory level. The suggested responsibilities of each participant are described as follows:

Agency Chief Executive Officers - Responsible for the overall review of information, evaluating the organizations under their authority and reporting annually on the status of the internal control structure of their agencies. Specific responsibilities should include the following:

- . Select an evaluation approach.
- . Assign responsibilities throughout the organization.
- . Appoint an internal control coordinator.
- . Maintain and demonstrate a positive attitude toward all participants concerning the necessity of an effective internal control environment.
- . Review internal control evaluation reports and discuss at progress meetings.
- . Report annually on the status of the agency's internal controls.
- . Ensure that subsequent actions, including the correction of control weaknesses, are performed.

Agency Internal Auditors - Internal auditors normally review internal control structures and report the results of their reviews to the highest levels of management in organizations. These reviews are usually undertaken on the auditors' own initiative or at the request of the agency head. They are either separate reviews of internal controls or are reviews performed in conjunction with internal audits. Internal auditors are a valuable resource to the agency and should provide technical guidance and oversight for all aspects of the evaluation process in each agency. Specifically, the internal auditors:

- . Perform or provide technical assistance on conducting internal control evaluations.
- . Prepare or provide guidance on preparing internal control reports for submission to the agency chief executive officer.
- . Provide advisory service to agency heads and key agency managers on preparing the annual internal control certification reports.

The internal auditor may also serve as the designated agency coordinator for the FCIAA internal control review process. In this capacity, the internal auditor would be responsible for providing assistance to the agency head by coordinating and managing the agency's evaluations. Internal

control review coordinators also serve as contacts between the agency and other individuals who are interested in the agency's internal control structure. Specifically, the FCIAA internal control review coordinator should:

- . Determine that the agency is segmented into manageable "review entities" to facilitate conducting the FCIAA review.
- . Formalize an agency-wide evaluation reporting and tracking system to make sure that FCIAA internal control reviews are completed on a timely basis.
- . Review internal control review results and discuss at progress meetings.
- . Prepare the annual certification report for the agency chief executive officer.

If there is no agency internal auditor, or it is determined that the internal auditor should, for whatever reason, not serve in this "coordinator" role, the ACEO should identify another agency manager to perform the FCIAA review coordinator function.

Internal Reporting

The internal control coordinator, as explained earlier, maintains the evaluation, data collection and tracking system. This system should monitor the accomplishments of the various tasks that make up the evaluation and improvement process. The system should identify each review (segmented) entity and the responsible entity manager, track the conduct of the FCIAA review, and track the completion of subsequent actions.

Documentation

The methods used, the personnel involved and their roles, the key factors considered, and the conclusions reached must be documented to provide a permanent record. Written narratives and flowcharts should be used when necessary to describe and illustrate various internal control processes.

Personnel and Supervision

It is important that an adequate level of resources be committed to the process. It is likely that internal control reviews will be performed by persons from various parts of the agency. These persons need to be competent on matters concerning internal control and the process described in these guidelines so proper judgments can be made. Some specific considerations to help are as follows:

- . Hold an orientation meeting to explain the objectives of and procedures for conducting the assessments and reviews.
- . Assign personnel using a "team" approach so small groups of individuals can perform assessments/reviews jointly. This will provide some assurance that limitations of one individual can be offset by the strengths of another.
- . Provide adequate and active supervision of the entire process.

Scheduling the Evaluation Process

The FCIAA review should be scheduled after carefully considering resource availability, statutory and other administrative requirements, cyclical operations, and other factors. It is essential, however, that work is completed in time to provide a basis for the preparation of the annual certification report. Internal control reviews should be conducted annually, and, in larger or "designated" agencies, throughout each year to enable all major systems of internal accounting and administrative control to be audited at least once every two years. This is necessary because the degree of compliance with established procedures may deteriorate over time, and changes in conditions may require changes in controls.

In summary, it is critical that agency management commit the time and resources of its key personnel to planning and organization to ensure a good start. In the next section, an approach to segmenting the agency into review entities will be discussed.

SEGMENTING THE AGENCY

Most State agencies are large, complex organizations with broad responsibilities over a variety of programs. As a result, it is often difficult to perform an internal control review on the agency as a whole. Accordingly, it is recommended that the agency be divided into "segmented" or "review" entities. With small, manageable entities, the internal control review processes can be delegated to lower levels in the agency, where they can be better managed.

As mentioned earlier, an agency can be segmented according to the following two basic approaches or a combination thereof.

1. Transaction cycle approach, and
2. Organizational structure approach.

A description of the two basic methods and factors to be considered follows:

Transaction Cycle Approach

First, appropriate functional transactional cycles must be identified. A transaction cycle is a stream of related events and processes which satisfy one overall functional need of the agency.

This method will result in broad review entities (cycles) such as the revenue cycle, disbursement cycle, and budget cycle which cut across organizational lines. For example, the Budget Transaction Cycle would include processes performed in the budget office as well as in the operating offices and accounting offices.

This method best clarifies the interaction of controls between different units. Controls in each unit will be evaluated and reviewed to see how they affect the agency as a whole. The transaction cycle approach might be preferred for a small independent agency which is not as complex as a large agency.

The drawbacks of this method include the need to cross over organizational lines of authority, often involving many managers, and the lack of an organizational structure along cycle lines. These drawbacks can seriously impede an orderly and successful evaluation.

Organization Structure Approach

This method involves delegating internal control responsibilities to managers along formal organization lines. Factors to be considered in segmenting the agency into review entities under this method are as follows:

Organizational Chart - Segmentation that closely follows the agency's formal structure is usually efficient and effective when the organizational lines are clearly shown. When lines of authority and reporting responsibilities are interwoven, the organization chart becomes less useful as a tool for segmentation.

Physical Location - An agency's programs or administrative functions could operate in several locations. Since the control systems would be separate, it may be necessary to perform separate evaluations at each location. On the other hand, if an agency's operations are confined to one location, it may be appropriate to have review entities that include more functions.

Autonomy - The more independent a function, the more likely the function should be considered a separate review entity.

Materiality - An important consideration in any organization is the commitment of personnel and dollars. The larger the program, the greater the likelihood that the function should be considered a separate review entity.

When segmenting the agency, the support activities (cash receipts, cash disbursements, etc.) must be examined to determine whether they should be a separate review entity based on the degree of centralization and control. The greater the autonomy, the greater the risk and, therefore, the greater the need for accountability and emphasis of this function as a separate review entity. For example, in a large agency, the support activity may be centralized at the "Office of the Director" organizational level. This activity should be studied to determine the extent of its control and responsibility to decide if it should be segregated from the administrative office as a separate review entity.

Persons responsible for support activities should answer applicable questions on the internal control review forms. However, minor delegations of authority may require other entities to answer some of the questions.

For example, although there might be a centralized cash disbursement function, other units might be responsible for receiving and forwarding invoices or for petty cash funds and would answer the questions pertaining to these specific functions.

Examples of support activities that could be considered review entities at the agency or institutional level are:

Strategic and Long Range Planning - This involves establishing and implementing broad, long range goals and objectives. This process is important since it charts the general direction of the entity for the future.

Operational Planning - This concerns setting objectives for the current budget cycle. The annual budget expresses the current year's objectives in financial terms.

Program Operations, Planning and Management - This includes maintaining performance standards and reports so that management may analyze performance (such as construction completion milestones, claims administered per employee, accounts processed for collection, and transaction processing time).

Loan and Accounts Receivable Collection - This support activity includes all procedures concerning collection of the organization's loans and accounts receivable.

Cash Receipts/Revenues/Sales - This activity includes all actions associated with the receipt, depositing and safeguarding of cash, including imprest/working funds.

Cash Disbursements/Procurement - This concerns all of the purchasing processes, accounting for the related liabilities and authorizations for payment.

Payroll - This activity encompasses all duties and procedures related to time, attendance and payroll functions performed within the organization.

Property, Plant and Equipment - This includes all policies, procedures, and operations concerning the acquisition, maintenance, and disposition of the organization's fixed assets, including accounting.

Electronic Data Processing - This includes general and application controls on electronic data processing. Due to the widespread use of computers, the assessment process will require a significant commitment of resources to this area on a continuing basis.

Travel - This process includes all policies related to travel by employees including authorization, reporting, expenditure guidelines, and cash advances.

The advantages of segmenting on an organizational basis include:

- An entity manager-in-charge is usually in place who has authority and responsibility for internal controls;
- There is a greater understanding of operations by personnel; and,
- It is easier to segment an agency along lines of authority and responsibility that already exist.

A disadvantage of this method is that the flow of transactions may be disrupted. For example, information regularly flows between personnel, payroll, and accounting activities. Breaking these activities along organizational lines may cause inefficiencies later in the evaluation process.

Review Entity Characteristics

Regardless of which approach to segmentation is used, all review entities should have the following characteristics:

- An entity facilitates management's efforts to reduce inherent risks caused by:
 - Material budget levels.
 - Significant procurement/assistance responsibility.
 - Significant complexity in the programs'/ systems' services.
 - Significant amounts of cash, negotiable instruments, or other assets.
 - Significant decentralization of activities.
 - Increasing/decreasing age and "life expectancy" (e.g., the entity is being phased out).
 - Special concerns outside the entity (entity being scrutinized/ investigated).

- . An entity has logical cycles for use, disposition or maintenance of the resources.
- . An entity has specific control objectives relating to transaction/event cycles.
- . In an entity, all managers directly accountable for its functions are included in the assessment process.

All major functions and activities must be included in the review entity. The exclusion of activities from an entity may result in improper management conclusions on the activities subject to vulnerability assessment and on the agency's overall internal control structure.

Another source of information that should not be overlooked is the segmentation approach used by the Auditor General in conducting audits of agencies. The Auditor General is similarly concerned about controls/functions and often structures examinations giving consideration to the factors described earlier in this section.

Remember, the purpose of segmentation is to identify manageable entities of an agency's activities to assure that:

- 1) All important inherent risks are identified,
- 2) Meaningful evaluations are made to determine if the environment is conducive to effective internal control techniques, and
- 3) Knowledgeable individuals assess how well internal controls are meeting their stated objectives.

After each review entity has been identified, it should be assigned a control number and an entity manager.

The next section, explains how to perform the FCIAA internal control review.

PERFORMING THE FCIAA FISCAL AND ADMINISTRATIVE CONTROLS REVIEW

An internal control review is a "detailed examination" of a system of internal control to determine whether adequate control "measures" 1) exist and 2) are implemented either in a cost effective manner or in response to statutory mandates to "prevent" or "detect" the occurrence of potential risks. Procedures within transaction or event cycles are targeted in detail control reviews.

The internal control review approach described in these guidelines has six steps:

1. Identifying transaction/event cycles.
2. Analyzing the general control environment.
3. Documenting each transaction/event cycle.
4. Evaluating the internal controls within each transaction/event cycle.
5. Testing the internal controls.
6. Assessing the results of the internal control review and developing corrective action plans.

The remainder of this section discusses these steps and suggested sub-steps in detail. Once again, it is important to note the following detailed internal control review program is intended to be sufficiently comprehensive to enable an agency without an effective internal audit program to perform a thorough FCIAA internal control review. Every effort should be made to build and rely upon work performed by internal and external auditors in determining the nature and scope of additional work required to satisfy the FCIAA. A sample checklist for use in conducting the FCIAA internal control review is presented in Volume II of these guidelines.

Step 1

Identifying Transaction/Event Cycles - The first step in conducting an internal control review is to identify the review entity "transaction/event cycles." Transaction/event cycles isolate the various processing systems of the entity in logical work flow patterns for conducting effective reviews.

Transaction/event cycles are defined as a series of processes which initiate and achieve an end product, create the necessary documentation and gather and report related data. In other words, a transaction/event cycle is a stream of related transaction/events and processes which satisfy one overall functional need of the entity. Or, putting it yet still another way, a transaction/event cycle is a series of steps taken to get something done, document and report it.

Each transaction/event cycle is structured with defined beginning and ending points. For example, the disbursement cycle in the State Comptroller's Office begins with the receipt of the disbursement voucher form from a State agency and ends with the delivery of a warrant drawn on the State Treasury. Another example might be a student loan transaction/event cycle which could begin with the receipt of an

application and conclude with the disbursement of the loan. It is important to note that transaction/event cycles typically are framed in totality within a review entity. Therefore in a large organization, the ending point for the transaction/event cycle in one entity might be the starting point for the transaction/event cycle in another review entity.

All transaction/event cycles in a review entity selected for review should be identified. Also, all functions and activities performed within the review entity should be included in one of the transaction/event cycles identified.

On the other hand, management in some cases may determine that certain activities are performed uniformly within many review entities and, therefore, these activities should be considered for internal control review as a totality in another review entity.

An example might be time and attendance processing which should be an activity performed throughout the organization in accordance with standard policy and uniform procedures. Where such standards and uniformity exist, management may decide to perform the detail internal control review on the whole activity once and not repeat the review or portions of it with each review entity.

Identifying transaction/event cycles in a review entity is accomplished by the following sub-steps:

- 1a. Gathering background information.
- 1b. Conducting interviews.
- 1c. Completing a general narrative and/or flowchart of the review entity.
- 1d. Preparing a list of transaction/event cycles.
- 1e. Selecting transaction/event cycles for detail internal control reviews.

Sub-Step 1a. Gathering Background Information

The person assigned to perform the internal control review must become familiar with the day-to-day activities of the review entity, if they aren't already. Background information gathered in the vulnerability assessment may be helpful to the person conducting the detailed internal control review. Such background information may include:

- . Agency goals/objectives
- . Budgets/plans
- . Vulnerability assessments
- . Organizational charts/functional statements
- . Process flowcharts/narratives
- . Policies and procedures manuals
- . Program evaluations and other reviews
- . Financial statements

The reviewer should also study reports issued by the agency internal auditor, or the Auditor General. The reports usually provide clues in identifying areas needing management attention.

Sub-Step 1b. Conducting Interviews

The reviewer should interview review entity personnel to make sure that he or she has identified and understands all activities and functions accurately.

Sub-Step 1c. Completing a General Narrative and/or Flowchart of the Review entity

The responsible reviewer should document the entity with a general systems narrative and flowchart. This process ensures that the reviewer has considered all the significant processes and workflows within the entity. The systems narrative and flowchart should be of a high level or summary nature. Entity operating personnel should review the document to make sure it is accurate and complete.

Sub-Step 1d. Preparing a Listing of Transaction/
event Cycles

After identifying and listing all functions, the reviewer should determine if each function merits its own transaction/event cycle or if it combines with other functions to form a transaction/event cycle. Transaction/event cycles should not be defined in such detail as to create unnecessary burdens on the entity in the form of numerous,

costly and perhaps, duplicate reviews. For example, perhaps receiving student tuition payments could be combined with depositing payments.

Sub-Step 1e. Selecting Transaction/event Cycles for Detail Internal Control Reviews

After all transaction/event cycles are identified, the reviewer should list them and determine which transaction/event cycles are to be reviewed. An explanation/justification for this determination should be provided in the workpapers.

STEP 2

Analyzing the General Control Environment - Evaluating the general control environment is an important part of an internal control review. This environment includes: management attitude, organization structure, personnel, delegation and communication of authority and responsibility, policies and procedures, budgeting and reporting practices, organization checks and balances, etc.

Before the reviewer prepares a transaction/event cycle's flowcharts and narratives, he or she must analyze its general control environment to identify weaknesses in the control environment, which affect control techniques. As each evaluative criteria is assessed, the reviewer should determine whether corrective action is needed and what form corrective action should take. These decisions should be documented.

The review staff member with the most knowledge of the review entity should analyze the general control environment of each transaction/event cycle. The assigned reviewer should:

- 1) Review all completed evaluative documentation,
- 2) Visit the location,
- 3) Review documented policies and procedures,
- 4) Observe practices, and
- 5) Interview management to draw upon its familiarity with the operations and functions of the review unit.

STEP 3

Documenting Each Transaction/event Cycle - To document each transaction/event cycle for a thorough understanding of how it operates, the reviewer should:

- 1) Interview the persons involved in the cycle,
- 2) Review existing documentation,
- 3) Observe the activity, and
- 4) Prepare either a narrative explanation or a flowchart accompanied by appropriate narrative information in sufficient detail to permit an in-depth analysis of the existence and adequacy of internal controls.

The documentation should identify for each cycle such things as the procedures, the personnel performing the procedures, the forms and records developed and maintained, and the number and dollar value of transaction/events processed and any error rates.

The reviewer should verify the accuracy of the flowchart and narrative by conducting interviews or walkthroughs. Walkthroughs consist of tracing transactions or events from start to finish, noting specifically how the transaction or event is processed.

Proper documentation allows the reader to visualize an individual transaction/event moving through the cycle from start to finish, identifying all key control points and processes.

STEP 4

Evaluating the Internal Controls Within Each Transaction/Event Cycle - The reviewer must study the flowcharts, narratives and other documentation to determine if the current techniques as documented meet control objectives. There are three sub-steps in this process:

- 4a. Identify control objectives.
- 4b. Identify control techniques.
- 4c. Match objectives and techniques and make a preliminary assessment of controls.

Sub-Step 4a. Identify Control Objectives

Control objectives are desired goals or conditions for a specific transaction/event cycle. By achieving control objectives, the potential for waste, loss, unauthorized use or misappropriation is minimized.

Procedure 02.50.20 lists sample internal control review objectives which can be used for typical review entities. Once identified, the control objectives should be summarized.

For control objectives to be effective, compliance must be measurable and observable. To measure compliance, the reviewer must identify and evaluate control techniques.

Sub-Step 4b. Identify Control Techniques

The reviewer must identify existing control techniques from detailed transaction/event cycle narratives and flowcharts prepared in Step 3.

A control technique is defined as "a procedure, process or document that is being relied on to efficiently and effectively accomplish a control objective and thus help safeguard an activity from error."

Sub-Step 4c. Match Objectives and Techniques and Make a Preliminary Assessment of Controls

In this sub-step, the reviewer matches the control objectives identified in sub-step 1 and the control techniques identified in sub-step 2. The reviewer must then make a preliminary assessment of the validity of control techniques and note the results in the workpapers. This helps the reviewer to identify:

1. Internal control techniques which are strengths and must be tested under the next step, Step 5.
2. Control objectives for which control techniques are not adequate and for which system corrections must be made.
3. Control techniques that are unnecessary or excessive and can be eliminated.

STEP 5

Evaluating the Internal Controls - All internal controls (other than those determined to be inadequate and/or unnecessary) should be evaluated to verify that they are functioning as intended. The internal controls to be evaluated should be listed in the workpapers.

The evaluation should be based on 1) ongoing work performed by agency internal auditors, 2) the results of the work performed in Steps 1-4 above, and 3) any additional testing of internal controls deemed necessary to sufficiently evaluate their adequacy. The evaluation should serve as the basis for the chief executive officer's annual FCIAA certification, as discussed in Procedure 02.50.30 of these guidelines.

In those instances when testing of internal controls is deemed necessary, such testing may be done by selecting a sample of transactions or events, reviewing the documentation supporting those transactions, making other observations and inquiries, and determining whether the specified techniques are satisfactorily employed.

A sample includes, a representative number of transactions or events. The sample size will vary depending on: the nature and significance of the technique being tested, the characteristics of the individual transactions and the degree of assurance required. Sampling is used because verifying the entire population is unnecessary and impractical. The number of transactions to be tested should be the minimum necessary to provide the reviewer reasonable assurance that control techniques are functioning as intended. Test documentation must support the reviewer's conclusions. This documentation typically includes pertinent information such as personnel interviewed, observations performed, documents tested, dates, transaction types, amounts and any other distinguishing data.

After the documentation is completed, each transaction/event cycle control objective is evaluated to determine whether the existing control techniques provide reasonable assurance that the objective is achieved in an efficient and effective manner and/or that legally mandated control objectives are being achieved. Collect and summarize results in the workpapers. First, evaluate the control technique as either functioning or not functioning and then, if it is functioning, assess the adequacy of the technique in meeting the objective. The reviewer should note:

- . Test results which indicate that the technique is not being performed.
- . Test results which indicate that the technique is either not necessary (over control) or not meeting the stated objectives (weakness).

The reviewer then makes corrective action recommendations for further consideration.

SAMPLE CERTIFICATION BY CHIEF EXECUTIVE OFFICER
OF THE STATE AGENCY'S SYSTEM OF INTERNAL CONTROL

Honorable William G. Holland
Auditor General
Springfield, Illinois 62703-3154

An evaluation of the internal fiscal and administrative controls of the (name of agency) in effect during the reporting period _____ was performed in accordance with guidelines established by the Comptroller in consultation with the Director of Central Management Services.

The objectives of the system of the internal fiscal and administrative controls of the (name of agency) are to provide reasonable assurance that:

1. resources are utilized efficiently, effectively, and in compliance with applicable law;
2. obligations and costs are in compliance with applicable law;
3. funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation;
4. revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and
5. funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist.

The concept of reasonable assurance recognizes that the cost of inherent control should not exceed the benefits expected to be derived therefrom, and that the benefits consist of reductions in the risks of failing to achieve the stated objectives. Estimates and judgments are required to assess the expected benefits and related costs of control procedures. Furthermore, errors or irregularities may occur and not be detected because of inherent limitations in any system of internal accounting and administrative control, including those limitations resulting from resource constraints, legislative restrictions, and other factors.

1. The systems of internal fiscal and administrative controls of the (name of agency) comply with the requirements of this Act.

2. The systems of internal fiscal and administrative controls of the (name of agency) do not fully comply with the requirements of this Act. SAMPLE EVALUATION LETTER TO THE ACEO FROM AGENCY FCIAA REVIEWER OR
REVIEW TEAM

Dear (ACEO):

In accordance with your delegation of responsibilities to me (us), I (we) have performed an evaluation of the system of internal accounting and administrative control of the (name of transaction/event cycle) in effect during the year ended _____. As required by the Fiscal Control and Internal Auditing Act, Article 3, Section 3003, this evaluation has been conducted in accordance with the guidelines established by the Comptroller, in consultation with the Director of Central Management Services.

The objectives of the internal accounting and administrative control of the (name of transaction/event cycle) are to provide reasonable assurance that:

(Check applicable objective)

- ___ Resources are utilized efficiently, effectively, and in compliance with applicable law;
- ___ Obligations and costs are in compliance with applicable law;
- ___ Funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation;
- ___ Revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources; and
- ___ Funds held outside the State Treasury are managed, used, and obtained in strict accordance with the terms of their enabling authorities and that no unauthorized funds exist.

I (we) have identified all the objectives that are applicable to the (name of transaction/event cycle).

The concept of reasonable assurance recognizes that the cost of internal control should not exceed the benefits expected to be derived therefrom, and that the benefits consist of reductions in the risks of failing to achieve the stated objectives. Estimates and judgments are required to assess the expected benefits and related costs of control procedures. Furthermore, errors or irregularities may occur and not be detected because of inherent limitations in any system of internal accounting and administrative control, including those limitations resulting from resource constraints, legislative restrictions, and other factors. Finally, projection of any evaluation of the system to future periods is subject to the risk that procedures may be inadequate because of changes in conditions or that the degree of compliance with the procedures may deteriorate. Nonetheless, I (we) have taken the necessary measures to assure that the evaluation, identified in the first paragraph, has been conducted in a thorough and conscientious manner.

(Select the appropriate paragraph)

1. The systems of internal fiscal and administrative controls of the (name of transaction/event cycle) comply with the requirements of this Act.
2. The systems of internal fiscal and administration controls of the (name of transaction/event cycle) do not fully comply with the requirements of this Act. Attachment A to this letter is a corrective action plan for each weakness which:
 - a. fully describes the weakness,
 - b. provides a plan and schedule for correcting the weakness; and
 - c. includes a determination as to whether the weakness is material.

INSTRUCTIONS FOR COMPLETING CORRECTIVE ACTION PLANS

1. AGENCY: The title of the agency the reviewer is working for should be placed on this line (e.g., Comptroller). This would not apply to all state agencies.

2. TRANSACTION/
 EVENT CYCLE: The transaction/event cycle that the reviewer is directly accountable for should be placed in this space (e.g., Accounts Receivable).

3. DESCRIPTION
 OF MATERIAL
 WEAKNESS: Provide a three to five sentence description of the weakness. Be specific with respect to how fiscal/administrative weakness are in noncompliance with Article 3 Section 3001 of the Fiscal Control and Internal Auditing Act.

4. CAUSE OF
 CONDITION: Provide an explanation for how the material weakness was created.

5. REASON WHY
 WEAKNESS
 CANNOT BE
 CORRECTED Provide an explanation for why the weakness cannot be corrected.

6. COST OF
 WEAKNESS How much is the weakness currently costing the agency or how much is it projected that the weakness will cost the agency if not corrected?

7. COST AND

GLOSSARY

Activities - Major services or goods provided by an organizational unit. Major activities directly related to the program's objectives.

Agency - Any office, officer, department, commission, board, bureau, division, school, college, university, institution or other agency or unit of the State government subject to audit by the Auditor General of this State as defined in the State Auditing Act.

Agency Component - A functional subdivision, a major organization, a program or a functional subdivision of an agency.

Chief Executive Officer - Includes, respectively, the Secretary of State, the State Comptroller, the State Treasurer, the Attorney General, the State Superintendent of Education, such chief executive officers as are designated by the governing board of each State college and university, the executive director of the Illinois Toll Highway Authority and the executive director of the Illinois Housing Development Authority, as well as the chief executive officer of each other State agency.

Certification Report on the Status of Internal Control - See "Internal Control Certification".

Control Techniques - The mechanisms used to achieve control objectives and which prevent, detect or correct errors.

Detail Internal Control Review - See "Internal Control Review".

Event Cycle - The processes used to initiate and perform related activities, create the necessary documentation and gather and report related data.

General Control Environment - Various environmental factors that can influence the effectiveness of internal controls over program and administrative functions.

Inherent Risk - The potential for fraud, waste and abuse due to the nature of an activity. For example, activities conducted within severe time constraints have greater inherent risk than those which are not subject to time constraints.

Internal Control - The steps that an agency takes to provide reasonable assurance that obligations and costs are in compliance with applicable law; funds, property and other assets are safeguarded against waste, loss, unauthorized use or misappropriation; revenues and expenditures

applicable to agency operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the assets; and resources are used efficiently and effectively in pursuit of program objectives, and reliable information is maintained for evaluating managerial and organizational performance.

Internal Control Certification - A comprehensive annual report prepared by ACEO which certifies whether the system/s of fiscal and administrative accounting controls are adequate, identifying any material weaknesses and plans and schedules to rectify them.

Internal Control Review - Examining existing internal controls to determine whether existing measures are adequate to prevent or detect the occurrence of potential risks in a cost-effective manner. An internal control review cannot be equated to an audit, since the latter is much more comprehensive and requires the application of standards not appropriate for the internal control review.

Internal Control System - The sum of the organization's methods and measures used to achieve the objectives of internal control.

Internal Control Technique - A process or document that is being relied on to efficiently and effectively accomplish a control objective and thus help safeguard an activity from waste, loss, unauthorized use or misappropriation.

Internal Administrative Controls - The plan of organization and procedures and records that are part of the decision processes leading to management's authorization of transactions. Administrative controls can be divided into two groups: organizational and operational.

Internal Fiscal Controls - The controls on authorizing, processing, recording and reporting transactions, and which operate within the broader control environment of administrative controls.

Material Weakness - A situation in which the designed procedures or degree of operational compliance with those procedures do not provide reasonable assurance that the objectives of internal control specified in the Act are being accomplished.

Materiality - The significance of an event, amount or error, when measured in the light of surrounding circumstances by a reasonable person. In making a decision or judgment, an event, amount or error would be material if it affects the reasonable person's decision.

Operating Agencies - The principal responsibility of operating agencies is the delivery of programmatic services to the general public.

Operational Controls - The controls which provide assurances that the goals and objectives of agency are met effectively, economically and efficiently, and that only authorized activities are carried out.

Organizational Controls - The controls on how the agency assigns responsibility and defines authority through its organization structure and delegation of authority within the structure.

Reasonable Assurance - A satisfactory level of confidence considering costs, benefits and risks. Reasonable assurance recognizes that the cost of internal control should not exceed the benefit derived.

Segregation of Duties - Assigning duties to individuals so that no one individual controls all phases of the processing of a transaction, thereby permitting errors of omission or commission to go undetected.

Standards of Internal Control - These include: documentation, recording of transactions, execution of transactions, separation of duties, adequate supervision, access to resources, competent personnel, reasonable assurance, and records.

Transaction Cycle - The route by which an event (transaction) flows from inception to final reporting.

Vulnerability Assessment - A review of the susceptibility of an agency, program or function to the occurrence loss or unauthorized use of resources, errors in reports and information, illegal or unethical acts, and/or adverse or unfavorable public opinion.

PURPOSE AND SCOPE

The Constitution of 1970 created the elective Office of the Comptroller to assume broadly defined fiscal duties, including those formerly performed by the Auditor of Public Accounts. This Constitutional provision is implemented by the State Comptroller Act, which required the Comptroller to establish a Uniform Statewide Accounting System which will be applicable to the recording of transactions of "all State agencies." (See Procedure 01.10.60.) Also, Public Act 86-1415 ([15 ILCS 405/6.01](#)) requires that "the Comptroller shall specify and establish the financial accounting and reporting standards and principles to be used by all State government and State agencies." The purpose of this document is to define the principles of accounting which will underlie the development, implementation and operation of the Statewide Accounting Management System (SAMS).

An accounting principle is defined as "a general law or rule adopted or proposed as a guide to action; a settled ground or basis of conduct or practice." ¹

This document will define principles in each of the following broad categories:

- . Methods of Accounting
- . Capital Asset and Depreciation Expense Reporting
- . Revenue and Related Asset (Receivable) Reporting
- . Expenditure/Expense and Related Liability Accounting
- . Other Assets
- . Financial Statement Presentation

Each of the defined principles will be discussed in relation to the particular environment of the State of Illinois. The accounting principles are intended to facilitate the development and maintenance of a reliable central source of timely fiscal information which will describe the financial condition of the State, report upon the stewardship of public officials, and provide analytical data for legislators, agency administrators, investors and the citizens of Illinois.

SAMS is not intended to displace the internal accounting systems of individual State agencies. However, these principles do apply to agency internal accounting, and prescribe the nature of SAMS. Accordingly, they underlie the development of formats and procedures by which all State agencies must report fiscal information to the Comptroller within the meaning of the Constitution of 1970 and the State Comptroller Act.

RECOGNITION OF AUTHORITATIVE SOURCES

In order to foster general acceptability of these accounting principles, the significant literature which enjoys general acceptance in governmental accounting and related fields has been researched. Those sources which have contributed to the definition of these accounting principles include:

- . Government Finance Officers Association, Governmental Accounting, Auditing and Financial Reporting
- . Governmental Accounting Standards Board, Codification of Governmental Accounting and Financial Reporting Standards
- . AICPA, Audits of State and Local Governmental Units
- . AICPA, Audits of Colleges and Universities
- . AICPA, Audits of Providers of Health Care Services
- . National Association of College and University Business Officers, College and University Business Administration

Several other respected sources have been consulted, including widely accepted accounting texts, relevant pronouncements and publications of the AICPA, other publications, articles and accounting literature and individual governmental accounting experts.

The literature has historically addressed the general area of state and local government, rather than consider the more specific discipline of recording, classifying and reporting state government financial information. SAMS addresses the unique requirements of statewide accounting in Illinois by adapting widely accepted principles, as set forth in the literature, to the environment in which they must operate.

Comptroller accounting standards or principles established in accordance with P.A. 86-1415 will conform to the GAAP hierarchy (AICPA Codification of Audit Standards AU 411.12) listed below:

EVOLUTIONARY NATURE OF ACCOUNTING PRINCIPLES

The environment of State government is a dynamic one. Change is increasingly a factor in State government--organizational and operational changes, procedural changes, changes in personnel and in the aggregate level of financial sophistication within State agencies. Pragmatism cannot dictate principle, and yet the principles which this document defines must underlie a system which will function effectively in a practical environment. Steps have been taken, therefore, to prescribe accounting principles at a practical level while recognizing the dynamics of the environment and of the principles themselves.

Generally accepted governmental accounting principles have evolved over a period of years. Their current status reflects not only the historical requirements of users of financial information but also the "state of the art" in public sector financial management. As increased attention is paid to State government accounting--historically a neglected subject--additional refinements will occur within the body of accounting principles presented in this document.

There will be a perpetual function of review and evaluation regarding these principles in order to upgrade and optimize the ability of SAMS to meet the requirements of its users for timely, complete and accurate financial information.

STATUTE REFERENCE

The statutory authority requiring the Comptroller to specify and establish accounting and reporting standards and principles to be used by all State agencies is contained in Section 6.01 of the State Comptroller Act, (15 ILCS 405/6.01) as set forth below.

"The Comptroller shall specify and establish the financial accounting and reporting standards and principles to be used by all State government and State agencies. The standards and principles shall be effective upon filing by the Comptroller with the Auditor General. The Comptroller shall maintain and publish the standards and principles as a public document. These standards and principles shall be known as the Generally Accepted Accounting Standards and Principles for Illinois State Government, and shall, whenever possible, be compatible with any similar nationally existing generally accepted accounting standards and principles for government.

In establishing the Generally Accepted Accounting Standards and Principles for Illinois State Government, the Comptroller shall consult with the Governor and the other members of the Executive Branch, the Chief Justice of the Supreme Court, and the leadership of the General Assembly and shall provide to these officials draft copies of any proposed standards at least 90 days prior to their adoption and shall consider any responses or suggestions that these officials may present."

FUNDS

The fiscal resources of the State of Illinois are organized and recorded in accounting entities known as funds. Funds are defined and discussed in the "Fund Accounting and Fund Classification" procedure (03.20.10). The important distinction to be noted organizationally is that funds are accounting entities established by law or administrative action for either general or specific purposes. Funds do not imply the physical segregation of cash and/or investments. Funds are groups of accounts which record and control the transactions of the State government agencies established for the purpose of carrying out programs in the public interest.

AGENCIES

The Constitution of 1970 organized the State Government into three branches--Legislative, Judicial and Executive. The Executive Branch includes the Governor and the several departments and agencies responsible to the Governor, as well as the Lieutenant Governor, Attorney General, Secretary of State, Comptroller, and Treasurer. "State agencies" are defined in the State Comptroller Act as all "departments, officers, authorities, public corporations, quasi-public corporations, commissions, boards, institutions, State colleges and universities and all other public agencies created by the State, other than units of local government and school districts." State agencies are frequently classified as "code" and "non-code," which refer to the applicability of the State Administrative Code.

INTERRELATION OF FUNDS AND AGENCIES

As accounting entities, funds record the fiscal activity generated by State agencies. An agency may receive its resources from one or more funds; likewise, a fund may record the fiscal activity for one or more agencies. State agencies which administer funds--as the Department of Natural Resources administers the State Parks Fund--do so pursuant to the statutory or administrative authority which established the funds. An agency which does not control a fund is said to participate or have accountability in the fund which records its transactions.

INTERGOVERNMENTAL RELATIONS

The State of Illinois maintains fiscal relations with the United States and with general and special purpose units of local government within the State.

Hundreds of grants and contracts exist between the State and agencies of the Federal Government. Most of these agreements relate to the sharing of costs for joint programs within Illinois. It is customary for the State to draw the Federal share of these costs, sometimes through a financial intermediary, into special Federal Trust Funds from which they are administered in accordance with established guidelines. The State must make an accounting periodically to the Federal Government to demonstrate proper use and administration of the funds.

Local government units within Illinois derive powers and authority from the State. Fiscal relationships are created through distribution of State resources--such as a portion of Motor Fuel Tax receipts--to local governments. Federal funds are frequently distributed by the State to units of local government. School districts utilize State resources to construct new facilities under lease-purchase agreements with the State. Additionally, local government units function as agents of the State in various fiscal roles.

APPROPRIATION, OTHER EXPENDITURE AUTHORITY
AND BUDGETARY ACCOUNTING

The Comptroller's Accounting records shall provide for the control of fiscal activity against established fiscal plans in the form of appropriations, other expenditure authority and budgets.

Budgeting is a well-established practice of State government which provides a mechanism for control over revenues and expenditures. Budgets are prepared for appropriated funds by individual State agencies, which submit them for review through the Governor's Office of Management and Budget. The Governor may adjust the budgets of agencies responsible to the Governor and may recommend changes in the budget to the General Assembly. After due legislative consideration the budgets mature in the form of appropriation acts, which contain provisions that should be entered into the accounts of appropriated funds in order to facilitate the presentation of fiscal information which will demonstrate that these legal requirements have been satisfied.

For many State agencies, other levels of restrictions of resources are made to enforce further expenditure control. Entry of these restrictions (reversions) into the Comptroller's statewide accounting records is desirable and, in some cases, required to comply with language of the Appropriation Act which requires the Governor's release.

In cases of non-appropriated funds, allotments should be prepared and, where practicable, entered into the Comptroller's statewide accounting system.

Within the State of Illinois, there are essentially two forms of budget and appropriations--"line item" budgeting and "program" budgeting. The form in which the budget is prepared by the agency and the form in which the General Assembly enacts the appropriation are, to a large extent, mutually dependent.

Traditional, or line-item budgets emphasize the exchange of resources for goods or services classified on an organizational basis by the purpose or object of expenditure--such as personal services, commodities, and so forth--as defined in the Finance Act. Their primary purpose is the imposition of accounting and administrative control with respect to readily defined object classifications over organizational units authorized to expend public funds.

Within the traditional budget, planned expenditures for ordinary operations should be clearly segregated from those planned for capital or permanent improvements.

Program budgeting implies the prior definition of governmental activities, functions or programs. It provides a facility for estimating the total costs of specific programs. Using estimates of planned programmatic results, as established by respective program plans, agency officials may assess the prospective cost of these results, and accordingly may make or recommend rational decisions concerning the allocation of scarce resources. By thoughtfully defining and classifying governmental programs, it would be possible to examine results and costs on a statewide basis, rather than agency by agency. State agencies and the General Assembly should have the flexibility to utilize this method of financial planning and control. SAMS should therefore provide for recording and classifying fiscal plans and transactions in either budgetary format.

LEGAL COMPLIANCE

When the presentation of fiscal information in accordance with SAMS accounting and financial reporting policies and procedures conflicts with the presentation required to demonstrate legal compliance, such legal compliance should be demonstrated through the use of supplementary schedules (NCGAS 1, ¶12; GASB Cod. Sec. 1200.113).

If financial statements prepared in accordance with these policies and procedures fail to present information in a manner required to show compliance with legal or contractual provisions, the principles should govern financial statement presentation. This position is justified by the postulate of consistency and comparability, as well as the provisions of Sections 19 and 20 of the State Comptroller Act which require presentation “in such form as will most clearly and accurately set out the current fiscal condition of the State.” Presentation of data to demonstrate legal compliance—for instance, a Federal Trust Fund which may be required to present fiscal data on a cash basis—should be accomplished through the use of supplementary schedules to the financial statements.

SECTION	ACCOUNTING AND FINANCIAL REPORTING POLICIES AND PROCEDURES	PROCEDURE - PAGE NO. 03.20.10 1 of 4
SUB-SECTION	METHODS OF ACCOUNTING	EFFECTIVE DATE July 15, 2002
PROCEDURE	FUND ACCOUNTING AND FUND CLASSIFICATION	REVISION NUMBER NEW

Background

A fund is a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equity or balances, and changes therein, that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations. Funds of the State of Illinois are legal and accounting entities intended to account for the financial transactions of State agencies. The State classifies its funds in accordance with generally accepted accounting principles.

Procedures

At the Agency level, the self-balancing feature of each fund should be accomplished through the double entry method of accounting upon preparation of GAAP reporting packages. This technique embodies the inherent control features of the accounting equation. For each fiscal and accounting entity there should exist a real or implicit ledger of accounts. The classification and recording of each transaction--i.e., each entry to the ledger--should satisfy the accounting equation. It follows that the sum of all debit entries in the ledger must equal the sum of all credit entries, and the fund is thereby self-balanced. The treatment of specific transactions as applied to the Statewide Accounting Management System will be discussed in appropriate sections of the SAMS Manual.

Fund Classification

For purposes of reporting in conformance with generally accepted accounting principles, the financial activities of the State have been classified into the following fund categories:

1. **Governmental Fund Types**

- a. **General Fund** - This fund accounts for transactions related to resources obtained and used for those services traditionally provided by a state government, which are not required to be accounted for in other funds. These services include, among others, general government, public protection and justice, health and social services, employment and economic development, environment and business regulation, transportation, and education (other than institutions of higher education). Certain resources obtained from Federal grants and used to support general governmental activities are accounted for in the general funds consistent with applicable legal requirements.

b. **Special Revenue Funds** - These funds account for transactions related to resources obtained from specific revenue sources (other than for permanent funds or major capital projects) that are legally restricted to expenditure for specified purposes. Special revenue funds account for, among others, Federal grant programs, taxes levied with statutorily defined distributions, and other resources restricted as to purpose.

c. **Debt Service Funds** - These funds account for transactions related to resources obtained and accumulated to pay interest and principal on general long-term obligations (other than capital leases and unfunded retirement cost).

d. **Capital Projects Funds** - These funds account for transactions related to resources obtained and used for the acquisition or construction of major capital facilities including those provided to political subdivisions and other public organizations (other than those financed by proprietary funds, fiduciary funds, and university and college funds).

Such resources are derived principally from proceeds of general obligation bond issues, Federal grants, and operating transfers from general funds.

e. **Permanent Funds** – These funds account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support programs of the State.

2. **Proprietary Fund Types**

a. **Enterprise Funds** - These funds may be used to report any activity for which a fee is charged to external users for goods and services. Activities are required to be reported as enterprise funds if any one of the following criteria is met. The following criteria should be applied in the context of the activity's *principal revenue sources*:

- Activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity. Debt that is secured by a pledge of net revenues from fees and charges *and* the full faith and credit of a related primary government or component unit – even if that government is not expected to make any payments – is not considered to be payable solely from fees and charges of the activity.

⌘ Laws or regulations require that the activity's costs of providing services, including capital costs (such as depreciation or debt service), be recovered with fees and charges, rather than with taxes or similar revenues.

⌘ The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs (such as depreciation or debt service).

- b. **Internal Service Funds** – These funds may be used to report any activity that provides goods or services to other funds, departments, or agencies of the primary government and its component units, or to other governments, on a cost-reimbursement basis. Internal service funds should be used only if the reporting government (i.e. State of Illinois) is the predominant participant in the activity.

3. **Fiduciary Fund Types**

- a. **Pension and Other Employee Benefit Trust Funds** – These funds should be used to report resources that are required to be held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, other postemployment benefit plans, or other employee benefit plans.
- b. **Investment Trust Funds** - These funds should be used to report the external portion of investment pools reported by the sponsoring government (i.e. State of Illinois) in accordance with [GASB Statement No. 31](#).
- c. **Private Purpose Trust Funds** – These funds account for any trust arrangements not properly classified as a pension trust fund or an investment trust fund “under which principal and income benefit individuals, private organizations, or other governments.”
- d. **Agency Funds** - These funds should be used to report resources held by the State in a purely custodial capacity (i.e. assets are equal to liabilities). Agency funds typically involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

General Capital Assets and General Long-term Debt

General Capital Assets. Capital assets acquired with governmental fund resources are accounted for as capital expenditures and not capitalized in the governmental fund financial statements. Those capital assets are referred to as *general capital assets*. General capital assets also include capital assets that are associated with governmental funds that were received through donation, even though not reported as capital expenditures or capitalized in the governmental funds. Since these assets are not reported in the fund financial statements, agencies are required to separately account for and report general capital asset activity on the Form SCO-538.

General Long-term Debt. Unmatured long-term indebtedness, compensated absences, claims and judgments, special termination benefits, and landfill closure and post-closure care costs (other than “specific fund debt” of proprietary and trust funds) are not be reported in the governmental fund financial statements. Those liabilities are referred to as general long-term liabilities. As these liabilities are not reported in the fund financial statements, agencies are required to separately account for and report general long-term liability activity in the SCO Forms 566, 580, and 599.

PROCEDURE	MEASUREMENT FOCUS AND BASIS OF ACCOUNTING	REVISION NUMBER NEW

POLICY

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting, including the encumbrance modification.

The government-wide, proprietary, and fiduciary fund financial statements are reported using the economic resources measurement focus and accrual basis of accounting.

PROCEDURES

Current Financial Resources Measurement Focus and the Modified Accrual Basis of Accounting

Under the current financial resources measurement focus and the modified accrual basis of accounting, revenues are recognized when measurable and available. The State considers all revenues reported in the governmental funds to be available if collected within the lapse period. Application of the “measurable and available” criteria requires judgment, consideration of the materiality of the item in question, and due regard for the practicality of measurement, as well as consistency in application.

Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long term debt, claims and judgments, compensated absences, special termination benefits, and landfill closure and postclosure care costs, which are recognized as expenditures to the extent they have matured (when due). Currently a related liability is incurred when goods or services are received. During lapse period, it must be determined if the payment is for goods or services received before the end of the fiscal year, June 30. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Economic Resources Measurement Focus and the Accrual Basis of Accounting.

Under the economic resources measurement focus and the accrual basis of accounting, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange such as grants and entitlements, should be recognized in accordance with the requirements of [GASB Statements No. 33](#), Accounting and Financial Reporting for Nonexchange Transactions, as amended by [GASB Statement No. 36](#), Recipient Reporting for Certain Shared Nonexchange Revenues. The issuance of debt, payment of debt, and purchases of capital assets is not reported in the operating statement.

OVERVIEW

Capital assets include infrastructure, land, land improvements, site improvements, buildings, building improvements, equipment, works of art and historical treasures, and all other tangible assets that are used in operations and that have expected useful lives extending beyond a single reporting period. Capital assets are accounted for differently in the basic financial statements depending on the measurement focus used.

- Capital assets acquired with governmental fund resources are accounted for as capital expenditures and not capitalized in the governmental fund financial statements. Those capital assets are referred to as general capital assets. General capital assets also include capital assets that are associated with governmental funds that were received through donation, even though not reported as capital expenditures or capitalized in the governmental funds.
- Capital assets acquired with proprietary or fiduciary fund resources or donated to those funds are capitalized in those funds and depreciated in those funds over their estimated useful lives.
- In the government-wide financial statements, capital assets, including general capital assets, are capitalized and depreciated over their estimated useful lives (except for land, land improvements, construction in progress, infrastructure being accounted for under the modified approach and certain works of art and historical treasures).

The following table provides an overview of capital asset reporting for different situations.

DEFINITIONS

Infrastructure

Infrastructure assets are long-lived capital assets that normally are stationary in nature and normally can be preserved for a significantly greater number of years than most capital assets. Examples of infrastructure assets include roads, bridges, tunnels, drainage systems, waterways, water and sewer systems, dams, and lighting systems (attached to infrastructure assets, e.g., interstate lighting, airport runway lighting). Buildings, except those that are an ancillary part of a network of infrastructure assets, should not be considered infrastructure assets.

Land

Land is unimproved realty (typically the total closing cost).

Land Improvements

Land improvements are the non-depreciable costs and betterments of preparing the land for its intended use. An example of a land improvement is leveling and grading.

Site Improvements

Site improvements are the depreciable costs and betterments affixed to land that generally add to its value and functionality. Examples of site improvements include, but are not limited to, temporary structures, access roads, parking lots, fencing, lighting (e.g., lights in parking lots, lights along walkways), tunnels that connect buildings, gas, electricity or steam transmission lines, and campsites.

Buildings

Buildings are permanent structures designed to house persons or personal property, together with the initial cost of fixtures attached to and forming a permanent part of the building (i.e. immovable).

Building Improvements

Building improvements are capital expenditures that materially extend the useful life of a building, increase the capacity and/or efficiency of the building, or adapt to a new use. Building improvements also include capital expenditures that add value, extend the useful life, or adapt a leased building to a new use.

Works of Art and Historical Treasures

Works of art and historical treasures are assets that have cultural, aesthetic, or historical value and often are protected and preserved in a manner greater than that for other assets. Works of art and historical treasures are collections or individual items of significance that are owned by an agency which are not held for financial gain, but rather for public exhibition, education or research. Examples include Lincoln manuscripts, historic buildings, and civil war flags.

Equipment

Equipment assets are typically any **movable**, non-consumable, tangible personal property used in the operations of the State. Equipment includes the following assets:

- **Vehicles** –including, but not limited to, automobiles, trucks, trailers, aircraft, motorcycles, and farm vehicles.
- **Furniture and Fixtures** - movable equipment incorporated in a building including, but not limited to, office and building furnishings, communication devices, and other assets necessary to the use of the premises.
- **Library Assets** – includes assets that do not meet the requirements of non-capitalization for Works of Art and Historical Treasures (under paragraph 27 of [GASB 34](#)). Examples of library assets include: information sources that are circulated to students or the general public; including books, journals, periodicals, audio/visual media, computer-based information, manuscripts, maps, documents, and similar items which provide information essential to the learning process or which enhance the quality of academic, professional, or research libraries.
- **All other moveable tangible personal property used in the operations of the State.**

Capital expenditures that add value, extend the useful life, or adapt “equipment” (including leased equipment) to a new use and exceed the capitalization threshold for “equipment” should also be included in this category.

Construction in Progress

The accumulation of costs incurred during construction of assets. The accumulated costs are held in Construction in Progress until such time as the project is determined to be “substantially complete” (i.e. ready for its intended use).

Repairs and Maintenance

Repairs and maintenance include the ordinary and necessary projects needed to keep an asset serviceable through its expected life. Repairs and maintenance projects, by definition, do not increase the capacity or operating efficiency or extend the useful life of the asset. Repairs and maintenance costs are not capitalized, but rather expensed in the period incurred.

Network

A network is composed of all assets that provide a particular type of services for the State or an agency. A network of assets may be only one asset that is composed of many components. For

example, a network of infrastructure assets may consist of a series of inter-connected highways and roads.

Subsystem

A subsystem is composed of all assets that make up a portion or segment of a network. For example, all the roads of the State could be considered a network of infrastructure, while interstate highways, state highways, and rural roads could each be considered a subsystem of that network.

Capitalization Threshold

The dollar value at which the State elects to capitalize tangible assets that are used in operations and that have initial useful lives extending beyond a single reporting period.

Depreciation

A systematic and rational method of allocating the cost of a capital asset to the periods benefiting from its use.

Composite Methods

Calculating depreciation for a collection of similar assets (group depreciation method), such as traffic signals or lane-miles or dissimilar assets, such as all assets composing a transportation network or building.

Modified Approach (Infrastructure)

The election not to depreciate infrastructure assets that are part of a network or subsystem of a network that meet two specific requirements. First, the agency manages the eligible infrastructure assets using an asset management system that has certain specified characteristics, second, the agency documents that the eligible infrastructure assets are being preserved approximately at (or above) a condition level established and disclosed by the agency.

POLICY

Capital assets should be reported at actual or estimated historical cost or, if donated, at their estimated fair value at the time of acquisition. Historical cost includes the amount paid for the asset, capitalized interest for constructed proprietary fund assets, and ancillary charges necessary to place the asset into its intended location and condition for use. Interest should not be capitalized for constructed governmental assets.

PROCEDURES

Capital assets should be reported at historical cost and should include ancillary costs to place the asset in service such as the cost of freight, site preparation, architect and engineering fees, etc. If something other than cash is used to pay for the asset, then the fair-market value at the time of acquisition of the non-cash payment or consideration determines the asset's cost or acquisition value. When the value of the consideration paid cannot be determined, the asset's fair market value at the time of acquisition determines its cost.

The following is a description of capital asset valuation by asset category:

Infrastructure

The cost of infrastructure includes all labor, material and professional services to construct the asset together with insurance, interest (for proprietary funds only), and other indirect costs incurred during the period of construction, to place the asset into its intended use. The cost should also include the amount paid for buildings (i.e. purchase price or labor, material and professional services if constructed) that are ancillary to a network or subsystem of infrastructure. The amount (type) of costs that should be capitalized depends on whether the modified approach is used to account for the respective network (or subsystem) of infrastructure. See the capitalization policy for infrastructure assets in Procedure 03.30.30.

Land and Land Improvements

The total asset value of land includes two basic elements - acquisition cost (land) and all non-depreciable costs to prepare land for its intended use (land improvements). The acquisition cost of land includes the purchase price of the real estate parcel together with all ancillary expenses up to and including transfer of title. These consist specifically of the contract price, delinquent tax liabilities assumed, expenses for settling other liens against the property, title search, and legal fees.

Land acquired through eminent domain proceeding should be reported at the settlement amount up to the fair value of the land. Amounts paid in excess of the fair value should be expensed.

Before land is ready for its intended use, costs related to non-depreciable land improvements may be incurred. These costs may be related to grading, filling, drainage, landscaping, and similar items. The costs of improvements become integral to the land cost. Land improvements should be reported at cost, estimated cost, or estimated fair value at the date of acquisition.

Site Improvements

Site improvements should be reported at cost, estimated cost, or estimated fair value at date of acquisition.

Buildings and Building Improvements

An agency may obtain buildings by purchasing them, by contracting with an outside party to construct them, or by constructing them internally. Regardless of the way a building is acquired, the general valuation guideline remains the same: the Agency should capitalize all necessary costs to obtain the building and to get it ready for its intended use. The cost of the building includes all labor, material and professional services to construct the building together with insurance, interest (for proprietary funds only), and other indirect costs incurred during the period of construction, to place the building into its intended use.

The valuation of building improvements includes all costs incurred to complete the improvement. The valuation of building improvements is similar to that described for buildings above.

Equipment

The basic cost of equipment usually is determined by all of the costs necessary to acquire the asset and place it into service. Included in the cost of equipment in addition to the net invoice cost are freight charges, in-transit insurance, applicable taxes, the cost of special foundations or bases; and assembly, installation, and testing costs.

Works of Art and Historical Treasures

The cost of works of art and historical treasures includes the amount paid or fair value at the date of acquisition if donated, and other costs necessary to put the asset into its intended use or place of exhibition. Included in the cost of works of art and historical treasures are freight charges, in-transit insurance costs, applicable taxes, the cost of special foundations or bases, and assembly,

and installation costs. All of these costs are necessary to obtain the asset and get it ready for its intended use or exhibition.

Valuation of Donated Property

Land, buildings, works of art, historical treasures, and/or equipment received as a gift or donation should be recorded in the agency's records at their fair market value at time of donation. The fair market value is generally established by an appraisal performed by a qualified appraiser.

Capitalization of Interest on Constructed Assets for Proprietary Funds

Agencies that construct assets, where construction of those assets are accounted for in a proprietary fund (e.g., enterprise fund, internal service fund) should capitalize interest (in accordance with [FASB Statement No. 34](#), Capitalization of Interest Costs) as part of the ancillary cost of the asset if long-term debt is recorded within the proprietary fund. Interest should not be capitalized for constructed governmental assets or assets constructed by the Capital Development Board (with general government resources/appropriations) that are subsequently transferred (contributed) to a proprietary fund.

The amount of interest to be capitalized represents interest that the proprietary fund could have avoided had the asset not been constructed. The amount of interest to be capitalized is determined by:

- multiplying the actual expenditures for the qualifying asset during the period
- multiplied by the number of months outstanding,
- multiplied by the appropriate interest rate.

The interest rate for capitalization purposes is to be based on the rates of the proprietary fund's outstanding borrowings. If the proprietary fund associates a specific new borrowing with the asset, it may apply the rate on that borrowing to the appropriate portion of the expenditures for the asset. A weighted average of the rates on other borrowings of the proprietary fund is to be applied to expenditures not covered by specific new borrowings.

Capitalized interest cannot exceed actual interest costs incurred during the period. If the effect of interest capitalization is immaterial (10% of the capitalization threshold of the category of capital asset being constructed or \$10,000; whichever is less), interest capitalization is not required. Capitalization of interest should cease upon the constructed asset being ready for use or put into use.

Additionally, interest shall not be capitalized for the following types of assets:

- Assets that are in use or ready for their intended use in the activities of the proprietary fund
- Assets that are not being used in the State's operations and that are not undergoing the activities necessary to get them ready for use in the State's operations
- Land that is not undergoing activities necessary to get it ready for its intended use

The amount of capitalized interest should be included as part of the asset's historical cost and reported on Form SCO-538. Capitalized interest included as part of the historical cost of an asset, should be depreciated over the useful life of the asset.

POLICY

Capital assets owned by an agency should be capitalized in the government-wide financial statements and in proprietary and fiduciary funds (except for certain works of art and historical treasures as discussed in the procedures section of this policy) that **individually** equal or exceed the following capitalization threshold amounts:

Capital Asset Category	Capitalization Threshold
Infrastructure	\$250,000
Land	\$ 100,000
Land Improvements	\$ 25,000
Site Improvements	\$ 25,000
Buildings	\$ 100,000
Building Improvements	\$ 25,000
Equipment	\$ 5,000
Works of Art, Historical Treasures	\$ 5,000

All assets acquired through capital leases and installment purchases should be capitalized regardless of the capitalization threshold.

For capital assets (including infrastructure) that are depreciated, expenditures that extend the useful lives of capital assets beyond their initial estimated useful lives (preservation costs) or improve their efficiency (improvements) or capacity (additions) are capitalized, whereas expenditures for repairs and maintenance are expensed.

For infrastructure assets that are not depreciated under the modified approach, expenditures for additions and improvements to eligible infrastructure assets (which increase the capacity or efficiency of assets rather than preserve their useful lives) are capitalized. All other expenditures, even preservations costs, are expensed in the period incurred.

PROCEDURE	CAPITALIZATION	REVISION NUMBER NEW

Assets acquired in various amounts for a single purpose which may not individually meet the capitalization threshold may be capitalized if the estimated total of the project exceeds the capitalization threshold. For example, an agency may purchase several parcels of land which are individually less than the capitalization threshold for land. However, if these parcels were purchased for a single purpose, i.e. a State park, and the total is greater than the threshold, then the total amount may be capitalized. Similarly, if an agency acquires an item of equipment with a cost less than the capitalization threshold for equipment and the agency intends to improve the equipment item, and the cost of the asset and improvements are expected to exceed the threshold, the total cost of the equipment should be capitalized.

Each agency is required to maintain a capital asset management system which includes for all capital assets, at a minimum, the major asset category, description of asset, date of acquisition, method of acquisition, cost or other value, responsible organizational unit, location of asset, identification of applicable network or subsystem (for infrastructure assets), estimated life, estimated salvage value, annual and accumulated depreciation, appropriation, and insured value. If an agency reports infrastructure assets under the modified approach, the capital asset management system should also include condition assessment and maintenance data. If an agency reports works of art and historical treasures, the capital asset management system should also specify whether the asset is exhaustible or inexhaustible.

Agencies should conduct an inventory of all capital assets on an annual basis in accordance with Procedure 29.10.10.

PROCEDURES

Capitalization of Works of Art and Historical Treasures

Unless an agency meets the following conditions, it should capitalize collections of and additions to works of art and historical treasures. Agencies are encouraged, but not required, to capitalize those items that meet all of the following conditions:

- a) Held for public exhibition, education, or research in furtherance of public service, rather than financial gain;
- b) Protected, kept unencumbered, cared for, and preserved; and
- c) Subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

Individual items that are not part of a collection should always be capitalized if the cost of that item exceeds the capitalization threshold.

Capitalization of Library Resources

Library resources should be capitalized as a collection. Annual additions to the collection should be capitalized as a single record if the addition exceeds the capitalization threshold for equipment.

GENERAL GUIDANCE ON DETERMINING OWNERSHIP OF CAPITAL ASSETS FOR REPORTING PURPOSES

Capital assets, including infrastructure, should be reported by the agency that owns the asset. In some situations, ownership of assets may be supported by legal documentation, such as deeds or title that is conveyed when the government acquires the assets. In other situations, ownership may be supported by legal or contractual provisions that stipulate ownership under certain conditions. However, in still other situations, ownership may be unclear.

Custodians of capital assets generally have the responsibility to document the ownership to such assets. If ownership to an asset cannot be documented, the asset and corresponding depreciation expense should not be reported by agencies. Documents supporting ownership to an asset should generally be maintained throughout the service life of the asset. In most cases, the ownership of these assets is straightforward; however, in certain cases (e.g., assets that are jointly owned by the State of Illinois and neighboring states), the ownership of an asset may be unclear. These procedures provide guidance to State agencies in determining the ownership of capital assets that they manage and/or maintain.

Guidance on Ownership of Capital Assets Other Than Infrastructure

Capital assets other than infrastructure include such items as land, land improvements, site improvements, buildings, building improvements, equipment, works of art and historical treasures. Agencies should follow the following guidance to ensure that assets recorded are properly owned by the State.

Documentation Requirements Supporting Ownership:

- **Land** (including right-of-way and easements) that is capitalized by an agency should be supported by legal documentation (e.g., legal title documentation, purchase documents, grant documents, etc.) that substantiates the State's legal title to the asset. This documentation should be maintained by an agency in perpetuity due to the inexhaustible nature of the asset. Further, this documentation should be organized and maintained in a manner such that it is available for review by internal and external auditors, Comptroller's Office staff and other interested parties.

- **Land improvements, site improvements, buildings, and building improvements** should be supported by purchasing documentation (e.g., contracts, requisitions, purchase orders, payment documents, etc.). The documentation should include content such that the type of asset, location of asset, purchase cost, and date of purchase may be determined by an independent third party. This documentation should be maintained as long as these assets are in use by the State or they become obsolete.
- **Equipment** that is capitalized by an agency should be supported by the legal title of the asset. This documentation should be maintained by the agency until the agency disposes of the asset. In cases where legal titles to these types of assets are not commonly issued, the ownership of the asset should be substantiated by purchasing documentation (e.g., requisitions, purchase orders, receipting documents, payment documents, etc.). The documentation should identify a specific asset and include content such that the type of asset, purchase cost and date of purchase may be determined by an independent third party.
- **Works of art and historical treasures** that are capitalized by an agency should be supported by purchasing documentation (e.g., contracts, payment documents, etc.) if the assets have been purchased by the State. If the assets have been donated, the agency should maintain records related to the donation such as title transfers, donor agreements, etc. In addition, records of the appraisals of assets that are donated should be similarly maintained. These records should be maintained as long the State maintains or disposes of the asset.

These documentation requirements apply to all capital assets regardless of whether they were originally purchased/placed into service by an agency or donated to the State by a third party (e.g., private entities, the federal government, etc.).

Guidance on Determining the Reporting Agency for Capital Assets

For reporting purposes, the following guidance should be followed by State agencies:

- **For a capital asset that may be shared or used by more than one State agency**, the asset should be recorded by the agency that originally purchased the asset (or placed it in service).
- **When an asset is transferred from one agency to another**, the legal title to the asset should be assigned to the receiving agency.
- **In the case where an agency occupies a building that is owned by another agency**, the owner agency is responsible for reporting both the value of the building and all costs

of improvements made to the building, whether by the owner agency or occupying agency, that extends the useful life of the building beyond one year.

Guidance on Ownership of Infrastructure Assets

Infrastructure assets include items such as roads, bridges, tunnels, drainage systems, waterways, water and sewer systems, dams, and lighting systems. In the majority of cases, a legal title document is not created when these assets are constructed or placed into service. Thus, the ownership of these assets should be supported by purchasing documentation (e.g., contracts, requisitions, purchase orders, payment documents, etc.). The documentation should include content such that the method of acquisition, type of asset, location of asset, vendor name/address, purchase cost and date of purchase may be determined by an independent third party.

In cases where infrastructure assets are jointly developed or constructed by the State of Illinois and neighboring states, Illinois agencies should record only those assets which are ***maintained*** by the State. For example, in the case where a bridge spanning the Mississippi River is jointly funded by the states of Illinois and Missouri, the State of Illinois should record the bridge only if it has the primary responsibility for ***maintaining*** the asset. Alternatively, if the State of Illinois contributes financial resources to the ongoing maintenance of the bridge, but maintenance procedures are performed by the State of Missouri, the State of Illinois would not record the asset.

Based on the criteria established above, agencies should record the cost of infrastructure assets that they maintain. As such, the full cost of an asset should be recorded regardless of the manner in which the asset construction costs are financed. For example, if a bridge is jointly funded by the State of Illinois and the State of Wisconsin and the State of Illinois has the responsibility to maintain the bridge, the State of Illinois should record the full cost of construction, with Wisconsin's portion of the funding being recorded as an other financing source.

Location of infrastructure assets does not determine what entity should report particular infrastructure assets. Roads within a county may be owned or managed by a city, the State, or a special district. Those roads would not be considered county assets, even though they are physically located within the county, because the county does not own the roads or (if ownership is unclear) have primary responsibility for managing the roads.

TRANSFERRING OWNERSHIP OF CAPITAL ASSETS

This section describes the procedures to be followed by State agencies and component units when accounting for and reporting transfers of capital assets. In all situations described below, if an agency or component unit is transferring an asset in which it is evident that the asset has been

impaired (the economic value of the asset is substantially below the book value), the asset should be written down to reflect impairment prior to the transfer of the asset.

Transfers to/from Other Governments

On occasion, the State may transfer ownership of capital assets (including infrastructure) to a local government. In such cases, the transferring agency should remove the net book value of those capital assets from its financial statements and capital asset records. Also, the transferring agency should report an expense of the applicable function equal to the fair market value of the transferred assets. The difference between the fair market value and the net book value at the time of the transfer should be recorded as a gain or loss on the disposition of capital assets. Similarly, local governments (and others) may donate capital assets to the State. Agencies that receive donated capital assets should capitalize the donated assets at their fair market value at the date of donation. The receiving State agency should also report the fair market value of the donated capital assets as a program revenue of the applicable function. Agencies should refer to [GASB Statements No. 33](#) and [No. 34](#) for additional guidance.. The transaction may involve the reporting of extraordinary or special items.

Transfers from Capital Development Board (CDB)

The costs of projects involving the construction of new assets or major remodeling, renovation and rehabilitation projects (as defined by the CDB) which are funded by direct appropriations to the CDB will be reported by the CDB as “Construction in Progress” until the CDB determines the project to be “substantially complete” (i.e. ready for its intended use). At the time the project is substantially complete, the CDB will use the CDB Agency Turnover Report to transfer the project cost to the agency. The agency is then responsible for recording the capital asset on their books and records.

Remodeling, renovation and rehabilitation projects that are not classified as “major” by the CDB will not be accounted for as Construction in Progress (CIP). Costs associated with these projects will be transferred to the agencies on a quarterly basis, through the use of the “CDB Agency Turnover Report.” These costs will be classified as Non-CIP costs. At the time of the transfer, these costs should be recorded by the agency in their capital asset records or as a repair and maintenance costs for that period. The guidance for distinguishing between repairs and maintenance and capital items is provided in SAMS 03.30.10.

Transfers between Primary Government Agencies

Sometimes, a capital asset may be transferred from one primary government State agency to another primary government State agency. In this situation (except for transfers to CMS Surplus

Property, which is discussed separately below), the receiving agency should record the asset's original cost and related accumulated depreciation at the time of the transfer, and depreciate the asset over the useful life remaining when it is transferred. Gains and losses should not be recorded by the transferring agency. Instead, the transferring agency should record a transfer-out equal to the net book value at the time of the transfer and write off the cost of the asset and related depreciation. Similarly, the receiving agency should record a transfer-in equal to the net book value at the time of the transfer and record the asset at cost with related depreciation.

Transfers involving Component Units

Occasionally, capital assets are transferred between the primary government and component units, or between component units of the State. In these situations, agencies and component units should follow the applicable guidance provided above for "Transfers to/from Other Governments". Receiving entities should follow the same guidance as the receiving agency above, while disposing entities should follow the same guidance as the transferring agency above.

**ASSETS TRANSFERRED TO CENTRAL MANAGEMENT
SERVICES (CMS) FOR DISPOSAL**

Agencies and component units commonly transfer assets to make optimum use of the asset lives. Most equipment items and other low value assets are transferred to CMS for disposal at the end of their useful lives. The assets are transferred to CMS at zero value. CMS considers the transferred items to be inventory. Some inventory items are transferred to State agencies and others in compliance with the Property Control Act (30 ILCS 605/). CMS disposes of the remaining inventory items in accordance with the provisions of Section 7 of the Property Control Act (30 ILCS 605/ 7).

Generally, if assets transferred to CMS Surplus Property have net book value, and the net book value is not significant, a loss should be recognized on the transfer according to the guidance below. If the asset is later transferred by CMS to another State agency, the receiving entity should record the receipt of the asset at zero cost.

In extremely rare cases, high value assets such as aircraft, land, buildings or technical equipment items may be transferred to and/or from CMS. In such rare cases, the financial reporting treatment would be prescribed by the Comptroller's Office Financial Reporting Department on a case-by-case basis.

Recognition of Loss on Disposal

Capital Assets transferred to CMS for disposal are generally at or beyond the end of the expected useful lives. However, occasionally some assets may be transferred with a net book value. In cases where assets are transferred to CMS before they are fully depreciated, or where there exists a salvage value, agencies should report a loss on the disposition of the asset. The process to be used to report a loss on disposal of a capital asset is described in the table below.

Recognition of Gain on Disposal of Capital Assets

CMS generally reports as revenue to an internal service fund the amounts realized upon disposal of assets sold at auction periodically throughout the year. However, in the event that an agency has been granted authority to dispose of assets, and a gain has been realized, the gain should be reported in the manner described in the table below.

Disposal of Capital Assets

Upon disposition of an asset to a non-State entity, a gain or loss must be recognized as the difference between the net book value of the assets disposed and net proceeds received (i.e. cash and or fair value of dissimilar assets). The following table describes the accounting for disposals of assets:

Accounting Treatment	Governmental Funds	Proprietary Funds	Fiduciary Funds (excluding agency funds)
Financial Statements	Report proceeds as other financing sources or special item	Remove the assets' cost and any accumulated depreciation Report gain or loss on sale as special item or as revenue or expense (usually nonoperating)	Remove the assets cost and any accumulated depreciation Report gain (or loss) on sales as an addition (or deduction)

POLICY

The net cost of capital assets (historical cost less estimated salvage value) should be depreciated and reported in the government wide statement of activities and in proprietary and fiduciary funds over their estimated useful lives except as discussed below. The straight-line method of depreciation should be used. Capital leases should be amortized over the term of the capital lease.

Assets that are inexhaustible (i.e. land and land improvements, certain works of art and historical treasures), infrastructure assets using the modified approach, and construction in progress should not be depreciated.

Modified Approach

An alternative to the depreciation of infrastructure assets that are part of a network or subsystem of a network (eligible infrastructure assets) is the *modified approach*. Agencies that meet the following requirements and obtain written approval from the Comptroller's Office can elect to use the modified approach for eligible infrastructure assets in lieu of the depreciation method:

Requirements for Using Modified Approach

- The Agency must have an asset-management system with certain features. The system has to:
 - a) have an up-to-date inventory of the infrastructure assets;
 - b) estimate the annual costs to maintain and preserve those assets at the condition level the State has established and disclosed through administrative or executive policy or legislative action; and
 - c) assess the condition of the assets periodically, summarizing the results using a measurement scale. The condition assessments also have to be documented in such a manner that they can be replicated.
- The agency must document that the eligible infrastructure assets are being preserved approximately at (or above) the condition level the agency has established and disclosed. An agency that uses the modified approach has to document that it has performed a complete condition assessment of the assets at least every three years. The agency also has to document that the results of the three most recent complete condition assessments provide reasonable assurance that the assets are being preserved approximately at (or above) the intended condition level.

PROCEDURES

Depreciation is a systematic method of allocating the cost of an asset over its estimated useful life. It is not based upon deterioration of the asset in any particular time frame, but rather it is a method of accounting for the consumption of long-lived assets due to use in operations or obsolescence. Also, included in depreciation expense is an allocation of the cost of any improvements placed in service after initial acquisition that benefit future periods.

Depreciation is the process of allocating the cost of tangible property over a period of time, rather than deducting the cost as an expense in the year of acquisition. Generally, at the end of an asset's life, the sum of the amounts charged for depreciation in each accounting period (accumulated depreciation) will equal original cost less salvage value.

General Procedures for Calculating Depreciation

The following five factors must be known to calculate depreciation on a capital asset:

- the date the asset was placed in service;
- the asset's cost or acquisition value;
- the asset's salvage value;
- the asset's estimated useful life; and
- the depreciation method

Service Date

To avoid the complication of depreciating each asset from the specific date on which it was placed in service, GAAP supports guidelines that assume various assets are placed in service or disposed of at designated dates throughout the year. These guidelines are called averaging conventions.

There are five averaging conventions: (1) Full-Month convention, (2) Half-Year convention, (3) Modified Half-Year convention, (4) Mid-Month convention, and (5) Mid-Quarter convention. The Comptroller's Office recommends agencies use the Full-Month convention.

Example Full-Month Convention

The following example illustrates the use of the Full-Month convention: An asset was purchased on July 8, 20X2, and it was disposed of on October 3, 20X3. For purposes of calculating depreciation, an entire month of depreciation should be recorded in the month the asset was purchased and disposed. Accordingly, one month of depreciation would be recorded in July 20X2 and in October 20X3.

Acquisition Value

See SAMS Procedure 03.30.20 for guidance on valuation of capital assets.

Salvage Value

The salvage value of an asset is the value it is expected to have when it is no longer useful for its intended purpose. In other words, the salvage value is the amount for which the asset could be sold at the end of its useful life. This value can be based on (1) general guidelines from some professional organizations, (2) information from other governmental entities, (3) internal experience, or (4) professionals such as engineers, architects, etc. It is possible that certain assets will have no salvage value.

Estimated Useful Life

Capital assets should be depreciated over their expected useful lives. Agency management should give consideration to the nature of the asset's intended service and the design or acquisition objectives when determining useful lives. The following table is an example of useful lives by asset category:

Capital Asset Category	Estimated Useful Lives (In Years)
Infrastructure:	
Easements	No depreciation
Drainage Systems	20-40
Water Systems	20-40
Roads and Highways (not including right of way):	
Concrete	15-40
Asphalt-rural	20-40
Asphalt- urban	5-25
Non-paved	5-50
Land & Land Improvements	No depreciation

Works of Art and Historical Treasures	5-7

Equipment maintained by the IOC's capital lease system will be depreciated over the life of the lease. The IOC will supply depreciation amounts as part of the annual GAAP reporting process.

Depreciation Method

There are many different methods used to calculate depreciation including straight-line, decreasing charge methods (i.e. declining balance, double declining balance, and sum of the year's digit), increasing-charge methods (i.e. sinking fund and annuity methods), and unit of production. For statewide financial statement purposes, the straight-line method should be used. The straight-line method requires that the salvage value be subtracted from an assets' acquired value to determine its depreciable basis. Using the straight-line method, the depreciable basis is divided by the estimated useful life (as outlined previously in this section), to calculate the amount of annual depreciation.

Agencies should depreciate capital assets on an individual unit basis unless written permission is obtained from the Comptroller’s Office to use a group or composite depreciation method for certain networks or subsystems of infrastructure. Once a method for a particular asset is chosen, it must generally be used for the life of the asset.

Example Straight-line Depreciation Calculation

To illustrate the straight-line depreciation calculation, assume an agency purchases a one-ton truck. Pertinent data includes the following:

Cost of truck	\$32,000
Estimated useful life	10 years
Estimated salvage value	\$ 2,000

The annual depreciation expense for the truck would be calculated as follows:

$\frac{\text{Cost of truck less salvage value}}{\text{Estimated useful life}}$	= Annual Depreciation expense
$\frac{\$32,000 - \$2,000}{10}$	= \$3,000

Depreciation of works of art and historical treasures

Capitalized collections or individual items that are exhaustible, such as exhibits whose useful lives are diminished by display or educational or research applications, should be depreciated over their estimated useful lives. Depreciation is not required for collections or individual items that are inexhaustible.

Depreciation of Library Resources

Additions to library resources are capitalized as a single record in the year added and depreciated over the estimated useful life using one of the five averaging conventions discussed above. The same averaging convention should be used consistently from year to year to report depreciation.

Classification of Depreciation Expense in Government-wide Statement of Activities

Depreciation expense should be reported in the government-wide statement of activities as a direct expense of the function that is specifically identified with the underlying capital assets. Each agency's applicable function is defined in SAMS procedure 11.50.50. Most agencies report all their activities only under one function. For these agencies, depreciation expense should be reported entirely as a direct expense of the applicable function for that agency. For those agencies that report their activities under multiple functions, depreciation expense should be allocated to the appropriate functions based on the function of the underlying asset. In some situations, an asset may be shared by multiple functions. Accordingly, depreciation expense for shared assets should be allocated rationally and ratably to the appropriate functions based on each function's estimated use of the asset.

Modified Approach for Infrastructure

The modified approach for infrastructure asset reporting is not a required approach, but rather an option that may be adopted by agencies that own and manage them. If an agency is contemplating the use of the modified approach, agency management should be fully aware of the policy, information systems and reporting requirements and the related costs and benefits of implementing this reporting approach. Further, an agency that is planning to utilize the modified approach in the future is required to contact appropriate Comptroller's Office personnel to ensure that its plans are congruent with those of other agencies with similar assets. This coordination is critical to ensure consistency in the statewide reporting of similar assets managed under the modified approach.

Agencies that manage several types of, networks, or subsystems of infrastructure assets may utilize the modified approach for reporting information on all these assets or a particular type, network or subsystem of assets. If the modified approach is used, the agency must meet all the requirements contained in this Procedure.

Notification of Election to Adopt Modified Approach

At a minimum, an agency that intends to report infrastructure assets under the modified approach, must provide a written request to the Comptroller's Office prior to the year of adoption. The notification must contain the following elements:

1. A clear description of the infrastructure assets for which the agency proposes to report under the modified approach and how those assets are currently classified (e.g., network, subsystem, etc.);

STATE OF ILLINOIS
OFFICE OF THE COMPTROLLER

SECTION	ACCOUNTING AND FINANCIAL REPORTING POLICIES AND PROCEDURES	PROCEDURE - PAGE NO. 03.30.40 7 of 10

PROCEDURE	DEPRECIATION	REVISION NUMBER NEW

2. Capitalized cost and related depreciation of these assets as of last reporting period;
3. Description of the agency's asset management system and related functionalities that address the reporting requirements established in this Procedure;
4. Brief description of the agency's proposed condition assessment methodology;
5. Proposed established condition level of assets;
6. Estimated budgetary implications of utilizing the modified approach; and
7. Other useful information related to this reporting approach.

Before implementing the modified approach, the agency should be prepared to work closely with Comptroller's Office personnel to develop and/or revise appropriate policies, procedures, systems reporting standards, etc. in order to utilize the modified approach on a prospective basis.

Requirements for Using Modified Approach

In order to utilize the modified approach, an agency must satisfy the following requirements (in addition to the basic notification requirements outlined above):

- **Asset Management System** - The agency must manage its infrastructure assets utilizing an asset management system that includes an inventory of the assets that are currently managed and maintained by the agency. The inventory and related asset data must be maintained in sufficient detail to produce the information required by this Procedure for disclosure purposes; however, the inventory does not have to provide a detail of individual assets. For example, an inventory for a road subsystem may provide an aggregate of pavement miles by type and not provide detail by specific location. The nature and degree of aggregation should be defined in the agency's implementation policies and procedures.
- **Establish Condition Level** - The agency must establish a minimum infrastructure asset condition level at which it plans to maintain and preserve its assets. Asset condition levels should be established as an integral part of an agency's normal planning and budgeting process with input from appropriate agency management, the Governor's Office and citizens. Asset condition levels may be established by the agency for a network, subsystem or type of asset depending on its overall asset management methodology. For example, if an agency defines a transportation network consisting of several subsystems (three types of roads, two types of bridges and lighting systems), it could establish an individual condition level for each subsystem. Alternatively, it

could establish a condition level for the entire network based on an aggregate asset management methodology that takes into account the condition levels of each subsystem. The agency must document its planned condition level goals and measurement policies and procedures for review by external auditors and/or Comptroller's Office financial reporting personnel.

- **Estimate Annual Maintenance Expenditures** - The agency's asset management system must be capable of estimating the annual amount of expenditures necessary to maintain and preserve its assets at the established condition level(s).
- **Perform Condition Assessment** - The agency must perform or have established procedures to perform condition assessments of its infrastructure assets on a consistent and periodic basis (but at least every three years). These condition assessments must be summarized into information that is useful to users of the financial statements utilizing a measurement scale. These assessments may be based on sampling techniques and/or revolving evaluations of assets. For example, an agency could establish an asset condition methodology that assigns a condition rating (scale from 1 to 10) to concrete bridges based on a weighting of three factors: 1) visual inspection; 2) structural evaluation utilizing detection equipment; and 3) age of the bridge. Each year, the agency conducts condition assessments on a sample of bridges and assigns an overall rating to each bridge based on the three factors. The results of the condition assessments are utilized to extrapolate the overall condition of the agency's bridges utilizing the established scale. The documentation supporting the condition assessment should be sufficiently clear to permit review by external auditors and/or representatives of the Comptroller's Office. The documentation of the condition assessment should include coverage of the significant steps of the process, the results and the conclusions. The documentation should permit the independent reviewers to reach the same conclusions reached by the technicians that prepared the assessment.
- **Document Asset Management Methodology** - The agency must document its asset management methodology, the basis for its established asset condition levels and related assessments, and related assumptions. Generally, this documentation should be summarized into an asset management plan that is adopted by the agency. The plan and related supporting documentation should be available upon request for use by the Comptroller's Office, auditors, legislators, citizens or other stakeholders.

- **Document Condition Assessment** - The agency must document its asset condition assessments in a manner such that they may be reviewed, evaluated and/or replicated by a qualified independent third-party. The level of documentation maintained by the agency should be determined based on industry practices, professional standards and management judgment.

Discontinuance of Modified Approach

An agency may no longer use the modified approach for reporting infrastructure assets if it fails to meet the requirements outlined above. Any of the following reasons will require an agency to utilize the depreciation approach to infrastructure reporting:

- Failure to perform a replicable condition assessment at least every three years;
- Failure to document the condition assessment properly;
- Inability to demonstrate that assets were not maintained at the condition level established by the agency; or
- Inability to provide the proper disclosure information to Comptroller's Office for CAFR preparation purposes.

An agency must communicate to the Comptroller's Office no later than 30 days after it becomes aware that it will no longer satisfy the requirements of the modified approach.

If an agency fails to satisfy any of the above requirements, depreciation of the infrastructure assets would begin in the fiscal year subsequent to the fiscal year that the requirements outlined in this Procedure are not met. For reporting purposes, an agency should continue to report its infrastructure assets at historical cost at transition to the depreciation approach. Preservation costs that were expensed during previous reporting periods (when utilizing the modified approach) should not be added back into the capitalized historical costs of the infrastructure assets. However, these costs should be capitalized in prospective reporting periods.

For the fiscal year in which transition to the standard approach occurs and for future reporting periods, the agency should calculate and report depreciation on its infrastructure assets..

Requirements for Reporting to Comptroller's Office

Agencies utilizing the modified approach for infrastructure assets are required to report a range of information to the Comptroller's Office annually. This information is utilized to prepare the statewide CAFR and includes the following elements:

PROCEDURE	GENERAL RECOGNITION PROCEDURES	REVISION NUMBER NEW

BACKGROUND

This procedure summarizes the basic generally accepted accounting principles (GAAP) that apply to the recognition of revenue, receivables and resulting deferred revenues related to exchange and nonexchange transactions. This procedure will describe the characteristics of exchange and nonexchange transactions, revenue recognition principles, and the related “asset accounting,” including the recognition, valuation, and reporting of related accounts receivable.

This procedure includes guidance on financial reporting of accounts receivable in accordance with GAAP. It is not intended to replace quarterly accounts receivable guidance currently provided in SAMS Chapter 26. Chapter 26 describes statewide accounts receivable reporting requirements designed to comply with the Illinois State Collection Act of 1986 ([30 ILCS 210/1](#)).

PROCEDURES

Classifying Transactions as Exchange or Nonexchange

The accounting for revenue transactions is based on their classification as exchange or nonexchange. The determination of whether a particular revenue arises in whole or in part from nonexchange transactions or, instead, from exchange or exchange-like transactions is a matter of professional judgment, depending on the facts and circumstances surrounding the transactions.

Exchange and Exchange-Like Transactions

Exchange transactions are those in which the State gives and receives essentially equal values. An example of an exchange transaction is a lease of a state-owned building to a corporation or individual. The exchange would yield cash to the State and potentially a receivable at year-end for rent earned. Exchange-like transactions are those, in which there is an identifiable exchange between the State and another party, but the values exchanged may not be quite equal, or the direct benefits of the exchange may not be exclusively for the parties to the exchange. Examples include certain fees for regulatory or professional licenses and permits, fees for drivers licenses and vehicle registrations, passenger facility charges, certain grants and donations, and other transactions that, regardless of the label applied to them, are based on an exchange of similar but not equal values.

Nonexchange Transactions

Nonexchange transactions are those in which the State receives value without directly giving equal value in return. Income and sales tax revenues are examples of nonexchange revenues. Nonexchange revenue transactions account for most of the revenue recorded by the State, and are classified as follows:

Derived tax revenues result from assessments imposed by the State on exchange transactions. Examples include taxes on personal income, corporate income, and retail sales of goods and services. The principal characteristics of these transactions are: (1) the State imposes the provision of resources on the provider; and (2) the State's assessment is on an underlying exchange transaction, such as the exchange of an employee's services for a wage or salary or the exchange of motor fuel for the market price for the fuel.

Imposed nonexchange revenues result from assessment by the State on nongovernmental entities, including individuals, other than assessments on exchange transactions. Examples include fines, penalties, and property forfeitures, such as seizures and escheats. The principal characteristic of these transactions is that the required transmittal of resources is imposed by the State on an act committed or omitted by the provider that is not an exchange transaction.

Government-mandated nonexchange transactions (revenues) occur when another government (i.e. Federal government) provides resources to the State (or an agency) and requires that State to use them for a specific purpose or purposes established in the provider's enabling legislation. That is, the provider establishes purpose restrictions and also may establish time requirements. Examples of government-mandated nonexchange transactions include federal programs that the State is required to perform including Medicaid, Title I, and TANF (Temporary Assistance to Needy Families). The provider usually establishes purpose restrictions and eligibility requirements. The principal characteristics of these transactions are: (1) a provider (i.e. Federal) government mandates that the State perform a particular program or facilitate its performance by another government; and (2) fulfillment of certain requirements is essential for a transaction to occur. These essential requirements may include time requirements and are referred to as eligibility requirements.

Voluntary nonexchange transactions (revenues) result from legislative or contractual agreements, other than exchanges, entered into willingly between the State (or agency) and one or more other parties. Examples of voluntary nonexchange transactions include certain grants such as: Highway Construction and Planning; Social Services Block Grant; Child Care programs; State appropriations received by component units; and donations by nongovernmental entities, including individuals. Both parties to a voluntary nonexchange transaction may be governments, or one party may be a nongovernmental entity, including an individual. As with Government-mandated nonexchange transactions, the provider (i.e. Federal government) often establishes purpose restrictions and eligibility requirements. In many cases, the provider may require the return of the resources if the purpose restrictions or eligibility requirements are not fulfilled. The principal characteristics of voluntary nonexchange transactions are: (1) they are not imposed on the provider or the recipient; and (2) fulfillment of eligibility requirements is essential for a transaction to occur.

Distinguishing Between Exchange and Nonexchange Transactions

Exchange and exchange-like transactions are distinguished from nonexchange transactions by the proportionate value exchanged. Exchange and exchange-like transactions are characterized by a reasonably equal value exchanged between the parties. Nonexchange transactions are characterized by a highly disproportionate or relatively unequal exchange of value.

Generally, fees and similar charges represent some exchange of value and are considered exchange or exchange-like transactions. Most grants and gifts represent nonexchange transactions. However, there may be grants in which the provider is receiving a direct value in exchange such as intellectual property rights from a research grant. A careful evaluation must be performed for each transaction to determine whether or not there is an exchange of relatively equal value, especially in the area of grants. This determination can be subjective and will often require professional judgment.

Example 1 – Social Services Block Grant (Nonexchange)

A State agency receives a grant from the Federal government for the Social Services Block Grant (SSBG) program. The purpose of the SSBG program is to provide funds to states to provide various social services to individuals, families, and entire population groups on a reimbursement basis.

This grant represents a nonexchange transaction because there is not an exchange of relatively equal values. Even though the State is providing a service that the Federal government desires to be performed for some public purpose, there is no direct value received by the Federal government.

Example 2 – Research Grant (Exchange and Nonexchange)

A State agency receives a research grant from the Federal government in return for patent rights to the research. This grant represents an exchange transaction because there is an exchange of relatively equal value (i.e. the Federal government is receiving the intellectual (patent) rights from the research). If, on the other hand, the Federal government does not receive the patents or other intellectual property rights, the grant would represent a nonexchange transaction.

Example 3 – Fees (Exchange-Like)

A State agency issues driver's licenses for a four year period. The license represents the privilege to operate a motor vehicle in exchange for a fee. This transaction represents an "exchange-like" transaction because it is more similar to an exchange than a nonexchange transaction. That is, there is an identifiable exchange between the State and the individual

receiving the drivers license, but the value exchanged is not quite equal. Exchange-like transactions should be accounted for in the same manner as “pure” exchange transactions.

Recognition Standards for Government-wide, Proprietary Fund, and Fiduciary (Trust) Fund Financial Statements (Accrual)

The government-wide, proprietary, and fiduciary fund financial statements are reported using the economic resources measurement focus and accrual basis of accounting (see Procedure 03.20.20). Under the accrual basis of accounting, revenues and receivables resulting from exchange and exchange-like transactions are recognized when the exchange takes place; revenues and receivables from nonexchange transactions are recognized as explained in the following procedures.

Exchange and Exchange-Like Transactions

Revenues and the related receivable that result from exchange and exchange-like transactions are recognized when the exchange takes place. Resources (i.e. cash) received before the exchange has occurred are reported as deferred revenues (liabilities).

Example 1– Fees

A State agency issues driver’s licenses for a four year period. The license represents the privilege to operate a motor vehicle in exchange for a fee. This transaction is an “exchange-like” transaction because it is more similar to an exchange than a nonexchange transaction. Revenue from an exchange-like transaction should be recognized when the exchange takes place. Because the State is not obligated to perform any further services after issuing the license and will not be required to refund any portion of the fees, it has completed the exchange and the earning process. This concept is further explained in FASB Concept Statement 5, paragraph 83b which states in part that, "Revenues are not recognized until earned. An entity's revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues."

Example 2– Lease of State Building

A State agency leases a portion of its building to a corporation at market rates. This transaction represents an exchange of equal value between the State and the corporation. Revenue should be recognized as earned over the period of the lease (i.e. on a straight-line basis over the term of the lease). Receivables for uncollected revenues should be reported when revenue is recognized. Payments received before revenue is recognized should be reported as deferred revenues.

Nonexchange Transactions

The accounting for nonexchange transactions is based on the classification of the revenue as follows:

Derived tax revenues. Assets (receivables or cash) should be recognized when the underlying exchange transaction occurs or resources are received, whichever is first. Revenues should be recognized when the underlying exchange transaction occurs. Resources (i.e. cash) received before the underlying exchange has occurred are reported as deferred revenues (liabilities).

Example – Sales Taxes

The State imposes a tax on sales of goods by retail merchants (i.e. sales tax). The tax is collected by merchants from customers (providers) at the time of sale. Most merchants are required to submit sales tax receipts to the State on a weekly basis; however, small retail sales merchants are required to submit receipts only on a monthly, quarterly, or annual basis.

This example illustrates the characteristics of derived tax revenues (i.e. a tax is imposed on an underlying exchange transaction between a merchant and consumer). Under the accrual basis of accounting, the State should recognize revenues, net of estimated refunds, as each sales transaction occurs. (From a practical standpoint, the State will likely base the amount to be recognized on total merchants' sales as reported or estimated for the weeks or quarters that make up the State's fiscal year.) Receivables for uncollected revenues should be reported when revenue is recognized. Payments received before revenue is recognized should be reported as deferred revenues or as part of a tax refund amount.

Imposed nonexchange revenues. Assets should be recognized when the government has an enforceable legal claim to the resources or resources are received, whichever is first. If the enabling legislation includes time requirements, revenues should be recognized in the period when the use of the resources is required or first permitted. Otherwise, revenues should be recognized at the same time as the assets. Resources received or recognized as receivables before the time requirements are met should be reported as deferred revenues.

Example – Fines

A State agency imposes fines and seizes property for violation of the rules and regulations governing hunting and fishing. Seized property is auctioned from time to time during the year and the proceeds from the auctions are deposited into the appropriate fund.

This example illustrates the characteristics of an imposed nonexchange transaction. Under the accrual basis of accounting, receivables for fines should be recognized when the government

has an enforceable legal claim to the resources. Due to the difficulty in establishing when an enforceable legal claim exists and the practical limitation of estimating the ultimate collectibility of fines, the State should recognize revenue when the fine is collected. Receivables and deferred revenue should be reported for imposed but uncollected fines. Revenue from seized property should be recognized when an enforceable legal claim exists.

Government-mandated and voluntary nonexchange transactions. Assets should be recognized when all applicable eligibility requirements are met or the resources are received, whichever is first. Revenues should be recognized when all applicable eligibility requirements are met. For transactions in which the provider requires the recipient (State) to use (sell, disburse, or consume) the resources in or beginning in the following period, resources received before that period should be recognized as deferred revenues. However, if the provider stipulates that resources be maintained intact in perpetuity, for a specified number of years, or until a specific event has occurred (such as permanent or term endowments), time requirements are met and revenues should be recognized when the resources are received, provided that all other eligibility requirements have been met.

The four types of eligibility requirements are:

- a. *Required characteristics of recipients.* The provider specifies certain characteristics for the recipient or secondary recipient. For example, under a certain federal program, recipients are required to be states and secondary recipients are required to be counties.
- b. *Time requirements.* Time requirements specify the period when resources are required to be used or when use may begin, or require that the resources be maintained intact as specified by the provider.
- c. *Reimbursements.* The provider offers resources on a reimbursement ("expenditure-driven") basis and the State (or agency) has incurred allowable costs under the applicable program.
- d. *Contingencies (applies only to voluntary nonexchange transactions).* The provider offers resources contingent upon a specified action of the State (or agency) and that action has occurred. For example, the recipient is required to raise a specific amount of resources from third parties or to dedicate its own resources for a specified purpose and has complied with those requirements.

[GASB Statement No. 33](#) distinguishes between two kinds of stipulations on the use of resources: *time requirements* and *purpose restrictions*. Time requirements specify the period when resources are required to be used or when use may begin, or require that the resources be maintained intact as specified by the provider. Time requirements affect the timing of recognition of nonexchange transactions. Purpose restrictions, on the other hand, specify the purpose for which the resources

PROCEDURE	GENERAL RECOGNITION PROCEDURES	REVISION NUMBER NEW

should be used. Purpose restrictions do not affect when revenue from a nonexchange transaction is recognized; instead, they affect the reporting of equity (i.e. restricted net assets).

Example 1 - Grants

The federal government issued a grant to a State agency to study the health related effects of exercise on a targeted population of individuals with sedentary lifestyles. The grant permits 100 percent reimbursement for direct and indirect costs. The period of availability of the grant is two years, beginning October 1st of the current fiscal year. The agency is permitted to retain the rights to the grant research. The agency incurs qualifying reimbursable expenses, and complies with all administrative requirements throughout the course of the grant. There are no significant contingencies.

This is an example of a voluntary nonexchange transaction. Under the accrual basis of accounting, revenue should be recognized when the qualifying expenditures are incurred. Receivables for uncollected revenues should be reported when revenue is recognized. Payments received before revenue is recognized should be reported as deferred revenues.

Example 2 – Private Contribution

An individual (provider) makes a large cash donation to a State university (recipient). The donation is to be used in the business school at any time for operations, scholarships, or any other purposes deemed appropriate by the university.

This example illustrates the characteristics of voluntary nonexchange transactions. There is no eligibility requirement. Assuming that the donation was not announced in advance, the university should recognize cash and a revenue when the money is received. If, on the other hand, the donor announces the donation a year before paying it and the university believes that collection is probable, the university should recognize a receivable and a revenue when the donation is announced. Because of the purpose restriction, the university should report resulting net assets (or fund balance) as restricted until used.

Example 3 – Endowment and Similar Transactions

An individual (provider) makes a large cash donation to a State university's permanent endowment. The provider stipulates that the original donation (corpus) must be invested and maintained in perpetuity, and the related investment earnings must be used to provide scholarships.

This example illustrates the characteristics of voluntary nonexchange transactions. Under the accrual basis of accounting, revenues should be recognized when the resources are received. For this transaction, the time requirement is met as soon as the university begins to honor the

provider's stipulation not to sell, disburse, or consume the resources and continues to be met for as long as the university honors that stipulation. Because of the purpose restriction, the university should report resulting net assets for the corpus as restricted – nonexpendable and the resulting net assets from investment earnings as restricted – expendable.

Recognition Standards for Governmental Funds Financial Statements (Modified Accrual)

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting (see Procedure 3.20.20). The only difference between accrual-basis recognition of financial resource inflows and modified accrual-basis recognition of financial resource inflows relates to availability. Under the modified accrual basis of accounting, revenue should be recognized in the accounting period in which they become both measurable and “available”. The term available generally means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. The State considers all revenues reported in the governmental funds to be available if collected within the State’s lapse period (i.e. 60 days after year-end). Accordingly, revenue should be deferred if the receivable is not collected within 60 days after year-end.

Example – Reimbursement Grant Not Received Prior to End of the State’s Lapse Period

A State agency receives a grant from the United States Department of Agriculture to monitor Illinois bovine herds for signs of hoof and mouth disease which represents a nonexchange transaction. The grant is funded on a reimbursement basis allowing direct and indirect costs. The State agency incurs qualifying expenditures under the grant prior to the current year-end (June 30, 20XX), but does not receive reimbursement until the following September. Because the reimbursement was received after the State’s lapse period, the period of availability to fund current year operations, the reimbursement should be reported as a receivable and as deferred revenue as of the current year-end (June 30, 20XX). This deferral will result in a timing difference in recognition of revenues and expenditures. The expenditures will be recognized in the current fiscal year and the related revenue will be recognized in the subsequent fiscal year.

Summary of Recognition Standards

The following table provides a summary of the revenue and related receivable recognition for both exchange and nonexchange transactions.

Presentation and Valuation of Receivables

Presentation

All receivables should be reported net of estimated uncollectible amounts. The allowance for estimated uncollectible receivables should be disclosed in the face of the financial statement (either parenthetically or as a separate line item) or in the notes to the financial statements. Long-term receivables (defined as not expected to be collected within the State's availability period of 60 days (lapse period)) should be reported at net realizable value.

All assets, including, receivables and liabilities will be presented in the government-wide statement of net assets and governmental fund balance sheets in order of liquidity (i.e. non classified format). Assets and liabilities for proprietary fund balance sheets will be presented in a classified format (i.e. current vs. noncurrent). Accordingly, receivables for proprietary funds should be classified as short term (i.e. expected to be collected during the lapse period) or long-term (expected to be collected after lapse period).

Collectibility

An estimated loss for uncollectible receivables should be reported as an expense/expenditure or reduction of revenue, if appropriate and a contra asset (i.e. allowance for uncollectible receivables) if both of the following conditions are met:

- a. Information available before the financial statements are issued indicates that it is probable that all or part of the receivable at the date of the financial statements will not be collectable; and
- b. The amount of the loss can be reasonably estimated.

These conditions can be considered with respect to individual receivables or in relation to groups of similar types of receivables. If the above two conditions are met, an accrual should be made even though a particular receivable may not be identifiable.

[FASB Statement 5](#) provides guidance for determining the probability of loss. Specifically, it defines the possible outcomes as follows:

- **Probable:** The future event or events (loss) are likely to occur.
- **Reasonably possible:** The chance of the future event or events (loss) occurring is more than remote but less than likely.
- **Remote:** The chance of the future event or events (loss) occurring is slight.

Discounting Long-Term Receivables

Long-term receivables arising from exchange transactions are required to be discounted using the time value of money concept. When a stated interest rate for such receivables does not exist, expected future cash flows should be discounted to reflect the time value of money. Accounting Principles Board Opinion No. 21 provides guidance on selecting a discount rate. Discounting for long-term receivables arising from nonexchange transactions is not required but is recommended. Agencies should have procedures in place to identify and accumulate this information for reporting these long-term amounts in their GAAP reporting packages.

Net realizable value is computed by calculating the present value of the expected future collections over the period of years. Present value is determined by discounting the future amount or amounts at a predetermined discount rate. For example, an agency has entered into a transaction whose terms require repayment of \$100,000 per year over a period of ten years. Assuming a discount rate of 8%, the present value of future cash collections would be approximately \$671,000, which is the net realizable value. The difference between the face value (\$1,000,000) and the net realizable value should be recognized as an element of interest income.

PROCEDURE	PROGRAM AND GENERAL REVENUES	REVISION NUMBER NEW

BACKGROUND

Within the government-wide statement of activities, the operations of the State will be presented in a format that reports the net (expense) revenue of its individual functions. Revenues reported in this statement will be classified as either program or general revenues unless they are required to be classified as contributions to term and permanent endowment, contributions to permanent fund principal, special items, or extraordinary items.

PROCEDURES

Program revenues are derived directly from the program (or functions) itself or from parties outside of the State’s taxpayers or citizenry, as a whole; they reduce the net cost of the function to be financed from the State’s general revenues. All program specific revenues should be reported in the statement of activities by the functional categories established in procedure 11.50.50.

General revenues are all other revenues that are not required to be reported as program revenues.

Guidance for determining whether revenues are considered program or general revenues is as follows:

Revenue Source	Revenue Type
Those who purchase, use, or directly benefit from the program’s goods or services	Always program revenue
Parties outside the reporting government’s citizens as a whole	Program revenue if restricted to a specific program; general revenue if unrestricted
All the reporting government’s taxpayers	Always general revenue , even if restricted to a specific program
The governmental entity itself, for example, through investing	Usually general revenue

Program Revenues

There are three categories of program revenues:

- a) Charges for services;
- b) Program-specific operating grants and contributions; and
- c) Program-specific capital grants and contributions.

Charges for Services

Charges for services include a broad category of revenues that arise from charges to customers or applicants who directly benefit from the goods, services, or privileges provided, or are otherwise directly affected by the services. These transactions usually result from exchange or exchange-like transactions. Examples of charges for services include:

- License and permit fees;
- State park camping fees;
- Insurance premiums;
- Lottery sales;
- Tolls;
- Prison industry revenues;
- Payments from other governments that are exchange transactions; and
- Fines and forfeitures.

Fines and forfeitures are included in this category because they result from direct charges to those who are “otherwise directly affected” by a program or service, even though they receive no benefit.

Charges for services are always reported in the function or program from which the revenue is derived, even if the use of the revenue is restricted to another function or program.

Example of Functional Classification

Assume that a State law requires that a percentage of the State’s lottery sales revenue must be used for elementary and secondary education programs in the State. Even though the law restricted the use of revenue for education, the entire ticket sales should be recorded as program revenues of the lottery function (as opposed to the education function) because the revenue derives directly from the lottery program.

Program-Specific Operating Grants and Contributions

Program-specific operating grants and contributions are revenues that arise from government-mandated and voluntary non-exchange transactions with other governments, organizations, or individuals that can be used for operating purposes and are restricted for use in a particular function of the State. Grants and contributions should be considered “operating” if they are restricted solely for “operating” purposes, or if the agency has the discretion to use them for either operating or capital purposes.

Example of Program-Specific Operating vs. Capital

Assume that a federal grant can be used for either maintenance expense or for the purchase of capital assets used in the operations of the State. This grant should be considered to be operating because the State has the discretion to use the revenues for either operating or capital purposes. If, on the other hand, the State could only use the grant for capital purposes, it would be classified as a capital grant.

Further, for operating grants and contributions to be considered program-specific, the restrictions must be identifiable to a particular function(s). If the restrictions can not be associated with a particular function(s), the revenue must be considered general revenue.

Example of Operating Grant Classified as Program Specific Revenue

Assume an agency reports all of its governmental activities under the transportation function. If the agency receives a federal grant that is restricted for maintenance (operating) purposes for the State highway system, this grant should be classified as a program specific operating grant because it is restricted for operating purposes and can not be used for any purpose other than transportation.

Example of Operating Grant Classified as General Revenue

Assume an agency reports its governmental activities under two functions: 1) health and social services; and 2) general government. If the agency receives a federal grant that can be used for multiple purposes that would qualify under either function, then the grant should be classified as general revenue because it is not restricted to a specific function of the State. If, on the other hand, the grant specifically identifies the amount that should be used under both functions, then the grant should be classified as program revenue of the applicable functions.

Program-Specific Capital Grants and Contributions

Program-specific capital grants and contributions are revenues that arise from government-mandated and voluntary nonexchange transactions with other governments, organizations, or individuals that are restricted for capital purposes — to purchase, construct, or renovate capital assets associated with or used in a program reported under a specific function of the State. The rules are the same as for “operating grants and contributions,” to be considered program-specific the restrictions must be identifiable to a particular function(s). If the restrictions can not be associated with a particular function(s), the revenue must be considered general revenue.

Example of Capital Grant Classified as Program Specific Revenue

Assume an agency reports all of its governmental activities under the transportation function. If the agency receives a federal grant that is restricted for State highway construction, this grant should be classified as a program specific capital grant because it is restricted for capital purposes and acquired/constructed assets are used in or associated with transportation function.

General Revenues

All revenues are general revenues unless they are required to be reported as program revenues. All taxes, even those that are levied for a specific purpose, are general revenues and should be reported by type of tax—for example, sales tax, property tax, franchise tax, income tax. All other nontax revenues (including interest, grants, and contributions) that do not meet the criteria to be reported as program revenues should also be reported as general revenues.

Classification of Earnings on Endowments, Permanent Funds, and Resources from Grant Revenues

Earnings on endowments or permanent fund investments should be reported as program revenues (i.e. with program specific operating grants and contributions) if restricted to a program or programs specifically identified in the endowment or permanent fund agreement or contract. Earnings from endowments or permanent funds that finance “general fund programs” or “general operating expenses,” for example, should be reported as general revenue (i.e. as investment earnings). Similarly, earnings on investments not held by permanent funds also may be legally restricted to specific functions or programs. For example, interest earnings on federal grants may be required to be used to support a specific program. When earnings on the invested accumulated resources of a program are legally restricted to be used for that program, they should be reported as program revenues and should be classified the same as the underlying grant revenue (i.e. as program specific operating or capital grant revenue).

SECTION	ACCOUNTING AND FINANCIAL REPORTING POLICIES AND PROCEDURES	PROCEDURE - PAGE NO. 03.50.10 1 of 7
SUB-SECTION	EXPENDITURE/ EXPENSE AND RELATED LIABILITY ACCOUNTING	EFFECTIVE DATE July 15, 2002
PROCEDURE	GENERAL RECOGNITION PROCEDURES	REVISION NUMBER NEW

BACKGROUND

Recording of expenditures/expense and the related liabilities depends on the basis of accounting applied. Due to the distinctive nature of fund financial statements and fund accounting requirements, some long-term liabilities should be reported in fund financial statements, while some should be reported only in the governmental activities column in the government-wide financial statements.

PROCEDURES

Recognition Standards for Governmental Funds Financial Statements

The governmental funds financial statements use the current financial resources measurement focus and modified accrual basis of accounting (see Procedure 03.20.20). Under the current financial resources measurement focus, governmental funds should report expenditures, which generally do not include the deferral and allocation or amortization of costs that benefit one or more future periods. Expenditures and related liabilities should be recognized in the accounting period in which the liability is incurred, except for the following general long-term liabilities which should not be recognized until they are due (mature):

- Debt issues (including capital lease and installment purchase liabilities);
- Unmatured interest on general long-term debt;
- Compensated absences;
- Claims and judgments;
- Special termination benefits; and
- Landfill closure and postclosure care costs.

Accordingly, the portion of general long-term liabilities that is not matured (due for payment) should not be reported as governmental fund liabilities. Debt service and interest on formal debt issues (such as bonds and capital leases) generally should be recognized as a governmental fund liability and expenditure when due (matured). Compensated absences, claims and judgments, special termination benefits, and landfill closure and postclosure care costs should be recognized as governmental fund liabilities and expenditures to the extent the liabilities are “normally expected to be liquidated with expendable available financial resources.” In general, agencies are normally expected to liquidate those liabilities with expendable available financial resources to the extent that the liabilities mature (come due for payment) each period.

The recognition of expenditures and governmental fund liabilities for compensated absences, claims and judgments, special termination benefits, and landfill closure and postclosure care costs is based on the maturity of the liabilities and does not depend on how an agency accumulates resources to pay those liabilities. Even though some agencies may advance-fund part or all of the liabilities covered

by the “normally expected” criterion, that advance funding should not result in recognizing additional governmental fund expenditures or liabilities. Those accumulated net assets should be reported as a part of governmental fund balance—for example, as unreserved, designated fund balance, if appropriate.

Recognition Standards for Government-wide, Proprietary Fund, and Fiduciary (Trust) Fund Financial Statements

The government-wide, proprietary fund, and fiduciary (trust) fund financial statements use the economic resources measurement focus and accrual basis of accounting (see Procedure 03.20.20). Under the economic resources measurement focus, the activity statements report expenses, which include the deferral and allocation or amortization of costs that benefit one or more future periods. Under the accrual basis of accounting, expenses resulting from exchange and exchange-like transactions are recognized when the exchange takes place; expenses from nonexchange transactions are recognized in accordance with [GASB Statement No. 33](#), as explained in Procedure 03.50.40.

SUB-SECTION	EXPENDITURE/ EXPENSE AND RELATED LIABILITY ACCOUNTING	EFFECTIVE DATE July 15, 2002
PROCEDURE	LONG-TERM DEBT INSTRUMENTS	REVISION NUMBER NEW

BACKGROUND

Long-term debt instruments that the State may issue include the following:

- **General Obligation Bonds** – General obligation bonds pledge the full faith and credit of the State to pay debt principal and interest. The State Constitution provides that the State may issue general obligation bonds for specific purpose in such amounts as provided either by the General Assembly with a three-fifths vote of each house or by a majority of voters in a general election.
- **Special Obligation Bonds** – Special obligation bonds are secured by a pledge of a dedicated portion of the State resources (e.g. sales tax, horse racing privilege tax, etc.).
- **Revenue Bonds** – Revenue bonds are secured by a pledge of income from assets constructed or acquired. Revenue bonds are not supported by the full faith and credit of the State. The bond indentures include a pledge from the issuing agencies and authorities that income derived from acquired or constructed assets be used to retire the debt and service related interest.
- **Certificates of Participation** – Certificates of participation are instruments of indebtedness issued to finance equipment or facilities that are leased to a State agency. The lease payments are pledged to pay the debt principal and interest. The State issues certificates of participation representing the right to receive a proportionate share in lease-purchase or installment purchase payments to be made for the benefit of State agencies for the acquisition or improvement of real or personal property, refinancing of such property, payment of expenses of such property or payment of expenses related to the issuance. The State also finances the purchase of certain State-owned real and personal property through non-State issued certificates of participation. These non-State issued certificates of participation are sold by private concerns and are repaid by State agency appropriations pursuant to installment purchase agreements.
- **Notes** – Notes payable are unconditional written promises signed by the maker (i.e. a State agency or authority) to pay a certain sum in money on demand or at a fixed or determinable time either to the bearer or to the order of a person designated therein.
- **Lease Obligations** – Lease obligations are liabilities for payments under capital leases (i.e. the present value of the minimum lease payments).
- **Installment Purchase Obligations.** Installment purchase obligations are liabilities for the payments under an installment purchase contract.

PROCEDURES

Accounting for Proprietary Fund and Fiduciary Fund Long-Term Debt

Liabilities

Liabilities arising from long-term debt (including general obligation bonds) that are directly related to and expected to be paid from proprietary funds should be reported in the proprietary fund and government-wide financial position statements. Liabilities arising from long-term debt that are directly related to and expected to be paid from fiduciary funds should be reported only in the statement of fiduciary net assets.

Interest Expense and Related Liability

Interest expense accrues with the passage of time. In the government-wide financial statements as well as the proprietary and fiduciary fund financial statements, interest should be expensed and a related liability should be recorded for the respective time frame which has elapsed since the last payment date and the end of the reporting year.

Issuance Discounts and Premiums

The discount or premium resulting from the issuance of long-term debt instruments is not an asset or liability separable from the debt instrument which gives rise to it. Therefore, the discount or premium for proprietary and fiduciary fund debt should be reported in the applicable statements of net assets as a direct deduction from or addition to the face amount of the debt. It should not be classified as a deferred charge or deferred credit. Debt issuance discount or premiums should be amortized as interest expense or income over the life of the debt using the effective interest method, which is described in APB Opinion No. 12. The objective of the effective interest method is to arrive at a periodic interest cost (including amortization) which will represent a level effective rate on the sum of the face amount of the debt and (plus or minus) the unamortized premium or discount and expense at the beginning of each period. The difference between the periodic interest cost so calculated and the nominal interest on the outstanding amount of the debt is the amount of periodic amortization.

Debt Issuance Costs

Debt issuance costs for proprietary and fiduciary fund debt should be deferred and recorded as an "other asset" in the statements of net assets. Debt issuance costs should be amortized over the life of the debt using a method that approximates the effective interest method (i.e. gives consideration to the outstanding balances over the life of the debt).

Accounting for General Long-term Debt

Liabilities

Long-term debt that is not proprietary or fiduciary fund debt should be accounted for as general long-term liabilities. Those liabilities should not be reported as liabilities in governmental funds but should be reported in the governmental activities column of the government-wide statement of net assets. Matured but unpaid portions of general long-term debt should be reported as liabilities in the governmental fund and government-wide financial statements. The accounting for general long-term debt that is reported in the government-wide financial statements is the same as described above for proprietary fund debt.

Issuance of Long-Term Debt

In the governmental funds, except for certain demand bonds as discussed below, the face amount of long-term debt issuances is reported as an other financing source in the fund that receives the debt proceeds. Debt issuance premiums and discounts should be reported separately from the face amount of long-term debt as other financing sources and uses, respectively, and debt issue costs paid out of debt proceeds, such as underwriter and attorney fees, should be reported as expenditures.

Payment of Principal and Interest

Expenditures for the payment of principal and interest on general long-term debt are reported when the payments are due (matured). In addition, debt service expenditures may be reported if the State has provided financial resources to a debt service fund for payment of debt that will mature early in the following year. The State has "provided" financial resources to a debt service fund if it has deposited in or transferred to that fund financial resources that are dedicated for payment of debt service. "Early in the following year" refers to a short time period—usually one to several days and not more than one month.

Demand Bonds

Demand bonds are long-term debt issuances of the State with demand ("put") provisions that require the State to repurchase the bonds upon notice from the bondholder at a price equal to the principal plus accrued interest. GASB Interpretation No. 1, *Demand Bonds Issued by State and Local Governmental Entities*, as amended by [GASB Statement No. 34](#), provides guidance for bonds that have demand provisions that can be exercised at the date of the financial statements or within one year thereafter.

Demand bonds should be reported by the State as general long-term debt liabilities (and reported only in the government-wide statement of net assets), or excluded from current liabilities of proprietary funds, if all of the following conditions are met:

1. Before the financial statements are issued, an agency has entered into an arm's-length financing (take out) agreement to convert bonds "put" but not resold into some other form of long-term obligation;
2. The take out agreement does not expire within one year from the date of the State's balance sheet;
3. The take out agreement is not cancelable by the lender or the prospective lender during that year, and obligations incurred under the take out agreement are not callable by the lender during that year; and
4. The lender or the prospective lender or investor is expected to be financially capable of honoring the take out agreement.

If all of these conditions are not met, demand bonds should be classified as fund liabilities, or as current liabilities of proprietary funds.

Agencies should report demand bonds activity to the Comptroller's Office annually utilizing form SCO-535 or SCO-585 as part of the GAAP reporting process.

Conduit Debt

Conduit debt obligations are certain limited-obligation revenue bonds, certificates of participation, or similar debt instruments issued by the State or an agency for the purpose of providing capital financing for a specific third party that is not a part of the State or agency as appropriate. The State, by action of the General Assembly, created various authorities for the express purpose of providing private entities with an available low cost source of capital financing for construction of facilities. The proceeds from the sale of such debt usually advance or achieve some public purpose, such as the expansion of a private business to increase employment or to increase the State's tax base. Although conduit debt obligations bear the name of the State, the State has no obligation for such debt beyond the resources provided by a lease or loan with the third party on whose behalf they are issued.

The following disclosures for conduit debt are required to be presented in the notes to the financial statements:

- a clear indication that the State (agency) has no obligation for the debt beyond the resources provided by related leases or loans

Comptroller's Office Requirement to Account for Bonded Indebtedness

The Illinois Compiled Statutes ([15 ILCS 405/18](#)) requires the Comptroller's Office to maintain current records for all bonded indebtedness outstanding including a description of the bonds, amount authorized, amount issued, amount authorized which has not been issued, the outstanding balance, maturity schedules, interest rates, and, if applicable, a copy of the bond resolution, a copy of the official bid, a copy of the prospectus/official statement, and a copy of the sale notice. To meet this requirement, the Comptroller's Office must receive specific information for each debt issue from State agencies. Further guidance and procedures for reporting bonded indebtedness to the IOC is included in Chapter 31 of the SAMS manual.

PROCEDURE	COMPENSATED ABSENCES	REVISION NUMBER NEW

Background

Compensated absences represent the State's liability related to employee services previously rendered where payment for such services is not dependent on a particular event (e.g. illness) that is outside the control of the State and the employee. Generally, the State of Illinois' liability for compensated absences will consist of vacation and other leave and sick leave that have been earned by employees, but not taken. The accrual of this liability is subject to certain conditions. Since the conditions for vacation and other compensated absences are different from the conditions that apply to sick leave, these two types of compensated absences are discussed separately below. [Governmental Accounting Standards Board Statement 16, Accounting for Compensated Absences](#), also provides guidance on accounting for compensated absences.

Procedures

Accounting for Compensated Absences in Proprietary and Fiduciary Funds

Expenses and related liabilities for compensated absences arising from the operations of (i.e. from employees that provide services to) proprietary funds should be reported in the proprietary fund and government-wide financial statements. Expenses and related liabilities for compensated absences arising from the operations of (i.e. from employees that provide services to) fiduciary funds should be reported in the fiduciary fund (trust) financial statements.

Vacation Leave and Other Compensated Absences with Similar Characteristics

Vacation leave and other compensated absences with similar characteristics (hereinafter referred to as "vacation leave") should be accrued as a liability as the benefits are earned by the employees if both of these conditions are met:

- a. The employees' rights to receive compensation are attributable to services already rendered; and
- b. It is probable that the State will compensate the employees for the benefits through paid time off or some other means, such as cash payments at termination or retirement.

If an agency has a policy of paying employees for unused holiday and/or compensatory time at separation or retirement, this must be included as part of the vacation and other compensated absences amount (liability).

Sick Leave and Other Compensated Absences with Similar Characteristics

A liability for sick leave and other compensated absences with similar characteristics (hereinafter referred to as "sick leave") should be accrued using the vesting method. Under this method, the sick

leave liability should be estimated based on the sick leave accumulated at the balance sheet date by those employees who currently are eligible to receive termination payments as well as other employees who are expected to become eligible in the future to receive such payments. To calculate the liability, these accumulations should be reduced to the maximum amount allowed as a termination payment. Accruals for those employees who are expected to become eligible in the future should be based on assumptions concerning the probability that individual employees or classes or groups of employees will become eligible to receive termination payments.

Calculation of Compensated Absences Liability

The compensated absences liability should be calculated based on the pay or salary rates in effect at the balance sheet date. However, if the state agency pays employees for their compensated absences at other than their pay or salary rates—for example, at a lower amount as established by contract, regulation, or policy—then the agency should use that other rate to calculate the liability.

An additional amount should be accrued as a liability for salary-related payments associated with the payment of compensated absences, using the rates in effect at the balance sheet date. The salary-related payments subject to this accrual are those items for which an agency (State) is liable to make a payment directly and incrementally associated with payments made for compensated absences on termination. Such salary-related payments include the employer's share of social security and medicare taxes and also might include, for example, the employer's contributions to pension plans. The accrual should be made based on the entire liability for each type of compensated absence to which the salary-related payments apply. (That is, payments directly and incrementally associated with the payment of sick leave termination payments should be accrued for the entire sick leave liability; salary-related payments associated with termination payments of vacation leave should be accrued for the entire vacation leave liability, including leave that might be taken as paid time off rather than paid as termination payments.)

Accounting for Compensated Absences in Governmental Funds

Compensated absences not accounted for in proprietary or fiduciary funds should be accounted for as general long-term liabilities. Those liabilities should not be reported as liabilities in governmental funds but should be reported in the governmental activities column of the government-wide statement of net assets. The accounting for compensated absences that is reported in the government-wide financial statements is the same as described above for proprietary and fiduciary funds. Governmental funds should recognize expenditures and related fund liabilities for those compensated absences when payment is due.

Agencies should report compensated absences to the Comptroller's Office annually utilizing form SCO-580 as part of the GAAP reporting process.

SUB-SECTION	EXPENDITURE/ EXPENSE AND RELATED LIABILITY ACCOUNTING	EFFECTIVE DATE July 15, 2002
PROCEDURE	GRANTS, ENTITLEMENTS, AND SHARED REVENUES INCLUDING APPROPRIATIONS TO COMPONENT UNITS	REVISION NUMBER NEW

BACKGROUND

[Government Accounting Standards Board Statement 33](#), (GASB 33) *Accounting and Financial Reporting for Nonexchange Transactions*, and [GASB Statement 36](#), *Recipient Reporting for Certain Shared Nonexchange Revenues*, establishes accounting and financial reporting standards to guide the State's decisions about when to report the results of nonexchange transactions involving cash and other financial and capital resources. The revenue recognition policies related to GASB 33 and 36 are addressed in Procedure 03.40.10 of this manual. These procedures address when to recognize the expenditure/expense side of these transactions.

As it relates to expenditures /expenses of the State, GASB 33 defines a nonexchange transaction as "a transaction in which the State (or an agency or component unit) gives value without directly receiving equal value in exchange". Under GASB 33, expenditures/expenses for nonexchange transactions are classified into one of two categories:

1. **Government-mandated nonexchange transactions** – This occurs when the State or an agency provides resources to another government at another level and requires the recipient to use the resources for a specified purpose. Examples include entitlements provided to local governments.
2. **Voluntary nonexchange transactions** – This results from legislative or contractual agreements, other than exchanges, entered into willingly by the parties to the agreement. Types of these transactions include certain grants and shared revenues given to local governments.

PROCEDURES

Recognition of Expenditures/Expenses and Liabilities

An agency should recognize expenditures/expenses and liabilities for government-mandated and voluntary nonexchange transactions when all applicable eligibility requirements are met by the recipient. The four types of eligibility requirements are:

- a. **Required characteristics of recipients.** The State or an agency specifies certain characteristics for the recipient or secondary recipient.
- b. **Time requirements.** The State or an agency specified a time (period) of when the resources are required to be used.
- c. **Reimbursements.** The State or an agency offers resources on a reimbursement ("expenditure-driven") basis *and the recipient has incurred allowable costs under the applicable program.*

PROCEDURE	GRANTS, ENTITLEMENTS, AND SHARED REVENUES INCLUDING APPROPRIATIONS TO COMPONENT UNITS	REVISION NUMBER NEW

- d. **Contingencies (applies only to voluntary nonexchange transactions).** The State or an agency offers resources contingent upon a specified action of the recipient and that action has occurred. For example, the recipient is required to raise a specific amount of resources from third parties or to dedicate its own resources for a specified purpose and has complied with those requirements.

Time Requirements vs. Purpose Restrictions

[GASB Statement No. 33](#) distinguishes between two kinds of stipulations on the use of resources: time requirements and purpose restrictions. Time requirements specify the period when resources are required to be used or when use may begin, or require that the resources be maintained intact as specified by the provider. Time requirements affect the timing of recognition of nonexchange transactions. Purpose restrictions specify the purpose for which the resources should be used. Purpose restrictions do not affect when revenue from a nonexchange transaction is recognized; instead, they affect the reporting of equity (i.e. restricted vs. unrestricted).

Modified Accrual vs. Accrual Basis of Accounting

The recognition criteria in relation to expenditures/expenses and liabilities for nonexchange transactions is the same under both the modified accrual basis and accrual basis of accounting.

Eligibility Requirements or Purpose Restrictions Not Met

After a nonexchange transaction has been recognized in the financial statements, it may become apparent that (a) the eligibility requirements are no longer met or (b) the recipient will not comply with the purpose restrictions within the specified time limit. In those circumstances if it is probable that the State will not provide the resources or will require the recipient to return all or part of the resources already received, the State should recognize a decrease in liabilities or an increase in assets, and a revenue for the amount that is expected to be cancelled or reclaimed.

Claims and judgments include risk financing and insurance related activities, which are addressed in [Governmental Accounting Standards Board Statement \(GASB\) No. 10](#), *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, [GASB 30 Risk Financing Omnibus](#), and GASB Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools*. Risk financing activities of the State include, but are not limited to, the following:

Risk Retention

The State retains risk of loss (i.e. self-insured) as it relates to:

- Health and dental insurance;
- Workers compensation;
- Vehicle insurance;
- Employee fidelity and surety;
- Legal representation and employee indemnification;
- General liability; and
- Other tort liability.

Purchase of Commercial Insurance

The State purchases commercial insurance for various risks of loss including coverage for certain university facilities.

Public Entity Risk Pools

The State administers various public entity risk pools including the following for non-State employers:

- **The Local Government Health Insurance Reserve Fund** offers a health insurance program to local governments for its employees and retirees.
- **The Teacher Health Insurance Security Fund** offers health insurance to school districts for its teachers and retirees.
- **The Community College Health Insurance Security Fund** offers health insurance to community college retirees and their dependent beneficiaries.

Claims and judgments also involve loss contingencies. Contingencies are defined as an existing condition, situation, or set of circumstances involving uncertainty as to a possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur. [Financial Accounting Standards Board No. 5, *Accounting for Contingencies*](#), provides guidelines for recognizing a loss liability in these situations. Examples of contingencies include the following:

- Collectibility of receivables;
- Threat of expropriation of assets;
- Tax refund claims;
- Unemployment compensation;
- Pending or threatened litigation;
- Actual or possible claims and assessments;
- Guarantees of indebtedness of others; and
- Agreements to repurchase receivables or the related property that have been sold.

PROCEDURES

Accounting for Claims and Judgments in Proprietary and Fiduciary Funds

Expenses and related liabilities for claims and judgments arising from the operations (activities) of proprietary funds should be reported in the proprietary fund and government-wide financial statements. Expenses and related liabilities for claims and judgments arising from the operations (activities) of fiduciary funds should be reported in the fiduciary fund (trust) financial statements.

An estimated loss for claims and judgments (including loss contingencies) activity should be reported as an expense and liability in the government-wide, proprietary fund, and fiduciary (trust) fund financial statements for claims and judgments if both of the following conditions are met:

- a. Information available before the financial statements are issued indicates that it is probable that an asset had been impaired or a liability has been incurred at the date of the financial statements; and
- b. The amount of the loss can be reasonably estimated.

The estimated loss should include incurred but not reported (IBNR) amounts as follows:

- a. Known loss events that are expected to later be presented as claims;
- b. Unknown loss events that are expected to become claims; and
- c. Expected future development on claims already reported—if those losses can be reasonably estimated and it is probable that a claim will be asserted.

Claims liabilities, including IBNR, should be based on the estimated ultimate cost of settling the claims (including the effects of inflation and other societal and economic factors), using past experience adjusted for current trends, and any other facts that would modify past experience. Claims liabilities should include specific incremental claim adjustment expenditures/expenses. In addition, estimated recoveries on unsettled claims, such as salvage or subrogation, should be evaluated in terms of their estimated realizable value and deducted from the liability for unpaid claims. Estimated recoveries on settled claims should also be deducted from the liability for unpaid claims.

Assessing the Probability of Loss

[FASB Statement 5](#) provides guidance for determining the probability of loss. Specifically, it defines the possible outcomes as follows:

- **Probable:** The future event or events are likely to occur.
- **Reasonably possible:** The chance of the future event or events occurring is more than remote but less than likely.
- **Remote:** The chance of the future event or events occurring is slight.

Estimating IBNR Amounts

As noted in Question 87 of the GASB Statement 10 Implementation Guide, IBNR claims generally are estimable and should be based on historical experience. Initially, it may take time to accumulate a history of the proper data if it is not currently available. When historical experience is used, the outstanding claims should be stratified by amount and type of claim, and the strata should be sufficiently refined to ensure that the estimation is reasonable.

If the historical results of an agency are not reliable or indicative of future results, supplementary analysis, including use of historical actual results of other entities or agencies with similar structure, risk assumptions, and risk exposure, should be considered. Other factors to be considered are changes in operations or operating environment, demographic changes, and statutes and regulations.

Other sources of data may also be used. For example, the AICPA Audit and Accounting Guide, Audits of Providers of Health Care Services, Chapter 10, provides guidance on the use of statistical and other data to estimate the amount and probability of medical malpractice IBNR claims for a hospital. The concepts in that guide can be applied to risks other than healthcare. In any case, the help of an actuary may be desirable, although the GASB does not require that an actuary's services be used.

If the ultimate amount of the liability cannot be estimated but a reasonable estimate of the range can be derived, a determination should be made as to which amount in the range is the better estimate.

That amount should be accrued. If no amount in the range is better than the others, the minimum amount in the range should be accrued.

Accounting for Claims and Judgments in Governmental Funds

Claim and judgments not accounted for in proprietary or fiduciary funds should be accounted for as general long-term liabilities. Those liabilities should not be reported as liabilities in governmental funds but should be reported in the governmental activities column of the government-wide statement of net assets. The accounting for claims and judgments that is reported in the government-wide financial statements is the same as described above for proprietary funds. Governmental funds should recognize expenditures and related fund liabilities for those claims and judgments when payment is due.

Internal Service Funds

If an internal service fund is used to account for a risk financing activity, the total charges by the internal service fund to the other funds for the period should equal the expense and liability recognized or be based on an actuarial method or historical cost information and adjusted over a reasonable period of time so that internal service fund revenues and expenses are approximately equal. Those interfund charges should be recognized as revenue by the internal service fund and as expenditures/expenses by the other funds.

Financial Statement Disclosures

The following disclosures should be made relating to claims and judgments and loss contingencies:

- If no accrual is made for a loss contingency because one or both of the required conditions are not met, or if an exposure to loss exists in excess of the amount accrued, but there is a reasonable possibility that a loss or an additional loss may have been incurred, the financial statements should disclose the nature of the contingency and an estimate of the possible loss or range of loss, or state that such an estimate cannot be made.
- The risks of loss to which the State is exposed and the ways in which those risks of loss are handled; significant reductions in insurance coverage from coverage in the prior year by major categories of risk; whether the amount of settlements exceeded insurance coverage for each of the past three fiscal years; and the nature of participation in risk pools, including the rights and the responsibilities of both the entity and the pool.
- The basis for estimating the liabilities for unpaid claims.
- The carrying amount of liabilities for unpaid claims that are presented at present value in the financial statements and the range of discount rates used to discount those liabilities.

LEASES/INSTALLMENT PURCHASES/CERTIFICATES OF PARTICIPATION

ACCOUNTING FOR LEASES-LESSEE

In governmental accounting, as with commercial, there are two classifications of leases, capital and operating, from the standpoint of the lessee. The criteria for classifying leases are set forth below. If at its inception, a lease meets one or more of the following four criteria, the lease shall be classified as a capital lease by the lessee. Otherwise, it shall be classified as an operating lease.

- "a. The lease transfers ownership of the property to the lessee by the end of the lease term.
- b. The lease contains a bargain purchase option.
- c. The lease term is equal to 75 percent or more of the estimated economic life of the leased property. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the lease property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.
- d. The present value at the beginning of the lease term of the minimum lease payments, excluding that portion of the payments representing executory costs to be paid by the lessor, including any profit thereon, equals or exceeds 90 percent of the excess of the fair value of the leased property to the lessor at the inception of the lease. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease. A lessor shall compute the present value of the minimum lease payments using the interest rate implicit in the lease. A lessee shall compute the present value of the minimum lease payments using his incremental borrowing rate, unless (i) it is practicable for him to learn the implicit rate computed by the lessor and (ii) the implicit rate computed by the lessor is less than the lessee's incremental borrowing rate. If both of those conditions are met, the lessee shall use the implicit rate."¹

PROCEDURE	LEASES/INSTALLMENT PURCHASES/ CERTIFICATES OF PARTICIPATION	REVISION NUMBER 08-002

Capital lease transactions are processed by the Comptroller's Office using a form SCO-560, which is completed by agencies. The future commitments for capital leases are recorded as part of "Leases Payable" in the agency's financial statements.

ACCOUNTING FOR INSTALLMENT PURCHASES

Installment purchase transactions are those in which payments of the purchase price are made in installments over an extended period. These transactions are processed like leases by the Comptroller's Office, with agencies filling out the required SCO-560. Unlike a capital lease however, the title passes to the buyer at the beginning of the payment schedule, not the end, and the property is reported in the appropriate asset category (e.g. equipment, buildings) rather than as a capital lease asset. The future commitments are recorded as part of "Leases Payable" in the agency's financial statements.

ACCOUNTING FOR CERTIFICATES OF PARTICIPATION

The State is authorized to issue certificates of participation representing the right to receive a proportionate share in lease-purchase or installment purchase payments made for the benefit of State agencies for the acquisition or improvement of real or personal property, refinancing of such property, payment of expenses of such property, or payment of expenses related to the issuance. State agencies are required to submit to the Comptroller's Office a copy of the certificate of participation's official statement/prospectus, the notice of sale, if available, and Bond Interest and Redemption Schedule within 30 days of the closing date or the beginning date of the borrowing, whichever is later. (See SAMS procedure 31.30.10) The balance of these certificates is recorded as "Certificates of Participation" in the agency's financial statements.

DISCLOSURE OF LEASES-LESSEE

The following information with respect to leases shall be disclosed in the lessee's financial statements or the footnotes thereto.

- a. For capital leases:
 1. The gross amount of all assets with a fair market value greater than \$5000, are recorded under capital leases as of the balance sheet date presented by major classes according to nature or function. The amount recorded should be equal to the amounts reported on the Comptroller's lease reports.

2. Future minimum lease payments as of the balance sheet date, broken down between principal and interest for each of the five succeeding fiscal years plus in five year increments, thereafter. The principal outstanding will equal the net minimum lease payments at their present value.
 3. The total of minimum sublease rentals to be received in the future under noncancelable subleases as of the balance sheet date.
 4. Assets recorded under capital leases and the accumulated amortization thereon shall be separately identified in the lessee's footnotes. In governmental funds, the asset value of new current year leases must be recorded in the year end GAAP packages as an increase in other financing sources. Payments made on capital leases are originally recorded as expenditures. At year end, these payments must be reclassified out of expenditures and recorded as debt service principal and interest. To convert to the government-wide statements the amount shown as other financing sources should be reversed and shown as an addition to assets and a liability. Principal payments during the year should be eliminated from expenditures and shown as a reduction in the liability account. In proprietary funds, the related liability is recorded on the balance sheet at the beginning of the leases. As payments are made, the amounts applicable to the principal are recorded as a reduction to the liability account. The interest portion is shown as an expense on the agency's records in the accounting period in which the liability is incurred.
- b. "For operating leases having initial or remaining noncancelable lease terms in excess of one year:

PROCEDURE	RESTRICTED ASSETS	REVISION NUMBER NEW

PROCEDURES

Restricted assets should be separately reported and identified as “restricted” in the applicable statement of financial position if the restriction changes the nature or perception of the availability of the asset for future operations. Restricted assets are defined as assets whose use is subject to constraints that are **either**:

1. externally imposed by creditors, grantors, contributors, or laws or regulations of other governments;
or
2. imposed by law through constitutional provisions or enabling legislation.

The following are examples of restricted assets that should be separately reported as restricted in the statement of financial position (because the nature of their availability for future use may not be clear solely based on the financial statement caption):

- Cash held in bond and interest account by trustee that is required to pay principal maturities in future years;
- Cash and investments restricted by revenue bond indenture or debt covenants; and
- Accounts receivable which are pledged as collateral for long-term debt.

Classification in Statement of Financial Position

Government-wide Statement of Net Assets and Governmental Fund Balance Sheets— Assets are presented in order of liquidity in both the government-wide statement of net assets and governmental fund balance sheets. When determining the liquidity of restricted assets, agencies should consider the nature of the restrictions and the ability to use the asset. An asset with restrictions placed on it will not necessarily be reported as restricted. For example, if the restrictions are short lived – such as cash that is held in a bond and interest account that is required to be used to pay current maturities – the cash should be reported with unrestricted cash. On the other hand, if the conditions underlying the restrictions are such that they will not be met in the next year, restricted assets should be reported lower in the statement of net assets or balance sheet. Further, assets with permanent restrictions are essentially as illiquid as capital assets and should be reported towards the bottom of the statement of financial position.

Proprietary Fund Balance Sheet – Assets are presented in the proprietary fund balance sheet in a classified format (i.e. classified as current or noncurrent). In determining whether restricted assets should be classified as current or noncurrent, agencies should consider the nature of the restrictions and the ability to use the asset. If the restrictions will be met in the next year, the restricted assets should be classified as current. If the restrictions will not be met within the next year and the assets are not available for use, the restricted assets should be classified as noncurrent.

PROCEDURE	INVENTORY	REVISION NUMBER NEW

BACKGROUND

Inventory represents the value of materials and supplies on hand for internal consumption or for use, distribution, or resale to other units of State government and to outside parties, including the public. The major categories of inventory are:

- a. Equipment parts and accessories which include automobile, truck, airplane, and equipment parts.
- b. Food supplies which include inventories at commissaries and food centers, and food for free distribution.
- c. Gasoline, oil, and lubricants.
- d. Paper and printing supplies that does not include normal office supplies, such as lottery tickets.
- e. Road salt and sand.
- f. Wearing apparel, which includes clothing for inmates and residents.
- g. Other, which includes material inventories not noted above (i.e., tools and chemicals)

PROCEDURES

Inventory Valuation

Inventories for governmental and proprietary funds should be recorded as an asset on the balance sheet. Inventory held by governmental funds should be valued at cost. Proprietary fund inventory should be valued at the lower of cost or market. The cost of the inventory item is the price paid or the consideration given to acquire the inventory item. Included in the cost are all direct and indirect costs incurred during transportation. Market value is the item's current replacement cost by either purchase or reproduction. Exceptions to this definition are:

- ⌘ The market value should not exceed the net realizable value (ceiling), which is the estimated selling price of the inventory in the ordinary course of business less reasonably predictable costs of completion and disposal
- ⌘ The market value should not be less than the net realizable value reduced by an allowance for an approximately normal profit margin.

Agencies should use the first in – first out method of valuation (FIFO) or the average cost method, if it approximates FIFO to value inventory. Under the FIFO method, it is assumed that the first items purchased are the first used. Therefore, ending inventory is valued using the most recent unit cost. Under the Average Cost Method, inventories are valued based on the average cost of the items purchased during the year.

Physical Inventory Counts

State agencies may use either the periodic or perpetual inventory methods when accounting for inventory. The periodic inventory method does not require that daily records of inventory be kept, but rather that a physical count of inventories be performed at least once a year. The perpetual inventory method requires agencies to update their records as inventory is purchased and consumed. Agencies must still perform a physical count of the inventory on hand at least once a year under a perpetual system to ensure the completeness and accuracy of the inventory records. Agency management should take into consideration the number of inventory items to be counted and the location of the inventory when determining the timing of the count. Inventory items that are obsolete, damaged or no longer useable in operations should be identified and if necessary removed from the Agency's inventory records. The inventory records should be reconciled to the results of the count and updated accordingly.

Reporting Inventories to the Comptroller's Office

The value of inventories on hand at the end of the fiscal year should be reported to the Comptroller's Office annually utilizing form SCO 577 as part of the GAAP reporting process.

For governmental funds, inventory items should initially be recorded as expenditures when purchased. However, if significant amounts of inventories are on hand at year-end, an adjusting journal entry should be recorded to report the amount of inventory on hand as an asset and a reduction of expenditures. Additionally, a "Reserve for Inventories" (fund balance) should be reported for the total amount of the inventory. This fund balance reserve account indicates that inventories reported do not represent "available spendable resources" even though they are a component of current assets.

FINANCIAL REPORTING

The Comptroller should prepare and issue, monthly and annually, reports which will fairly present the financial position, fiscal results of current operations and additional information required by Sections 19 and 20 of the [State Comptroller Act](#). Additional reports should be prepared to provide relevant management information.

"Financial statements are the means by which the information accumulated and processed in financial accounting is periodically communicated to those who use it," and should "present fairly in conformity with generally accepted accounting principles"¹ the financial position and the results of operations for a designated period of an individual entity. Effective financial statements should show whether there has been proper stewardship of assets and should serve as useful managerial tools. Where it is not consistent with SAMS Accounting Principles, the financial statement should show whether there has been compliance with existing statutes. If financial statement presentation of this information is inconsistent with SAMS Accounting Principles, then compliance should be demonstrated in supplementary schedules.

The Comptroller is required by Section 19 of the State Comptroller Act to record and report monthly "...all revenues, charges against all funds, fund and appropriation balances, interfund transfers, warrants outstanding and assets and encumbrances..." for all State funds, other public funds and assets "available to, encumbered or expended by each State agency..."² The monthly report must summarize this information by State agency, appropriation and detail object account. Section 20 of the State Comptroller Act prescribes annual summarization of monthly reports as well as the reporting of information relative to warrants drawn and receipts deposited. An accounting of the business of the Comptroller's Office is also required by Section 20.

The mechanism by which these requirements will be satisfied is the basic set of financial statements. These statements should utilize terminology and classifications which are consistent within the financial reporting structure, and should be prepared on a comparative basis where practicable and meaningful.

PROCEDURES

Government-Wide and Proprietary Fund Net Assets

Equity reported in the government-wide statement of net assets and proprietary fund balance sheets should be labeled “net assets” and displayed in three separate categories: invested in capital assets, net of related debt; restricted; and unrestricted.

Invested in Capital Assets, Net of Related Debt

This category represents (1) capital asset balances, net of accumulated depreciation, **less** (2) outstanding principal of related debt, net of any unspent proceeds. Related debt includes debt still outstanding that was originally issued to acquire capital assets for the State of Illinois (i.e. “capital-related”) or refund existing capital-related debt. Debt issued to acquire capital assets for other governments is not considered to be capital-related and should not be included in this category. Particular attention needs to be given to debt that is issued for multiple purposes (i.e. issued to purchase assets that are capitalized by a state agency and also to purchase assets that are not capitalized, whether for expense purposes or for acquisition of capital assets for another government). If less than 15 percent of the proceeds are spent on noncapitalizable purposes, the entire amount of the outstanding debt should be considered to be capital-related. If, on the other hand, a significant amount (i.e. more than 15 percent) is spent for noncapitalizable purposes, the amount of the outstanding debt must be allocated based on the percentage determined to be capital-related.

If there are significant unspent proceeds of capital-related debt at year-end, this component does not include the portion of any capital-related debt attributable to those proceeds. Instead, that debt is placed in the net assets component that includes the unspent proceeds. For example, assume the State issues \$100,000,000 in general obligation bonds to be used in the following year for capital projects and records the unspent proceeds in a capital projects fund. In the government-wide statement of net assets, the net assets restricted for capital projects should be offset by the amount of unspent proceeds.

Restricted

This category includes net assets whose use is subject to constraints that are **either**:

- (1) Externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; **or**
- (2) Imposed by law through constitutional provisions or enabling legislation.

Only major categories of restricted net assets should be reported. Further, if restricted net assets include

PROCEDURE	EQUITY	REVISION NUMBER 05-001

permanent endowment or permanent fund principal amounts, the “restricted net asset” component should be presented as either “expendable” or “nonexpendable” to draw a distinction between temporary and permanent restrictions. Nonexpendable restricted net assets are those that are to be maintained in perpetuity.

The basic concept is that restrictions are not unilaterally established by an agency itself, and cannot be removed without the consent of those imposing the restriction or through formal due process. The definition of restricted is intended to identify resources that were received or earned by an agency with an explicit understanding between the agency and the resource providers that the funds would be used for a specific purpose. For example, grants, contributions, and donations are often given under these kinds of conditions. Bond indentures also limit the use of proceeds. Also, see the “Relationship of Reserved Fund Balance to Restricted Net Assets” section below for further discussion on determining when reserved fund balances should be reported as restricted in the government-wide statement of net assets.

Unrestricted

This category includes any remaining balances that do not meet the requirements of the above-mentioned categories (i.e. invested in capital assets, net of related debt, and restricted net assets). Designations of net assets, which represent management intentions for the use of unrestricted resources, should not be reported in the government-wide statement of net assets or in a proprietary fund balance sheet.

Governmental Fund Balances

Equity reported in the governmental fund balance sheet should be labeled “fund balances” and displayed in two separate categories: reserved and unreserved.

Reserved

Fund balance is reserved when:

- (1) there is a legal restriction on spending certain portions of fund balance (e.g. reserves for encumbrances);
or
- (2) certain amounts of fund balance are not available for spending (appropriation) in the subsequent year’s budget (e.g. reserves for inventory balances, prepaid items, noncurrent receivables and other long-term assets that are not offset by deferred revenue, and interfund advances).

However, even if a fund balance meets the definition of reserved, it may be reported as unreserved if the resources that are legally segregated for a specific future use are reported in a separate fund used only for that purpose (i.e. the use of the fund by itself communicates the legal restrictions on the use of the resources).

PROCEDURE	EQUITY	REVISION NUMBER NEW

Unreserved

This category includes any remaining balances that are not reported as “reserved.” Unreserved fund balance indicates the current available financial resources of the agency. Portions of the unreserved fund balance can be classified as “designated.” Designations represent the agency’s self-imposed limitations on the use of fund balance. Generally, designations are supported by definitive plans and approved by an agency’s senior management. NCGA Statement 1, paragraph 120, requires fund balance designations to be reported as part of unreserved fund balance and to be displayed as separate line items or parenthetically on the balance sheet or disclosed in the notes to the financial statements. Designations should not result in reporting negative undesignated balances in the financial statements at year-end, regardless of the amount of undesignated fund balance at the time the designation was made.

Fiduciary Fund Net Assets

Equity reported in the fiduciary fund statement of fiduciary fund net assets should be labeled “net assets”; however, it should **not** be further categorized into the three net asset categories as discussed above for government-wide and proprietary fund statements. Specific display requirements for pension and other employee benefit trust funds and investment trust funds in [GASB Statements No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans](#), [No. 26, Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans](#), and [No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools](#), require net assets to be labeled to indicate the purpose for which they are held. For example, GASB Statement No. 25, paragraph 27, requires the use of the captions “net assets held in trust for pension benefits” or “fund balance reserved for employees' pension benefits.”

Relationship of Reserved Fund Balance to Restricted Net Assets

The amounts reported for restricted net assets for governmental activities in the government-wide statement of net assets generally will differ from amounts reported as reserved fund balances in the governmental fund balance sheet. Although the terms reserved and restricted appear similar, their meanings in a governmental financial reporting context differ significantly. Restricted is based on external, legal constraints, whereas reserved is a function of the budgetary notion of “available for appropriation”. Reserved fund balances may include more than resources that are restricted. An example of resources that are reserved in governmental funds but not restricted in the government-wide financial statements are those that are reserved for inventories.

SUB-SECTION	FINANCIAL STATEMENT PRESENTATION	EFFECTIVE DATE July 15, 2002
PROCEDURE	SPECIAL AND EXTRAORDINARY ITEMS AND OTHER SIGNIFICANT TRANSACTIONS	REVISION NUMBER NEW

PROCEDURES

Special and extraordinary items should be separately reported in governmental and proprietary fund operating statements and in the government-wide statement of activities. The intent is to report special and extraordinary items separately from normal, recurring operations. This location is intended to draw maximum attention to these items so that users may more easily assess their nature, current effect and ongoing implications. Other significant transactions or events should be disclosed in the notes to the financial statements.

Extraordinary Items

Transactions or events that are **both** *unusual in nature* and *infrequent in occurrence* should be classified as an extraordinary item if they individually are material to (1) the operating statement of a governmental or proprietary fund or (2) the governmental or business-type activities (column) of the government-wide statement of activities.

Unusual in Nature

The underlying transaction or event should possess a high degree of abnormality and be of a type clearly unrelated to, or only incidentally related to, the ordinary and typical activities of the State, taking into account the environment in which the State operates. The specific characteristics of the State, such as type and scope of operations, and operating policies should be considered in determining ordinary and typical activities. The environment of the State includes such factors as the characteristics of the industry or industries in which it operates, its geographical location, and the nature and extent of regulation. Thus, a transaction or event may be unusual in nature for one entity but not for another because of differences in their respective environments. Unusual in nature is not established by the fact that a transaction or event is beyond the control of management.

Infrequent in Occurrence

The underlying transaction or event should be of a type that would not reasonably be expected to recur in the foreseeable future, taking into account the environment in which the State operates. Accordingly, a specific transaction of one entity might meet that criterion and a similar transaction of another entity might not because of different probabilities of recurrence. The past occurrence of a transaction or event for the State provides evidence to assess the probability of recurrence of that type of transaction or event in the foreseeable future. By definition, extraordinary items occur infrequently. However, mere infrequency of occurrence of a particular transaction or event does not alone imply that its effects should be classified as extraordinary. A transaction or event of a type that occurs frequently in the environment in which the State operates cannot, by definition, be considered as extraordinary, regardless of its financial effect.

SUB-SECTION	FINANCIAL STATEMENT PRESENTATION	EFFECTIVE DATE July 15, 2002
PROCEDURE	SPECIAL AND EXTRAORDINARY ITEMS AND OTHER SIGNIFICANT TRANSACTIONS	REVISION NUMBER NEW

Materiality

The effect of an extraordinary transaction or event should be classified separately in the applicable operating statements if it is material in relation to revenues, expenditures/expenses, or equity, or it is material by other appropriate criteria. Items should be considered individually and not in the aggregate in determining whether an extraordinary transaction or event is material. However, the effects of a series of related transactions arising from a single specific and identifiable event or plan of action that meet the definition of extraordinary (i.e. unusual in nature and infrequent in occurrence) should be aggregated to determine materiality.

Examples

Examples of extraordinary items include:

- Costs related to an environmental disaster caused by a large chemical spill;
- Significant damage to State buildings due to an earthquake in Northern Illinois; or
- Forest fire in a State park.

Special Items

Significant transactions or other events *within the control of management* that are **either** *unusual in nature* **or** *infrequent in occurrence* should be classified as a special item. Special items differ from extraordinary items in two ways. The first difference is that special items must be *within the control of management*, whereas extraordinary items are not required to be within the control of management. The other difference is that extraordinary items are required to be *both* unusual in nature *and* infrequent in occurrence, whereas special items are only unusual in nature *or* infrequent in occurrence, but not both.

Examples

Examples of special items include:

- Sales of significant parcels of State park land;
- Significant forgiveness of debt; or
- Early-retirement program offered to all employees.

Other Significant Transactions

Other transactions or other events that are **either** unusual in nature **or** infrequent in occurrence **but not** within the control of management should be disclosed in the notes to the financial statements if they

individually are material in relation to a major fund or the government-wide financial statements.

Additionally, there may be circumstances in which a transaction or event is not considered to be significant, but due to its unusual nature or infrequent occurrence should be considered for disclosure in the notes to the financial statements.

Examples

Examples of other significant transactions include:

- Costs incurred to repair damage caused by a flooding. Such flooding occurs infrequently but is not unusual to the damaged location; or
- Significant damage to State buildings caused by fire. Such damage occurs infrequently but is not unusual.

Reporting to Comptrollers' Office

The nature and amounts of special and extraordinary items, other significant transactions, and other unusual or infrequent transactions that should be considered for disclosure as previously discussed in these procedures should be reported to the Comptroller's Office annually. Agencies should use the explanation area on form SCO-510 to report these transactions. In addition, form SCO-535 or SCO-585 should be completed for proprietary and university funds, respectively, to report related footnote disclosures included in the agency's financial statements.

SUB-SECTION	FINANCIAL STATEMENT PRESENTATION	EFFECTIVE DATE July 15, 2002
PROCEDURE	REPORTING SEGMENT INFORMATION	REVISION NUMBER NEW

BACKGROUND

Certain disclosures are required to be reported in the notes to the financial statements for activities associated with enterprise funds that are considered to be segments. Whether segment information is required to be reported is based upon whether the enterprise fund represents an identifiable activity or group of activities with outstanding revenue-backed debt for which there are separate accounting requirements.

PROCEDURES

A segment is an identifiable activity or group of activities reported as or within an enterprise fund or a component unit which follows enterprise fund accounting (i.e. University) for which one or more revenue bonds or other revenue-backed debt instruments (such as certificates of participation) are outstanding with revenues pledged in support of that debt. In addition, there must be a requirement imposed by an external party to separately account for the activity's revenues, expenses, gains and losses, assets, **and** liabilities (i.e. accounting and reporting requirements commonly are set forth in the bond indentures).

For example, universities often issue revenue bonds for the construction of dormitories (housing facilities). If the bond indenture specifically requires the university to separately account for the revenues, expenses, gains, losses, assets and liabilities of the dormitories, then this activity is considered to be a segment. If, on the other hand, the requirement was limited to only revenues and expenses, the university would not be required to make segment disclosures.

Segment disclosures are not required when an individual fund is both a segment and is reported as a major fund or for an activity whose only outstanding debt is conduit debt for which the State has no obligation beyond the resources provided by related leases or loans.

Segment disclosures to be reported in the notes to the financial statements for each identifiable segment (as defined above) are as follows:

- a. Type of goods or services provided by the segment.
- b. Condensed statement of net assets:
 - (1) Total assets—distinguishing between current assets, capital assets, and other assets. Amounts receivable from other funds or component units should be reported separately.

- (2) Total liabilities—distinguishing between current and long-term amounts. Amounts payable to other funds or component units should be reported separately.
 - (3) Total net assets—distinguishing among: (1) restricted (separately reporting expendable and nonexpendable components); (2) unrestricted; and (3) amounts invested in capital assets, net of related debt.
- c. Condensed statement of revenues, expenses, and changes in net assets:
- (1) Operating revenues (by major source).
 - (2) Operating expenses. Depreciation (including any amortization) should be identified separately.
 - (3) Operating income (loss).
 - (4) Non-operating revenues (expenses)—with separate reporting of major revenues and expenses.
 - (5) Capital contributions and additions to permanent and term endowments.
 - (6) Special and extraordinary items.
 - (7) Transfers.
 - (8) Change in net assets.
 - (9) Beginning net assets.
 - (10) Ending net assets.
- d. Condensed statement of cash flows:
- (1) Net cash provided (used) by:
 - (a) Operating activities.
 - (b) Non-capital financing activities.
 - (c) Capital and related financing activities.
 - (d) Investing activities.
 - (2) Beginning cash and cash equivalent balances.

Accounting Procedures	Written or unwritten procedures designed to achieve operational or control objectives of a given accounting system. Procedures can be detailed, step-by-step or general.
Accounting System	A system involving inputs, processes and outputs of varying nature designed to achieve accountability for assets and related records. Accounting systems usually involve the recording, processing and summarizing of financial transactions, with controls established to prevent or timely detect and correct errors and illegal acts.
Accounts Payable	Liabilities on open account owed to private persons, firms or corporations for goods and services received by the State (but not including amounts due to other funds of the State or to other governmental units).
Accounts Receivable	Amounts owed on open account from private persons, firms or corporations for goods and services furnished by the State or for taxes due (but not including amounts due from other funds of the State or from other governmental units).
Accrual Basis Accounting	The method of accounting that recognizes the financial effect of transactions, events and interfund activities when they occur, regardless of the timing of the related cash flows.
Accrued Expense	The recognition of an expense for the use of assets or resources when the use occurs, regardless of the timing of the related cash flow.
Accrued Liabilities	The recognition of an amount due to another fund or entity.
Accrued Revenue	Revenues earned during an accounting period, but not collected until a subsequent accounting period.
Adjusting Journal Entry	A journal entry that adjusts account balances that affect both the statement of financial position and the operating statement.

Amortization	The portion of the cost of a limited-life or intangible asset/liability (i.e. bond discount/premium) charged as an expense during each period over the life of the asset/liability.
Appropriation	A statutory authorization granted by the legislative body to an agency allowing it to incur obligations and make expenditures for specific purposes within a specified period of time and generally for a maximum dollar amount.
Appropriation-Common Object	The common purpose for which the appropriation was made, as defined in Section 13 of the Finance Act such as travel and equipment.
Appropriation-Deficiency	An appropriation which is made when the purpose of the regular appropriation has not been completed but the regular appropriation monies have been exhausted.
Appropriation-Detail Expenditure	An appropriation which covers a narrow range of expenditures which can be classified by a single account or line in the chart of detail expenditure accounts.
Appropriation-Line Item	See Appropriation-Detail Expenditure.
Appropriation-Lump Sum	An appropriation for expenditures of two or more of the standard common objects. Such appropriations are used for projects or activities where a breakdown into a standard common object would be impractical or undesirable.
Appropriation-Reappropriation	An appropriation which is made at the beginning of a fiscal year to carry forward the unexpended portion of an expiring appropriation.
Appropriation-Supplemental	An appropriation which is made when the purpose of a regular appropriation has been expanded or a new purpose is to be funded.
Appropriation Account Name	The purpose of the appropriation.

Appropriation Balance-Unexpended

The portion of an appropriation available for expenditure. Appropriation amount less fiscal year-to-date expenditures.

Appropriation Balance Unobligated

The portion of an appropriation expended or obligated. The balance remaining after deducting from the appropriation the accumulated net expenditures and outstanding obligations.

Assets

The entire resources of the State or a fund, including any property, tangible or intangible, of monetary value.

Bad Debt

An account receivable amount due to the State or its agencies that is deemed uncollectible.

Basis of Accounting

The timing of recognition, that is, when the effects of transactions or events should be recognized for financial reporting purposes. For example, the effects of transactions or events can be recognized on an accrual basis (that is, when the transactions or events take place), or on a cash basis (that is, when cash is received or paid). Basis of accounting is an essential part of measurement focus because a particular timing of recognition is necessary to accomplish a particular measurement focus.

Batch

A group of similar transactions.

Beginning Status-Available Balance

Unexpended fund balance at beginning of period.

Beginning Year-Available Balance

Fund balance available for expenditure at the beginning of the current fiscal year (July 1).

Bond Discount

The excess of the face value of a bond over the price for which it is acquired or sold.

Bond Premium

The excess of the price at which a bond is bought or sold over its face value.

Bonded Indebtedness

The portion of debt, represented by outstanding bonds, owed by the State government or by State agencies.

Budget A plan of proposed expenditures and the means of financing them with respect to a specific period of time. The plan may be for a particular organizational unit or for some combination--such as all State agencies.

Budgetary Accounting A method of accounting which allows for the comparison of actual revenues and expenditures to budgeted figures. In many cases, budgetary accounting applies to appropriations and the expenditures authorized thereby.

Budgetary Fiscal Year The State Constitution prescribes a process by which the Governor and the General Assembly adopt a budget for each fiscal year. The Budgetary Fiscal Year begins on July 1, and ends on June 30 of each year. By law, unexpended appropriations at June 30 are available for subsequent expenditure to the extent that encumbrances have been incurred at June 30 provided they are presented for payment during the 2-month "lapse-period."

Building Permanent structure designed to house persons or personal property together with the initial cost of fixtures attached to and forming a permanent part of the building (i.e. immovable).

Building Improvements Capital expenditures that materially extend the useful life of a building, increase the capacity and/or efficiency of the building or adapt to a new use. Building improvements also include capital expenditures that add value, extend the useful life or adapt a leased building to a new use.

Capital Assets Infrastructure, land, land improvements, site improvements, buildings, building improvements, equipment, works of art and historical treasures and all other tangible assets that are used in operations and that have expected useful lives extending beyond a single reporting period.

Capital Debt Bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction, or improvement of capital assets. Capital debt should

Capital Leases

An agreement conveying the right to use property, plant or equipment usually for a stated period of time which meets one or more of the following criteria:

- a. The lease transfers ownership of the asset to the lessee by the end of the lease term.
- b. The lease contains a bargain purchase option.
- c. The lease term is equal to 75 percent or more of the estimated economic life of the leased asset. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used.
- d. The present value at the beginning of the lease term of the minimum lease payments, excluding that portion of the payments representing executory costs to be paid by the lessor, including any profit thereon, equals or exceeds 90 percent of the excess of the fair value of the leased asset to the lessor at the inception of the lease over any related investment tax credit retained by the lessor and expected to be realized by [the lessor]. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used. A lessor shall compute the present value of the minimum lease payments using the interest rate implicit in the lease. A lessee should compute the present value of the minimum lease payments using the incremental borrowing rate, unless (1) it is practicable for [the lessee] to learn the implicit rate computed by the lessor and (2) the implicit rate computed by the lessor is less than the lessee's incremental borrowing rate.

All other leases (i.e., those not meeting the above criteria) are categorized as operating leases.

The accumulation of costs incurred during the construction of an asset. The accumulated costs are held in Construction in Progress until such time as the project is determined to be "substantially complete" (i.e. ready for its intended use).

Contingency

An existing condition, situation or set of circumstances involving uncertainty as to a possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur. [Financial Accounting Standards Board No. 5, Accounting for Contingencies](#), provides guidelines for recognizing a loss liability in these situations. Examples of contingencies include the following:

- Collectibility of receivables
- Threat of expropriation of assets
- Tax refund claims
- Unemployment compensation
- Pending or threatened litigation
- Actual or possible claims and assessments
- Guarantees of indebtedness of others
- Agreements to repurchase receivables or the related property that have been sold.

Federal Appropriation

The estimated resources to be received from the Federal Government that are appropriated by the General Assembly for a fund.

Fiduciary Funds

Those funds used to account for assets held by a governmental unit in a trustee capacity or as an agent for individuals, private organizations and other governmental units. Fiduciary fund types include pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds and agency funds. Fiduciary funds are accounted for in a manner similar to proprietary funds. Agency Funds are purely custodial (assets equal liabilities) and thus do not involve measurement of results of operations.

Fiscal Year

The Fiscal Year of the State of Illinois begins on July 1, and ends on June 30 of each year. (see also Budgetary Fiscal Year)

Function

A group of related activities aimed at accomplishing a major service or regulatory program for which a governmental unit is responsible.

Fund(s)

(1) A fiscal and accounting entity, established by Statute or Administrative Action, recording cash and other financial resources, together with all related liabilities, obligations and residual equities or balances and changes therein which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations; or

(2) General resources of a State agency or a fund.

Fund Balance-Remaining Available
Unexpended

Fund balance available for future expenditure at the beginning of the period.

Fund Classification-Fiduciary

Classification of GAAP funds used to report assets held in trustee or agency capacity for others and which therefore cannot be used to support the government's own programs. There are four different types of fiduciary funds: pension (and other employee benefit)

trust funds, investment trust funds, private-purpose trust funds and agency funds.

Fund Classification-Governmental

Classification of GAAP funds generally used to account for tax-supported activities. There are five different types of governmental funds: general fund, special revenue funds, debt service funds, capital projects funds and permanent funds.

Fund Classification-Proprietary

Classification of GAAP funds that focus on the determination of operating income, changes in net assets (or cost recovery), financial position and cash flows. There are two different types of proprietary funds: enterprise funds and internal service funds.

Fund Group

A term referring to groups of SAMS budgetary funds which are similar in purpose or character. The fund groups are: General Funds, Highway Funds, Special State Funds, Bond Financed Funds, Debt Service Funds, Federal Trust Funds, Revolving Funds, State Trust Funds and Other Trust Funds.

Fund Group-Bond Financed

The SAMS budgetary group of funds established to receive and administer the proceeds of various bond issues of the State.

Fund Group-Debt Service

The SAMS budgetary group of funds established to finance and account for the payment of principal redemption and interest associated with general and special obligation bond issues of the State.

Fund Group-Federal Trust

The SAMS budgetary group of funds established pursuant to grants and contracts between State agencies and the United States. These funds are administered for the specific purposes established by the terms of the grants and contracts.

Fund Group-General

The SAMS budgetary group of funds established to receive the major portion of tax revenues and to pay the regular operating and administrative expenses of most State agencies.

Fund Group-Other Trust

The SAMS budgetary group of funds established to receive and account for resources for subsequent disbursement to a designated recipient. Escrow funds are an example of "Other Trust Funds."

Fund Group-Revolving

The SAMS budgetary group of funds established to finance and account for intergovernmental services. Appropriation of resources of these funds is dependent upon intergovernmental service requirements and appropriations of other State agencies. Revolving Fund resources are provided by expenditures of State agencies for the goods or services financed by the fund.

Fund Group-Special State

The SAMS budgetary group of funds designated in [Section 5 of the Finance Act](#) as special funds in the State Treasury and not elsewhere classified. They represent a segregation of accounts for specific purposes on a substantially perpetual basis.

Fund Group-State Trust

The SAMS budgetary group of funds established by statutes or under statutory authority for specific purposes.

Fund Group-Temporary Trust

The SAMS budgetary group of trust funds or bank deposits established upon the written approval of the Governor and the State Comptroller by an officer or employee who receives or has in his possession money under conditions which do not require payment into the State Treasury, and where there is not trust fund or bank deposit authorized by law for the receipt of the monies. The Temporary Trust Fund shall be legal until the thirtieth day after the signed adjournment of the next regular session of the General Assembly.

The GAAP fund types are: General Funds, Special Revenue Funds, Debt Service Funds, Capital Projects Funds, Permanent Funds, Enterprise Funds, Internal Service Funds, Pension (and other employee benefit) Trust Funds, Investment Trust Funds, Private-Purpose Trust Funds and Agency Funds.

Fund Type-Agency

GAAP fiduciary fund type used to report resources held by the State in a purely custodial capacity (i.e. assets are equal to liabilities).

Fund Type-Capital Projects

GAAP governmental fund type used to account for transactions obtained and used for the acquisition or construction of major capital facilities including those provided to political subdivisions and other public organizations (other than those financed by proprietary funds, fiduciary funds and university funds).

Fund Type-Debt Service

GAAP governmental fund type used to account for transactions related to resources obtained and accumulated to pay interest and principal on general long-term obligations (other than capital leases and unfunded retirement costs).

Fund Type-Enterprise

GAAP proprietary fund type which may be used to report any activity for which a fee is charged to external users for goods and services. Activities are required to be reported as enterprise funds if any one of the following criteria is met. The following criteria should be applied in the context of the activity's *principal revenue sources*:

- Activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity.
- Laws or regulations require that the activity's cost of providing services, including capital costs (such as depreciation or debt service), be recovered with fees

and charges, rather than with taxes or similar revenues.

- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs (such as depreciation or debt service).

Fund Type-General

GAAP governmental fund type used to account for transactions related to resources obtained and used for those services traditionally provided by State, which are not required to be accounted for in other funds.

Fund Type-Internal Service

GAAP proprietary fund type used to report any activity that provides goods or services to other funds, departments or agencies of the primary government and its component units, or to other governments, on a cost-reimbursement basis. Internal service funds should be used only if the reporting government (i.e. State of Illinois) is the predominant participant in the activity.

Fund Type-Investment Trust

GAAP fiduciary fund type used to report the external portion of investment pools reported by the sponsoring government (i.e. State of Illinois) in accordance with [GASB Statement No. 31](#).

Fund Type-Pension (and Other Employee Benefit) Trust

GAAP fiduciary fund type used to report resources that are required to be held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, other postemployment benefit plans or other employee benefit plans.

Fund Type-Permanent

GAAP governmental fund type used to account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support programs of the State.

Fund Type-Special Revenue

GAAP governmental fund type used to account for transactions related to resources obtained from specific revenue sources (other than for major capital projects) that are legally restricted to expenditure for specified purposes.

Fund Type-Private Purpose Trust

GAAP fiduciary fund type used to account for any trust arrangements not properly classified as a pension trust

Fund Type-University

GAAP fund type used to account for those funds which receive revenues such as fees, tuition and excess income from auxiliary enterprises at the State supported institutions of higher education. The General Assembly appropriates resources of these funds for the support, operation and improvement of State supported colleges and universities. Also includes those funds administered by universities and not subject to appropriation.

Funds-Petty Cash

A fund established for the purpose of purchasing items of small cost, payment of postage due and for other nominal expenditures which cannot be administered economically and efficiently through customary procurement practices. Such funds may be established and maintained only from monies which are not required by the Constitution to be paid into the State Treasury.

General Ledger

A book, file or other device which contains the accounts necessary to reflect in summary or in detail the financial position and the results of operations of a governmental unit or fund.

General Obligation Bonds

Obligations secured by the pledge of the full faith and credit of the State to pay debt principal and interest. The State Constitution provides that the State may issue general obligation bonds for specific purpose in such amounts as provided either by the General Assembly with a three-fifths vote of each house or by a majority of voters in a general election.

General Revenues

Revenues that are not required to be reported as program revenues in the government-wide statement of activities.

Generally Accepted Accounting Principles

The conventions, rules and procedures necessary to define accepted accounting practice at a particular time. The principles have developed on the basis of experience, reason, custom, usage, and to a significant extent, practical necessity.

Government Mandated Nonexchange
Transactions

Transactions occurring when a government (including the federal government) at one level provides resources to a government at another level and requires that government to use the resources for a specific purpose or purposes established in the provider's enabling legislation. That is, the provider establishes purpose restrictions and also may establish time requirements. Examples of government-mandated nonexchange transactions include federal programs that state or local governments are mandated to perform, and state programs that local governments are mandated to perform. The principal characteristics of these transactions are (1) a provider government (including the federal government) mandates that a recipient government perform a particular program or facilitate its performance by another government or by a nongovernmental entity (secondary recipient) and (2) fulfillment of certain requirements is essential for a transaction (other than the provision of cash or other assets in advance) to occur.

Governmental Accounting

The composite activity of analyzing recording, summarizing, reporting and interpreting the financial transactions of governmental units and agencies.

Governmental Funds

Those funds through which most governmental functions typically are financed. The acquisition, use and balances of the government's expendable financial resources and the related current liabilities--except those accounted for in proprietary funds--are accounted for through governmental funds. Governmental fund types include general fund, special revenue funds, capital projects funds, debt service funds and permanent funds.

The governmental fund measurement focus is upon determination of financial position and changes in financial position (sources, uses, and balances of financial resources), rather than upon net income determination.

Grant

A contribution made by one governmental unit (State or Federal) to another unit or to an individual. The

contribution is usually made to aid in the support of a specified function, but it may be for general purposes.

Imposed nonexchange revenues

Assessments by governments on nongovernmental entities, including individuals, other than assessments on exchange transactions. Examples include property taxes, fines and penalties and property forfeitures (e.g. seizures and escheats). The principal characteristic of these transactions is that the required transmittal of resources to the assessing government is imposed by that government on an act committed or omitted by the provider (e.g. property ownership or the contravention of a law or regulation) that is not an exchange transaction. Enabling legislation sometimes places purpose restrictions on the use of the resources. Alternatively, or in addition to purpose restrictions, the government may specify the period when the resources are required to be used or when use may begin. For example, property taxes generally are required to be used in or beginning in a particular period – the period for which the taxes are levied – which may not be the same period that payment is due or the period when the government has a right to place a lien on the property.

Incurred But Not Reported (IBNR)

Estimated liabilities related to claims that have occurred, but have not been reported as of the date of the financial statements.

Indirect Expenses

Expenses related to a function (or some lower classification level presented in the Statement of Activities) that are not direct expenses. For example, the general government function includes expenses that are, in essence, indirect expenses of other functions.

Inexhaustible Assets

Capital assets that have an infinite useful life.

Infrastructure

Long-lived capital assets that normally are stationary in nature and can be preserved for a significantly greater number of years than most capital assets. Examples of infrastructure assets include roads, bridges, tunnels, drainage systems, waterways, water and sewer systems, dams and lighting systems (attached to infrastructure assets, e.g., interstate lighting or airport runway

The difference between the current fiscal Year-to-date item (expenditures or receipts) and the prior fiscal year-to-date item (expenditures or receipts).

% Increase/Decrease-Current Month

Percentage increase or decrease of the current item (cash receipts or expenditures) over the item (cash receipts or expenditures) for the same month of the prior fiscal year.

% Increase/Decrease Fiscal
Year-To-Date

Percentage increase or decrease of the current fiscal year-to-date item (cash receipts or expenditures) over the item (cash receipts or expenditures) for the same period of time in the prior fiscal year.

Installment Purchase Agreement

An agreement where title to the property (ownership) vests in the purchaser immediately, in exchange for a written promise to pay the seller a series of future payments at agreed upon dates and amounts.

Installment Purchase Obligations

Liabilities for the payments of principal and interest under an installment purchase contract.

Interfund Activity

Reciprocal and non-reciprocal activity between funds of the primary government.

Interfund Loans

Amounts provided between funds of the primary government with a requirement for repayment within a reasonable time.

Interfund Reimbursements

Repayments from the funds of the primary government responsible for particular expenditures or expenses to the funds of the primary government that initially paid for them.

Interfund Services Provided and Used

Magnetic Tape Transmittal
Control Slip

A control document used to transmit an automated voucher tape and its accompanying hard copy document to the Comptroller.

Major Function

A group of related activities aimed at accomplishing a major service or regulatory program for which a governmental unit is responsible. The major functions are: Health and Social Services, Employment and Economic Development, Education, Transportation, Environmental and Business Regulation, Public Protection and Justice, General Government, Debt Service and Refunds.

Major Funds

A governmental fund or an enterprise fund reported as a separate column in the State's basic financial statements. The general fund is always reported as a major fund. Other funds are reported if they meet the following criteria as outlined in [GASB 34](#) for major funds or if the State believes a fund is important due to public interest or consistency.

Funds should be classified as major based on the following criteria:

1. Total assets, liabilities, revenues, or expenditures/expenses of the individual government or enterprise fund must be 10% of the corresponding total (asset, liabilities, etc.) for all funds of that category or type (i.e. total governmental or total enterprise funds) *and*
2. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5% of the corresponding total for all governmental and enterprise funds combined.

Major Source

A primary classification of cash receipts.

Measurement Focus

The objective of a measurement, that is, what is being expressed in reporting the State's financial performance and position. A particular measurement focus is accomplished by considering not only which resources are measured (i.e., financial or economic resources), but also when the effect of transactions or events involving those resources are recognized (the basis of accounting). The measurement focus of government-wide financial statements, proprietary fund financial statements and the fiduciary fund financial statements is economic resources. The measurement focus of governmental fund financial statements is current financial resources.

Minor Function

A subdivision of a major function.

Modified Accrual Accounting

The basis of accounting under which revenues should be recognized in the accounting period in which they become available and measurable. Expenditures should be recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term debt which should be recognized when due.

Modified Approach (Infrastructure)

The election not to depreciate infrastructure assets that are part of a network or subsystem of a network that meet two specific requirements. The agency manages the eligible infrastructure assets using an asset management system that has certain specified characteristics and the agency documents that the eligible infrastructure assets are being preserved approximately at (or above) a condition level established and disclosed by the agency.

Money Market Investments

Short-term highly liquid instruments including commercial payer, banker's acceptances and U.S. Treasury and agency obligations.

Net Assets

The difference between a government's assets and its liabilities is its net assets. Net assets should be displayed in three components – invested in capital assets, net of related debt; restricted (distinguishing between major categories of restrictions); and unrestricted.

Net Assets – Invested in Capital
Assets, Net of Related Debt

One of three components of net assets that must be reported in both government-wide and proprietary fund financial statements, calculated as follows: (1) capital assets, less (2) accumulated depreciations, less (3) outstanding principal of capital debt, net of unspent proceeds.

Net Pension Obligation (NPO)

The cumulative difference between annual pension cost and the employer's contributions to defined benefit pension plan, including the pension liability (asset) at transition, and excluding short-term differences and unpaid contributions that have been converted to pension-related debt. Transition refers to the date the State elected to apply the provisions of [GASB Statement No. 27](#).

Network

All assets that provide a particular type of service for the State or an agency. A network of assets may be only one asset that is composed of many components. For example, a network of infrastructure assets may consist of a series of inter-connected highways and roads.

Non-Current Assets

Assets not available in the current operating cycle (normally one year) to finance operations.

Nonexchange Transaction

Transaction where the State receives or gives value to another party without directly receiving or giving equal value (benefit) in exchange.

Nonreciprocal Interfund Activity

Transactions between funds of the primary government in which there is not an exchange of approximately equal value including interfund transfers and interfund reimbursements.

Non-Shared Fund

A fund in which a single State agency is responsible for substantially all deposits and disbursements from the fund.

Program Revenues	Revenues that are derived directly from a program of the State or from parties outside of the State's taxpayers or citizenry.
Program-Specific Grants and Contributions	Revenues arising from mandatory and voluntary nonexchange transactions with other governments, organizations, or individuals that are restricted for use in a particular program of the State.
Proprietary Funds	<p>Those funds used to account for a government's ongoing organizations and activities which are similar to those often found in the private sector. All assets liabilities, equities, revenues, expenses and transfers relating to the government's business and quasi-business activities--where net income and capital maintenance are measured--are accounted for through proprietary funds. Proprietary fund types include enterprise funds and internal service funds.</p> <p>The generally accepted accounting principles are those applicable to similar businesses in the private sector and the measurement focus is upon determination of net income, financial position and changes in financial position.</p>
Public Entity Risk Pool	A cooperative group of governmental agencies joining together to finance an exposure, liability or risk. Risk may include property and liability, workers' compensation or employee health care. A pool may be a stand-alone entity or included as part of a larger governmental entity that acts as the pool's sponsor.
Purchase Order	A document that authorizes the delivery of specified merchandise or the rendering of certain services and the making of a charge for them.
Purpose Restrictions	Legal limitations that specify the purpose or purposes for which resources are required to be used in a government-mandated or voluntary nonexchange transaction.
Receipts	Cash received and ordered by the Comptroller into the State Treasury.

Transfers In-Fund

Increases in the available fund balance which are offset by corresponding decreases in the available fund balance of one or more other funds.

Transfers Net

Transfers in minus transfers out.

Transfers Out-Fund

Decreases in the available fund balance of a fund which are offset by corresponding increases in the available fund balance of one or more other funds.

Unencumbered Balance of
Appropriation or Allotment

The portion of an appropriation or allotment not yet expended or encumbered (obligated). The balance remaining after deducting from the appropriation or allotment the accumulated expenditures and outstanding encumbrances (obligations).

Unobligated Balance of
Appropriation or Allotment

The portion of an appropriation or allotment not yet expended or obligated. The balance remaining after deducting from the appropriation or allotment the accumulated expenditures and outstanding obligations.

Unexpended Balance of
Appropriation or Allotment

The portion of an appropriation or allotment which has not been expended. The balance remaining after deducting from the appropriation or allotment the accumulated expenditures (warrants issued).

Unrestricted Net Assets

That portion of net assets that is neither restricted nor invested in capital assets (net of related debt).

Unspent Proceeds on Capital Debt

Financial resources (cash, investments) generated by capital debt which have not yet been used to acquire or construct capital assets.

Voluntary Nonexchange Transactions

Transactions resulting from legislative or contractual agreements, other than exchanges, entered into willingly by two or more parties. Examples include certain grants, certain entitlements and donations by nongovernmental entities, including individuals (private donations). Both parties to a voluntary nonexchange transaction may be governments (including the federal government, as a provider) or one party may be a nongovernmental entity, including an individual. Frequently, the provider establishes purpose restrictions and eligibility requirements. In many cases, the provider may require the return of the resources if the purpose restrictions or eligibility requirements are contravened after recognition of the transaction. The principal characteristics of voluntary nonexchange transactions are they are not imposed on the provider or the recipient and fulfillment of eligibility requirements is essential for a transaction (other than the provision of cash or other assets in advance) to occur.

Voucher

A document submitted by a governmental agency requesting that payment be made to a vendor for goods received or services performed or authorized. It evidences the propriety of a transaction and indicates the account(s) in which it is to be recorded.

Voucher-Invoice, C-13

A voucher used to request payment to a vendor for goods received or services performed except for personal services and travel.

Voucher-Travel, C-10

A voucher used by State employees to claim reimbursement for official business related travel expenses.

Vouchers Payable

The difference between the vouchers approved for payment by the Comptroller and the warrants issued for the vouchers.

INTRODUCTION

One of the objectives of the Statewide Accounting Management System is to have a central source for the collecting, summarizing and reporting of statewide financial and accounting information. This will facilitate the management of the State's fiscal affairs within the Comptroller's Office and also provide a central source for obtaining statewide accounting and financial information for the public, legislators and other individuals interested in the fiscal status of the State.

Accounting and financial information maintained in the Comptroller's Office pertains to funds held in the State Treasury and also funds held by State agencies outside of the Treasury. Information regarding funds held in the State Treasury is obtained from the fund, appropriation and receipt accounting records maintained in the Comptroller's Office. Information regarding other funds used by State agencies is obtained by the Comptroller from periodic reports provided by State agencies.

The media used for the dissemination of this statewide fiscal information will be primarily electronic media and a limited number of computer prepared reports. The reports are detail operating and accounting reconciliation reports. They will primarily be used by agencies and by the Comptroller to carry out day-to-day operating responsibilities.

The purpose of this section is to present examples of these reports and to describe their use and data elements.

STATUTE REFERENCE

The statutory authority giving the Comptroller the responsibility to maintain and operate a statewide financial information system is contained in the State Comptroller Act ([15 ILCS 405/19](#)), excerpted below:

"The Comptroller shall maintain complete, accurate and current financial records relating to State funds and to other public funds and assets available to, encumbered or expended by each State agency, including trust funds or other moneys not subject to appropriation, setting out all revenues, charges against all funds, fund and appropriation balances, interfund transfers, warrants outstanding and assets and encumbrances, in a manner consistent with the uniform State accounting system prescribed by the Comptroller. Such records shall be public records open to public inspection."

"Each month the Comptroller shall prepare a report summarizing by State agency and appropriation the above information in such form as will most clearly and accurately set out the current fiscal condition of the State.

In addition, each month the Comptroller shall prepare a report by detail object account in such form as will most clearly present the status of such accounts.

The Comptroller shall prescribe forms for the periodic reporting of financial accounts, transactions and other matters by State agencies, compatible with the reports required of the Comptroller under this Section."

RECONCILIATION REPORTS

The effectiveness of any accounting and financial information system is very much dependent on the accuracy of data submitted and the confidence of its users that the system handled that data properly. Agency reconciliation is the primary control that insures these requirements are being satisfied.

A reconciliation to the SAMS system is not applicable for agencies that use SAMS as their system of record. However, agencies shall ensure that their source documents have been properly recorded in SAMS and in the corresponding reports.

The Office of the Comptroller provides each agency which has had activity during the month with up to seven reconciliation reports. These reports are intended to allow the agency to compare its internal records with those of the Comptroller's to insure both parties that the SAMS system is functioning properly and dealing with accurate information. The Comptroller is prepared to work with any agency in resolving discrepancies.

The key reports used for agency reconciliation are:

- Monthly Revenue Status – Report SB04 (See SAMS Procedure 25.40.10)
- (Monthly) Cash Report – Report SB05 (See SAMS Procedure 09.40.10)
- Monthly Appropriation Status – Report SB01 (See SAMS Procedure 11.40.10)
- (Monthly) Obligation Activity Report – Report SC15 (See SAMS Procedure 15.30.20)
- (Monthly) Object Expense/Expenditures By Quarter – Report SA02 (See SAMS Procedure 07.30.21)
- (Monthly) Appropriation Transfer Report – Report SB03 (See SAMS Procedure 07.30.24)
- (Monthly) Agency Contract Report – Report SC14 (See SAMS Procedure 15.30.10)

INTRODUCTION

The Statewide Accounting Management System is based on fund accounting. Funds are the self-balancing accounting entities against which all financial activity of the State is reported. Appropriations, receipts, and expenditures of all State agencies are controlled through reference to the various funds maintained by the State.

This section of the SAMS Manual describes the various types and classifications of funds and what steps State agencies must perform in order to establish or dissolve funds according to State statutes. It also describes how transfers of money from one fund to another may be made.

TYPES OF FUNDS

Funds are classified in several ways. For purposes of SAMS, the groups of funds within the State of Illinois are:

General Funds:

Those funds established to receive the major portion of tax revenues and to pay the regular operating and administrative expenses of most State agencies.

Highway Funds:

Those funds established to receive and distribute special assessments related to transportation, such as Motor Fuel Tax, and to support the construction and maintenance of transportation facilities and activities of the State of Illinois.

Special State Funds:

Those funds designated in [Section 5 of the Finance Act](#) as special funds in the State Treasury and not elsewhere classified. They represent a segregation of accounts for specific purposes on a substantially perpetual basis.

Bond Financed Funds:

Those funds established to receive and administer the proceeds of various bond issues of the State.

Debt Service Funds:

Those funds established to finance and account for the payment of principal redemption and interest associated with the general obligation bond issues of the State.

Federal Trust Funds:

Those funds established pursuant to grants and contracts between State agencies and the United States. The funds are administered for specific purposes established by the terms of the grants and contracts.

Revolving Funds:

Those funds established to finance and account for intra-governmental services. Appropriation of resources of these funds is dependent upon intra-governmental service requirements and appropriations of other State agencies. Revolving Fund resources are provided by expenditures of State agencies financed by the fund.

State Trust Funds:

Those funds established by statute or under statutory authority for specific purposes.

Other Trust Funds:

Those funds established to receive and account for resources for subsequent disbursement to a designated recipient. Escrow funds are an example of an Other Trust Fund.

See Procedure 03.20.10, pages 1 - 3 of 4 for the definition of fund types and account groups in conformance with generally accepted accounting principles

STATUTE REFERENCE

Statutory authority for the creation of funds is contained in various sections of the Illinois Compiled Statutes quoted below. For analysis and interpretation of these laws and how they relate to the establishment of funds, refer to the Statement of General Policy - Procedure 09.10.40.

General Revenue Fund. (30 ILCS 105/4.)

"All money, belonging to or for the use of the State, paid into the treasury thereof, not belonging to any special fund in the State Treasury, shall constitute the general revenue fund."

Special funds. (30 ILCS 105/5.)

"When any special fund in the State Treasury is discontinued by an Act of the General Assembly, any balance remaining therein on the effective date of such Act shall be transferred to the General Revenue Fund, or to such other fund as such Act shall provide. Warrants outstanding against... therein shall be paid out of the fund to which the transfer was made."

"When any special fund in the State Treasury has been inactive for 18 months or longer, the fund is automatically terminated by operation of law and the balance remaining in such fund shall be transferred by the Comptroller to the General Revenue Fund. When a special fund has been terminated by operation of law as provided in this Section, the General Assembly shall repeal or amend all Sections of the statutes creating or otherwise referring to that fund.

"The Comptroller shall be allowed the discretion to maintain or dissolve any Federal trust fund which has been inactive for 18 months or longer."

State Trust Funds Established on Request from State Agencies - Monies Permanently Authorized to be Held Locally. (30 ILCS 105/34.)

"All public funds received or held by any State agency as defined in Section 7 of the 'State Comptroller Act' and not subject to appropriation, except funds required to be held or directly administered by a State agency pursuant to (a) any Act in relation to revenue bonds, (b) any bond indenture or other legally binding bond contract, (c) limitations legally imposed by the source of such funds, or (d) another statute, shall be paid over to the State treasurer within the time period established for like amounts in subsection (a) of Section 2 of the State Officers and Employees Money Disposition Act or within such other applicable period as may be specified in rules or regulations promulgated under subsection (b) of Section 2 of 'An Act in relation to the payment and disposition of moneys received by officers and employees of the State of Illinois by virtue of their office or employment', approved June 9, 1911, as now or hereafter amended, and shall be held by the State

treasurer in a special fund for such agency. The Comptroller shall set up and maintain accounts for such funds as may be appropriate, in conformity with the 'State Comptroller Act' and the rules and regulations adopted under that Act. Payments out of such funds shall be made by the treasurer only upon warrant drawn and presented by the Comptroller in compliance with the 'State Comptroller Act'."

Federal Trust Funds. (15 ILCS 515/1.)

"The Treasurer of the State of Illinois is authorized to receive from the United States of America or any agency thereof and to hold as ex-officio custodian thereof any money which has been or shall be under the provisions of:

1. Titles I, IV, V, VI and X of the 'Social Security Act', enacted by the 74th Congress of the United States, as amended; or
2. 'An Act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefore,' enacted by the 68th Congress of the United States; or
3. The Act approved June 16, 1933, authorizing the creation of a Federal Emergency Administration of Public Works; or
4. An Act of Congress dated May 23, 1908, 35 Statutes 260, as the same appears in Section 500, Title 16, United States Code Annotated, relating to the receipt and distribution of moneys among counties in which are located national forests; or
- 4a. An Act of Congress dated September 3, 1954, 68 Statutes 1266, as the same appears in Section 701c-3, Title 33, United States Code Annotated, relating to the receipt and distribution of moneys among counties in which are located lands leased by the United States which it had acquired for flood control, navigation and allied purposes; or
- 4b. Section 110 of the Federal-Aid Highway Act of 1956 (Public Law 627 of the 84th Congress); or
5. Any other law of the United States of America now or hereafter in force providing for the allotment of money for use by or in conjunction with the State of Illinois or some agency thereof whenever a condition or limitation is imposed by that law or by a rule or regulation of the officer or board having charge of the allotment or transmission of such money which prevents payment thereof into the treasury of the State of Illinois, except as otherwise provided in 'An Act in relation to the administration of the assets of the Illinois Rural Rehabilitation Corporation', approved April 24, 1951, as now or hereafter amended; or

6. The following laws of the United States of America now in force; (1) 'An Act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts, established under the provisions of an Act of Congress approved July second, eighteen hundred and sixty-two', approved August 30, 1890; (2) 'An Act making appropriations for the Department of Agriculture for the fiscal year ending June thirtieth, nineteen hundred and eight', approved March 4, 1907; (3) 'An Act to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges', approved June 29, 1935; and any other law of United States of America hereafter in force providing for the benefit of or the more complete endowment and support of land-grant colleges and universities."

Monies Temporarily Authorized to be Held Locally. (30 ILCS 230/2A.2.)

"No officer or employee of this State shall create or maintain or participate in a trust fund or bank or savings and loan association deposit of any money received by him by virtue of his office or employment except as provided by law. Any such officer or employee who on the effective date of this amendatory Act of 1961 has in his possession, or after such effective date receives, money under conditions which do not require payment thereof into the State Treasury, but which he is authorized by law to receive and hold in a trust fund or bank or savings and loan association deposit outside the State Treasury, shall immediately submit a report to the Auditor General identifying the trust fund or bank or savings and loan association deposit as well as the depository in which it is maintained.

If any such officer or employee receives or has in his possession money under conditions which do not require payment thereof into the State Treasury, and there is no trust fund or bank or savings and loan association deposit authorized by law for the receipt thereof, he may, upon the written approval of the Governor and the State Comptroller, establish a temporary trust fund or bank or savings and loan association deposit which shall be legal until the thirtieth day after the sine die adjournment of the next regular session of the General Assembly. A copy of such written approval shall immediately be forwarded by the Comptroller to the Auditor General.

As soon as the next regular session of the General Assembly has organized for the transaction of business, a complete report concerning each such temporary trust fund or bank or savings and loan association deposit shall be filed, by the State officer or employee having charge thereof, with the presiding officer of each house of the General Assembly. If such General Assembly does not, by law, authorize continuance of the trust fund or bank or savings and loan association deposit so required to be reported, the money in such temporary trust fund or bank or savings and loan association deposit shall be deposited in the general revenue fund in the State Treasury."

Petty Cash Funds. (30 ILCS 105/13.3)

"Any State agency may establish and maintain petty cash funds for the purpose of making change, purchasing items of small cost, payment of postage due, and for other nominal expenditures which cannot be administered economically and efficiently through customary procurement practices.

Petty cash funds may be established and maintained from moneys which are appropriated to the agency for Contractual Services. In the case of an agency which receives a single appropriation for its ordinary and contingent expenses, the agency may establish a petty cash fund from the appropriated funds.

Before the establishment of any petty cash fund, the agency shall submit to the State Comptroller a survey of the need for the fund. The survey shall also establish that sufficient internal accounting controls exist. The Comptroller shall investigate such need and if he determines that it exists and that adequate accounting controls exist, shall approve the establishment of the fund. The Comptroller shall have the power to revoke any approval previously made under this Section.

Petty cash funds established under this Section shall be operated and maintained on the imprest system and no fund shall exceed \$1,000, except that the Secretary of State may maintain a fund of not exceeding \$2,000 for each Chicago Motor Vehicle Facility, and each Springfield Public Service Facility and the Motor Vehicle Facilities in Champaign, Decatur, Marion, Naperville, Peoria, Rockford, Granite City, Quincy, and Carbondale, to be used solely for the purpose of making change. Single transactions shall be limited to amounts less than \$50 and all transactions occurring in the fund shall be reported and accounted for as may be provided in the uniform accounting system developed by the State Comptroller and the rules and regulations implementing that accounting system. All amounts in any such fund of less than \$1,000 but over \$100 shall be kept in a checking account in a bank, or savings and loan association, or trust company which is insured by the United States government or any agency of the United States government except that in funds maintained in Chicago Motor Vehicle Facilities and each Springfield Public Service Facility, and the Motor Vehicle Facilities in Champaign, Decatur, Marion, Naperville, Peoria, Rockford, Granite City, Quincy, and Carbondale, all amounts in the fund may be retained on the premises of such facilities.

No bank or savings and loan association shall receive public funds as permitted by this Section, unless it has complied with the requirements established pursuant to Section 6 of 'An Act relating to certain investments of public funds by public agencies,' approved July 23, 1943, as now or hereafter amended.

An internal audit shall be performed of any petty cash fund which receives reimbursements of more than \$5,000 in a fiscal year.

STATEMENT OF GENERAL POLICY

CREATION OF FUNDS

The statutes quoted in the preceding section set up various categories of funds maintained within the State government. All monies received by State agencies are required to be deposited into one of the categories of funds discussed below:

I. Legislatively Created Funds

There are two groups of legislatively created funds other than state trust funds.

- A. General Revenue Fund - Created by (**30 ILCS 105/4**)
- B. Special Funds - (**30 ILCS 105/5**) Only the General Assembly may create a fund in this category. Examples of such funds include the Road Fund, the Statistical Services Revolving Fund and the Capital Development Bond Fund.

The Comptroller's Funds Management Department may establish funds created by substantive statute, or appropriation bill, based on a review of the new or amendatory legislation. When Funds are added to the SAMS accounting tables, the Funds Management Department will document the Fund by completing the budgetary portion of the Budgetary/GAAP Fund Establishment Form (C-68). The Funds Management Department will forward a copy of the form to the Financial Reporting Department for fund type classification, as well as the State Accounting Department for notification to the agency and the State Treasurer.

The administering agency may choose to notify the Comptroller by submitting a completed "Application to Establish or Dissolve a Fund" form (Procedure 09.20.10) with a copy of the legislation signed into law by the Governor and filed with the Secretary of State.

II. Trust Fund Establishment

A. Legislation Trust Funds

There are two categories of Trust Funds recognized by the SAMS budgetary accounting tables; 1) State Trust and 2) Federal Trust funds. Trust funds may be created by substantive statutes. Such trust funds include the Group Insurance Premium Fund, the

State Employees Retirement System Trust and the federal Vocational Rehabilitation Fund.

Based on a review of the substantive legislation, the Funds Management Department may establish the trust fund on SAMS. As with special funds, the Department will document the Fund by completing the budgetary portion of the Budgetary/GAAP Fund Establishment Form (C-68). The form will be forwarded to the Financial Reporting Department for completion of fund classification and related GAAP information. In addition, a copy of the documentation will be provided to Statewide accounting for notification to the agency and the State Treasurer of the fund establishment.

The administering agency, however, may choose to notify the Comptroller of the fund creation by completing an "Application to Establish or Dissolve a Fund" (Procedure 09.20.10) and providing a copy of the legislation creating the fund, as signed into law by the Governor.

B. Administratively Created Trust Fund

Administrative trust funds are either classified as "State" trust or "Federal" trust for budgetary purposes:

1. State Trust funds are comprised of public monies, which are not required to be appropriated and may not be retained in a local bank account. State Trust funds may consist of grants, gifts or bequests from sources other than the federal government.
2. Federal Trust funds consist of monies received from the federal government, whether direct or indirect, that are not required to be receipted in some other fund or required to be appropriated by the General Assembly.

When requesting the establishment of a "State" or "Federal" trust fund, the agency **must** complete an "Application to Establish or Dissolve a Fund" (Form C-68). The completed form, and executed copy of the grant or other documentation restricting the use of the monies, is to be sent to the Funds Management Department, 325 West Adams, Springfield, Illinois 62704, for review and recommendation to the Comptroller to approve or deny the establishment of the trust fund. The Comptroller will notify the agency of all action taken in regard to the establishment of the fund. If the fund is approved, a

copy of the C-68 form will also be provided to the Financial Reporting Department for GAAP classification and related documentation requirements.

While an agency may request the establishment of a separate trust fund, the Comptroller may recommend the use of an existing fund for the receipt and disbursement of certain revenues. In those instances, a separate revenue account and expenditure authority account may be established within an existing fund to report the activities of a specific grant or revenue source.

III. Establishment of Federal Trust Funds

State agencies receiving monies from the Federal Government may request the establishment of a Federal Trust Fund held by the State Treasurer to retain those monies. To qualify to be held in a Federal Trust Fund, money must come solely from the Federal Government and may not be used for reimbursement of expenditures already incurred by the agency.

Agencies have the option of following one of two approaches when depositing new Federal monies with the State Treasurer. They may establish a new Federal Trust Fund to receive the monies or they may establish a sub-account within an existing Federal Trust Fund to control expenditures. Under the first approach, a new fund with a unique fund number will be established for each new Federally funded project begun by an agency.

Under the second approach, a new fund would not be established but rather the monies would be deposited into an existing Federal Trust Fund. The depositing agency would follow Procedure 09.20.40 to establish a new unique expenditure account and possibly a new receipt account, thus eliminating the need for a new trust fund. Expenditures against the project can be controlled by using the allotment field to set up sub-accounts within the multi-purpose Federal Trust Fund. All receipts for the project would be credited to the sub-account by increasing the allotment by the amount of the receipt.

The Office of the Comptroller recommends that agencies employ the sub-account method rather than the new fund approach in order to limit the number of new funds that must be created in the State Treasury. Agencies choosing, however, to establish a new Federal Trust Fund should follow Procedure 09.20.10 to complete the form, "Application to Establish or Dissolve a Fund."

IV. Notification of Monies Authorized to be Held Locally

State agencies receiving monies which are not required to be deposited with the State Treasurer may establish a local fund to retain such monies. Local retention may only be employed when the monies are required to be held locally by:

- any Act in relation to revenue bonds;
- any bond indenture or legally binding bond contract;
- limitations legally imposed by the source of such funds; or
- another statute.

Agencies have the option of following one of two procedures when notifying the Office of the Comptroller of the establishment of a locally held fund. They may file a form C-68 (Application to Establish or Dissolve a Fund) with a copy of the enabling legislation attached or a letter stating the establishment of a locally held fund with a copy of the enabling legislation attached.

V. Establishment of Temporary Locally Held Trust Fund or Bank or Savings and Loan Association Deposits (30 ILCS 230/2A.2).

State agencies receiving monies which are not permanently authorized to be held locally but which may nevertheless be retained locally in a temporary trust fund or bank or savings and loan association deposit according to [30 ILCS 230/2A.2](#), may request permission of the Governor and Comptroller to establish such a fund. The trust fund or bank or savings and loan association deposit would be temporary and dissolved if the General Assembly did not authorize its continuance within 30 days of the sine die adjournment of its next regular session.

Agencies establishing such temporary funds have the responsibility under [30 ILCS 230/2A.2](#) of the Illinois Compiled Statutes to file a report on the fund with the General Assembly so that action may be taken to continue the fund. Remaining monies in temporary funds which were not authorized for continuance must be deposited into the General Revenue Fund. Agencies wishing to establish a fund in this category should complete in full the form, "Application to Establish or Dissolve a Fund," (Exhibit 09.20.10-A) and submit it to the Governor for approval. Approved applications will be forwarded by the Governor to the Comptroller for his approval.

VI. Establishment of Petty Cash Funds (**30 ILCS 105/13.3**)

IN ACCORDANCE WITH STATE STATUTE (**30 ILCS 105/13.3**), "ANY STATE AGENCY MAY ESTABLISH AND MAINTAIN PETTY CASH FUNDS FOR THE PURPOSE OF MAKING CHANGE, PURCHASING ITEMS OF SMALL COST, PAYMENT OF POSTAGE DUE, AND FOR OTHER NOMINAL EXPENDITURES WHICH CANNOT BE ADMINISTERED ECONOMICALLY AND EFFICIENTLY THROUGH CUSTOMARY PROCUREMENT PRACTICES." PETTY CASH FUNDS SHOULD NOT BE USED TO PAY FOR ALL EXPENDITURES LESS THAN \$50.00. IF THE VOUCHER/WARRANT PROCESS IS MORE ECONOMICAL AND EFFICIENT, PROVIDES NECESSARY ACCOUNTING INFORMATION (SEE 1099 REPORTING IN B.2 BELOW), OR IF AN AUDIT TRAIL, PAYMENT VERIFICATION OR OTHER DOCUMENTATION PROVIDED BY USING THE VOUCHER/WARRANT PROCESS IS NECESSARY, THE VOUCHER/WARRANT PAYMENT PROCESS SHOULD BE USED RATHER THAN MAKING PAYMENTS FROM PETTY CASH FUNDS.

The following general rules and instructions will apply to the Petty Cash Fund:

A. Creation or Increase of a Petty Cash Fund

1. A Petty Cash Fund shall be established and maintained from monies, which are appropriated for "contractual services." If an agency does not receive a "contractual services" appropriation but does receive an appropriation for "ordinary and contingent expenses" a Petty Cash Fund may be established from this appropriation. Agencies may request the establishment (or increase) of a Petty Cash Fund by completing (Form C-68) which is the "Application to Establish or Dissolve a Fund" and the "Survey of the Need for a Petty Cash Fund" and forwarding them to the Office of the Comptroller. Procedure 09.20.10 should be followed in making such a request. Also, a separate C-68 should be prepared for each Petty Cash Fund request.

(Note - an example of the "Application" and "Survey" are shown in Exhibits 09.20.10-A and 09.20.15-A.)

2. The Office of the Comptroller will review the application and the survey and approve or disapprove the establishment (or increase) of the Petty Cash Fund. Upon approval of the Petty Cash Fund, the Comptroller's Office will assign a fund identification number which must be used to establish and maintain the Petty Cash Fund.

3. Attach a copy of the approved C-68 form to the C-13 (State voucher form) when establishing or increasing a Petty Cash Fund.
4. An agency may have more than one Petty Cash Fund but is limited to one petty cash fund for (a) a division at each location and (b) each appropriated fund resource .
5. "Change Funds" may be approved by the Comptroller's Office under the petty cash statute for use by state agencies to make change in their cash receipting operations. The establishment of change funds and the custodial responsibilities for change funds generally are similar to petty cash funds. However, change funds are strictly for making change and may not be used to pay for expenditures. Likewise, many requirements of petty cash funds do not apply to change funds (e.g., items indicated with an "*" on form C-86 do not apply to change funds.)

B. Operation of a Petty Cash Fund

1. Reimbursement to the Petty Cash Fund should be made from monies which have been appropriated for "contractual services" (or an appropriation for "ordinary and contingent expenses" where a contractual services appropriation is not received) as defined in "An Act in Relation to State Finance." This does not preclude the Petty Cash Fund from being reimbursed from a fund(s) other than the one from which the Petty Cash Fund was established. However, when a Petty Cash Fund is dissolved, the monies are to be deposited into the establishing fund.
2. Payments for individual orders for goods or services amounting to \$50.00 or more are not to be made from the petty cash fund. "Stringing" of payments to the same vendor(s) (individually less than \$50.00 but exceeding \$50.00 in an individual order) is not an approved use of the petty cash fund. The use of a petty cash fund should not eliminate or reduce the agency's efforts in obtaining monthly billing agreements with suppliers of small purchases.

Personal checks/employee advances (or any checks) are not to be cashed from the petty cash fund. (This also applies to authorized change funds.) Although postage

due is an allowable payment from the petty cash fund, the purchase of non-perforated state postage stamps is not allowable. Sales and use taxes are not reimbursable. Late charges may not be paid from petty cash. Also, the use of the petty cash fund is generally restricted to awards and grants and conventional operation line item purposes, i.e., contractual, commodities, equipment, telecommunications, etc., and excluding personal services payments subject to Federal and State withholding requirements (C-02 vouchers). However, it may be appropriate to make payments from petty cash for other nominal expenditures when it is the most economical payment method. Any non-valid disbursements will become the personal responsibility of the custodian authorizing the erroneous payment. Any exception to this procedure requires approval by the Comptroller's Office.

Agencies are responsible for complying with Internal Revenue Service requirements for information reporting on Forms 1099 for payments made from petty cash funds. Refer to SAMS Procedure 17.20.50 for information on IRS 1099 Reporting Requirements. Each agency must obtain its own payer's federal identification number for purposes of filing Forms 1099 with the IRS. When agencies apply for their own federal identification number, IRS Form [SS-4](#) should be used.

3. A vendor's invoice or statement should be secured for each expenditure showing date, amount, and description of purchase. Where the vendor does not provide an invoice or statement, an agency produced "petty cash voucher" should be completed citing the above information.
4. If there is a change made in the custodian of a Petty Cash Fund or Change Fund, both the former and successor custodian should complete a single Change of Custodianship form (C-85) showing the exact status of the fund at the date of change in custodians. The original is to be retained by the agency and a copy sent to the Office of the Comptroller, Funds Management Department. Copies should also be sent to each signer. When the custodian changes for funds kept in a checking account a certificate of the account balance should be requested from the bank.
5. If there is a change in the location of a fund, complete a C-85 showing the old and new address and submit to the Comptroller's Office, Funds Management Department.

(NOTE: An example of the C-85 is shown in Exhibit 09.10.40-D and E.)

6. All amounts in any Petty Cash Fund of less than \$1,000 but greater than \$100 must be kept in a checking account in a bank or savings and loan association or trust company which is insured by the United States government or any agency of the United States government. If the fund is maintained in whole or part in a checking account, the bank or savings and loan association or trust company should be notified in writing not to accept checks made payable to the agency. (The above requirement does not apply to the Secretary of State's change funds at the Chicago and Springfield Motor Vehicle/Public Service Facilities.)
7. Reimbursement vouchers for the Petty Cash Fund should be made payable to the custodian, e.g., Employee, John C., Petty Cash Custodian, utilizing the petty cash fund identification number as the Taxpayer Identification Number. Inquiries concerning assigned petty cash fund identification numbers should be directed to the Office of the Comptroller, Funds Management Department.
8. Notation of payment should be made on the face of the internal petty cash vouchers (or attached there-to) or vendor's invoices or statements after payment by the custodian to the individual.
9. The custodian should implement controls to safeguard against possible duplicate reimbursements on the Invoice-voucher (C-13).
10. Someone other than the custodian should examine the petty cash vouchers and approve reimbursement to the Petty Cash Fund.
11. Only those payments that are within the purposes appropriated are to be made from the petty cash fund. Any non-valid disbursements will become the personal responsibility of the custodian authorizing the erroneous payment. Any exception to this procedure requires approval by the Comptroller's Office.
12. Expenditures related to a fiscal year must be reimbursed from that fiscal year's lapsing appropriations. Expenditures not reimbursed from their related fiscal year will have two alternative methods of reimbursement: Payments will be reimbursed through (1) Court of Claims, or (2) a special appropriation from the General Assembly for prior year expenditures.

13. Reimbursement to the Petty Cash Fund should only be made when either 50% of the fund has been exhausted, or a sufficient number of payment entries are available to fill a complete invoice voucher, or a large number of invoice tickets are on hand or immediately prior to dissolving the Petty Cash Fund. These processing guidelines should insure (1) the fund will not be depleted prior to receipt of the reimbursement warrant, (2) multi-page vouchers are not required for reimbursements, and (3) the possibility of losing petty cash invoices is kept to a minimum. The reimbursement voucher should detail the individual transaction in Block 10 (Description Block) of the C-13 State voucher form. A copy of the vendor invoices/statements or petty cash voucher forms are to be attached to the reimbursement voucher (C-13). See Exhibit 09.10.40-A. Detail object 1201 (Petty Cash Fund Reimbursements) should be cited on the reimbursement voucher.

C. Decrease/Dissolution of a Petty Cash Fund

1. Agencies wishing to decrease or dissolve a Petty Cash fund should return the excess amount or the total approved amount to be dissolved to the fund from which the Petty Cash Fund was originally established. (See 25.20.10 for instructions on returning funds to the State Treasury.)
2. After the Receipt Deposit Transmittal form C-64 has been returned from the Comptroller's office submit a copy, with a completed Application to Establish or Dissolve a Fund form C-68 (See 09.20.20 for instructions on completing form C-68), to the Comptroller's Office Funds Management Section.
3. The Office of the Comptroller, Funds Management Department, will review the application and approve or disapprove the decrease or dissolution of the Petty Cash Fund.

D. Stolen and/or Lost Imprest Cash Funds

1. Stolen

An official police report must be made. A copy will be required for reimbursement.

2. Loss by Fire

The fire should be reported to one of the three listed Fire Marshal's offices dependent

upon the locality of the fire. A copy of the Fire Marshal's report or communication from the Fire Marshal should be made and a copy retained by the custodian.

NOTE: A loss due to a windstorm (or other natural disasters) should be reported to either the police or Fire Marshal's Office whichever is appropriate.

Change funds cash overages/shortages should be accounted for in accordance with generally accepted accounting principles. Agencies should have written internal procedures in place to monitor recurring cash shortages, investigate problems and identify steps for disciplinary action when necessary.

3. Voucher Processing Due to Funds Stolen, Lost or Destroyed

- a) An agency "petty cash voucher" shall be initiated and signed by the custodian and agency head verifying that the funds were stolen, lost or destroyed.
- b) The "petty cash voucher" and the official police report and/or Fire Marshal's report shall be submitted with the State invoice voucher via normal reimbursement procedures.
- c) These procedures do not release the custodian from the responsibility of safeguarding imprest funds, but are applicable only when said funds are stolen due to criminal action or lost as a result of fire or any other natural disaster.

E. Protection of the Fund

1. The Petty Cash Fund must be kept intact and not commingled with any other funds, e.g., the agency's daily cash receipts. Note that it is appropriate to commingle Change Funds with daily receipts as long as procedures are in place to reconcile daily receipts and properly record any cash overages/shortages.
2. The Petty Cash Fund is to be maintained on an imprest basis, i.e., cash on hand or in bank plus vendor's invoices/petty cash vouchers plus reimbursement vouchers in transit must equal the amount of the established fund at all times. All cash shortages are the responsibility of the custodian in charge of the fund.
3. As noted in paragraph G, audits are to be conducted periodically of the petty cash funds. In addition, the fund is subject to audit at any time by the Office of the Comptroller.

F. Annual Petty Cash Fund Usage Report (Form C-18)

1. "The Petty Cash Fund Usage Report" (Form C-18) must be completed for those petty cash funds exceeding \$100 and should be filed with the Comptroller's Office no later than January 31 for the preceding calendar year.

A separate C-18 should be prepared for each Petty Cash Fund maintained.

(NOTE: An example of the "Usage Report" is shown in Exhibit 09.10.40-B-C.)

2. A vital part of the "Petty Cash Fund Usage Report" is the "Petty Cash Turnover Rate." This rate is arrived at by taking the annual disbursements and dividing them by the approved level of the fund. On an annual basis the Petty Cash Fund should turn over approximately six times in order to insure the proper dollar level of the fund.

If the "Annual Petty Cash Fund Usage Report" shows that an increase in the fund is needed because of the amount of activity, then the agency may request an increase to an upper limit of \$1,000, subject to approval by the Comptroller.

On the other hand, if the C-18 report shows insufficient activity to support the present dollar level of the fund, then a reduction should be made accordingly. If the turnover

rate is less than six times annually and the custodian wishes to maintain the current fund level, please attach an explanation to the C-18, when filed, stating why the current level of the fund is needed, e.g., high seasonal activity.

The report should be submitted to the following address:

Office of the Comptroller
Funds Management Department
325 West Adams Street
Springfield, Illinois 62704

G. Petty Cash Internal Control Certification (form C-86)

The Petty Cash Internal Control Certification (Form C-86) must be completed, as a minimum, biennially (once every two years) for each petty cash and change fund, which has been established for one year and exceeds \$100.00. Annual submission is required for any petty cash fund that receives reimbursements of more than \$5,000 in a fiscal year.

As soon as possible after the beginning of each fiscal year, the Comptroller's Office will send a list of qualified petty cash and change funds to each agency's fiscal officer or authorized agency representative required to submit the biennial certification

1. Funds with greater than \$5,000 reimbursements in a fiscal year.

It is the responsibility of the Agency's Management to insure an internal audit is performed and a Petty Cash Internal Control Certification (form C-86) is submitted to the Comptroller's Office for those fiscal years in which reimbursements to the fund exceeded \$5,000. Such an audit is required by the State Finance Act (30 ILCS 105/13.3). The Fiscal Control and Internal Auditing Act (30 ILCS 10/2001) provides for the designation of which state agencies shall have a full-time program of internal auditing. This statute also contains a provision that agencies which do not have a full-time internal audit program may have internal audits performed by the Department of Central Management Services.

2. Funds with \$5,000 or less reimbursement in a fiscal year.

A Petty Cash Internal Control Certification (Form C-86) must be submitted to the Comptroller's Office for all Petty Cash funds over \$100.00 on a biennial basis. This certification must be prepared by someone other than the custodian. This independent preparer should review sufficient records to support their attestation for each item listed in the certification. This review will suffice for an audit when the petty cash fund has reimbursements of \$5,000 or less in a fiscal year.

DISSOLUTION OF FUNDS

Dissolution of funds may be initiated by the General Assembly, in the case of funds created by statute, or by administering agencies, in the case of Federal Trust Funds, State Trust Funds, temporary trust funds or locally held bank deposits.

Temporary trust funds and bank deposits are automatically dissolved in accordance with the Illinois Compiled Statutes, 30 ILCS 230/2A.2. Authorization for continuance of the fund must be enacted within 30 days of the sine die adjournment of the General Assembly's next regular session or the fund will be dissolved and the remaining money deposited into the General Revenue Fund. For Federal Trust Funds and State Trust Funds, agencies are urged to initiate dissolution procedures when such a fund is no longer needed. Procedure 09.20.20 describes the steps necessary to initiate the dissolution of a fund by an agency.

FUND TRANSFERS

Transfer of monies from one fund to another may only be made under specific statutory authority. The Governor and the Governor's Office of Management and Budget initiate transfers on a regular basis; agencies initiate transfers according to the provisions of the statute authorizing the transfers. Procedure 09.20.30 should be followed when initiating a fund transfer.

NON-APPROPRIATED SPENDING

The current position the State follows regarding "non-appropriated" spending is that "non-appropriated" spending is permissible if the resources and purpose(s) for which they are to be spent were for (1) purposes and/or resources which were not appropriated by the General Assembly, (2) the spending of the resources does not commit the General Assembly to provide State "matching"

resources, (3) the General Assembly has not specifically denied the purpose, (4) the agency has the statutory authority to carry on the activities of the program and (5) the spending is not required to be appropriated by a specific statute. In addition, "start-up" monies must be provided on an advance basis.

This position was taken by our Office, in lieu of specific guidance from the General Assembly or the Courts to react to State Agencies' need of implementing and operating programs which the General Assembly has not had sufficient time to consider or did not consider in the appropriation process.

Some individuals have expressed a concern regarding "non-appropriated" spending since the Constitution of 1970 states:

"The General Assembly by law shall make appropriations for all expenditures of public funds by the State." (Ill. Constitution, Article VIII, Section 2)

In reviewing the Illinois Compiled Statutes, the only substantive guidance regarding the intent of this Constitutional provision is Section 34 of "An Act in Relation to State Finance," ([30 ILCS 105/34](#)), which appears to authorize the State Treasurer to hold in a special fund and the State Comptroller to maintain accounts for such "public fund" which are not subject to appropriation. It states: "All public funds received or held by any State agency as defined in Section 7 of the 'State Comptroller Act' and not subject to appropriation, except funds held or directly administered by a State agency pursuant to (a) any Act in relation to revenue bonds, (b) any bond indenture or other legally binding bond contract, (c) limitations legally imposed by the source of such funds, or (d) another statute, shall be paid over to the State Treasurer within 10 days of their receipt or within such other applicable period as may be specified in rules or regulations promulgated under subsection (b) of Section 2 of 'An Act in relation to the payment and disposition of moneys received by officers and employees of the State of Illinois by virtue of their office or employment,' approved June 9, 1911, as now or hereafter amended, and shall be held by the State Treasurer in a special fund for such agency. The Comptroller shall set up and maintain accounts for such funds as may be appropriate in conformity with the 'State Comptroller Act' and the rules and regulations adopted under the Act. Payments out of such funds shall be made by the Treasurer only upon warrant drawn and presented by the Comptroller in compliance with the 'State Comptroller Act.'" (Emphasis added)

SUB-SECTION	OVERVIEW	09.10.40 15 of 15
PROCEDURE	STATEMENT OF GENERAL POLICY	EFFECTIVE DATE January 1, 2006 REVISION NUMBER 06-002

Thus, the General Assembly, it appears, has taken the position that some "public funds" are "not subject to appropriation" and where "not subject to appropriation" a special fund may be established for the receipt of such funds, appropriate accounts set up and maintained whose uses are to be in conformity with the State Comptroller Act (and adopted rules and regulations), and, for which payments are to be made by the Treasurer upon warrants drawn and presented by the Comptroller.

Until further substantive guidance from the General Assembly or the Courts is received, the position this Office has implemented appears to be a method whereby the State can implement Programs, which do not commit the State to provide its general resources when spending the Program funds. In order to determine that an agency's request to establish a new fund or expenditure authority account meets the criteria specified in the first paragraph, the agency must submit along with the C-68 form or C-45 form (1) the executed copy of the grant program (or other appropriate document) which identifies the financial arrangements agreed to by the State agency and the grantor, (2) a copy of the State statute which allows the agency to conduct the activities of the program, (3) reference the State agency identifier (SAI #) number assigned by the Governor's Office of Management and Budget, clearing house section, if applicable, (4) identify which appropriated line(s) provided by General Assembly if state matching required, and (5) grant agreement must provide for advance funding for the non-appropriated portion of the program.

The Comptroller will hold an incomplete request for funds, non-appropriated account or revenue budget account establishment for two weeks. If the requesting agency is unable to provide necessary supporting documentation, such as signed grant awards, court orders, statutory citations, etc., within the two week period, the request will be returned "not approved". Requests for account establishment may be resubmitted for review once a documentation package has been completed.

Where a fund is established pursuant to an appropriation bill (or in substantive law), the above documents need not be filed.

1. An Application to Establish or Dissolve a Fund (Form C-68) and the Survey of Need for a Petty Cash Fund has been completed and filed with the State Comptroller's Office.
2. The custodian presently in-charge of the fund is the same as the individual listed above. Also, the amount of the fund agrees with the amount authorized by the State Comptroller's Office and indicated above. (See Item 17).
- 3.* A Petty Cash Usage Report (Form C-18) has been timely filed with the State Comptroller's Office for a fund exceeding \$100.
- 4.* A fund which exceeds \$100 is turning over approximately six times during the calendar year.
- 5.* The petty cash fund, if maintained in a bank or savings and loan association or trust company is maintained in a federally insured organization.
- 6.* The cash-on-hand or in the bank plus the vendor's invoices/petty cash vouchers plus reimbursement vouchers in transit equals the authorized amount of the petty cash fund.
- 7.* The fund is kept separate and apart from daily receipts and other authorized petty cash funds.
- 8.* Someone other than the custodian approves reimbursements to the fund.
- 9.* The bank has been notified, in writing, not to accept checks payable to your Agency.
- 10.* Cash advances were not made from the fund. Also, no personal checks were cashed by the fund.
- 11.* Payments for \$50 or more are not being made from the fund, and there is not stringing of payments to avoid normal voucher processing.
- 12.* Payments from the fund are restricted to award and grant and conventional operational line items purposes.
- 13.* All expenditures from the petty cash fund paid during the current fiscal year are reimbursed before the end of lapse period.
- 14.* Vendor invoices or statements are secured for each expenditure showing date, amount, description of the purchase (or a petty cash voucher with same information) and retained in a petty cash file.
- 15.* A petty cash fund which is maintained in whole or in part in a checking account is reconciled monthly with the bank statement.
16. Someone other than the custodian maintaining the fund reconciles the fund monthly.
17. All changes made to the custodianship and location of the petty cash fund are reported to the State Comptroller's Office using the Change of Custodianship form (C-85).
- 18.* The cash on hand never exceeded \$100 at anytime.
- 19.* The reimbursement checks for the fund are made payable to the custodian.
- 20.* There is a notation of payment made on the face of the vendor invoices to prevent reuse of the invoices.
- 21.* All expenditures from the petty cash fund can be traced to either an employee who approved payment or to the recently purchased asset for verification as to the validity of the transaction.
22. The petty cash fund checkbook and/or cash is properly safeguarded during and after working hours.
23. Audits of the cash fund are done by someone independent of the fund and are on file in the administering agency.
- 24.* If 1099 reportable payments are made from the fund, 1099 forms are issued.
- 25.* If 1099 information returns are issued, they are issued using the agency's own payer's federal identification number.

I certify that the above petty cash internal controls are in effect or remedies have been made to correct deficiencies noted.

PROCEDURE	INSTRUCTIONS FOR ESTABLISHING A FUND	EFFECTIVE DATE January 1, 2005 REVISION NUMBER 05-002

PURPOSE

The purpose of this procedure is to provide instructions to request the establishment of a new fund in the statewide accounting system. Prior to preparing this form to request the establishment of a fund, the policy statements (Procedure 09.10.40) should be reviewed to determine the Comptroller's general policies governing the establishment of new funds.

PREPARATION OF FORM

The Comptroller's Office, through an ongoing review of statutes affecting State Finance, may establish legislatively created funds. However, it remains the primary responsibility of each State agency to monitor and notify the Comptroller of new funds that have been established in the legislative process.

Two copies of the "Application to Establish or Dissolve a Fund" form C-68 (Exhibit 09.20.10-A) should be prepared to request the establishment of State and Federal trust funds. The original copy of the form should be sent directly to the Comptroller's Office along with a copy of the grant program (or other appropriate document) and the duplicate retained by the agency for control purposes.

Three copies of the form should be prepared to request the establishment of a temporary bank account. Two copies should be forwarded to the Governor's Office for approval. The forms will then be forwarded to the Comptroller's Office. One copy should be retained by the agency for control purposes.

Exhibit 09.20.10-B illustrates a form with the instruction reference numbers on it. Exhibit 09.20.10-C illustrates a completed form. The instructions for completing this form are as follows:

General Information

- (1) Enter agency name and address.
- (2) Enter application date.
- (3) Enter the official name of the fund being established.
- (4) Check fund creation box.

Type of Fund Requested

- (5) Check box if fund has been created by General Assembly and cite creating statute.
- (6) Check box if fund to be created is a State Trust Fund.

"SURVEY OF NEED FOR A PETTY CASH FUND"

PURPOSE

The purpose of this procedure is to provide instructions to determine the proper dollar level of a petty cash fund and an internal control questionnaire to complete for petty cash and change funds.

TIMING REQUIREMENTS

The "Survey of Need for a Petty Cash Fund" (Exhibit 09.20.15-A) should be prepared in addition to the "Application to Establish or Dissolve a Fund" (Form C-68) for all petty cash and change funds. The "Dollar Level Determination of Fund" (Part B) needs to be completed only for petty cash funds greater than \$100.

Exhibit 09.20.15-A illustrates a blank form with the instruction reference numbers on it. Exhibit 09.20.15-B illustrates a completed form. The instructions for completing this form are as follows:

PROCEDURE	INSTRUCTIONS FOR DISSOLVING A FUND	REVISION NUMBER

DISSOLUTION OF FUNDS

As set forth in the Statement of General Policy, dissolution of a fund may be initiated by the Comptroller, General Assembly or by the administering agencies.

Special funds, i.e., those funds created under Section 5 of the State Finance Act, ([30 ILCS 105/5 et seq](#)), may be dissolved by a separate Act of the General Assembly specifically stating the dissolution. Such Act may provide for the balance, if any, to be transferred to the General Revenue Fund of any other successor fund(s).

If a “special fund” remains inactive on the Comptrollers records for a period exceeding 18 months, the statutes ([30 ILCS 105/5](#)) provide for the fund to be “automatically terminated by operation of law” and the balance remaining be transferred to the General Revenue Fund. For purposes of the statute, “inactive” may be defined as a fund without receipt, transfer or appropriation (expenditure) activating during the preceding 18 month period.

While the Statutes appear to be silent to the dissolution of State Trust funds, it has been the position of the Comptroller such funds should be reviewed for continuance or dissolution when the fund has been inactive for a period of 18 months or longer.

In regard to State and Federal trust funds, the Comptroller will notify the agency at such times the trust fund may become subject to dissolution. If the Comptroller deems the fund should be dissolved, the agency will be so notified.

It should be noted, it remains the primary responsibility of the administering agency of the trust fund to monitor, review and notify the Comptroller at the time the trust fund may be dissolved.

For Locally Held Bank Deposits established in accordance with [30 ILCS 230/2A.2](#), the administering agency must receive the permission of the General Assembly to continue the existence of the Locally Held Bank Deposit. If such permission is not granted by the General Assembly, the administering agency should complete the "Application to Establish or Dissolve a Fund," Exhibit 09.20.20-A. As noted in [30 ILCS 230/2A.2](#), upon the dissolution of a Locally Held Bank Deposit, the balance of the fund or bank deposit shall be transferred to the General Revenue Fund.

PROCEDURE	INSTRUCTIONS FOR DISSOLVING A FUND	EFFECTIVE DATE July 1, 2004
		REVISION NUMBER 05-001

Temporary bank accounts established under [30 ILCS 230/2A.2](#) are subject to dissolution if not authorized for continuance by the General Assembly within 30 days of the sine die adjournment of the next regular session after the fund was established. In order to comply with this statute, the Office of the Comptroller makes a periodic review of temporary funds to determine whether they may legally remain in existence.

If it is found that a bank account has not been authorized for continuance within the allowed time period and that the administering agency has not initiated dissolution of the fund, then the Comptroller and State Treasurer will work with the administering agency to see that the fund is dissolved and the remaining balance deposited into the General Revenue Fund or other fund as required by statute or other authority.

PURPOSE

The purpose of this procedure is to provide instructions to request the dissolution of a fund in the statewide accounting system. Prior to preparing this form to request the dissolution of a fund, the policy statements (Procedure 09.10.40) should be referenced to determine the Comptroller's general policies governing the dissolution of a fund.

PREPARATION OF FORM

Two copies of the "Application to Establish or Dissolve a Fund" form C-68 should be prepared to request the dissolution of a fund. The original copy of the form should be sent directly to the Comptroller's Office and the duplicate retained by the agency for control purposes.

Exhibit 09.20.20-A illustrates a blank form with the instruction reference numbers on it. Exhibit 09.20.20-B illustrates a completed form. The instructions for completing the form are as follows:

TRANSFER OF FUNDS

Fund transfers may be initiated by action of the General Assembly, by request of an agency, or by request of the Governor or Governor's Office of Management and Budget. In all cases, statutory authority for the transfer must exist before the Comptroller can process the transfer. To request a transfer be made, a "Fund Transfer Notification" (Exhibit 09.20.30-C) must be completed.

**INSTRUCTIONS FOR COMPLETING THE
"FUND TRANSFER NOTIFICATION"**

PURPOSE

The purpose of this procedure is to provide instructions to request the transfer of monies from one fund to another in the Statewide Accounting Management System or to suspend the transfer of monies from one fund to another.

PREPARATION OF FORM

Two copies of the "Fund Transfer Notification" form (C-55) should be prepared. The original copy of the form should be sent directly to the Comptroller's Office, and the duplicate retained by the agency.

Exhibit 09.20.30-A illustrates a blank form with the instruction reference numbers on it. Exhibit 09.20.30-B illustrates a completed form. The instructions for completing this form are:

General Information

- (1) Enter agency name.
- (2) Enter date.
- (3) Enter agency address.
- (4) Enter the name and phone number of the individual to receive correspondence and to contact for questions.

TRUST FUNDS

As explained in the Statement of General Policy, the Comptroller will advise agencies receiving money earmarked for a Federal or State Trust Fund, to either establish a new trust fund or establish a separate revenue and expenditure account(s) within the existing Federal or State Trust Fund.

Receipt accounts (revenue source codes) for new projects or purposes need only be established when an existing receipt account (revenue source) is not applicable. That is, a separate receipt account is to be established for each specific revenue source, such as the federal Department of Agriculture, Ford Foundation or the Joe Scomoli Trust. The Comptroller will assist the agencies in determining revenue accounts that may be needed for the reporting of specific programs or grants.

INSTRUCTIONS FOR COMPLETING THE
"CHART OF ACCOUNTS MAINTENANCE AND INQUIRY" FORM

PURPOSE

The purpose of this procedure is to provide instructions to request the establishment or deletion of a receipt (revenue source) or expenditure account (budget line) in the state-wide accounting system. Prior to preparing this form, the policy statements (Procedure 09.10.40) should be referenced to determine the Comptroller's general policies with regard to Trust Fund sub-accounts.

PREPARATION OF FORM

Two copies of the "Chart of Accounts Maintenance and Inquiry" form should be prepared to request the establishment or deletion of a receipt (revenue source) or an expenditure account (budget line). The original copy of the form should be sent directly to the Comptroller's Office, Funds Establishment Unit and the duplicate retained by the agency.

If an agency is requesting the addition or deletion of two or more receipt accounts (revenue sources) or expenditure accounts (budget lines), a separate request form should be submitted for each account addition or deletion requested. However, one request applicable to receipts and one request applicable to expenditures may be on the same form. The "Chart of Accounts Maintenance and Inquiry" form is limited to one request per form for similar items (receipts or expenditures).

RECONCILIATION OF MONTHLY CASH REPORT-
ENDING BALANCE OF AVAILABLE CASH

PURPOSE

The purpose of this procedure is to describe one method which can be used to reconcile the ending balance of available cash per the agency's records with the ending balance of available cash per the Statewide Accounting Management System (SAMS) maintained by the Comptroller's Office. Agencies with access to SAMS automated records may perform alternate reconciliation methods. This reconciliation should be performed monthly and the Comptroller's Office notified of any unreconcilable differences so that the necessary corrective action can be taken to locate the differences and correct the accounting records.

A reconciliation to the SAMS system is not applicable for agencies that use SAMS as their system of record. However, agencies shall ensure that their source documents have been properly recorded in SAMS and in the corresponding reports.

GENERAL

This procedure should be read in conjunction with SAMS Procedure 09.40.10 which defines each field in the monthly Cash Report and the abbreviations used in the report

The reconciliation of the ending balance of available cash shown in the monthly Cash Report should be prepared subsequent to the reconciliation of the unexpended appropriation balances shown in the Monthly Appropriation Status Report (SAMS Procedure 11.40.10) and the fiscal year-to-date revenue source accounts per the Monthly Revenue Status Report (SAMS Procedure 25.40.10). The total of the reconciling items for the ending available cash of a fund should be equal to the total of the cash reconciling items for the revenue source accounts and appropriation accounts associated with a fund.

The appropriation and revenue source account reconciliations along with the monthly Cash Report (SAMS Procedure Exhibit 09.40.10-A) should enable an agency to reconcile the ending balance of available cash.

In addition to other information, the monthly Cash Report presents Commercial payments by the "payment voucher range". A voucher range coincides with the day the voucher was processed.

Most differences between agency records and the Statewide Accounting Management System (SAMS) will be due to timing differences or uncleared cash items. Timing differences occur when the agency records a transaction before that transaction was recorded by SAMS. Uncleared cash items occur when SAMS records a revenue or an expenditure even though cash has not physically moved into or out of a fund.

PROCEDURE	RECONCILIATION OF MONTHLY CASH REPORT - ENDING BALANCE OF AVAILABLE CASH	REVISION NUMBER 03-003

The ending balance of available cash (14) (refer to SAMS Procedure Exhibit 09.40.10-A) in SAMS is affected only by cash transactions. It is important to remember that SAMS will recognize a revenue or an expenditure even though cash has not physically moved into or out of a fund. Agencies, on the other hand, will decrease their cash balance for payment vouchers submitted and increase it for receipts transmitted. This timing will have implications for the reconciliation process. Revenue and expenditure transactions may no longer be reconciling items for the appropriation status report and revenue status report but, the cash affect of the transactions may not have occurred. Where the cash affect of a particular transaction has not occurred, the item will still be a reconciling item for the cash report.

The most frequent example of this will be payment vouchers that charge a "cash managed" fund. When SAMS processes a payment voucher, it recognizes an expenditure, decreases the appropriation and, establishes a vouchers payable. At the time the related warrant is written, vouchers payable is relieved and cash is decreased. For "cash managed" funds, there could be a lag between expenditure recognition and warrant writing. The expenditure will not be marked with a "D" on the Appropriation Status Report. When the cash for those transactions is cleared, the "PV" will appear on the cash report. In the case of an Intergovernmental Payment voucher (IGPV), the PV will be displayed on the Cash Report along with the Journal Voucher (JV) that moved the cash. IGPV's are generally used to make warrantless payments to revolving funds.

The reconciliation process must recognize and accommodate these differences. A listing of items that have not cleared cash can be developed in conjunction with the open item files discussed for the appropriation status and revenue status reports.

The ending balance of available cash (14) (refer to SAMS Procedure Exhibit 09.40.10-A) in the Comptroller's statewide accounting system is affected by cash transactions. For example, the issuance of warrants will decrease the cash balance - not the recognition of an expenditure. The unexpended appropriation balance maintained by the agencies is affected by expenditure recognition (the vouchering process). The reconciliation process suggested recognizes and accommodates this difference, when used in conjunction with the open item files discussed in relation to the Monthly Appropriation Status Report (SAMS Procedure 11.40.20) and the Monthly Revenue Status Report (SAMS Procedure 25.40.20).

UNEXPENDED FUND BALANCE PER THE MONTHLY FUND LEDGER

For each fund maintained in the statewide accounting system, the following key data elements are maintained.

1. Ending Balance . Cash . Available = Beginning Balance . Cash . Available +/- Current Period Activity

RECONCILING THE REPORT

When preparing the reconciliation, the ending balance of available cash and transaction data should be as of the date of the monthly Cash Report. The suggested method for reconciling the ending balance of available cash (14) on the monthly Cash Report is as follows:

- Step 1. For each fund, compare the ending balance of available cash per the agency's records as of the date of this report to the ending balance of available cash (14) per the monthly "Cash Report". If there is a difference, the difference should be equal to the sum of the in-transit transactions and uncleared cash items.
- Step 2. Accumulate, by type of transaction, the in-transit items and uncleared cash items per the revenue source account reconciliation and the appropriation account reconciliations.
- a. The agency ending balance of available cash +/- intransit items +/- uncleared cash items = the ending balance of available cash per the monthly Cash Report.
 - b. Ending balance of available cash per the agency, as of the report date
Less: in-transit receipts, refunds, transfers-in and warrants voided
Add: in-transit transfers-out
Add: payment vouchers recorded by the agency that have not been processed
Add: payment vouchers that have been processed but, the warrant has not been issued
Add: intergovernmental payment vouchers that have been processed but, a journal voucher has not yet moved the cash
Add/subtract: Other
Equals: Ending balance of available cash per the monthly Cash Report.
- Step 3. If the sum of the in-transit and uncleared cash items does not account for the total difference between the ending balance of available cash per the agency and per the monthly Cash Report, review the receipt account and appropriation account reconciliations. Perform the following steps in relation to these reconciliations.

RECONCILIATION EXCEPTION NOTIFICATION

The monthly Cash Report must be reconciled on a timely basis to ensure the early detection and correction of errors. To facilitate this reconciliation a Reconciliation Exception Notification (SAMS Procedure Exhibit 09.40.30-A) is provided to the agency. The form is intended to assist the agency in reporting discrepancies found through their reconciliation process.

THE EXPENDITURE AUTHORITY ACCOUNTING SYSTEM

Authority for expenditures of the State of Illinois by all State agencies is established by different methods depending on the source of the funds to be expended by the agency. Presently, the two basic types of expenditure authorities used are appropriated and non-appropriated accounts.

Appropriation accounts (budget lines) are created for the amount appropriated by the General Assembly and approved by the Governor. Non-appropriated accounts (budget lines) are created at the request of a State agency. This is explained in Procedure 11.10.30.

The Statewide Accounting Management System will contain records for each of the different expenditure authorities whether appropriated or non-appropriated. These records will be used:

- . as a control to ensure appropriations (budget lines) are not overexpended, and
- . to produce meaningful statewide accounting records and information.

The expenditure authority accounting system provides for maintenance of the uncommitted and unexpended balance for each expenditure authority account. Balances, maintained for non-appropriated expenditure authority accounts, are subject to the same expenditure rules as appropriated budget lines. In addition, there must be adequate revenues (dedicated receipts) to support the non budgeted account.

Prior to processing an expenditure, the appropriation (budget line) balance is checked to ensure that a sufficient balance exists for the expenditure. If a sufficient balance exists, the unexpended/uncommitted balance of this account is reduced by the amount of the expenditure. If an insufficient appropriation (budget line) balance exists, then the voucher is returned to the originating agency to take the necessary corrective action.

The following transactions are used to maintain the expenditure authority (budget line) records:

- . Addition of a new expenditure authority account (budget line)
- . Deletion of an expenditure authority account (budget line)
- . Amendment of an appropriation account (budget line)

Expenditure authority reports are provided to State agencies for use in reconciling the balances maintained in the Statewide Accounting Management System with the balances maintained by State agencies. These reports list account (budget line) balances and also the detail and summarized transactions processed during each processing period.

The remainder of this section of the SAMS Manual explains the different expenditure authorities which must exist before an agency may incur expenditures. It also discusses the conversion of the CUSAS 16-digit "expenditure authority account code" to the 17-digit SAMS budget line.

APPROPRIATIONS

STATUTE STATEMENT

The 1970 Constitution of Illinois, in Article VIII, Section 2(b), gives the General Assembly the power to make appropriations.

"The General Assembly by law shall make appropriations for all expenditures of public funds by the State. Appropriations for a fiscal year shall not exceed funds estimated by the General Assembly to be available during that year."

This power of the General Assembly to make appropriations for all expenditures of public funds is clarified by acts of the General Assembly primarily in "An Act in Relation to State Finance" (Approved June 10, 1919, as amended).

TYPES OF APPROPRIATIONS

The appropriations made by the General Assembly specify the purposes for which the public funds of the State may be expended and are generally made to organizational units, such as agencies or divisions within agencies. These appropriations may be of six basic types:

Regular appropriations which are made at the beginning of the fiscal year for the current fiscal year;

Deficiency appropriations which are made when the purpose of the regular appropriation has not been completed but the regular appropriation monies have been exhausted;

Supplemental appropriations which are made when the purpose of the regular appropriation has been expanded or a new purpose is to be funded;

Continuing appropriations which are made effective immediately and available for expenditure in the succeeding fiscal year(s); or

Casual deficit appropriations which are made pursuant to the Casual Deficits in State Revenues Act.

Reappropriations which are made at the beginning of a fiscal year to carry forward the unexpended portion of an appropriation for the prior fiscal year.

Section 25 appropriations pursuant to 30 ILCS 105/25.

Prior Year appropriations which provide for prior year spending from a current appropriation.

APPROPRIATION PROCESS

When an appropriation bill is introduced into the General Assembly, the Comptroller assigns preliminary expenditure authority account code numbers (budget lines) to each appropriation in the bill. After the assignment of the preliminary account code numbers (budget lines), the Comptroller forwards to each agency a report (Exhibit 11.10.20-A) listing the description, amount and the account code (budget line) of each appropriated "line item."

After an appropriation bill completes the legislative process and becomes law, the bill is filed with the Secretary of State who assigns a public act number. The Secretary of State then furnishes the Comptroller a copy of each Public Act. The Comptroller verifies and updates the preliminary expenditure authority account codes (budget lines) and then forwards to each agency a final report listing the description, amount and the account code (budget line) of each appropriated "line item." Thereafter, the Comptroller publishes a handbook, APPROPRIATIONS, which presents a condensed copy of all the coded appropriations along with selected summaries and related information.

APPROPRIATION PURPOSE

The purpose of an appropriation (budget line) is generally specified in terms of "Common Objects." Appropriations (budget lines) may also be enacted functionally or programmatically. Common objects of appropriations are:

Personal Services
Retirement
Social Security
Group Insurance
Contractual Services
Travel
Commodities

Printing
Equipment
Electronic Data
Processing
Telecommunications
Operation of Auto-
motive Equipment

Awards and Grants
Permanent Improve-

Some other appropriations (budget lines) are not described in terms of the standard common object. These are:

Lump Sum Appropriations (Budget Lines), which cover expenditures for two or more of the standard common objects. Such appropriations (budget lines) are used for projects or activities where a breakdown into standard common objects would be impractical or undesirable, either because of the nature of the project or activity, or because of the lack of historical data in the area. One of the most common, lump sum appropriations (budget lines) for repairs and maintenance, is ordinarily charged with expenditures for contractual services and commodities. Another type, often used to cover the costs of administering a new law, may be charged with anything from personal services to equipment. As expenditures are made against a lump sum appropriation (budget line), they must be classified by detail expenditure account codes.

Lump Sum appropriations (budget lines) are further defined, where possible, to the “category” in which the most significant usage is anticipated. The additional lump sum purposes are as follows:

- Operations, Lump Sum & Other Purposes
- Awards and Grants, Lump Sum and Other Purposes
- Permanent Improvements, Lump Sum and Other Purposes
- Transportation and Related Construction, Lump Sum and Other Purposes

Detail Expenditure Appropriations (Budget Lines), which cover a narrow range of expenditures. These budget lines are literally only those which can be classified to a single line (or account) in the chart of detail expenditure accounts. This type of appropriation (budget line) is often encountered in appropriations (budget lines) for awards and grants, where the object of the expenditure is precisely defined, as “Tort Claims” or “Travel and Allowances for Committed, Paroled and Discharged Prisoners.”

Besides being a common object, lump sum or detail expenditure account appropriation (budget line), certain appropriations (budget lines) have specific stipulations attached to them which must be complied with before expenditure authority is granted, such as:

- availability of cash from a specific revenue source
- availability of specific federal funds

NOTE: For a listing of common object codes and detail expenditure account codes, see Procedure 11.50.20 - Listing of Detail Expenditure Accounts within Common Object.

LAPSE APPROPRIATION (Budget Line)

Section 25 of “An Act in Relation to State Finance” states:

“Outstanding liabilities as of June 30, payable from appropriations which have otherwise expired, may be paid out of the expiring appropriations during the two-month period ending at the close of business on August 31. Any service involving professional or artistic skills or any personal services by an employee whose compensation is subject to income tax withholding must be performed as of June 30 of the fiscal year in order to be considered an “outstanding liability as of June 30” that is thereby eligible for payment out of the expiring appropriation.”

This two-month period described above is called the lapse period. Expenditures during the lapse period against prior year appropriations (budget lines) may only be made where there exists an outstanding liability incurred by the agency prior to the end of the fiscal year. No expenditures against a prior year appropriation (budget line) may be made after August 31 of the following fiscal year.

EXPENDITURE RESTRICTION

The State of Illinois uses the allotment capability (reversions in SAMS) to restrict spending which requires authorization by another party or parties before payment. For example, “Governor’s Releases” require the Governor’s approval before payments can be processed. In other instances, releases are used when, by statute, appropriation or language, one agency must approve the expenditures or obligations incurred by another agency. As appropriations (budget lines) requiring Governor’s Releases are set up, the unreleased balance will be shown as reverted. Later as the amounts are released, the reverted balance will be decreased until all the funds are released.

OTHER EXPENDITURE AUTHORITY

NON-APPROPRIATED EXPENDITURE AUTHORITY

As explained in Procedures 09.10.40 and 09.20.10, agencies receiving federal or state monies which are not appropriated must request the establishment of a new federal or state trust fund to receive the deposits of the money or they may establish sub-accounts within an existing federal or state trust fund. (See Section 09 - Funds for procedures to follow in establishing a fund account and Section 25 - Receipts and Cash Refunds for procedures to follow in establishing a receipt account (revenue source).)

Under the first approach, a new fund with a unique fund number will be established for each new federal or State non-appropriated project begun by an agency. Under the second approach, a new fund would not be established but rather the monies would be deposited into an existing federal or state trust fund. Expenditures incurred by the project could be controlled by using the allotment (reversion) field to set up sub-accounts within the existing federal or state fund. All receipts for the project would be credited to the sub-account decreasing the allotment (reversion) by the amount of the receipt.

The Office of the Comptroller prefers the use of the sub-account method rather than the new fund approach in order to limit the number of new funds which must be created in the State Treasury.

The procedures to establish new expenditure authority sub-accounts are set forth below.

SUB-ACCOUNT CREATION PROCEDURES

The following information describes the procedures necessary to complete the "CHART OF ACCOUNTS MAINTENANCE AND INQUIRY" form in order to set up sub-accounts within an existing fund. All references refer to Exhibit 11.10.30-A. For a completed form, see Exhibit 11.10.30-B.

General Information (continued)

- (3) Enter the agency address
- (4) Enter the name to whose attention approved C-45 should be returned.

Establishment Information

To establish sub-accounts within an existing fund, agencies can disregard Sections I and III of the form. An agency can establish a sub-account in any one of three ways or a combination of the three.

One way is to request establishment of a new expenditure authority account (budget line) within the present expenditure authority account (budget line). This is done by checking the box "add expenditure authority account (budget line)" (5),

A second way is to request establishment of a new organizational unit within the agency for expenditure authority purposes. This is done by checking the box "add organizational unit" (6) , or

A third way is to request a new sequence code. This can be done by explaining the new code (budget line) in space 12

After a decision is made by the agency as to how the sub-account should be established, the following steps should be followed.

- (7) Indicate whether expenditures are subject to control based on receipts. If "yes" and the receipt account (revenue source) is known, enter the receipt account (revenue source) number.
- (8) Indicate whether expenditures are subject to control based on allotments.
- (9) Specify and explain if expenditures are subject to control based on some other indicator.
- (10) Enter number and name of fund from which expenditures will be made.

DESCRIPTION OF THE EXPENDITURE AUTHORITY ACCOUNT CODE STRUCTURE

Expenditure authority accounts (budget lines) for funds held by the State Treasurer are established either by a legislative appropriation, by creation of a non-appropriated fund, or by creation of a sub-account within an existing fund (see Procedure 11.10.30). In all cases, the Office of the Comptroller establishes an expenditure authority account (budget line) for each expenditure authority. Agencies use the expenditure authority account (budget line) when requesting the Comptroller to approve vouchers against the authority.

EXPENDITURE AUTHORITY ACCOUNT CODE (BUDGET LINE)

Agencies will submit documents using the CUSAS 16-digit account code. These codes will be converted, by the Comptroller's Office, to the SAMS 17-digit budget line which will appear on all inquiries and output reports. The table shown below provides a crosswalk from CUSAS codes to SAMS codes.

AAA-BCCDD-EFFF-GG-HH-YY (CUSAS code used for input)	YY AAAA BCC DD EFFF GG HH_ (SAMS code used for inquiries and outputs)
	YY - Fiscal Year
AAA - Fund	AAAA - Fund
BCC - Agency (First digit indicates agency group)	BCC - Agency (First digit indicates agency group)
DD - Division/Program	DD - Organization (Last 2 digits reserved for future use.)
EFFF - Object of Expenditure (First digit indicates category)	EFFF - Object of Expenditure (First digit indicates category)
GG - Sequence	GG - Sequence
HH - Type of Account	HH - Type of Account
	_ - Last digit reserved for future use.
YY - Fiscal Year	

The following example illustrates the crosswalk between CUSAS and SAMS expenditure account codes:

Each appropriated or non-appropriated account (budget line) is coded with the CUSAS sixteen (16) numeric characters for input documents and the SAMS seventeen (17) numeric characters for inquiries and output documents. The actual assignment of the codes is accomplished by the Comptroller after reviewing the appropriation bills in consultation with State agencies and/or by an agency requesting a new fund or sub-account. The components of this coding structure are discussed in the following paragraphs:

Fund

AAA (AAAA) - The three (four in SAMS with the first character zero filled) character fund field indicates the fund whose resources have been authorized for expenditure. (For a listing of funds, see Procedure 09.50.10).

Organization Unit (Agency/Organization)

BCCDD - The five character organizational unit field indicates the State agency and division/program authorized to incur expenditures as follows (in SAMS, the agency is a three character field and the organization is a four character field, with the last two characters showing as blank initially):

Agency Group (B)

This one character classification code provides for classification of agency groups such as legislative agencies, judicial agencies, elected officers, departments, other agencies, and higher education.

Agency (CC)

The two character classification code provides for a unique code assigned to each State agency. Agencies include organizational units at the level of a code department, an elected official's office, or a specific university.

Division/Program (DD)

This two character classification code provides for a unique code assigned to each division or program within an agency. The term "division" is used generically to mean a second echelon organizational unit within an agency. This field can also be used as a program code or as a primary sequence code. In the former case, program appropriations could be encoded. The latter use as a primary sequence code could be applicable in the case of the Capital Development Board appropriations to aid State agencies in the planning and construction of their capital projects. The user agencies 2nd and 3rd digit in the

organizational unit code will be indicated in the division field of the Capital Development Board's code. See Procedure 11.50.41 for a list of CDB user agency codes.

NOTE: For a listing of organizational units, see Procedure 11.50.40.

Appropriation Account

The object of expenditure, sequence and type of account are included in the Appropriation Account under SAMS.

Object of the Expenditure

EEEE - The four character object of expenditure field indicates the purpose, or object, for which the organizational unit has been authorized to expend the resources of the indicated fund. Four digits are used to indicate the object of an account, whether appropriated or non-appropriated. Each object of expenditure specified by [Section 13 of the Finance Act](#) is described by the four-digit code, as are other commonly used objects of expenditure not listed in the Finance Act.

The first of the four digits in the object field indicates the authorized category of expenditure. The categories of expenditure are:

<u>CODE</u>	<u>CATEGORY</u>	<u>DEFINITION</u>
1	Operations	Expenses required for normal agency activities. Includes expenditures for personal services, fringe benefits, contractual services, commodities, equipment, electronic data processing, telecommunication, operation of automotive equipment.
4	Awards and Grants	Expenses associated with special purpose expenditures. Includes awards and indemnities, pensions and annuities, shared revenue payments or grants to local governments or to quasi-public agencies. Also includes gratuitous payments to persons who are not wards of the State.

<u>CODE</u>	<u>CATEGORY</u>	<u>DEFINITION</u>
6	Permanent Improvements	Capital expenditures for the acquisition of land, construction of structures, improvements of buildings, site improvements, and certain capital equipment.
7	Transportation and Related Construction	Capital expenditures for the acquisition of land, construction and improvements of highways and waterways, repair and maintenance of highways, and the improvement of waterway sites.
8	Debt Service	Expenditures for the retirement of State debt and the payment of interest on such debt.
9	Refunds	Repayment of taxes, fees, deposits and grants paid in excess or in error to the State.

The remaining three digits in the object field indicate the object of expenditure within a category. For a listing of the detail expenditure accounts (objects) within common object (object of expenditure), see Procedure 11.50.20. An example of the object of expenditure is:

```

1      200

Sequence

GG - The two character sequence code permits unique identification of expenditure accounts which may have all other characteristics in common with other account(s). This would be true when two or more accounts represented the same specific type of expenditure authority from the same fund, to the same organization unit, and for the same object. Such accounts are distinguished by using the sequence field--e.g., one of the accounts with identical characteristics will be sequence 01, another sequence 02, and so forth. Another common use of this field is the indication of project numbers for permanent improvement appropriations (budget lines).

Type of Account

HH - The two character type of account code is used to indicate the type of expenditure authority represented by the account such as non-appropriated, new appropriation, deficiency appropriation, supplemental appropriation, or reappropriation. In the case of reappropriations, the fiscal year of the original appropriation will be indicated by the code.

<u>Code</u>	<u>Account Type</u>
00	New appropriation
01	1st deficiency
02	2nd deficiency
03	3rd deficiency
04	4th deficiency
05	Supplemental appropriation
07	Casual deficit appropriation
08	Continuing appropriation
XX	Reappropriation for FY XX
25	Section 25
55	No appropriation
PY	Prior Year

SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 2003
PROCEDURE	DETAIL EXPENDITURE ACCOUNT (OBJECT) CODE	REVISION NUMBER 04-001

DETAIL EXPENDITURE ACCOUNT (OBJECT) CODE

The detail expenditure account (object) code is a separate four-digit code and should not be confused with the four-digit "object of expenditure."

ABBB

. .
. .
. detail expenditure
. category

The first digit of the expenditure account (object) code A indicates the authorized category of expenditures. There are six categories of expenditures:

- Operations
- Awards and Grants
- Permanent Improvements
- Transportation and Related Construction
- Debt Service
- Refunds

For an explanation of the categories, see Procedure 11.10.40. The remaining three digits BBB describe the detail expenditure account (object).

The purpose of the detail expenditure account (object) is not for control but to report expenditure information at a more refined level within a common object (object of expenditure). Specific groups of detail expenditure accounts (objects) underlie and refine each common object (object of expenditure). An example is:

Common Object: (Object of Expenditure)	1800	<u>OPERATION OF AUTOMOTIVE EQUIPMENT</u>
	1893	Repair and Maintenance, Automotive Equipment
	1894	Parts and Fittings, Automotive Equipment
DETAIL EXPENDITURE ACCOUNT (OBJECT) CODE	1896	Gasoline, Oil and Antifreeze
	1897	University Central Transportation Services
	1899	Automotive Expense, Not Elsewhere Classified

PROCEDURE	DETAIL EXPENDITURE ACCOUNT (OBJECT) CODE	REVISION NUMBER 98-001

The "EDP" and "lump sum" object of appropriation are functional expenditure authorities. They require the use of all the detail expenditure accounts (objects) for accurate classification of expenditures in connection with them. For example, the object of appropriation for EDP (1600) would cite the detail expenditure account (object) 1120 when processing a payroll voucher for personal services regular positions. A detail expenditure account (object) must be associated with each expenditure transaction and must be valid with the object of appropriation indicated in the expenditure authority account. Only supplies, materials, and equipment directly related to an EDP operation are properly chargeable to an appropriation (budget line) for electronic data processing.

LOCATING DETAIL EXPENDITURE ACCOUNT CODES

When an agency has made an expenditure and is preparing the document to be sent to the Comptroller's Office for warrants to be written for payment, it becomes necessary to determine which detail expenditure account (object) codes to use so that expenditure information can be reported at a refined level. The action sequence to follow in making the determination is:

<u>STEP</u>	<u>ACTION</u>
1	<p>Check the "Alphabetic Index of Expenditure Items" in the SAMS Manual (Section 11.50.10). This index does not intend to identify the proper detail expenditure account (objects) in all instances, but identifies the detail expenditure account (object) most frequently used for items chargeable to operational accounts.</p> <p>If assistance is needed in determining which common object (object of expenditure) pertains to the expenditure refer to the "State Finance Act" (30 ILCS 105/14 - 24.3) for the legal definitions of common objects (objects of expenditure). (See Step 2)</p>
2	<p>Even if the detail object (object) has been tentatively identified in Step 1 <u>always</u> refer to the "Narrative Description of the Detail Expenditure Accounts (Objects)" in the SAMS Manual (Section 11.50.30) before making a final determination. The description contained in the narrative section for the selected detail object (object) should closely relate to the purpose of your expenditure as defined in the State Finance Act.</p>
3	<p>If the detail expenditure account (object) code still cannot be determined, contact the Comptroller's Office (217/782-3060) for assistance.</p>

FUNCTIONAL TRANSFERS

Section 9b of "An Act in Relation to State Finance" states:

"Whenever an appropriation is made to or for the use of any State officer, office, department, division, institution, commission, board or other agency and his or its functions are transferred to a successor, the appropriation or any unobligated part thereof shall be deemed to have been made to such successor to the same extent as if such successor were specifically named in the appropriation law. A change in the name or title of any of the above shall be deemed a transfer of functions to a successor."

When a functional transfer occurs as described above, the Governor (for agencies reporting to the Governor) must notify the Comptroller's Office in writing of the transfer, including a copy of the transfer document (Public Act or Executive Order). The letter must include the transferring agency's name and expenditure authority account codes (SAMS 16-digit code) to be transferred, the available balances to be transferred, the name of the agency to which the transfer is being made, and the effective date of the transfer. The Office of the Comptroller will update its files to transfer the appropriation data from the transferring agency to the receiving agency and then notify the agencies as to the action taken.

STATUTE STATEMENT

The authority for agencies to make appropriation (budget line) transfers is contained in the following sections from An Act in Relation to State Finance ([30 ILCS 105/13.2](#)):

Sec. 13.2. "Transfers among line item appropriations. (a) Transfers among line item appropriations from the same treasury fund for the objects specified in this Section may be made in the manner provided in this Section when the balances remaining in one or more such line item appropriations is insufficient for the purpose for which the appropriation was made.

No transfers may be made from one agency to another agency, nor may transfers be made from one institution of higher education to another institution of higher education. Transfers may be made only among the objects of expenditure enumerated in this section, except that no funds may be transferred from any appropriation for personal services, from any appropriation for State contributions to the State Employees' Retirement System, from any separate appropriation for employee retirement contributions paid by the employer, nor from any appropriation for state contribution for employee group insurance. Further, if an agency receives a separate appropriation for employee retirement contributions paid by the employer, any transfer by that agency into an appropriation for personal services must be accompanied by a corresponding transfer into the appropriation for employee retirement contributions paid by the employer, in an amount sufficient to meet the employer share of the employee contributions required to be remitted to the retirement system.

(c) The sum of such transfers for an agency in a fiscal year shall not exceed 2% of the aggregate amount appropriated to it within the same treasury fund for the following objects: Personal Services; Extra Help; Student and Inmate Compensations; State Contributions to Retirement Systems; State Contributions to Social Security; State Contribution for Employee Group Insurance; Contractual Services; Travel; Commodities; Printing; Equipment; Electronic Data Processing; Operation

of Automotive Equipment; Telecommunications Services; Travel and Allowance for Committed, Paroled and Discharged Prisoners; Library Books; Federal Matching Grants for Student Loans; Refunds; Worker's Compensation, Occupational Disease, and Tort Claims; and, in appropriations to institutions of higher education, Awards and Grants. Notwithstanding the above, any amounts appropriated for payment of workers' compensation claims to an agency to which the authority to evaluate, administer and pay such claims has been delegated by the Department of Central Management Services may be transferred to any other expenditure object where such amounts exceed the amount necessary for the payment of such claims...

(d) Transfers among appropriations made to agencies of the Legislative and Judicial departments and to the constitutionally elected officers in the Executive branch require the approval of the officer authorized in Section 10 of this Act to approve and certify vouchers. Transfers among appropriations made to the University of Illinois, Southern Illinois University, Chicago State University, Eastern Illinois University, Governors State University, Illinois State University, Northeastern Illinois University, Northern Illinois University, Western Illinois University, the Illinois Mathematics and Science Academy and the Board of Higher Education require the approval of the Board of Higher Education and the Governor. Transfers among appropriations to all other agencies require the approval of the Governor.

The officer responsible for approval shall certify that the transfer is necessary to carry out the programs and purposes for which the appropriations were made by the General Assembly and shall transmit to the State Comptroller a certified copy of the approval which shall set forth the specific amounts transferred so that the Comptroller may change his records accordingly. The Comptroller shall furnish the Governor with information copies of all transfers approved for agencies of the Legislative and Judicial departments and transfers approved by the constitutionally elected officials of the Executive branch other than the Governor, showing the amounts transferred and indicating the dates such changes were entered on the Comptroller's records."

Section 14.1(b) of the State Finance Act ([30 ILCS 105/14.1\(b\)](#)) further provides;

Thus, when a transfer is being made into an appropriation (budget line) for "Personal Services", it is SAMS policy that the transfer request must contain a corresponding transfer into the appropriation (budget line) for "State Contribution to Retirement", as well as the appropriation (budget line) for "Employee Retirement Contributions Paid by the Employer in an amount sufficient to meet the requirements prescribed above.

The General Assembly may authorize amounts in excess of 2% to be transferred from line item to line item.

PROCESSING AN APPROPRIATION TRANSFER

BASIC REQUIREMENTS

The "APPROPRIATION TRANSFER AUTHORIZATION" form, SAMS Procedure Exhibit 11.20.20-A, should be completed by the head of the agency or department requesting the transfer. It requires the agency to:

- . supply some basic information about the appropriation (budget line), i.e., fund name, agency request number, fiscal year and the date;
- . indicate the (SAMS) 16-digit expenditure authority account code and title from which the transfer is being made and indicate the (SAMS) 16-digit expenditure authority account code and title to which the transfer is being made (Note - all transfers can only be made from one account to one account within the same fund);
- . itemize the dollar amounts of the individual transfers;
- . compute the total dollar amount being transferred on this form, the amount previously transferred from the fund, the cumulative total, the 2% limitation and the amount available for future transfer;
- . obtain the necessary approvals.

REQUEST PROCEDURES FOR RELEASE OF REVERSIONS

A reversion is the restriction of appropriation authority within SAMS. Reversions are imposed by appropriation bill language, by substantive legislation, or by agency request for the purpose of controlling obligations and/or expenditures over the fiscal year. Requests for the release of reversions required by appropriation bill language or substantive legislation should be made on GOMB Form CR-1A/BI-1 (SCO-848). Requests for the release of reversions imposed by an agency should be coordinated with the Comptroller's Office. Further detailed information concerning reversions can be obtained from the Funds, Receipts and Collections Unit of the Comptroller's Office.

**RECONCILIATION OF MONTHLY APPROPRIATION STATUS
REPORT UNEXPENDED APPROPRIATION BALANCE**

PURPOSE

The purpose of this procedure is to describe one method which can be used to reconcile the unexpended budget authority balance per agency records with the unexpended budget authority balance per the Statewide Accounting Management System (SAMS) maintained by the Comptroller's Office. Agencies with access to SAMS automated records, may perform alternate reconciliation methods. The unexpended budget authority balance is calculated in the following manner.

Current Appropriations
Add: Transfers In
Less: Transfers Out
Reverted Amounts
Expenditures
Unexpended Budget Authority

This reconciliation should be performed monthly and the Comptroller's Office notified of any unreconcilable differences so that the necessary corrective action can be taken to locate the differences and correct the accounting records.

GENERAL

The reconciliation of the appropriation account balances shown in the Monthly Appropriation Status Report should be prepared prior to the reconciliation of the cash balances shown in the monthly Cash Report. The reconciliation of the cash balances will be simplified after the appropriation accounts have been reconciled.

The agency will have the Monthly Appropriation Status report (Exhibit 11.40.10-A) to assist them in reconciling the unexpended budget authority balance. The Document ID, presented on the Monthly Appropriation Status report, consists of three parts.

1. Transaction Type
 - * AD Automated Disbursement (warrant)
 - * AP Appropriation
 - * CX Check Cancellation
 - * EF EFT disbursement (electronic fund transfer)
 - * JV Journal Voucher
 - * PO Purchase Order
 - * PV Payment Voucher
 - * RQ Requisition (establishes Pre-Encumbrance)
 - * TA Transfer of Appropriation
2. Agency Code (i.e., 360 – Comptroller's Office)
3. Identifying document number such as voucher number for expenditures.

PROCEDURE	RECONCILIATION OF MONTHLY APPROPRIATION STATUS REPORT – UNEXPENDED APPROPRIATION BALANCE	REVISION NUMBER 98-001

In addition to other information, the Expenditure Section of the Monthly Appropriation Status report presents vouchers processed by voucher range. A voucher range consists of sequentially numbered vouchers approved by the Comptroller's Office on a single day. If, on a single approval day, a voucher is missing or rejected, or a warrant has not been written for a particular voucher, the range will break and another range will begin. Paid vouchers (or ranges of vouchers) are marked with a "D" indicating the related warrants have been written. Vouchers (or ranges of vouchers) where warrants haven not been written will have no indicator.

Most differences between an agency's records and SAMS are timing differences. For example, an agency may have recorded a transaction which at the close of the accounting period (month) was not yet recorded by the Comptroller's Office. The reconciliation process suggested recognizes and accommodates this difference, when used in conjunction with the open item files discussed below.

OPEN ITEM FILES

An agency may maintain an open item file for each type of transaction submitted to the Comptroller to facilitate the reconciliation process. Each transaction type file should be divided by fund and sub-divided by appropriation account. Within these groups, the transactions should be in chronological sequence. When the agency is notified that the transaction has been processed or rejected, the item should be removed from the open file. Notification will consist of the monthly reports sent to each agency. Those items which were submitted to the Comptroller on or before the date of the report, which were not processed by the Comptroller, are defined as being in transit. After the vouchers processed by the Comptroller have been removed from the open item file, the sum of the transactions remaining in the open item file should be the total in-transit amount. For purposes of reconciling the monthly Cash Report it is important to maintain a listing of expenditure items not marked with a "D." These represent uncleared cash items that will not be reflected on the Cash Report for the month. Once an item clears in a subsequent month, it can be removed from the listing.

To assure that transactions are in transit and not lost, the agency should periodically review the open item file for old in-transit items.

UNEXPENDED APPROPRIATION BALANCE PER THE MONTHLY APPROPRIATION STATUS REPORT

For each appropriation or other expenditure account maintained in SAMS, key data elements and brief descriptions are presented in Procedure 11.40.10.

SUB-SECTION	CONTROL	EFFECTIVE DATE July 1, 1997
PROCEDURE	RECONCILIATION OF MONTHLY APPROPRIATION STATUS REPORT – UNEXPENDED APPROPRIATION BALANCE	REVISION NUMBER 98-001

RECONCILING THE REPORT

The suggested method for reconciling the unexpended budget authority balance (35) on the "Monthly Appropriation Status report" (Exhibit 11.40.10-A) is as follows:

- Step 1. For each appropriation account, compare the current unexpended budget authority balance per the agency's records as of the date of this report to the Current Unexpended Budget Authority Balance (35) per SAMS. Any discrepancy between these two amounts should equal the sum of the in-transit transactions.
- Step 2. Three types of transactions can have in-transit items.
- 1) Transfers In (26)
 - 2) Transfers Out (27)
 - 3) Expenditures (including cash refunds and voided warrants (32)

Those transactions which are in-transit (recorded on the agency's records as of the date of this report but not recorded in the Comptroller's records) should be summed by type. In-transit items are determined through the procedure previously described under "OPEN ITEM FILES". In-transit expenditures are defined for this reconciliation procedure to be those vouchers or refunds submitted by the agency to the Comptroller which were not processed by the Comptroller prior to the close of the accounting period. In-transit transfers-in and refunds should be deducted from the agency's unexpended appropriation balance and in-transit transfers-out and expenditures should be added in order to agree with the Comptroller's balance.

RECONCILIATION EXCEPTION NOTIFICATION

Each month, the Comptroller's Office distributes the Monthly Appropriation Status Report to the agencies. The Monthly Appropriation Status Report should be reconciled on a timely basis to ensure the early detection and correction of errors. A Reconciliation Exception Notification (Exhibit 11.40.20-A) should be completed by the agency to report discrepancies to the Comptroller.

- (1) Check the box for appropriations.
- (2) Complete the month and fiscal year of the report being reconciled.
- (3) Indicate in appropriate box the type of exception
 - a.) If the agency has charged a voucher to the wrong expenditure account or fiscal year, this box should be checked. The agency should attach an Expenditure Transfer Request (SCO-415) and a copy of the voucher in question.
 - b.) If the agency detects a voucher which has been entered incorrectly onto SAMS, this box should be checked. The agency should attach an Expenditure Transfer Request (SCO-415) and a copy of the voucher.
 - c.) If the agency notes that a warrant has been issued for the wrong amount, the Comptroller's Accounting Section (217/782-3426) should be contacted immediately.
 - d.) If an agency has credited a cash refund to the wrong expenditure account, fiscal year, or detail object, this box should be checked. The agency should attach a letter requesting the correction with a reasonable explanation, and include a copy of the original voucher and an Expenditure Adjustment Transmittal (C-63).

*** A L E R T ***

The function of this index is to identify some of the detail expenditure accounts (object) most frequently used in the way that they are most frequently used. The account (object) cited will not be correct in every instance. The selection of the proper account depends on both the item purchased and the purpose to which the item is used.

For instance, the correct detail object (object) for a water heater is 1223 if it is purchased to replace a damaged unit, i.e. repair and maintenance of real property purpose. However, the correct detail object (object) for the same water heater would be 6671 if it is purchased to be used in connection with a new construction project or 6625 if purchased for a remodeling and renovation project.

* All equipment (1500) line items, \$100 or less must be charged to appropriate commodities detail object (object) 1394-1398 with the exception of library books.

PERSONAL SERVICES AND FRINGE BENEFITS

1100 PERSONAL SERVICES

Defined by "An Act in relation to State Finance" ([30 ILCS 105/14](#)) as follows:

"The item 'personal services', when used in an appropriation act, means the reward or recompense made for personal services rendered for the State by an officer or employee of the State or of an instrumentality thereof, or for the purpose of Section 14a of this Act, or any amount required or authorized to be deducted from the salary of any such person under the provisions of Section 30c of this Act, or any retirement or tax law, or both, or deductions from the salary of any such person under the Social Security Enabling Act or deductions from the salary of such person pursuant to 'An Act relating to the deduction from salaries or wages of State officers and employees of amounts of money designated by them for payment to the United Fund or other similar organization', approved August 21, 1961, as heretofore and hereafter amended.

If no home is furnished to a person who is a full-time chaplain employed by the State, 20% of the salary paid to that person for his personal services to the State as chaplain is considered to be a rental allowance paid to him to rent or otherwise provide a home. This amendatory Act of 1973 applies to State salary amounts received after December 31, 1973.

When any appropriation payable from trust funds or federal funds includes an item for personal services but does not include a separate item for State contribution for employee group insurance, the State contribution for employee group insurance in relation to employees paid under that personal services line item shall also be payable under that personal services line item.

When any appropriation payable from trust funds or federal funds includes an item for personal services but does not include a separate item for employee retirement contributions paid by the employer, the State contribution for employee retirement contributions paid by the employer in relation to employees paid under that personal services line item shall also be payable under that personal services line item.

The item 'personal services' when used in an appropriation act, shall also mean and include a payment to a State retirement system by a State agency to discharge a debt arising from the over-refund to an employee of retirement contributions. The payment to a State retirement system authorized by this paragraph shall not be construed to release the employee from his or her obligation to return to the State the amount of the over-refund.

The item 'personal services', when used in an appropriation Act, also includes a payment to reimburse the Department of Central Management Services for temporary total disability benefit payments in accordance with subdivision (9) of Section 405-105 of the Department of Central Management Services Law ([20 ILCS 405/405-105](#)).

Beginning July 1, 1993, the item 'personal services' and related line items, when used in an appropriation Act or this Act, shall also mean and include back wage claims of State officers and employees to the extent those claims have not been satisfied from the back wage appropriation to the Department of Central Management Services in the preceding fiscal year, as provided in Section 14b of this Act and subdivision (13) of Section 405-105 of the Department of Central Management Services Law ([20 ILCS 405/405-105](#)).

The item 'personal services', when used with respect to State police officers in an appropriation Act, also includes a payment for the burial expenses of a State police officer killed in the line of duty, made in accordance with [Section 12.2 of the State Police Act](#) and any rules adopted under that Section.

For State fiscal year 2005, the item 'personal services', when used in an appropriation Act, also includes payments for employee retirement contributions paid by the employer.”

CONTRACTUAL SERVICES

1200 CONTRACTUAL SERVICES

Defined by "An Act in relation to State Finance" ([30 ILCS 105/15a](#)) as follows:

"The item 'contractual services', when used in an appropriation act, means and includes: (a) Expenditures incident to the current conduct and operation of an office, department, board, commission, institution or agency for postage and postal charges, surety bond premiums, publications, subscriptions, office conveniences and services, exclusive of commodities as herein defined; (b) Expenditures for rental of property or equipment, repair or maintenance of property or equipment including related supplies, equipment, materials, services, replacement fixtures and repair parts, utility services, professional or technical services, moving expenses incident to a new State employment, and transportation charges exclusive of 'travel' as herein defined; (c) Expenditures for the rental of lodgings in Springfield, Illinois and for the payment of utilities used in connection with such lodgings for all elected State officials, who are required by Section 1, Article V of the Constitution of the State of Illinois to reside at the seat of government during their term of office; (d) Expenditures pursuant to multi-year lease, lease-purchase or installment purchase contracts for duplicating equipment authorized by Section 5.1 of 'The Illinois Purchasing Act', approved July 11, 1957, as now or hereafter amended; (e) Expenditures of \$5,000 or less per project for improvements to real property which, except for the operation of this Section, would be classified as 'permanent improvements' as defined in Section 21, (f) Expenditures pursuant to multi-year lease, lease-purchase or installment purchase contracts for land, permanent improvements or fixtures, (g) Expenditures for facilities management, communication, information technology, and professional services provided by the Department of Central Management Services pursuant to the Department of Central Management Services Law of the Civil Administrative Code of Illinois.

The item 'contractual services' does not, however, include any expenditures included in 'operation of automotive equipment' as defined in Section 24.2.

The item 'contractual services' does not include any expenditures for professional, technical, or other services performed for a State agency under a contract executed after July 1, 1992 by a person who was formerly employed by that agency and has received any early retirement incentive under Section 14-108.3 or 16-133.3 of the Illinois Pension Code based on retirement before 1993, unless the official or employee executing the contract on behalf of the agency has certified that the person performing the services either (i) possesses unique expertise, or (ii) is essential to the operation of the agency. This certification must be filed with the Office of the Auditor General prior to the execution of the contract, and shall be made available by that Office for public inspection and

AWARDS AND GRANTS

Defined by "An Act in relation to State Finance" ([30 ILCS 105/24.5](#)) as follows:

"'Awards and grants' includes payments for: Awards and indemnities, pensions and annuities (other than amounts payable for personal services as defined in Section 14): shared revenue payments or grants to local governments or to quasi-public agencies; and gratuitous payments to, or charges incurred for the direct benefit of, natural persons who are not wards of the State. Payments to any local government as reimbursement for costs incurred by it in performing an activity for which it is specifically by statute made an agent of the State shall be chargeable to and classified under the same item or account as though such costs were incurred directly by the State."

4300 AWARDS AND GRANTS – RESTRICTED USE – IOC AUTHORIZATION REQUIRED

The 4300 detail object code series is restricted for use by agencies that have prior written approval from the Office of the Comptroller. The 4300 detail object code series designates that the payments will be processed by alternate SAMS procedures with respect to Involuntary Withholding requirements. The description and IRS reportable status of the detail object code in the 4300 series are identical to the corresponding detail object codes in the 4400 series. For example, detail object code 4361 has the same description and IRS reportable status as 4461.

CHART OF USER AGENCIES

The Capital Development Board receives appropriations to aid State agencies, boards, and institutions in the planning and construction of their capital projects. To facilitate identification of each user agency in the Capital Development Board's appropriations, the agency number of each user agency (second and third digit of organizational unit code) will be used as the Capital Development Board's division code.

GAAP ACCOUNTING CODE

The GAAP Accounting Code is a four-digit identifier that will be used to group expenditures for GAAP reporting purposes. It must be placed on all vouchers. Generally, each agency has one GAAP Accounting Code except for capital outlay expenditures (1500 and 6600 major objects) and refunds (99XX major objects). Certain agencies have multiple GAAP Accounting Codes because they engage in a variety of activities. For these agencies, the GAAP Accounting Codes will vary by division. The table below lists all the possible GAAP accounting codes. The specific GAAP Accounting Codes that each State agency should use are listed in Exhibit 11.50.50-A.

INTRODUCTION

The State Comptroller Act ([15 ILCS 405/7](#)) requires that the Comptroller "...develop and prescribe for the use of all State agencies a uniform accounting system, applying the encumbrance method of accounting..." "State Agencies" means all departments, officers, authorities, public corporations and quasi-public corporations, commissions, boards, institutions, State colleges and universities, and all other public agencies created by the State, other than units of local government and school districts. The accounting system shall accurately reflect the receiving, expending, or contracting for the receipt or expenditure of money or other assets on behalf of the State and all amounts which may be paid into or out of the State Treasury or held or paid out by the State Treasurer.

The encumbrance method of accounting is a budgetary tool that focuses on prospective expenditures. The Comptroller, by giving accounting recognition to the prospective expenditures of State agencies, enables them to reserve a portion of their expenditure authority. The Comptroller maintains and reports each agency-initiated reservation of expenditure authority as an "obligation." The term "obligation" as used in this section is synonymous with the term "encumbrance." Each obligation remains in effect as a reservation of agency expenditure authority until action is taken by the originating agency to liquidate, reduce or cancel the obligation.

[74 Ill. Adm. Code 245](#) requires State agencies, to use, implement and comply with the accounting principles and procedures promulgated by the Comptroller, whenever reporting or accounting for any transaction involving public funds.

This section of the SAMS Manual provides an overview of the obligations accounting system cycle, discusses the controls it provides, describes general obligation and contract filing rules, defines the agency input requirements, illustrates the reports the system provides for agency use, and provides procedures for communicating discrepancies.

STATUTORY REFERENCE

Statutory Provisions

Excerpts of statutory provisions relevant to the Obligations process are provided in this procedure. The statutory references provided in this procedure are intended to highlight key statutory requirements. The references provided in this procedure are not intended to be a complete, exhaustive list of all relevant statutory provisions.

Every effort has been made to ensure that the citations and references provided in this section are accurate and current as of the effective date of the procedure.

The following statutory excerpts relate to the obligation process and are provided for reference purposes.

Encumbrance Accounting

Section 7 of the State Comptroller Act, ([15 ILCS 405/7](#)) provides in pertinent part:

"In accordance with generally accepted accounting principles applicable to government the Comptroller shall develop and prescribe for the use of all State agencies a uniform accounting system, applying the encumbrance method of accounting and so designed as to insure compliance with all legal and constitutional requirements including those respecting the receipt and expenditure of and the accountability for public funds....

...The Comptroller shall keep accounts with respect to each State agency which shall accurately reflect the receiving, expending or contracting for the receipt or expenditure of money or other assets on behalf of the State and shall keep accounts of all amounts which may be paid into or out of the State treasury or held or paid out by the State Treasurer..."

Prescribing Forms of Documents

"The Comptroller may prescribe, and require the use by State agencies of forms for all documents required by law in the performance of his duties or which he may reasonably require therefor."

Property Rental

Section 9 of the State Finance Act ([30 ILCS 105/9](#)) provides in pertinent part:

“No disbursements from appropriations shall be made for rental or purchase of office or other space, buildings or land, except in pursuance of a written lease or purchase contract entered into by the proper State authority and the owner or authorized agent of the property. Such lease shall not exceed 5 years unless a greater term is authorized by law, but such lease may contain a renewal clause subject to acceptance by the State after that date or an option to purchase. Such purchase contract may provide for the title to the property to transfer immediately to the State or a trustee or nominee for the benefit of the State and for the consideration to be paid in installments to be made at stated intervals during a certain term not to exceed 30 years from the date of the contract and may provide for the payment of interest on the unpaid balance at a rate that does not exceed a rate determined by adding 3 percentage points to the annual yield on United States Treasury obligations of comparable maturity as most recently published in the Wall Street Journal at the time such contract is signed. Such lease or purchase contract shall be and shall recite that it is subject to termination and cancellation in any year for which the General Assembly fails to make an appropriation to pay the rent or purchase installments payable under the terms of such lease or purchase contract. Additionally such purchase contract shall specify that title to the office and storage space, buildings, land and other facilities being acquired under such a contract shall revert to the Seller in the event of the failure of the General Assembly to appropriate suitable funds. This limitation does not apply to leases for office or other space, buildings, or land, where such leases or purchase contracts contain a provision limiting the liability for the payment of the rental or installments thereunder solely to funds received from the Federal Government. A copy of each such lease or purchase contract shall be filed in the office of the Secretary of State within 15 days after execution.”

Section 3.1 of the Public Offices Prohibited Activities Act ([50 ILCS 105/3.1](#)):

owner and beneficiary having any interest, real or personal, in such property, and every member, shareholder, limited partner, or general partner entitled to receive more than 7-1/2% of the total distributable income of any limited liability company, corporation, or limited partnership having any interest, real or personal, in such property must be disclosed. The disclosure shall be in writing and shall be subscribed by a member, owner, authorized trustee, corporate official, general partner, or managing agent, or his or her authorized attorney, under oath. However, if the interest, stock, or shares in a limited liability company, corporation, or general partnership is publicly traded and there is no readily known individual having greater than a 7-1/2% interest, then a statement to that effect, subscribed to under oath by a member, officer of the corporation, general partner, or managing agent, or his or her authorized attorney, shall fulfill the disclosure statement requirement of this Section. As a condition of contracts entered into on or after the effective date of this amendatory Act of 1995, the beneficiaries of a lease shall furnish the trustee of a trust subject to disclosure under this Section with a binding non-revocable letter of direction authorizing the trustee to provide the State with an up-to-date disclosure whenever requested by the State. The letter of direction shall be binding on beneficiaries' heirs, successors, and assigns during the term of the contract. This Section shall be liberally construed to accomplish the purpose of requiring the identification of the actual parties benefiting from any transaction with a governmental unit or agency involving the procurement of the ownership or use of real property thereby. For any entity that is wholly or partially owned by another entity, the names of the owners of the wholly or partially owning entity shall be disclosed under this Section, as well as the names of the owners of the wholly or partially owned entity.” (Source: P.A. 91-361, eff. 7-29-99.)

Contracting in Excess of Appropriation Prohibited

Section 30 of the State Finance Act ([30 ILCS 105/30](#)):

"No officer, institution, department, board or commission shall contract any indebtedness on behalf of the State, nor assume to bind the State in an amount in excess of the money appropriated, unless expressly authorized by law."

Advance Payments for Goods and Services

Section 9.05 of the State Finance Act ([30 ILCS 105/9.05](#)) provides as follows:

"In the event that a voucher is submitted for advance payment of goods or services, the certification prescribed by Section 9.04 shall be made. In addition, the voucher shall state on its face that the goods or services are being procured pursuant to a formal, written contract the terms of which require advance payment. If it is not possible to execute a written contract, the voucher shall so state. The voucher shall also state that the contract requires the goods or services to be delivered or received prior to the expiration of the lapse period of the fiscal year to which the expenditures are charged, provided however, that such a statement shall not be required on vouchers submitted for periodical subscriptions or organizational memberships."

Response Action Contractor Indemnification Act

Section 5 (b) of the Response Action Contractor Indemnification Act, ([415 ILCS 100/5](#)) provides as follows:

"Every State response action contract shall provide that 5% of each payment to be made by the State under the contract shall be paid by the State directly into the Response Contractors Indemnification Fund rather than to the contractor, except that when there is at least \$100,000 in the Fund at the beginning of a State fiscal year, State response action contracts during that fiscal year need not provide that 5% of each payment made under the contract be paid into the Fund. When only a portion of a contract relates to a remedial or response action, or to the identification, handling, storage, treatment or disposal of a pollutant, the contract shall provide that only that portion is subject to this subsection."

The purpose of the Response Action Contractor Indemnification Act is to provide indemnification by the State in cases where there is no liability insurance available to a contractor who contracts with the State for the identification, handling, storage, treatment or disposal of any pollutant or hazardous substance or material. It would not apply to response action contracts where the contractor does in fact have liability insurance. However, evidence of this insurance in the form of a Certificate of Insurance attached to the agreement, is required where no provision is made for the 5% contribution into the Response Contractors Indemnification Fund.

Educational Loans

Section 3 of the Educational Loan Default Act, ([5 ILCS 385/3](#)) provides as follows:

"No State agency shall contract with an individual for goods or services if that individual is in default, as defined in Section 2 of this Act, on an educational loan. Any contract used by any State agency shall include a statement certifying that the individual is not in default on an educational loan as provided in this Section."

Interference with Public Contracting (Bid Rigging/Bid Rotating)

Section 33E-11 of the Criminal Code of 1961 ([720 ILCS 5/33E-11](#)) provides as follows:

"(a) Every bid submitted to and public contract executed pursuant to such bid by the State or a unit of local government shall contain a certification by the prime contractor that the prime contractor is not barred from contracting with any unit of State or local government as a result of a violation of either Section 33E-3 or 33E-4 of this Article. The State and units of local government shall provide the appropriate forms for such certification. (b) A contractor who makes a false statement, material to the certification, commits a Class 3 felony."

The Architectural, Engineering, and Land Surveying Qualifications Based Selection Act

Section 60 of the Architectural, Engineering, and Land Surveying Qualifications Based Selection Act, Certificate of Compliance provides as follows ([30 ILCS 535/60](#)):

"Each contract for architectural, engineering, and land surveying services by a State agency shall contain a certificate signed by a representative of the State agency and the firm that the provisions of this Act were complied with."

Steel Products Procurement Act

Section 4 of the Steel Products Procurement Act ([30 ILCS, 565/4](#)) provides as follows:

"Each contract for the construction, reconstruction, alteration, repair, improvement or maintenance of public works made by a public agency shall contain a provision that steel products used or supplied in the performance of that contract or any subcontract thereto shall be manufactured or produced in the United States.

The provisions of this Section shall not apply:

- (1) Where the contract involves an expenditure of less than \$500.
- (2) Where the executive head of the public agency certifies in writing that (a) the specified products are not manufactured or produced in the United States in sufficient quantities to meet the agency's requirements or cannot be manufactured or produced in the United States within the necessary time in sufficient quantities to meet the agency's requirements, or (b) obtaining the specified products, manufactured or produced in the United States would increase the cost of the contract by more than 10%.
- (3) When its application is not in the public interest."

International Anti-Boycott Certification Act:

Section 5 of the International Anti-Boycott Certification Act ([30 ILCS 582/1](#)) provides as follows:

“State contracts. Every contract entered into by the State of Illinois for the manufacture, furnishing, or purchasing of supplies, material, or equipment or for the furnishing of work, labor, or services, in an amount exceeding the threshold for small purchases according to the purchasing laws of this State or \$10,000, whichever is less, shall contain certification, as a material condition of the contract, by which the contractor agrees that neither the contractor nor any substantially-owned affiliated company is participating or shall participate in an international boycott in violation of the provisions of the U.S. Export Administration Act of 1979 or the regulations of the U.S. Department of Commerce promulgated under that Act.”

Requirement for three signatures for contracts of \$250,000 or more ([30 ILCS 105/9.02](#))

- (a) (1) “Any new contract or contract renewal in the amount of \$250,000 or more in a fiscal year, or any order against a master contract in the amount of \$250,000 or more in a fiscal year, or any contract amendment or change to an existing contract that increases the value of the contract to or by \$250,000 or more in a fiscal year, shall be signed or approved in writing by the chief executive officer of the agency, and shall also be signed or approved in writing by the agency’s chief legal counsel and chief fiscal officer. If the agency does not have a chief legal counsel or a chief fiscal officer, the chief executive officer of the agency shall designate in writing a senior executive as the individual responsible for signature or approval.
- (2) No document identified in paragraph (1) may be filed with the Comptroller, nor may any authorization for payment pursuant to such documents be filed with the Comptroller, if the required signatures or approvals are lacking.
- (3) Any person who, with knowledge the signatures or approvals required in paragraph (1) are lacking, either files or directs another to file documents or payment authorizations in violation of paragraph (2) shall be subject to discipline up to and including discharge.

SECTION	OBLIGATIONS	PROCEDURE - PAGE NO. 15.10.30 1 of 1
SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2003
PROCEDURE	OBLIGATION CYCLE	REVISION NUMBER 03-003

OBLIGATION CYCLE

The obligation cycle begins after the initial expenditure authority and budgetary limitations, such as Governor's releases, are recorded in a set of expenditure authority level accounts maintained by the Comptroller for each State agency at the beginning of each fiscal year.

Once this process is completed, the Comptroller accepts and records agency-originated obligation transactions against the various expenditure authority accounts. In addition to recording obligation transactions in the proper expenditure authority accounts, the Comptroller maintains an automated file of obligation data and a file of obligation source documents.

After an agency's obligation transaction passes the manual and programmatic checks at the obligation and the expenditure authority levels, it serves as a reservation of expenditure authority until further agency action is taken to reduce the obligation. An agency can take two types of action to reduce an obligation:

- Submit an invoice-voucher citing an established obligation
- Submit a decrease on a Contract Obligation Document (C-23), citing an established obligation

The Comptroller's obligation requirements, (see 15.10.40), identify the conditions under which a voucher must cite a previously recorded obligation.

Agencies must satisfy the Comptroller's obligation data requirements by submitting a copy of the obligation source document containing the required data elements in the Comptroller's approved format.

SECTION	OBLIGATIONS	PROCEDURE - PAGE NO. 15.10.40 1 of 5
SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	OBLIGATION REQUIREMENTS	REVISION NUMBER 11-002

OBLIGATION REQUIREMENTS

Generally, all contracts, purchase orders, leases, and grant agreements exceeding \$10,000 must be filed with the Comptroller and obligated on SAMS.

CONTRACTS FOR SERVICES

Generally, individual orders for repairs, maintenance or other services that will exceed \$10,000 to any single vendor must be reduced to writing, filed with the Comptroller within fifteen days of execution, and individually obligated on SAMS. The \$10,000 is based on the individual order and not on individual payments.

Individual orders not exceeding \$10,000 are not required to be filed or obligated with the Comptroller. Agencies should, however, maintain all encumbrances on prospective expenditures within their internal accounting systems to prevent obligating in excess of their appropriations.

PURCHASES OF COMMODITIES AND EQUIPMENT

Individual purchases or Orders for Delivery from the same vendor that exceed \$10,000 must be filed with the Comptroller within fifteen days of execution and individually obligated on SAMS.

Purchases of commodities and equipment from the same vendor are viewed as a series of isolated transactions and as long as a single purchase or Order for Delivery does not exceed \$10,000, it need not be filed or obligated.

DCMS TERM CONTRACT

DCMS has authorized agencies purchasing certain commodities and equipment to file CODs directly with the Obligations Unit. In the description area of the COD, the agency must cite the Term Contract Number and include a description of the item(s) being purchased.

DCMS also issues a Term Contract for the rental of certain equipment. The agency will be required to obtain a supplemental agreement with that vendor. The agency must then file the supplemental agreement with a COD directly with the Obligations Unit. In the description area of the COD, the agency must cite the term Contract Number and include a description of the equipment.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	OBLIGATION REQUIREMENTS	REVISION NUMBER 11-002

FILING REQUIREMENTS

State Agencies shall file with the Comptroller a copy of a contract, purchase order, grant, lease, or modification thereto within 15 days of execution. For filing purposes, “execution” occurs when all required elements of an agreement have been written and formally approved (in writing) by all parties as required by law for filing with the Comptroller. For contracts that require three agency signatures per the State Finance Act ([30 ILCS 105/9.02](#)), execution will occur when the vendor and all three agency signatures have been affixed.

Where a contract liability has not been filed within 30 days of execution, the Comptroller shall refuse to issue a warrant for payment thereunder until the agency files with the Comptroller the contract, purchase order or lease and an Affidavit (Exhibit 15.10.40-A), signed by the chief executive officer of an agency or his designee, setting forth an explanation of why such contract liability was not filed within 30 days of execution. The affidavit must clearly identify the agency, contract number, vendor and be notarized. Each affidavit must be sequentially numbered for each fiscal year. **The original and one copy of the affidavit must be sent with the contract** to the Office of the Comptroller. The Comptroller will file the copy of the affidavit with the Auditor General.

TIMELY EXECUTION OF CONTRACTS

The Illinois Procurement Code [30 ILCS 500/20-80\(d\)](#) “Timely execution of contracts” requires all contracts subject to the Illinois Procurement Code solicited after July 1, 2010, be reduced to writing and signed by all necessary parties before services are rendered or goods are received. If any contract for goods or services is executed after the beginning date of the contract, the IOC will reject the contract. This Section shall not apply to emergency purchases if notice of the emergency purchase is filed with the Procurement Policy Board and published in the Bulletin as required by the Code. A copy of the Bulletin must be attached to the contract.

The Chief Procurement Officer (CPO) can request an exception. To request an exception, the CPO must submit a Late Execution Waiver Request form (Exhibit 15.10.40-B). The Waiver Request and a copy of the contract must be submitted to:

ADVANCE PAYMENTS

The State Finance Act ([30 ILCS 105/9.05](#)) requires that, generally, payment for services rendered on goods delivered cannot be made in advance but only after the goods or services for which payment is being made have been provided unless the terms of the contract require advance payment.

ACCOUNTS REQUIRING OBLIGATIONS

All prospective expenditures exceeding \$10,000 for all other expenditure authority accounts must be recorded in the obligations accounting system.

A. Fully Obligated Accounts

Selected expenditure authority accounts require full obligation at the time of establishment. "Full obligation" means that the full amount of the contractual liability for the current fiscal year must be obligated when the obligation is established. These are referred to as "fully obligated" accounts.

Full obligation is required for the operational accounts listed below:

1200	Contractual Service - all detail expenditure accounts, <u>except</u> 1251, 1252, 1253, 1254, 1255 and 1261
1300	Commodities - all detail expenditure accounts
1302	Printing
1500	Equipment - all detail expenditure accounts
1700	Telecommunications - all detail expenditure accounts, except regulated service charges which do not require obligation.
1800	Operation of Automotive Equipment - all detail expenditure accounts

The following expenditure accounts require full obligation, if the prospective expenditure will be charged to a detail expenditure account encompassed within the fully obligated accounts referenced above.

1600	Electronic Data Processing
1900	Lump Sum and other purposes

Detail expenditure accounts 1681, 1683, 1685 and 1687 also require full obligation. No obligation is required for (1) Electronic Data Processing, or (2) Lump Sum and other purposes, if the prospective expenditure will be charged to a detail expenditure authority account not requiring obligation.

B. Partially Obligated Accounts

Prospective expenditures of more than \$10,000 must be recorded in the obligation system for the accounts listed below. However, the full amount need not be obligated at the time of establishment.

4400	Awards and Grants - all contractual liabilities (gratuitous payments are exempt from obligation)
4900	Awards and Grants, Lump Sum and other purposes
* 6600	Permanent Improvements - all detail expenditure accounts
6900	Permanent Improvements, Lump Sum and other purposes
7700	Transportation and Related Construction - all detail expenditure accounts
7900	Transportation and Related Construction, Lump Sum and other purposes

*NOTE: Certain appropriation line items, such as most capital appropriations, require prior obligation and expenditure approval by the Governor. Obligations will not be permitted in excess of the amount authorized by the Governor where this provision applies.

The statewide accounting system will check the outstanding obligation file when any expenditure is processed against these accounts to determine if the referenced obligation is recorded, and if the unliquidated obligation balance (obligation amount minus expenditures to date) is sufficient to process the voucher. If no obligation is recorded and the voucher is for more than \$10,000, the expenditure will not be processed until an obligation is recorded. Also, if the unliquidated obligation balance is insufficient, the voucher will not be processed until corrective action has been taken by the agency.

SYSTEMS CONTROL

The obligation accounting system provides computer reports detailing each agency's obligation transactions. Computer reports provide information necessary for each agency to reconcile their obligation balances with those maintained by the Comptroller.

Monthly Obligation Activity Report (Exhibit 15.30.20-A)

The Comptroller provides a monthly report listing the obligation transactions processed against each agency's accounts. The report is distributed to each agency having obligation activity.

The monthly Obligation Activity Report provides unliquidated obligation balances at two levels:

- At the detail level for each obligation that was "open" during the month
- At a summary level for each expenditure authority account having "open" obligations during the month

Detail obligation activity is in the following order on the report:

- Agency
- Fiscal year
- Appropriation account code
- Obligation number
- Transaction amount
- Individual transactions

The monthly activity includes transactions establishing or amending obligations and vouchers processed reducing previously recorded obligations.

The following information is provided at the detail level for each obligation that was "open" during the month:

- Unliquidated obligation balance at the beginning of the month
- Listing of all monthly activity against the "open" obligation
- Unliquidated obligation balance at the end of the month
- Summarization of all detail activity at the expenditure authority account level

Agency Contract Report (Exhibit 15.30.10-A)

Implementing Section 19 of the [State Comptroller Act](#), the Agency Contract Report is distributed monthly to all State agencies having contracts on file with the Comptroller. The report is a listing of all Procurement, Professional or Artistic contracts, Construction, Financial Assistance, other contractual service agreements, leases for real property, and other leases filed by State agencies to satisfy the requirements of Section 7 of the [State Comptroller Act](#), Section 20-80 of the [Illinois Procurement Code](#), and Section 9 of the [State Finance Act](#). The report is arranged in seven sections for each agency and is available for public inspection at the Comptroller's Office. Each section is arranged by contract or lease number within the agency.

Detail contract information is in the following order on the report:

- * Fiscal Year
- * Agency Name
- * Contract Type
- * Contract/Obligation Number
- * Class Code
- * Taxpayer Identification Number (last 4 digits only)
- * Legal Status
- * Vendor Name
- * Address (city, state, zip code only)

Reconciliation of the Monthly Obligation Activity Report and Agency Contract Report.

Each agency is required to verify and reconcile to internal records all monthly transactions processed by the Comptroller. (See 15.30.20) Errors in processing agency obligation transactions can result in erroneous account balances, and may cause the rejection of subsequent vouchers or obligations.

PRE-AUDIT

Obligation documents and any attached contracts or leases will be preaudited before entering the system for processing to ensure that:

- The obligation document contains accurate information in all data input fields, as specified in 15.20.10.
- The abstract information is completed on the Contract Obligation Document form.
- All statutory contract filing requirements are met.
- Specified contract content is met.

Any obligation document and/or attachment that does not meet all preaudit tests will be returned to the agency for correction and resubmission.

Obligations Delete Slip (Exhibit 15.10.50-A)

State agencies will have five full days from the date of initial entry to correct any errors discovered through SAMS electronic edits or manual pre-audit. If the errors are not corrected in a timely manner, the transaction will be deleted from SAMS and the contract will be returned with a Deleted Documents Report (Exhibit 15.10.50-A).

Obligations Error Messages for Online Agencies (Exhibit 15.10.50-B)

For errors detected during the Comptroller's manual pre-audit, the pre-audited obligation (PO) will be put "on hold" and the error message will be typed in SAMS screen POTX on line 98 and text lines 008-010 (Exhibit 15.10.50-B).

Comptroller's Agency Contacts

The Comptroller periodically provides certain reports and forms to agencies detailing the transactions and account status of the agencies. It is important that the Comptroller's Office have on file accurate information specifying the agency personnel who will receive the forms and reports and will perform necessary reconciliations. Agencies must report in writing to the Comptroller's Obligations Section any changes in office location or agency personnel which affects the distribution of these reports and forms.

Deletion Requests From Agencies

To delete a document in the suspense file (SUSF), the agency must submit the request in writing on the "PO DELETION REQUEST" form. (Exhibit 15.10.50-C). This document may be faxed.

PROCEDURE	INPUT REQUIREMENTS	REVISION NUMBER 08-002

INPUT REQUIREMENTS

Obligation data submitted to the Comptroller is used to establish and maintain a file of individual obligations by agency and account.

Comptroller-Approved Input Format

The Contract Obligation Document (C-23) is used to obligate contracts, leases, purchase orders, sub-orders, and printing orders. Specific examples of Contract Obligation Documents are included at the end of this section. Exhibit 15.20.10-A1 is a blank copy of the Contract Obligation Document (C-23) that is provided for agency use.

The Contract Obligation Document (C-23), when submitted for contract and lease purposes, must contain those data elements indicated on Exhibit 15.20.10-A.

The following explain these data elements and the processing options they provide. The reference numbers next to each data element refer to the items shown in Exhibit 15.20.10-A and Exhibit 15.20.10-B.

(1) Agency Number

Enter the first three digits of the agency number contained in the organizational unit segment of the appropriation account code included in data element 12.

(2) Fiscal Year

Enter the last two digits of the fiscal year to which the obligation pertains. Thus, if an obligation pertains to fiscal year 2002, 02 is entered in this position.

OFFICE OF THE COMPTROLLER**

SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2008
PROCEDURE	INPUT REQUIREMENTS	REVISION NUMBER 08-002

(3) Transaction Code

Enter the four-digit code which indicates the type of obligation and processing action to be taken by the Comptroller. (See Exhibit 15.20.10-C.)

The four digits of the transaction code are structured as follows:

AA BB
.
.
. . . Action Code
.
. Type Code

Type Code

The first two digits are the type code which indicate the type of contract, lease, or purchase being obligated and/or filed. On-line agencies should reference Purchase Order Type (XPOT) Table on Exhibit 15.20.10-E for crosswalk between SAMS and CUSAS order types.

A. Contracts and Leases

If the obligation relates to a contract or lease, the first two digits (type code) of the transaction code must be one of the following:

21 - Professional or Artistic - External Vendor

22 - Professional or Artistic - State Agency

23 - Construction

27 - Awards and Grants (Financial Assistance)

28 - Other Contract - External Vendor

29 - Other Contract - State Agency

*31 - Leases for Rental of Real Property

*38 - Other Lease/Installment Purchases - External Vendor

*39 - Other Lease/Installment Purchases - State Agency

B. Purchase Order, Sub-Order, or Printing Order

If the obligation relates to purchase of commodities, equipment, or printing, the first two digits (type code) of the transaction code must be one of the following:

11 - Purchase Order

12 - Sub-Order

13 - Printing Order

File Only documents that are not required to be obligated must use a "99" type code.

*Form SCO-560 may be required. See SAMS 27.20.60 for form and instructions.

Action Code

The second two digits indicate the processing action that will be taken. There are three actions that can be taken, but only one action per Contract Obligation Document (C-23): (1) establish an obligation with a contract; (2) increase an obligation; (3) decrease an obligation.

A. Establishing an Obligation

When establishing an obligation the last two digits of the action code of the transaction code must always be either 10 (open-end) or 13 (fixed amount). Fixed amount (13) should be used for agreements containing a firm total amount or a maximum or minimum amount.

B. Amending an Obligation

- * 20 - To increase the obligation amount
- 25 - To decrease the obligation amount

All four digits of the transaction code must be completed prior to sending the document to the Comptroller's Office.

When amending an obligation, the first two digits of the transaction code (type code) must be the same as the type code submitted on the establishment (original obligation).

* Other changes such as a change in the contract term description, vendor name or address, or method of compensation must be coded as a "20."

Increases and decreases to fixed amount obligations must be accompanied by contract amendments. If the contract allows for increases or decreases without amendment, the COD description must describe the reason for the increase/decrease, and identify the applicable portion of the contract that allows it.

C. Filing Master Contracts and File Only Contracts

00 – No obligations activity recorded on SAMS

Master contracts negotiated for use by multiple agencies to be used on an as needed basis are to be filed for reference only. These contracts contain a description of services, dates, method of compensation, and sometimes an estimated contract amount. The liability of the State with these contracts is contingent upon the agency's use of the service. Agencies utilizing a master contract must cite the Master Contract number in the description field on the Contract Obligations Document (C-23).

SECTION	OBLIGATIONS	PROCEDURE - PAGE NO. 15.20.10 5 of 12
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2008
PROCEDURE	INPUT REQUIREMENTS	REVISION NUMBER 08-002

File Only contracts including contracts paid entirely from locally held funds do not require obligation and are not entered into the SAMS system. They must, however, be filed with the Illinois Office of the Comptroller and must meet all IOC documentation and certification requirements.

Agencies should contact the Contract/Obligations Unit to verify the necessity of obligating contracts.

(4) Contract/Obligation Number

Enter the number assigned by your agency, or the Department of Central Management Services, if applicable, of up to 10 alpha-numeric characters which identifies the contract-obligation within the agency. All contract/obligation numbers must be unique by agency. If two contract/obligation numbers are identical, the second will be rejected by the system. For multi-year contracts the original assigned contract/obligation number must remain the same for the duration of the contract. Agencies must file a Contract Obligation Document (C-23) each fiscal year throughout the remainder of the life of any multi-year contract.

(5) Transaction Date

Enter the date (month-day-year format) the obligation document is prepared for transmittal, i.e., if the preparation date is July 1, 2001, 07/01/01 is entered.

(6) Vendor Identification Number

Enter the vendor's nine-digit Federal Taxpayer's Identification Number or Governmental Unit Code (see Section 19).

(7) Legal Status

Enter the Legal Status in the appropriate block. (See Exhibit 15.20.10-F) Must correspond to status indicated on TIN certification.

(8) Contract Action

Indicate the type of contract action desired: new, to establish a contract for the present fiscal year; change, for any subsequent action to the contract on file (i.e., amend a contract, adding new appropriation account codes, etc.);

(9) Class Code. Enter 2-digit class code. (See Exhibit 15.20.10-G)

(10) Governor's Release Number

Enter the Governor's Release Number, if applicable.

(11) Vendor's Name and Address

Enter the name and address of the vendor to whom payment(s) will be made. The vendor name on the Contract Obligation Document (C-23) should be in the same configuration or format as the vendor name on the invoice-voucher. See SAMS Procedure 19.10.30 for guidelines on the structure of vendor names.

(12) Appropriation Account Code

Enter the 16-digit appropriation account code to which the proposed expenditure is to be charged. If more than one appropriation account code pertains to the same obligation, each appropriation account code must be listed on the form.

(13) Obligation Amount

Enter the amount (up to 10 digits) of the obligation to be paid from each appropriation account code cited. When establishing an obligation for operational expenditure authority accounts which require full obligation (See Section 11), the total transaction amount must equal the total amount of the contract. For an increase or decrease to an obligation, enter only the amount of the contract amendment.

(14) Multiple Year Contract (if applicable)

Enter the beginning and ending dates of those contracts entered into for more than one fiscal year (month-day-year format). Please note that whenever a multi-year contract for equipment (where title may pass to the lessee) is filed with the Comptroller's Office, an Accounting for Leases-Lessee form (SCO-560) must be mailed to the Financial Reporting section at the IOC, provided the fair market value of the asset being leased is greater than \$5,000. This applies to all contracts with a type code of 38 or 39 and some contracts with a type code of 31. For further information see SAMS Procedure 27.20.60.

(15) Maximum Contract Amount

Enter the total of current and future year amounts reported in SAMS for the obligation.

(16) Current Fiscal Year of Contract

Enter the beginning and ending dates of the contracts pertaining to the current fiscal year.

(17) Annual Contract Amount

Enter the total amount payable under this contract for the current fiscal year, including reimbursement expenses, if applicable. Obligated amounts for estimated contracts should reflect the total estimated amount for the current fiscal period.

(18) Multiple Year Contract Amounts

Enter the dollar amount payable for each subsequent year 2 through 7. In the event the contract extends beyond 7 years the cumulative dollar amount for years 7 and over should be entered in year 7. After the first year of a multiple year contract, all subsequent fiscal years are moved forward one block, i.e., the amount to be paid for the second year is entered in the annual contract amount block, the amount to be paid for the third fiscal year is entered in the second year's block, etc. Again, these data fields must reflect the current and future fiscal years' liabilities of the contracts.

(19) Description

Enter a reasonably detailed description of the contract or lease which must include items such as:

- type of service to be rendered
- items being leased, etc.
- where service is received
- real property shall include location of property (square footage, address and county)

NOTE: Subsequent fiscal year filings of multiple year contracts must contain a complete description as originally filed to include the prior year's obligation/contract number. DO NOT use just "Reference back to Contract" as a description.

(20) Method of Compensation

Enter the rate and unit of measurement upon which payments will be based, e.g., \$35.00 per HR (hour). If multiple rates apply, enter "00" in rate field and MR in "time" field and attach a rate sheet. DO NOT merely reference a rate sheet as a method of compensation. The rate sheet must be attached.

Description

Decrease legal services contract and obligation from \$11,500 to \$10,500 for this account code.

BASED ON THE ORIGINAL ESTABLISHMENT EXAMPLE: This reflects a negative amendment to a previously existing contract and obligation for a Professional and Artistic Contract (type code of 21). NOTE that this does not change the amount obligated from the other account code listed on the establishment, but does alter the contract amount. If any other aspects of the original contact/obligation were changed - such as rate per hour, or contract term - these items too should be attached to this form.

NOTE: When an original contract is amended, a copy of any or all contract amendments should be attached to this form.

SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE July 1, 2002
PROCEDURE	PROCUREMENT/PURCHASE ORDER REQUIREMENTS	REVISION NUMBER 03-001

PROCUREMENT REQUIREMENTS

Procurement requirements are for those items which are, by their nature, commodities, equipment, or printing items, regardless of the appropriation from which they are to be purchased.

Agencies required to utilize the Department of Central Management Services for procurement transactions must submit the proper forms through that agency. This includes supplies, equipment, materials, and repair parts purchased from an appropriation for "contractual services" in connection with the repair or maintenance of real property and equipment.

The Department of Central Management Services will then submit the proper purchasing documents directly to the Comptroller for the obligation of the agency's appropriation.

In certain cases the entity may not be able to determine the freight amount of the obligation when it is incurred. You may 00 the freight charge in block 22 of the voucher.

Procurement transaction amendments must be submitted to the Department of Central Management Services on the proper forms.

No increases or decreases will be allowed if such changes alter the terms and conditions of an order established by DCMS unless approved by the appropriate DCMS procurement office.

Any type of amendment to printing orders must go through the Department of Central Management Services regardless of dollar amount.

Agencies not required to submit procurement transactions through the Department of Central Management Services must submit their obligating document in accordance with the Comptroller's approved format.

These agencies should indicate the proper action code as discussed in the Input Requirements Subsection beginning in Procedure 15.20.10, page 2 of 10.

Multiyear contracts for tangible personal property are subject to Section 20-60 of The Illinois Procurement Code ([30 ILCS 500 et seq](#)).

Taxpayer Identification Numbers and legal status disclosures for purchase orders issued by the Department of Central Management Services (DCMS) will be obtained by DCMS.

PROCEDURE	PROCUREMENT/PURCHASE ORDER REQUIREMENTS	REVISION NUMBER 09-002

PURCHASE ORDERS (11/A), SUB-ORDERS (12/B), AND PRINTING ORDERS (13/C)

PURPOSE

State agencies shall file with the Comptroller Purchase Orders, Sub-orders, and Printing orders exceeding \$10,000.

TIMING REQUIREMENTS

Contracts must be filed with the Comptroller within 15 calendar days after execution.

DEFINITION:

This category is limited to documents involving the purchase of tangible personal property.

NOTE: The fact that an agency labels a document a purchase order does not exempt it from meeting the criteria set forth for contracts or leases, if the document pertains to a transaction that is generally evidenced by a contract or lease.

Purchase orders, sub-orders, and printing orders must contain:

- Vendor's name and address.
- Agency Name.
- Description of purchase (equipment, book, etc.) with sufficient detail as to easily determine the correctness of the appropriation charged.
- Beginning and ending dates.
- Amount to be paid.
- Signature of authorized agency representative, signature of vendor, where applicable.
- Execution date.
- Appropriation Contingency clause.
- Bid-rigging/Bid rotating certification if purchase was let for bid.

PROFESSIONAL OR ARTISTIC CONTRACTS – External Vendor (21/G)

PURPOSE

State Agencies shall file with the Comptroller Professional or Artistic contracts exceeding \$10,000.

TIMING REQUIREMENTS

Contracts must be filed with the Comptroller within 15 calendar days after execution.

DEFINITION

Professional or artistic services means those services provided under contract to a State agency by a person or business, acting as an independent contractor, qualified by education, experience, and technical ability.

Examples of professional or artistic services are set forth in SAMS Procedure 15.20.70, type code 21. Professional services include but are not limited to those services which when vouchered will cite detail objects 1241, 1242, 1244, and 1245, in certain circumstances 1246, 1269 and also certain detail objects within the 4400, 6600 and 7700 major objects of appropriation.

CONTENTS

The professional or artistic contract must be a written two-party signed document if it exceeds \$10,000. The contract shall be legible and contain the following information:

- Contractor's full name and address.
- Agency name.
- Reasonably detailed description of services to be rendered.
- The contract term, where applicable.
- Payment rates, where applicable.
- The maximum or estimated amount to be paid, if applicable.

LEASES FOR REAL PROPERTY (31/O)

PURPOSE

State agencies shall file leases for real property exceeding \$10,000 with the Comptroller.

TIMING REQUIREMENTS

Leases for real property must be filed with the Comptroller within 15 calendar days after execution. "Execution" is defined as the affixing of the authorized signatures of the proper state authorities and the owner or authorized agent of the property.

DEFINITION

This category includes all lease agreements for the rental of real property or capital improvements, including office and storage space, buildings, and other facilities for State agencies.

DISTRIBUTION

Leases for real property that are filed with the Comptroller must be individually obligated. The Contract Obligation Document must be used to establish the obligation. In addition, a legible copy of the lease must be attached securely to the form when the obligation is submitted. Leases for real property are subject to the provisions of Section 9 of "An Act in Relation to State Finance," ([30 ILCS 105/9](#)).

CONTENTS

The lease must be legible, signed by the proper State authorities and the owner of the property or his authorized agent. It must include:

SECTION	OBLIGATIONS	PROCEDURE - PAGE NO. 15.20.41 1 of 4
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE July 1, 2008
PROCEDURE	REAL PROPERTY LEASE PURCHASES – LESSEE DISCLOSURE DOCUMENT	REVISION NUMBER NEW

Real Property Lease Purchases-Lessee Disclosure Document (Form C-15-A)

In addition to the lease filing requirements in SAMS Procedure 15.20.40, agencies must also file a Real Property Lease Purchases- Lessee Disclosure Document (Exhibit 15.20.41-A) each time a multi-year real property lease/installment purchase agreement is initiated. The purpose of this form is to provide information concerning multi-year real property leases/installment purchases that do/may transfer title (ownership) of the asset to the lessee. See SAMS Procedure 27.20.60 for requirements, and complete Form SCO-560 as needed. Submission of this document will ensure that such financing relationships are accounted for as "capital transactions" in accordance with Generally Accepted Accounting Principles.

GENERAL

This form should be completed in all instances where real property is being purchased through multi-year lease and installment purchase agreements. These are agreements where the substance of the transaction may result in a purchase regardless if title passes at the beginning of the agreement, the end of the agreement, or by means of a bargain purchase option at a time(s) specified in the agreement.

INSTRUCTIONS

Each time an agency enters into a lease or installment purchase agreement that results in ownership of real property, a Real Property Lease Purchases-Lessee Disclosure Document must be completed. Also, attach an update of this document to each annual re-establishment of the obligation.

For those agencies that must obtain the approval of the Department of Central Management Services (DCMS) before an agreement can be finalized, the completed form must be attached to each real property multi-year lease purchase agreement submitted to DCMS for its review. DCMS will verify and approve the form as part of the transaction authorization process and will transmit one copy of the form to the Comptroller's Office Financial Reporting Department. The original and one copy of the document will be returned to the agency by DCMS. Agencies should submit the original copy of the form to the Comptroller's Office along with the Contract Obligation Document (C-23) and retain the copy as an internal record.

Note that the DCMS authorization section of this form does not require completion for annual re-establishments of the obligation unless a contract renewal or change has occurred.

For those agencies that do not submit their agreements to DCMS for approval, the original portion of the completed document should be submitted to the Comptroller's Office along with the C-23 Form (Contract Obligation Document). The agency must retain two copies as an internal record and send the remaining copy to:

Office of the Comptroller
Financial Reporting Department
325 West Adams Street
Springfield, Illinois 62704

The information provided on the form will be examined by the Comptroller's Office and agencies will be contacted concerning the proper asset value that should be reported on their "Agency Report of State Property" (C-15 Form) and their "Capital Asset Summary" (SCO-538 Form). This procedure will ensure that assets are correctly reflected on the State and agency's financial statements.

CONTENTS

Refer to Exhibit 15.20.41-B.

REFERENCE

CONTENTS

- 1 Enter the three digits Comptroller assigned lessee agency number.
- 2 Enter the contract/obligation number of the real property lease.
- 3 Indicate with an "X" the type of real property lease. This document need only be completed for real property leases which transfer or have the potential for transfer of title. The following lease types either transfer title or have the potential for transfer of title:

Lease Purchase - Title to the real property passes at the end of the lease or with a nominal payment amount.

Lease with Option to Purchase - The contract has a clause stipulating the lessee's ability to purchase the property.

Installment Purchase - Title to the real property passes at the beginning of the lease.
- 4 Enter the last two digits of the current fiscal year. In the initial year of the contract this date will match the inception date (see **5** below). In subsequent years, the fiscal year will match the fiscal year indicated on the contract obligation document to which this form is to be attached.
- 5 Enter the original inception date of this real property lease. If this lease is a renewal, the original inception date would be the beginning date of the first contract, not the renewal.
- 6 Indicate the type of contract action desired: **new**, to establish a contract for the present fiscal year; **change**, for any subsequent action to the contract on file (i.e., amend or cancel a contract, adding new appropriation account codes, etc.) or, **renew** (for the renewal of a previous contract). Note that this section should be left blank on annual re-establishments of the obligation unless there was a contract renewal or change.

- 7 Enter the 16-digit expenditure authority account to which the proposed expenditure is to be charged. If more than one appropriation account code pertains to the same obligation, each account code must be listed on the form.
- 8 Enter the date, if known, that title is expected to transfer to the lessee.
- 9 Enter the name and address of the vendor to whom payments will be made.
- 10 Enter a reasonably detailed description of the lease which must include the location of property leased (address and county) and the square footage.
- 11 Enter the name of the individual from the originating agency who prepared this document.
- 12 Enter the originating agency name.
- 13 Enter the phone number of the individual preparing this document.
- 14 Enter the date this document was prepared.

Items 15, 16, and 17 should be completed only by agencies that require Department of Central Management System authorization. This section does not require completion for annual re-establishments of the obligation when no contract renewal or change has occurred.

- 15 Enter the name of the individual from the Department of Central Management Services who authorized this document.
- 16 Enter the phone number of the individual authorizing the document.
- 17 Enter the date of the authorization.

OTHER CONTRACT LIABILITIES – External Vendor (28/K)

PURPOSE

State Agencies shall file with the Comptroller all contract liabilities exceeding \$10,000, except for personal services and contracts between the State and its employees to defer compensation.

TIMING REQUIREMENTS

Contracts must be filed with the Comptroller within 15 calendar days after execution.

DEFINITION AND DISTRIBUTION

Included in this category would be contracts for pre-arranged services (other than professional or artistic), equipment leases, maintenance agreements, and other purchases of services which exceed \$10,000.

All agencies should submit the above listed types of contract liabilities directly to the Comptroller. In the case of procurement transactions, the Department of Central Management Services will automatically send the Comptroller's copy of the agencies' procurement documents to the Comptroller, where the document will be used to establish the respective obligations.

CONTENTS

Contracts for other than tangible personal property should be assigned unique contract numbers by the agency, obligated on Contract Obligation Documents, and supported by documentation which must include:

- Vendor name and address.
- Agency name.

SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2011
PROCEDURE	RENEWALS, AMENDMENTS OR TERMINATIONS	REVISION NUMBER 11-002

RENEWALS, AMENDMENTS OR TERMINATIONS

PURPOSE

State Agencies shall file all renewals or amendments of any contract liability on file with the Comptroller.

TIMING

Such renewals or amendments must be filed within 15 calendar days after execution.

REQUIREMENTS

Renewals or amendments must be two-party signed agreements, unless otherwise provided in the original contract. For example, if an existing contract is to be renewed for the next fiscal year, the renewal must be in writing and signed by both parties, unless the contract gives the State the right to renew unilaterally. All renewals or amendments must be filed with the Comptroller.

All modifications (including, but not limited to, extensions and renewals) to a contract must be executed prior to the ending date of the contract. Failure to properly execute a modification prior to the ending date of the contract will require the agency to initiate a new contract.

If both parties do not agree to the modification prior to the ending date of the contract, the contract is expired per its terms and may not be modified.

If both parties agreed to the modification prior to the ending date of the contract but failed to reduce it to writing prior to the ending date of the contract, the following provisions will come into effect. The Comptroller's Office may accept modifications if the following conditions are met:

1. The modification was in compliance with provisions of the original contract.

2. Both parties agreed to the modification prior to the ending date of the contract but failed to reduce it to writing prior to the ending date of the contract.
3. The individual who signed the original contract for the Vendor (or their successor) completes and signs an affidavit containing:
 - a. A statement that the modification was agreed to by both parties prior to the ending date of the contract.
 - b. A detailed explanation of why this modification was not reduced to writing prior to the ending date of the contract.
4. The individual who signed the original contract for the Agency (or their successor) completes and signs an affidavit containing:
 - a. A statement that the modification was agreed to by both parties prior to the ending date of the contract.
 - b. A detailed explanation of why this modification was not reduced to writing prior to the ending date of the contract.
5. A notary signature and seal.
6. One original of each affidavit.

Renewals and amendments to extend a contract term must include all required contract certifications that have been enacted since the original filing of the agreement.

PROCEDURE	LIQUIDATING AN OBLIGATION	REVISION NUMBER 00-001

LIQUIDATING AN OBLIGATION

A liquidation is the reduction of an obligation or liability, either in part or in its entirety, through an expenditure. An agency obligation is liquidated by submitting a voucher for processing by the Comptroller. The voucher must identify the obligation to be liquidated and the corresponding payment amount related to the obligation.

Exhibit 15.20.90-A illustrates how an invoice-voucher should be completed to liquidate an outstanding obligation. Completing the obligation section of the voucher requires four steps:

In area 10 (on the first line only) enter services dates and four digit GAAP Code.

In area (22) enter the obligation number. If no obligation is to be liquidated, "00" must be entered.

In area (24) enter the payment amount related to each obligation and each unobligated expenditure.

In area (25) enter the sum of (24).

CONTRACT SIGNATURE CARD (FORM SCO-470)

PURPOSE

The Contract Signature Card (Exhibit 15.20.95-A & B) is used by State employees to provide specimen signatures to the Comptroller for persons authorized to sign the agency head approval line on contracts, interagency agreements, purchase orders, grants or leases (hereafter referred to as contracts). The card is also prepared for individuals authorized to affix the signature of the agency head on the contract's agency head line, such as with a signature machine.

TIMING REQUIREMENTS

Frequency of submission of a new Contract Signature Card is dependent upon when the use of a signature is authorized or the period for which the signature was valid has lapsed. Agencies **must** notify the Comptroller by memorandum when a Contract Signature Card, which is on file, should be revoked.

CONTENTS

Refer to Exhibit 15.20.95-A & B.

REFERENCE

CONTENTS

Line 1	Type the three-digit agency code.
Line 2	Type the agency name.
Line 3	Type the name of either the agency head or, if the card represents a delegation of authority to sign or affix the signature of the agency head, the name of the person to whom the authority has been delegated.

AGENCY CONTRACT REPORT (SC 14)

PURPOSE

Implementing Section 19 of the State Comptroller Act, the Comptroller's Agency Contract Report (Exhibit 15.30.10-A) is a listing of all professional or artistic contracts, leases for real property, other contract leases, and construction and other contractual service agreements filed by State agencies to satisfy the requirements of Section 7 of the State Comptroller Act, Section 20-80 of The [Illinois Procurement Code](#) and Section 9 of the [State Finance Act](#). The report is available for public inspection at the Comptroller's Office.

SEQUENCE

The report is arranged in seven sections for each agency: procurement, professional or artistic contracts, construction, financial assistance (grants), other contractual services, leases for real property and other leases. Each section is arranged by contract or lease number within the agency.

All entries in each section show the vendor name, a brief description of services to be performed (or in the case of leases, a description and location of the property), the contract terms, the contract amount, and the terms of payment. A more detailed section as reflected in Exhibit 15.30.10-A.

The Agency Contract Report is cumulative for the fiscal year, and reflects all contracts for an agency regardless of the status (i.e., open, paid, terminated, or canceled).

FREQUENCY

The Agency Contract Report is distributed monthly to all State agencies having contracts on file with the Comptroller. Each agency is required to reconcile the information and report any discrepancies to the Comptroller.

Agencies with access to SAMS automated records, may perform alternate reconciliation methods.

REPORT TITLE: Obligations Activity Report (SC 15)

PURPOSE: The Obligations Activity Report is provided for all agencies at the close of each month. The report is a listing of all obligation related transactions processed during the month. The activity report contains the following at the detail level for each current obligation on file: establishments, increases, decreases, cancellations, voucher liquidations, and corrective action requested by the agency. It also contains information at the summary level for each expenditure authority account having obligation activity. The monthly Obligations Activity Report provides each agency with the information necessary for reconciling its internal records with those of the Comptroller.

The reconciling agency should notify the Comptroller's Office immediately of any discrepancies that require corrective action. (See procedure 15.30.30 for detailed instructions.)

Performing monthly reconciliation will ensure the accuracy of the agencies' internal records and the information processed by the Comptroller's Office. Agencies with access to SAMS automated records may perform alternate reconciliation methods.

PROCEDURE	CONTRACT AND OBLIGATION RECONCILIATION	REVISION NUMBER 10-001

CONTRACT AND OBLIGATION RECONCILIATION

The Agency Contract Report and the Obligation Activity Report must be reconciled before the next monthly cycle. It is the responsibility of each agency to compare the information contained on these reports to their own internal records. Agencies with access to SAMS automated records, may perform alternate reconciliation methods. Once the reconciling items have been identified, the discrepancies should be reported to the Comptroller's Office immediately for correction.

This ensures the accuracy of the agency's internal records and the information recorded by the Comptroller. The reconciliation of these reports also avoids delays in processing of Obligations/Contracts and voucher payments that would otherwise be rejected due to errors in our respective files. There are two standardized forms to expedite the reconciliation process: Expenditure Transfer Request form (SCO-415) and the Obligation Reconciliation Notice (C-80-A).

Expenditure Transfer Request (SCO-415) (Exhibit 15.30.30-A)

The Expenditure Transfer Request must be submitted to the Funds and Appropriations Accounting Section of the Comptroller's Office in the event a voucher transaction is charged to the wrong expenditure account. The completion of the obligation information on this form will allow the corrective action to be taken in regards to the obligation WITHOUT SEPARATE NOTIFICATION TO THE OBLIGATIONS SECTION. This form must be utilized when the adjustment involves an expenditure authority account code change. Refer to SAMS Procedure 11.40.30 for instructions on completing the Expenditure Transfer Request form.

Obligation Reconciliation Notice (C-80-A) (Exhibit 15.30.30-B and Exhibit 15.30.30-C)

This form is used by the agency to identify discrepancies and refunds which require corrective action to be taken by the Comptroller's Office. (For examples of possible errors, see page 3 of this procedure.) The request for correction(s) for obligation reconciliation is made by completing blanks (1) thru (12) and (20) thru (24). For Obligation refunds, complete blanks (1) thru (4) and (13) thru (24). Attach legible copies of vouchers or other necessary documentation. Do not include "in-transit" items on this form. This form is to be ONLY for voucher transactions charged to a wrong obligation within an expenditure authority account. For expenditure transfers involving obligations, see Exhibit 15.30.30-A.

INTRODUCTION

The vouchering functionality within SAMS provides for the audit of vouchers to determine the validity of each claim for payment, and it serves as the source of data relating to vouchering that is recorded on the General Ledger. This first subsection, the Overview, describes the general system flow, system controls, statutory requirements and the general input/output requirements associated with Pre-Audit and Commercial Vouchering. The following subsections deal in detail with preparation of source documents and handling of output reports.

PROCEDURE	VOUCHER CYCLE	REVISION NUMBER 10-002

VOUCHER CYCLE

The voucher cycle begins in each agency with the preparation of any several possible vouchering forms as described in a subsequent subsection. When these forms are completed, they are assigned unique voucher numbers.

The vouchers are then recorded in the agency's accounting system. Following the recording, the vouchers are presented to the agency official who is responsible for voucher approval and certification or a designated representative. If paperless vouchers are being submitted, the Agency Tape Balancing Report is submitted in lieu of the individual vouchers. When signed, the document authorizes the Comptroller to order payment.

At this point the agency forwards the vouchers to the next responsible review organization.

Note: Travel (C-10), petty cash, deceased employee death benefits (30 ILCS 105/14a), and fixed charge vouchers (30 ILCS 105/11) cannot be submitted paperless.

The following vouchers are fixed charges:

- (1) local improvements special assessments, certified by the Attorney General;
- (2) conveying convicts to the penitentiary or reform school, certified by the sheriff performing such service;
- (3) conveying juvenile female offenders to the State Training School for Girls, and for conveying delinquent boys to the Illinois State Training School for Boys, certified by the person or officer performing such service;
- (4) the apprehension and delivery of fugitives from justice, certified by the Governor;
- (5) rewards for arrest of fugitives from justice, certified by the Governor;
- (6) the expenses of the transfer of insane persons to the Illinois Security Hospital, either from any of the other State institutions, or upon the order of mittimus of any of the several courts, certified by the person performing such service; and

- (7) compensation for diseased animals condemned and destroyed by the State, certified by the Director of Agriculture.

Vouchers not subject to further review are forwarded directly to the Comptroller by the last review agency. In cases when the transactions are submitted electronically, the information transmitted to the Comptroller consists of:

- Electronic Media File (tape or cartridge)
- Magnetic Tape Transmittal Control Slips
- Voucher Forms if required
- Agency Tape Balance Report

Upon receipt of error-free payment requests, the Comptroller authorizes payment.

In order to prevent erroneous payments and comply with Section 9 of the Comptroller Act, all payment requests received will undergo a pre-audit by the Comptroller. However, as stated in the Comptroller Act, the existence of pre-audits by the Comptroller "does not affect the duty and responsibility of State agencies to pre-audit their encumbrances, expenditures and other transactions as otherwise required by law." All payment requests failing the Comptroller's pre-audit are returned to the transmitting agency for correction. Upon receipt of error free vouchers, the Comptroller authorizes payment through issuance of a warrant.

Operating in a Paperless Environment

In a paperless environment, state agencies interact with the Comptroller's Office through electronic media. One of the benefits of a paperless environment is that agencies are relieved of submitting paper documentation to the Comptroller's Office to support their transactions.

State agencies must maintain all supporting documentation necessary to substantiate their encumbrances, expenditures and other transactions. Although paper is no longer submitted to the Comptroller's Office in all transactions, individual agencies are still responsible for maintaining supporting documentation as if the transaction was submitted on paper.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2010
PROCEDURE	SYSTEM CONTROLS	REVISION NUMBER 10-002

SYSTEM CONTROLS

The primary system control associated with the vouchering process is known as pre-audit. Pre-audit is defined as the examination of a proposed financial transaction or a transaction in process for the purpose of determining its propriety. Pre-audit is conducted at two levels, agency and Comptroller. All vouchers are first pre-audited at the agency level. Agency level pre-auditing is defined as an examination by the agency head or designated individual for the purpose of determining the legality and propriety of a proposed transaction or a transaction in process. By affixing the signature to a voucher or agency tape balancing report for paperless transactions, the agency official responsible for voucher approval or a duly authorized representative certifies that the voucher meets the above requirement. The second level of pre-auditing occurs in the Office of the Comptroller. Comptroller-level pre-auditing is defined as an examination by the Comptroller of a transaction in process for the purpose of determining its legality and regularity.

The first of the Comptroller's pre-audits involves checking all vouchers or agency tape balancing report for approval by an agency official or representative. This signature validation process requires the signature to be on file; therefore, prior to the acceptance of any voucher or agency tape balancing report as certified and authorizing payment, a Signature Card, shown in Exhibit 17.20.65-A, must be completed and sent to the Office of the Comptroller in accordance with Section 9.02 of the Finance Act. A Confirmation of Authorized Signatures, Exhibit 17.30.30-A, is periodically produced and sent to agencies for signature cards on file in the Office of the Comptroller.

When voucher transactions are submitted on electronic media, a balancing routine is performed on the file. If the file fails any of the edits, the entire file will be rejected and returned to the transmitting agency. When the transmitting agency receives notice of a rejected file, the agency should correct the original data on their system and submit a corrected file for processing.

The Comptroller's subsequent pre-audits are performed at the transaction level. Those vouchers which fail the transaction pre-audits (for which the error cannot be corrected by contacting the agency) will be returned to the transmitting agency with a Delete Document Report (Exhibit 17.30.20-A) describing the error(s) encountered.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2010
PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 10-002

DOCUMENT DESCRIPTION

The documents associated with the vouchering functionality within SAMS may be categorized as either source documents or output reports. Following is a brief description of the documents found in each category. Detailed document descriptions, associated preparation instructions and handling procedures are located in subsections 20 and 30.

SOURCE DOCUMENTS

1. Vouchers

A voucher is a document which, when properly approved and certified, authorizes the Comptroller to order payment. Following is a brief description of each type of voucher processed in SAMS.

A. Travel Voucher, C-10 (Exhibit 17.20.10-A)

The Travel Voucher is used by State employees, wards of the State, charges of the State, and contractual employees to claim reimbursement for official business related travel expenses. These vouchers cannot be submitted paperless. Its primary data elements are itemized claims for expenses incurred during official business related travel.

B. Invoice-Voucher, C-13 (Exhibit 17.20.20-A)

The Invoice-Voucher is used for all requests for payments except Personal Services and Travel. Its primary data elements are beginning and ending service dates, GAAP function code, detailed descriptions of articles and services rendered, and the liquidation and expenditure data associated with the transaction.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2010
PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 10-002

C. Paperless Voucher

The Paperless Voucher is used to request a payment to a vendor without completing an Invoice-voucher. The primary data elements for a paperless voucher are the same as an invoice-voucher. Travel (C-10), petty cash, fixed charge vouchers (30 ILCS 105/11), and deceased employee death benefits (30 ILCS 105/14a) cannot be submitted paperless.

2. Agency Tape Balance Report (Exhibit 17.20.60-A)

An Agency Tape Balance Report is a computer generated balance report which is forwarded to the Comptroller with each commercial voucher tape. The report must contain the contents of the Header Record, each Schedule Record, and the Trailer Record in a labeled and clearly defined format. The Agency Tape Balancing Report must be in the format specified in Exhibit 17.20.60-A.

3. Signature Card, SCO-095 (Exhibit 17.20.65-A)

The Signature Card is used to provide specimen signatures to the Comptroller for persons authorized to sign the agency head approval line on vouchers or the agency tape balancing report. The card is also prepared for individuals authorized to affix the signature of the agency head on the voucher's "agency head line" such as with a signature machine.

4. Magnetic Tape Transmittal Control Slip (Exhibit 17.20.70-A)

A Magnetic Tape Transmittal Control Slip is a control document used to transmit an automated voucher file and its accompanying hard copy documents to the Comptroller. Its principal data elements are the name, address and phone number of the transmitting agency, tape reel number, tape control totals, tape identifier and the number of batches of hard copy documents accompanying the tape reel. A Magnetic Tape Transmittal Control Slip is attached to each reel before it is sent to the Comptroller. Then the tape, Magnetic Tape Transmittal Control Slip, Agency Tape Balance Report and associated batch of documents are forwarded to the Comptroller.

OUTPUT REPORTS

1. Agency Delete Document Report (Exhibit 17.30.20-A)

The Delete Document Report is a list of all vouchers with an error condition that has been deleted by the Illinois Office of the Comptroller for return to the agency.

2. PV Modifications Document (Exhibit 17.30.15-A)

The PV Modification Document is used by an agency to notify the Illinois Office of the Comptroller of the change to be made to correct an error condition on a voucher.

3. Confirmation of Authorized Signatures (Exhibit 17.30.30-A)

The Confirmation of Authorized Signatures is a periodic report used to confirm the Comptroller's listing of individuals authorized to approve vouchers and the types of vouchers each individual may approve. The agency is responsible for checking the report to ensure that the listing is correct. After any corrections are noted, the report should be signed by the agency head and return to the Office of the Comptroller.

PROCEDURE	STATUTE STATEMENT	REVISION NUMBER 11-001

STATUTE STATEMENT

The Comptroller Act prescribes the functions of the Office of the Comptroller. The statutes provide guidance on what and to some degree how the Office of the Comptroller is to accomplish the tasks it is authorized to perform.

Those sections of the State Comptroller Act of particular interest to vouchering are:

Section 9 of the State Comptroller Act, ([15 ILCS 405/9](#)) provides:

- (a) “No payment may be made from public funds held by the State Treasurer in or outside of the State treasury, except by warrant drawn by the Comptroller and presented by him to the Treasurer to be countersigned except for payments made pursuant to Section 9.03 or 9.05 of this Act.
- (b) No warrant for the payment of money by the State Treasurer may be drawn by the Comptroller without the presentation of itemized vouchers indicating that the obligation or expenditure is pursuant to law and authorized, and authorizing the Comptroller to order payment.
- (c) The Comptroller shall examine each voucher required by law to be filed with him and determine whether unencumbered appropriations or unencumbered obligational or expenditure authority other than by appropriation are legally available to incur the obligation or to make the expenditure of public funds. If he determines that unencumbered appropriations or other obligational or expenditure authority are not available from which to incur the obligation or make the expenditure, the Comptroller shall refuse to draw a warrant.
- (d) The Comptroller shall examine each voucher and all other documentation required to accompany the voucher, and shall ascertain whether the voucher and documentation meet all requirements established by or pursuant to law. If the Comptroller determines that the voucher and documentation do not meet applicable requirements established by or pursuant to law, he shall refuse to draw a warrant. As used in this Section, 'requirements established by or pursuant to law' includes statutory enactments and

requirements established by rules and regulations adopted pursuant to this Act.

- (e) Prior to drawing a warrant, the Comptroller may review the voucher, any documentation accompanying the voucher, and any other documentation related to the transaction on file with him, and determine if the transaction is in accordance with the law. If based on his review the Comptroller has reason to believe that such transaction is not in accordance with the law, he shall refuse to draw a warrant.
- (f) Where the Comptroller refuses to draw a warrant pursuant to this Section, he shall maintain separate records of such transactions.
- (g) State agencies shall have the principal responsibility for the pre-audit of their encumbrances, expenditures, and other transactions as otherwise required by law.”

Section 9.03 of the State Comptroller Act, ([15 ILCS 405/9.03](#)) provides:

“The Comptroller, with the approval of the State Treasurer, may provide by rule or regulation for the direct deposit of any payment lawfully payable from the State Treasury and in accordance with federal banking regulations. . . . in the accounts of those persons or entities maintained at a bank, savings and loan association, or credit union, where authorized by the payee.”

Section 10.17 of the State Comptroller Act, ([15 ILCS 405/10.17](#)) provides:

“Section 10.17. Refusal to draw warrant. Whenever the Comptroller shall refuse to draw a warrant pursuant to any voucher, the Comptroller shall notify the submitting agency of the reason for the refusal and shall retain a record of the disapproved voucher. If the agency receiving the statement is not the originating agency, it shall transmit such information within 3 days to the originating agency.”

Section 14 of the State Comptroller Act, ([15 ILCS 405/14](#)) provides:

“The Comptroller may prescribe, and require State agencies to use forms for all documents required by law in the performance of his duties or which he may reasonably require therefor. The Comptroller

may prescribe by rule the general nature of information to be contained in contracts required to be filed with him under Sections 11 and 15 of this Act. Any such rule shall be adopted, amended or repealed as provided by the Administrative Procedure Act. The Comptroller may, when he deems it advisable for the promotion of efficiency in State government, accept magnetic tape vouchers, electronically submitted vouchers, and computer output microfiche vouchers. The Comptroller shall process such vouchers as provided in Section 9. These vouchers shall be subject to conditions and requirements established by the Comptroller. Computer output microfiche vouchers shall be deemed original records under the Comptroller's Records Act."

Section 9.02(b) of "An Act in relation to State Finance," ([30 ILCS 105/9.02](#)) provides in part:

- (b) (1) "Every voucher, as submitted by the agency or office in which it originates, shall bear (1) the signature of the officer responsible for approving and certifying vouchers under this Act and (2) if authority to sign the responsible officer's name has been properly delegated, also the signature of the person actually signing the voucher.
- (2) When an officer delegates authority to approve and certify vouchers, he shall send a copy of such authorization containing the signature of the person to whom delegation is made to each office that checks or approves such vouchers and to the State Comptroller. Such delegation may be general or limited. If the delegation is limited, the authorization shall designate the particular types of vouchers that the person is authorized to approve and certify.
- (3) When any delegation of authority hereunder is revoked, a copy of the revocation of authority shall be sent to the Comptroller and to each office to which a copy of the authorization was sent.

The Comptroller may require State agencies to maintain signature documents and records of delegations of voucher signature authority and revocations of those delegations, instead of transmitting those documents to the Comptroller. The Comptroller may inspect such documents and records at any time.

- (c) The Comptroller may authorize the submissions of vouchers through electronic transmissions, on magnetic tape, or otherwise."

Section 9.04 of “An Act in relation to State finance,” ([30 ILCS 105/9.04](#)) states:

“The certification on behalf of the State agency on every State voucher for goods and services other than a payroll or travel voucher shall be as follows:

I certify that the goods or services specified on this voucher were for the use of this agency and that the expenditure for such goods or services was authorized and lawfully incurred; that such goods or services meet all the required standards set forth in the purchase agreement or contract to which this voucher relates; and that the amount shown on this voucher is correct and is approved for payment. If applicable, the reporting requirements of Section 5.1 of the Governor’s Office of Management and Budget Act have been met.

For departments under the Civil Administrative Code, the foregoing certification shall be executed by the Chief Executive Officer of the department from whose appropriation the payment will be made or his designee, in addition to any other certifications or approvals which may be required by law.”

Section 9.05 of “An Act in relation to State finance,” ([30 ILCS 105/9.05](#)) states:

“In the event that a voucher is submitted for advance payment of goods or services, the certification prescribed by Section 9.04 shall be made. In addition, the voucher shall state on its face that the goods or services are being procured pursuant to a formal, written contract the terms of which require advance payment. If it is not possible to execute a written contract, the voucher shall so state. The voucher shall also state that the contract requires the goods or services to be delivered or received prior to the expiration of the lapse period of the fiscal year to which the expenditures are charged, provided however, that such a statement shall not be required on vouchers submitted for periodical subscriptions or organizational memberships.”

Vouchers for advance payments must comply with this provision. A sample statement is set forth below:

“The goods or services specified on this voucher were procured pursuant to a formal, written contract the terms of which require advance payment. The contract requires the goods or services to be received or delivered as of August 31 of the current fiscal year. Services which involve professional or artistic skills or any personal services of a contractual employee will be performed as of June 30 of the current fiscal year.”

If it is not possible to execute a written contract, the following statement may be used for vouchers submitted for advance payment:

“It was not possible to execute a written contract for the goods or services specified on this voucher. It is anticipated that the goods or services will be received or delivered as of August 31 of the current fiscal year. fails to comply with the State Prompt Payment Act, 30 ILCS 540." The current Travel Voucher includes this statement in the upper left corner under the distribution listing. (See Exhibit 17.20.10-A) When using an older version of the Travel Voucher, agencies must stamp, print or type this statement on the Traveler's copy of the voucher.

- Box 3 Enter the number assigned to this voucher. Voucher numbers are restricted to 8 characters. The voucher number must be unique for an agency within a fiscal year.
- Box 4 Enter the date on which the vouchers were batched.
- Box 5 Enter the 16-digit appropriation (or non-appropriated) account code number in box 5. The number must be entered as follows: xxx-xxxx-xxxx-xx-xx (i.e., fund-organization-object of appropriation-sequence-account type).
- Column 18 Determine the charges applicable to In-State and Out-of-State contractual travel (1264) In-State travel (1291) and Out-of-State travel (1292). Out-of-State charges are derived based on travel regulations.
- Column 19 Enter the proper amounts based on the determination made above.
- Column 20 Enter the appropriate Catalog of Federal Domestic Assistance (CFDA) number, if applicable.
- Box 28 Add all entries in column 19 and enter the sum in box 28.

In determining the charges applicable to In-State and Out-of-State travel (Box 18), please note that unless official business is conducted during an in-state layover all costs must be charged to out-of-state travel. If official business is conducted then costs related to that business (i.e., taxis, per diem reimbursements) should be charged to in-state travel.

Verify that the arithmetic is accurate, check that all charges are allowed under applicable Travel Regulations, and that all items requiring receipts have proper receipts attached. During the lapse period (July and August) identify the proper fiscal year in the upper right hand corner above box 3.

INVOICE-VOUCHER (Form C-13)

PURPOSE

The Invoice-Voucher (Exhibit 17.20.20-A) may be used for requests of payment for goods or services.

TIMING REQUIREMENTS

Upon receipt of goods or services, the receiving officer verifies that the goods or services meet the stated specifications, signs the Vendor's invoice certifying this, and forwards the Vendor's invoice to the accounting department for preparation of the Invoice-voucher.

DISTRIBUTION

Copies are distributed as follows:

- The Comptroller requires the original copy of the Invoice-Voucher.
- A copy may be mailed with the warrant to the vendor. If required, the remittance copy must be tri-folded equally so that the Vendor/Payee Box is visible in the Comptroller's window envelope (Form SCO-100R). All additional backup material accompanying the remittance copy to be mailed to the vendor/payee should be attached to the back of the folded remittance copy. The material should not be folded within the remittance copy. The tri-folded copy should be attached by a **single** staple to the Original Copy retained by the Comptroller's Office.
- The number of copies required by each agency varies.

PROCEDURE	PAPERLESS VOUCHER	REVISION NUMBER 10-002

Paperless Voucher

PURPOSE

The Paperless Voucher provides the ability to request a payment to a vendor without completing an Invoice-voucher. To utilize a paperless voucher, all required information must be provided as specified in the commercial voucher file layout. (Exhibit 17.20.30-A)

TIMING REQUIREMENTS

As is the case with Invoice-Vouchers, Paperless vouchers are submitted to the Comptroller as frequently as is practical, preferably daily, in order to provide payment in a timely manner.

DISTRIBUTION

The Comptroller requires the electronic transaction and the certified Agency Tape Balancing Report to process the paperless vouchers.

Commercial Voucher Tape File

This document describes the magnetic tape file format to be used by State agencies transmitting commercial voucher information directly to the Comptroller on magnetic tape.

I. FILE CHARACTERISTICS

The Commercial Voucher Tape File is a 9-track, 1600 or 6250 bpi, or an 18-track (cartridge), 38000 bpi, odd parity, American Standard labeled magnetic media. The file should contain no tape marks. All records are 900 bytes in length with a blocking factor of 10. Numeric fields are both unpacked and unsigned except for adjustment and credit amounts on voucher addenda records. Whenever possible, submit an 18-track cartridge. The Commercial Voucher File consists of five types of records. These are:

1. **Header Record** - This record is the first data record on the magnetic tape. It is used to identify the tape, source computer type, agency, creation date, etc.
2. **Schedule Record** - The schedule record should indicate the type of processing required for the vouchers following it. All Voucher Transaction Records following a Schedule Record (pertaining to that schedule) must cite the same appropriation account code and fiscal year. Do not mix vouchers requiring different processing on the same schedule.

There may be multiple Schedule Records and related groups of Voucher Transaction /Voucher Addenda Records on a single magnetic tape.

During lapse period (July - August), schedules citing different fiscal years may NOT be mixed on a tape. Each fiscal year must be on a separate tape.

3. **Voucher Transaction Record** – Tapes should be limited to 10,000 records unless approved by the Comptroller. Each transaction record contains all the data elements needed to write a warrant or send a direct deposit transaction.

The fields labeled DIRECT DEPOSIT must be completed to send a direct deposit transaction. The fields labeled OPTIONAL are not required at this time but may be required for future transaction types.

4. **Voucher Addenda Record** – The addenda record(s) will immediately follow the voucher transaction and contain detailed remittance information related to the voucher transaction. There may be multiple addenda records for each voucher transaction record. Each addenda record must be related to the same voucher transaction. Voucher addenda records will provide remittance information electronically to the vendor. Fields on the addenda record must not contain an asterisk (*) or backslash (\). Addenda fields should be left justified and use no more than one space between characters. More than one space constitutes the end of a field. Fill unused numeric fields with zeroes, unless the last payment related data segment is not going to be used. Each addenda record contains 30 characters of control data and two 435 byte

payment related data segments. If the last segment is not used, the entire segment of 435 bytes must be spaces.

EXAMPLE: If the voucher contains five payment invoices, three addenda records would be required. The third addenda record would contain the fifth invoice in the first payment related data segment and the second segment would be initialized to spaces.

5. **Trailer Record** - This record is the last data record on the magnetic tape. It is used to provide control counts and totals for balancing the tape.

II. **FILE ORDER**

A batch consists of a Schedule Record followed by the Voucher Transaction Records and their associated Voucher Addenda Records pertaining to that Schedule Record.

Batches are to be sorted by appropriation account code number in ascending order on the tape.

Within a batch, Voucher Transaction Records followed by any associated Voucher Addenda Records are to be sorted by voucher number in ascending order.

If actual hardcopy vouchers are required to accompany the tape, they must be sorted correspondingly within a batch, and batches should be sorted in the appropriate order.

III. **APPENDICES**

Appendix 1 - defines the required data elements in the file records and the record layouts.

Appendix 2 - details the standards to be used for vendor identification number, name and address on the Voucher Transaction Record.

Appendix 3 - shows the magnetic tape transmittal control slip which is to accompany the tape.

Appendix 4 - describes the agency tape balance report which is to accompany each Commercial Voucher tape received by the Comptroller. This report replaces the requirement for individually signed vouchers.

Appendix 5 - describes the requirements for the standardized information for box 10 of the invoice voucher.

Appendix 6 - describes any Voucher Addenda Record edits and related error messages

APPENDIX 2**VENDOR IDENTIFICATION NUMBER, NAME AND ADDRESS**

The following standards should be used for providing the vendor identification number, name and address in the Voucher Transaction Record.

IRS regulations require that each vendor furnish his correct Federal Taxpayer Identification Number (TIN) to the payer. Any vendor that fails to furnish his correct TIN to an agency is subject to an IRS penalty of \$50.00 for each such failure unless the failure is due to reasonable cause and not willful neglect.

Agencies should use the Governmental Unit Code (GUC) assigned by the Comptroller's Office for payments to a governmental unit. Use the Employer Identification Number (EIN) if the vendor is a corporation, partnership, estate, or legal trust. If the vendor is an individual, the individual's Social Security Number (SSN) should be used as the taxpayer identification number. For sole proprietorships, the vendor name should be the owner of the sole proprietorship and the TIN should be the owner's SSN. An IRS Form W-9 can be used to obtain the correct name, TIN and legal status from a vendor (see SAMS Exhibit 19.10.15-A). Refer to page 2 of the IRS Form W-9 for special instructions for State of Illinois vendors.

According to IRS regulations, the TIN reported on Form 1099 for a sole proprietor can be either an SSN or EIN. However, the State must maintain one account for each vendor. The Comptroller's tax reporting system uses the TIN for this purpose; a separate account number is not assigned. For sole proprietorships, the owner's SSN is used as the account number instead of the EIN of the business because not all sole proprietorships have an EIN.

On IRS records, an SSN matches only with the name of a person. The business name of a sole proprietorship will not match an SSN or an EIN. Therefore, when the vendor is an individual or owner of a sole proprietorship, the owner's name must appear first on the payment. The owner's last name should precede the first name and middle name or initial. The "doing business as" name must follow or be entered in the "Payee Name 2" field. All names should be provided in capital letters. Do not use punctuation (i.e. periods, commas) in this field. Note: Dashes (-) or ampersands (&) appearing in a vendor's name should be included.

Sole Proprietor: DOE JOHN E
 DBA DOE CONTRACTING

Individual: SMITH ANN Y MD

A corporation or partnership's vendor name should be as it appeared on the form used to apply for the entity's EIN. This is generally the entity's legal name. Therefore, if the payee is a smaller operating unit of a larger entity which is a corporation or partnership, the corporation or partnership name should be in the "Payee Name 1" field, followed by the name of the operating unit in the "Payee Name 2" field. All names should be provided

APPENDIX 2

in capital letters. Do not use punctuation (i.e. periods, commas) in this field. Note: Dashes (-) or ampersands (&) appearing in a vendor's name should be included.

Corporation: HEALTHCARE INC
DBA MEADOWBROOK NURSING HOME

Partnership: TRI-STATE ENTERPRISES
DBA HOLIDAY HOTEL

The governmental unit name should be presented in the "Payee Name 1" field with the department/agency name in the "Payee Name 2" field. All names should be provided in capital letters. Do not use punctuation (i.e. periods, commas) in this field. Note: Dashes (-) or ampersands (&) appearing in a vendor's name should be included.

Governmental: CHICAGO CITY OF
HUMAN RESOURCES DEPT

For payments to other Illinois State Agencies, the vendor name should be the agency name. All names should be provided in capital letters. Do not use punctuation (i.e. periods, commas) in this field. Note: Dashes (-) or ampersands (&) appearing in a vendor's name should be included.

State Agency: COMPTROLLER OFFICE OF

For payments to state agencies outside of Illinois, the state name should be in the "Payee Name 1" field and the agency name in the "Payee Name 2" field. All names should be provided in capital letters. Do not use punctuation (i.e. periods, commas) in this field. Note: Dashes (-) or ampersands (&) appearing in a vendor's name should be included.

State Agency: TEXAS STATE OF
AUDIT OF PUBLIC ACCOUNTS

The vendor's street address should be provided in the "Address" field. This should always be in the "Address" field NOT in "Payee Name 2". Do not use punctuation (i.e. periods, commas) in this field.

The vendor's city, state, and zip should be provided in the specified fields. Do not use punctuation (i.e. periods, commas) in the city and state fields. The valid U.S. Postal Service abbreviations must be used for the abbreviation for the state. The zip code provided should be the vendor's zip+4 code as assigned by the U.S. Postal Service. This is always 5 numbers, a hyphen, and 4 numbers, i.e. 12345-6789. The dash is required on all paper documentation. The zip code field on the transaction record is only a nine-position field and does not require the dash.

Any unused fields must be space filled.

MAGNETIC TAPE TRANSMITTAL CONTROL SLIP

PURPOSE

The Magnetic Tape Transmittal Control Slip (SCO-059 Attached) is used by State agencies in transmitting commercial voucher tapes and the accompanying hardcopy documents to the Comptroller.

TIMING REQUIREMENTS

| The Magnetic Tape Transmittal Control Slip should be submitted with each commercial voucher tape.

DISTRIBUTION

The Comptroller requires one copy of the form and it should accompany the commercial voucher tape along with a copy of the Agency Balance Report.

CONTENTS

The basic contents are the transmitting agency, reel number, tape identifier, description of tape contents, number of hardcopy documents and control totals.

This invoice voucher certification is hereby specifically incorporated into and made part of the invoice vouchers listed here on, the same as if such certification were fully set out in such vouchers. It is understood that the signing of this certification constitutes a signing and certification of all and each said voucher.

The goods or services specified on this voucher were procured pursuant to a formal, written contract the terms of which require advance payment. The contract requires the goods or services to be delivered or received prior to August 31, "20XX" or it was not possible to execute a written contract for the goods or services specified on this voucher. It is anticipated that the goods or services will be received or delivered prior to August 31, "20XX".

I certify that the goods and services specified on the above listed vouchers were for the use of this agency and that the expenditures for such goods or services were authorized and lawfully incurred; that such goods or services met all the required standards set forth in the purchase agreements or contracts to which these vouchers relate; and that the amounts shown on these vouchers are correct and are approved for payment. If applicable, the reporting requirements of Section 5.1 of the Governor's Office of Management and Budget Act have been met.

STANDARDS FOR VOUCHER TRANSACTION DESCRIPTION FOR PRE-AUDIT

The following standards are to be used to complete the data entry for a payment voucher. The purpose of the description is to provide enough information to permit a pre-auditor (or post-auditor) to understand the nature of the transaction. Auditors are not usually familiar with the detailed operations of State agencies and the specialized account codes and abbreviations that may be used by agencies for internal purposes. It is, therefore, necessary for Voucher Transaction Descriptions to be clear.

A more complete reference is located at SAMS Chapter 17.20.20.

STANDARDS FOR PAYMENT VOUCHER INPUT

Invoice Description:

One 360 byte alphanumeric field. This description should be sufficiently clear to permit a pre-auditor to understand the purpose and nature of the goods acquired or services rendered. Abbreviations are permitted only when the abbreviation is generally understood. Agency specific abbreviations or program codes should not be used as a description unless otherwise explained in the text of the description.

Example 1:

Temporary clerical office assistance in connection with the Temporary Aid to Needy Family Program (TANF) (CFDA 87.100956)

Example 2:

Reconstruction of engine and transmission of Navistar Dump Truck.

Example 3:

Grant to Elkhart Fire District for purchase of new fire truck

Example 4:

Purchase 2 chairs @ \$899 each, 2 credenzas @ \$523 each, and 2 file cabinets @ \$350 each for Director's Springfield office.

APPENDIX 5

STANDARDS FOR VOUCHER TRANSACTION DESCRIPTION FOR PRE-AUDIT (cont.)

Date of service:

Two eight byte fields. The first field should contain the beginning date for when the goods were received or services rendered. The second field should contain the ending date for when goods were received or services rendered. If all the goods or services being paid for on this voucher were received or rendered on the same day, then the same date should be recorded for both fields.

Example:

022400 031800

GAAP Code (Reference SAMS Manual):

One four byte alphanumeric field. This code corresponds with the GAAP expenditure classifications. Refer to the SAMS manual for specific codes and their definition.

Example:

7500

APPENDIX 6

Voucher Addenda Record Edits

The addenda record(s) will immediately follow the voucher transaction and contain detailed remittance information related to the voucher transaction. There may be multiple addenda records for each voucher transaction record. Each addenda record must be related to the same voucher transaction. Voucher addenda records will provide remittance information electronically to the vendor. Fields on the addenda record must not contain an asterisk (*) or backslash (\). Addenda fields should be left justified and use no more than one space between characters; more than one space constitutes the end of a field. Fill unused numeric fields with zeroes, unless the last payment related data segment is not going to be used. Each addenda record contains 30 characters of control data and two 435 byte payment related data segments. If the last segment is not used, the entire segment of 435 bytes must be spaces.

EXAMPLE: If the voucher contains five payment invoices, three addenda records would be required. The third addenda record would contain the fifth invoice in the first payment related data segment and the second segment would be initialized to spaces.

SECTION	PRE-AUDIT AND COMMERCIAL VOUCHERING	PROCEDURE - PAGE NO. 17.20.45 1 of 6
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2010
PROCEDURE	INTEREST PENALTY REQUIREMENTS	REVISION NUMBER 10-002

INTEREST PENALTY REQUIREMENTS

It is the responsibility of each State agency to develop and implement internal procedures that will permit full compliance with the provisions of the State Prompt Payment Act (30 ILCS 540/1, *et seq.*) and the rules jointly promulgated by the State Comptroller and the Department of Central Management Services to govern the uniform application of that Act (See Exhibit 17.20.45-A).

PURPOSE

The State Prompt Payment Act generally provides for a late payment interest penalty to be paid to a vendor under certain conditions.

The Act states that, in any instance where a State official or agency is late in payment of a vendor's bill or invoice for goods or services furnished to the State, as defined in Section 1 of the Act, properly approved in accordance with the rules promulgated by the State Comptroller and the Department of Central Management Services (See Exhibit 17.20.45-A), the State official or agency shall pay interest to the vendor in accordance with the following:

(1) Any bill, except a bill submitted under Article V of the Illinois Public Aid Code, approved for payment under this Section must be paid or the payment issued to the payee within 60 days of receipt of a proper bill or invoice. If payment is not issued to the payee within this 60 day period, an interest penalty of 1.0% of any amount approved and unpaid shall be added for each month or fraction thereof after the end of this 60 day period, until final payment is made.

(2) Any bill submitted under Article V of the Illinois Public Aid Code approved for payment under this Section must be paid or the payment issued to the payee within 60 days after receipt of a proper bill or invoice, and, if payment is not issued to the payee within this 60-day period, an interest penalty of 2.0% of any amount approved and unpaid shall be added for each month or fraction thereof after the end of this 60-day period, until final payment is made.

(3) No agency may enter into a contract with a late payment interest provision more generous to a vendor than that provided in this part. Unless different late payment terms are reduced to writing as a contractual agreement, the State official or agency shall automatically pay interest penalties required by the Act.

(4) The provisions of the Act apply to State employees who are reimbursed for travel.

SECTION	PRE-AUDIT AND COMMERCIAL VOUCHERING	PROCEDURE - PAGE NO. 17.20.45 2 of 6
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2003
PROCEDURE	INTEREST PENALTY REQUIREMENTS	REVISION NUMBER 03-003

RULES

The State Comptroller and the Department of Central Management Services have promulgated rules to govern the uniform application of this Act (See Exhibit 17.20.45-A). These rules include procedures and time frames for the agency approval of a bill or invoice from a vendor for goods or services furnished to the State.

A "bill or invoice" may be either the vendor's standard invoice for goods or services or a completed State of Illinois invoice-voucher when used by the vendor in lieu of the vendor's standard invoice for goods and services. In the case of capital improvements, the vendor's bill may be considered to be the invoice-voucher prepared by the contractor as the result of a "pay meeting". For reimbursements to State Employees for travel expenses, the bill is the Travel Voucher.

Approval of a bill or invoice means final approval of the voucher by the agency head.

"Payment of the bill" takes place on the issue date of the warrant.

Agencies must maintain written records reflecting the following date or dates on which:

- (1) the goods were received and accepted or the Services were rendered;
- (2) the Proper Bill was received by the State agency;
- (3) approval for payment of a bill was given by the Agency;
- (4) a vendor bill was disapproved, in whole or in part, based upon a defect or what the State agency believes to be a defect; and
- (5) the payment was issued by the Comptroller's Office.

The above dates can be maintained by keeping the original bill, date-stamping the relevant dates on the bill, or by other reliable means approved by the agency.

SECTION	PRE-AUDIT AND COMMERCIAL VOUCHERING	PROCEDURE - PAGE NO. 17.20.45 3 of 6
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2010
PROCEDURE	INTEREST PENALTY REQUIREMENTS	REVISION NUMBER 10-002

Interest shall be paid from the same appropriation line item as that from which the principal is paid.

If the appropriation from which the principal was paid has lapsed, the Illinois Court of Claims shall, in its investigation of payments due claimants, provide for interest penalties as prescribed in the State Prompt Payment Act.

CALCULATION

Unless different late payment terms were reduced to writing, interest shall be simple interest calculated on a daily basis from the end of the 60 day period which begins the day after receipt of a Proper Bill until the date the final payment is made (not including issue date). Interest can be calculated by multiplying the payment times the daily interest factor of .00033 times the days elapsed from approval to payment less 60.

$$\text{Amount of payment} \times .00033 \times (\text{Days elapsed} - 60) = \text{Interest penalty}$$

The daily interest factor was determined according to the following formula:

$$1\% \text{ per month} \times 12 \text{ months} / 365 = .00033 \text{ or } .033\%$$

Assume the agency receives a Proper Bill for \$53,231.69 on July 7, 2002 for which a warrant is issued in payment on September 28, 2002. The number of days elapsed from July 8, 2002 through September 27, 2002, inclusive, is calculated as follows:

July 8 - 31	24
August 1 - 31	31
September 1 - 27	<u>27</u>
Days elapsed	<u>82</u>

The interest payable is then calculated by multiplying the daily interest factor of .00033 times 22 (82 less 60) times the amount of the payment, \$53,231.69:

$$.00033 \times (82 - 60) \times \$53,231.69 = \$386.46$$

PAYMENTS

Interest penalty payments must be processed on an Invoice-Voucher (C-13) payable to the vendor.

Interest penalty payments must be charged to the same expenditure authority account that the related goods or services is being, or was, charged. If payment for goods or services was charged to an appropriation which has since been reappropriated, the interest penalty payment should be charged to the reappropriation. Interest penalty payments are not subject to prior obligation. Therefore, "00" should be entered in the obligation number block (block 22) on the invoice-voucher.

The detail expenditure object code of 1991 should always be entered in block 18 of the voucher, regardless of the major object cited. The description block on the voucher must reference "prompt pay interest penalty" and contain the following information:

- (1) Proper bill date (the date from which interest penalty is calculated);
- (2) Warrant issue date (the date of payment of the bill); and
- (3) the original voucher number of the voucher submitted by the Agency for payment of the bill.

EXCLUDED TYPES OF PAYMENTS

The State Prompt Payment Act applies to payments made from State funds which are appropriated by the General Assembly.

The following types of payments are excluded from this Act, and accordingly, do not qualify for interest penalties:

- (a) Inter- and intra-agency payments. This includes transfers and payments to revolving funds, reimbursement of petty cash funds and imprest accounts, inter-fund transfers and inter-fund payments in which an agency or department serves as the vendor of goods or services.
- (b) Payments to State employees for personal services (salary only and not including health insurance benefits).
- (c) Awards and grants, as defined by the Comptroller's Office, including pass-through grants and distributive payments and refunds.
- (d) Contract retainers associated with construction contracts.
- (e) State Board of Education categorical grants.
- (f) Community College Board grants.
- (g) Illinois Student Assistance Commission grants.
- (h) Payments to local government entities, including school districts.
- (i) Payments of interest penalties.
- (j) Payments made to contractual employees (those payments are made generally via Contractual Service Payroll).
- (k) deleted
- (l) Payments from accounts or funds not appropriated by the General Assembly.
- (m) Gratuitous payments made to induce a business to remain in or to locate in this State.
- (n) Any type of payment to a Vendor assigned or sold by that Vendor to a different payee including any assignments made by the Vendors to the Department of Public Aid.*
- (o) Barter transactions.

* The Governor's Executive Order 2005-3 renamed the Department of Public Aid the Department of Healthcare and Family Services, effective July 1, 2005.

STATEMENT REQUIRED ON ALL INVOICE-VOUCHERS (C-13) FOR GOODS AND SERVICES AND TRAVEL VOUCHERS (C-10)

Section 5 of the Act requires that the state invoice or voucher shall indicate that payment of interest may be available for failure to comply with the State Prompt Payment Act.

To comply with this requirement, the remittance copy (copy 4) of each invoice-voucher (C-13) for goods or services and (copy 5) of each travel voucher (C-10) must contain the following statement (or words of similar import):

Payment of interest may be available if the State fails to comply with the State Prompt Payment Act, ([30 ILCS 540/1, et seq.](#)).

The above statement may be placed on any available portion of either side of the remittance copy of the invoice-voucher.

WAIVERS NOT TO BE REQUESTED

Section 6 of the Act states that "A State official or agency may not request any vendor to waive his rights, under this Act, to recover a penalty for late payment as a condition of, or inducement to enter into, any contract for goods or services."

Section 900.10 Scope

- a) These rules are applicable to all State agencies as defined in the Illinois State Auditing Act [[30 ILCS 5](#)] and shall be followed in determining whether and to what extent late payment interest is due.
- b) These rules apply to any bill for Goods or Services payable from funds appropriated by the General Assembly for periods on and after July 1, 2002, and do not affect bills payable from funds appropriated for prior periods.

Section 900.20 Definitions

Except as otherwise defined in Section 900.130, the following definitions shall be used in interpreting these rules:

"Act" shall be defined as: the State Prompt Payment Act [30 ILCS 540].

"Agency Head" shall be defined as: those persons given authority to approve payments for the various State officials and agencies as specified in the Act and Section 10 of the State Finance Act [30 ILCS 105/10].

"Bill" shall be defined as: the Vendor's standard bill or invoice for goods or services. For purposes of this Part, bill shall include a State employee's travel voucher submitted when the State employee has paid for the travel and will be reimbursed by the State.

"DCMS" shall be defined as: the Department of Central Management Services.

"Date of Approval of the Vendor's Bill" shall be defined as: the date on which the Agency Head or designee signs the voucher requesting the Comptroller's Office to pay the bill. For agencies whose computer systems automatically record an approval date as a voucher is prepared, the "Date of Approval" shall be defined as the approval date recorded by the computer system.

"Date of Payment" shall be defined as: the date of issuance of the payment by the Comptroller's Office.

"Goods and Services" and "Goods or Services" shall be defined as: items of merchandise, supplies, raw materials, finished goods and duty, duties or labor rendered by one or more persons to a State official or agency for monetary consideration.

"Month" shall be defined as: any 30-day period.

"Proper Bill" shall be defined as: a bill or invoice containing sufficient and correct information necessary to process the payment for a liability of a State agency as provided in this Part, the Comptroller's Statewide Accounting Management System (SAMS) manual, or as otherwise specified by the State agency responsible for payment.

"Vendor" shall be defined as: seller of goods or services. For purposes of this Part, Vendor shall include State employees who submit a travel voucher for reimbursement to the employees for travel.

Section 900.30 General Duties of State Agencies

- a) It is the duty and responsibility of each State agency to develop and implement internal procedures that will permit full compliance with the provisions of the Act, this Part and the Comptroller's SAMS manual.
- b) All State agencies must maintain written or electronic records reflecting the date or dates on which:
 - 1) the Goods were received and accepted or the Services were rendered;
 - 2) the Proper Bill was received by the State agency;
 - 3) approval for payment of a bill was given by the Agency;
 - 4) a Vendor bill was disapproved, in whole or in part, based upon a defect or what the State agency believes to be a defect; and
 - 5) the payment was issued by the Comptroller's Office.

Section 900.35 Duties of State Agencies: Interest Payments

- a) Interest penalty payments must be processed on a voucher, separate from the voucher the State agency submits for payment of the bill, payable to the Vendor. The voucher submitted for payment of the interest penalty shall include the date from which the interest penalty is calculated, the date of payment of the bill, and the voucher number of the voucher submitted by the Agency for payment of the bill.
- b) Interest penalty payments must be charged to the same expenditure authority account to which the related Goods or Services were charged, and indicate the detail object code for interest payable under the Act as specified in the SAMS manual. If the payment for Goods or Services was charged to an appropriation that has since been reappropriated, the interest penalty payment must be charged to the reappropriation.

- c) In the event the appropriation originally charged for the Goods or Services is exhausted and not reappropriated, the State agency shall, if authorized by law, transfer and obligate funds into the proper appropriation pursuant to [30 ILCS 105/13.2](#) for payment of the interest penalty.
- d) In the event the appropriation originally charged with the Goods or Services is exhausted and the State agency has exhausted its transfer of funds authority pursuant to [30 ILCS 105/13.2](#), the appropriation has lapsed or the agency has improperly refused to pay interest, Vendors may have recourse before the Court of Claims for payment of interest penalties.
- e) An interest penalty payment shall be deemed an outstanding liability of the fiscal year during which the contract for the Goods or Services giving rise to the interest penalty was entered.
- f) Upon receipt of a Vendor's written request or statement for the interest penalty, the State agency must respond to the Vendor's request within 60 days if the interest penalty is not appropriate under the Act, this Part, or the Comptroller's SAMS manual, along with the reason why the interest penalty will not be paid. If requests for interest should be presented to the Court of Claims, that requirement should be communicated to the Vendor.

Section 900.40 Statement Indicating That Interest Penalty May Be Available

- a) The remittance advice of each commercial payment must contain the following statement or words of similar meaning:

"Payment of interest may be available if the State fails to comply with the State Prompt Payment Act [[30 ILCS 540](#)]."
- b) In the case of electronic payments, the statement may be transmitted electronically or otherwise reflected within the information authorizing electronic payments.

| Section 900.50 Other Interest Provisions

No agency may enter into a contract with a late payment interest provision more generous to the vendor than that provided in this Part.

Section 900.60 When a Payment is Late

For bills payable from funds appropriated prior to FY03, a payment is late if the Date of Payment is not within 60 days after the Date of Approval of the Vendor's bill. For bills payable from

funds appropriated on and after July 1, 2002, a payment is late if the Date of Payment is not within 60 days after the receipt of a Proper Bill.

Section 900.70 Approval by the State

- a) A State agency shall review in a timely manner each bill after its receipt to determine if the bill is a Proper Bill. A bill is not a Proper Bill if it contains one of the following defects:
 - 1) lacks sufficient and/or correct information required by the agency to process the bill;
 - 2) lacks the Vendor's taxpayer identification number or a completed Internal Revenue Service [Form W-9](#) or Form 147C certifying that the Vendor's taxpayer identification number has been applied for but not received and the Vendor is not subject to backup withholding due to underreporting; or
 - 3) is directed to an address or person other than the one designated in written instructions from the State.
- b) An agency shall approve Proper Bills or deny bills with defects, in whole or in part, within 30 days after receipt. Vendor bills denied during this 30 day period shall be assigned a new Date of Receipt when a corresponding Proper Bill is subsequently received.
- c) The State agency shall notify the Vendor upon the discovery of a defect, as soon as possible. The notification shall indicate the nature of the defect and any additional information necessary to correct the defect. The notification may be verbal or in writing, as the agency may determine is appropriate given the circumstances surrounding the payment and the nature of the defect in the bill. The State agency shall maintain adequate documentation of all such notifications and subsequent agency and Vendor actions so as to determine when and from what date late payment interest is due and to resolve any related Vendor disputes.
- d) If a Vendor bill is approved, in whole or in part, after the required 30 day period to approve or deny bills, late payment interest shall be due for the approved portion of the bill if the Date of Payment is not within 60 days after receipt of the Proper Bill or part of the bill.
- e) If a Vendor bill is denied, in whole or in part, after the required 30 day period to approve or deny bills and the denied bill or part of

bill is subsequently approved for payment as originally submitted and denied, late payment interest shall be due for the approved portion of the bill if the Date of Payment is not within 60 days after original receipt of the Proper Bill or part of the bill. Vendor bills denied, in whole or in part, and not subsequently approved for payment as originally submitted and denied shall be assigned a new Date of Receipt when a Proper Bill is subsequently received.

- f) If the agency and the Vendor have not formally executed a contract and State law requires a written contract, any bills submitted before the formal execution shall be deemed to be received when the contract is executed. State law allows payments to be made only after the formal contract is executed for Supplies or Services over \$10,000 or Professional and Artistic Services over \$5,000.

Section 900.80 Submission and Receipt of Bills

- a) A bill submitted, lacking sufficient and/or correct information required by the State agency to process the bill, lacking taxpayer identification number, or to an address or person other than one designated in written instructions from the State shall not be considered a Proper Bill until it is completed, additional information provided, or it reaches the proper address or person.
- b) A bill submitted lacking the Vendor's federal taxpayer identification number shall not be considered a Proper Bill until the Vendor provides the taxpayer identification number or a completed Internal Revenue Service [Form W-9](#) or Form 147C certifying that the Vendor's taxpayer identification number has been applied for but not received and that the Vendor is not subject to backup withholding due to underreporting.
- c) A bill received prior to acceptance of Goods or Services by the State shall be considered a Proper Bill no earlier than the date of acceptance. Acceptance means the date on which the State, to the best of its ability at that time, determines contract requirements have been met. Acceptance for late payment calculation shall not be used by any Vendor to show acceptance of the Goods or Services for any other purpose.
- d) A bill received after acceptance of Goods or Services may be considered a Proper Bill no earlier than the date of receipt of the bill.
- e) A Vendor may submit bills for future performance, such as to make lease or installment purchase payments, in advance of scheduled due dates, but such bills for purposes of this Part shall

not be considered received by the State any earlier than when the future performance by the vendor begins.

- f) When the parties do not contemplate submission of a physical bill to the State, such as to make scheduled payments per the terms of a contract, the date of final receipt or acceptance, whichever is later, of the Goods or Services shall be considered the date of the bill.
- g) State employees who are reimbursed by the State for their travel may receive late payment interest in accordance with this Part.

Section 900.90 When and How Vendors Must Request Interest

- a) Interest amounting to \$50 or more need not be requested by a Vendor. Agencies are responsible for calculating and paying such interest and are to do so within a reasonable time.
- b) Interest amounting to \$5 but less than \$50 must be requested by the Vendor.
 - 1) The Vendor must submit a written statement to the appropriate State agency specifically requesting the State agency to pay an interest penalty to the Vendor.
 - 2) The statement must include a description of the original transaction, the Vendor's taxpayer identification number, the date of the Vendor's invoice, the invoice amount and the date the bill was presented to the Agency.
 - 3) The statement should, if possible, include the Vendor's invoice number, the voucher number, the appropriation account code, the obligation number, the exact name of the Vendor or payee as the name appeared on the payment warrant, an estimate of the date upon which the interest penalty begins to accrue and any other information reasonably needed by the State agency to verify the interest penalty payment.
 - 4) A request for the late payment interest penalty should be submitted within 90 days after the Date of Payment.

- 5) Agencies are responsible for paying such interest and are to do so within a reasonable time.
 - 6) Upon written request by the Vendor, an agency must disclose to the Vendor the date upon which an interest penalty begins to accrue.
- c) Interest amounting to less than \$5 will not be paid by the State, except in relation to a request that results from the application of the provisions of this Part to claims for prescription services submitted pursuant to Article V of the Public Aid Code [305 ILCS 5/Art. V], covering ALL KIDS Health Insurance Act [215 ILCS 170] and the Children's Health Insurance Program Act [215 ILCS 106] by a pharmacy to the Department of Healthcare and Family Services.
 - d) Interest is to be calculated for each individual Vendor bill received. A determination of whether an interest penalty is owed is to be made for each individual bill and may not be based upon summing interest from two or more bills together. If a State agency divides a Vendor bill into parts for payment from multiple funding sources, interest is to be calculated for each individual part in order to determine if interest is owed for that part of the bill.

Section 900.100 Calculation of Interest

- a) Interest is calculated at the rate of 1% per month. This results in a daily interest factor of .00033 (.01/30).
- b) For each day payment is late, the amount late shall be multiplied by the daily interest factor to determine the late payment charge.
- c) The interest penalty shall be simple interest and not compound interest, meaning that the interest penalty is computed on the amount of the bill only and shall not include previously accrued interest.
- d) Interest shall begin accruing on the 61st day after receipt of a Proper Bill and shall continue to accrue until the bill is paid by the Comptroller's Office.
- e) Interest shall not accrue on the Date of Payment. In the event the Date of Payment is the same date that interest begins to accrue, there shall be no interest payable by the State for purposes of efficiency to the State.

Section 900.110 No Interest on Interest

A request for payment of interest under this Act is not considered a bill and, therefore, not subject to the provisions of the Act; interest is not paid on an interest payment.

Section 900.120 Exclusions

The following non-exhaustive list represents the types of payments that are excluded from the Act and consequently do not qualify for interest penalties:

- a) Inter- and intra-agency payments. This includes transfers and payments to revolving funds, reimbursement of petty cash funds and imprest accounts, inter-fund transfers and inter-fund payments in which an agency or department serves as the Vendor of Goods or Services.
- b) Payments to State employees for personal services (salary only and not including health insurance benefits).
- c) Awards and grants, as defined by the Comptroller's Office in SAMS Manual Procedure 15, including pass-through grants and distributive payments and refunds.
- d) Contract retainers associated with construction contracts.
- e) State Board of Education categorical grants.
- f) Community College Board grants.
- g) Illinois Student Assistance Commission grants.
- h) Payments to local government entities, including school districts.
- i) Payments of interest penalties.
- j) Payments made to contractual employees (these payments are generally made via a Contractual Services Payroll Voucher).
- k) Deleted.
- l) Payments from accounts or funds not appropriated by the General Assembly.
- m) Gratuitous payments made to induce a business to remain in or to locate in this State.

- n) Any type of payment to a Vendor assigned or sold by that Vendor to a different payee, including any assignments made by the Vendors to the Department of Public Aid.¹
- o) Barter transactions.
- p) Payments made by a State agency comprised of federal funds only and no State or local funds.
- q) Medical and claims payments under the Workers' Compensation and Workers' Occupational Diseases Acts.
- r) Tax refunds.
- s) State Employee's Group Insurance Program payments covered by late payment interest provisions in [5 ILCS 375/6.12](#).

Section 900.130 Special Rules and Procedures Regarding the Application of the Act to the State Employee's Group Insurance Program.

For claims for payment related to the State Employee's Group Insurance Program the following applies:

- a) Late payment interest pertaining to health care payments may be made to and requested by a:
 - 1) Member -- any person who receives benefits through the State Employees Group Insurance Act program and whose benefits are paid through the Health Insurance Reserve Fund.
 - 2) Vendor -- any provider of health care to a member.
- b) The Date of Approval shall be the date the Department of Central Management Services approves the bill. The approval date given by an Administrative Services Organization (ASO) is not approval for purposes of determining whether a payment is late.
- c) The Date of Payment of the claim to the member or Vendor shall be the later of the date on the check or the date DCMS instructs a claims administrator to make the payment; ordinarily, this date is referred to as the date the payment has been released.

¹ The Governor's Executive Order 2005-3 renamed the Department of Public Aid the Department of Healthcare and Family Services, effective July 1, 2005.

- d) A request for interest must contain the following information to be processed:
- 1) An Explanation of Benefits Form from the State's Administrative Services Organization. A duplicate is available from the ASO if needed; or
 - 2) Name of employee/member and claimant
Social Security number
Date of Service
Amount of claim
Claim control number
- e) Interest shall be payable only to the designated payee indicated on the claim. Ordinarily, the payee is the Vendor; however:
- 1) if the payment of the claim has not been assigned to the Vendor by the member, interest may be requested by and paid to the member;
 - 2) if the Vendor is designated as the payee on the claim, the Vendor is entitled to any interest penalty due by the Act and the Vendor shall not charge the member interest on any unpaid balance of the claim;
 - 3) if payment of the claim is to be paid directly to the Vendor, and the member has paid any or all of the claim in advance of payment to the Vendor, the Vendor shall not charge the State or the member any late payment interest after the date the member made payment and shall so certify on its request for interest.

900.140 Resolution of Disputes

In the event a situation arises which is not covered by this Part or the proper course of action is unclear, the Comptroller and the Director of the Department of Central Management Services or their designees shall meet to make determinations and, if necessary, suggest modifications to the rules to be adopted pursuant to Sections 5-40, 5-45 or 5-50 of the IAPA. In any such determination, the interested parties will be given an opportunity to make their views known as a part of the decision making process. The Comptroller and the Director of the Department of Central Management Services shall employ the following standards in making interpretations of this Part:

- a) fairness to the Vendor and to the State.

- b) avoidance of litigation.
- c) efficiency to the State.

SECTION	PRE-AUDIT AND COMMERCIAL VOUCHERING	PROCEDURE - PAGE NO. 17.20.50 1 of 2
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 1996
PROCEDURE	IRS 1099-MISC REPORTING REQUIREMENTS	REVISION NUMBER 96-002

IRS 1099-MISC REPORTING REQUIREMENTS

Federal law requires all persons engaged in a trade or business (including governmental entities) and making payments in the course of such trade or business to another person of rent, salaries, wages, premiums, annuities, compensations, remunerations, emoluments or other fixed and determinable gains, profits and income aggregating \$600 or more in a calendar year to file a return with the Internal Revenue Service (IRS) reporting amounts paid. Generally, [Form 1099-MISC](#) is used to comply with this section of the law.

However, some of the items listed above are not required to be reported on Form 1099-MISC because they are required to be reported on other forms. For example, wage and salary payments to employees, including taxable fringe benefits, and taxable scholarship or fellowship grants are reportable on IRS [Form W-2](#). Payments for lottery prizes of more than \$600 are reportable on IRS [Form W-2G](#). Interest payments are reportable on [Form 1099-INT](#) and taxable grants paid directly to benefit recipients are reportable on [Form 1099-G](#).

The following income items, when paid to a reportable vendor, are reportable on IRS Form 1099-MISC:

1. Royalties;
2. Rents (including lease payments), such as real estate rentals paid for office space, machine rentals, and rental assistance payments made to owners of housing projects;
3. Prizes, premiums and awards paid to nonemployees;
4. Fees for nonemployee services, including legal, accounting, and medical services;
5. Expense allowances and reimbursements to nonemployees for which an exact accounting has not been made;
6. Services, including parts and materials used to render the services, unless the provider of the services is in the business of selling parts and materials;
7. Amounts retained by licensed lottery ticket sales agents from the sale proceeds of state lottery tickets;
8. Wages paid to an estate or beneficiary for a deceased employee;
9. Taxable fringe benefits for nonemployees; and
10. Punitive damages paid in cases that do not involve physical injury or sickness and any other taxable damages.

IRS regulations contain exceptions from the general requirement to file Form 1099-MISC. Payments which are NOT reportable include:

1. Payments for merchandise, including freight, storage, and similar charges;
2. Payments to pharmacies for prescription drugs;
3. Payments for telephone, telegraph, or similar services;

4. Fee or reward payments to informers about criminal activity and compensation to crime victims;
5. Benefits provided under social welfare programs if they promote the general welfare;
6. Qualified foster care payments, as defined under Internal Revenue Code Section 131, provided not more than five individuals under 18 years of age or not more than 10 difficult care individuals are in a single home;
7. Scholarships or fellowship payments; and
8. Travel or other ordinary and necessary expense reimbursements which do not exceed the expenses that were substantiated to the payer.

In addition to the above exceptions, payments to a corporation, unless the corporation is a medical corporation or legal corporation, are not reportable. Refer to SAMS Procedure 19.10.30 for guidelines on identifying corporations through the use of the vendor's corporate name on invoice-vouchers.

The SAMS object codes identify 1099-reportable payments. In addition to separating merchandise from service and rent payments, they also separate reportable payments to vendors from nonreportable reimbursements to employees or nontaxable payments made directly to benefit recipients. Reportable object codes are indicated with a "R" in the **Narrative Description of the Detail Expenditure Accounts**, SAMS Procedure 11.50.30.

In addition to identifying reportable payments, IRS regulations require the Comptroller, as payer, to obtain a valid taxpayer identification number before making reportable payments. The taxpayer identification number is used by the IRS to match payments reported on 1099 forms with the taxpayer's federal income tax return. Refer to SAMS Procedure 19.10.15 for specific vouchering requirements.

Agencies are responsible for issuing IRS Forms 1099 for reportable payments made from procurement cards and/or petty cash funds. These state agency originated 1099 reports should be filed under the tax identification numbers issued to the specific agency. The Comptroller's tax identification number should not be used.

Any questions regarding taxpayer identification numbers or the reportability of payments should be referred to:

PROCEDURE	FOREIGN VENDOR REPORTING AND WITHHOLDING REQUIREMENTS	REVISION NUMBER 06-001

FOREIGN VENDOR REPORTING AND WITHHOLDING REQUIREMENTS

PAYMENTS SUBJECT TO WITHHOLDING

A nonresident alien is an individual who is not a United States citizen or resident. The term includes a nonresident alien fiduciary. A foreign corporation or foreign partnership is one that was not created or organized in the United States, or under the laws of the United States or any of its states.

Generally, payments of fixed or determinable annual or periodic U.S. source income to nonresident alien independent contractors, foreign corporations, or foreign partnerships (foreign vendors) are subject to federal and state income tax withholding. Income subject to withholding includes: 1) personal services performed in the United States, 2) rents on properties located in the United States, 3) royalties on properties used in the United States, 4) pension payments where services were performed in the United States, and 5) taxable portions of scholarships and fellowship grants paid by a state agency. The withholding may be exempted or reduced if:

- 1) a partnership or corporation supplies a signed written statement to the agency claiming that they are domestic and not foreign. This statement must contain the entity's employer identification number, the address of its U.S. office or place of business, and the signature of a member of the partnership or the signature and official title of the corporate officer. This statement should be retained by the agency and not forwarded to the Comptroller or the IRS.
- 2) the income is effectively connected with a trade or business in the United States and the payee has filed [Form W-8ECI](#), *Certificate of Foreign Person's Claim for Exemption From Withholding of Tax on Income Effectively Connected With the Conduct of a Trade or Business in the United States*.
- 3) residents of the foreign country may be entitled to reduced rates of, or exemption from, U.S. income tax under a tax treaty between their country of residence and the United States. These foreign residents must notify the paying agency that they are residents of a country with which the United States has an income tax treaty on [Form 8233](#), *Exemption from Withholding on Compensation for Independent (and Certain Dependent) Personal Services of a Nonresident Alien Individual*. Tables found in [Publication 515](#), *Withholding of Tax on Nonresident Aliens and Foreign Corporations*, list countries with which the United States has income tax treaties along with the tax rates that apply to various classes of income.

PROCEDURE	FOREIGN VENDOR REPORTING AND WITHHOLDING REQUIREMENTS	REVISION NUMBER 06-001

- 4) the income is U.S. source gross transportation income. See [Publication 515](#) for further information.
- 5) the income is not included in gross income under the Internal Revenue Code.

The Contractual Service Voucher (C-02) is to be used for vouchering payments to foreign vendors which are subject to withholding. See Procedure 23.20.75.

RATE OF WITHHOLDING

With certain exceptions, the withholding rate for a nonresident alien is a flat 30 percent unless modified by a tax treaty. The exceptions include wages, pensions, and taxable scholarships and fellowships.

Wages and pensions paid for the personal services of a nonresident alien employee are subject to withholding in the same manner as wages paid to a U.S. citizen (graduated rates); however, most tax treaties provided at least a partial exemption from tax for labor or personal services performed in the United States. The employee must provide the employer with a statement to claim a treaty exemption from withholding. Details of the statement content can be found in IRS Publication 515.

Compensation for personal services performed by nonresident alien individuals who are independent contractors is generally subject to the flat 30 percent withholding rate, but may be exempt under a tax treaty. Under most tax treaties, compensation for the personal services of nonresident alien independent contractors is exempt only if the services are performed during a period of temporary presence in the United States (usually not more than 183 days) and the nonresident alien is a resident of the treaty country. The compensation is not exempt from U.S. tax if the contractor is a U.S. resident. Independent contractors must file IRS [Form 8233](#), *Exemption From Withholding on Compensation for Independent (and Certain Dependent) Personal Services of a Nonresident Alien Individual*, to claim a treaty exemption. Form 8233 may also be used to claim a personal exemption reducing the compensation subject to the 30 percent withholding.

SECTION	PRE-AUDIT AND COMMERCIAL VOUCHERING	PROCEDURE - PAGE NO. 17.20.51 3 of 3
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE July 1, 2005
PROCEDURE	FOREIGN VENDOR REPORTING AND WITHHOLDING REQUIREMENTS	REVISION NUMBER 06-001

Form 8233 must be filed by the nonresident alien for each tax year. One copy of the form must be filed with the IRS district director within five days of receipt. One copy should be kept by the agency. One copy should be forwarded to the Contractual Payroll Section of the Office of the Comptroller.

Taxable scholarships and fellowship grants from U.S. sources paid to a nonresident alien with nonimmigrant status are subject to 14 percent withholding.

REPORTING REQUIREMENTS

Generally, Internal Revenue Service (IRS) Forms [1042](#) and [1042-S](#) must be filed when fixed or determinable annual or periodic income from U.S. sources is paid to a nonresident alien independent contractor, foreign partnership or foreign corporation. The returns must be filed by March 15 following the end of the calendar year of payment. A copy of Form 1042-S must be provided to the payee by March 15. (Forms [W-2](#) and [941](#) are used to report wages or salaries paid to nonresident alien employees.)

Forms 1042 and 1042-S must be filed even if there was no income tax withholding because of a specific exemption or income tax treaty. The penalty which may be imposed for failure to file Form 1042 when due is usually 5 percent of the unpaid tax for each month or part of a month the return is late, but not more than 25 percent of the unpaid tax.

In order for the Office of the Comptroller to accumulate the necessary data for completion of Forms 1042 and 1042-S, reportable payments to nonresident alien independent contractors, foreign partnerships or foreign corporations (foreign vendors) must be vouchered on Contractual Service Vouchers (C-02) denoting the appropriate codes for foreign vendor payments. See SAMS Procedure 23.20.75.

If reportable payments are not vouchered on a Contractual Service Voucher, it is the responsibility of the paying agency to report the payments on IRS Forms 1042 and 1042-S using the agency's federal employer's identification number. [Publication 515](#), *Withholding of Tax on Nonresident Aliens and Foreign Corporations*, should be consulted for complete reporting requirements.

SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 1996
PROCEDURE	IRS 1099-S REPORTING REQUIREMENTS	REVISION NUMBER NEW

IRS 1099-S Reporting Requirements

All State agencies who purchase real estate of \$600 or more are subject to Internal Revenue Service (IRS) [Form 1099-S](#) filing requirements. The IRS requires Form 1099-S informational returns be filed if the transaction consists in whole or in part of the sale or exchange for money, indebtedness, property, or services, of any present or future ownership interest in any of the following:

1. Improved or unimproved land, including air space.
2. Inherently permanent structures, including any residential, commercial, or industrial building.
3. A condominium unit and its appurtenant fixtures and common elements, including land.
4. Stock in a cooperative housing corporation.

For reporting purposes, a sale or exchange includes any transaction properly treated as a sale or exchange for federal income tax purposes, even if the transaction is not currently taxable. Exchanges which are considered to be involuntary conversions resulting from the sale of real estate under threat or imminence of seizure, requisition, or condemnation are also generally treated as reportable transactions.

The IRS has designated certain sale or exchanges of real estate to be excluded from Form 1099-S reporting requirements. Any real estate transaction in which the transferor (seller) is a corporation, governmental unit, including a foreign government or an international organization, or an exempt volume transferor are excluded from Form 1099-S reporting requirements. For Form 1099-S reporting purposes an exempt volume transferor is someone who sold or exchanged during the year, who expects to sell or exchange during the year, or who did sell or exchange in either of the two previous years, at least 25 separate items of reportable real estate to at least 25 separate transferees.

State agencies required to file Form 1099-S must request the transferor's Taxpayer Identification Number (TIN) no later than the time of closing. The transferor is required to furnish his or her TIN and to certify that the TIN is correct.

PROCEDURE	IRS 1099-S REPORTING REQUIREMENTS	REVISION NUMBER NEW

The IRS requires that the filer furnish to the transferor Copy B of Form 1099-S by January 31st of each calendar year. In addition, filing agencies are required to file Copy A of Form 1099-S with the IRS by February 28th of each calendar year. The IRS prohibits any person required to file Form 1099-S from separately charging any customer a fee for complying with the requirements to file Form 1099-S.

Specific information needed to complete the IRS Proceeds From Real Estate Transactions Form [1099-S](#) can be obtained from the [Instructions for Forms 1099, 1098, 5498, and W-2G](#).

PROCEDURE	AGENCY TAPE BALANCE REPORT	REVISION NUMBER 10-002

AGENCY TAPE BALANCE REPORT

PURPOSE

The Agency Tape Balance Report is used by State agencies to submit schedule and voucher information on the commercial voucher tape to confirm the magnetic tape contents.

TIMING REQUIREMENTS

The Agency Tape Balance Report should be submitted with each commercial voucher tape.

DISTRIBUTION

The Comptroller requires one copy of the Agency Tape Balance Report. It should accompany the commercial voucher tape. One copy of the Tape Transmittal Control Slip should be attached to the balance report. All applicable paper vouchers must be sorted in the same order as shown on the Agency Tape Balance Report.

CONTENTS

The basic contents are the tape's header record, each schedule record and the trailer record. The listing should be in a labeled and clearly defined format. Exhibit 17.20.60-A shows a modified report which meets the Comptroller's requirements for agencies using the 420 or 900 unmodified layout.

The requirements for the Agency Tape Balance Report for agencies using the 900 modified layout is shown in Exhibit 17.20.60-A.

AGENCY TAPE BALANCING REPORT

A computer generated balancing report with the information detailed below must accompany each Commercial Voucher tape sent to the Comptroller.

This invoice voucher certification is hereby specifically incorporated into and made part of the invoice vouchers listed here on, the same as if such certification were fully set out in such vouchers. It is understood that the signing of this certification constitutes a signing and certification of all and each said voucher.

The goods or services specified on this voucher were procured pursuant to a formal, written contract the terms of which require advance payment. The contract requires the goods or services to be delivered or received prior to August 31, "199X" or it was not possible to execute a written contract for the goods or services specified on this voucher. It is anticipated that the goods or services will be received or delivered prior to August 31, "199X".

I certify that the goods and services specified on the above listed vouchers were for the use of this agency and that the expenditures for such goods or services were authorized and lawfully incurred; that such goods or services met all the required standards set forth in the purchase agreements or contracts to which these vouchers relate; and that the amounts shown on these vouchers are correct and are approved for payment. If applicable, the reporting requirements of Section 5.1 of the Governor's Office of Management and Budget Act have been met.

SIGNATURE CARD (FORM SCO-095)

PURPOSE

The Signature Card (Exhibit 17.20.65-A & B) is used by State employees to provide specimen signatures to the Comptroller for persons authorized to sign the agency head approval line on vouchers or on the Agency Tape Balancing Report. The card is also prepared for individuals authorized to affix the signature of the agency head on the voucher's agency head line, such as with a signature machine.

TIMING REQUIREMENTS

Frequency of submission of a new and revised Signature Card(s) is dependent on when the use of a signature is authorized, its authority is expanded to other forms, or the period for which the signature was valid has lapsed. Agencies **must** notify the Comptroller by memorandum when a Signature Card, which is on file, should be revoked.

DISTRIBUTION

For control, **two** Signature Cards are prepared and are filed with the Comptroller.

INTRODUCTION

The Office of the Comptroller implemented a statewide vendor database within SAMS effective July 1, 1997. The purpose of the Comptroller's vendor database is to provide a central repository of vendor data, and will be used in part to maintain totals for state commercial payments to vendors in order to comply with the Internal Revenue Service's informational return reporting requirements.

Vendors will be added to this database automatically from payment voucher documents if the vendor does not exist within the statewide vendor database with two exceptions: 1) Vendors will not be automatically added if SAMS identifies the payment as being 1099 reportable. 2) Vendors will not be automatically added if the legal status is restricted on OBJL. The OBJL table (which is available for agency inquiry) indicates compatibility between object codes and legal status codes. For example, Petty Cash Reimbursements (1201) are restricted to legal status 42 (Petty Cash Custodians). Payments to vendors with a legal status other than 42 would be rejected. Therefore each Payment Voucher must contain a Vendor Identification Number (VIN), the Vendor Name, and the Vendor Address. The VIN for an individual and business entity is the nine digit federal Taxpayer Identification Number (TIN). The vendor identification number for a governmental unit should be the nine digit TIN when available. Agencies should make a concerted effort to obtain a TIN from these entities. Governmental units that do not have a TIN should be encouraged to apply for one with the Internal Revenue Service. Agencies should contact the Comptroller's Office for instructions on processing payments to governmental entities that cannot obtain a TIN. Payment documents will not be processed without the VIN, an associated vendor name, and an associated vendor address.

In the case of a payment voucher document containing an object code identified as 1099 reportable, the vendor must already be established in the vendor statewide database and certified by the Comptroller's Vendor Unit. It is the responsibility of the agency to request W-9 forms from their vendors and forward them to the Comptroller's Office for certification.

Exceptions to the certification process are approved by the Comptroller's Office and include certifications obtained from the Department of Revenue, Social Security Administration, and the Internal Revenue Service.

SECTION	VENDOR IDENTIFICATION STRUCTURE	PROCEDURE - PAGE NO. 19.10.15 1 of 4
SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2008
PROCEDURE	INTERNAL REVENUE SERVICE REQUIREMENTS	REVISION NUMBER 08-002

Internal Revenue Service Requirements

IRS regulations require that each payee furnish his correct federal Taxpayer Identification Number (TIN) to the payer. Any vendor that fails to furnish his/her correct TIN to an agency is subject to an IRS penalty of \$50 for each such failure unless the failure is due to reasonable cause and not willful neglect.

The TIN may be a Social Security Number (SSN) or an Employer Identification Number (EIN). Agencies should use the EIN for payments if the "vendor or payee" is a corporation, partnership, estate, or legal trust. If the payee is an individual, the individual's SSN should be used. For sole proprietorships, the payee should be the owner of the sole proprietorship and the TIN can be either the owner's SSN or EIN. The IRS and the Comptroller's Office recommend that a sole proprietor use an SSN to receive payments.

The payee should complete the most recent version of the IRS Form W-9 to provide the correct legal name, TIN and legal status. A form can be downloaded from the Internal Revenue Service website: www.irs.gov.

If the payee is a resident alien and does not have an SSN and is not eligible to obtain one, the payee should reference his/her individual tax identification number (ITIN) on the Form W-9. Individuals that are not eligible for an SSN are generally not legally eligible to receive payment for services performed in the United States. Agencies should not voucher payments for services performed by individuals that have not been issued an SSN by the Social Security Administration. An individual may apply for an ITIN using [Form W-7](#) (Application for IRS Individual Taxpayer Identification Number).

IRS Match of TIN/Payee Name

On IRS records, a Social Security Number matches only with the name of a person. The business name of a sole proprietorship will not match an SSN or an EIN. Therefore, when the payee is an individual or owner of a sole proprietorship, the owner's name must appear first in the vendor or payee box on the voucher. The owner's last name should precede the first name and middle name or initial. The "doing business as" (DBA) name should be entered on the second line:

sole proprietor: Doe John E
 DBA Doe Contracting

SECTION	VENDOR IDENTIFICATION STRUCTURE	PROCEDURE - PAGE NO. 19.10.15 2 of 4
SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2008
PROCEDURE	INTERNAL REVENUE SERVICE REQUIREMENTS	REVISION NUMBER 08-002

When vouchering payments to business entities (other than sole proprietorships), only the payee's name as it appeared on the form used to apply for the entity's EIN will match IRS records. This is generally the entity's legal name. Therefore, if the payee is a smaller operating unit of a larger entity which is a corporation or partnership, the corporation or partnership name should be first, followed by the name of the operating unit:

corporation: Healthcare Inc
 DBA Meadowbrook Nursing Home

partnership: Tri-State Enterprises
 DBA Holiday Hotel

When the vendor's SSN or EIN is used and payments are mailed "in care of" a bank or other entity, the vendor's name should be first, followed by the bank's name:

sole proprietor: Doe John E
 c/o First State Bank

partnership: L & M Plumbing
 c/o First National Bank

When payments are made to an individual for services as an employee of a business entity, the individual's SSN must be used. This is true even when the individual must give all money received to the business. For example, Dr. Mary Pane is employed by the Midwest Clinic, a corporation. If Dr. Pane is the payee on the voucher, her SSN must be used. If the payee is Midwest Clinic, the EIN of the Clinic should appear on the voucher.

Backup Withholding

Under IRS regulations, the payer of amounts subject to 1099-MISC reporting must solicit the payee's TIN and the payee must furnish his or her TIN. If the payee fails to supply this number, the payer must impose "backup withholding" on any payments subject to 1099 reporting and remit amounts withheld to the IRS. Currently, the backup withholding rate is 28 percent of the total reportable payment.

To comply with IRS regulations, Invoice Vouchers containing a payment for goods or services must contain the vendor's correct TIN. Any Voucher which does not contain a TIN shall be returned to the vouchering agency to obtain the necessary documentation.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	INTERNAL REVENUE SERVICE REQUIREMENTS	REVISION NUMBER 11-002

If the payee fails to supply this information, the agency must contact the Comptroller's Office for processing instructions.

To prevent payment delays and avoid backup withholding, we urge all state agencies to obtain valid TINs from all payees prior to soliciting service.

Any questions regarding backup withholding should be referred to the Vendor Unit by calling 217/557-3376 or by email: vendor@mail.ioc.state.il.us.

Payments to Foreign Persons

Foreign persons are required to be certified as a vendor by the IOC prior to the processing of any payment voucher.

According to the Internal Revenue Service, a "foreign person" includes a nonresident alien individual, a foreign corporation, a foreign partnership, a foreign trust, a foreign estate and any other person that is not a U. S. person.

In order to avoid problems in the payment process, agencies should take the steps necessary to certify foreign vendors in advance of any business dealings with that vendor.

To be certified by the IOC, the foreign person must submit a properly completed form W8 with a U. S. taxpayer identification number provided. Form W8 is available in four versions. Please review the form and related instructions at www.irs.gov.

An Individual Taxpayer Identification Number (ITIN) assigned to a foreign person is not valid for work purposes. The IOC will not process vouchers citing a reportable detail object code for payments to an ITIN.

Vouchers submitted for payment to foreign persons vendors should use the following address format:

Vendor Name	Clark Thomas
Street Address	117 Russell Drive
City Zip Code	London W1P6HQ
Country FN 00000	England FN 00000

The state field should be FN.

The zip code field should be all zeroes.

Duplicate Taxpayer Identification Numbers

There are instances where the Comptroller may have a vendor on file with a valid EIN and an agency submits a voucher for another vendor whose SSN is the same 9-digit number. When this occurs, the Comptroller will assign a unique number for the purpose of processing the voucher. The agency will be notified of this number assignment so that any future vouchers will be processed with the correct number.

W-9 FORM SUBMISSION REQUIREMENTS

Requirements for Reportable Payments*

- If a vendor is on the SAMS Vendor File in a non-certified status, a W-9 form is required.
- If a vendor's name and/or legal status are incorrectly recorded in the SAMS Vendor File, please contact the IOC vendor unit for instructions (a W-9 form and additional documentation may be required). NOTE: Address changes should not be submitted on a W-9 form. The address on the voucher determines where the payment is mailed, not the address on the SAMS Vendor File.

***For a listing of reportable detail object codes (R), see Chapter 11, Procedure 11.50.30 of the SAMS Manual**

Requirements for Non-Reportable Payments

- If a vendor is on the SAMS Vendor File in a certified or non-certified status, a W-9 form is not required.
- If a vendor is not on the SAMS Vendor File, submit the voucher to the Illinois Office of the Comptroller (IOC) and the vendor will automatically be added in a non-certified status unless the object code/legal status code combination requires certification as indicated on the OBJL table. In this case, a W-9 form is required.
- If a vendor's name and/or legal status are incorrect, please contact the IOC vendor unit for instructions (a W-9 form and additional documentation may be required).

COMPLETING THE W-9 FORM

- Information should be typed or computer-generated by the vendor NOT the agency.
- If information cannot be typed, black ink should be used.
- Information should be provided for only one vendor per W-9 form. A separate W-9 form must be submitted for a spouse.

- On the “Name” line, individuals should enter their last name first, followed by their first name and middle initial, if applicable. Businesses should enter the legal name of the business on this line. If there is a “doing business as” name (DBA), it should be entered on the “Business name” line.
- The name of the owner of a sole proprietorship must appear on the “Name” line with the DBA name listed on the “Business name” line. NOTE: The IRS matches the TIN against the owner’s name, not the business name.
- A partnership is an association of two or more persons for the purpose of carrying on a trade or business. No single individual may form a partnership. The name of the partnership must appear on the “Name” line with the DBA name listed on the “Business Name” line. Please note that the partnership name must be associated with the partnership TIN on IRS records.
- A legal status must be marked. If “Other” is marked, one of the following descriptions must be entered in the space provided.

Legal Corporation	Estate or Trust
Medical Corporation	Pharmacy (Non-Corporate)
Governmental	Pharmacy/Funeral Home/Cemetery (Corporate)
Tax Exempt	

Not-for-Profit entities should indicate “not-for-profit” in the “other” field and check the box indicating their appropriate legal status (i.e., corporation, partnership, etc.). Vendors that have tax exempt status with IRS will be certified as “tax exempt.” Vendors not on the IRS tax exempt database will be certified with the legal status provided.

- The entire mailing address must be provided. Please make sure the city name is spelled correctly and completely. A state abbreviation and zip code must be provided.
- A Taxpayer Identification Number (TIN) must be provided in all cases. For individuals, this is the social security number (SSN). For businesses other than sole proprietorships, this is the employer identification number (EIN). A sole proprietor may elect to use an EIN to receive payments from the State. However, the IRS and the Comptroller’s Office recommend that a sole proprietor use an SSN to receive payments. A TIN should be nine characters with values 0 – 9.
- In the field “Requester’s Name and Address,” agencies should indicate the agency name, contact person, and fax number to which the W-9 should be returned in the event it cannot be processed. This information will be used to return W-9 forms that cannot be processed by the IOC. **THIS IS THE ONLY AREA WHICH THE AGENCY SHOULD ENTER INFORMATION.** If an agency receives a W-9 form that appears to be incorrect, a new, correctly completed form should be obtained from the vendor. The agency should not make any modifications to the W-9 form.

RETURN OF W-9 FORMS

W-9 forms that are not completed according to our procedures will be rejected by the IOC and returned to the submitting agency or vendor. Conditions resulting in the return of W-9 forms include, but are not limited to:

- W-9 forms that are not legible
- W-9 forms with names and TINs of multiple people/entities
- W-9 forms omitting the owner's name of a sole proprietorship or single member LLC
- W-9 forms with a legal status of "other" and no description provided
- W-9 forms with no legal status indicated
- W-9 forms that have a discrepancy between the individual's name and the signature (i.e., Jane Smith Jones is printed at top, but signature reads Jane Smith)
- W-9 forms with conflicting information (i.e., an individual name is listed first, then a business name, and an SSN is provided but the "corporation" legal status is marked)
- W-9 forms with incomplete information
- W-9 forms with a single individual's name on the "name" line and "partnership" legal status marked.
- W-9 forms without the "Requester's Name and Address" field completed.

WHERE TO OBTAIN THE W-9 FORM

- Call the IRS at 800/829-3676
- Visit the IRS Internet Web Site at www.irs.gov
- Chapter 19 of the SAMS Manual (NOTE: The manual may not always have the most recent form.)

NOTE: When sending a W-9 form to your vendors/providers/clients, please provide them with the complete document. Instructions for completing the form appear on the back.

SUBSTITUTE W-9 FORM

The IOC must approve substitute W-9 forms. Please forward your proposed substitute form to the IOC Vendor Supervisor at 325 W. Adams, Springfield, IL 62704 or via email: vendor@mail.ioc.state.il.us.

SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 2010
PROCEDURE	NEW VENDOR ENTRY SCREEN	REVISION NUMBER 11-001

NEW VENDOR ENTRY SCREEN

The New Vendor Entry screen (NVEN) allows agencies to enter new non-business vendors using a Social Security Number (SSN) directly into SAMS in a non-certified status. Agencies cannot use NVEN to inquire, change, or delete any vendor information.

NVEN consists of three mandatory input fields: “VENDOR”, “LAST NAME”, and “FIRST NAME, MI, SUFFIX”. All vendors entered on this screen will automatically be added to VEN2 and be forwarded to the Illinois Department of Revenue for purposes of certifying the vendor record.

NVEN is available during normal SAMS hours – 8:00 AM to 5:00 PM each State business day. To apply for authorization to add vendors on this screen, please contact the IOC Security Administrator at 524-5408. For any questions regarding use of the NVEN screen, please contact the Vendor Unit by calling 217/557-3376 or by email: vendor@mail.ioc.state.il.us

RECORD ENTRY

The SSN should be entered in the “VENDOR” field. This field has 9 bytes, all numeric. The only valid characters are 0 – 9. All other characters are invalid and will cause an error condition on NVEN. An error condition will also occur if the user enters less than 9 digits.

The “LAST NAME” field is limited to 17 bytes and must contain only the last name. The only valid characters are A-Z and hyphens. All other characters are invalid and will cause an error condition on NVEN. If a person has two last names, enter the last name as it is represented on the W-9 (i.e., if the W-9 indicates a hyphen between the two last names, enter a hyphen between the names or, if the W-9 does not indicate a hyphen between the two last names, enter one space between the names). Suffixes must be entered in the “first name, MI, Suffix” field in the last position.

The “FIRST NAME, MI, SUFFIX” field is limited to 11 bytes and the information should be entered in this sequence with one space between the data elements. The only valid characters are A-Z and hyphens. All other characters are invalid and will cause an error condition on NVEN. If a person has two middle names, enter both middle initials with one space between the initials.

NVEN entries must be based on a valid W-9. The supporting W-9s must be kept on file with the agency for a period of not less than seven years. The W-9s will be subject to IOC review upon request.

RESTRICTIONS ON RECORD ENTRY

NVEN is restricted to new non-business vendors with a SSN only. Agencies must submit all business W-9s in a hardcopy format to the IOC for processing. Sole proprietors (including physicians and attorneys) with a SSN or with a SSN and an EIN are both considered business vendors and are not allowed to be entered on NVEN. Also, foreign vendors and vendors with an ITIN (the first digit is usually a “9”) are not allowed to be entered on NVEN.

All changes to existing vendors (business or non-business) must be submitted on a hardcopy W-9 to the IOC for processing. W-9s that are submitted for changes to an existing vendor must be clearly marked to indicate the action needed (e.g. “Name Change” or “B-Notice”) on the face of the W-9 in the upper margin. Failure to mark W-9s with the action needed, may cause the revised W-9s to be returned to the originating agency.

SAMS WAREHOUSE FIELDS

The VEN2 screen on SAMS will have two additional fields populated when the vendor is entered through NVEN. The NV field will be populated with the 3-digit number of the agency that entered the vendor information and the date that the entry was made (e.g., 360/07282006) and the VEND TYP field will be populated with “NV”.

The Vendor_Type field on the warehouse WH_VENDOR reference table will also be populated with “NV”. In addition, two new fields have been added to this table. The New_Vendor_Agency field will show the 3-digit number of the agency that entered the vendor information and the New_Vendor_Date field will show the date that the entry was made.

Vendor Identification Numbers

The Vendor Identification Number that must be utilized is as follows:

Individuals	Social Security Number (SSN)
Sole Proprietors	SSN or Employer Identification Number (EIN)
Partnerships and Corporations	EIN
Governmental Entities	EIN
LLCs-Single Member - Disregarded	SSN or EIN of owner
LLCs-Single Member - Corporation Election	EIN from IRS acceptance letter

SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 2008
PROCEDURE	STRUCTURE OF VENDOR NAMES	REVISION NUMBER 09-001

STRUCTURE OF VENDOR NAMES

The following guidelines should be applied to vendor names which appear on invoice-vouchers.

INDIVIDUALS

The individual's last name must precede the first name, middle name or initials and any titles. No punctuation should be used. An individual's vendor name would appear as follows:

Smith Ann Y

SOLE PROPRIETORSHIPS

A sole proprietor is an individual engaged in a trade or business. When the payee is a sole proprietorship, the first line of the vendor or payee box on an invoice-voucher **MUST** contain the owner's name. The owner's last name should precede the first name, middle name or initials, and any titles. If the vouchering agency or owner also wishes to have the business name appear on the warrant, it should be entered on the second line as: "dba Business Name."

Omitting the owner's name may cause an incorrect Internal Revenue Service (IRS) Form 1099 to be issued and result in an IRS notice requiring backup withholding on future payments to that vendor. (See SAMS Procedure 19.10.15)

PARTNERSHIPS

A partnership is an association of two or more persons for the purpose of carrying on a trade or business. Partnerships must be registered with the Internal Revenue Service. Two or more individuals may form a partnership. However, no single individual may form a partnership.

When preparing an invoice voucher payable to a partnership, the name of the partnership as registered with the IRS must appear on line one and the dba (business) name, if applicable, must appear on the second line.

CORPORATIONS

A corporation's vendor name must be its legal name as set forth in the corporation charter or other legal document creating it. The legal name of many vendors can be found in the Certified List of Domestic and Foreign Corporations published by the Illinois Secretary of State.

A business corporation is required by law to have as part of its corporate name the word "Corporation", "Company", "Incorporated", or "Limited", or an abbreviation of one of such words. A professional corporation is required by law to have as part of its corporate name the word "Chartered", "Limited", "Ltd.", or "P.C.". Since 1099 reporting is not required for many corporations, it is important to include the appropriate word or abbreviation on the voucher in order for the Comptroller to properly exclude the vendor when reporting to the IRS.

IRS Form 1099 reporting is required for corporations providing or billing medical or health care services and corporations providing legal services. To ensure a match with IRS records, include the complete legal name on vouchers. With the exception of words such as "Inc", "SC", and "PC", do not abbreviate the legal name, whenever possible. If the name must be abbreviated, do not abbreviate the first two words of the legal name. If paying an operating unit of a corporation, the corporate name must appear on the first line and the name of the operating unit should appear on the second line of the voucher.

GOVERNMENTAL ENTITIES

The name of the geographic or political subdivision should be presented first. A governmental agency's vendor name would appear as follows:

Chicago Human Resources Dept
U S Justice Dept of

AGENCIES OF THE STATE OF ILLINOIS

Payments to state agencies do not require the use of Illinois, State of. A payment to the State of Illinois, Office of the Comptroller would appear as follows:

LIMITED LIABILITY COMPANIES

Limited Liability Companies (LLCs) are organized under state laws and do not have an established status in United States tax law.

SINGLE MEMBER LLC, DEFAULT CLASSIFICATION AS INDIVIDUAL

A Single Member LLC can be owned by an individual. When entering the vendor name on a Form W-9, the owner's name must be entered on the Name line, and the business name (LLC) must be entered on the Business name line. The Limited Liability Company box must be marked and a "D" must be entered on the tax classification line. The owner's Social Security Number (SSN) or Employer Identification Number (EIN) must be entered in the Taxpayer Identification Number (TIN) box. An LLC with a properly completed Form W-9 and IRS EIN assignment letter on file with the Comptroller's Vendor Unit will be classified as legal status 02 on the SAMS vendor file.

SINGLE MEMBER LLC, OWNER IS A CORPORATION

When entering the vendor name on a Form W-9, the owner's name must be entered on the Name line and the business name (LLC) must be entered on the Business name line. The Corporation box must be marked. The owner's (Corporation) EIN must be entered in the TIN box. The vendor will be classified as legal status 04 on the SAMS vendor file.

SINGLE MEMBER LLC, ELECTION TO BE TREATED AS A CORPORATION

If the owner elects, and the IRS accepts the election, the Office of the Comptroller will classify the LLC as a corporation if, and only if, the vendor provides the Vendor Unit with a copy of the IRS acceptance letter. An LLC with a properly completed Form W-9 and IRS acceptance letter on file with the Comptroller's Vendor Unit will be classified as a corporation with legal status 04 on the SAMS vendor file.

When completing Form W-9, the name entered on the Name line must match the name on the top line of the IRS acceptance letter. The Limited Liability Company box must be marked and a "C" must be entered on the tax classification line. The corresponding EIN on the IRS acceptance letter must be entered in the TIN box.

MULTIPLE MEMBER LLC, DEFAULT CLASSIFICATION AS PARTNERSHIP

The default classification for a multiple member LLC is treatment as a partnership. When completing Form W-9, the multiple member LLC's name must appear on the Name line and the business name, if applicable, must be entered on the Business name line. The Limited Liability Company box must be marked and a "P" must be entered on the tax classification line. The LLC's EIN must be entered in the TIN box. An LLC with a properly completed Form W-9 and IRS EIN assignment letter on file with the Comptroller's Vendor Unit will be classified as legal status 03 on the SAMS vendor file.

MULTIPLE MEMBER LLC, ELECTION TO BE TREATED AS A CORPORATION

If the owner elects and the IRS accepts the election, the Office of the Comptroller will classify the LLC as a corporation if, and only if, the vendor provides the Vendor Unit with a copy of the IRS acceptance letter. An LLC with a properly completed Form W-9 and IRS acceptance letter on file with the Comptroller's Vendor Unit will be classified as a corporation with legal status 04 on the SAMS vendor file.

When completing Form W-9, the name entered on the Name line must match the name on the top line of the IRS acceptance letter. The Limited Liability Company box must be marked and a "C" must be entered on the tax classification line. The corresponding EIN on the IRS acceptance letter must be entered in the TIN box.

ERROR CONDITIONS

Vendors must comply with the current IRS regulations described in the instructions to Form W-9 and other applicable IRS and Comptroller requirements. If the Comptroller's Vendor Unit detects noncompliance with the applicable requirements, the Form W-9 will be returned and additional information and/or a corrected W-9 may be requested.

INTRODUCTION

Electronic payments (direct deposit payments) are processed in the various warrant systems maintained in the Office of the Comptroller:

- Payroll
- Public Aid
- Retirement
- Electronic Replacement
- State Tax Refunds
- Commercial
- Contractual

The Comptroller's Office has established an Electronic Commerce Section to expand the use of electronic commerce within Illinois State Government. The Electronic Commerce Section is not involved in the actual processing procedures of the Payroll, Public Aid, State Tax Refund, Retirement, Contractual and Commercial systems. These systems pass the direct deposit payment information to the Electronic Transfer (ET) system. All direct deposit payments are reconciled per system for verification of proper processing. Then payment information is transmitted electronically to the Comptroller's Office lead banks, which then forward the payment transactions to the receiving banks for posting to the payees' accounts. The Electronic Commerce section also processes returns and prenotes and makes other necessary changes as requested in writing from agencies.

In special circumstances, when requested in writing by a State agency, the Electronic Commerce section may manually switch direct deposit transactions to hard copy for payments processed in the Payroll, Retirement and Public Aid systems.

STATUTE STATEMENT

The statutory provisions governing the Electronic Commerce section are found in the State Comptroller Act.

Comptroller Act ([15 ILCS 405/9.03](#), effective July 1, 1997)

Direct deposit of State payments. The Comptroller, with the approval of the State Treasurer, may provide by rule or regulation for the direct deposit of any payment lawfully payable from the State Treasury and in accordance with federal banking regulations including but not limited to payments to (i) persons paid from personal services, (ii) persons receiving benefit payments from him under the State pension systems, (iii) individuals who receive assistance under Articles III, IV, and VI of the Illinois Public Aid Code, (iv) providers of services under the Mental Health and Developmental Disabilities Administrative Act, (v) providers of community-based mental health services, and (vi) providers of services under programs administered by the State Board of Education, in the accounts of those persons or entities maintained at a bank, savings and loan association, or credit union, where authorized by the payee. The Comptroller also may deposit public aid payments for individuals who receive assistance under Articles III, IV VI and X of the Illinois Public Aid Code directly into an electronic benefits transfer account in a financial institution approved by the State Treasurer as prescribed by the Illinois Department of Human Services and in accordance with the rules and regulations of that Department and the rules and regulation adopted by the Comptroller and the State Treasurer. The Comptroller, with the approval of the State Treasurer, may provide by rule for the electronic direct deposit of payments to the public agencies and any other payee of the State. The electronic direct deposits may be made to the designated account in those financial institutions specified in this Section for the direct deposit of payments. Within 6 months after the effective date of this amendatory Act of 1994, the Comptroller shall establish a pilot program for the electronic direct deposit of payments to local school districts, municipalities, and units of local government. The payments may be made without the use of the voucher-warrant system, provided that documentation of approval by the Treasurer of each group of payments made by direct deposit shall be retained by the Comptroller. The form and method of the Treasurer's approval shall be established by the rules or regulations adopted by the Comptroller under this Section.

AUTHORIZATION FOR ESTABLISHMENT OF DIRECT DEPOSIT

PAYMENTS – PAYROLL, PUBLIC AID AND RETIREMENT SYSTEMS

GENERAL

To authorize electronic deposits, payees from these systems must complete an Authorization for Deposit of Recurring Payments Form (C-95 or C-95A). See Exhibits 20.20.10-A and 20.20.10-B.

The Authorization for Deposit of Recurring Payments (C-95) is a three-part form, the copies of which are distributed as follows: Copy one of the completed form is retained by the employee's agency; copy two is retained by the financial institution; copy three is retained by the employee. An updated form, the C-95A, is a simplified, one-part form available from the Comptroller's Office Electronic Commerce Section. Either form is acceptable.

Retention of Forms C-95 & C-95A

The agency must retain the C-95 or C-95A for two years after the payee's direct deposit authorization is terminated.

Contents of Form C-95 (Exhibit 20.20.10-A)

- A. Name of Program Agency
- B. Type Payee Name
- C. Name of Payee
- D. Social Security Number of Payee
- E. Address of Payee (Apt. or P.O. Box, City, State, Zip)
- F. Payee Signature and Date
- G. Name of Financial Institution
- H. Street Address of Financial Institution
- I. City, State and Zip of Financial Institution
- J. Circle One: Checking Account or Savings Account
- K. Depositor Account Number
- L. Routing Number

When the form is completed fully, the payee should attach a voided check to the form and, if the employing agency requires, take it to his or her financial organization to complete (or verify) the bottom half of the form.

PRENOTES DEFINITION

The Comptroller's Office requires that a prenote be processed before an actual direct deposit (Electronic Funds Transfer) payment is made in all warrant systems, except for the State Income Tax Refund System.

A prenote is processed before the first direct deposit payment is made by the Comptroller's Office. A prenote is a zero dollar test transaction that is sent through the Automated Clearing House (ACH) network to the receiving financial institution. It takes six banking days to process. It conveys the same information, with the exception of the dollar amount and transaction code, that will be carried on subsequent dollar entries. The prenote notifies the payee's financial institution that their customer will be receiving electronic deposits into the account specified and identifies any errors with the account type, account number, or financial institution routing number. If the Comptroller's Office is not notified of any errors during the prenote process, the next payment issued to the payee will be processed as a direct deposit. If an error occurs, the agency/vendor will be notified that corrective action is needed.

The prenote processing procedures vary according to the various warrant systems, as described below.

PAYROLL

Employees may have salary payments electronically deposited into their savings or checking account at any bank, savings and loan association or credit union that is a member of the Automated Clearing House (ACH) network. Employees authorize electronic direct deposits by completing the Authorization for Deposit of Recurring Payments Form (C-95 or C-95A). The employee must complete the form providing all information requested. Some agencies may require the financial portion of the form to be completed by the employee's financial institution. The completed form must be submitted to the employing agency before the first direct deposit payment can be requested. Only one account can be designated by the employee for the direct deposit. The entire net pay will be deposited into this account. If the employee wishes to have a portion of the deposit transferred to another account, the employee must make arrangements with the financial institution.

A prenote transaction is processed automatically the first time an employee is coded "direct deposit" by the paying agency on the payroll voucher. Until the prenote process is completed successfully, payments are made by paper warrant. If the Comptroller's Office is not notified of errors following the prenote process, usually six banking days, the next payment to the employee will be by direct deposit. If an error occurs, the agency will be notified by the Comptroller's Office to take corrective action.

If direct deposit payees are inactive on the Payroll System for more than 365 days and wish to remain eligible to receive direct deposits in the future, they must repeat the enrollment and prenote process.

Employees whose earnings are subject to an offset (Involuntary Withholding) are ineligible for direct deposit and will receive hard copy payments.

Courts create prenote tapes for new participants and changes to active participants' information. Those tapes and detail listings are forwarded to the Electronic Commerce Section. Upon receipt of the tapes, the information is verified against the Comptroller's Authorization Master File. If no record is on the Master File, a prenote record is generated.

All salary earnings statements are maintained by the vouchering agency's Payroll Section.

FEDERAL TAX

Federal Tax payments are generated from the Payroll, Contractual and Retirement Systems. Prenotes were generated originally when federal tax began direct deposit payments.

SALARY AND RETIREMENT TRAILERS

The Comptroller's Office maintains all Payroll (salary) and Retirement trailer records. Upon receipt of the completed Authorization for Deposit of Recurring Payments Form (C-95 or C-95A) from the insurance companies, credit unions, unions, associations, and tax sheltered annuities, prenotes are generated manually, and after six banking days the trailer is "active" for direct deposit payments. The Electronic Commerce Section maintains the trailer records' authorizations.

RETIREMENT SYSTEMS

The Retirement Systems (TRS and SERS) create tapes that prenote new participants and create changes needed on active participants. These tapes and detail listings are forwarded to the Electronic Commerce Section. Upon receipt of the tapes, the information is verified against the Comptroller's Authorization Master File. If no record is found on the Master File, a new prenote record is generated.

Employees whose earnings are subject to an offset (Involuntary Withholding) are not eligible for direct deposit and will receive hard copy payments.

Retirement Earning Statements are not provided to the retiree with each direct deposit payment. Earnings statements are generated automatically by the Retirement System in the following circumstances: when a first time direct deposit payment is made; when a retiree's payment net amount has changed; and for all direct deposit participants at the end of the calendar year. The Electronic Commerce Section reviews the earnings statement for correctness and instructs the Warrant Distribution Section regarding mailing. Any undeliverable earnings statements returned to the Comptroller's Office are reviewed and sent to the proper retirement agency for correction.

STATE INCOME TAX REFUNDS

State income tax refund direct deposit payments are generated and sent to the Illinois Department of Revenue (IDOR) by tax preparers. The IDOR provides the state income tax refund payments information, including direct deposit transactions, to the Comptroller's Office on magnetic tapes. There are no prenote transactions processed for State Tax refunds. Payees whose tax refunds are subject to an offset (Involuntary Withholding) are not eligible for direct deposit and will receive hard copy payments.

PUBLIC AID SYSTEM

Payments made through the Public Assistance System are from the Department of Human Services for public assistance and child support. Magnetic tapes submitted to the Comptroller's Office provide the payment information as well as prenote records for new direct deposit participants and requests for changes on active participants.

CONTRACTUAL SYSTEM

Lottery "big" winners' annual payments are eligible for direct deposit. These payments are generated by the Department of Lottery and submitted to the Comptroller's Office on magnetic tape for payments processing. The Department of Lottery also creates prenote records of new direct deposit participants and bank account changes for processing by the Comptroller's Office. The Comptroller's Office generates prenote transactions and sends them on to the receiving banks. If no response is received from the receiving banks during the allotted six banking days, the vendor becomes active for direct deposit. Vendors (winners) that are subject to an offset (Involuntary Withholding) are not eligible for direct deposit and will receive hard copy payments. Earning statements are generated and mailed.

IMPORTANT NOTICE: This form is to be used only for State of Illinois Recurring Payments.

If you wish your payments sent to your financial institution for deposit into your savings or checking account, you must complete this form to authorize this action. Some agencies may require your financial institution to verify routing and account information. The State Comptroller will forward your recurring payments to the destination you authorize. The financial institution may be any bank, savings bank, savings and loan association or similar institution, or Federal- or state-chartered credit union that is a member of the Automated Clearing House Access Program. If you do not have an account at such a facility, you must contact a qualifying financial institution and establish an account prior to enrolling for direct deposit.

INSTRUCTIONS

Please type or print in ink all information requested.

1. Type or print the payee's **Social Security Number**. Do not include dashes.
2. Type or print the name of the person to whom the payment is made. This is the **Payee Name** except where a representative payee has been appointed or a guardian or conservator has been appointed by a Court.
3. Type or print the **Name of Program Agency**.
4. **Type/Print Payee Name** in the space provided, sign where indicated (**Signature of Payee**) and print **Date**.
5. Type or print the **Work Area Code and Telephone Number** of the payee or a number where the payee can be reached during the day.
6. Type or print the **Name of Financial Institution** in which the payee's account resides.
7. Type or print the **Financial Institution Area Code and Telephone Number**.
8. Type or print the financial institution **Branch Address, City, State, Zip Code** where the payee's account resides.
9. Type or print the 9-digit **Financial Institution Routing Number** that appears at the bottom of the payee's printed checks. (The program agency may require the payee to have this information verified by the financial institution prior to submitting the authorization form.)
10. Type or print the **Payee Account Number** that also appears at the bottom of the payee's printed checks. The number of digits varies among institutions.
11. **You must select one** account type to receive recurring payments (**Checking or Savings**). Payee must indicate which one of his accounts (Savings or Checking) should receive the recurring direct deposits.
12. **Attach a voided check** before submitting this completed form to your agency's payroll clerk. Do not substitute a deposit slip for the voided check. Financial institutions may alter numbers that appear on deposit slips for internal purposes.

CANCELLATION INSTRUCTIONS

When entered in the payee's record with the program agency, this authorization will remain in effect until canceled by notice to the program agency by the payee or in the event of death of the payee or the beneficiary of this payment. The financial institution should also be notified if the payee cancels this agreement. The financial institution may cancel their agreement by providing the payee with a written notice 30 days in advance of the cancellation date. The payee must advise the program agency immediately if this authorization is cancelled. The financial institution cannot cancel this authorization by advice to the program agency.

Privacy Act Notice

You previously provided your Taxpayer Identification Number (TIN), i.e. your social security number or your employer identification number, to the State of Illinois upon becoming a State of Illinois payee. Section 6109 of the Internal Revenue Code requires you to give your correct TIN to persons, such as the State of Illinois Office of the Comptroller, who must file documents with the Internal Revenue Service to report income paid to you, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA. The Illinois Office of the Comptroller, as administrator of the direct deposit program, requests verification of your TIN on the Authorization for Deposit of Recurring Payments. Your TIN verification enables proper payee identification and corresponding direction of payments as specified on your completed Authorization for Deposit of Recurring Payments. While not mandatory, failure to provide your TIN on the Authorization precludes your participation in the direct deposit program.

AUTHORIZATION FOR ESTABLISHMENT OF COMMERCIAL DIRECT DEPOSIT

Illinois Direct Deposit is the Comptroller's direct deposit program that electronically transmits State vendors' payments directly to their financial institution for posting to their designated accounts. It can also transmit payment information electronically to the financial institution along with the funds, if the information is provided appropriately on the payment voucher by the paying agency.

Individuals or companies who currently receive State Commercial payments may be eligible to participate in the direct deposit program. Illinois Direct Deposit requires that all payments issued to a single authorized vendor number (FEIN or SSN) must be deposited into one bank account. Starting September 1, 2000, the Comptroller's Office creates CTX transactions with multiple lines of addenda for payment descriptions to be delivered with the payments through the Automated Clearing House (ACH) network to the payee's financial institution. Effective September 1998, the National Automated Clearing House Association (NACHA) rules require that financial institutions provide the addendum information to any customer who requests it.

The Comptroller's Office does not provide notification of payment directly to the payee; however, after vouchers have been processed by the Comptroller's Office, Commercial payment information is accessible on the Comptroller's website.

The Comptroller's Office administers the Commercial enrollment and prenote processes for all regular Commercial vendor direct deposit participants. The Comptroller's Office lead bank processes regular commercial vendor prenotes and payments in accordance with NACHA standards. The Treasurer's Office maintains the enrollment and prenote process of Illinois Funds participants.

Vendors wishing to enroll in the Illinois Funds program (IPTIP) should contact the Illinois Treasurer's Office. Vendors wishing to enroll in Illinois Direct Deposit for Commercial Payments should contact the Comptroller's Electronic Commerce Section for detailed instructions and enrollment forms. Information regarding Illinois Direct Deposit is available on the web site www.ioc.state.il.us.

COMMERCIAL

(For vendors who provide goods and services to the State of Illinois)

IMPORTANT: *Illinois Direct Deposit* currently limits vendors to **one bank account per Vendor Number** (SSN/FEIN). Before enrolling, be sure that you are authorized to direct all State of Illinois payments issued under your Vendor Number into one account. If you are uncertain, you may review your payment history on the *Vendor Payments* section of the Comptroller's Web site (www.ioc.state.il.us) or call the Comptroller's Office at 217/557-0930 for assistance.

[To reduce the risk of errors, please type or print (in ink) the information requested on the form.]

1. Enter the payee's Vendor Number (SSN or FEIN) and check the appropriate type (SSN or FEIN) below.
2. Enter Payee's Last Name (or Company Name) and First Name as it appears on current payments.
3. Enter Payee's Mailing Address (including applicable suite, apartment or post office box numbers). This should be the address of the payee where mailings from the Comptroller would be directed, if necessary, regarding the direct deposit program.
4. Enter City, State and Zip Code for the Mailing Address entered on Line 3.
5. Enter Payee's Area Code and Telephone Number.
6. If applicable, enter the Area Code and Telephone Number of payee's fax machine.
7. REMITTANCE OPTIONS: Your need for remittance information (vendor invoice number, invoice date) determines the manner in which your payments will be processed by the Comptroller's Office. Please read the information below carefully before selecting an option:
 OPTION A:
Select this option if you **do not need any remittance information**. By doing so, you instruct the Comptroller's Office to direct all Commercial payments electronically, whether or not electronic remittance information is provided by paying agencies. *NOTE: If you receive **Adoption, Guardianship, Foster Care Subsidy** or **Child/Day Care** payments from the Department of Children and Family Services or the Department of Human Services, **you must select this option (A)** because these agencies do not always provide the information required on their payment vouchers.*
 OPTION B:
Select this option if you **do** need minimal remittance information (Vendor Invoice Number, Invoice Date). If the paying agency enters this information on the voucher, the Comptroller's Office will transmit the information electronically with the payment to your financial institution. If the paying agency does not provide the required information, the Comptroller's Office will generate a warrant (paper check) and mail it to you at the address that appears on the payment voucher.
IMPORTANT NOTE: If you need remittance information, it is important that you contact your financial institution and discuss how they will provide your electronic remittance information to you. They will need to know that State of Illinois electronic payments are presented as Corporate Trade Exchange (CTX) transactions with multiple addenda records formatted in the ANSI X12 820 Standard through the Electronic Data Interchange (EDI) process.
8. After reading the Certification Statement, the Authorizing Person prints his/her name, signs where indicated (in ink) and enters the Date the form is signed.
9. Enter the Authorizing Person's Area Code, Telephone Number (and E-mail address, if available).
10. Enter the transit Routing Number of payee's Financial Institution.
11. Enter the payee's designated Account Number.
12. Indicate with a check mark the Type of account designated, whether Checking or Savings.
13. Enter the name of payee's Financial Institution and its Area Code and Telephone Number.

MEDICAID PAYEES who enroll for direct deposit will continue to receive their EOBs (Explanation of Benefits) through the mail from the agency.

NON-MEDICAID PAYEES will only receive remittance information electronically IF entered by the paying agency on the payment voucher. Limited information may also be viewed on the Comptroller's web site.

Privacy Act Notice: You previously provided your Taxpayer Identification Number (TIN), i.e. your social security number or your employer identification number, to the State of Illinois upon becoming a State of Illinois payee. Section 6109 of the Internal Revenue Code requires you to give your TIN to persons, such as the State of Illinois, who must file information returns with the IRS to report interest, dividends, and certain other income paid to you, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA. The Illinois Office of the Comptroller, as administrator of the Illinois Direct Deposit program, requests verification of your TIN on the Authorization for Direct Deposit of Payments. Your TIN verification enables proper payee identification and corresponding direction of payments as specified on your completed Authorization for Direct Deposit of Payments. While not mandatory, failure to provide your TIN on the Authorization precludes your participation in the Illinois Direct Deposit program.

Prompt Payment Notice: Payment of interest may be available if the State fails to comply with the State Prompt Payment Act (Ill. Rev. Stat. 1991, ch. 127, par. 132.400 et seq.) [30 ILCS 540].

COMMERCIAL PAYMENT PROCESSING

Agencies provide payment and payment-related data to the Comptroller's Office via magnetic tape. Agencies currently use either the 900 tape format or the 900M tape format (Version 1 or 2). The 900M format is used for the paperless Commercial transactions. Therefore, each 900M record contains imperative information needed by the Comptroller's Office to audit the transaction. This information is carried in a 360-character area that represents six (6) lines of sixty (60) characters each. These six (6) lines are printed on the remittance portion of the paper warrant document. For electronic payments, beginning September 1, 2000, an additional sixty (60) characters are allotted to provide for remittance information to be included in the addendum record. None of the six (6) lines for the hard copy remittance are included in the electronic remittance information, nor are the 60 characters for the electronic payment included in the hard copy remittance with the warrant. If Version 2 of the 900M format is utilized by agencies, two of the nineteen additional remittance fields from the Voucher Addenda Record (Customer ID, Billing Account) will appear on both the electronic record and the warrant stub.

The electronic 60-character remittance field is located in positions 379-438 on the 900M format. This field offers agencies the opportunity to enhance the quality of payment description provided to payees who have elected to receive electronic payments with remittance information. This field may contain descriptive information other than the invoice number, invoice date and paying agency code, which are passed electronically to direct deposit vendors. If an agency does not intend to use this remittance field for payment description, this field must be left blank. If left blank, the Comptroller's Office automatically fills that field with the payment voucher number and phone number of the SAMS Help Desk. Agencies are encouraged to use this field to provide additional remittance information to their EFT vendors. Agencies should communicate with their vendors to determine what information is needed.

CONFIDENTIALITY INDICATOR

Effective September 1, 2000, agencies were given the opportunity to mark payment vouchers as confidential or non-confidential. For vouchers that are marked non-confidential, the Comptroller's Office will make the associated text information (bytes 379-438 and bytes 527-886) available through the Comptroller's web site (*linc.net*) to vendors. For vouchers that are marked confidential, the Comptroller's Office will not make the associated text information available through the Comptroller's web site to vendors. However, for vouchers marked confidential, the Comptroller will continue to make the current fiscal information available, along with the agency's contact telephone number.

The confidentiality indicator is located in byte 887 of the tape layout. The allowable codes for that field are "Y", "N", or blank. A blank field or the code "Y" indicates that the associated text information is confidential and that it will not be disclosed on the Comptroller's web site. The code "N" indicates that the associated text information is not confidential and will be disclosed on the Comptroller's web site.

ILLINOIS FUNDS

Agencies making payments to the Treasurer's Illinois Funds participants should use the 60-character remittance field to describe the payment. For example: "IDOR – Replacement Tax." Agencies are encouraged to take advantage of this remittance description field. If the field is left blank, the Comptroller's Office system will add automatically the voucher number and the text "Illinois Funds Payment."

To ensure that payments are direct deposited into Illinois Funds, agencies must either (1) put an "8" in the EFT indicator field (byte 348) of the 900 or 900M commercial voucher tape layout or (2) enter five nines (99999) in the Zip Code field. The Comptroller's Office is in the process of phasing out the second option; however, for the short term, this option remains one of the two methods that ensure direct deposit payments to Illinois Funds.

OTHER AVAILABLE FEATURES

Another feature of the Commercial Electronic Commerce Program allows the agencies to override an electronic deposit authorization, and create a paper warrant for an individual payment. By placing a "9" in the EFT indicator field (byte 348 of the 900 or 900M format of the Commercial voucher tape), a paper warrant is issued and the following message is printed on the paper warrant (stub). "*This payment was switched from EFT to hard copy pursuant to a request from the paying agency.*" This indicator should be used only in instances where there is a specific need for a paper warrant, or the payee has specifically requested to receive a paper warrant. It is recommended that agencies use a segment of the available 360-character invoice description field to explain the reason the payment was converted to a paper warrant.

The Comptroller's Office has enhanced the editing features for direct deposit payments. SAMS now edits the name field on EFT payments to match the name to the Vendor File. All EFT payments that do not pass this edit will be rejected, corrected and default to a hard copy warrant.

If an agency is interested in identifying electronic payments, the vendor's EFT status can be checked on SAMS. Agencies who have access to SAMS can inquire on the VEN2 screen. Electronic payment vendors will have an EFT status of "A." Agencies who use the daily vendor file (distributed by CMS) can refer to the EFT indicator on that file.

The Comptroller's Office plans to continue enhancing the Commercial Electronic Deposit Program. Please address questions to the Electronic Commerce Section at 217/557-0930.

PROCEDURE	AUTHORIZATION UPDATES-CHANGES	REVISION NUMBER 09-002

AUTHORIZATION UPDATES-CHANGES

The Comptroller's Office receives electronic files from the lead banks with proper paperwork that identifies change notices, rejected items and returned items.

Definitions:

- A change notice means the financial institution accepted the item but needs information changed on the Comptroller's Office Authorization master file (e.g., name changes, bank account number changes or changes in the depositor's account selection).
- A rejected item means the lead bank rejected the item due to invalid routing number data or by request from the Comptroller's Electronic Commerce section.
- A returned item means that the item successfully reached the payee's financial institution but could not be posted. The reasons for returns are many and varied.

The Comptroller's Office receives paperwork for any of the above items on the Payroll and Contractual, Public Aid, Retirement, State Tax Refund and Commercial systems. The Electronic Transfer (ET) system generates a Direct Deposit Return report (ETR116) (Exhibit 20.20.40-A), which identifies the returned transactions and the reasons for direct deposit refusal. A copy of the ETR116 report is generated from the various systems and sent to the payee's agency as notification of such items. The Electronic Commerce section retains copies of the ETR116 reports for Commercial payees. A hard copy warrant is issued for any direct deposit item that has been rejected or returned by a financial institution.

If a payee's direct deposit record remains inactive for one year on the Authorization file, the record is automatically deleted except for commercial authorizations which are automatically deleted after 18 months of inactivity.

If it is determined that a payee's direct deposit status should become inactive, the Comptroller's Electronic Commerce section staff will terminate that payee's record on the Authorization file.

PROCEDURE	INTRODUCTION	REVISION NUMBER 98-001

INTRODUCTION

This section of the SAMS Manual explains in general the workflow and procedural requirements associated with the issuance, payment, and exception processing of warrants.

The Comptroller can draw a warrant only when she/he is presented with an itemized, properly approved and certified voucher. After satisfying herself/himself as to the legality and regularity of such a voucher, and the availability of appropriated funds or other expenditure authority, the Comptroller prepares a warrant ordering the Treasurer to pay the requested amount to the payee. The warrant must then be countersigned by the Treasurer, after which the Comptroller prepares it for mailing or other delivery to the payee. A warrant becomes issued and thus outstanding when the warrant leaves the custody of the Comptroller.

Although there are differences, a warrant may be regarded as the equivalent of a check in commercial or private practice. Technically, a warrant is a negotiable instrument drawn by the Comptroller on the State Treasury to effect payment from funds held by the Treasurer for debts incurred by State agencies or for fund transfers authorized for payment by the Comptroller. In effect, it is an order to the State Treasurer from the Comptroller to honor the claim of the bearer when the warrant is presented to the Treasurer for payment.

This subsection, the Overview, presents statutory references relating to warrants and describes the general system flow associated with the payment and exception processing of warrants.

STATUTE REFERENCE

Statutory authority for the issuance, return, voidance and replacement of warrants is contained in the "State Comptroller Act ([15 ILCS 405](#)).\" Guidance in applying these provisions is contained throughout this section.

15 ILCS 405/9

Sec 9. Warrants; vouchers; preaudit.

(a) No payment may be made from public funds held by the State Treasurer in or outside of the State treasury, except by warrant drawn by the Comptroller and presented by him to the treasurer to be countersigned except for payments made pursuant to Section 9.03 or 9.05 of this Act.

(b) No warrant for the payment of money by the State Treasurer may be drawn by the Comptroller without the presentation of itemized vouchers indicating that the obligation or expenditure is pursuant to law and authorized, and authorizing the Comptroller to order payment.

(c) The Comptroller shall examine each voucher required by law to be filed with him and determine whether unencumbered appropriations or unencumbered obligational or expenditure authority other than by appropriation are legally available to incur the obligation or to make the public funds. If he determines that unencumbered appropriations or other obligational or expenditure authority are not available from which to incur the obligation or make the expenditure, the Comptroller shall refuse to draw a warrant.

(d) The Comptroller shall examine each voucher and all other documentation required to accompany the voucher and shall ascertain whether the voucher and documentation meet all requirements established by or pursuant to law. If the Comptroller determines that the voucher and documentation do not meet applicable requirements established by or pursuant to law, he shall refuse to draw a warrant. As used in the Section, "requirements established by or pursuant to law" includes statutory enactments and requirements established by rules and regulations adopted pursuant to this Act.

(e) Prior to drawing a warrant, the Comptroller may review the voucher, any documentation accompanying the voucher, and any other documentation related to the transaction on file with him, and determine if the transaction is in accordance with the law. If based on his review the Comptroller has reason to believe that such transaction is not in accordance with the law, he shall refuse to draw a warrant.

(f) Where the Comptroller refuses to draw a warrant pursuant to this Section, he shall maintain separate records of such transactions.

(g) State agencies shall have the principal responsibility for the preaudit of their encumbrances, expenditures, and other transactions as otherwise required by law.

PROCEDURE	STATUTE REFERENCE	REVISION NUMBER 11-002

Time for Presentation of Warrants-Effect of Failure to Present-Date of Warrant. (15 ILCS 405/10.07)

Sec. 10.07. Warrants not presented to the State Treasurer within 12 months of the date of issuance shall be void, and the State Treasurer shall not pay any warrant presented to him or her after 12 months. Each warrant shall clearly bear a warning that it is void after 12 months from the date of issuance. Warrants outstanding after 12 months after issuance by the comptroller shall be cancelled by the comptroller and the State Treasurer. Each warrant shall show on its face the date of its issuance.

Warrants Undeliverable to Payee. (15 ILCS 405/10.08)

Sec. 10.08. Warrants undeliverable to the payee. If any warrant is undeliverable to the payee, it shall be returned to the comptroller, who shall if he determines that the warrant is undeliverable mark the face of the warrant "Canceled for Redeposit", cancel the warrant and transmit written notice to the vouchering agency of such cancellation.

Upon receiving a warrant returned for redeposit, the comptroller may redeposit it with the State Treasurer. Warrants mailed by the comptroller to the payee (or the payee's designated addressee) may be considered undeliverable if returned by the United States Postal Service after attempted delivery or may be remailed once by the Comptroller within 30 days of the date of return to a corrected address supplied by the issuing agency except that warrants paying grants to individuals under the Illinois Public Aid Code shall not be remailed. Warrants returned uncashed to the comptroller by any State agency, or by any person other than the payee, may, after inquiry as to its deliverability if the warrant is not void, be treated as an undeliverable warrant under this Section. Warrants returned to the comptroller which he determines to be deliverable or redeliverable shall be mailed by him to the payee or other designated addressee if a reasonable time remains before the warrant shall become void.

Return of Undeliverable Warrant in Possession of State Agency. (15 ILCS 405/10.09)

Sec. 10.09. Any warrant which comes into the possession of a State agency after delivery to the payee or after an attempt to deliver the warrant to the payee shall be promptly returned by the agency to the comptroller, and shall not be redelivered to the payee by any such agency. Upon the receipt of each returned warrant, the comptroller shall treat such warrant as provided in Section 10.08.

Lost, Mislaid, Destroyed or Void Warrants-Replacement Warrants.
(15 ILCS 405/10.10)

Sec. 10.10. (a) If any comptroller's warrant is lost, mislaid or destroyed, or becomes void after issuance, so that it cannot be presented for payment by the person entitled thereto, the comptroller, at any time before that warrant is paid by the State Treasurer, but within 5 years of the date of issuance, may issue a replacement warrant to the person entitled thereto. If the original warrant was not cancelled or did not become void, the comptroller, before issuing the replacement warrant, shall issue a stop payment order on the State Treasurer and receive a confirmation of the stop payment order on the original warrant from the State Treasurer.

(b) Only the person entitled to the original warrant, or his heirs or legal representatives, or a third party to whom it was properly negotiated or the heirs or legal representatives of such party, may request a replacement warrant. In the case of a warrant issued to a payee who dies before the warrant is paid by the State Treasurer and whose estate has been probated pursuant to law, the comptroller, upon receipt of a certified copy of a judicial order establishing the person or entity entitled to payment, may issue a replacement warrant to such person or entity.

(c) Within 12 months from the date of issuance of the original warrant, if the original warrant has not been canceled for redeposit, the comptroller may issue a replacement warrant on the original voucher drawing upon the same fund and charging the same appropriation or other expenditure authorization as the original warrant.

(d) Within 12 months from the date of issuance of the original warrant, if the original warrant has been canceled for redeposit, and if the issuance of the replacement warrant would not over-obligate the appropriation or other expenditure authority against which it is drawn, the comptroller may issue the replacement warrant. If the original warrant was issued against an appropriation or other expenditure authority which has lapsed, the replacement warrant shall be drawn on the Warrant Escheat Fund. If the appropriation or other obligational authority against which the replacement warrant is drawn has not lapsed, the comptroller shall notify the originating agency of the request for a replacement warrant and shall receive a replacement voucher from that agency before drawing the replacement warrant, which shall be drawn on the same fund and charged to the same appropriation or other expenditure authority as the original warrant.

(e) Within 12 months from the date of issuance of the original warrant, if the original warrant has been canceled for redeposit, the comptroller may not issue a replacement warrant where such issuance would over-obligate the appropriation or other expenditure authority against which the original warrant was drawn. Whenever the comptroller is presented with a request for a replacement warrant which may not be issued under the limitation of this subsection, if the appropriation or other expenditure authority against which the original warrant was drawn has not lapsed, the comptroller shall immediately inform the originating agency of the request and that the request may not be honored because of the resulting over-obligation, and shall request the agency to determine whether or not that agency will take some corrective action before the applicable expenditure authorization lapses. The originating agency shall respond to the comptroller's inquiry within 5 business days.

(f) After 12 months from the date of issuance of the original warrant, if the original warrant has not been cancelled for redeposit, the comptroller shall issue the replacement warrant on the Warrant Escheat Fund.

(g) Except as provided in this Section, requests for replacement warrants for more than \$500 shall show entitlement to such warrant by including an affidavit, in writing, sworn before a person authorized to administer oaths and affirmations, stating the loss or destruction of the warrant, or the fact that the warrant is void. However, when the written request for a replacement warrant submitted by the person to whom the original warrant was issued is accompanied by the original warrant, no affidavit is required. Requests for replacement warrants for \$500 or less, shall show entitlement to such warrant by submitting a written statement of the loss or destruction of the warrant, or the fact that the warrant is void on an application form prescribed by the Comptroller. If the person requesting the replacement is in possession of the original warrant, or any part thereof, the original warrant or the part thereof must accompany the request for replacement. The comptroller shall then draw such replacement warrant, and the treasurer shall pay the replacement warrant. If at the time of a loss or destruction a warrant was negotiated to a third party, however (which fact shall be ascertained by the oath of the party making the application, or otherwise), before the replacement warrant is drawn by the comptroller, the person requesting the replacement warrant must give the comptroller a bond or bonds with sufficient sureties, to be approved by the comptroller, when required by regulation of the comptroller, payable to the People of the State of Illinois, for the refunding of the amount, together with all costs and charges, should the State afterwards be compelled to pay the original warrant.

Escheated Warrant-Warrant Escheat Fund.

When a warrant becomes void and is canceled under Section 10.07, any money which has been set aside by the comptroller and the State Treasurer for the payment of such warrant shall escheat to the State of Illinois, and shall be paid into the Warrant Escheat Fund.

(15 ILCS 405/10.16)

Sec. 10.16. If the comptroller refuses to draw and issue a replacement warrant under Section 10.10, persons who are entitled under Section 10.10 to request a replacement warrant may file an action in the Court of Claims for the payment of the sum indicated due on the warrant. For the purpose of the limitations prescribed in Section 22 of "An Act to create the Court of Claims, to prescribe its powers and duties, and to repeal an Act herein named", filed July 17, 1945, as now or hereafter amended, the actions created in this Section shall accrue from the date of the Comptroller's refusal.

Direct Deposit of State Payments. (15 ILCS 405/9.03)

Sec. 9.03. Direct Deposit of State payments. The Comptroller, with the approval of the State Treasurer, may provide by rule or regulation for the direct deposit of any payment lawfully payable from the State Treasury and in accordance with federal banking regulations including but not limited to payments to: (i) persons paid from personal services, (ii) persons receiving benefit payments from him under the State pension systems, (iii) individuals who receive assistance under Articles III, IV and VI of The Illinois Public Aid Code, (iv) providers of services under the Mental Health and Developmental Disabilities Administrative Act, (v) providers of community-based mental health services, and (vi) providers of services under programs administered by the State Board of Education, in the accounts of those persons or entities maintained at a bank, savings and loan association, or credit union, where authorized by the payee. The Comptroller also may deposit public aid payments for individuals who receive assistance under Articles III, IV, VI, and X of the Illinois Public Aid Code directly into an electronic benefits transfer account in a financial institution approved by the State Treasurer as prescribed by the Illinois Department of Human Services and in accordance with the rules and regulations of that Department and the rules and regulation adopted by the Comptroller and the State Treasurer. The Comptroller, with the approval of the State Treasurer, may provide by rule for the electronic direct deposit of payments to public agencies and any other payee of the State. The electronic direct deposits may be made to the designated account in those financial institutions specified in this Section for the direct deposit of payments. Within 6 months after the effective date of this amendatory Act of 1994, the Comptroller shall establish a pilot program for the electronic direct deposit of payments to local school districts, municipalities, and units of local government. The payments may be made without the use of the voucher-warrant system, provided that documentation of approval by the Treasurer of each group of payments made by direct deposit shall be retained by the Comptroller. The form and method of the Treasurer's approval shall be established by the rules or regulations adopted by the Comptroller under this Section.

SECTION	WARRANTS	PROCEDURE - PAGE NO. 21.10.30 1 of 1
SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 1997
PROCEDURE	WARRANTS NO LONGER OUTSTANDING	REVISION NUMBER 98-001

WARRANTS NO LONGER OUTSTANDING

After a warrant is issued, it is subsequently recorded on the Comptroller's records as no longer outstanding (i.e., cleared) when any of the following events occur.

PAID WARRANTS

When a warrant is presented for payment to the Treasurer and she/he honors the claim, the warrant is paid and thus no longer outstanding.

ESCHEATED WARRANTS

If a warrant has been outstanding after issuance for more than 12 months, it is escheated (void) and thus no longer outstanding. The only exception to this is that warrants issued from Toll Highway Authority Funds are not presently subject to escheatment; however, they are subject to automatic warrant voiding because of time.

CANCELLED WARRANTS

When an outstanding warrant, less than 12 months old, is cancelled and the amount of the warrant is redeposited in the original fund and appropriation account (if not lapsed), the warrant is cancelled and no longer outstanding. If the appropriation has lapsed, only the fund is credited. A warrant may be cancelled when an agency notifies the Comptroller that (1) a warrant was issued erroneously and the State has the warrant in its possession or (2) if it is determined that a warrant is undeliverable (e.g., the U.S. Postal Service returns a warrant as undeliverable).

SECTION	WARRANTS	PROCEDURE - PAGE NO. 21.10.40 1 of 4
SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 1997
PROCEDURE	ISSUED WARRANT EXCEPTION PROCESSING	REVISION NUMBER 98-001

ISSUED WARRANT EXCEPTION PROCESSING

If an agency determines that it has some reservations concerning a voucher submitted to the Comptroller for warrant processing, or is in need of a replacement warrant, it has the following options available to remedy the situation. In each instance, a Warrant Action Request Form, C-50, must be prepared and submitted to the Adjustment Section of the Comptroller's Office.

PRE-MAIL HOLDS

The agency may request the Comptroller to attempt to withhold the warrant before mailing. This is known as a last-minute hold, and may be effected after the submission of the voucher and the actual generation of the warrant. If the Comptroller successfully effects the hold, the agency has 30 days to instruct the Comptroller on the disposition of the warrant (e.g., mail, change address, or cancel for redeposit); an item held for 30 days is considered undeliverable and will be canceled for redeposit. In the event a last-minute hold cannot be effected, the Comptroller may issue a stop-pay order to the Treasurer at the request of the vouchering agency.

The Warrant Action Request Form (C-50) on all pre-mail pull requests, must be signed by the agency head or by someone authorized to affix the agency head's signature for the type of voucher involved. The signature(s) must match that of the appropriate signature card on file in the Comptroller's Office.

STOP-PAYMENT

A stop-payment may be requested by the Comptroller as a result of a replacement request from the payee, or agency, (RPS); an agency request for a stop-payment (no replacement) (RAS), or an unsuccessful last-minute hold (e.g., the warrant was mailed before the hold request could be effected). Once a stop-payment has been placed, a warrant will not be honored by the Treasurer.

RELEASE OF STOP-PAYMENT

An agency may request the release of an agency stop-payment (RAR) (where no replacement was to be made) which will, in effect, allow the specific warrant to be honored for payment by the Treasurer.

A replacement request may be reversed by requesting to rescind the replacement request (RPR), provided that the Comptroller has not issued the replacement warrant.

WARRANT REPLACEMENT

If an agency receives communication from the payee that a warrant was lost, destroyed, not received or stolen, the agency may transmit to the Comptroller a Warrant Action Request form (C-50) or the payee's request to issue a replacement warrant; however, Section 10.10 of the Comptroller Act necessitates that certain requirements be met before a replacement warrant is issued. A request for the stop payment and replacement of any payroll warrant must originate with the employees' payroll office and must be signed by an agency official who is authorized to sign payroll vouchers.

1. Stop-pay

The Comptroller must issue a stop-payment order and receive confirmation of stop-payment on the original warrant from the State Treasurer.

2. Time Limits

The replacement warrant must be issued by the Comptroller within five years of the issue date of the original warrant. Reimbursement requests for a claim based on a warrant over five years old, must be requested through the Court of Claims.

3. Certification

Except as noted below, for warrants more than \$500.00, the applicant must execute a notarized affidavit certifying loss or destruction of the original warrant and that subsequent to the execution of the affidavit she/he will not negotiate the original warrant. Further, she/he must certify entitlement and aver that she/he will return the original warrant, if discovered, to the Comptroller. This certification must be forwarded to the Comptroller. For warrants \$500.00 or less the applicant shall show entitlement by completing a written statement indicating the loss or destruction of the warrant, or the fact that the warrant is void.

If the warrant is escheated (more than 12 months old) and the original warrant is submitted with a request that it be replaced in the original name, no affidavit is required.

PROCEDURE	ISSUED WARRANT EXCEPTION PROCESSING	REVISION NUMBER 98-001

4. Third Party Certification

If the original warrant was negotiated to a third party, the third party must execute a notarized affidavit (except as noted in #3) certifying loss or destruction of the warrant and showing entitlement to the warrant. She/He must aver that she/he has not and will not negotiate the original warrant and that she/he will return the warrant, if discovered, to the Comptroller. This certification must be forwarded to the Comptroller, who may require a bond with sufficient sureties as required at the discretion of the Comptroller.

VOUCHERING REQUIREMENTS

I. Replacement Warrants Issued Within Twelve Months of Date of Issue of the Original Warrant.

A. Original Warrant not Canceled for Redeposit.

If a replacement warrant is to be issued within twelve months from the date of issuance of the original warrant, and the original warrant has not been returned to the Comptroller and canceled for redeposit, the replacement warrant is issued on the original voucher.

B. Original Warrant Canceled for Redeposit.

(1) If a replacement warrant is to be issued within twelve months from the date of issuance of the original warrant, and the original warrant was canceled for redeposit, the agency must prepare a new voucher and forward it to the Comptroller. The voucher must be drawn on the same appropriation or expenditure authority on which the original was drawn unless it has lapsed or is completely encumbered.

(2) If the appropriation of a canceled warrant is lapsed or completely encumbered, a voucher, drawn on the Warrant Escheat Fund, is necessary to effect payment.

II. Replacement Warrants Issued Twelve Months to Five Years from the Date of the Original Warrant.

- A. If a replacement warrant is to be issued from 12 months to five years from the date of issue of the original warrant, the warrant is drawn on the Warrant Escheat Fund except in cases in which the original warrant was drawn on Toll Highway Authority funds.
- B. In cases in which the original warrant was drawn on a Toll Highway Authority fund, a new voucher must be submitted.

III. Name Change Requests

SECTION	WARRANTS	PROCEDURE - PAGE NO. 21.10.50 1 of 2
SUB-SECTION	OVERVIEW	EFFECTIVE DATE January 1, 2005
PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 05-002

DOCUMENT DESCRIPTION

The documents associated with the processing of warrants may be categorized as either source documents or control documents. Source documents are those documents forwarded to the Comptroller to initiate action associated with the processing of warrants. Control documents are those documents the Comptroller transmits to the agencies to notify them of action taken, action not taken or of deficiencies in the source of the documents found in each category. Detailed document descriptions, associated preparation instructions and handling procedures are located in (subsections 20 and 30.)

SOURCE DOCUMENTS

A. Vouchers

A voucher is a document which, when properly certified, authorizes the Comptroller to order payment through issuance of a warrant. Receipt of a voucher by the Comptroller initiates the action necessary for issuing a warrant. A more detailed discussion of each type of voucher and their uses may be found in Section 17, Pre-Audit and Commercial Vouchering.

B. Replacement Warrant Request & Affidavit (Form SCO-061)
(Exhibit 21.20.10-A)

A Replacement Warrant Request & Affidavit is the application and request form that a payee or other legitimate claimant must complete in order to receive a replacement warrant. For warrants issued for more than \$500.00, the affidavit must be properly completed, notarized, and received by the Comptroller, for the process of issuing a replacement warrant. Affidavits are automatically sent to all applicants upon placement of the stop payment request against the original warrant, or upon the request to reissue an escheated warrant. The form to be completed for replacement requests outside the limits outlined above is the same, except the notarization requirement is not applicable.

If the warrant is escheated and the original warrant is submitted for replacement to the original payee(s) no replacement warrant request and affidavit is required.

C. Warrant Action Request (Form C-50) (Exhibit 21.20.20-A)

A Warrant Action Request is the form used by an agency to initiate any of the following types of action:

- . Stop-Payment (Agency) - prevents warrant replacement
- . Warrant Replacement - automatically places stop payment (payee) which allows replacement
- . Release of stop payment
- . Cancellation
- . Remailing
- . Pre-Mail Holds

When the Warrant Action Request is properly completed, it is forwarded to the Comptroller who then initiates processing of the requested action.

CONTROL DOCUMENTS

A. Notice of Returned Warrant (Exhibit 21.30.30-A)

The Notice of Returned Warrant is used to notify an agency of a warrant that was returned to the Comptroller either by the U.S. Postal Service as undeliverable or by the payee. The notice requests the agency to advise the Comptroller of the further disposition of the warrant (e.g., cancel or re-mail).

B. Agency Notification of Warrants Cancelled for Redeposit (Exhibit 21.30.40-A)

The Agency Notification of Warrants Cancelled for Redeposit is used to notify an agency that warrants were canceled for redeposit. The report is ordered by appropriation account code sequence within fund with total credit amounts for each appropriation account listed.

C. Agency Notification of Warrants Replaced (Exhibit 21.30.70-A)

The Agency Notification of Warrants Replaced is used to notify an agency that a replacement warrant has been issued.

OFFICE OF THE COMPTROLLER**

SECTION	WARRANTS	PROCEDURE - PAGE NO. 21.10.60 1 of 1
SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 1997
PROCEDURE	SYSTEM CONTROLS	REVISION NUMBER 98-001

SYSTEM CONTROLS

REQUIREMENTS FOR WARRANT EXCEPTION PROCESSING

Before the Comptroller begins exception processing on issued warrants, she/he confirms that the subject warrant was issued and its status does not conflict with the action requested (e.g., the Comptroller cannot place a stop-payment on a warrant whose status is "Paid). Additionally, in the event that a replacement warrant is requested, the replacement warrant cannot be issued until a stop-payment has been placed against the warrant to be replaced and a properly completed "Replacement Warrant Request & Affidavit" or "Written Statement" form has been received by this Office.

WARRANT STATUS CAPABILITY

The Comptroller maintains records of all warrants issued and their subsequent disposition. These records are updated daily and their ready access allows the Comptroller to quickly verify a warrant's status before any exception processing occurs.

PRE-ISSUE HOLDS

The Comptroller's System prevents the issuance of warrants when the authorizing voucher has not passed the audit process. Once the voucher has passed the audit and been released for payment, the issuance of the warrant cannot be stopped and the warrant cannot be pulled. This feature provides control by creating an environment that allows a thorough audit of exception warrants before they are mailed.

WARRANT CANCELLATION

When a warrant is in State possession, an agency may request its cancellation, if the warrant was drawn on an appropriation over which it has jurisdiction.

STOP-PAYMENT

The Comptroller can effect or rescind a stop-payment within 24 hours of receipt of a stop-payment or release instruction from either the vouchering agency or the payee. The system differentiates stops placed by the vouchering agency to prevent the payee from releasing an agency requested stop-payment.

FORGERY

Forgery investigations are conducted by the Warrant Division of the Treasurer's Office with the assistance of the Comptroller.

REPLACEMENT WARRANT REQUEST AND AFFIDAVIT
(Exhibit 21.20.10-A)

(To be completed for Warrants as Outlined in Section 21.10.40, Under Certification.)

PURPOSE

The Replacement Warrant Request and Affidavit (Form SCO-061) is the application that a payee or other legitimate claimant must complete in order to receive a replacement warrant. (See procedure 21.10.40 for limitations). Reimbursement for forged or misendorsed warrants is obtained through the Office of the Treasurer, which has its own affidavit form.

DISTRIBUTION

The Request & Affidavit forms are sent directly to the claimant by the Comptroller's Office for her/his completion. This form must both be properly completed and in the Comptroller's possession before a replacement may be issued.

CONTENTS

The payee (or other claimant) should fill in their address, complete the oath and have it notarized. The Comptroller will complete the area labeled "original warrant data" and the name.

COMPLETION

Incomplete forms (i.e., those lacking a signature, notarization, etc.) do not give authority for the issuance of a replacement warrant. A second form will then be sent to the claimant for proper completion.

TIMING

Warrants may be replaced by the Comptroller up to five years from date of issuance of the original warrant. The completed SCO-061 form must be in the Comptroller's possession before that time elapses.

This Office may replace warrants for a period up to five years from date of issue, after which any request for reimbursement must be directed to the Court of Claims.

Dear Claimant:

The Comptroller's Office has received a request for a replacement of the check referenced on the affidavit on the reverse side. In order that a replacement check may be issued, the affidavit should be completed by the claimant(s) and returned to this office **BEFORE FIVE YEARS FROM THE ISSUE DATE OF THE CHECK.**

- () **STOP-PAYMENT: DO NOT ATTEMPT TO NEGOTIATE THIS CHECK!**
If you receive the check in good condition, return this affidavit along with a written request to release stop-payment. You will receive notification by mail when the stop-payment has been released and you may negotiate the check. If you receive the check in poor condition or do not receive the check at all, complete the affidavit and return it to this office, at which time we will issue a replacement check.
- () **ESCHEAT REPLACEMENT:** This replacement request was given for a check that has become void. If the check is in your possession, please write "VOID" across it and return it to this office along with the replacement affidavit.

Please complete the steps indicated below:

- () The payee, or claimant, must sign the affidavit. If there is more than one payee, each person must sign the affidavit.
- () If the amount of the check is more than \$500.00, the affidavit requires completion and signature in the presence of a Notary Public or Judge, who will witness the affidavit.
- () If the amount of the check is \$500.00 or less, the affidavit requires completion and the signature of the claimant(s) but does not require notarization.
- () If the claimant is a business or governmental entity, the person completing the affidavit on behalf of that business/governmental entity **must specify** his/her name and organization on the space provided.
- () If someone other than the payee is completing the affidavit on behalf of the payee, a copy of the court documents which designate that person, such as: Power of Attorney, Plenary Guardian, Trustee or Conservator, must be provided.

Upon receipt of a properly completed and signed affidavit, we will issue a replacement check. Please contact the Adjustments Section at (217) 785-1129 for questions concerning checks that are less than 12 months old. For checks that are over 12 months old, please contact the Adjustments Section at (217) 785-1130.

PURPOSE

The Warrant Action Request form (Exhibit 21.20.20-A) is the form used by an agency to initiate any of the following types of exception actions on a warrant:

- Pre-Issue Hold
- Warrant Replacement
- Rescind Replacement Request
- Warrant Cancellation
- Place an Agency Stop-Payment
- Release an Agency Stop-Payment
- Remail

TIMING

A Warrant Action Request should be prepared and sent to the Comptroller immediately following the decision to initiate the exception action. If the voucher has not been submitted to the Comptroller's Office for processing, correct the voucher prior to submission and do not submit the C-50 form. An agency may telephone the Adjustments Section, Office of the Comptroller, 217/785-1129 or 217/785-2123 for assistance.

DISTRIBUTION

One copy of the Warrant Action Request should be retained by the agency for internal record keeping. The Comptroller requires only the original copy.

INTRODUCTION

The State of Illinois Payroll System generates payroll warrants or electronic direct deposit transactions for all employees paid from funds held in the State Treasury for which the State Treasurer is officio or ex-officio custodian. All payroll warrants and direct deposits must be supported by a precalculated payroll voucher submitted and approved by authorized agency personnel. Deductions from gross pay reflected on the payroll voucher tape must in turn be supported by a deduction authorization maintained by the employing agency. After auditing and balancing the vouchers and tapes, the Comptroller's Office issues employee payroll warrants or makes electronic direct deposits for the net pay amount on the voucher and returns these warrants or, in the case of direct deposits, earnings statements, to the agency for distribution to the employees. Trailer warrants, reflecting the amounts paid to insurance companies, credit unions, unions, associations, tax sheltered annuities, saving bonds**, parking fees, garnishments* and child support processing fees, will be distributed by the Comptroller's Office. Warrants representing Tax Levies, Garnishments, Unemployment Compensation, Bankruptcies and money owed another State agency will be returned to the vouchering agency for distribution.

The payroll section also includes sub-systems that issue and print Contractual payments (C02 Vouchers), process salary refunds and corrections, print miscellaneous reports for the legislature, and respond to requests for information concerning State employees.

*Effective January 1, 1999, [Public Act 90-677](#) changed the processing requirements for Wage deduction orders (garnishments, citations and administrative garnishments). Wage deductions are treated as a payroll deduction trailer which are returned to the originating agency for distribution.

All Child Support payments are sent directly to the New State Disbursement Unit, except for payments authorized to be sent directly to the custodial parent. These direct pay child support warrants are forwarded to the vouchering agency for distribution.

**Effective September 1, 2010, the Illinois Office of the Comptroller discontinued the State's payroll savings bond program when the U.S. Department of the Treasury discontinued their payroll savings bond plans.

SUB-SECTION	PAYROLL	EFFECTIVE DATE January 1, 2011
PROCEDURE	SYSTEM CYCLE AND TIMING	REVISION NUMBER 11-002

SYSTEM CYCLE AND TIMING

The overall payroll system can be segregated into three basic segments: employee registration, voucher processing and distribution of warrants and payroll related data.

EMPLOYEE REGISTRATION

Employee registration includes procedures necessary to enroll new employees in the State payroll system and to change information pertaining to employees previously enrolled. State and Federal withholding forms (W-4s) must be signed by the employee, and submitted to the Comptroller's Office by hard copy or electronically (See Exhibit 23.20.05-B) prior to the employee appearing on a payroll voucher. A copy of the W-4s must be maintained by the vouchering agency. Authorizations for deductions or revocations of previous deductions of voluntary deductions should not be sent to the Comptroller's office but must be maintained by the vouchering agency.

Even if an employee's W-4 information is submitted electronically and he/she is claiming exempt or claiming 10 or more exemptions, a W-4 card is required to be sent to the Comptroller's Office.

VOUCHER PROCESSING

Voucher processing includes procedures to prepare and submit payroll vouchers to the Comptroller's Office. Payroll vouchers reflecting gross pay for each employee on a payroll, are required four working days prior to the scheduled pay date. Agencies are required to supply a magnetic tape/FTP to support the voucher. A payroll voucher distribution schedule reflecting the accounting distribution of gross expenditures and employer contributions to social security and retirement systems paid through the payroll system must be submitted with every voucher.

File Transfer Protocol (FTP) must be approved and tested by the Comptroller's office prior to submission.

A new Payroll Tape Layout was adopted July 1, 2001 (Exhibit 23.20.50). A new abbreviated (reduce paper) version of the payroll voucher was adopted. (See Appendix F) of the Payroll Tape Layout. (Exhibit 23.20.50)

SUB-SECTION	SYSTEM OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	SYSTEM CYCLE AND TIMING	REVISION NUMBER 11-002

WARRANTS AND PAYROLL DATA DISTRIBUTION

Distribution includes procedures to transmit payroll warrants and earnings statements from the Comptroller's Office to the agency. Warrants and earnings statements are printed alphabetically within distribution code sequence after a balanced and error-free voucher is received from the agency and are released to agencies to be distributed to employees on the scheduled pay date.

Direct deposits are credited to employees' accounts on the scheduled pay date provided a balanced and error free voucher is submitted at least four working days prior to the scheduled pay date.

Payroll trailer warrants and transmittal lists are sent directly to third parties weekly or as required.

Payroll for employees under contract are to be processed through the salary payroll system. Therefore, employee registration, voucher processing, warrants, and payroll data distribution follow the same procedures as the salary payroll.

Stipend payments are to be processed through the salary payroll system. Any agency required to make these payments must contact the Comptroller's Payroll Unit for detail instructions prior to processing.

Address tapes must be submitted prior to processing payments for stipends.

SECTION	PAYROLL	PROCEDURE - PAGE NO. 23.10.30 1 of 1
SUB-SECTION	SYSTEM OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	SYSTEM CONTROLS	REVISION NUMBER 11-002

SYSTEM CONTROLS

Payroll system controls are segregated among the vouchering agency, the Comptroller's Office, the Department of Central Management Services, the State Treasurer, and external auditors. Together these controls insure that payroll warrants and direct deposit transactions have been properly authorized, are accurate, and that all deductions from an employee's gross pay are supported by source documents and conform to the State Salary and Annuity Withholding Act.

AGENCIES

Agencies are responsible for completing the payroll voucher each pay period and attesting to the employee's rate of pay, gross earnings, deductions, net pay, and other required information on the voucher and tape. The initial control of each payroll is at the agency level. Agencies are also responsible for distributing printed payroll warrants and earnings statements to their employees.

Employees under contract do not qualify for inclusion in the State Employees' Retirement System, the State Universities Retirement System, or the State Employees Group Insurance Program. Employees under contract who work in certain State educational facilities may qualify for membership in the Teachers' Retirement System. Employers of members of the Teacher's Retirement System are required to withhold contributions to the System. Contractual employees will be in most cases, subject to the full 7.65% FICA tax if they are not covered under a pension plan that meets a specific defined contribution rule. The Internal Revenue Service has determined that a contractual employee meets this minimum benefit rule if he or she contributes at least 7.5% of his or her State compensation to a pension plan.

COMPTROLLER'S OFFICE

The Comptroller's Office controls include the editing of each payroll voucher against the marital status and exemptions shown on the payroll tape and verification that each voucher/tape/file crossfoots and balances and that there are sufficient funds in the State Treasury and/or unexpended appropriation to meet the expenditures on the voucher. There are also various internal control procedures to insure warrants are printed and distributed to agencies on a timely basis, direct deposits are made on the scheduled pay date, and employee records are updated correctly.

DEPARTMENT OF CENTRAL MANAGEMENT SERVICES-BUREAU OF PERSONNEL

The Bureau of Personnel controls include an automated post-audit of all employees subject to the personnel code.

SECTION	PAYROLL	PROCEDURE - PAGE NO. 23.10.40 1 of 4
SUB-SECTION	SYSTEM OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 11-002

DOCUMENT DESCRIPTION

The documents pertaining to the Payroll System are categorized as either source documents or output documents. Source documents are segregated into three groups: Employee registration forms, Voucher Processing Forms and Salary Refund Forms. A brief description of each document follows.

SOURCE DOCUMENTS

I. Employee Registration Forms

The basic forms in the employee registration segment of the State payroll system are State and Federal W-4 cards, Form IL-W-5NR, Form W-5, the bond authorization card, the direct deposit authorization form and the payroll deduction authorization forms.

- A. W-4 Cards (Exhibit 23.20.05-A)
State and Federal withholding forms provide the legal authorization for withholding taxes, and therefore must be completed by all employees and retained by the agency. (See Procedure 23.20.05.)
- B. Employee's Statement of Nonresidence in Illinois, (Exhibit 23.20.10-A)
An Employee's Statement of Nonresidence in Illinois (Form IL-W-5NR) must be completed by employees claiming exemption from Illinois income tax withholding because they are residents of states which have reciprocal withholding agreements with Illinois. Reciprocal states are Iowa, Kentucky, Michigan, and Wisconsin. Agencies must have a copy of this form on file; it need not be filed with the Comptroller's Office (See Procedure 23.20.10.)
- C. Form W-5 (Exhibit 23.20.15-A)
A form W-5 must be completed by employees who are eligible for advanced payments of earned income credit. A copy need not be filed with the Comptroller's Office. (See Procedure 23.20.15.)

SUB-SECTION	SYSTEM OVERVIEW	EFFECTIVE DATE January 1, 2011
PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 11-002

D. Authorization For Deposit of Recurring Payments (Exhibit 23.20.25-A)
Employees may authorize direct deposit of their salary payments by completing the Authorization for Deposit of Recurring Payments. A new form must be completed for changes in financial institutions or account number within a financial institution. (See Procedure 23.20.25.)

E. Deduction Authorization Form
This form which is distributed by the employing agency and/or vendor authorizes the Comptroller to withhold monies from an employee's gross pay for a specific purpose authorized by the employee ([5 ILCS 365/5](#)). Forms must be completed and signed by the employee and maintained by the agency. These deduction authorizations need not be filed with the Comptroller. (See Procedure 23.20.30.)

II. Voucher Processing Forms

There are three major source input documents that are required from agencies each pay period: the payroll voucher, the payroll voucher distribution schedule and the payroll voucher input tape/FTP.

A. Payroll Voucher (Exhibit 23.20.50, Appendix F)

Payroll vouchers provide the basis for paying each employee and therefore must be submitted to the Comptroller's Office each pay period. Each voucher consists of four parts: (1) Abbreviated detail page, (2) Trailer page(s), (3) Total page, and (4) Certification page. The detail page(s) list name and social security number for each employee, reflecting gross pay and other payroll related information. The trailer pages reflect the total amount to be paid to each vendor. The total page is the summary for selected payroll fields. The certification page must be signed by an authorized person(s).

B. Payroll Voucher Distribution Schedule (Exhibit 23.20.50, Appendix F)

A voucher distribution schedule must accompany all payroll vouchers and must reconcile to the total charges on the payroll voucher. The purpose of the schedule is to serve as a transmittal and control document, and to summarize all charges to appropriations made from the voucher. It therefore contains charges (if any) to State paid FICA or Medicare, retirement appropriations, and Insurance reimbursement in addition to personal services.

PROCEDURE	DOCUMENT DESCRIPTION	REVISION NUMBER 11-002

- C. Payroll Voucher Magnetic Tape/FTP
Agencies must submit a magnetic tape/FTP in conjunction with their payroll vouchers. The tape/FTP contains one detail record for employee record on the payroll voucher and one trailer record for each vendor warrant.

III. Salary Refund System

The salary refund system provides agencies with the capability to completely or partially reverse the effect of payroll warrants that were issued in error. There are two major segments of the system: (1) the salary reversal procedure provides the capability to recover money that has previously been paid to vendors and now must be recovered, and (2) the salary refund form processing procedure which provides the vehicle for redepositing the money recovered into the State Treasury, crediting the appropriation from which it was paid and correcting the employee's year-to-date earnings and tax records. All salary reversals must have Comptroller's prior authorization.

- A. Salary Reversal Procedure
This procedure allows agencies to recover erroneous salary payment deductions via the payroll system, as opposed to requesting cash refunds directly from the vendor. Reversed amounts must match amounts entered on the Salary Reversal Form. However, agencies may obtain the refund directly from the vendor in some instances. The money recovered is then submitted to the Comptroller's Office with the Salary Refund Form.
- B. Salary Refund Form (Exhibit 23.20.65-A)
The salary refund form is a transmittal document for depositing money in the State Treasury, crediting the appropriation accounts and adjusting the employee's earnings. The form must be accompanied by state warrant(s) or Treasury draft(s) for the amount to be redeposited. Due to timing issues, agencies should have any Treasury draft(s) prior to processing the reversal.
- C. Salary Refund Tape/FTP Records
The voucher input tape/FTP submitted by agencies must contain a tape/FTP record that corresponds to each entry on the voucher.

IV. Other Documents

A. Authorization to Pick-Up Salary Warrants (Exhibit 23.20.70-A)

The authorization is used by State or Courier employees to provide specimen signatures to the Comptroller for person(s) authorized to pick up salary warrants from the Office of the Comptroller.

OUTPUT DOCUMENTS

I. Payroll Warrant and Stub (Exhibit 23.30.10-A)

Exhibit 23.30.10-A shows the warrant and warrant stub used for all payroll warrants. Warrants will be picked up or mailed to the agencies for distribution to the employees. Generally, most trailer warrants are mailed directly to the vendor.

II. Agency Return Tape/FTP

Agency Return Tapes/FTP will be provided to agencies upon request. Hard copy reports will not be provided.

III. Wage and Tax Statement - Form W-2 (Exhibit 23.30.50-A)

W-2's are printed annually and reflect all payments made from State funds.

PROCEDURE	STATEMENT OF GENERAL POLICY	REVISION NUMBER 11-002

STATEMENT OF GENERAL POLICY

The State of Illinois Payroll System generates payroll warrants or direct deposit transactions for all employees, paid from funds held in the State Treasury or for which the State Treasurer is ex-officio custodian. Payments cannot be made from private funds, i.e., funds held outside the State Treasury. All warrants or direct deposits must be supported by a payroll voucher/tape approved by authorized agency personnel.

Payroll vouchers may contain multiple personal services appropriations but each detail record can only be charged to one appropriation account code.

Payroll warrants or direct deposits will not be generated for vouchers drawn on insufficient funds, vouchers which are unbalanced, or vouchers which contain errors that cannot be reconciled with the agency.

State and Federal W-4 cards (form C-25) and other voluntary deduction cards must be signed by the employee. A copy of the State and Federal W-4 forms must be filed with the Comptroller (See Exhibit 23.20.05-A, Employee's Withholding Exemption Certificate). A copy of all other voluntary deduction forms need not be filed with the Comptroller but must be maintained by the agency.

The Comptroller's Office maintains a master file of all employees paid from State funds and will respond to all requests for information on a timely basis.

PROCEDURE	STATUTE STATEMENT	REVISION NUMBER 03-001

STATUTE STATEMENT

The set of laws that have the primary impact upon the State of Illinois Payroll System is the State Comptroller Act and the State Salary and Annuity Withholding Act. The most relevant sections of these acts are:

State Comptroller Act (15 ILCS 405/9): This section of the act provides that payments made from public funds must be made by a warrant drawn by the Comptroller except as provided in Section 9.03 (see below). It also specifies that agencies supply an itemized voucher and that the Comptroller's Office audit the voucher for legality and fund sufficiency prior to issuing warrants.

State Comptroller Act (15 ILCS 405/9.03): This section provides that payments to a person paid from personal services may be made by direct deposit to the account of the person at a bank, savings and loan association, or credit union.

State Comptroller Act (15 ILCS 405/10.05): This section provides that deductions may be made from the net pay by the Comptroller's Office whenever there is a claim in favor of the State on file against a State employee. No deductions may appear on the voucher relating to this section.

State Comptroller Act (15 ILCS 405/12): "The comptroller shall be the State payroll officer, shall maintain the official payroll for all State agencies and shall supervise the issuance of all payroll warrants. The Comptroller shall design and approve payroll voucher forms and payroll distribution schedule forms, and any person presenting a payroll distribution schedule to the Comptroller shall use the prescribed form."

State Comptroller Act (15 ILCS 405/13): "The Comptroller shall prepare a schedule showing the dates on which all employees of the State shall be paid....No payment shall be made before the completion of the period for which the compensation is being paid, except that employees leaving the service of the State may be paid at the termination of their period of employment."

"Such schedule shall be prepared showing such dates of payment so as to provide as far as is practical, an even flow of work for issuance of warrants in payment of personal services." The procedure for calculating payments for fractional parts of a pay period is also prescribed.

PROCEDURE	FEDERAL/ILLINOIS W-4 CARD	REVISION NUMBER 03-001

FEDERAL AND ILLINOIS W-4 CARD (Exhibit 23.20.05-A)

PURPOSE

Each employee must complete a Federal/Illinois W-4 Employee's Withholding Exemption Certificate (Comptroller form C-25). The information entered on the form C-25 is used to calculate the amount of Federal and Illinois withholding taxes to be withheld as certified on the payroll voucher for each employee.

Worksheets for completion of the Federal and State W-4's can be obtained from the Internal Revenue Service and the Illinois Department of Revenue.

REQUIREMENTS

Effective January 1, 1982, all State agencies must have on file a properly completed Federal/Illinois W-4 for all active employees. If an employee refuses to complete a Form W-4, tax should be withheld at the same rate as a person claiming a status of single and no allowances. State agencies must maintain the last effective Federal/Illinois W-4 for terminated employees for a period of 4 1/2 years.

Any employee returning from a leave of absence of six months or longer is required to complete a new Federal/Illinois W-4 Card. In addition, the loss of an exemption that affects withholding at the beginning of the next taxable year, such as a divorce or the loss of a dependent, should be reflected by an amended Form W-4 on or before December 1. If the change occurs in December, the new Form W-4 must be furnished within 10 days of the day on which the change occurs.

DISTRIBUTION

Two copies of the Federal/Illinois W-4 should be completed by each employee. One is to be retained by the employing State agency and one is to be forwarded to the Comptroller's Office. Information from the W-4 card may be submitted to the Comptroller's Office electronically; however, if claiming exempt or 10 or more exemptions, a hard copy (W-4) is to be submitted to the Comptroller's Office.

CONTENTS

Side one of the combined Federal/Illinois W-4 must be completed as follows:

- 1 Type or Print Full Name: Enter last name, first name and middle name or initial. This should be as the name appears on the employee's social security card.
- 2 Social Security Number: Enter the employee's social security number as it appears on the employee's social security card.
- 3 Date of Birth: Enter employee's date of birth.
- 4 Voting County: Enter the name of the county where employee is registered to vote.
- 5 Voting Address: Enter the voting address of the employee.

Mailing Address: Enter employee's mailing address and zip code if different from voting address. If it is the same as the voting address, enter "same" in this space. This is the address to which the employee's W-2 statement will be mailed.
- 6 Marital Status: Check appropriate box to indicate marital status for federal withholding purposes.

Federal Withholding Exemption:

- 7 Enter total number of exemptions you are claiming. (Leave blank if claiming exempt.)
- 8 Enter additional dollar amount of Federal tax to be withheld, if any, per pay period. This dollar amount will be in addition to the amount calculated by using the marital status and exemptions from the tax tables. Employees cannot base their total withholding amount on a fixed dollar amount or percentage. (Leave blank if claiming exempt.)
- 9 Before employees can claim exempt, they must satisfy the conditions set forth on the form. If these conditions are met, write "Exempt" on the line provided.
- 10 Signature and Date: Employee must sign and date the form.

DISPOSITION OF UNACCEPTABLE FEDERAL/ILLINOIS W-4

Any unauthorized change or addition to Form W-4 makes it invalid. This includes taking out any language by which the employee certifies that the form is correct. A Form W-4 is also invalid if, by the date an employee gives it to you, he or she indicates in any way that it is false.

When you get an invalid Form W-4, do not use it to figure withholding. Tell the employee it is invalid and ask for another one. If the employee does not give you a valid one, withhold taxes as if the employee was single and claiming no withholding allowances. However, if you have an earlier Form W-4 that is valid, withhold as you did before.

SUB-SECTION	INPUT DOCUMENT PROCEDURES	EFFECTIVE DATE July 1, 2002
PROCEDURE	FEDERAL/ILLINOIS W-4 CARD	REVISION NUMBER 03-001

EXEMPTION FROM INCOME TAX WITHHOLDING FOR ELIGIBLE PERSONS

An employee may claim exemption from income tax withholding because he or she had no income tax liability last year and expects none this year. However, the wages may still be subject to social security and Medicare taxes. An employee may claim exemption from Illinois income tax only if he can claim exemption from Federal income tax.

A Form W-4 claiming exemption from withholding expires on December 31. An employee must file a Form W-4 each year by February 15 to claim exemption from withholding. Agencies should begin withholding from each employee who previously claimed exemption from withholding but has not submitted a new Form W-4 for the current year by February 15. Withhold tax as if the employee is single with zero withholding allowances.

An employee cannot claim exemption from withholding if (1) his or her income exceeds \$600 and includes unearned income (e.g., interest and dividends), and (2) another person can claim the employee as a dependent on their tax return.

Note: Student status does not automatically exempt the employee from income tax withholding.

WITHHOLDING ON NONRESIDENT ALIENS

Because of restrictions on the number of personal allowances that a nonresident alien may claim, special instructions for completing Form W-4 must be given to nonresident aliens. These instructions can be found in [IRS Publication 519](#), *U.S. Tax Guide for Aliens*. Generally, these instructions provide that nonresident aliens should (1) not claim exemption from income tax withholding; (2) request withholding as if they are single, regardless of their actual marital status; (3) indicate additional withholding of \$4 per week on line 6; and (4) claim only one allowance. However, if the nonresident alien is a resident of Canada, Mexico, Japan, or Korea, or is a U.S. National, he or she may claim one allowance for each dependent.

Payroll Address File

This document describes the magnetic tape file format to be used by State Agencies transmitting payroll address information directly to the Comptroller.

I. FILE CHARACTERISTICS

The Payroll Address Tape File is a 9-track, 1600 or 6250 bpi, or an 18-track (cartridge), 38000 bpi, odd parity, American Standard labeled magnetic media. The file should contain no tape marks. All records are 360 bytes in length with a blocking factor 20. Numeric fields are unpacked. Whenever possible, submit an 18-track cartridge. The Payroll Address File consists of address information for an employee.

II. FILE ORDER

The file is in order of employee's social security number.

III. ADDRESS FIELD CONVENTIONS/EXAMPLES

The following standards will be used for providing **both** mailing and voting address information. Address information should come from the employee's W-4 card.

SUB-SECTION	EMPLOYEE'S STATEMENT OF NONRESIDENCE	EFFECTIVE DATE July 1, 2002
PROCEDURE	IN ILLINOIS (FORM IL-W-5NR)	REVISION NUMBER 03-001

PURPOSE

The State of Illinois has entered into reciprocal agreements with Iowa, Kentucky, Michigan, and Wisconsin to exempt from taxation and withholding the compensation paid to a resident of one of these states who is working in Illinois. To be entitled to the exemptions, residents of a reciprocal state must file a copy of Form IL-W-5NR, Employee's Statement of Nonresidence in Illinois, with the employing agency. If an employee moves out of the named state of residence after filing Form IL-W-5NR, the employee must notify the employing agency within 10 days and file a new Form IL-W-5NR, if applicable. See Exhibit 23.20.10-A.

DISTRIBUTION

Agencies must have a copy of this form on file. The Comptroller's Office does not require a copy. For Iowa residents, a copy must be sent to the Iowa Department of Revenue.

FEDERAL FORM W-5 (Exhibit 23.20.15-A)

PURPOSE

Employees may use Form W-5 to receive advance payments of Earned Income Credit (EIC) if they have met the eligibility requirements included with the EIC Advance Payment Certificate (Exhibit 23.20.15-A).

TIMING REQUIREMENTS

Complete this certificate as soon as the employee can determine that he is qualified. The certificate must be refiled each calendar year and maintained by the employing agency.

DISTRIBUTION

One copy of Form W-5 should be completed by the employee and retained by the agency.

CONTENTS

Each Form W-5 must be completed as follows:

- (1) Name: Enter the last name, first name and middle name or initial.
- (2) Social Security Number: Enter the number taken from the employee's social security card.
- (3) Question 1, 2, and 3: Must be answered. If question 1 is answered "no", the employee will not be eligible for the advanced payment.
- (4) Signature: The employee must sign the form.
- (5) Date: Enter the date the card is signed.
- (6) Earned Income Checklist: The employee must answer all questions to determine if they are eligible to receive the advanced EIC payments. (on side 2 of Exhibit 23.20.15-A)

2010 Form W-5

Instructions

Purpose of Form

Use Form W-5 if you are eligible to get part of the earned income credit (EIC) in advance with your pay and choose to do so. See *Who Is Eligible To Get Advance EIC Payments?* below. The amount you can get in advance generally depends on your wages. If you are married, the amount of your advance EIC payments also depends on whether your spouse has filed a Form W-5 with his or her employer. However, your employer cannot give you more than \$1,830 throughout 2010 with your pay. You will get the rest of any EIC you are entitled to when you file your 2010 tax return and claim the EIC.

If you do not choose to get advance payments, you can still claim the EIC on your 2010 tax return.

What Is the EIC?

The EIC is a credit for certain workers. It reduces the tax you owe. It may give you a refund even if you do not owe any tax.

Who Is Eligible To Get Advance EIC Payments?

You are eligible to get advance EIC payments if **all four** of the following apply.

1. You (and your spouse, if filing a joint return) have a valid social security number (SSN) issued by the Social Security Administration. For more information on valid SSNs, see Pub. 596, Earned Income Credit (EIC).

2. You expect to have at least one qualifying child and to be able to claim the credit using that child. If you do not expect to have a qualifying child, you may still be eligible for the EIC, but you cannot receive advance EIC payments. See *Who Is a Qualifying Child?* beginning on this page.

3. You expect that your 2010 earned income and adjusted gross income (AGI) will each be less than \$35,535 (\$40,545 if you expect to file a joint return for 2010). Include your spouse's income if you plan to file a joint return. As used on this form, earned income does not include amounts inmates in penal institutions are paid for their work or amounts received as a pension or annuity from a nonqualified deferred compensation plan or a nongovernmental

section 457 plan. Generally, earned income also does not include nontaxable earned income, but you can elect to include nontaxable combat pay in earned income.

4. You expect to be able to claim the EIC for 2010. To find out if you may be able to claim the EIC, answer the questions on page 2.

How To Get Advance EIC Payments

If you are eligible to get advance EIC payments, fill in the 2010 Form W-5 at the bottom of this page. Then, detach it and give it to your employer. If you get advance payments, you must file a 2010 Form 1040 or 1040A income tax return.

You may have only one Form W-5 in effect at one time. If you and your spouse are both employed, you should file separate Forms W-5.

This Form W-5 expires on December 31, 2010. If you are eligible to get advance EIC payments for 2011, you must file a new Form W-5 next year.

You may be able to get a larger credit when you file your 2010 return. For details, see Additional Credit on page 3.

Who Is a Qualifying Child?

A qualifying child is any child who meets all four of the following conditions.

1. The child is your son, daughter, stepchild, foster child, brother, sister, half brother, half sister, stepbrother, stepsister, or a descendant of any of them (for example, your grandchild, niece, or nephew). An adopted child is always treated as your own child. An adopted child includes a child lawfully placed with you for legal adoption. A foster child is any child placed with you by an authorized placement agency or by judgment, decree, or other order of any court of competent jurisdiction.

2. The child is under age 19 at the end of 2010 and younger than you (or your spouse, if filing jointly); or under age 24 at the end of 2010, a student, and younger than you (or your spouse, if filing jointly); or any age and permanently and totally disabled. A student is a child who during any 5 months of 2010 (a) was enrolled as a full-time student at a school or (b) took a full-time, on-farm training course given by a school or a state, county, or local government

Questions To See if You May Be Able To Claim the EIC for 2010

 You **cannot** claim the EIC if you file either Form 2555 or Form 2555-EZ (relating to foreign earned income) for 2010. You also **cannot** claim the EIC if you are a nonresident alien for any part of 2010 unless you are married to a U.S. citizen or resident, file a joint return, and elect to be taxed as a resident alien for all of 2010.

1 Do you expect to have a qualifying child? Read *Who Is a Qualifying Child?* that starts on page 1 before you answer this question. If the child is married, be sure you also read *Married child* on page 3.

- No.**  You may be able to claim the EIC but you **cannot** get advance EIC payments.
- Yes.** *Continue.*

 If the child meets the conditions to be a qualifying child of both you and another person, see *Qualifying child of more than one person* on page 3.

2 Do you expect your 2010 filing status to be married filing a separate return?

- Yes.**  You **cannot** claim the EIC.
- No.** *Continue.*

 If you expect to file a joint return for 2010, include your spouse's income when answering questions 3 and 4.

3 Do you expect that your 2010 earned income and AGI will each be less than: \$35,535 (\$40,545 if married filing jointly) if you expect to have one qualifying child; \$40,363 (\$45,373 if married filing jointly) if you expect to have two qualifying children; or \$43,352 (\$48,362 if married filing jointly) if you expect to have three or more qualifying children?

- No.**  You **cannot** claim the EIC.
- Yes.** *Continue.* But remember, you **cannot** get advance EIC payments if you expect your 2010 earned income or AGI will be \$35,535 or more (\$40,545 or more if married filing jointly).

4 Do you expect that your 2010 investment income will be more than \$3,100? For most people, investment income is the total of their taxable interest, ordinary dividends, capital gain distributions, and tax-exempt interest. However, if you plan to file a 2010 Form 1040, see the 2009 Form 1040 instructions to figure your investment income.

- Yes.**  You **cannot** claim the EIC.
- No.** *Continue.*

5 Do you expect that you, or your spouse if filing a joint return, will be a qualifying child of another person for 2010?

- Yes.** You **cannot** claim the EIC.
- No.** You may be able to claim the EIC.

agency. A school includes a technical, trade, or mechanical school. It does not include an on-the-job training course, correspondence school, or Internet school.

3. The child lives with you in the United States for over half of 2010. But you do not have to meet this condition if (a) the child was born or died during the year and your home was this child's home for the entire time he or she was alive in 2010, or (b) the child is presumed by law enforcement authorities to have been kidnapped by someone who is not a family member and the child lived with you for over half of the part of the year before he or she was kidnapped. Also, temporary absences, such as for school, vacation, medical care, or detention in a juvenile facility, count as time the child lived with you. Members of the military on extended active duty outside the United States are considered to be living in the United States.

4. The child does not file a joint return for 2010 (or files a joint return for 2010 only as a claim for refund).

Married child. A child who is married at the end of 2010 is a qualifying child only if the child meets the four conditions just listed and:

1. You can claim him or her as your dependent, or
2. You are the custodial parent and would be able to claim the child as your dependent, but the noncustodial parent claims the child as a dependent because:
 - a. You signed Form 8332, Release/Revocation of Release of Claim to Exemption for Child by Custodial Parent, or a similar statement, agreeing not to claim the child for 2010, or
 - b. You have a pre-1985 divorce decree or separation agreement that allows the noncustodial parent to claim the child and he or she gives at least \$600 for the child's support in 2010.

Other rules may apply. See Pub. 501, Exemptions, Standard Deduction, and Filing Information, for more information on children of divorced or separated parents.

Qualifying child of more than one person. Even if a child meets the conditions to be a qualifying child of more than one person, only one person can treat that child as a qualifying child for 2010 and take, if otherwise eligible, all of the following tax benefits using that child: the child's dependency exemption, the child tax credit, head of household filing status, the credit for child and dependent care expenses, the exclusion for dependent care benefits, and the EIC. No other person can take any of these six tax benefits unless he or she has a different qualifying child. To determine which person can treat the child as a qualifying child, the following rules apply.

- If only one of the persons is the child's parent, the child is treated as the qualifying child of the parent.
- If the parents do not file a joint return together but both parents claim the child as a qualifying child, the IRS will treat the child as the qualifying child of the parent with whom the child lives for the longer period of time in 2010. If the child lives with each parent for the same amount of time, the IRS will treat the child as the qualifying child of the parent who has the higher AGI for 2010.
- If no parent can claim the child as a qualifying child, the child is treated as the qualifying child of the person who has the highest AGI for 2010.
- If a parent can claim the child as a qualifying child but no parent does so claim the child, the child is treated as the qualifying child of the person who has the highest AGI for 2010, but only if that person's AGI is higher than the AGI of any of the child's parents who can claim the child.

Subject to the rules just described, you and the other person(s) may be able to choose which of you treats the child as a qualifying child. For example, if you, your 3-year-old child, and your mother all live together and your child's other parent does not live with you, you can treat your child as a qualifying child, or you can choose to let your mother do so if her AGI is higher than yours. For details, more examples, and a special rule for divorced or separated parents, see Pub. 596.

Caution. A qualifying child whom you use to claim the EIC must have a valid social security number unless he or she is born and dies in 2010.

What if My Situation Changes?

If your situation changes after you give Form W-5 to your employer, you will probably need to file a new Form W-5. For example, you must file a new Form W-5 if any of the following applies for 2010.

- You no longer expect to have a qualifying child. Check "No" on line 1 of your new Form W-5.
- You no longer expect to be able to claim the EIC for 2010. Check "No" on line 1 of your new Form W-5.
- You no longer want advance payments. Check "No" on line 1 of your new Form W-5.
- Your spouse files Form W-5 with his or her employer. Check "Yes" on line 3 of your new Form W-5.

Note. If you get advance EIC payments and find you are not eligible for the EIC, you must pay back these payments when you file your 2010 federal income tax return.

Additional Information

How To Claim the EIC

If you are eligible, claim the EIC on your 2010 tax return. See your 2010 tax return instruction booklet.

Additional Credit

You may be able to claim a larger credit when you file your 2010 Form 1040 or Form 1040A because your employer cannot give you more than \$1,830 throughout the year with your pay. You may also be able to claim a larger credit if you have more than one qualifying child. But you must file your 2010 tax return to claim any additional credit.

Privacy Act and Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. Internal Revenue Code sections 3507 and 6109 and their regulations require you to provide the information requested on Form W-5 and to give it to your employer if you want advance payment of the EIC. As provided by law, we may give the information to the Department of Justice and other federal agencies. In addition, we may give it to cities, states, and the District of Columbia so they may carry out their tax laws. We may also disclose this information to other countries under a tax treaty, to federal and state agencies to enforce federal nontax criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. Failure to provide the requested information may prevent your employer from processing this form; providing false information may subject you to penalties.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by Code section 6103.

The average time and expenses required to complete and file this form will vary depending on individual circumstances. For the estimated averages, see the instructions for your income tax return.

If you have suggestions for making this form simpler, we would be happy to hear from you. See the instructions for your income tax return.

AUTHORIZATION FOR DEPOSIT OF RECURRING PAYMENTS
(EXHIBIT 23.20.25-A)

PURPOSE

The Authorization for Deposit of Recurring Payments (Form C-95A) is used by employees to authorize the electronic deposit of salary payments.

REQUIREMENTS

Employees may have salary payments electronically deposited into their savings or checking account at any bank, savings and loan association, or credit union which is a member of the Automated Clearing House (ACH) network. Employees authorize electronic direct deposits by completion of the Authorization for Deposit of Recurring Payment Form (C-95 A). The form must be completed by the employee; portions of the form should be verified by the employee's financial institution. The completed form must be submitted to the employing agency before the first direct deposit payment can be requested. Only one account can be designated by the employee for the direct deposit. The entire net pay will be deposited into this account. If the employee wishes to have a portion of the deposit transferred to another account, the employee must make arrangements with the financial institution. It cannot be done through the Payroll System.

Before the first direct deposit is sent for an employee, the Comptroller's Office must send a "prenote". A prenote is a zero dollar transaction that must be sent through the ACH network at least ten calendar days before any money is actually sent to the employee's account. It conveys the same information, with the exception of the dollar amount and transaction code, that will be carried on subsequent dollar entries. It notifies the employee's financial institution that the customer will be receiving deposits into the specified account and serves to identify any errors with the account type, account number, or financial institution routing number.

The prenote is sent the first time an employee is coded direct deposit on the payroll voucher. Payment will be made by paper warrant. If the Comptroller's Office is not notified of errors following the prenote process, the next payment to the employee will be by direct deposit. If an error occurs, the agency will be notified to take corrective action.

If an employee who had been receiving payment by direct deposit is not on the payroll for more than 365 days, a new prenote is required. If the unpaid leave is less than 366 days, a new prenote is not required.

PROCEDURE	AUTHORIZATIONS FOR DEPOSIT OF RECURRING PAYMENT FORM	REVISION NUMBER 03-001

The Payroll System cannot make a direct deposit if the employee's earnings are subject to offset. The payment will be made by paper warrant.

RETENTION OF FORM C-95A

The agency must retain the form C-95A for two years after the employee terminates.

STATE OF ILLINOIS

IMPORTANT NOTICE: This form is to be used only for State of Illinois Recurring Payments. Page 2 of 2

If you wish your payments sent to your financial institution for deposit into your savings or checking account, you must complete this form to authorize this action. Some agencies may require your financial institution to verify routing and account information. The State Comptroller will forward your recurring payments to the destination you authorize. The financial institution may be any bank, savings bank, savings and loan association or similar institution, or Federal- or state-chartered credit union that is a member of the Automated Clearing House Access Program. If you do not have an account at such a facility, you must contact a qualifying financial institution and establish an account prior to enrolling for direct deposit.

INSTRUCTIONS

Please type or print in ink all information requested.

1. Type or print the payee's **Social Security Number**. Do not include dashes.
2. Type or print the name of the person to whom the payment is made. This is the **Payee Name** except where a representative payee has been appointed or a guardian or conservator has been appointed by a Court.
3. Type or print the **Name of Program Agency**.
4. **Type/Print Payee Name** in the space provided, sign where indicated (**Signature of Payee**) and print **Date**.
5. Type or print the **Work Area Code and Telephone Number** of the payee or a number where the payee can be reached during the day.
6. Type or print the **Name of Financial Institution** in which the payee's account resides.
7. Type or print the **Financial Institution Area Code and Telephone Number**.
8. Type or print the financial institution **Branch Address, City, State, Zip Code** where the payee's account resides.
9. Type or print the 9-digit **Financial Institution Routing Number** that appears at the bottom of the payee's printed checks. (The program agency may require the payee to have this information verified by the financial institution prior to submitting the authorization form.)
10. Type or print the **Payee Account Number** that also appears at the bottom of the payee's printed checks. The number of digits varies among institutions.
11. **You must select one account type to receive recurring payments (Checking or Savings).** Payee must indicate which one of his accounts (Savings or Checking) should receive the recurring direct deposits.
12. **Attach a voided check** before submitting this completed form to your agency's payroll clerk. Do not substitute a deposit slip for the voided check. Financial institutions may alter numbers that appear on deposit slips for internal purposes.

CANCELLATION INSTRUCTIONS

When entered in the payee's record with the program agency, this authorization will remain in effect until canceled by notice to the program agency by the payee or in the event of death of the payee or the beneficiary of this payment. The financial institution should also be notified if the payee cancels this agreement. The financial institution may cancel their agreement by providing the payee with a written notice 30 days in advance of the cancellation date. The payee must advise the program agency immediately if this authorization is cancelled. The financial institution cannot cancel this authorization by advice to the program agency.

Privacy Act Notice

You previously provided your Taxpayer Identification Number (TIN), i.e. your social security number or your employer identification number, to the State of Illinois upon becoming a State of Illinois payee. Section 6109 of the Internal Revenue Code requires you to give your correct TIN to persons, such as the State of Illinois Office of the Comptroller, who must file documents with the Internal Revenue Service to report income paid to you, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA. The Illinois Office of the Comptroller, as administrator of the direct deposit program, requests verification of your TIN on the Authorization for Deposit of Recurring Payments. Your TIN verification enables proper payee identification and corresponding direction of payments as specified on your completed Authorization for Deposit of Recurring Payments. While not mandatory, failure to provide your TIN on the Authorization precludes your participation in the direct deposit program.

PROCEDURE	PAYROLL VOUCHER	REVISION NUMBER 03-001

PAYROLL VOUCHER (Exhibit 23.20.50, Appendix F)

PURPOSE

This document provides the Comptroller with the legal authorization to issue salary warrants, and therefore is required each pay period. Each voucher itemizes the gross pay, Federal tax, State tax, FICA, Medicare and net pay of each employee on the payroll voucher. Warrants cannot be issued for amounts different than the amounts reflected on the voucher (unless adjusted under the authority of Section 10.05 of the Comptroller Act).

TIMING REQUIREMENT

Payroll vouchers and tapes must be submitted four working days prior to the scheduled pay date. This schedule insures that warrants will be available for distribution to the agency two days prior to the scheduled pay date.

DISTRIBUTION

There should be three (3) copies of the payroll voucher for the following distribution:

1. Comptroller copy.
2. Department copy.
3. Department of Central Management Services copy, which is required only for employees covered by the Personnel Code.

Payroll vouchers being prepared by agencies containing employees covered by the Personnel Code must submit two copies of the payroll voucher to the Department of Central Management Services. Contact the Department of Central Management Services for further requirements.

INPUT ERROR CORRECTION

Corrections to payroll vouchers and magnetic tapes must be made by the agency.

SUB-SECTION	INPUT DOCUMENT PROCEDURES	EFFECTIVE DATE July 1, 2002
PROCEDURE	PAYROLL VOUCHER	REVISION NUMBER 03-001

CONTENTS

Following is a description of each field on the payroll voucher (Exhibit 23.20.50, Appendix F):

1. Payroll Title: Complete Name of the Payroll Agency submitting the voucher for payment.
2. Name: Last Name, First Name, Middle Name/or Initial and Suffix of employee.
3. Position Classification (POS CLS): This five-digit code identifies the employee's job title. This office currently assigns position classification numbers for all employees exempt from the personnel code. The Department of Central Management Services assigns the position classification numbers to employees under their jurisdiction.
4. Social Security (Soc. Sec.): This is the social security number of the employee.
5. Gross: This is the sum of base plus overtime plus lump sum plus additional gross.
6. Federal Tax (Fed Tax): Enter the amount of tax computed based upon Federal Tax Charts (plus any additional amount authorized).
7. FICA: Enter the amount of the OASDI portion of the FICA tax.
8. Medicare: Enter the HI (Medicare) portion of the FICA Tax.
9. State Tax (St. Tax): Enter the amount of tax computed based upon the State Withholding requirement.
10. Net: This figure must be the gross amount minus all deductions plus advance EIC.
11. Pay code: This is the five-digit number assigned to the agency.
12. Voucher: This is the voucher number assigned to the voucher by the agency – MUST BE UNIQUE by fiscal year.
13. Pay Period: This is the MMDDYYYY for the first day of the Pay Period and the MMDDYYYY for the last day of the Pay Period.

PROCEDURE	PAYROLL VOUCHER DISTRIBUTION SCHEDULE	REVISION NUMBER 03-001

PAYROLL VOUCHER DISTRIBUTION SCHEDULE (Exhibit 23.20.50 Appendix F)

PURPOSE

The voucher distribution schedule serves as a transmittal document for the payroll voucher, and contains a summary of the accounting distribution of the individual employee records contained in the voucher. This includes charges to personal services, Retirement, Retirement Pickup, Insurance Reimbursement and the employer's contribution to FICA and Medicare whenever applicable.

TIMING REQUIREMENTS

A voucher distribution schedule must accompany each payroll voucher.

DISTRIBUTION

Three (3) copies of the Distribution Schedule should be printed for the following distribution:

1. Comptroller - Attach to the Comptroller's copy of the payroll voucher.
2. CMS – If required by Central Management Services.
3. Agency - To be retained by the agency.

SUB-SECTION	INPUT DOCUMENT PROCEDURES	EFFECTIVE DATE July 1, 2010
PROCEDURE	PAYROLL VOUCHER INPUT TAPE	REVISION NUMBER 11-001

PAYROLL VOUCHER INPUT TAPE/FTP

PURPOSE

The Voucher Input tape facilitates processing of payroll vouchers in the Comptroller's Office by providing a copy of the voucher that serves as input directly into the automated payroll system. This minimizes transcription errors, provides for later cutoff dates at the agency and less clerical effort for the Comptroller's Office.

TIMING REQUIREMENTS

A balanced tape/FTP must be submitted with each payroll voucher to the Comptroller's Office. However, agencies whose payrolls must be approved by the Department of Central Management Services should send the magnetic tape/FTP directly to the Comptroller's Office, State Accounting Payroll Section.

DISTRIBUTION

Voucher input tapes must be submitted directly to the Comptroller's Office, Attn: State Accounting Payroll Section.

INPUT ERROR CORRECTION

The magnetic tape/FTP must reflect the itemized data shown on the voucher including trailer records. Accumulation of detail tape records for all monetary fields must equal and crossfoot to all columnary totals shown on the payroll voucher. Any out-of-balance situation will require a corrected voucher and/or tape. Warrants will not be written until an out-of-balance situation is rectified by the submitting State agency.

Illinois State tax and Federal taxes will be verified based on the data provided. It is the agency's obligation as the employer to insure that the minimum tax is withheld as determined from the information shown on the employees' W-4 cards.

Payroll Voucher File

This document describes the magnetic tape file format to be used by State agencies transmitting payroll voucher information directly to the Comptroller. The agency return tape uses same record formats.

I. FILE CHARACTERISTICS

The Payroll Voucher Tape File is a 9-track, 1600 or 6250 bpi, or an 18-track (cartridge), 38000 bpi, odd parity, American Standard labeled magnetic media. The file should contain no tape marks. All records are 1170 bytes in length with a blocking factor 10. Numeric fields are unpacked. Whenever possible, submit an 18-track cartridge. The Payroll Voucher File consists of two types of records. These are:

A. *Detail Record*

Payment information for employees on the payroll.

B. *Trailer Records*

Accumulated deduction amounts for each specific deduction on the payroll.

II. FILE ORDER

The file order is paycode, voucher number, then account code.

III. NAME FIELD CONVENTIONS/EXAMPLES

The following standards will be used for providing name information. Letters (A-Z), numbers (0-9), spaces (), hyphens (-), periods (.), and apostrophes (') are allowed in name fields. Do not use any other character or symbol.

SALARY REFUND SYSTEM OVERVIEW

The salary reversal system provides the method of correcting salary overpayments. The system provides for:

1. Collecting the net pay warrant amount from the employee
2. Recovering all deductions
3. Correcting the employee's earnings record

The recovered net pay warrant (Treasurer's draft representing the overpayment) will be transmitted to the Comptroller along with the deductions recovered through the payroll system (or directly from the union, association, insurance company, etc., hereafter known as trailer payees) on a salary refund form.

Upon receipt of the salary refund form with proper attachments, the Comptroller will credit the appropriation (if it has not lapsed) and update the employee's earnings by the amount received.

A salary refund does not have to be processed on the same payroll code or from the same account code from which the original warrant was written.

All deductions made representing the original gross earnings must be recovered prior to submitting form C-65. Incomplete refunds will not be processed by the Comptroller's Office.

SALARY REVERSAL PROCEDURES

PURPOSE

This procedure allows agencies to recover amounts deducted coincident to erroneous salary payments on the payroll voucher/tape, as opposed to requesting cash refunds directly from the trailer payee. However, under certain circumstances, agencies may obtain the refund directly from the trailer payee.

TIMING REQUIREMENTS

Salary reversals should normally be processed within 45 days of the issue date on the original erroneous warrant; however, when errors occur near the end of the calendar year, reversals must be completed no later than the last pay period of the year for tax reporting purposes.

PROCESSING RULES

The following rules must be adhered to in the salary reversal procedure:

1. Overpayments to an active employee should be adjusted on a subsequent payroll voucher. A salary refund can not be processed on an employee without prior written approval of the Comptroller's Office. Each payroll reversal shall be supported by a separate request. The IOC will reject any payroll containing reversals that have not been previously approved in writing.
2. If a terminating employee is not entitled to the entire salary warrant, a cash refund may be submitted on a salary refund form. The taxes, FICA or Medicare and retirement must be retrieved via a salary reversal on a subsequent payroll by entering only those amounts applicable to the overpayment. Reversal records must have the original FICA and Retirement Codes.
3. The account code of the original warrant and the account code of the payroll voucher from which the money is being recovered do not have to agree.
4. Salary reversal records may not be combined with the employee's regular voucher records. A separate voucher entry is required. Agencies should sort their voucher so that all reversals are at the end of the payroll in alphabetical sequence.

SUB-SECTION	INPUT DOCUMENT PROCEDURES	EFFECTIVE DATE January 1, 2011
PROCEDURE	SALARY REVERSAL PROCEDURES	REVISION NUMBER 11-002

5. Agencies may submit multiple salary reversal entries per employee on their magnetic payroll tape.
6. The agency is responsible for collecting the full amount of money that was erroneously paid to the employee.
7. Agencies must determine that there is sufficient money in each payee trailer record to recover the money to be reversed. Example: If a salary reversal of \$10.00 for Federal Tax is being processed, the payroll must contain at least \$10.00 in Federal Tax deductions.
8. If a trailer record on a payroll does not contain sufficient money to process a complete reversal for a particular payee, it is permissible to reclaim the balance of the reversal on a subsequent payroll(s) by processing another salary reversal(s). If it is not practical to reclaim the money on subsequent payrolls, the agency should collect the outstanding balance directly from the trailer payee or the employee.
9. When salary reversals involve U.S. Savings Bonds, the agency is to obtain the amount due from the employee and submit it with the salary refund document. If you are unable to get the refund from the employee, notify the Comptroller's Payroll Section immediately.
10. When the salary reversal involves a credit union or a retirement system, it is the agency's responsibility to contact the respective organization immediately and notify them of the salary reversal in order to prevent withdrawal of the amount to be reversed.
11. The State Contribution to Retirement is to be reduced, using the employee total wages subject to SERS from the reversal entry on the voucher, to calculate the refund.
12. The State Contribution to FICA or Medicare is to be reduced, using the employee's wages subject to FICA/Medicare from the reversal entry on the voucher, to calculate the refund.

The following entries must be made on the payroll voucher tape for each salary reversal:

<u>PAYROLL VOUCHER TAPE POSITION</u>	<u>DESCRIPTION</u>
48-62 (First) 63-77 (Middle) 78-97 (Last) 98-101 (Suffix)	Enter the employee's name exactly as it appeared on the original voucher.
39-47	Enter the employee's social security number, exactly as it appeared on the original voucher (even if the original entry was erroneous).
137-143	Enter .00 in the base pay.
159-166	Enter .00 in the gross amount earned field.
Dedicated and Miscellaneous Fields	Enter the amount in the deduction field that is being reversed. All salary reversal amounts are treated as negative. Enter the code relating to the trailer payee as it appeared on the original voucher.
1055-1057	Enter the reversal code. This is a three-digit code which is signed in numeric sequence by the agency. It refers to the number of salary reversals on a payroll. If there were three reversals on a payroll, the first code would be 001, the second 002, and the third 003, etc.
1058-1065	Enter the amount of the reversal. The amount entered in this field must be a positive (+) figure and it must equal the total of all negative entries.

1091-1097	Enter the trace number from the erroneous payment.
1023-1030	Enter .00 in Amount of Warrant field.

A trailer record for each salary reversal must be entered on the trailer page of the payroll. If multiple reversals are processed, a separate trailer record is required for each employee record. Each entry is to be preceded by the Comptroller code and actual code. The trailer record entries are:

1. Comptroller Code (01)
2. The Actual Code
Enter the reversal code of the associated detail entry (position 1055-1057).
3. The Payee Name should be entered as follows:

PROCEDURE	SALARY REFUND FORM PROCESSING	REVISION NUMBER 11-002

SALARY REFUND FORM PROCESSING

PURPOSE

The Salary Refund Form is a transmittal document used for depositing money in the State Treasury, crediting the appropriation accounts and updating the employee's earnings record. The form must be accompanied by a State warrant, Treasurer's draft or university check for the amount to be redeposited. A separate salary refund form must be prepared for each salary warrant. The amounts entered on the form must match the reversal amounts.

TIMING REQUIREMENTS

Salary refund forms accompanied by State warrants, Treasurer's drafts or checks issued by one of the State-funded Illinois educational facilities should be processed within 60 days of the issue date on the erroneous salary warrant. Since the Comptroller's Office will not process any incomplete refunds, it is imperative that monies totaling the gross to be credited are attached to the Salary Refund Form (C-65).

DISTRIBUTION

Copy 7 of the refund form is retained by the agency. The remaining copies should be sent to the Comptroller's Office. Exhibit 23.20.65-C is a blank form for agency use. Please contact the Comptroller's Office for an electronic version of this form.

CONTENTS

The salary refund form must be completed as follows: (See Exhibit 23.20.65-A)

- A **Agency**: Enter the agency name as it appeared on the original payroll voucher. Also enter the mailing address. (Enter the division, if it applies.)
- B **Transmittal Number and Date**: Enter agency assigned Transmittal number and preparation date. (Please note that this information is for your internal agency use only.)
- C **Deposit Instrument Identification Type**: If instrument is an advice of credit, enter a 1; a state warrant, enter a 2; a Treasurer's draft, enter a 3; a United States check, enter a 4; or a university check, enter a 5.

CONTRACTUAL SERVICE VOUCHER (Form C-02)

OVERVIEW

The Contractual Service Voucher (Exhibit 23.20.75-A) is to be used for vouchering payments subject to withholding taxes (federal or state income taxes, backup withholding, and/or FICA taxes), which have not been authorized to process using the Comptroller's salary payroll system. Examples include payments to Lottery, non-resident aliens, etc. For any exceptions, the Comptroller's Office must be contacted for authorization.

CONTRACTUAL EMPLOYEES

The Internal Revenue Service (IRS) and the Illinois Department of Revenue require federal and state income tax withholding on compensation paid to individuals who perform personal services for the State on a contractual basis who are deemed "employees" under IRS regulations.

Contractual employees who work in certain State educational facilities may qualify for membership in the Teachers' Retirement System. Employers of members of the Teachers' Retirement System are required to withhold contributions to the System.

Contractual employees do not qualify for inclusion in the State Employees' Retirement System, the State Universities Retirement System, or the State Employees Group Insurance Program.

Contractual employees, will be, in most cases, subject to the full 7.65% FICA tax if they are not covered under a pension plan that meets a specific defined contribution rule. (FICA, means the combined total of the Social Security tax (OASDI) of 6.2% and the Medicare tax (HI) of 1.45%).

The Internal Revenue Service has determined that an employee meets this minimum benefit rule if he or she contributes at least 7.5% of his or her State compensation to a pension plan.

SECTION	PAYROLL	PROCEDURE - PAGE NO. 23.20.75 2 of 16
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2004
PROCEDURE	CONTRACTUAL SERVICE VOUCHER (C-02)	REVISION NUMBER NEW

It is the responsibility of each agency to determine whether payments to individuals who perform personal services for the State are to be treated as "wages" paid to "employees" for federal and state income tax withholding purposes. The following guidelines are to be applied. The terms "services" and "personal services" as used herein are to be interpreted in their generally accepted meanings; not as defined in the Illinois statutes. Payments for non-personal services, such as rent for the use of a building or other physical facility or reimbursement of travel and other similar expenses, are not subject to withholding. Similarly, the term "person" is limited to individuals; amounts paid to partnerships and corporations are not subject to withholding even though such payments may represent compensation for personal services rendered by a member or representative of such entities.

1. Generally, all payments to persons who provide personal services to the State who are deemed to be "employees" are subject to both federal and state income tax withholding. A person providing personal services may be a State employee for income tax purposes even though (a) he is paid out of the contractual services, awards and grants, permanent improvements, lump sums, or other line item budgets, rather than through the regular payroll, (b) his agreement with the State provides that he is an independent contractor, and (c) he is not treated as an employee for State insurance and pension benefits. The test for determining whether a person who provides such services is an employee for income tax purposes is whether the State has the right to control and direct the performance of the services, not only as to the result to be accomplished, but also as to the details and means by which that result is to be accomplished. Thus a person will be deemed an employee of the State for income tax if he is subject to the will and control of the State, not only as to what shall be done, but also as to how it shall be done. It is not necessary, however, that the State actually direct or control the manner in which the services are performed; it is sufficient if it has the **right** to do so. Moreover, the fact that a person may provide services for a short period of time does not preclude him from being classified as an employee for income tax purposes. For example, a secretary may be an employee even though she works for only one day.

2. Except as provided in the last sentence of paragraph 3 and in paragraph 4, all persons who provide personal services to the State shall be treated as State employees for federal and state income tax purposes. The term "employees" shall be deemed to include (but is not limited to) the following persons:
 - a. a person who, at the time he enters into a contract with the State, is expected to be placed on a regular payroll, but is paid out of a budget other than the "personal service budget" prior to his being placed on a regular payroll;
 - b. except as described in paragraph 4, a person who provides secretarial, general office, keypunch, janitorial or other ministerial services; and,
 - c. a teacher or teacher's aide.

All persons deemed to be employees for federal and state income tax withholding purposes will receive a Form W-2 reflecting gross earnings and federal and state taxes withheld for all payments processed by the Comptroller on a Contractual Service Voucher.

3. A person who provides personal services to the State for which he is compensated other than on a regular payroll shall be treated as a State employee for income tax purposes unless he or she can prove that the contractual services are provided as part of a business which he or she regularly conducts. (See paragraph 4 (b).) Notwithstanding the preceding sentence, official court reporters who are compensated on a regular payroll (with respect to which they are employees) shall not be treated as employees with respect to transcription fees paid by the State, either on behalf of indigent criminal defendants or juveniles adjudged delinquent pursuant to the Illinois statutes and Rules of the Supreme Court of the State of Illinois or as a party to litigation.

4. The following persons are generally considered not to be State employees:
- a. a person performing professional services, such as a doctor, lawyer, dentist, architect, veterinarian, engineer or CPA, unless such person (1) is on a regular payroll, or (2) is expected to be placed on a regular payroll at the end of the contract period. (However, a person who is not an employee with respect to the rendering of one type of service can be an employee with respect to the rendering of another type of service. For example, a doctor will be treated as an employee of a medical school at which he teaches on a regular basis, even though he is not an employee with respect to a private practice which he conducts out of his office.);
 - b. a person who has bona fide business in which he regularly makes available to the public services which are similar to those rendered to the State. (For example, if an individual provides janitorial services to the State and other persons as part of regular business which he conducts, he will not be an employee of the State with respect to such services.);
 - c. a person such as an expert witness, portrait painter, management consultant or computer programmer retained to design a particular program, who provides services over which the State does not have the right to control or direct the manner in which the work is done (even though the State can control or direct the result).
5. Payments for personal services made to a person who is deemed not to be an employee for income tax purposes constitute self-employment income which the recipient will be required to include in his or her taxable income for federal or State purposes. (The State will provide each person who receives \$600 or more of self-employment income from the State with a Form 1099, indicating the amount of self-employment income paid by the State.)

Payment for services provided by an independent contractor must be submitted on an Invoice-Voucher (C-13) with a statement indicating the individual is exempt for tax withholding.

6. In certain limited cases payments to an individual may be considered in the nature of welfare payments which are not taxable income. In such cases, notwithstanding anything stated in these guidelines to the contrary, the payments are not subject to withholding. For example, payments under Title V of the Federal Economic Opportunity Act of 1964 are not taxable to the recipient and therefore are not subject to withholding.
7. Payments which represent reimbursement of nontaxable expenses under an accountable plan or payment for services which are not personal services (such as rental of office space) are not subject to withholding. In situations in which a single warrant is to be issued for personal services and reimbursement for nontaxable expenses, the voucher submitted to the Comptroller must identify the amount which represents payment for personal services.

FEDERAL AND ILLINOIS W-4 CARD (Exhibit 23.20.75-C)

REQUIREMENTS

Each contractual employee must complete a Federal/Illinois W-4 Employee's Withholding Exemption Certificate (Comptroller form C-25). The information entered on the form C-25 is used to calculate the amount of Federal and Illinois withholding taxes to be withheld on the C-02 voucher for each individual.

Worksheets for completion of the Federal and State W-4's can be obtained from the Internal Revenue Service and the Illinois Department of Revenue.

State agencies must have on file a properly completed Federal/Illinois W-4 for all contractual employees. If an individual refuses to complete a Form W-4, tax should be withheld at the same rate as a person claiming a marital status of single and exemptions of zero. State agencies must maintain the last effective Federal/Illinois W-4 for terminated employees for a period of 4½ years.

The loss of an exemption that affects withholding at the beginning of the next taxable year, such as a divorce or the loss of a dependent, should be reflected by an amended Form W-4 on or before December 1. If the change occurs in December, the new Form W-4 must be furnished within 10 days of the day on which the change occurs.

DISTRIBUTION

One copy of the Federal/Illinois W-4 should be completed by each individual and retained by the employing State agency. If an individual (1) claims over 10 withholding allowances; or (2) claims exemption from withholding, a copy of the form must be forwarded to the Comptroller's Office.

CONTENTS

Side one of the combined Federal/Illinois W-4 must be completed by the employee as follows:

- A Type or Print Full Name: Enter last name, first name and middle name or initial.
- B Social Security Number: Enter your social security number as it appears on your social security card.
- C Mailing Address: Enter your mailing address and zip code. This is the address to which your W-2 statement will be mailed.
- D Marital Status: Check appropriate box to indicate marital status for federal withholding purposes.
- E Federal Withholding Allowances:
 - 5. Enter total number of allowances you are claiming. (Leave blank if claiming exemption from withholding.)
 - 6. Enter additional dollar amount of Federal tax to be withheld, if any, per pay period. This dollar amount will be in addition to the amount calculated by using the marital status and exemptions from the tax tables. (Leave blank if claiming exemption from withholding.)
 - 7. If exempt, complete line 7, but do not complete lines 5 and 6. Before you can claim exemption you must satisfy the conditions set forth in line 7. You cannot claim exemption if your income will exceed \$600 and includes unearned income and another person can claim you as a dependent. If these conditions are met, write "Exempt" on the line provided.

F Signature and Date: Employee must sign and date the form.

Side Two of the Federal/Illinois W-4 must be completed by the employee as follows:

- 1 Enter social security number.
- 2 Enter name and mailing address.
- 3 Enter the number of state exemptions.
- 4 Enter any additional money you want withheld over and above the amount calculated by using only the exemptions claimed.
- 5 Sign on this line.
- 6 Enter the date the form was completed.

DISPOSITION OF UNACCEPTABLE FEDERAL/ILLINOIS W-4

Any unauthorized change or addition to Form W-4 makes it invalid. This includes taking out any language by which the individual certifies that the form is correct. A Form W-4 is also invalid if, by the date an individual gives it to you, he or she indicates in any way that it is false.

When you get an invalid Form W-4, do not use it to figure withholding. Tell the individual it is invalid and ask for another one, if the individual does not give you a valid one, withhold taxes as if the individual were single and claiming no withholding allowances. However, if you have an earlier Form W-4 that is valid, withhold as you did before.

EXEMPTION FROM INCOME TAX WITHHOLDING FOR ELIGIBLE PERSONS

An employee may claim exemption from income tax withholding because he or she had no income tax liability last year and expects none this year. However, the wages may still be subject to social security and Medicare taxes. An employee may claim exemption from Illinois income tax only if he can claim exemption from Federal income tax.

SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2010
PROCEDURE	CONTRACTUAL SERVICE VOUCHER (C-02)	REVISION NUMBER 10-002

A Form W-4 claiming exemption from withholding expires on December 31. An employee must file a Form W-4 each year by February 15 to claim exemption from withholding. Agencies should begin withholding from each employee who previously claimed exemption from withholding but has not submitted a new Form W-4 for the current year by February 15. Withhold tax as if the employee is single with zero withholding allowances.

EMPLOYEE'S STATEMENT OF NONRESIDENCE IN ILLINOIS (FORM IL-W-5-NR)

A contractual employee who is a resident of a reciprocal state—Iowa, Kentucky, Michigan, or Wisconsin—should not have Illinois income tax withheld from compensation even though that compensation may be paid in Illinois. Under reciprocal agreements negotiated between Illinois and those states, compensation paid to residents of those states is exempt from Illinois withholding. Such employees must file Form IL-W-5-NR (a declaration of their residence in Iowa, Kentucky, Michigan, or Wisconsin) with the employing agency to be entitled to this exemption. In the event that an employee, after filing Form IL-W-5-NR, moves out of the named state of residence, he must notify the employing agency within 10 days and file a new Form IL-W-5-NR, if applicable. See Exhibit 23.20.75-B.

PAYMENTS TO FOREIGN VENDORS

Certain payments to nonresident alien independent contractors and foreign corporations or partnerships (see SAMS Procedure 17.20.51) are subject to federal tax withholding and/or reporting on IRS Form 1042. These payments must be submitted on Contractual Service Vouchers.

PROCESSING CRITERIA

The following criteria apply to processing Contractual Service Vouchers:

1. Contractual Service Vouchers must be submitted with a Schedule (Form C-11) (Refer to Procedure 23.20.80) and not be interspersed with Commercial Vouchers (C-13) and/or Travel Vouchers (C-10).
2. Voucher numbers are restricted to 8 characters. The first 4 characters may be alpha or numeric but the last 4 must be numeric (i.e., ABCD1234).

3. A voucher number may not be used within the same account code more than once. The only exception would be in the case of a Replacement Voucher where the initial voucher was lost and, therefore, never processed.
4. The Office of the Comptroller will continue to assign the Schedule numbers for both hard copy vouchers and vouchers accompanied by magnetic tape.
5. The entire Schedule will be rejected if the total of all the vouchers (gross amounts) do not agree with the total shown on the applicable Schedule. Individual vouchers will be rejected if they do not crossfoot (gross to net).
6. Only one detail object code (in addition to 1175, State Contribution to Social Security or Medicare, Contractual Payroll) may be cited on the voucher. In this case, a payment which represents both a contractual payment (e.g., \$25/hr X 10 hrs.) plus expense reimbursements will show the total of both as the amount charged to the detail object.
7. The Contractual Service Voucher will contain marital status, federal and state withholding exemptions and amounts for federal and state tax to be withheld. It will be the agency's responsibility to compute the various withholding amounts in accordance with current IRS regulations. Questions concerning withholding tables to be used in unusual circumstances should be referred to the Internal Revenue Service.
8. The Contractual Service Voucher (C-02) must be used for all applicable contractual services payments described in the overview (23.20.75 1 of 16).

9. The determination of whether an individual hired on a contractual basis qualifies for federal and/or state tax withholding (and possibly Teachers' Retirement System contributions) rests mainly with the agency which hired the individual. The Office of the Comptroller will pre-audit the Contractual Service Vouchers to determine that the processing criteria are met and to review the agency's determination for reasonableness.
10. Nonresident Foreign vendors may be subject to federal and state income tax withholding. FICA withholding is not required.

DISTRIBUTION

Six copies of the Contractual Service Voucher are required and distributed as follows:

- The Original is retained by the Comptroller.
- Copies 2, 3, and 5 are retained by the agency.
- Copy 4 is mailed with the warrant to the vendor. The remittance copy should be tri-folded equally so that the Vendor/Payee Box is visible in the Comptroller's window envelope (Form SCO-100). All additional backup material accompanying the remittance copy to be mailed to the vendor/payee should be attached to the back of the folded remittance copy. The material should not be folded within the remittance copy. The tri-folded Copy 4 should be attached to the Original Copy retained by the Comptroller's Office.
- Copy 6 is retained by the payee.

PROCEDURE	PAYROLL WARRANT, WARRANT STUB AND EARNINGS STATEMENT	REVISION NUMBER 03-001

PAYROLL WARRANT, WARRANT STUB AND EARNINGS STATEMENT
(Exhibit 23.30.10-A and B)

Payroll disbursements are made by warrant or direct deposit. The warrant stub and direct deposit earnings statement communicate year-to-date earnings and tax information to the employee, and itemizes the deductions from gross pay. They can also serve a personnel function by communicating information such as accrued vacation time and work-study program earnings to the employee via the two message areas.

SEQUENCE

Warrants and warrant stubs and earnings statements are printed in pay code (major), distribution code and alphabetical sequence.

FREQUENCY

Most State employees are paid semi-monthly, monthly or bi-weekly.

DISTRIBUTION

Warrants and warrant stubs or earnings statements for employees paid by direct deposit are distributed to the agencies for distribution to their employees.

CONTENTS

- I. Payroll Warrant
 - A. Warrant Number – This is a unique number assigned by the Comptroller’s Office (Use For Reference).
 - B. Pay This Amount - Net Amount of payment.
 - C. Distribution Code - This four-position field is the major sequence (within pay code) in which the warrants are printed. There are no restrictions on how this field is to be used.

PAYROLL VOUCHER AUDIT PROCEDURES

PURPOSE

The objective of this procedure is to insure that the payroll vouchers submitted to the Comptroller's Office comply with the requirements specified in the [Comptroller Act](#) and the State [Salary and Annuity Withholding Act](#). Vouchers are also audited to insure that they crossfoot and balance.

TIMING REQUIREMENTS

Payroll vouchers are audited and balanced prior to issuing warrants. Vouchers are due from agencies at 9 a.m. four (4) working days prior to the scheduled pay date to balance, audit, issue and distribute warrants.

BALANCING OR VERIFICATION STEPS

The Comptroller's Office audits each payroll voucher in the following manner. Agencies should, therefore, insure that their vouchers meet these criteria in order to protect themselves against vouchers being returned or delayed.

1. Certifications

The Comptroller's Office verifies that all payroll vouchers are certified by an authorized individual at the agency and approved by the Department of Central Management Services whenever applicable. Vouchers without proper certifications may be returned to the agency.

2. Voucher Input Tapes

Agencies must submit a magnetic tape/FTP with the payroll voucher in the proper format. Magnetic tapes that are unreadable, are not in balance or do not reconcile to the voucher or distribution schedule may be returned to the agency with the voucher.

3. Crossfoot and Balancing Verification

The voucher tape will be audited to insure that gross earnings minus all deductions plus Earned Income Credit equals net pay. The sum of all deductions for a vendor and accounting code must equal the trailer record for that particular vendor and accounting code. In addition, the sum of the numeric fields in the employees' records must equal the voucher total record. Errors may result in the voucher and tape being returned to the agency for correction.

4. Valid Accounting Codes

The voucher distribution schedule will be audited to insure that accounting codes charged from this voucher are in fact valid account numbers. Discrepancies must be reconciled before warrants are printed. Since account numbers are in each record of the voucher input tape, errors will often result in the requirement for a new magnetic tape.

5. Fund Sufficiency Check

Each account charged from a voucher, including FICA or Medicare and Retirement accounts, will be checked to insure that there are sufficient fund and appropriation balances to pay the amount specified. Warrants will not be printed until there is a sufficient balance for each account number on the voucher.

6. Income Tax Verification

Each employee's record will be audited to insure that the minimum Federal and State income tax has been withheld from the employee's gross amount earned. Errors must be reconciled with the agency although corrections can often be made after warrants are generated.

WARRANT AND EARNINGS STATEMENT DISTRIBUTION PROCEDURES

PURPOSE

This procedure monitors the printing and distribution of employee payroll warrants and direct deposit earnings statements.

BALANCING OR VERIFICATION

The Comptroller's Office is responsible for verifying that warrants are printed correctly and obtaining the counter-signature of the Treasurer.

DISTRIBUTION

The Comptroller's Office releases payroll warrants and direct deposit earnings statements to State agencies two working days prior to the scheduled pay date to allow for mail distribution. Agencies are responsible for delivering the payroll warrants or earnings statements to the employees. With the exception of terminating employees, **warrants not mailed must be held by the employing agency and distributed no earlier than the scheduled pay date.**

Employees who are on direct deposit will have their net earnings credited to their account on the scheduled pay date.

DISPOSITION OF ERRORS

Undeliverable warrants must be returned to the Comptroller's Office according to the procedures prescribed in [Section 10.08 of the Comptroller Act](#).

ADDITIONAL PROCEDURES

DETERMINATION OF PAYROLLS AND PAY CODES

Each payroll must have a unique pay code. Agencies must request in writing the assignment of a pay code. The request must contain the title of the payroll, if it is code or non-code and the date on which it is to be paid. All changes to payroll titles must be approved by the Comptroller's Office.

A payroll is defined as a group of employees from an agency that are paid on the same pay schedule and appear on the same voucher. Since there can be multiple appropriations on a magnetic tape payroll voucher, as long as each employee is charged to only one account, agencies have a great deal of flexibility in determining how many payrolls they should have. Payroll codes are assigned by the Comptroller's Office and must appear on each payroll voucher for employees that are assigned to that payroll. Pay codes consist of a two-digit agency identifier and a three-digit payroll identifier.

SUPPLEMENTARY PAYROLLS

The use of supplemental or "emergency" payrolls to pay employees omitted or processed incorrectly on the regular voucher should be minimized and will require the approval of the Comptroller's payroll section. Supplemental payrolls should be assigned the same pay code as normally used for that group of employees and must be marked "Supplemental."

INQUIRY PROCEDURE

The Comptroller's Office will maintain a master file on all employees paid from State funds and will endeavor to respond to all bonafide requests for information on a timely basis. This information may be requested by writing or calling the payroll section. Most questions can be answered immediately through the use of the Comptroller's teleprocessing inquiry system.

FISCAL YEAR CUT-OFFS

Payroll vouchers (or warrants) may not be split between fiscal years. Therefore, bi-weekly pay periods which overlap fiscal years will require two vouchers. Payments from the previous year appropriations can be made throughout the lapse period; although these payments must be for previous fiscal year earnings and must appear on a separate voucher.

TRANSFERRED EMPLOYEES

Employees transferring from one agency to another agency necessitate the submission of new source documents. Employees transferring from one payroll to another payroll within an agency do not require new source documents. However, the payroll voucher should identify this change.

NEW EMPLOYEES

Source documents (W-4 cards, tax-sheltered annuity agreements and voluntary deduction authorization cards) must be submitted for all new employees prior to the first payroll upon which the employee appears. An employee status code of four (4), indicating that this is a new employee, and the effective date should be entered on the payroll voucher tape.

TERMINATED EMPLOYEES

No source documents are required. Terminated employees will be identified by entering a one (1) in the employee status code field of the payroll voucher. After W-2's are printed, employees identified as terminated and employees with no activity in the previous calendar year will be removed from the Comptroller's Master Payroll File.

MULTIPLE WARRANT PROCEDURE

Employees paid simultaneously from multiple appropriations (accounting codes) will receive multiple payroll warrants in a pay period because one warrant cannot be charged to more than one account. The employee's warrant stub will reflect total earnings and taxes withheld. However, the Comptroller's system will only verify that the minimum taxes for the earnings reflected on a particular warrant have been withheld. It is the agency's responsibility to determine whether the sum of the Federal tax withholdings from each warrant meets minimum Federal requirements for the total earnings paid the employee.

DEDUCTION CORRECTION PROCEDURE

Erroneous deduction amounts can be corrected by debiting or crediting the employee's record on a subsequent voucher, as long as a sufficient balance remains in the deduction trailer record to offset negative entries (corrections for over-payments). This procedure should not be used to recover retirement or credit union adjustments. Corrections resulting from voided warrants or warrants generated for the wrong amount should be corrected through the salary refund system.

AUTHORIZED DEDUCTION COMPANY APPROVAL

Approval to deduct earnings from an employee's gross pay for a new vendor (insurance company, credit union, etc.) must be obtained from the Comptroller's Office by written request from that vendor. Upon approval, the Comptroller's Office will assign a payee code (actual code), also known as a miscellaneous deduction code, to be used for further processing.

TRAILER RECORD PAYMENTS

The Comptroller's Office will make all payments for deductions withheld from employee earnings. Transmittal lists will be printed and sent to the payee with the warrants or mailed separately if deductions are electronically transmitted.

RECIPROCAL TAXES

An employee who is a resident of Iowa, Kentucky, Michigan, or Wisconsin should not have Illinois income tax withheld from compensation even though that compensation may be paid in Illinois. Under reciprocal agreements negotiated between Illinois and those states, compensation paid to residents of those states is exempt from Illinois withholding. Such employees must file Form IL-W-5NR (a declaration of their residence in Iowa, Kentucky, Michigan, or Wisconsin) with the employing agency to be entitled to this exemption. See Procedure 23.20.10. Employees from reciprocal states who have filed Form IL-W-5NR should have their state withholding tax amount calculated using that state's tax formula or table. Employees from states other than the ones cited above or residents of reciprocal States who have not filed Form IL-W-5NR must have their withholding calculated using the State of Illinois formula.

NONRESIDENT ALIENS

Salaries, wages, or any other compensation for the personal services of a nonresident alien employee performed in the United States are generally subject to withholding in the same manner as wages paid to a U.S. citizen; however, many tax treaties provide at least a partial exemption from tax for labor or personal services performed in the United States by a qualifying individual. The employee must provide the employer with a statement to claim a treaty exemption from withholding. Details of the statement content can be found in [IRS Publication 515](#), *Withholding of Tax on Nonresident Aliens and Foreign Corporations*.

Special instructions for completing Form W-4 must be given to nonresident aliens. See Procedure 23.20.05.

Compensation paid to a nonresident alien employee (other than a resident of Puerto Rico) for services performed outside the United States is not considered wages and not subject to withholding. If the personal services are performed partly in the United States and partly outside of the United States, an allocation of income for services performed in the United States must be made.

Payments subject to federal withholding are considered compensation paid in Illinois and subject to Illinois withholding.

SOCIAL SECURITY NUMBER CORRECTIONS

When the Social Security Number on file in the Comptroller's Office is incorrect (and the employee has been paid under the incorrect number), the agency must submit a letter to the Comptroller's Office stating the incorrect Social Security Number, the correct Social Security Number, the employee's name and the pay code for the employee.

30 ILCS 105/14a states in part, "The State Comptroller shall draw a warrant or warrants against the appropriation, upon receipt of a proper death certificate, payable to decedents' estate..."

The procedure for preparing a death benefit payroll and calculating accrued vacation pay is described below.

30 ILCS 105/14a of the State Finance Act, Illinois Revised Statutes, permits the payment of accrued vacation pay due a State employee at the time of death. The Act states:

"(a) Upon the death of a State employee his or her estate is entitled to receive from the appropriation for personal services available for payment of his or her compensation such sum for accrued vacation period, accrued overtime, and accrued qualifying sick leave as would have been paid or allowed to such employee had he or she survived and terminated his or her employment.

The State Comptroller shall draw his warrant or warrants against the appropriation, upon receipt of a proper death certificate, payable to decedent's estate, or if no estate is opened, to the person or persons entitled thereto under Section 25-1 of the Probate Act of 1975 upon receipt of the affidavit referred to in that Section, for the sum due.

(b) The Department of Central Management Services shall prescribe by rule the method of computing the accrued vacation period and accrued overtime for all employees, including those not otherwise subject to its jurisdiction, and for the purposes of this Act the Department of Central Management Services may require such reports as it deems necessary. Accrued sick leave shall be computed as provided in subsection (f)."

VOUCHERING PROCEDURES

1. If the payment is made in the same year the employee died and the employee was subject to Social Security or Medicare withholding, the payment should be made on the regular payroll voucher using the employee's name and Social Security number. The only withholdings to be made will be for Social Security or Medicare and, if

applicable, retirement. Social Security or Medicare should be withheld on the entire payment to the extent that it does not exceed the maximum allowable withholding. Retirement is generally withheld only on accrued wages and overtime, however, you should contact the applicable Retirement System to determine what portion of the payment, if any, is subject to retirement.

If the deceased employee was not subject to FICA or Medicare or the payment is made in a subsequent year, the payment must be made on a C-13 Invoice Voucher.

If the payment is made directly to an heir(s), the vendor number must be the heir's TIN (Taxpayer Identification Number). If the payment is made to the decedent's estate, the vendor number must be the TIN of the estate if one has been established. If the estate has not established a TIN, use the decedent's TIN. In the case of a university employee, where a contribution to the University Retirement System is required, that portion of the payment must cite vendor number 100069301.

A detailed explanation of the payment must be made in box 10 of voucher form C-13. At a minimum the information must include the deceased employee's name, social security number, payroll code, the type and number of days or hours being paid and the daily or hourly rate of pay. The obligation reference must be "00" and the detail object code will be 1121. The rest of the voucher would be completed in the normal manner. One copy of the death certificate and one copy of the proof of heirship, such as a Small Estate Affidavit must be attached to the original (Comptroller's copy) of the C-13 voucher. Other certified documents which may accompany the voucher and death certificate are letters of office, letters testamentary or letters of administration. These documents will remain attached to the original voucher copy and retained on file in the Comptroller's Office.

INTRODUCTION

The State Treasury maintains moneys received by the various State agencies. Moneys are segregated into funds which are held by the Treasurer either as officio or ex-officio custodian. Before moneys may be deposited with the Treasurer, the Office of the Comptroller must receive the moneys in the form of State Treasurer's Drafts or other Treasurer-acceptable remittances and order the moneys to be deposited. Control over this process is maintained by the use of Receipt Accounts which the Office of the Comptroller establishes. Cash refunds are processed by the Comptroller as reversals of expenditures.

This section of the SAMS Manual presents the information necessary for agencies to deposit cash receipts and cash refunds into the State Treasury and to transfer cash receipts deposited into an erroneous receipt account. SAMS Procedures 25.20.10 and 25.20.20 should be followed in preparing transmittals to the Comptroller of cash receipts and cash refunds, respectively. Receipt accounts are listed for each category in Section 25.50.10.

PROCEDURE	STATEMENT OF GENERAL POLICY	REVISION NUMBER 03-003

STATEMENT OF GENERAL POLICY

By law, the Comptroller is required to order all deposits of money into funds held by the State Treasurer. Moneys received by a State agency in the form of checks, drafts or similar instruments must be delivered to the State Treasurer for collection. The State Treasurer shall remit such collected funds to the agency by Treasurer's Draft. The draft shall be remitted to the Comptroller to be ordered into the appropriate fund(s). The State Officers and Employees Money Disposition Act (**30 ILCS 230**) requires that all moneys ordered into the State treasury shall, unless expressly provided by law to be held in a separate or special fund, be deposited in the General Revenue Fund. In addition, the Act provides for any indirect cost reimbursement received by a state agency to be deposited within 30 days of receipt into the fund from which the expenditure giving rise to the reimbursement was made, unless deposit into another fund is required by law. If deposits into the original fund cannot be made or determined, the reimbursement shall be deposited into the General Revenue Fund.

The Comptroller's receipt accounting system has been developed to process agency receipts and deposits them with the Treasurer. The Comptroller processes cash refunds as reversals of expenditures.

The Treasurer has specified the types of remittances, which are always acceptable as receipts, or cash refunds. They are:

- . Treasurer's Drafts (both, negotiable and non-negotiable) issued by the Treasurer of Illinois,
- . State Warrants issued by the Comptroller of Illinois and countersigned by the State Treasurer, (State Warrants must have the proper endorsement)
- . Federal checks issued by the U.S. Government,
- . Checks issued by one of the state funded Illinois educational facilities, and/or
- . Advices of Credit issued by a bank.

If monies are received by an agency in any other form, such as a personal check, they must first be deposited into the Treasurer's Clearing Account so that a Treasurer's Draft may be issued and submitted to the Comptroller. If cash is received, it should be deposited at a financial institution designated by the Treasurer and a receipted deposit ticket should be used to deposit on the appropriate Comptroller's document. Submittal of receipts to the Comptroller may be accomplished by following Procedure 25.20.10, which presents the instructions for completing and submitting the Receipt Deposit Transmittal Form, shown in Exhibit 25.20.10-A.

Cash refunds, or collections caused by an erroneous disbursement, may not be submitted to the Comptroller as receipts. Cash refunds are handled as reversals of expenditures so that for reimbursement purposes, the expenditure authority account that the original warrant was drawn on will be credited with the refund.

Cash refunds should be submitted to the Comptroller by following SAMS Procedure 25.20.20, which contains the instructions for completing the Expenditure Adjustment Transmittal Form, shown in SAMS Procedure Exhibit 25.20.20-A.

It is important to note that receipts and cash refunds should be submitted separately to the Comptroller using separate transmittal forms and money instruments. Any exception to this procedure requires approval by the Comptroller's Office prior to processing.

DESCRIPTION OF RECEIPT ACCOUNT STRUCTURE

Agencies will continue to use the CUSAS Receipt Account Code Structure for completing the Receipt Deposit Transmittal (C-64) Form. As of July 1, 1997, SAMS will translate the CUSAS Receipt Source/Sub-Source into the SAMS Revenue Source Code. Output Reports generated by SAMS will utilize the SAMS Receipts Account Code Structure. GENERAL

The Receipts Deposit Transmittal, SAMS Procedure Exhibit 25.20.10-A, is used to deposit all receipts into the State Treasury. It has been designed to eliminate a free form transmittal letter. This form must be used when receipts are submitted to the Comptroller for ordering of money into a fund. The Comptroller's Office has begun accepting receipts on diskettes.

An agency may report up to nine (9) receipt accounts within the same fund on one form. Multiple forms may be used when one deposit instrument, such as a Treasurer's Draft, is to be deposited into more than nine (9) receipt accounts or into receipt accounts for different funds. There does not have to be a one-for-one relationship between deposit instrument and receipt account.

Agencies requesting wire transfers must coordinate with the Treasurer's Office. The Agency will order monies and the wire transfer or advice will be sent to the Treasurer's Office. The Agency prepares a completed C-64 Form and sends to the Treasurer's Office. In the deposit instrument identification number the "Type" is "1" and the "Description" is "Advice". The Treasurer's Office will affix the advice (wire transfer) and send to the Comptroller's Office for processing.

It is important to note that the instrument(s) accompanying a Receipts Deposit Transmittal should be receipts only. The deposit instrument should not contain monies applicable to cash refund transactions. When depositing cash receipts and cash refunds into the Treasurer's Clearing Account, it is the agency's responsibility to request separate instruments -- one for receipts and one for cash refunds. Any exception to this procedure requires approval by the Comptroller's Office prior to processing.

INSTRUCTIONS FOR COMPLETION OF THE
RECEIPTS DEPOSIT TRANSMITTAL

PURPOSE

The purpose of this procedure is to provide instructions to complete the Receipts Deposit Transmittal to request the Comptroller to order monies into a State Treasury Fund.

PREPARATION OF THE FORM

The instructions for completing the form are set forth below. SAMS Procedure Exhibit 25.20.10-A illustrates a blank form with the instruction reference numbers on it. SAMS Procedure Exhibit 25.20.10-B illustrates a properly completed form. SAMS Procedure Exhibit 25.20.10-C is a

blank form for agency use. Please contact the Comptroller's Office for an electronic version of this form.

General Information

- 1 Name of Agency
- 2 Agency Address
- 3 A unique sequential number assigned to each transmittal by the submitting agency. **(Please note that this number is for your internal agency use only.)**
- 4 Date forwarded to Comptroller. **(Please note that this date is for your internal agency use only.)**
- 5 Name of fund into which money will be deposited. **(To be completed by the submitting agency.)**
- 6 Name and phone number of individual to be contacted for additional information.

Account Information

As discussed in SAMS Procedure 25.10.40, there is a difference in Receipt Account Code Structure between CUSAS and SAMS. Agencies will continue to use the CUSAS Receipt Account Code Structure for completing the Receipt Deposit Transmittal (C-64). However, output from SAMS (reports/inquiries) will be in the SAMS Account Code Structure. If these items are not completed, the transmittal is subject to return.

- 7 - 10 Receipt Account Code - the twelve (12) digit receipt account code as indicated in the receipts chart of accounts. If more than one deposit instrument is applicable to one receipt account, the receipt account need only be shown once. However, total instruments must equal total deposits.
- 11 Amount to be deposited into the receipt account. (Amounts cannot be negative.)
- 12 Enter CFDA (Catalog of Federal Domestic Assistance) Number, if applicable.
- 13 Description: Include a brief description of the major source of receipts and any other explanatory information on the nature of the deposit. For example: Federal monies received from the Illinois Criminal Justice Information Authority for a violence prevention program. Negative amounts may be used here for agency purposes.

TRANSMITTING DEPOSIT TO COMPTROLLER

Transmitting Deposit

Receipt deposits are to be submitted on the Receipt Deposit Transmittal (C-64) form in a multiple copy format. The copy distribution must be clearly identified either at the bottom of the form or in the upper left hand corner of the form.

Copy 6 (Goldenrod) of the Receipt Deposit Transmittal should be removed and retained by the submitting agency. Copies 1 through 5, with the deposit instruments attached, should be submitted to the Office of the Comptroller for processing. Copy 1 (white) must contain an original signature of the authorized agency official.

After the deposit has been processed by both the Comptroller and the State Treasurer, copy 4 (Pink) will be receipted and returned by the State Treasurer to the depositing agency countersigned by the State Treasurer (22) and signed by the Comptroller (23). The Comptroller's deposit date (18) will be indicated. The countersigned C-64 and the deposit order number will facilitate reconciliation.

AGENCY NOTIFICATION

If any errors are detected on the transmittal before the deposit is made, the deposit will be returned to the agency.

If an error is discovered after the deposit is made, the Comptroller's Office will work with the agency and/or the Treasurer's Office to either correct the transaction or return it to the agency.

AGENCY TRANSMITTALS - CASH REFUNDS

GENERAL

The State Comptroller Act ([15 ILCS 405/10.14](#)) requires appropriation credit to be provided when any warrant, or portion thereof, is returned to the State Treasury as a result of an erroneous or overpayment made from a treasury held fund. The statute further states that if the appropriation to which the original warrant was so charged has lapsed, the fund on which the warrant was drawn shall receive credit for the amount returned to the State Treasury.

The Expenditure Adjustment Transmittal form, SAMS Procedure Exhibit 25.20.20-A, is to be used when submitting cash refunds (excluding salary refunds) to the Comptroller for ordering of monies into the State Treasury. The data reported on this form will be used to credit the applicable fund and expenditure authority account, if not lapsed, as well as the SAMS Object Account(s) which were charged when the expenditure was made. If the refund applies to the current calendar year and the original payment was subject to the 1099 reporting requirements of the Internal Revenue Service, the information on the Expenditure Adjustment Transmittal form will also be used to adjust the vendor's earnings record.

Again, if the money being remitted to the Comptroller for deposit in the treasury is not an erroneous or overpayment as prescribed by the State Comptroller Act ([15 ILCS 405/10.14](#)) it is not a cash refund and must be receipted on the form C-64, Receipts Deposit Transmittal.

An agency may report up to two (2) cash refunds for the same agency within the same fund on a single document for the current fiscal year. An agency cannot mix a current fiscal year with a prior fiscal year on the same refund document. They must be entered on a separate document. (Multiple prior years may be reported on one document). Multiple forms may be submitted when one deposit instrument, such as a Treasurer's Draft, is applicable to more than two (2) cash refunds or different funds. If an agency has numerous refunds to a single appropriation, they can contact the Comptroller's Office to request exception processing. If an agency identifies a prior-year cash refund but cannot complete all the required fields, contact the Comptroller's Office for processing instructions.

It is important to note that the deposit instrument(s) accompanying an Expenditure Adjustment Transmittal(s) for a cash refund should be monies only for cash refund(s). The deposit instrument should not contain monies applicable to receipts. When depositing cash refunds and cash receipts into a Treasurer's Clearing Account, it is the agency's responsibility to request separate drafts -- one for cash refunds and one for cash receipts. Any exceptions to this procedure requires approval by the Comptroller's Office prior to processing.

INSTRUCTION FOR COMPLETION OF THE
EXPENDITURE ADJUSTMENT TRANSMITTAL

PURPOSE

The purpose of this procedure is to provide instructions for completing the Expenditure Adjustment Transmittal. This form requests the Comptroller to return monies into a State Treasury Fund.

PREPARATION OF FORM

The instructions for completing the form are set forth below. SAMS Procedure Exhibit 25.20.20-A illustrates a blank form with the instruction reference numbers on it. SAMS Procedure Exhibit 25.20.20-B illustrates a properly completed form. SAMS Procedure Exhibit 25.20.20-C is a blank form for agency use. Please contact the Comptroller's Office for an electronic version of this form.

General Information

- 1 Enter Name of agency.
- 2 Enter Agency address.
- 3 Enter the name and phone number of the individual to receive correspondence and to contact for questions.
- 4 A unique sequential number assigned by the agency to each transmittal. (Agency Use Only - Optional.)
- 5 Date forwarded to Comptroller. (Agency Use Only – Optional)
- 6 Indicate type of instrument by inserting:
 - 1 - if the instrument is an Advice of Credit,
 - 2 - if the instrument is a State Warrant,

3 - if the instrument is a Treasurer's Draft,
4 - if the instrument is a United States check,
5 - if the instrument is a State-funded Illinois educational facility check, and/or
6 - if the instrument is other than listed above.

7 Insert all instrument numbers.

Expenditure Information

- 8 The appropriation account code cited for the **original payment** regardless of fiscal year.
- 9 The fiscal year to which the refund applies (fiscal year in which the expenditure was originally made).
- 10 The object code(s) to be adjusted by the refunded amount.
- 11 Amount of refund applicable to each cited object code.
- 12 CFDA (Catalog of Federal Domestic Assistance) Number, if applicable.
- 13 Warrant number/EFT trace number on which original expenditure was issued.
- 14 Date of issue (Warrant/EFT).
- 15 The voucher number as reported on SAMS on which the original payment was made.
- 16 The vendor identification number and name used when this refunded payment was vouchered. (EIN or Social Security Number)
- 17 Brief reason for the refund to ensure the transaction is applicable to the provision set forth by the State Comptroller Act (**15 ILCS 405/10.14**).
- 18 Total transaction amount.

Agency Authorization

- 19 Signature and title of person certifying transmittal. **(Original signature required.)**
- 20 **This date is entered by the Comptroller's Office.** Date in this section is the date the deposit is ordered into the fund by the Comptroller.
- 21 Enter the six-digit agency assigned order number (this number should begin with the Comptroller assigned Alpha prefix and must be unique).
- 22 Enter the document total.
- 23 Enter the four (4) digit fund number.

NAME CHANGE REQUESTS

To make a name change to a warrant, the agency must first return the original warrant via an Expenditure Adjustment Transmittal (EAT), Form C-63. Name change requests must clearly state in the "Reason For Refund" box "Erroneous Payment – Name Change". For additional information, contact the Funds, Receipts and Collections Unit at 217/782-4106.

Once the EAT is processed, the agency should submit an Invoice Voucher, Form C-13, for processing through the Commercial Warrant Writing System. A copy of the approved C-63 form should be attached to the C-13. For additional information contact the Voucher Pre-Audit Unit at 217/782-3060.

TRANSMITTING DEPOSIT TO COMPTROLLER

When transmitting deposits to the Comptroller by messenger, U.S. mail or other means, remove copy 7 (Goldenrod) and retain for your records. Copy 1 (white) must contain an original signature of the authorized agency official. Forward copies 1 through 6, with the deposit instrument(s) to the Comptroller. Distribution must be clearly indicated on the individual form.

After the deposit has been processed by both the Comptroller and the State Treasurer, copy 4 (Pink) will be returned to the depositing agency by the Treasurer. It will be signed by the Comptroller (25) and countersigned by the State Treasurer (24). Also, the Comptroller will indicate a date of deposit (20).

ADDITIONS AND DELETIONS OF RECEIPT ACCOUNTS (REVENUE SOURCES)

Requests for additions or deletions to the Receipts Chart of Accounts which appears in Section 25.50.10 are initiated by the agency requesting the proposed changes. All applicable sections of the "Chart of Accounts Maintenance and Inquiry" (Form C-45), as shown in Exhibit 25.20.30-B, must be completed and submitted to the Office of the Comptroller for review prior to any changes being made to the Receipts Chart of Accounts.

For an addition, the agency will provide the Office of the Comptroller with a Form C-45 which has all information required for an addition to the Receipt Chart of Accounts included on the form. If an agency must request more than one receipt account, it must submit a separate Form C-45 for each request. Exhibit 25.20.30-C shows a properly completed Form C-45 requesting an additional receipt account.

Requests for deletions to the Receipts Chart of Accounts also require the use of the Form C-45. In the case of deletions, the box indicating "Delete" in Section I of the form should be checked and the reason for the deletion explained in Section IV. As with addition requests, a separate Form C-45 must be submitted for each request. Exhibit 25.20.30-D illustrates a completed Form C-45 for a deletion request.

NOTIFICATION OF ADDITION OR DELETION OF RECEIPT ACCOUNTS (REVENUE SOURCES)

After the "Chart of Accounts Maintenance and Inquiry" Form C-45 has been received by the Comptroller's Office it will be reviewed and the agency notified of the action taken. If the request has been approved, the "Chart of Accounts Maintenance and Inquiry" Form C-45 will be returned to the requesting agency with notification of approval.

If the request has been denied, the form will be returned with a letter indicating the reason for denying the request. Questions relating to the denial of a request should be addressed to the Funds Management Department.

PREPARATION OF THE FORM

Two copies of the "Chart of Accounts Maintenance and Inquiry" form should be prepared to request the establishment or deletion of a receipt account (revenue source). The original copy of the form should be sent directly to the Comptroller's Office, Funds Management Department and the duplicate retained by the agency.

If an agency is requesting the addition or deletion of two or more receipt accounts (revenue sources), a separate request form should be submitted for each account addition or deletion requested. However, one request applicable to receipts and one request applicable to expenditures may be on the form for similar items.

Only those portions of the "Chart of Account Maintenance and Inquiry" form used to add or delete a receipt account (revenue source) are explained in this section. Other portions of the form are explained in the appropriated section of the manual.

Exhibit 25.20.30-A is a blank form which may be used to submit requests for an addition or a deletion. Exhibit 25.20.30-B illustrates a blank form with the instruction reference numbers on it. Exhibit 25.20.30-C contains a completed form requesting the addition of a receipt account (revenue source). Exhibit 25.20.30-D illustrates a completed form requesting the deletion of a receipt account (revenue source). The instructions for completing the "Chart of Accounts Maintenance and Inquiry" form are:

- (1) Enter agency name.
- (2) Enter date of request.
- (3) Enter agency address.
- (4) Enter name to whose attention approved C-45 should be returned.
- (5) Mark Add box if an addition is being requested.
- (6) Mark Delete box if a deletion is being requested.
- (7) For adds, indicate estimated annual receipts.
- (8) Always enter account code for deletions. A recommended account code may be entered for additions.
- (9) Enter fund name and number into which receipts will be deposited.
- (10) Indicate source of receipts.
- (11) Provide a complete description and, if applicable, a statutory basis for the request.

PROCEDURE	RECONCILIATION OF MONTHLY REVENUE STATUS REPORT	REVISION NUMBER 98-001

RECONCILIATION OF MONTHLY REVENUE STATUS REPORT

PURPOSE

The purpose of this procedure is to describe one method which can be used to reconcile receipt account balances maintained by the agency with the statewide receipt account records maintained in the Comptroller's Office. This reconciliation is required to be performed monthly and the Comptroller's Office notified of any unreconcilable differences so that the necessary corrective action can be taken to locate the differences and correct the accounting records.

GENERAL

The Monthly Revenue Status Report has been designed to facilitate agency receipts reconciliation. All receipt accounts administered by the agency will be reflected on this report. The reports will have all the information needed to reconcile the agency's records to the Comptroller's records.

RECONCILING THE REPORT

The suggested method for reconciling the "Monthly Revenue Status Report" is as follows:

Step 1.

For each receipt account (5) compare the agency fiscal year-to-date receipts with the Monthly Revenue Status Report ending balance (9). If there is a difference and the previous Monthly Revenue Status Report has been reconciled, the difference should be in the current period amount (8). Proceed to Step 2.

**STATE OF ILLINOIS
OFFICE OF THE COMPTROLLER**

SECTION	RECEIPTS AND CASH REFUNDS	PROCEDURE - PAGE NO. 25.40.20 2 of 4
SUB-SECTION	CONTROL	EFFECTIVE DATE July 1, 1997
PROCEDURE	RECONCILIATION OF MONTHLY REVENUE STATUS REPORT	REVISION NUMBER 98-001

Step 2.

Since the agency records a receipt at the time of collection and the Comptroller records a receipt at the time of deposit in the State Treasury, there will normally be a timing difference which results in reconciling items.

The following steps should be followed in reconciling the ending balance for each receipt account (5) as of the report date:

Begin with the fiscal year-to-date balance (9) shown on the "Monthly Revenue Status Report."

Add receipts recorded on your records as of the date of this report which do not appear in the current month's detail activity (10) through (13). These deposits are items in transit at month end which have not been processed by the Comptroller.

Add transfers in recorded on your records as of the date of this report which do not appear in the current month's detail activity (10) through (13). These are items in transit at month end which have not been processed by the Comptroller. A transfer in will occur when a deposit was credited to a wrong receipt account initially and is now being corrected.

Subtract transfers out recorded on your records as of the date of this report which do not appear in the current month's detail activity (10) through (13). These are items in transit at month end which have not been processed by the Comptroller. A transfer out will occur when the receipt account was credited with an erroneous deposit and is now being removed.

Subtract reversals (correction of posting errors) recorded on your records as of the date of this report which do not appear in the current month's detail activity (10) through (13). A reversal will occur when a wrong dollar amount was posted. The reversal will indicate the amount of the erroneous deposit and the corrected amount will appear as a normal transaction.

Subtract receipts processed by the Office of the Comptroller during July of the current fiscal year which were recorded in the agency's records as a prior fiscal year receipt. These deposits were items in transit at the end of the prior fiscal year. These items can be determined by reviewing the detail activity (10) through (13) shown on the Sample Monthly Revenue Status Report.

SUB-SECTION	CONTROL	EFFECTIVE DATE January 1, 2003
PROCEDURE	RECONCILIATION OF MONTHLY REVENUE STATUS REPORT	REVISION NUMBER 03-003

Check the dollar amount of each transaction to see if it is the same on the "Monthly Revenue Status Report" as it is in the agency's records. If there are any differences, this will be a reconciling item and the Office of the Comptroller should be notified on the Reconciliation Exception Notification (C-82).

The balance should now equal the fiscal year-to-date receipts reflected on the agency's records.

RECONCILIATION EXCEPTION NOTIFICATION

The Monthly Revenue Status Report, which is distributed to each agency, must be reconciled on a timely basis to ensure the early detection and correction of errors. Along with the Revenue Status Report, a Reconciliation Exception Notification (SAMS Procedure Exhibit 25.40.20-A) form is provided to facilitate the reporting of discrepancies to the Comptroller.

INTRODUCTION

The proper management of funds accounted for on an accrual or modified accrual basis requires adequate procedures for agencies to follow in management of accounts receivable. This section establishes guidelines for State agencies to follow in the development and implementation of a system for accounting for and managing their receivables. This section expands on the SAMS Asset Account procedure 03.30.10 and covers the following areas:

1. Recognition of Receivables
2. Establishing Due Dates for Receivables
3. Aging of Receivables
4. Uncollectible Receivables
5. Interest and Late Charges
6. Receivables Reporting Requirements
7. Receivables Collections Procedures

This section presents general guidelines and minimum reporting and collections requirements for State agencies. It is the responsibility of each agency to develop its internal procedures for implementing these guidelines within their organization.

SECTION	ACCOUNTS RECEIVABLE REPORTING	PROCEDURE - PAGE NO. 26.10.20 1 of 1
SUB-SECTION	OVERVIEW	EFFECTIVE DATE July 1, 2001
PROCEDURE	PURPOSE AND SCOPE	REVISION NUMBER 02-001

PURPOSE AND SCOPE

The primary purposes of the statewide accounts receivable reporting requirements are to: 1) Comply with the Illinois State Collection Act of 1986 (Ill. Rev. Stat., 1987, Ch. 15, par. 151)(**30 ILCS 210/1**) which mandates State agencies to capture receivable information and report receivables in accordance with rules established by the Comptroller and, 2) Assist State agencies in more efficiently and effectively managing their accounts receivable.

Accounts receivable represent resources of the State or resources which the State is responsible for in a trustee capacity or as an agent of individuals, private organizations, or other governmental units. The State Collection Act requires the Comptroller's Office to issue an annual accounts receivable report to the Governor and General Assembly by March 14 which covers all delinquent debt owed to each State agency as of December 31 of the previous calendar year. This report consists of schedules summarizing the State's (1) receivables by agency; (2) receivables by agency and revenue source; (3) aging of delinquent debt by agency and revenue source; and (4) collection activities for delinquent debt. Where appropriate, prior year amounts will be provided for comparison purposes. A transmittal letter and overview presentation will provide supplemental information.

Generally, any agency/fund which has been determined to be part of the State of Illinois for GAAP reporting purposes (see SAMS Procedure 27.50.10) will be subject to the accounts receivable reporting requirements. This broad applicability will ensure that statewide reporting is not fragmented and that the State's responsibilities are fulfilled. Certain types of receivables (e.g., State university foundations, related organizations and certain State agencies which account for private individual's assets held in a guardianship capacity) may be exempted from quarterly reporting or disclosed separately in order to portray their unique nature. Potential exemptions to the quarterly reporting requirements will be addressed on a case-by-case basis.

If gross receivables at the beginning and end of the quarter are less than \$500.00, submission of quarterly receivables reports to the Comptroller's Office is not required. However, agencies are required to notify the Comptroller's Office in writing by March 31 each year to verify that a report is not required for these funds. Agencies must maintain internal accountability of all receivables, regardless of the Comptroller's Office \$500.00 reporting threshold.

STATUTE REFERENCE

The statutory authority requiring the Comptroller to develop procedures for State agencies to follow in the reporting of accounts receivable information is contained in Section 4 of the State Collection Act of 1986, (Ill. Rev. Stat., 1985 ch. 15, par. 151)(**30 ILCS 210/1**).

"The Comptroller shall provide by rule appropriate procedures for State agencies to follow in establishing and recording within the State accounting system records of amounts owed to the State of Illinois. The rules of the Comptroller include, but are not limited to:

- (1) The manner by which State agencies shall recognize debts;
- (2) systems to age accounts receivable of State agencies;
- (3) standards by which State agencies' claims may be entered and removed from the Comptroller's Offset System authorized by Section 10.05 of the State Comptroller Act;
- (4) accounting procedures for estimating the amount of uncollectible receivables of State agencies; and
- (5) accounting procedures for writing off bad debts and uncollectible claims..."

DEFINITION OF RECEIVABLES & RELATED TERMS

Receivables

Receivables represent amounts or claims owed to the State or State agencies by any individual or entity. These claims are for the future receipt of cash resulting from the sale of goods or services or other types of transactions. There are two criteria essential to the creation of an account receivable:

- A) The transaction must be completed to the extent that payment is the only unconsummated act (i.e., the income is earned), and,
- B) The claim must be measurable in terms of the assignment of a monetary value established by State law and administrative regulations. Receivable classifications include:
 - 1. Taxes and related penalties and interest;
 - 2. Loans and notes receivable;
 - 3. Amounts due for licenses and fees;
 - 4. Amounts due under grants, contracts, and contributions;
 - 5. Amounts due for goods and services provided;
 - 6. Other receivables.

The Comptroller's Office accounting definition of a receivable differs dramatically from the definition of a receivable from a legal perspective. Receivables, for purpose of this procedure should be recognized when goods are delivered or services are performed (accounts receivable) or when the State's claim for future cash is reasonably estimable. For example, when an assessment is issued and the agency has a reasonable basis for issuing the assessment, it should be reported to the Comptroller's Office as a receivable. An appropriate allowance for uncollectible amounts based on the agency's best estimate or on past experience should also be established where appropriate.

Receivables which are protested are a special category since they are disputed. However, the protest process should not be considered an "unconsummated act" in applying the above criteria. Since their monetary value has been reasonably established, receivables in protest are subject to accounts receivable reporting

requirements. In order to distinguish receivables in protest from those not in protest or protestable, separate quarterly reports are required for each category. The form is designed so that the preparer can indicate the particular category reported (i.e., "in protest" and "not in protest or protestable").

Receivables, however, do not include amounts which are maintained within an agency's internal records which are not reasonably estimable. For example, "balloon" assessments which are issued in order to assure accessibility to audit a client/taxpayer's books and records or prevent the expiration of the statute of limitations are not receivables since the amount of the "balloon" assessment has no reasonable basis. These amounts which are maintained on the agency's internal records for control purposes should be maintained in a separate category (e.g., "memorandum only" category) but should not be reported to the Comptroller's Office on the quarterly reporting forms.

Receivables may be due from private individuals or business entities, State employees, other State agencies and institutions, and local or federal government agencies. This definition does not preclude the reporting of receivables for GAAP reporting purposes in accordance with the Comptroller's Office revenue accrual instructions.

Taxes Receivable and Related Penalties and Interest

Amounts owed to the State or State agencies by individuals or organizations for uncollected taxes including individual and corporate income taxes, sales taxes, motor fuel taxes, public utility taxes, etc. For purposes of interim reporting as required by the State Collection Act of 1986, Taxes Receivable will be limited to those amounts due the State as actually assessed at the time of reporting, either as reported but uncollected, additional tax and penalty and interest, or delinquent taxes.

Loans and Notes Receivables

Amounts which have been loaned to individuals or organizations other than State agencies.

Licenses and Fees Receivables

Amounts due from individuals and organizations for the purchase of licenses and the payment of various statutorily or agency assessed fees.

Interagency/Intergovernmental Receivables

Interagency/Intergovernmental receivables are amounts which are due from other State agencies ("Due from's") or from local or federal governments. These receivables include:

1. Amounts for goods or services provided by one State agency to another;
2. Cost reimbursements due from another State agency (which is the grantor or subgrantor);
3. Amounts due from another State agency:
 - a) to the grantor State agency when the amount granted is in excess of the grantee's expenditures and must be returned to the grantor; and
 - b) to the grantee State agency when the grantee's allowable grant expenditures have not been fully reimbursed and are due from the grantor State agency.
4. Amounts due to the State or State agencies as provided for under the terms of federal, local or other government grants or contracts.
5. Any other amounts due from other State agencies or local or federal governments including overpayments, amounts paid in error, etc.

Interagency receivables must also be recorded on form SCO-565, "Interfund Payable/Receivable Analysis" (SAMS Manual Procedure 27.20.65) for year-end GAAP reporting purposes by agencies which provide goods and/or services to another State agency. For interfund grant activity, year-end receivables are reported on forms SCO-567 (grantee) or SCO-568 (grantor). See SAMS Manual Procedure 27.20.65 for relative definitions of "services" and "grants". Intergovernmental receivables are reported on SCO-563, "Grant/Contract Analysis," for year-end GAAP reporting (See SAMS Manual Procedure 27.20.63).

Interagency receivables ("due from's") must be verified and acknowledged with the corresponding agency at fiscal year-end (June 30) for GAAP reporting purposes to ensure that statewide "due from's" equal "due to's".

Other Receivables

Any other amounts or claims owed to the State or a State agency for which a category has not been provided on the receivable summary report. These include amounts due from employees, such as travel and salary overpayments.

Formal Due Date

The date on which a receivable is formally due and collectible by the State. The procedures for establishing formal due dates are outlined below.

Delinquent (Past Due) Receivables

Receivable amounts that remain outstanding beyond their formal due dates which would include individual installment payments that are past due.

Allowance for Estimated Uncollectible Accounts

A valuation account that is credited with an estimate of the amount of receivables that the agency believes will ultimately be uncollectible. The balance in this account is subtracted from total gross receivables to arrive at an estimate of net receivables that will be realized by the State or State agency.

Write-Off of Uncollectible Accounts

The removal of certain transactions deemed uncollectible from the accounts of an agency's financial accounting records which have been certified as uncollectible according to the procedures outlined in SAMS Procedure 26.40.40. Normally, accounts receivable are written off on a transaction by transaction basis (i.e., only certain portions of a particular account are written off).

TIMING & METHODS OF RECOGNITION

Actual or Known Revenues

Funds which are subject to accrual or modified-accrual accounting for revenues shall recognize and record a receivable at such time that the amount due the State or State agency becomes measurable; such as at the time of billing or assessment, the time of expenditure for cost reimbursement grants, or the time of delivery of goods or services.

Estimated or Self-Assessed Revenues

For annual GAAP reporting purposes, agencies may accrue certain "self-assessed" revenues based upon actual collections during the "lapse period" immediately following the reporting date, thus establishing the receivable retroactively. Self-assessed revenues include most State taxes and certain fees.

Interim financial reporting on a quarterly basis as discussed in this SAMS procedure, will require agencies to report only those receivables which are due the State at the time of reporting, such as delinquencies, assessments and penalties but not estimates of self-assessed revenues.

Annual GAAP Project accruals for the major revenue sources within each agency will continue to be required for annual GAAP reporting. GAAP adjustments vary by agency within the following areas:

1. Lapse period collections;
2. Deferred revenue;
3. Assessment collections in the lapse period;
4. Refunds & credits.

Specific guidelines for each agency will be addressed, as in the past, with instructions issued at year-end.

ESTABLISHING FORMAL DUE DATES

When a formal due date for a receivable is not established by law, it will be established at the time that the receivable is recognized as outlined above. It is recommended that due dates fall no later than thirty days after the receivable is recognized unless contractual terms or specific industry standards require other treatment.

As an example, a receivable recognized and recorded on January 15, would have a formal due date no later than February 14, of the same year.

DETAILED ACCOUNTS RECEIVABLE INFORMATION

To support the recognition and tracking of receivables, detail information related to each receivable must be recorded and maintained by each State agency. It is recommended, as a minimum, the following items be included. Individual agencies may supplement this information as appropriate.

1. Debtor's name;
2. Debtor's social security number, federal employer's identification number (FEIN), or other Comptroller- approved identifying number;
3. Debtor's last known address;
4. Amount of the debt;
5. "Source of Revenue" code, where applicable;
6. Nature of the debt;
7. Formal due date of the debt;
8. The agency and fund(s) to which the debt is due;
9. Documentation of all collection efforts. (See SAMS Manual Procedure 26.40.10)

SUB-SECTION	MAINTAINING ACCOUNTS RECEIVABLE	EFFECTIVE DATE
		July 1, 2001
PROCEDURE	AGING & COLLECTIBILITY OF RECEIVABLES	REVISION NUMBER
		02-001

STANDARDS FOR AGING OF RECEIVABLES

In order for an agency to effectively estimate the collectibility of its receivables and properly focus collection efforts, each outstanding receivable due the State must be "aged" relative to its formal due date. A receivable is considered "current" (not past due) prior to the passage of its formal due date. When the debtor's due date passes without full payment, the debt becomes "past due" and must be aged according to the number of days beyond the due date that the debt has been outstanding.

For purposes of aging and reporting outstanding receivables, the following standard aging periods will be used:

- Past due: 1- 30 days
- 31- 90 days
- 91-180 days
- 181 days - one year
- Over one year

When the above aging periods do not serve management's needs, other reasonable aging periods may be utilized and reported to the Comptroller's Office. **However, the Comptroller's Office requires agencies to report receivables in the aging categories of "181 days - one year" and "over one year" past due for analysis purposes.**

PROCEDURES FOR ESTIMATING COLLECTIBILITY

Each agency will be required to report "Net Accounts Receivable" to the Comptroller's Office on a quarterly basis. Net accounts receivable is defined as:

Gross (total) Accounts Receivable
Less: Allowance for Estimated Uncollectible Accounts
Net Accounts Receivable

The "Allowance for Estimated Uncollectible Accounts" represents the agency's estimate of outstanding receivables that the agency believes will ultimately be uncollectible. The method for estimating the uncollectible portion of receivables will vary by agency and type of receivable. Generally, the estimate of uncollectible accounts will be based upon the collection experience of the agency and the age of the receivables. As a debt ages, the probability of collection normally declines.

**STATE OF ILLINOIS
OFFICE OF THE COMPTROLLER**

Each agency should examine the collection history for each type of receivable that it recognizes in order to establish guidelines for estimating the amount of debt that will be uncollectible. Since these guidelines will vary by agency, this procedure will not specify the estimating procedures to be used. However, the following example may be used as a guide to assist agencies in establishing their own procedures for estimating an allowance for estimated uncollectible accounts.

Example for Estimating Uncollectible Accounts

The following example demonstrates a general approach to estimating uncollectible accounts (Agencies may determine that another method is more beneficial for these specific circumstances):

Fund "A" Aged Receivables Summary:

<u>Aging</u>	<u>Other Receivable Amounts</u>	<u>License & Fee Amounts</u>
Current	\$100,000	\$50,000
Past Due:		
1- 30 days	5,000	1,000
31- 90 days	4,000	800
91-180 days	500	0
181-1 year	500	0
Over 1 year	<u>100</u>	<u>0</u>
Total Past Due	<u>10,100</u>	<u>1,800</u>
Total Receivables	<u>\$110,100</u>	<u>\$51,800</u>

Step 1: Determination on the Percentage of Receivables Estimated Uncollectible: Review the current outstanding receivables for your agency and examine the collection history for Fund "A" by category. Based on your agency's history, determine the percentage of receivables estimated uncollectible by category.

<u>Aging</u>	<u>Other Receivables</u>	<u>Licenses & Fees</u>
Past Due:		
1 - 30 days	3%	3%
31 - 90 days	10%	10%
91 - 180 days	20%	20%
181 - 1 year	50%	50%
Over 1 year	75%	75%

Example for Estimating Uncollectible Accounts (cont'd)

Step 2: Calculate the Allowance for Uncollectible Accounts: Multiply the agency's current receivable balances by the percentage of receivables estimated uncollectible.

The results of these calculations are shown below:

<u>Aging</u>	<u>Other Receivables</u>	<u>Allowance for Uncollectible Accounts</u>	<u>Licenses & Fees</u>	<u>Allowance for Uncollectible Accounts</u>
Past Due:				
1- 30 days	\$ 5,000 @ 3%	\$ 150	\$1,000 @ 3%	\$30
31- 90 days	4,000 @ 10%	400	800 @ 10%	80
91-180 days	500 @ 20%	100	0 @ 20%	0
181-1 year	500 @ 50%	250	0 @ 50%	0
Over 1 year	<u>100 @ 75%</u>	<u>75</u>	<u>0 @ 75%</u>	<u>0</u>
Totals	<u>\$10,100</u>	<u>\$975</u>	<u>\$1,800</u>	<u>\$110</u>

As a result of applying historical collection experience to the Fund "A's" receivables aging, an Allowance for Estimated Uncollectible Accounts was computed as follows:

Allowance for "Other Receivables"	\$975
Allowance for "Licenses & Fees"	<u>110</u>
Total Allowance	<u>\$1,085</u>

Gross	\$161,900
Less: Allowance	<u>1,085</u>
Net Receivables	<u>\$160,815</u>

REPORTING OF AGED RECEIVABLES

A report of aged receivables must be made to the Comptroller's Office on a quarterly basis. This report should be submitted on the form "Quarterly Summary of Accounts Receivable - Aging of Total Gross Receivables" as explained in SAMS Manual Procedure 26.30.30 no later than the last day of the month following the end of the quarter.

PROCEDURE	INTEREST & LATE CHARGES	REVISION NUMBER
		01-001

STANDARDS FOR INTEREST AND LATE CHARGES

Most State agencies impose interest and late charges where they have the express legal authority to do so at the rates provided by rule or law. When an agency has the express legal authority, but exercises such authority in a discretionary manner, such practices should be reflected in the approved rules of the agency. For purposes of prorating interest charges, a year will be considered to be made up of 12 months of 30 days each for a total of 360 days.

Likewise, when accounts are certified as uncollectible, the accrual of additional interest or late charges should be discontinued in certain instances. For example, where a mortgage lending program is administered by a State agency and foreclosure proceedings are initiated against the mortgagee, interest accrual should be discontinued since the State will realize the proceeds of the sale of the property, regardless of the amount accrued as additional penalty and interest. The receivable (as well as the allowance for estimated uncollectible accounts) would be overstated in these instances if interest and late charges are accrued throughout the proceedings. If an agency is uncertain about when to discontinue the accrual of interest, contact the Comptroller's Office for guidance.

PROCEDURES FOR INTEREST & LATE CHARGES

Agencies which currently have authority to charge interest or late charges on past due accounts must do so at the rate set forth and in the manner prescribed in such authority.

Accrued interest and late charges should be added to the receivable amount outstanding, but not included in the principal balance for purposes of computing additional interest and late charges. Industry standards and applicable statutes should determine the appropriate method for computing interest and late charges. The following is an example of an interest calculation:

Calculation of Interest on Past Due Accounts Example

Assumption: Receivable of \$200 is 45 days past due, when paid in full. The following interest calculations would apply:

Principal Balance of Receivable	\$200
Interest calculated at 30 days past due: (principal x interest rate: \$200 x 1%)	\$2

PURPOSE

The purpose of accounts receivable reporting is to file accounts receivable information with the Comptroller's Office as required by the Illinois State Collection Act of 1986, Ill. Rev. Stat., 1985, ch. 15, par. 151(**30 ILCS 210/1**).

GENERAL

The accounts receivable reports, as explained in SAMS Manual Procedures 26.30.20 through 26.30.50 provide a summary of the status of the State's receivables and related collections activity. These reports consist of agency reports to the Comptroller summarizing receivables activity, aging of receivables and estimates of uncollectibles and collections activity on a quarterly basis.

Quarterly Reporting

State agencies shall report receivables information to the Comptroller quarterly. The summary information will include:

- Receivable activity by fund and major revenue source
- Aging of receivables by fund and major revenue source
- External collection activity of accounts over 180 days past due by agency
- Collection activity for accounts over 180 days past due and over \$15 thousand by agency.

The agency shall report this information by completing the following four reports. Reports 1 and 2 listed below should be completed for each fund in which the agency deposits money and has outstanding receivables at the end of the quarter or to account for receivables reported in a prior quarter which no longer exist (because of collection or write-off). Reports **3** and **4** should be completed on **an agency-wide basis and not by fund**.

1. Quarterly Summary of Accounts Receivable - Accounts Receivable Activity. (Form C-97, Exhibits 26.30.20 A and B) This form requests information about quarterly totals for adjustments to receivables, additions to accounts receivable, collections, write-offs, estimated uncollectibles, and number of accounts for gross receivables at the end of the quarter and write-offs.

2. Quarterly Summary of Accounts Receivable - Aging of Total Gross Receivables. (Form C-98, Exhibits 26.30.30 A and B) This form requests information about quarterly totals for aging of past-due accounts and interest and penalties charged.
3. Quarterly Summary of Accounts Receivable - External Collections Activity for Accounts Over 180 Days Past Due. (Form C-99, Exhibits 26.30.40 A and B) This form requests information about the status of collection efforts for accounts over 180 days past due. This form is to be completed on an agency wide basis and not by individual fund.
4. Quarterly Reporting of Accounts Receivable Activity - Concerning the Collection of Accounts Over 180 Days Past Due and Over \$15 Thousand. (Form C-99A, Exhibits 26.30.50 A and B) This form requests information about the collection activity an agency has pursued to collect on accounts that are over 180 days past due and over \$15 thousand. This form is to be completed on an agency wide basis and not by individual fund.

Quarterly receivables reporting will include only those amounts which are due the State at the time of such reporting. Self-assessed revenues, including most taxes, will not be estimated for interim reporting. Report only those components of self-assessed revenue sources that represent known receivables due from specific individuals and entities. These amounts may include delinquent taxes, additional assessments and penalties, and amounts reported but unpaid.

The forms for these reports require agencies to supply information about the amounts, aging, and collection status of their receivables. Receivables are reported by major revenue source within each fund as categorized below:

AGING OF TOTAL GROSS RECEIVABLES (C-98)**

PURPOSE

The purpose of this report is to provide a summary of the aging of gross receivables on a quarterly basis for all funds. (Exhibit 26.30.30-A).

This form is to be completed and submitted to the Comptroller no later than the last day of the month following the end of the quarter. Two copies should be retained by the agency: One to provide an internal record and one for the Auditor General or his representative.

INSTRUCTIONS

The aging periods under the heading "Past due receivables" (i.e. 1-30 days, 31-90 days, 91-180 days, etc.) are provided as a guide in completing this form. If your agency ages receivables using different periods, cross out the days printed on the form and insert the days used on your agency records. NOTE: the Comptroller's Office requires the aging categories of "181 days-one year" and "over one year" past due for analysis purposes.

ACTIVITY FOR ACCOUNTS OVER 180 DAYS PAST DUE (C-99)**

PURPOSE

The purpose of this form is to report the status of collections over 180 days past due on a quarterly basis for funds not in protest or protestable. (Exhibit 26.30.40-A) This form is to be completed on an agency wide basis and not by individual fund.

This form is to be completed and submitted to the Comptroller no later than the last day of the month following the end of the quarter by those agencies who have receivables that are greater than 180 days past due as reported on the C-98 form. Two copies should be retained by the agency: One to provide an internal record and one for the Auditor General or his representative.

INSTRUCTIONS

This is a general information form for the status of accounts over 180 days past due. Amounts entered do not foot down. This form is to be used only for accounts that are not in protest or protestable. All dollar amounts should be rounded to the nearest thousand.

QUARTERLY REPORTING OF ACCOUNTS RECEIVABLE ACTIVITY -
CONCERNING THE COLLECTION OF ACCOUNTS OVER 180 DAYS PAST DUE
AND ACCOUNTS OVER \$15 THOUSAND (C-99A)

PURPOSE

The purpose of this form is to report the collection activity for accounts over 180 days past due and over \$15 thousand on a quarterly basis for funds not in protest or protestable. (Exhibit 26.30.50-A) This form is to be completed on an agency wide basis and not by fund.

This form is to be completed and submitted to the Comptroller no later than the last day of the month following the end of the quarter by all agencies and universities who have receivables over 180 days past due as reported on the C-99 and greater than \$15,000. Two copies should be retained by the agency: One to provide an internal record and one for the Auditor General or his representative.

INSTRUCTIONS

This form provides a summary of the agency's collection activity for accounts that are over 180 days past due and over \$15 thousand. This form is to be used only for accounts that are not in protest or protestable. Agencies should maintain detailed records for individual accounts in-house. All dollar amounts should be rounded to the nearest thousand.

PROCEDURE	COLLECTION EFFORTS & DOCUMENTATION	REVISION NUMBER 07-001

STANDARDS FOR INITIATING COLLECTION

Where standards for initiating collection of an agency's past due accounts are addressed by law or rule, those standards and procedures must be observed. Where no such law or rule exists, each agency must individually pursue "all reasonable and appropriate procedures available to the agency to effectuate collection." Specific collection standards and procedures will vary by agency and with the size and nature of the debt. Accordingly, each agency must establish their own "reasonable and appropriate" collection policies in order to effectively collect past due accounts.

To aid agencies in the development of sound collection policies, the following procedures are presented as minimum suggested collection guidelines. Individual agency administrators must determine when to augment these procedures with collection efforts specifically suited to their own environment. While most past due accounts must be pursued in some manner, an agency may determine that due to the size and nature of a debt, continued collection efforts are not in the best interests of the State.

Accounts receivable owed to the State or a State agency are considered past due immediately upon the passage of the debt's due date. Agencies, however, may wish to wait to begin collection procedures for a short grace period (e.g. 5 - 15 days) after the debt becomes past due in order to allow for reasonable payment delays. It is suggested that active collection efforts begin when the grace period lapses without payment.

COLLECTION ACTIVITY

During the first 60 days that an account is established as a receivable, it is recommended that the agency contact the debtor through a structured process in order to accomplish the following collection objectives:

1. Reaffirm the debts with letter(s) and telephone calls;
2. Explain the original nature and terms of the debt;
3. State clearly to the debtor the collection policy that the agency may pursue;
4. Offer an opportunity for the debtor to respond or dispute the claim.
5. Attempt to resolve any claim disputes or other issues.

SUB-SECTION	COLLECTION PROCEDURES & CERTIFICATION OF UNCOLLECTIBILITY	EFFECTIVE DATE July 1, 2006
PROCEDURE	COLLECTION EFFORTS & DOCUMENTATION	REVISION NUMBER 07-001

After 60 days, the following collection activities should be undertaken by the agency:

1. Issuance of registered letters and telephone contact at scheduled intervals.
2. Face-to-face meetings.
3. Conduct asset searches.
4. Confirm current location of debtor.
5. Determine if there are any predecessor--successor relationships.
6. Review books and records of debtors.
7. Notify credit reporting agencies.
8. Perform bank levies.
9. File appropriate liens and judgements.

In addition to the collection procedures outlined above, agencies must develop procedures "whereby agency initiated payments to its debtors may be offset" against past due claims. The requirements for agency offsets are discussed in SAMS Manual Procedure 26.40.30.

Throughout the collection process, it is critical that agencies maintain complete records of all collection efforts related to each past due account. Collection documentation will be required in order to support potential legal action against the debtor, or to justify certification of uncollectibility. It is recommended, at a minimum, that agencies record the following collection information in addition to the data outlined above in SAMS Manual Procedure 26.20.10:

1. The date and nature of each contact with the debtor;
2. The debtor's response or dispute, if any was made;
3. Any payment agreements that may have been reached between the agency and the debtor;
4. The use of the Attorney General's Office and/or the Comptroller's Offset System.

SUB-SECTION	COLLECTION PROCEDURES & CERTIFICATION OF UNCOLLECTIBILITY	EFFECTIVE DATE July 1, 2006
PROCEDURE	COLLECTION EFFORTS & DOCUMENTATION	REVISION NUMBER 07-001

5. The use of any outside collection agencies, including dates and fees paid;
6. Reasons and dates for certification of uncollectibility where appropriate.

This information should be included as part of the accounts receivable records.

Copies of any final administrative assessments, contracts, payment agreements, witness statements, or any other documentation establishing the existence of the debt and identity of the debtor should be recorded as documentation.

REFERRAL OF PAST DUE ACCOUNTS

If an agency believes that a past due account is uncollectible, it must certify the account as such under the guidelines in SAMS Manual procedure 26.40.40, "certification standards."

If, however, the debt is believed to be collectible and the agency fails to collect the past due amount under the procedures outlined above or to establish a satisfactory deferred payment plan, the agency may refer the debt to the Department of Revenue's Debt Collection Bureau, subject to [30 ILCS/210.10](#) and subject to such limitations as the Department of Revenue shall by rule establish. Rules were promulgated by the Department under [74 ILL. Adm. Code 1200](#).

The Bureau shall have the sole authority to let contracts with persons specializing in debt collection for the collection of debt referred to and accepted by the Bureau. The Department of Revenue shall adopt rules for the certification of debt from referring agencies and shall adopt rules for the certification of collection specialists to be employed by the Bureau.

Once an agency's debt is deemed by the Bureau to be uncollectible, the Bureau shall return the debt to the referring agency which will then write the debt off as uncollectible or return the debt to the Bureau for additional collection efforts.

The Department of Healthcare and Family Services shall be exempt from this section with regard to child support debts. In addition the Department of Employment Security is exempt with regard to debts to any federal account. These debts may be referred to the Bureau provided the debt satisfies the requirements for referral of delinquent debt as established by rule by the Department of Revenue.

ESTABLISHING DEFERRED PAYMENT PLAN

If during the collection process, the agency determines that the best opportunity for collecting the debt is through periodic payments, the agency may enter into a deferred payment plan with the debtor. The terms of each plan will vary with the size and nature of the debt, however, it is suggested that payments be expected at generally no less than monthly intervals, and if the term of the plan exceeds one year, payment terms should be reviewed with the debtor annually.

STANDARDS FOR REFERRAL TO COMPTROLLER'S OFFSET SYSTEM

State agencies should use the Comptroller's Offset when it is determined to be in the best economic interest of the State. While the Comptroller's Office suggests placement of accounts for offset early in the collection process, agencies must place all debts over \$1,000 and more than 90 days past-due in the Comptroller's Offset System, unless one of the following three conditions are met:

1. The agency and debtor have entered into a deferred payment plan;
2. The agency has demonstrated to the Comptroller's satisfaction that referral of the account to the Comptroller's Offset System is not cost effective. Generally, this test will be met when the total collection cost expended or anticipated will exceed the amount of the claim that would reasonably be expected to be realized as a result of those collection costs. The application of the cost effectiveness criteria will not be the same for every agency. Circumstances differ among agencies. The following examples are intended to provide guidance in determining cost effectiveness. They represent instances where it would not be cost effective to submit a debt to the Comptroller's Office for offset.
 - By statute, certain agencies cannot write off debts. However, if one of these debts has been owed for a substantial amount of time, it is reasonable to assume that referral would not be cost effective (e.g., the debtor has changed addresses or names and will be impossible to locate);
 - A company has ceased operations for a long period of time;
 - A business has reorganized (e.g., from a sole proprietor to a partnership or corporation);
 - The age or health of the debtor is such that it is unlikely they will be receiving any payments from the State;
 - Foreign student debtors who have left or will soon be leaving the country;
 - Individuals and corporations in bankruptcy.

3. The claim is against a State agency. The Comptroller's Offset is not to be used in the collection of debts between State agencies.

Following are the procedures for entering a debt into the Comptroller's Offset System.

STATUTE REFERENCE

Section 10.05 of the State Comptroller Act ([15 ILCS 405/10.05](#)) requires the Comptroller to deduct from warrants payable to any person the amount for which there exists a claim due and payable in favor of the state.

"Whenever any person shall be entitled to a warrant or other payment from the treasury or other funds held by the State Treasurer, on any account, against whom there shall be any account or claim in favor of the State, then due and payable, the Comptroller, upon notification thereof, shall ascertain the amount due and payable to the State, as aforesaid, and draw a warrant on the treasury or on other funds held by the State Treasurer, stating the amount for which the party was entitled to a warrant or other payment, the amount deducted therefrom, and on what account, and directing the payment of the balance; which warrant or payment as so drawn shall be entered on the books of the Treasurer, and such balance only shall be paid. The Comptroller may deduct the entire amount due and payable to the State or may deduct a portion of the amount due and payable to the State in accordance with the request of the notifying agency. No request from a notifying agency for an amount to be deducted under this Section from a wage or salary payment, or from a contractual payment to an individual for personal services, shall exceed 25% of the net amount of such payment. "Net amount" means that part of the earnings of an individual remaining after deduction of any amounts required by law to be withheld. For purposes of this provision, wage, salary or other payments for personal services shall not include final compensation payments for the value of accrued vacation, overtime or sick leave. Whenever the Comptroller draws a warrant or makes a payment involving a deduction ordered under this Section, the Comptroller shall notify the payee and the State agency that submitted the voucher of the reason for the deduction and he or she shall retain a record of such statement in his or her records.

As used in this Section, an "account or claim in favor of the State" includes all amounts owing to "State agencies" as defined in Section 7 of this Act. However, the Comptroller shall not be required to accept accounts or claims owing to funds not held by the State Treasurer, where such accounts or claims do not exceed \$50, nor shall the Comptroller deduct from funds held by the State Treasurer under the Senior Citizens and Disabled Persons Property Tax Relief and Pharmaceutical Assistance Act."

PROCEDURES FOR REFERRAL TO COMPTROLLER OFFSET SYSTEM

A. FILING PROCEDURES

The purpose of this procedure is to document the policies and accounting procedures for deductions from vouchers for claims in favor of the State. Agencies use the C-33 Involuntary Withholding Request Form. (Exhibit 26.40.20-B). Forward the Involuntary Withholding requests to:

Office of the Comptroller
Collections Unit
325 West Adams Street
Springfield, IL 62704
Phone: 217/782-7525

The Comptroller will not process a claim under Section 10.05 until he/she has received notification from the State agency that the debt has been established through notice and opportunity to be heard.

**B. COMPTROLLER'S PROCEDURES UPON RECEIVING NOTIFICATION OF A CLAIM
IN FAVOR OF THE STATE**

The Office of the Comptroller will review the information provided by the agency submitting the claim and ascertain the amount due and payable to the State. Additional information may be requested of the submitting agency to ensure the debt has been established in compliance with statutory and IOC requirements.

Upon ascertaining the amount due and payable, the Comptroller will deduct the amount of the claim from a voucher(s) from any State agency payable to the person or business which is processed after the claim is received. This withheld amount will be deposited into the State Offset Claims Fund. If the amount of the claim in favor of the State is less than the amount to which the person or business is entitled, a warrant for the balance of the voucher will be prepared and issued to the payee. The agency submitting the voucher against which a Section 10.05 offset claim is applied will have its appropriation charged with the entire amount of the voucher.

In cases where offsets are to be made against a State employee's wages, no more than 25% of the employee's disposable earnings may be subject to offset. Final compensation payments paid to a person when the person leaves the employ of a State agency for accrued vacation, sick leave or overtime are exempt from the 25% limitation and are offset up to 100% of the voucher amounts. State agencies may submit claims for offset for the entire amount owed to the State agency and the Comptroller's Offset System will compute the required 25% available for the offset.

In the event that the calculation of 25% of the employee's disposable earnings exceeds the employee's take home pay (i.e., the net amount of the warrant), that employee's payroll voucher will be returned to the submitting agency. A payroll reversal must be processed and the employee's voluntary deductions must be canceled or reduced so that the employee's take-home pay on the Supplemental Payroll to the employee will be sufficient to satisfy the amount calculated as available for offset. Agencies should contact their employees to determine which of the voluntary deductions on the payroll are to be canceled or reduced.

Additionally, where an agency is aware of ongoing offsets against one of its employees, any final compensation payments for vacation, overtime or sick pay must be vouchered separately from any current pay period wages. The separate voucher for the lump sum payment must carry 0 (zero) in the base to allow 100% offset.

C. NOTIFICATION OF THE COMPTROLLER'S EXERCISE OF SECTION 10.5

Whenever the Comptroller exercises his/her authority granted under Section 10.05, the payee will be sent a notification of the deduction.

Notification to the debtor is a form letter (Exhibit 26.40.20-D) which advises the debtor of the name of the claiming agency, the amount withheld and nature of the debt. The Involuntary Withholding Agency Notification Report (IWAN) is sent to the claiming agency on a weekly basis. The vouchering agency receives, on a weekly basis, the Involuntary Withholding Vouchering Agency Report (IWVA). The Comptroller's Office will provide these reports to the respective agencies unless advised that the copy is not needed.

If after thirty days have elapsed from the date the Comptroller gives notice of the offset, no protest is made by the person subject to the offset, the Comptroller shall issue a warrant or interfund payment on the State Offset Claims Fund for the amount of that deposit to the agency entitled thereto. If a protest is made, the Comptroller shall not issue such warrant/interfund payment to the State agency on the State Offset Claims Fund until he ascertains the amount due and payable.

D. CHANGE IN STATUS OF A CLAIM

A State agency which has submitted a claim for offset must notify the Comptroller as soon as is possible, but in no case later than 30 days, after receiving notice of a change in the status of an offset claim.

A change in the status may occur due to payments received other than through a successful offset, the filing of a bankruptcy petition, etc.

E. PROTEST

The notification described in "C" above advises the alleged debtor that 30 days are allowed for protests. If no protest is received within 30 days, the withholding is paid to the claiming agency (see Section F).

If the alleged debtor writes a protest, the Comptroller's Office: (1) acknowledges receipt of the protest; (2) flags the account to prevent payout to the claiming agency until the protest is resolved; and (3) forwards the claiming agency a copy of the protest and requests a written response to the alleged debtor with a carbon copy sent to the Comptroller's Office. If the claiming agency does not respond within 90 days or within a granted additional 90 day

extension, the withheld money may be refunded to the alleged debtor and the claim may be deleted from the offset system. After receipt of the claiming agency's response, the Comptroller's Office decides one of the following: (1) the money is to be refunded; (2) the money is to be remitted to the claiming agency in 30 days; or (3) additional information is required.

The Comptroller's Office will notify agencies of protests on a weekly basis. The Comptroller may grant a State agency an additional 90 day extension of time to respond for the following reasons:

- 1) the State agency is actively pursuing further investigation;
- 2) the matter is in active settlement negotiations; or
- 3) other good cause shown by the State agency.

After reviewing the extension request, the Comptroller's Office will notify the claiming agency whether the extension has been granted.

F. PAYOUTS

Payouts are of two sorts: (1) refunds and (2) claimant collections. The steps leading to a refund have been described above in Section E.

Claimant collections are paid to the agency which is due the money and notification sent to the attention of the writer of the claim letter (see Exhibit 26.40.20-E) to identify the payment. Effective October 1, 1995, the Comptroller's Office will require all State agencies to use the "single payment" concept when receiving involuntary withholding offset monies pursuant to 15 ILCS 405/10.05. Agencies will receive one warrant/interfund payment daily for the total involuntary withholding offsets due the agency/org. The Involuntary Withholding Transfer Report (IWTR) will also be sent to the claiming agency on a daily basis. A tape/electronic file, if requested, detailing each offset claim will be forwarded weekly to each claiming agency. The tape/electronic file notification can be used by agency personnel to reconcile the warrant total with the individual debtor's offset amounts.

G. TAPE/FILE SUBMISSIONS

Agencies may submit Offset Adds, Changes and Deletes on a tape or electronic file. Any transactions submitted in this manner must be accompanied by a properly completed Involuntary Withholding Tape/File Certification Form (see Exhibit 26.40.20-F). Please contact the Collections Unit in the Comptroller's Office for information on tape/file submissions.

**DELETE, REFUND, AND/OR CHANGE ON THE COMPTROLLER'S OFFSET SYSTEM
(C-34)**

PURPOSE

An agency may file Form C-34, "Delete, Refund, and/or Change on the Comptroller's Offset System" (Exhibit 26.40.21-A) requesting the Comptroller:

1. Delete a claim for any of the following reasons:
 - a. The claim has been satisfied.
 - b. The claim has been inactive for more than one year.
 - c. The agency has agreed to enter into a deferred payment plan with the debtor.
 - d. The claim has been determined to be invalid.
 - e. Bankruptcy
 - f. Other – please explain.
2. Refund monies currently held in the offset fund to the person or business against which their claim exists.
3. Change the debtor name, order number, or amount of debt on a previously filed claim.

If multiple claims are filed by the same agency for the same debtor, a C-34 form is required for each claim.

SIGNATURE AUTHORIZATION (SCO-376)

PURPOSE

The Signature Authorization card (Exhibit 26.40.25-A) is used by the Collections Unit to provide specimen signatures for person(s) authorized to submit Involuntary Withholding Requests to the Comptroller.

NOTIFICATION REQUIREMENTS

Submission of a new card is required prior to acceptance of Involuntary Withholding Request processing by our office. Agencies must notify the Comptroller in writing when an authorization is revoked.

DISTRIBUTION

One Signature Authorization card (SCO-376) must be prepared (for each person) and filed with the Collections Unit of the Comptroller's Office. All signatures must be original. Faxes and photocopies will not be accepted.

CONTENTS

Please contact the Collections Unit to request Signature Authorization cards. SAMS Exhibits 26.40.25-B and C provide examples of properly completed cards.

SECTION	ACCOUNTS RECEIVABLE REPORTING	PROCEDURE - PAGE NO. 26.40.30 1 of 1
SUB-SECTION	COLLECTION PROCEDURE & CERTIFICATION OF UNCOLLECTIBILITY	EFFECTIVE DATE July 1, 1999
PROCEDURE	AGENCY INTERNAL OFFSETS	REVISION NUMBER 00-001

State agencies shall develop their own internal offset systems "whereby agency initiated payments to its debtors may be offset" against past due claims. The agency shall place claims against debtors to their agency in the internal offset system before referring the claim to the Comptroller's Offset System according to procedures established by the agency.

PROCEDURES FOR IMPLEMENTING INTERNAL OFFSETS

Each agency shall develop its own procedures for implementing and maintaining its internal offset system. These procedures, however, must include the following standards:

1. A specified point at which a claim must be entered into the system, for example: claims more than \$500 and over 60 days past due. This point will vary by agency and nature of the receivables.
2. Procedures for notifying the debtor of the amount and reason for a deduction.
3. Procedures for removing a claim from the system.
4. A procedure for reporting to the Comptroller whenever an offset is made between two different funds within the agency. This report must include:
 - a) The name and Comptroller assigned number of the fund to which the debt is owed;
 - b) The amount owed;
 - c) The name and Comptroller assigned number of the fund from which the offset deduction was made;
 - d) The amount deducted;
 - e) The date of the deduction.

SECTION	ACCOUNTS RECEIVABLE REPORTING	PROCEDURE - PAGE NO. 26.40.40 1 of 3
SUB-SECTION	COLLECTION PROCEDURES & CERTIFICATION OF OF UNCOLLECTIBILITY	EFFECTIVE DATE January 1, 1993
PROCEDURE	CERTIFICATION STANDARDS	REVISION NUMBER 93-002

STANDARDS & PROCEDURES FOR CERTIFICATION OF UNCOLLECTIBLE ACCOUNTS

When an agency has exhausted all reasonable and appropriate collection efforts as outlined in section 26.40.10, and has been unable to collect a past due account, the agency may certify that account as uncollectible under the following guidelines:

Uncollectible Claims Greater Than or Equal to \$1,000

For uncollectible claims which are greater than or equal to \$1,000, the agency shall request the Attorney General to certify the claim as uncollectible. Requests for certification of uncollectibility made to the Attorney General are to be in a format prescribed by the Attorney General (see 26.40.50). It is within the Attorney General's authority to require additional information that he may find necessary in order to properly evaluate these requests.

Uncollectible Claims less than \$1,000

Claims of less than \$1,000 may be certified as uncollectible by the agency when the agency determines that further collection efforts are not in the best economic interests of the State. Generally, this test will be met when the total collection cost expended or anticipated will exceed the amount of the claim that would reasonably be expected to be realized as a result of those collection costs.

REPORTING OF CERTIFIED UNCOLLECTIBLE ACCOUNTS

Agencies shall submit to the Comptroller a list of debts certified as uncollectible. This list must be submitted to the Comptroller's Office quarterly as part of the quarterly reporting package. The list must contain the following summary information about each debt:

1. Debtor's name;
2. Debtor's social security number, federal employer's ID number, or other Comptroller approved identifying number (if available);
3. Amount of the debt;
4. Nature of the debt;

5. Formal due date of the debt;
6. The agency and Comptroller assigned fund to which the debt is due;
7. "Source of Revenue" code of the debt;
8. The date the debt was certified as uncollectible.

PROCEDURES FOR REOPENING CERTIFIED UNCOLLECTIBLE ACCOUNTS

Debts certified as uncollectible at the agency level may be reopened for collection if the agency determines that it is in the best economic interest of the State to do so.

Debts certified as uncollectible by the Attorney General may be reopened for collection by an agency upon the approval of the Attorney General. In order to obtain such approval, an agency must submit a request to the Attorney General as prescribed by him. Such a request must include the information as detailed in Section 26.40.50, and in addition, include the agency's reason for reopening the debt for collection.

The agency shall submit a list to the Comptroller of all debts certified as uncollectible both by the agency when less than \$1,000 and by the Attorney General when greater than or equal to \$1,000 which are subsequently approved for reopening for collection. The list must be submitted quarterly with the quarterly reporting package with the following information:

1. Debtor's name;
2. Debtor's social security number, federal employer's ID number, or other Comptroller-approved identifying number (if available);

STANDARDS FOR DETAIL ACCOUNT INFORMATION

Requests to the Attorney General for certification of uncollectibility of accounts receivable, or for reopening for collection of previously certified accounts receivable, must include at a minimum, the following information:

1. Debtor's name;
2. Debtor's social security number (if available), federal employer's ID number, or other Comptroller-approved identifying number;
3. Debtor's last known address;
4. Amount of the debt;
5. Nature of the debt;
6. Formal due date and age of the debt;
7. The agency and Comptroller assigned fund to which the debt is due;
8. Efforts made to collect the debt and the time covered by those efforts;
9. The age of the debtor;
10. The reason the State agency believes the debt to be uncollectible.

Copies of any final administrative assessments, contracts, payment agreements, witness statements, or any other documentation establishing the existence of the debt and the identity of the debtor should also be provided. The information submitted must be legible, preferably typewritten.

When the "amount of the debt" in #4, above, is overstated as determined by the Attorney General's Office, the agency should "write-down" their receivable to the appropriate amount.

If any item of information required by the Attorney General is not available, the State agency shall specifically so state in its request for certification of uncollectibility.

SUB-SECTION	COLLECTION PROCEDURES & CERTIFICATION OF UNCOLLECTIBILITY	EFFECTIVE DATE January 1, 1993
PROCEDURE	DEBTS FROM FEDERAL STUDENT LOANS	REVISION NUMBER 93-002

DEFINITION OF COVERED DEBTS

Debts from federal student loans are those debts due to State agencies arising from the agency's participation in a federal student loan program, and extended under the rules and regulations of such programs.

STANDARDS & PROCEDURES FOR REMOVAL OF CERTIFIED UNCOLLECTIBLE ACCOUNTS

State agencies participating in a federal student loan program may remove student loans from their records by assigning or referring such student loans to the federal government for collection pursuant to the procedures prescribed by federal laws and regulations.

REPORTING REQUIREMENTS

The agency shall submit a list to the Comptroller of all federal student loans that are assigned or referred to the federal government for collection. The list must be submitted quarterly with the quarterly reporting package, and will be accepted in either written or magnetic tape format with the following information:

1. Debtor's name;
2. Debtor's social security number, or other Comptroller-approved identifying number (if available);
3. Amount of the debt
4. Formal due date of the debt;
5. The agency and Comptroller assigned fund to which the debt is due;
6. "Source of Revenue" code of the debt;
7. The date the debt was assigned to the federal government;

SUB-SECTION	COLLECTION PROCEDURES & CERTIFICATION OF UNCOLLECTIBILITY	EFFECTIVE DATE January 1, 1993
PROCEDURE	DEBTS FROM OTHER STATE AGENCIES	REVISION NUMBER 93-002

DEFINITION OF COVERED DEBTS

Interagency receivables are amounts that are due from other State agencies ("Due from's") including the following:

1. Amounts for goods or services provided by one State agency to another;
2. Cost reimbursements due from another State agency (which is the grantor or subgrantor);
3. Amounts due from another State agency (which is the grantee) when the amount granted is in excess of the grantee's expenditures and must be returned to the State agency grantor;
4. Any other amounts due from other State agencies including overpayments, amounts paid in error, etc.

STANDARDS & PROCEDURES FOR REMOVAL OF UNCOLLECTIBLE STATE ACCOUNTS

Interagency receivables due from another State agency may be written off if the agency has pursued all reasonable and appropriate means of collection, and if the amount meets the following criteria:

1. Is payable from an appropriation which has lapsed;
2. May not properly be charged against a current appropriation; and
3. Was not originally payable from federal funds, a trust fund, or locally held funds.

REPORTING REQUIREMENTS

Each agency which writes off claims or receivables pursuant to the standards outlined above, must submit a list of all such write-offs to the Comptroller within 60 days of taking such action. The list will be accepted in either written or magnetic tape format, and must include the following information:

1. Debtor agency's name;
2. Amount of the debt;
3. Nature of the debt;

ACCOUNTS**

An agency may delete debts from its records, that have been certified as uncollectible by either the agency when less than \$1,000 or the Attorney General when greater than or equal to \$1,000 according to SAMS Manual Procedure at 26.40.40, as follows:

1. For debts less than \$1,000, immediately upon certification by the agency;
2. For debts which have been certified and which are greater than or equal to \$1,000 and
 - a) less than five years old, when the agency determines that such deletion is in the best economic interest of the State; generally, this test will be met when the total carrying cost expended or anticipated will exceed the amount of the claim that would reasonably be expected to be realized as a result of potentially reopening such debts for collection;
 - b) more than five years old, immediately.

REPORTING REQUIREMENTS

Agencies shall submit a list to the Comptroller of debts less than \$1,000 and a list of debts greater than or equal to \$1,000 that are removed from the agency's books pursuant to the procedures outlined above. Agencies shall submit a copy of the Attorney General's certification for write-off for debts exceeding \$1,000. The lists and the Attorney General's certification must be submitted quarterly with the quarterly reporting package, and will be accepted in writing, via e-mail or diskette with the following information:

1. Debtor's name;
2. Debtor's social security number, federal employer's ID number, or other Comptroller-approved identifying number (if available);

INTRODUCTION

Year-end financial reporting in accordance with generally accepted accounting principles (GAAP) has been commonplace in the private sector for many years. However, until the issuance of the National Council on Governmental Accounting (NCGA) Statement 1, there was some uncertainty as to what constituted GAAP basis financial reporting for State government. Since NCGA Statement 1, there has been an increased awareness of the need for better financial information in the public sector which is a direct result of the financial crisis of many large cities.

This section outlines the general procedures for 1) year-end GAAP reporting to the State Comptroller's Office and 2) preparation of GAAP basis financial statements by those State agencies, authorities, boards and commissions considered part of the State's reporting entity.

Year-end GAAP Reporting to the State Comptroller's Office

All State agencies (excluding those agencies whose GAAP reporting packages are completed by the Comptroller's staff in consultation with agency personnel - referred to as "in-house") are required to submit annual GAAP reporting packages for any fund or funds in which they expend from and/or deposit receipts. Generally, GAAP reporting packages are due between August 15 and August 31 except for university and pension packages (due September 30). Those agencies whose reporting packages are completed "in-house" are indicated by footnote in Procedure 27.50.10. Year-end GAAP reporting to the Comptroller including reporting forms and instructions is presented in the following SAMS Manual Chapter 27 procedures (excluding Procedure 27.50.60 which is discussed next).

Financial Reporting Representations by Agency Management

As part of the agency reporting process, agency management personnel will be required to submit a letter representing that, to the best of their knowledge and belief, the GAAP financial reporting information is complete and accurate. The required form and content of the representation letter is included in the year-end reporting package sent to each agency and in exhibit 27.10.10-A.

GAAP Basis Financial Statements

In addition to the above requirement, in certain instances (explained below), State agencies are also required to submit a complete set of GAAP basis financial statements (including footnote disclosures) to the Comptroller's Office by November 15th. Preparation of financial statements in accordance with GAAP is addressed in SAMS Manual Procedure 27.50.60.

Agencies which are required to prepare and submit GAAP basis financial statements to the comptroller's office are indicated in procedure 27.50.10 with footnote G. GAAP basis financial statements for these agencies are necessary to obtain adequate audit coverage for the statewide general purpose financial statements.

Procedure 27.50.60 applies only to those agencies marked with footnote G in Procedure 27.50.10 and who are undergoing current audits by the Auditor General (or his special assistant auditors) and required to prepare GAAP basis financial statements. Agencies which are not currently under-going an audit are not subject to Procedure 27.50.60.

General

Preparation of GAAP reporting packages and resultant GAAP basis financial statements requires careful examination of both financial and non-financial data. Financial data refers to those items that are products of the accounting system. Examples of financial data used in the GAAP compilation process include agency expenditure records and SAMS financial reports. Non-financial data refers to information that does not flow through the accounting system. Examples of non-financial data used in the GAAP reporting process include such items as personnel records for documenting compensated absences (form SCO-580), and records of pending litigation for contingent liabilities (form SCO-599). Another example is when agencies receive goods and services as payment in lieu of cash (i.e., "in-kind" payments). The fair market value of such goods and services must be recorded as revenue and expenditures/expenses in the appropriate GAAP reporting fund package. Any questions concerning the GAAP reporting implications of these non-financial transactions should be directed to the Comptroller's GAAP reporting staff.

The Honorable _____
Comptroller
201 State House
Springfield, Illinois 62706-0001

Dear Comptroller:

In connection with your preparation of the financial statements of the various funds and account groups of the State of Illinois at June 30, 20XX, and for the year then ended, I recognize that obtaining representations from me concerning the information contained in this letter is a significant procedure in enabling you to prepare the financial statements, and accordingly, I make the following representations which are true to the best of my knowledge and belief.

I recognize, as a member of management of the State, that management is responsible for the fair presentation of the financial statements. I believe the (Agency) trial balances are fairly presented in conformity with generally accepted accounting principles.

There are no agency material transactions that have not been properly recorded in the accounting records underlying the (Agency) trial balances including those receivables required to be reported within the requirements of the Illinois State Collection Act of 1986 (30 ILCS 210/1). All information necessary for accurate and fair preparation of the Schedule of Federal Financial Assistance has been included on Form SCO-563A. Transactions with related parties, as defined in Statement of [Financial Accounting Standards No. 57](#), and related amounts receivable or payable, including sales, purchases, loans, transfers, leasing arrangements, and guarantees have been properly recorded or disclosed in the financial statements. We are responsible for identifying all laws, rules and regulations that govern the operations of the (Name of Agency); and we are responsible for ensuring compliance with laws, rules, and regulations that have a direct and material effect on the determination of financial statement amounts. We have complied with all aspects of laws, regulations, and contractual agreements that would have a material effect on the financial statements in the event of noncompliance except for those specifically noted in writing to your office.

No (Agency) event or transaction has occurred since June 30, 20XX, pending or in prospect, which would materially affect the (Agency) trial balance at that date or which is of such significance in relation to the State's financial or operational affairs as to require mention in the notes in the State's financial statements in order to make them not misleading as to the financial position, results of operations or changes in fund balances.

Very truly yours,

(Signature of Chief Executive Officer)

EXPLANATION OF GAAP ACCOUNT CHANGES (SCO-510)

PURPOSE

The purpose of the Explanation of GAAP Account Changes (Exhibit 27.20.10-A) is to identify and explain material changes in GAAP accounts from the prior year to the current year. Material changes for statewide reporting purposes are determined by applying two separate tests, as defined below. A change meeting either test is considered material and must be explained.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Explanation of GAAP Account Changes identifies and explains material changes in GAAP accounts from the prior year to the current year. This form should be filled out only after all other GAAP trial balance forms have been completed. All amounts reported on this form must be rounded to the nearest thousand. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

This form will identify fluctuations, which are material on a statewide reporting basis. Material changes for statewide reporting purposes are determined by applying two separate tests.

The first test involves dollar amount changes. For agencies, all increases (decreases) equal to or greater than \$10,000,000 (\$10,000 rounded to the nearest thousand) must be explained. For component units, all increases (decreases) equal to or greater than \$5,000,000 (\$5,000 rounded to the nearest thousand) must be explained.

The second test involves both dollar amount changes and percentage changes. All increases (decreases) in which the dollar amount change is greater than or equal to \$1,000,000 (\$1,000 rounded to the nearest thousand) **and** the percentage change is greater than or equal to 15% when compared to the prior year must be explained.

The reason(s) for the material changes can be most accurately explained by the agency solely administering or sharing in the activity of a particular fund. In explaining a material change, non-accounting staff, such as program administrators, should be consulted to ascertain the specific reason(s) for the fluctuation.

Please note proper form preparation requires a detailed explanation of each change, being as specific as possible and using complete sentences and proper grammar. For example, an expenditure may increase during a particular year due to increased appropriations. In this case, the explanation on the SCO-510 must include the specific programs enhanced, and the reasons supporting that particular allocation of resources.

The SCO-510 should be filled out only after all other GAAP trial balance forms are completed. Review the index for SCO-511, 512, 516, 517, 521, 522, 526, 527, 581, 582, 594 or 595. After locating the applicable forms in the year-end reporting package, compare the current year amount for each account with the prior year amount, according to the criterion defined above.

PROCEDURE	SHARED SAMS FUNDS TRIAL BALANCE FOR ASSETS, LIABILITIES AND FUND EQUITY (SCO-511)	REVISION NUMBER

**SHARED SAMS FUNDS TRIAL BALANCE
FOR ASSETS, LIABILITIES AND FUND EQUITY (SCO-511)**

PURPOSE

The purpose of the Shared SAMS Funds Trial Balance For Assets, Liabilities and Fund Equity (Exhibit 27.20.11-A) is to record agency adjustments necessary to convert a shared fund to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Shared SAMS Funds Trial Balance For Assets, Liabilities and Fund Equity should be completed for funds in which an agency has activity in the fund but does not solely administer the fund and the fund is classified as a governmental or fiduciary (agency funds only) fund type by the Comptroller's Office. No single agency administers a shared fund; therefore, each agency's activity in a shared fund must be reported to the Comptroller's Office for accumulation of adjustments and conversion of the SAMS cash basis fund records to the GAAP basis. In addition, SAMS cash basis fund records do not record asset and liability balances; therefore, each agency must prepare the appropriate adjusting entries to record balance sheet items. A separate trial balance should be completed for each such shared fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting asset and liability accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications will be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

Since the balances per SAMS are the beginning amounts for Form SCO-512, Shared SAMS Funds Trial Balance for Revenues and Expenditures, cash in-transit must be recorded as an increase in cash and the corresponding revenue account (SAMS Procedure 27.20.31) and vouchers-in-transit must be recorded as an increase in the corresponding payable and expenditure accounts.

It should be noted that only reclassification entries are posted in the fund equity section and the sum of all current year adjustments/reclassifications on the SCO-511 and the SCO-512 must equal zero.

**SHARED SAMS FUNDS TRIAL BALANCE
FOR REVENUES AND EXPENDITURES (SCO-512)**

PURPOSE

The purpose of the Shared SAMS Funds Trial Balance for Revenues and Expenditures (Exhibit 27.20.12-A) is to record agency adjustments necessary to convert to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Shared SAMS Funds Trial Balance For Revenues and Expenditures should be completed only for funds held by the State Treasurer in which an agency has activity but does not solely administer the fund. No single agency administers a shared fund; therefore, each agency must report revenue and expenditure activity. The Comptroller's Office accumulates adjustments and converts cash basis fund records to the GAAP basis. A separate trial balance should be completed for each such shared fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting revenue and expenditure accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

Balance per SAMS revenue amounts can be obtained from the Monthly Revenue Status Report SB04, issued by the Comptroller's Office. Balance per SAMS expenditure amounts can be obtained from SAMS Report SG06, issued by the Comptroller's Office.

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications should be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

All cash in-transit must be recorded as an increase in cash and the corresponding revenue account (Procedure 27.20.31) and all vouchers in-transit must be recorded as an increase in the corresponding payable and expenditure accounts.

CONTENTS

Refer to Exhibit 27.20.12-B.

**NONSHARED SAMS FUNDS TRIAL BALANCE
FOR ASSETS, LIABILITIES, AND FUND EQUITY (SCO-516)**

PURPOSE

The purpose of the Nonshared SAMS Funds Trial Balance For Assets, Liabilities and Fund Equity (Exhibit 27.20.16-A) is to provide a worksheet for conversion of agency records to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Nonshared SAMS Funds Trial Balance for Assets, Liabilities and Fund Equity should be completed only for those funds held by the State Treasurer solely administered by an agency, as designated by the Comptroller's Office, and classified as a governmental or fiduciary (agency funds only) fund type. A separate trial balance should be completed for each fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting asset and liability accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications will be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

**NONSHARED SAMS FUNDS TRIAL BALANCE
FOR REVENUES AND EXPENDITURES (SCO-517)**

PURPOSE

The purpose of the Nonshared SAMS Funds Trial Balance for Revenues and Expenditures (Exhibit 27.20.17-A) is to provide a worksheet for conversion of agency records to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record, and one for the Auditor General or his representative.

GENERAL

The Nonshared SAMS Funds Trial Balance for Revenues and Expenditures should be completed only for those funds held by the State Treasurer solely administered by an agency, as designated by the Comptroller's Office and classified as a governmental fund type. A separate trial balance should be completed for each fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting revenue and expenditure accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., Accounts Payable and Accrued Liabilities, SCO-549).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications should be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

(1)	Enter the last two digits of the fiscal year for which this form is being completed.
(2)	Enter the official agency name.
(3)	Enter the three-digit Comptroller assigned agency number.
(4)	Enter the official fund name.
(5)	Enter the four-digit Comptroller assigned fund number.
(6)	Enter the balances (in thousands) in individual revenue and expenditure accounts at June 30, current year (CY). This information will be completed by the Comptroller's Office. This information can also be obtained from agency records provided in various SAMS reports. Debits should be positive and credits should be in parenthesis.
(7)	Enter adjustments (in thousands) at June 30, prior year (PY) for each revenue and expenditure account. This information will be completed by the Comptroller's Office. This information can also be obtained from the prior year's final year-end reporting package.
(8)	Enter net adjustments and/or reclassifications (in thousands) at June 30, CY for each revenue and expenditure account, as summarized on the SCO-530. Debits should be positive and credits should be in parenthesis.
(9)	Subtract (7) from the sum of (6) and (8) and enter the result.
(10)	Enter the prior year GAAP basis (in thousands). This information will be completed by the Comptroller's Office. This information can also be obtained from the prior year's year-end reporting package.

(11)	Refunds and credit memoranda should be analyzed by revenue source on the SCO-541 (Refunds and Credit Memoranda Fund Analysis) and entered as a reduction of the applicable revenue type. Budgetary refunds from SAMS Report SG06 will be entered in the agency record column.
(12)	Subtract (11) from the amounts in columns (6), (7), (8), (9) and (10) for each category and enter the result in the respective column.
(13)	Total all revenue amounts reported either individually or as part of a subtotal as shown in (12) and enter the result in the respective column. The amount reported should equal the sum of the total reported in the Revenue and the Transfers-In column on Form SCO-534.
(14)	Enter the amount shown in (13) with the opposite mathematical sign. For example, if the amount shown in (13) is a credit, the amount in (14) will be a debit. Add (13) and (14). The result should be zero. Note: A Fund Equity Reconciliation (SCO-529) must be completed to demonstrate the closing out of revenues into undesignated fund balance. The amount in (14) should be entered as a reclassifying journal entry on the SCO-547. Refer to the SCO-529 for the proper journal entry for this reclassification.
(15)	Total the expenditure amounts reported in (6), (7), (8), (9) and (10) and enter the result in the respective column. The amount reported should equal the sum of the total reported in the Expenditure and the Transfers-Out column on Form SCO-534.
(16)	Enter the amount shown in (15) with the opposite mathematical sign. For example, if the amount shown in (15) is a debit, the amount in (16) will be a credit. Add (15) and (16). The result should be zero. Note: A Fund Equity Reconciliation (SCO-529) must be completed to demonstrate the closing out of expenditures into undesignated fund balance. The amount in (16) should be entered as a reclassifying journal entry on the SCO-547. Refer to the SCO-529 for the proper journal entry for this reclassification.

**LOCALLY HELD FUNDS TRIAL BALANCE
FOR ASSETS, LIABILITIES AND FUND EQUITY (SCO-521)**

PURPOSE

The purpose of the Locally Held Funds Trial Balance For Assets, Liabilities and Fund Equity (Exhibit 27.20.21-A) is to provide a worksheet for conversion of agency records to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Locally Held Funds Trial Balance For Assets, Liabilities and Fund Equity should be completed for funds classified as governmental or fiduciary (agency funds only) fund types by the Comptroller's Office whose activity is not processed through the Comptroller's voucher/warrant processing system.

A separate trial balance should be completed for each fund. In the event that agency records for a particular fund are maintained on a GAAP basis, only the agency records column needs to be completed.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting asset and liability accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications will be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

**LOCALLY HELD FUNDS TRIAL BALANCE
FOR REVENUES AND EXPENDITURES (SCO-522)**

PURPOSE

The purpose of the Locally Held Funds Trial Balance for Revenues and Expenditures (Exhibit 27.20.22-A) is to provide a worksheet for conversion of agency records to the GAAP basis.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Locally Held Funds Trial Balance for Revenues and Expenditures should be completed for funds classified as governmental fund types by the Comptroller's Office whose activity is not processed through the Comptroller's voucher/warrant processing system. A separate trial balance should be completed for each fund. In the event that agency records for a particular fund are maintained on a GAAP basis, only the agency records column needs to be completed. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting revenue and expenditure accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications should be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

(11)	Refunds and credit memoranda should be analyzed by revenue source on the SCO-541 (Refunds and Credit Memoranda Fund Analysis) and entered as a reduction of the applicable revenue type.
(12)	Subtract (11) from the amounts in columns (6), (7), (8), (9) and (10) for each category and enter the result in the respective column.
(13)	Total all revenue amounts reported either individually or as part of a subtotal as shown in (12) and enter the result in the respective column.
(14)	Enter the amount shown in (13) with the opposite mathematical sign. For example, if the amount shown in (13) is a credit, the amount in (14) will be a debit. Add (13) and (14). The result should be zero. A Fund Equity Reconciliation (SCO-529) must be completed to demonstrate the closing out of revenues into undesignated fund balance. The amount in (14) should be entered as a reclassifying journal entry on the SCO-547. Refer to the SCO-529 for the proper journal entry for this reclassification.
(15)	Total the expenditure amounts reported in (6), (7), (8), (9), and (10) and enter the result in the respective column.
(16)	Enter the amount shown in (15) with the opposite mathematical sign. For example, if the amount shown in (15) is a debit, the amount in (16) will be a credit. Add (15) and (16). The result should be zero. A Fund Equity Reconciliation (SCO-529) must be completed to demonstrate the closing out of expenditures into undesignated fund balance. The amount in (16) should be entered as a reclassifying journal entry on the SCO-547. Refer to the SCO-529 for the proper journal entry for this reclassification.

**PROPRIETARY FUNDS TRIAL BALANCE
FOR ASSETS, LIABILITIES AND NET ASSETS (SCO-526)**

PURPOSE

The purpose of the Proprietary Funds Trial Balance for Assets, Liabilities and Net Assets Form (Exhibit 27.20.26-A) is to provide a worksheet for conversion of agency records to the current year GAAP basis of accounting.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Proprietary Funds Trial Balance for Assets, Liabilities and Net Assets should be completed only for those funds solely administered by an agency and classified as a proprietary fund type as designated by the Comptroller's Office. In the event that agency records for a particular fund are maintained on the GAAP basis, only the GAAP basis columns need to be completed. A separate trial balance should be completed for each such fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting asset and liability accounts to the GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities). Guidance for classifying net assets can be found in SAMS Procedure 03.70.20.

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications will be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

**PROPRIETARY FUNDS TRIAL BALANCE
FOR REVENUES AND EXPENSES (SCO-527)**

PURPOSE

The purpose of the Proprietary Funds Trial Balance for Revenues and Expenses Form (Exhibit 27.20.27-A) is to provide a worksheet for conversion of agency records to the current year GAAP basis of accounting.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Proprietary Funds Trial Balance for Revenues and Expenses should be completed only for those funds solely administered by an agency and classified as a proprietary fund type as designated by the Comptroller's Office. A separate trial balance should be completed for each such fund.

All amounts reported on this form must be rounded to the nearest thousand. For descriptions of the accounts to be included on each line, refer to the Chart of Accounts (Procedure 27.50.20). Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

Instructions for converting revenue and expense accounts to the current year GAAP basis can be found in various forms and instructions included in the year-end reporting package (e.g., accounts payable and accrued liabilities on Form SCO-549, Summary of Liabilities).

All adjustments should be initially recorded on Form SCO-548 (Adjusting Journal Entries) and reclassifications on Form SCO-547 (Reclassifying Journal Entries). All adjustments and reclassifications will be summarized by account on Form SCO-530 (Account Summary Analysis) to provide details of the net adjustments and/or reclassifications to the trial balance.

FUND EQUITY RECONCILIATION (SCO-529)

PURPOSE

The purpose of the Fund Equity Reconciliation (Exhibit 27.20.29-A) is to demonstrate the closing out of the operating statement to the equity section of the balance sheet.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Fund Equity Reconciliation should be prepared for nonshared, locally held and proprietary fund trial balances. This form should be filled out only after the Trial Balance (SCO-516 and 517 for nonshared funds, SCO-521 and 522 for locally held funds or the SCO-526 and 527 for proprietary funds) has been completed.

All amounts on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically be generated.

INSTRUCTIONS

Complete Form SCO-529, disclosing beginning fund equity, revenues, expenses/expenditures and ending fund equity.

STANDARD JOURNAL ENTRIES

The following journal entries should be made to close revenues and expenditures into undesignated fund balance for **nonshared and locally held funds**.

ACCOUNT SUMMARY ANALYSIS (SCO-530)

PURPOSE

The purpose of the Account Summary Analysis Form (Exhibit 27.20.30-A) is to summarize adjustments and/or reclassifications by account number. This summary allows for a smoother transition when posting adjustments and/or reclassifications to the trial balance.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Account Summary Analysis should be completed for each trial balance after all adjustments and/or reclassifications have been posted to the Adjusting Journal Entries Form (SCO-548) and the Reclassifying Journal Entries Form (SCO-547).

All amounts must be rounded to the nearest thousand. Where a column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically be generated.

INSTRUCTIONS

After recording all adjustments on Form SCO-548 and all reclassifications on Form SCO-547, summarize the adjustments and reclassifications entries on this form by GAAP report account number. Once all entries are summarized, total the amounts for each GAAP report account number in order to post to the appropriate trial balance.

CONTENTS

Refer to Exhibit 27.20.30-B.

SHARED SAMS FUNDS CASH RECONCILIATION (SCO-531)

PURPOSE

The purpose of the Shared SAMS Funds Cash Reconciliation Form (Exhibit 27.20.31-A) is to account for cash in transit to the Comptroller's Office at June 30. The totals will be used to adjust SAMS cash and related revenue accounts to reflect the agency's balance at year-end.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Shared SAMS Funds Cash Reconciliation should be provided for the current fiscal year for all shared funds. Cash receipts can be in various stages of processing at year end. The two stages to report on the SCO-531 are:

1. Cash on Hand - cash which has not been submitted to the Treasurer's clearing account at June 30 or has not yet been recorded in the Treasurer's clearing account at June 30.

2. Cash in Transit - cash in any of the following stages and is calculated through a reconciliation performed between the agency's records and SAMS:

- Cash in clearing - amounts in the Treasurer's clearing account at June 30.
NOTE: The Treasurer's policy is to "clear" all clearing accounts on June 30.
- Clearing to agency - amounts the Treasurer has paid out of the clearing account, principally through the issuance of non-negotiable drafts to the agency, but which the agency has not yet forwarded to the Comptroller.
- Agency to SAMS - deposit transmittals submitted to, but not recorded on the Comptroller's records by June 30.

All amounts on this form should be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Cash in transit amounts can be determined by counting the cash on hand at year-end and reconciling with the Treasurer's clearing account and the SAMS Monthly Revenue Status (Report SB04) at June 30.

STANDARD JOURNAL ENTRIES

The following adjusting journal entry should be made on Form SCO-548.

Account Number	Account Name	Debit	Credit
101 4XX	Cash on Deposit with State Treasurer Revenues (by account number)	XXX	XXX

To record Cash on Hand and in Transit at June 30.

PROPRIETARY FUNDS STATEMENT OF CASH FLOWS (SCO-533)

PURPOSE

The purpose of the Proprietary Funds Statement of Cash Flows (Exhibit 27.20.33-A) is to classify cash transactions according to whether they originate from operating, noncapital financing, capital and related financing, or investing activities at June 30 for inclusion in the State's Comprehensive Annual Financial Report.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Proprietary Funds Statement of Cash Flows should be completed by funds classified as proprietary funds of the primary government according to the Comptroller's Office records. Refer to the Summary of Agencies and Fund Classification (SAMS Procedure 27.50.10) to obtain the fund classification. Refer to the GAAP Report Chart of Accounts (SAMS Procedure 27.50.20) to obtain the account numbers and descriptions.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

INSTRUCTIONS

Form SCO-533 is prepared on the cash basis of accounting. Amounts reported on this form are based on cash transactions during the period July 1 through June 30 and should not include prior year or current year accruals except for the reconciliation of operating income to net cash provided by operating activities. **Note: Cash receipts should be reported as positive amounts and cash outflows should be reported in parenthesis.**

NONSHARED SAMS FUNDS CASH RECONCILIATION (SCO-534)

PURPOSE

The purpose of the Nonshared SAMS Funds Cash Reconciliation Form (Exhibit 27.20.34-A) is to reconcile the fund balance per SAMS to the balance of cash on deposit with the Treasurer per agency records, both at the beginning and end of the fiscal year. All activities during the fiscal year which have not been recorded on SAMS must be identified on the SCO-534.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

A Nonshared SAMS Funds Cash Reconciliation must be prepared for each Treasury-held fund administered solely by the agency. Activity not recorded on SAMS is to be provided for the beginning (June 30, prior year, (PY)) and end (June 30, current year, (CY)) of the fiscal year. The balance at June 30, PY can be obtained from the prior year Form SCO-534. If Form SCO-534 was not submitted in the prior year, the following instructions will apply for calculating the proper information. This form is critical since it provides the audit trail to SAMS from the information accumulated from the administering agency's records in the trial balances for nonshared funds. This form is used to reconcile items between SAMS and agency records at June 30, PY and June 30, CY. This reconciliation is used in the preparation of the statewide financial statements.

Descriptions of activities not recorded on SAMS are:

1. Cash on Hand - cash which has not been submitted to the Treasurer's clearing account at June 30 or has not yet been recorded in the Treasurer's clearing account at June 30.
2. Cash in Transit - cash in any of the following stages and is calculated through a reconciliation performed between the agency's records and SAMS:

-
- Cash in clearing - amounts in the Treasurer's clearing account at June 30.
NOTE: The Treasurer's policy is to "clear" all clearing accounts on June 30.
 - Clearing to agency - amounts the Treasurer has paid out of the clearing account, principally through the issuance of non-negotiable drafts to the agency, but which the agency has not yet forwarded to the Comptroller.
 - Agency to SAMS - deposit transmittals submitted to, but not recorded on the Comptroller's records by June 30.
3. Vouchers in Transit - vouchers recorded on agency records which have not been recorded on SAMS. These vouchers are identified by the agency during the monthly reconciliation to the Appropriation Status Report (SB01). See Procedure 11.40.10.
4. Other - items that do not fit into categories 1 through 3 described above. The following two items appear frequently in the "Other" category.
- *Refunds per the SG06*
The SG06 is sent to agencies with the year-end reporting package and provides budgetary refunds paid during the fiscal year. Budgetary refunds are segregated from the agency's normal expenditure account(s). To ensure the SCO-534 agrees with total revenues and expenditures reported on the Trial Balance (SCO-517), the budgetary refunds must be subtracted from receipts and disbursements in the "Other" section of the SCO-534.
 - *Prior Year Adjustments*
Depending upon the nature of the item, the prior year adjustment will be recorded as either an addition or subtraction.

All amounts on this form should be rounded to the nearest thousand. Where a line or column does not apply, leave it blank. If completed on the Comptroller's WEDGE system, this form will automatically calculate certain fields.

INSTRUCTIONS

All amounts recorded on the Nonshared SAMS Funds Cash Reconciliation can be obtained from the monthly receipts and disbursements SAMS reconciliations performed by the agency. Vouchers in transit should be posted to the SCO-549.

**PROPRIETARY FUNDS SCHEDULE OF FOOTNOTE DISCLOSURE INFORMATION
(SCO-535)**

PURPOSE

The purpose of the Proprietary Funds Schedule of Footnote Disclosure Information Form (Exhibit 27.20.35-A) is to collect certain footnote disclosure information to be reported in the State's Annual Financial Report.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Proprietary Funds Schedule of Footnote Disclosure Information should be completed by all funds classified by the Comptroller's Office as enterprise or internal service funds. Refer to Summary of Agencies and Fund Classification (Procedure 27.50.10) to obtain fund classification.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank. If more space is needed, attach additional pages clearly indicating to which section the attachment refers.

INSTRUCTIONS

The Leases-Lessee section of the SCO-535 can be completed using the Comptroller's lease reports and/or agency records. The Certificates of Participation and Revenue Bonds Payable and Extraordinary, Special Items sections can be completed using agency records. Total future commitments for certificates of participation and revenue bonds reported by the agency should agree to the principal and interest outstanding reported in the confirmation of the State's Annual Report of Bonded Indebtedness and Long Term Obligations.

**SAMS TO GAAP RECONCILIATION-
CAPITAL ASSETS (SCO-537)**

PURPOSE

The purpose of the SAMS to GAAP Reconciliation-Capital Assets Form (Exhibit 27.20.37-A) is to provide a detailed reconciliation between the SAMS form filed quarterly with the Comptroller's Office (Agency Report of State Property, C-15) and the GAAP form filed annually with the Comptroller's Office (Capital Asset Summary, SCO-538).

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The SAMS to GAAP Reconciliation-Capital Assets is to be completed by all agencies filing the SCO-538, Capital Asset Summary.

All amounts on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

All differences between Form C-15, Agency Report of State Property, and Form SCO-538, Capital Asset Summary, should be reported and described in detail on this form. Any addition or subtraction adjustments should be explained in detail on the form.

CONTENTS

Refer to Exhibit 27.20.37-B.

CAPITAL ASSET SUMMARY (SCO-538)

PURPOSE

The purpose of the Capital Asset Summary (Exhibit 27.20.38-A) is to ensure all capital assets of State agencies are reported in the State of Illinois' GAAP financial statements.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record, and one for the Auditor General or his representative.

GENERAL

The Capital Asset Summary should be used by all State Agencies to report capital assets and related accumulated depreciation. Agencies should complete one form summarizing capital asset information for all governmental funds and a separate form for each proprietary fund, pension trust fund, private purpose trust fund and component unit. To determine fund classification, refer to the Summary of Agencies and Fund Classifications (Procedure 27.50.10).

The amounts reported in the Balance at June 30, Prior Year column should be the amounts reported in the Balance at June 30, Current Year column from the final SCO-538 in the prior fiscal year. In addition, the amounts reported for capital leases and the related depreciation should equal amounts reported in the Comptroller's lease system. These amounts will be provided by the Comptroller's Office after all SCO-560's submitted by an agency have been processed.

Capital outlay payables should only be recorded if the expenditure is greater than or equal to the related capitalization threshold (see 03.30.20). For example, equipment purchases should be \$5000 or greater.

It is of vital importance the standard journal entries made in conjunction with the SCO-538 for capital outlays accounts payable and the expenditure reconciliation agree with the corresponding information on the SCO-547, 548 and 549. When the GAAP package is completed, it should be reviewed to ensure entries for capital outlays agree to the SCO-538 submitted in August. If the capital outlays reported on the early submission SCO-538 do not agree to the final year-end reporting package, adjustment(s) should be made as necessary. A revised SCO-538 must be submitted to the Comptroller's Office as soon as possible. Changes to the SCO-538 could result from the availability of more complete or accurate information regarding the amount of lapse period capital outlays subsequent to the SCO-538 submission in August.

The Comptroller's Office has established capital asset policies that include capital asset definitions, financial reporting thresholds, economic useful life guidelines, and depreciation methods. Refer to Capital Asset Reporting (Procedure 03.30).

Descriptions of the capital asset classes are as follows:

- Land and Land Improvements
- Site Improvements
- Buildings and Building Improvements
- Equipment
- Infrastructure
- Construction-in-Progress
- Historical Treasures and Works of Art
- Capital Leases

All amounts reported on this form should be rounded to the nearest thousand. Where a row or column does not apply, leave it blank.

INSTRUCTIONS

All capital assets meeting the capitalization threshold as discussed in 03.30.20 must be included on this form. All of an agency's governmental funds' capital assets are to be combined and reported on one form. A separate form should be completed for each proprietary fund, pension trust fund, private purpose trust fund and component unit. Each SCO-538 must be accompanied by a completed SCO-537, SAMS to GAAP Reconciliation – Capital Assets. The SCO-538 should be completed first.

STANDARD JOURNAL ENTRIES

Capital outlays should be reclassified from the agency's designated expenditure function. For each fund listed in the capital outlays reconciliation section, "Expenditures Per SAMS" less "Non-capitalized Expenditures" plus "Other Capital Outlays" less "Capital Leases" (the sum of (30) and (32) less (31) and (33)) is the amount to reclassify to the capital outlays expenditure account 550. This reclassification should then be posted on Form SCO-547. The Comptroller's Office will post the portion of this reclassification related to capital leases from information captured in the Comptroller's lease system.

NOTE: An entry in (35) requires capital outlays accounts payable to be disclosed on the SCO-549, and an adjusting journal entry to be made to the SCO-548.

Account Number	Account Name	Debit	Credit
550	Capital Outlays	XXX	
5XX	Expenditure (by account number)		XXX

LONG-TERM OBLIGATIONS AND RELATED ITEMS (SCO-540)

PURPOSE

The purpose of the Long-Term Obligations and Related Items Form (Exhibit 27.20.40-A) is to record all changes in long-term obligations and related items from the prior year for proprietary, pension/investment/private purpose trust funds and component units. In addition, the SCO-540 is used to identify the current portion of the long-term obligations and related items.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record, and one for the Auditor General or his representative.

GENERAL

The Long-Term Obligations and Related Items Form should be completed for all proprietary, pension/investment/private purpose trust funds and component units with long-term obligations and related items. Form SCO-540 begins with the balance of long-term obligations and related items at the beginning of the year and records all increases and decreases during the year to long-term obligations and related items. In addition, this form is used to identify the current portion of the long-term debt and related items.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

REFUNDS AND CREDIT MEMORANDA FUND ANALYSIS (SCO-541)

PURPOSE

The purpose of the Refunds and Credit Memoranda Fund Analysis Form (Exhibit 27.20.41-A) is to provide the accumulation of data related to overpayments. Another purpose of this form is to deduct the overpayments pertaining to prior years and to identify those amounts attributable to the current year that will be paid in the future.

When applicable, this form is to be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Refunds and Credit Memoranda Fund Analysis should be completed by those agencies with material overpayments relating to taxes, licenses and fees.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Form SCO-541 can be prepared using one of two approaches. The first approach is to prepare the form for the individual fund to which the overpayment applies. The second approach is to prepare the form by allocating the major revenue source, as a whole, to the applicable funds. The approach determines which portions of the form require completion. A separate form must be completed for every fund with overpayments relating to taxes, licenses and fees.

Form SCO-541 is divided into three major areas: (1) Refund Expenditures, (2) GAAP Adjustments and (3) Allocations of Refunds by Fund.

Refund Expenditures

Refund expenditures per agency records at June 30 are determined by adding vouchers in transit at June 30 of the current year to refund expenditures per SAMS as of June 30 per GAAP Report SG06. The amounts in the SG06 include lapse period expenditures from the prior fiscal year and expenditures of the first four quarters of the current reporting year. Shared funds do not utilize

vouchers in transit information; therefore, a zero should be entered in the vouchers in transit line. Refund expenditures per agency records at June 30 should equal the amount in the Balance per SAMS column (shared funds) or the agency record column (nonshared funds) in the applicable revenue account number on the trial balance.

GAAP Adjustments

There are four types of GAAP adjustments: (1) Lapse Period, (2) Refunds Outstanding, (3) Credit Memoranda, and (4) Other.

Lapse Period

Lapse period GAAP adjustments record the amount of refunds estimated to be paid during lapse period. This adjustment is to be recorded in conjunction with the SCO-549 payable adjustment. Lapse period adjustments are determined by subtracting vouchers in transit at June 30 from estimated lapse period refunds. Shared funds do not utilize vouchers in transit information; therefore, a zero should be entered in the vouchers in transit line.

Refunds Outstanding

Refunds outstanding GAAP adjustments record the amount of refund claims outstanding applicable to revenues of the current reporting year. This adjustment is to be recorded in conjunction with the SCO-549 payable adjustment. The total refunds outstanding adjustment is determined by adding claims for refunds estimated to be received during the lapse period applicable to revenue collected as of June 30 (and not refunded from the lapsing appropriation) to claims for refunds that are estimated to be received after lapse period applicable to revenues collected as of June 30 (and estimated to be paid from a subsequent year's appropriation).

Credit Memoranda

Credit memoranda GAAP adjustments record the amount of credit memoranda outstanding applicable to the revenue collected during the current reporting year. The total credit memoranda adjustment is determined by adding credit memoranda outstanding at June 30 to credit memoranda issued during the lapse period that is applicable to revenue collected during the current reporting year and claims for credit estimated to be made subsequent to the end of the lapse period that is applicable to revenue collected in the current reporting year.

Other

Other GAAP adjustments record any additional types of overpayment, as necessary.

The GAAP adjustments data elements are then totaled to determine the correct calculation of amounts for journal entries. Note that the totals on the form do not have any particular significance. The importance of this form is in the calculation of amounts in order to prepare standard journal entries and to determine the appropriate amounts to be inserted in the Balance per SAMS or Agency Records column of the trial balance.

Allocation of Refunds by Fund

(If the form was completed using the first approach, which was to prepare the form for the individual fund to which the overpayment applied, the Allocation of Refunds by Fund Section should not be completed and the standard journal entries should be prepared.) The balance per agency records at June 30 is determined by adding vouchers in transit at June 30 to refunds per SAMS at June 30. The GAAP adjustments, as described above, are allocated to the appropriate funds. The lapse period adjustments are allocated in the same manner as the SAMS balances. The other GAAP adjustments are allocated based on actual refunds, if these amounts can be determined. If the actual refunds cannot be easily determined, utilize a percentage for allocating a given revenue source to the applicable funds. The GAAP adjustments should be added to the balance per agency records at June 30 to determine a total.

After refunds are allocated to the appropriate funds, the standard journal entries should be prepared.

STANDARD JOURNAL ENTRIES

The purpose of these entries is to reflect the appropriate liabilities resulting from the overpayment of various revenues.

REVENUE SOURCE FUND ANALYSIS (SCO-542)

PURPOSE

The purpose of the Revenue Source Fund Analysis Form (Exhibit 27.20.42-A) is to provide for the accumulation of data related to the major revenue sources in order to calculate the revenue accrual. This form is to be prepared by designated agencies with material revenues from taxes, licenses and fees that are deposited into more than one fund.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Revenue Source Fund Analysis should be completed by designated agencies with material revenues from taxes, licenses and fees that are deposited into more than one fund.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Form SCO-542 is prepared by major revenue source, as a whole, rather than by individual fund. This approach assists in determining the appropriate GAAP adjustments to the various funds. A copy of this form must be included in the year-end reporting package for each fund to which the revenue source was deposited. The amounts reported on this form will not agree to GAAP basis totals reported on the trial balance.

Form SCO-542 is divided into three major areas: (1) Reconciliation of SAMS to Agency Records, (2) GAAP Adjustments and (3) Allocation of Revenues by Fund.

Reconciliation of SAMS to Agency Records

This section reconciles the SAMS balance at June 30 to Agency records of amounts relating to a specific revenue source (inclusive of protest monies). This reconciliation is completed by calculating the adjusted balance per SAMS and SAMS reconciling items.

Adjusted Balance per SAMS

The adjusted balance per SAMS is calculated by subtracting prior year reconciling items from the balance per SAMS at June 30.

SAMS Reconciling Items

Cash receipts can be in various stages of processing at year-end, including cash on hand and cash in transit. Cash on hand is cash not yet submitted to the Treasurer at June 30. Cash in transit includes:

- Clearing account deposits made by the agency which the Treasurer has not yet recorded in the clearing account at June 30;
- Amounts in the Treasurer's clearing account at June 30;
NOTE: The Treasurer's policy is to "clear" all clearing accounts on June 30.
- Amounts the Treasurer has paid out of the clearing account, principally through the issuance of non-negotiable drafts to the agency, but which the agency has not yet forwarded to the Comptroller; and
- Deposit transmittals submitted to, but not recorded on the Comptroller's records by June 30.

These reconciling items are added to the adjusted balance per SAMS to arrive at the balance per agency records.

GAAP Adjustments

There are four types of GAAP adjustments: (1) Lapse Period Collections, (2) Unearned Revenue, (3) Assessment Collections, and (4) Other.

Lapse Period Collections

Lapse period collection GAAP adjustments report receipts collected during lapse period relating to the current reporting year.

Unearned Revenue

Unearned revenue GAAP adjustments report money received in advance of the period in which they are earned.

Assessment Collections

Assessment collection GAAP adjustments report assessments and deficiencies collected during lapse period. Any interest or penalty earned on these collections incurred after June 30 should be reported separately from the total received.

Other

Other GAAP adjustments report adjustments necessary to accrue revenue in accordance with GAAP.

Allocation of Revenues by Fund

The Balance per SAMS, Prior Year Reconciling Items and Adjusted Balance per SAMS represent allocations to the appropriate funds with the amounts for each fund taken directly from SAMS. For shared funds, the allocation in the Balance per SAMS column must agree to the Balance per SAMS column on the trial balance for the applicable revenue account. SAMS Reconciling Items are allocated based on the fund in which the reconciling item was deposited.

For nonshared funds, the Balance per Agency Records must agree to the Agency Records column on the trial balance for the applicable revenue account. GAAP adjustments are allocated either to the fund to which the adjustment relates, or by applying the percentage used to allocate a given revenue source to the appropriate fund. The Adjusted Balance is calculated by adding the Balance per Agency Records to the GAAP Adjustments.

After revenues are allocated to the appropriate funds, the standard journal entries should be prepared. For shared funds, both the SAMS reconciling items and the GAAP adjustments require journal entries. For nonshared funds, only the GAAP adjustments require journal entries.

STANDARD JOURNAL ENTRIES

The purpose of these entries is to reflect revenues in accordance with GAAP.

GOVERNMENT-WIDE ADJUSTING JOURNAL ENTRIES (SCO-546)

PURPOSE

The purpose of the Government-wide Adjusting Journal Entries (Exhibit 27.20.46-A) is to provide a form to accumulate all government-wide adjusting journal entries for funds classified as governmental fund types.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Government-wide Adjusting Journal Entries Form should be completed for all trial balances which have adjustments to a fund for reporting in the government-wide financial statements for the State of Illinois. A government-wide adjusting journal entry is posted when fund activity includes transactions requiring adjustment(s) to convert from the modified accrual basis of accounting to the accrual basis of accounting. Government-wide adjusting journal entries should not be made on the agency's records. Adjustments for capital assets and long-term debt should not be made on this form. Only government-wide adjusting entries for prepaid expenses or unavailable revenue (i.e. revenues not meeting the availability criteria) should be made on this form.

All amounts on this form must be rounded to the nearest thousand.

INSTRUCTIONS

Each government-wide adjusting journal entry must be assigned a unique number in sequential order. The account number can be obtained by referring to the GAAP Report Chart of Accounts (Procedure 27.50.20).

Every government-wide adjusting journal entry must be self-balancing, (debit(s) equal credit(s)). Explanations must be as thorough as necessary to provide a clear understanding of the rationale supporting the adjustment. Documentation supporting the accrual basis journal entry must be included on either the GAAP reporting forms or agency work papers.

RECLASSIFYING JOURNAL ENTRIES (SCO-547)

PURPOSE

The purpose of the Reclassifying Journal Entries (Exhibit 27.20.47-A) is to provide a form to accumulate all reclassifying journal entries.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Reclassifying Journal Entries Form should be completed when a reclassifying journal entry needs to be posted to a trial balance. A reclassifying journal entry is posted when both the debit and credit affects only one financial statement (i.e., either the balance sheet or the income statement). Reclassifying journal entries should not be made on the agency's records. All reclassifying journal entries should be made on this form.

All amounts reported on this form must be rounded to the nearest thousand. If this form is completed on the Comptroller's WEDGE system, certain fields will automatically be calculated.

INSTRUCTIONS

Each reclassifying journal entry must be assigned a unique number in sequential order. The account number can be obtained by referring to the GAAP Report Chart of Accounts (SAMS Procedure 27.50.20).

Every reclassifying journal entry must be self-balancing, (debit(s) equal credit(s)). Explanations must be as thorough as necessary to provide a clear understanding of the rationale supporting the reclassification. Documentation supporting the reclassifying journal entry must be included on either the GAAP reporting forms or agency work papers.

SUMMARY OF LIABILITIES (SCO-549)

PURPOSE

The purpose of the Summary of Liabilities Form (Exhibit 27.20.49-A) is to assist agencies in determining and documenting a fund's liabilities and related accrued expenditures for GAAP reporting.

When applicable, this form must be completed annually and sent to the Comptroller's Office. Two copies of the SCO-549 should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Summary of Liabilities should be completed for all Treasury-held trial balances which report liabilities and locally-held trial balances prepared on the Comptroller's WEDGE system. For GAAP reporting purposes, liabilities generally consist of accounts payable and accrued liabilities, due to other government – federal, due to other governments – local, due to other funds, due to component units and due to primary government.

Accounts payable is a liability account reflecting open amounts on account that are owed to private persons or organizations for goods and services received by a government (but not including amounts due to other funds of the same government or to other governments). Accounts payable include liabilities for goods received or services performed before June 30, but for which payment vouchers have not been processed by either the Comptroller's Office for Treasury held funds or the administering agency for locally held funds.

Accrued liabilities are estimates of expenditures incurred but not due until a later date (e.g., wages, employee benefits, travel expenses, and utility bills).

Separate liability accounts record amounts due to other funds or to other governments. The following accounts record governmental transactions: due to other government – federal, due to other governments – local, due to other funds, due to component units and due to primary government. These liability accounts represent transactions between governmental units or funds in which goods or services were received by June 30, but for which payment has not been made. The due to other funds account represents transactions between two primary government funds or two component unit funds of the same component unit. Transactions between a primary government fund and a

component unit fund are recorded in either the due to primary government account or the due to component units account. Transactions between a component unit and another component unit are recorded in the due to component units account.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Accounts payable and accrued liabilities can be determined by a review of an in-place receiving system or by using a reasonable estimate.

In-Place Receiving System

An in-place receiving system is a set of procedures and records designed to account for incoming goods and services and to compare the goods and services received to amounts billed by vendors. This type of system allows an agency to determine the amount due and owing as goods and services are received. All goods and services received prior to fiscal year end, but unpaid, are to be reported as liabilities. If an agency does not maintain an in-place receiving system, alternative procedures must be followed to determine liabilities at fiscal year-end.

Reasonable Estimation

If an agency does not maintain an in-place receiving system, a reasonable estimate must be utilized to project the amount of lapse period expenditures (or expenditures made subsequent to the end of the lapse period for continuing appropriation accounts) disbursed for goods received or services performed as of June 30. These disbursements must be recorded as expenditures and liabilities. The difference between actual disbursements and estimated expenditures and liabilities must be recorded as encumbrances. This alternative approach requires judgment and, if reasonably applied, results in the recording of materially correct amounts.

No Formal Agency Approach

Each Agency is encouraged to use internal records and procedures to develop an appropriate estimation approach. For those agencies that have not yet developed a formal approach, the Comptroller's Office has developed the following procedures.

July lapse period disbursements in excess of \$25,000 should be analyzed. Goods and services received **prior** to June 30 should be recorded as expenditures and liabilities. All professional and artistic contracts (detail object #1240 - #1245) must be performed as of June 30 of the fiscal year to be considered an outstanding liability as of June 30 and eligible for payment out of the expiring

appropriation and should be recorded as liabilities.

The Comptroller's Office will provide a special report to agencies, *Summary of Unexpended Appropriations and July Expenditures by Agency, Fund Division and Account (SCO-549-A)*, for completing the July Actual column on Form SCO-549. This report reflects spending by lapsing appropriation account, which must be separated into the following accounts: accounts payable and accrued liabilities (205), due to other government – federal (208), due to other government – local (209), due to other funds (215), due to component units (216), or due to primary government (217). Blank lines are provided on the report to segregate each appropriation account. In some cases, proper segregation is obvious. For example, personal services expenditures (detail object #1120) would be classified as accounts payable and accrued liabilities. Retirement expenditures (detail object #1161) would be classified as due to other funds (or if the paying agency is a component unit, due to a primary government). Social security expenditures (detail object #1170) would be classified as due to other government – federal. In cases where spending from one appropriation account encompasses several liability accounts, analysis is more difficult and requires use of internal agency records. GAAP expenditure codes and the unexpended appropriation amounts as of July 31 per SAMS are also included in this report.

A second report, the *Fund/Vendor Report (CW950P)* provides a partial analysis of the due to other funds, due to component units, and due to primary government amounts reported on the July spending report, SCO-549-A, described above. The CW950P provides the voucher number, warrant number, amount and appropriation account number for each payment made to another State agency. It is important to note the report may **not** be all-inclusive, as correct usage of vendor identification numbers by the agency will determine reliability of the report; however, the report can provide a basis for performing a reconciliation of due to/from amounts.

August expenditures and liabilities should be estimated through an analysis of unliquidated obligation balances or, for unobligated items, the unexpended appropriation amounts at July 31. The review of unliquidated obligation balances or unexpended appropriation amounts may be limited to items in excess of \$25,000, except for amounts due to other funds where a more detailed analysis may be required. The Comptroller's Office will also provide a special report, *Worksheet for Calculating Liabilities as of June 30 to be paid during August (SCO-549-C)*, to assist in completing the August Estimate column on Form SCO-549. Line items on the report are divided into obligated and unobligated categories. The contract/obligation number, appropriation account number, vendor name, and unliquidated amount in excess of \$25,000 at July 31 are provided for **obligated line items**. Blank lines are provided for the appropriation account number and projected spending for items/services received by June 30 for **unobligated line items** (in excess of \$25,000). The unexpended appropriation amount at July 31 can be found on the *Summary of Unexpended Appropriations and*

July Expenditures By Agency Fund Division and Account (SP590P) (SCO-549-A) which was previously discussed.

Agencies with reappropriated accounts or liabilities payable from future years' appropriations may use estimation techniques similar to those explained above to determine the portion of total expenditures and liabilities not paid out of lapsing appropriations. These amounts can then be posted directly to the appropriate columns on Form SCO-549.

SPECIAL CLASSIFICATION PROBLEMS

Capital outlays expenditures (GAAP report account 550) disbursed during lapse period and meeting the definition of a liability (received as of June 30) must be segregated from the agency's normal GAAP expenditure account (e.g., general government) and recorded separately on Form SCO-549 as capital outlays in the appropriate liability account (e.g., accounts payable and accrued liabilities, due to other funds, etc.). Only liabilities meeting the capitalization threshold should be shown as capital outlay expenditures. Those less than the capitalization threshold should be reported in the agency's normal GAAP expenditure account. Amounts for the capital outlays expenditure accrual must be obtained from Form SCO-538 to ensure capital outlay expenditure amounts reflected on Form SCO-549 agree to the current year payables reported on Form SCO-538.

Payables representing in-transit amounts for nonshared funds only at June 30, CY should be separately disclosed (in account 101) from the expenditure accounts. Refer to the Nonshared SAMS Reconciliation Form (SCO-534) for current year in-transit amounts.

Due to other funds Account 215 should not be reported in agency funds (See SAMS Procedure 27.50.10 for listing of fund classifications).

RESERVE FOR ENCUMBRANCES CALCULATION (SCO-550)

PURPOSE

The purpose of the Reserve for Encumbrances Computation Form (Exhibit 27.20.50-A) is to determine the amount of encumbrances to be recorded in each year-end reporting package as a reservation of fund equity.

When applicable, this form will be completed annually by the Comptroller's Office and sent to the agencies as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Reserve for Encumbrances Computation should be completed for all year-end reporting packages for governmental funds which either have lapse period expenditures or liabilities recorded. Encumbrances are defined as agency contracts, purchase orders or commitments entered into prior to June 30 (except for reappropriated accounts), which relate to the purchase of goods that were not received as of June 30. Since the GAAP packages are due prior to the end of the lapse period, it may not be possible for agencies to compute the reserve for encumbrances. The reserve for encumbrances calculation will be completed by the Comptroller's Office once the final amount of lapse period spending is determinable and will be provided to the agencies.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

INSTRUCTIONS

Form SCO-550 will be completed by the Comptroller's Office once the final amount of lapse period spending is determinable. Even though the reserve for encumbrances cannot be calculated prior to the submission of the year-end reporting package, this should not prevent the closing and reconciling of all nonshared fund packages.

The reserve for encumbrances will be recorded by the Comptroller's Office on the SCO-547 (Reclassifying Journal Entries) and posted to the appropriate Trial Balance.

SAMS TO GAAP RECONCILIATION-ACCOUNTS RECEIVABLE (SCO-551)

PURPOSE

The purpose of the SAMS To GAAP Reconciliation-Accounts Receivable Form (Exhibit 27.20.51-A) is to provide a detailed reconciliation between the SAMS form filed quarterly with the Comptroller's Office (Quarterly Summary of Accounts Receivable Report, C-97) and the GAAP Trial Balance form filed annually with the Comptroller's Office.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The SAMS to GAAP Reconciliation-Accounts Receivable should be completed by all year-end reporting packages which report accounts receivable on the GAAP trial balance or on the C-97, Quarterly Summary of Accounts Receivable Report.

All amounts reported on this form must be rounded to the nearest thousand. Any addition or subtraction adjustments should be explained in detail on the form. Where a line or column does not apply, leave it blank.

CONTENTS

INTERNAL SERVICE BILLING (SCO-552)

PURPOSE

The purpose of the Internal Service Fund Billing Form (Exhibit 27.20.52-A) is to collect interfund activity information required to be reported on the government-wide financial statements.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Internal Service Fund Billing Form should be completed by all funds classified as internal service funds by the Comptroller's Office. Governmental Accounting Standards Board (GASB) [Statement 34](#) requires the "doubling-up effect" of internal service fund activity to be eliminated in the government-wide financial statements. The elimination will occur when internal service fund activity is combined with either governmental or business type activities. In order to eliminate the internal service activity, information regarding amounts billed by the internal service funds will be gathered. This information will be used to allocate excess (deficient) income from the internal service fund to functional expenses on the government-wide financial statements.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

FUND BALANCE TO NET ASSET RECONCILIATION (SCO-553)

PURPOSE

The purpose of the Fund Balance to Net Asset Reconciliation (Exhibit 27.20.53-A) is to classify the fund balance amounts reported on a governmental fund type's Trial Balance to net assets for reporting in the government-wide Statement of Net Assets and to collect information necessary for disclosure in the footnotes to the State's Annual Financial Report as required by Governmental Accounting Standards Board (GASB) [Statement No. 46](#), *Net Assets Restricted by Enabling Legislation (an amendment of GASB Statement No. 34)*. In addition, this form gathers information for restricted assets whose liquidity is affected by the restriction.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Fund Balance to Net Asset Reconciliation must be prepared for all governmental funds. Proprietary, pension trust, investment trust and private purpose trust funds report net assets on the Trial Balance and, therefore, no conversion is necessary. This form should be filled out only after the Trial Balance (SCO-511 and 512 for shared funds, SCO-516 and 517 for nonshared funds or SCO-521 and 522 for locally held funds) has been completed. In addition, Form SCO-546 will need to be completed in order to complete this form.

The governmental fund type's Trial Balance reports the difference between assets and liabilities as fund balance. Fund balance is segregated by unreserved fund balance (which is a measure of resources available for the subsequent period's budget on a GAAP basis) and reserved fund balance. Designations reflect a government's self-imposed limitations on the use of otherwise available assets.

For the government-wide Statement of Net Assets, fund balance amounts reported on the governmental fund types' Trial Balance must be classified in the proper net asset categories. Net assets must be divided into three categories: (1) invested in capital assets, net of related debt, (2) restricted net assets, and (3) unrestricted net assets. The net assets invested in capital assets, net of related debt category is not required to be reported on the SCO-553, as it is not applicable to the funds reporting on this form.

[GASB Statement No. 34](#) states that net assets should be reported as restricted if constraints on net assets are either (1) externally imposed by creditors (e.g., debt covenants), grantors, contributors, or the laws or regulations of other governments, or (2) imposed by the government’s own laws or constitutional provisions. Self-imposed restrictions, such as earmarking funds for a specific purpose, can easily be removed and, therefore, are not considered restrictions for financial reporting purposes.

Guide to Implementation of GASB Statement 34 on Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments further comments on net assets that should be reported as restricted. Question 95 states, “The definition of restricted in paragraph 34 is intended to identify resources that were received or earned by the government with an explicit understanding between the government and the resource providers that the funds would be used for a specific purpose.” In addition, Question 96 states that the use of a special revenue fund is not limited to legally restricted resources. As a result, many special revenue fund balances do not meet the definition of restricted.

Restricted net assets are defined in SAMS Procedure 03.70.20. Restricted assets are defined in SAMS Procedure 03.60.10.

All amounts must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Complete Form SCO-553, disclosing June 30, CY fund balance as reported on the Trial Balance. Classify the fund balance amounts as Restricted for Program, Restricted for Debt Service, Restricted for Capital Projects or Unrestricted. In addition, for permanent trust funds classify the expendable and nonexpendable (principal) portions of the fund balance. Once classified, adjust the amounts for entries reported on Form SCO-546. Adjustments for prepaid expenses and unavailable revenues would be increasing adjustments.

ADJUSTMENTS FOR GOVERNMENT-WIDE STATEMENTS (SCO-555)

PURPOSE

The purpose of the Adjustments for Government-wide Statements Form (Exhibit 27.20.55-A) is to provide a worksheet for the accumulation of adjustments necessary to prepare the government-wide financial statements for the State of Illinois by agency.

When applicable, this form must be completed annually by the Comptroller's Office as part of the year-end reporting process. The Form will be issued to each agency except for pension systems and universities. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Adjustments for Government-wide Statements Form will be mailed by the Comptroller's Office to the agencies upon completion of the Comptroller review of all of the agency's GAAP packages. Before mailing, the Comptroller's Office will complete the prior year adjustments, fund column adjustments, interest payable, leases, compensated absences, other and GFAAG columns from information previously provided by the agency on various GAAP forms.

The agency will be required to verify all information presented on the form is accurate. The fund adjustment columns will be completed by the Comptroller's Office based on the SCO-546, Government-wide Adjustments, prepared by the agency and submitted to the Comptroller with the applicable GAAP Package. The interest payable columns will agree to the entries on Form SCO-546 and the FAS 13 Report. The lease columns will be in agreement with the applicable FAS 13 Report. The compensated absences column will be in agreement with the SCO-580, Compensated Absences, submitted to the Comptroller's Office. The other column must be in agreement with documentation provided to the Comptroller's Office (i.e. certificate of participation and/or long-term claims and other adjustments on the SCO-599, Contingencies, Commitments and Related Party Transactions). The GFAAG column will be in agreement with the SCO-538 form; Capital Asset Summary, submitted to the Comptroller's Office.

The total adjustments column will be used to complete the departmental financial statements. The departmental financial statements contain a column for adjustments from the fund financial statements to the government-wide financial statements which represents the information from the total adjustments column of this form.

All information reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

All entries must be self-balancing, debit(s) must equal credit(s). All debits should be shown as positive and credits in parenthesis. The Total Adjustments column will be used to complete departmental financial statements.

Amounts in the Total Adjustments column are presented in Part 1 as a debit or credit to the respective account number. In the departmental financial statement column, debit amounts will increase assets and expenses and credit amounts will increase liabilities and revenues.

Amounts in the Total Equity Adjustments column are presented in Part 2 as an increase (decrease) to the respective equity account number. The increase or decrease will need to be presented in the departmental financial statement adjustment column as shown to properly convert fund balance to net assets.

ACCOUNTING FOR LEASES-LESSEE (SCO-560)

PURPOSE

The purpose of the Accounting for Leases-Lessee Form (Exhibit 27.20.60-A) is to provide information used in classifying leases into either a capital or operating lease and in reporting leases as required by [Financial Accounting Standards Board, Statement No. 13](#).

This form is to be completed on a transaction by transaction basis as new lease agreements are initiated and sent to the Comptroller's Office. This form only needs to be prepared if the fair market value of the new asset being leased is greater than \$5,000. This form also needs to be prepared when there is an early termination of an existing lease. This form should also be completed when changes are made to existing lease provisions, including changes in the appropriation from which payments are made. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

The completion of this form will enable the Comptroller's Office to determine if a leased asset should be considered a capital lease asset. When an asset is determined to be a capital lease item, the SCO-560 is used by the Comptroller's Office to determine the cost of the asset to be recorded on the agency's books, including the Agency Report of State Property (Form C-15) and the Capital Asset Summary (SCO-538).

GENERAL

All agencies who lease property must complete Form SCO-560 for each multiple period lease in which the asset being leased has a fair market value greater than \$5,000, in order to determine whether the lease is a capital or an operating lease and to calculate commitments for future years. However, agencies who administer proprietary funds (including all component units) do not have to report on Form SCO-560 if the agency uses their own lease calculating system and the agency reports this information on Form SCO-535, Proprietary Fund Schedule of Footnote Disclosure Information or Form SCO-585, Component Unit Schedule of Footnote Disclosure Information. When an asset is determined to be a capital lease, Form SCO-560 is used to assist the Comptroller's Office in calculating the appropriate cost at which the agency should record the leased asset in their State property control records. This amount will also be reflected on Form C-15, Agency Report of State Property and Form SCO-538, Property, Plant and Equipment.

To be considered a capital lease, one of the following four criteria must be met:

1. The lease transfers ownership of the property to the lessee by the end of the lease term.
2. The lease term is 75% or more of the estimated economic life of the leased property.
3. The lease contains a bargain purchase option.
4. The present value of the minimum lease payments (excluding executory costs and any related profit) equals or exceeds 90% of the fair value of the leased property.

If the lease does not meet any of these criteria, it will be classified as an operating lease.

Form SCO-560 should be submitted for installment purchases in order to determine the asset value to record on the agency's property records. An installment purchase agreement is an agreement where title to the property (ownership) vests in the purchaser immediately. The Transfer of Ownership field (19) should be marked as yes to indicate an installment purchase.

INSTRUCTIONS

Form SCO-560 must be prepared for installment purchases and for multiple-period or multiple-year contracts with a transaction code of 38 (Other Lease-External Vendor), 39 (Other Lease-State Agency) or 31 (Leases for Rental of Real Property) in which the asset being leased has a fair market value greater than \$5,000. Only contracts with a transaction code of 31 which have a bargain purchase option contained within the lease agreement or are an installment purchase require an SCO-560 providing the fair market of the property is greater than \$5,000. (NOTE: This type of lease also requires a C-15A form to be filed in accordance with SAMS 15.20.41.) A separate Form SCO-560 must be filled out for each contract. Do not complete "Lease Number". This will be completed by the Comptroller's Office.

All amounts on this form should be rounded to the nearest thousand.

(11)	Enter the last two digits of the year the lease term begins (not the year of inception).
(12)	Enter in dollars, the purchase price (commonly referred to as “fair value”) of the lease property at inception of the lease, even if it is considered an operating lease. Refer to (29) for detailed calculation of “fair value at inception.” If this value is less than \$5,000, this form does not need to be prepared. NOTE: This information must be completed to determine if the lease is a capital lease.
(13)	Enter the total estimated economic life of the leased property (in years). Refer to SAMS Manual Procedure 03.30.40.
(14)	Enter the total estimated economic life remaining in the asset (in years) at the beginning of the lease term (not the inception of the lease). If the asset is new, the remaining life will equal (13).
(15)	Enter the number of payments per year. Allowable entries are 1, 2, 3, 4, 6 or 12. For example, if lease rental payments are made quarterly, enter 4.

(16) Enter the number of periods from beginning of the lease term to the termination of the lease term. For example, if the payment periods are quarterly and the lease life is 10 ½ years, enter 42. Do not include time from the inception to the beginning of the lease term.

The lease term consists of:

- a. The original noncancellable term stated in the lease
- b. Renewal terms, reasonably assured by:
 - 1. Bargain renewal option-a provision allowing the lessee, at his option, to renew the lease for a rental sufficiently lower than the fair rental of the property at the date the option becomes exercisable.
 - 2. Penalties imposed for nonrenewal.
 - 3. Lessee guarantee of the lessor's debt expected to be outstanding.
 - 4. The period up to the exercise date of the bargain purchase option.
 - 5. Any lessor's option.

(17) Enter BEG if paid at the beginning of the payment period (payments in advance). Enter END if paid at the end of the payment period (payment in arrears).

(18) Enter the interest rate stated in the lease. If a rate is not stated, the Comptroller's Office will complete this section based on average general obligation bond rates at the date of inception.

(19) If the lease automatically transfers ownership of the property to the lessee by the end of the term, enter Y. If not, enter N. If an entry other than 0 is to be made in (20), enter N. An entry other than 0 indicates the lease is a capital lease.

(20) Enter the dollar amount of the bargain purchase option. If there is no bargain purchase option, enter 0. If an entry of Y has been made in (19), enter 0. An entry other than 0 in this box indicates the lease is a capital lease.

NOTE: To determine if the purchase option stated in the lease is a bargain purchase, complete the following steps:

- a. Determine the dollar amount of the fair value of the leased property at the dated the purchase option becomes exercisable. The fair value is defined as the price for which the leased property could be purchased.
 - b. Determine the dollar amount of the lessee’s purchase price as stated in the lease agreement.
 - c. If the lessee’s purchase price is sufficiently less than the fair value, then the option is a bargain purchase option.
- (21) If the obligation is for an installment purchase (title passes at the **beginning** of the payment schedule), enter Y. If the obligation is not for an installment purchase, enter N. The contract may contain a section termed “Title” indicating whether title passes upon acceptance of the equipment (beginning).
- (22) If the obligation is for a certificate of participation, enter Y. If the obligation is not for a certificate of participation, enter N. The Department of Central Management Services has arranged for financing or refinancing of certain equipment purchases with certain banks. If an obligation is for a certificate of participation, it should be evidenced by a signed lease agreement and the lease payments would be made to the bank. Please forward the Comptroller’s Office a copy of the certificate of participation.
- (23) Enter the total amount of rent to be paid by the lessee for each period (month, quarter, etc.) as defined in (16). **Do not include maintenance costs in the periodic payment.** If a copier does not specify a separate maintenance fee, or the amount of the periodic payment to allocate for maintenance, the following method may be used to estimate the amount. Multiply the number of copies allowable per period by the charge per copy if the limit is exceeded. Subtract this amount from the gross payment. Example: Vendor charges .01 per copy for more than 5,000 copies per period. 5,000 x .01 = \$50 Subtract \$50 from the periodic payment.
- (24) Enter the number of periods the rent in (23) applies. Example: if a lease has rentals of \$5,000 for twenty periods, enter 5,000 in (23) and 20 in (24).

-----------	----------

- Net leases do not include executory costs in the lease payments. (Gross lease less executory costs = net lease.)
- (31) If a 1 was entered in (30), enter the number of square feet on which the executory costs are to be based. If 0 was entered, enter 0. If 2 was entered, leave it blank.

Instructions (32) through (35) refer to executory costs consisting of insurance, maintenance and “other” costs. This line must be completed for all gross leases (enter zero where appropriate).

- (32) Enter either cents per square foot per year or percent of annual gross lease rental applied to executory costs as appropriate.
- (33) If, at the lease inception date, it is anticipated that executory costs will increase as a percentage of the rent or a percentage of the cents per square foot, an inflation factor must be entered; if not, enter 0. Enter 0 if no inflation is assumed.
- (34) The year referred to is the lease year (not the agency’s fiscal year). If a change in the inflation rate is expected to occur, the number entered should be determined by subtracting the year the lease was entered into from the year the change is expected and adding 1 (for the first year).
- EXAMPLE: A lease was entered into in 2001. Insurance was expected to increase at a rate of 5% through 2004 (the fourth year of the lease). A 4 should be entered.
- Enter the life of the lease in years if no change in the inflation rate is expected to occur.
- (35) Enter the inflation rate from the year of the change through the end of the lease. Enter 0 if no change is expected to occur.

NOTE: Negative inflation (i.e., deflation) may be entered using a minus sign.

MULTIPLE FUND ADJUSTMENT/RECLASSIFICATION SCHEDULE (SCO-562)

PURPOSE

The purpose of the Multiple Adjustment/Reclassification Schedule (Exhibit 27.20.62-A) is to provide accrued interest and other adjustment information from the Treasurer's Office. This form is applicable to those funds in which the only responsibility of the Treasurer is the deposit of interest income or other receipts for programs they do not administer.

This form must be completed annually by the Treasurer's Office and sent to the Comptroller's Office as part of the year-end reporting package. The Comptroller's Office will summarize the entries and forward them to each effected agency. Two copies of this correspondence should be retained by the agency: one to provide an internal record, and one for the Auditor General or his representative.

GENERAL

The Multiple Fund Adjustment/Reclassification Schedule should report accrued interest and other adjustments at the Treasurer's Office for nonshared funds in which another agency is the administrator of the fund.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

INSTRUCTIONS

The Treasurer's Office will be notified of the funds to which this form applies and the fund names will be inserted on the form. Funds classified as Agency funds have no operating statement. These funds require a special journal entry (see Journal Entry 2, below), and will be separately identified. This information is necessary for footnote disclosure.

STANDARD JOURNAL ENTRIES

The following journal entries should be made to record accrued interest and cash equivalents.

GRANT/CONTRACT ANALYSIS (SCO-563)

PURPOSE

The purpose of the Grant/Contract Analysis Form (Exhibit 27.20.63-A) is to calculate a receivable or liability at the fiscal year-end and determine other pertinent financial information related to grants and contracts. Form SCO-563 also provides the information needed to prepare the Statewide Schedule of Expenditures of Federal Awards (SEFA) for the primary government portion of the State of Illinois Reporting Entity in accordance with the Federal Single Audit Act.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Grant/Contract Analysis should be completed by all State agencies (primary government and component units) for each fund receiving cash or non-cash assistance from the Federal government, other government units or private organizations. Contracts or awards received from another State fund must be analyzed on Form SCO-567.

For reimbursement-type grants in which the State cannot qualify for resources without first incurring allowable costs, grant expenditures are the prime factor for determining whether eligibility requirements have been met. An expenditure should be recognized in the accounting period in which the fund liability is incurred, if the amount is measurable. Revenue should be recognized when the expenditure is incurred for reimbursement-type grants. For other grants in which incurring allowable costs is not an eligibility requirement, revenue should be recognized when all applicable eligibility requirements are met regardless of the amount and timing of expenditures. Emphasis in completing this form should be placed on the items comprising total reimbursable costs. Total reimbursable costs are defined as the amount of reimbursement earned for the grant or contract during the fiscal year. Reimbursement may be received after year-end; however, disallowed costs should be excluded from the calculation.

Information reported on Form SCO-563 is used in the preparation of the Statewide SEFA. In order to capture required data, fields related to the [CFDA number](#), pass-through entity identification number and amounts provided to subrecipients must be completed. Funds passed through to other State agencies must be reported to ensure federal funds are not double counted on a statewide basis.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

INSTRUCTIONS

Grants or contracts reported on this form should be one of two types: non-cash and cash.

Non-Cash Grants or Contracts

The value of non-cash assistance distributed must be reported as revenues and expenditures in the applicable section of the Form SCO-563. The following methods of valuation should be used for non-cash awards expended:

Loans and Loan Guarantees

New loans made or received during the fiscal year plus the balance of loans from previous years for which the federal government imposes continuing compliance requirements, plus any interest subsidy, cash, or administrative cost allowance. Proceeds of loans received and expended in prior years are not considered federal awards expended in the current year when the laws, regulations, and provisions of contracts or grant agreements pertaining to such loans impose no continuing compliance requirements other than to repay the loans.

Loans and Loan Guarantees at Institutions of Higher Education

The value of loans made during the year are considered federal awards expended when loans are made to students, even when the institution of higher education does not make the loans. The balance of loans for previous years is not included because the lender accounts for prior balances.

Insurance Contracts

Fair market value of insurance contract at the time of receipt or the assessed value provided by the federal agency.

Food Stamps

Fair market value of food stamps at the time of receipt or the assessed value provided by the federal agency.

Commodities

Fair market value of commodities at the time of receipt or the assessed value provided by the federal agency.

Donated Property

Fair market value of donated property or donated surplus property at the time of receipt or the assessed value provided by the federal agency.

Free Rent

Fair market value of free rent at the time of receipt or the assessed value provided by the federal agency. Free rent is not considered an award expended unless it is received as part of an award to carry out a federal program.

Recognition of revenue for non-cash grants or contracts depends on the type of non-cash grant or contract. Loan and loan guarantees, insurance contracts and free rent are not recognized as revenue or expenditures for financial reporting purposes in a fund. Food stamps, donated commodities and donated property which is not capitalized are recognized as revenue and expenditures in a fund. Donated property which is capitalized is not recognized as revenue or expenditures in a fund but is recognized as revenue and an asset in the State's government-wide financial statements and should be reported on the SCO-538.

Cash Grants or Contracts

Amounts related to total reimbursable costs and grant receipts are to be entered directly on the form, unless the grant or contract is the type in which **only** a portion of costs are reimbursed (e.g., matching funds). Computations for reimbursable costs involving matching funds should be entered on the form after applying the appropriate percentages. Grants or contracts involving matching funds should be denoted with a brief explanation (e.g., percentage of matching funds). This will assist the Comptroller's staff in review of the form and in verification of receipts and expenditures.

If reimbursement-type grant or contract activity is the only activity in the fund, total reimbursable costs should agree to expenditures reported in the current year GAAP basis column on the trial balance. Grant receipts should agree to the revenues reported in the agency records column on the trial balance. A reconciliation and/or documentation should be prepared and provided to the Comptroller's Office to explain variances between calculations on Form SCO-563 and amounts reported on the trial balance due to subgrantee payables, indirect and disallowed costs.

Funds receiving both direct reimbursement-type grant or contract receipts and reimbursement-type grant or contract receipts from other State agencies are considered to be grant-oriented funds. Therefore, the amounts reported on Forms SCO-563 and SCO-567 should agree to the total GAAP basis expenditures reported on the trial balance.

When payment from the grantor is based on a formula other than expenditures incurred, the method

of payment must be disclosed on the form. Disclosure can be made in the grant description area or in a footnote. An example of a non-expenditure based payment would be payment for services based on a hourly/daily rate where the payment bears no relation to actual costs incurred.

[OMB Circular A-133](#) defines subrecipient as a nonfederal entity that expends federal awards received from a pass-through entity to carry out Federal programs. A subrecipient does not include an individual that is a beneficiary of such a program. For State of Illinois purposes, subrecipient entities do not include those entities that are part of the primary government. Monies subgranted to entities that are part of the primary government are defined as subgrantee agencies.

When monies have been subgranted but not fully expended by the subgrantee agency, special documentation on Form SCO-563 is required. If a refund is due from the subgrantee agency, the amount should be separately identified and subtracted from total reimbursable costs to calculate the grant receivable or liability.

If the subgrantee agency has deferred revenue related to the grant (i.e., the money is rolled into the following year's grant and is not refunded to the subgrantor agency) the deferred revenue is properly reflected in the fund of the subgrantee agency from the journal entry recorded on Form SCO-567. The amount of deferred revenue should not be subtracted from total reimbursable costs by the subgrantor agency, as this would result in recording the deferred revenue twice. However, the Comptroller's Office will record a reclassification entry on Form SCO-568 to decrease revenues and decrease expenses of the subgrantor agency.

In cases where reimbursement-type grants or contracts comprise only a portion of the fund's activity, a less definitive means exist for determining total reimbursable costs and grant receipts. A combination of the information from grants ledgers, federal reports, subgrantees reports, SAMS, and the payable analysis per Form SCO-549 should be utilized.

Grant ledgers and federal reports will assist in determining the proper amount of indirect costs, exclusive of disallowed costs, to include in current year expenditures. To prevent an overstatement of deferred revenue when indirect cost reimbursements have been included in grant receipts, a corresponding amount should be separately disclosed in the total reimbursable costs to assist in explaining the existence of a fund balance at year-end.

The current year receivable or liability is computed as a result of the grant information disclosed on this form. If a liability is computed, it should be determined whether the money will be rolled over into the next fiscal or grant year (deferred revenue) or will be returned to the grantor agency.

INTERFUND PAYABLE/RECEIVABLE ANALYSIS (SCO-565)

PURPOSE

The purpose of the Interfund Payable/Receivable Analysis Form (Exhibit 27.20.65-A and Exhibit 27.20.65-C for Component Units) is to summarize the amounts owed and the amounts receivable between funds of the State of Illinois financial reporting entity. In reporting these amounts, generally accepted accounting principles require a distinction between due to/from other funds, due to/from primary governments and due to/from component units.

The SCO-565B is to be used by component units to summarize the amounts owed and the amounts receivable between the component units and the State of Illinois (Primary Government) and the component units and other component units of the State of Illinois.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Interfund Payable/Receivable Analysis should be completed for all trial balances which report an interfund payable or an interfund receivable. This form is used by the Comptroller's Office to reconcile due to/from other funds, due to/from primary government or due to/from component units

The top portion of the Interfund Payable/Receivable Analysis should be completed only for interfund activity relating to internal service funds, pension funds and non-federal transactions involving university funds. Other interfund activity may be recorded in the top portion after reaching an agreement with the Comptroller's Office. All other interfund activity should be reported on the SCO-567 and SCO-568 with summary amounts reported on the bottom portion of the Interfund Payable/Receivable Analysis.

All amounts reported on this form should be rounded to the nearest thousand. Where a column does not apply, leave it blank. If completed on the Comptroller's WEDGE System, this form will automatically calculate certain fields, component units will complete the manual form SCO-565B.

INSTRUCTIONS

To ensure the “due to” amounts reconcile with the “due from” amounts submitted by the providing agency, a detailed listing of the providing agency/fund (e.g., CMS-Telecommunications) and the liability amount at June 30, per SAMS records for treasury held funds is required. See SAMS Procedure 27.50.10 to determine whether to use due to/from other funds, due to/from primary government or due to/from component units.

To assist in the reconciliation of interfund payables/receivables, the agency should review the Form SCO-565-A provided by the Comptroller’s Office. The Form SCO-565-A, *Notification of Due to Other Funds*, is provided by the Comptroller’s Office to agencies to assist in calculating the year-end due to other funds for activity with some of the State’s Internal Service Funds and several other funds in which a significant portion of the fund’s activity is generated from services provided to other funds. The SCO-565-A may not be all inclusive. Additional due to other fund amounts must also be entered on the SCO-565, if applicable, even though not included in the SCO-565-A.

Agencies should also examine internal procedures and records in determining due to/from amounts, especially in cases where estimates are involved.

NOTES PAYABLE SUMMARY (SCO-566)

PURPOSE

The purpose of the Notes Payable Summary Form (Exhibit 27.20.66-A) is to report the notes payable for each fund. Information will be needed for the amount of principal and interest to be repaid in each of the next five years and the amount to be repaid thereafter, in five-year increments.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Notes Payable Summary should be completed for all trial balances which report notes payable activity. Notes payable are unconditional written promises signed by the maker to pay a certain sum of money on demand or at a fixed or determinable time either to the bearer or to the order of a person designated therein.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Information needed for the completion of this form can be obtained from the note payment schedule contained in the note agreement for each note payable. The range of interest rates and maturity dates are an integral part of required footnote disclosure and, therefore, must be completed for each category of notes payable.

INTERFUND ACTIVITY-GRANTEE AGENCY (SCO-567)

PURPOSE

The Interfund Activity-Grantee Agency Form (Exhibit 27.20.67-A) has several purposes: to provide receivable and liability adjustments relating to transactions with other State funds, to provide mandatory transfer documentation and to determine entries necessary to the GAAP Trial Balance Forms. Data collected on Form SCO-567 also assists in the preparation of the Schedule of Expenditures of Federal Awards (SEFA) for the primary government portion of the State of Illinois' Reporting Entity. In addition, Form SCO-567 captures all non-internal service, non-pension trust and non-university fund activity. Internal service and pension trust fund activity is only captured for transfers while university activity is only captured for SEFA reporting. Interfund transactions consist of internal reimbursements, third party reimbursements, payments for services, transfers and transfer-like activity. Furthermore, such transactions are broken down and summarized on the form by reporting activity between:

- Governmental and proprietary funds within the primary government with other governmental and proprietary funds within the primary government.
- Governmental, proprietary and fiduciary funds within the primary government or component units with fiduciary funds within the primary government.
- Governmental and proprietary funds within the primary government with component units.
- Component unit within the same component unit.
- Component units with other component units.

When applicable, this form is to be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Interfund Activity-Grantee Agency Form should be completed for all funds recording fiscal year activity that included transactions with other funds except as noted above. Interfund transactions **must** be reviewed to determine whether transactions represent internal reimbursements, third party reimbursements, payments for services, transfers or transfer-like activities. For guidelines on determining the proper categorization of interfund reimbursement, interfund services provided or used or interfund transfer transactions, refer to SAMS Procedure 05.50.01. Transfer-like activity is a transaction between the primary government and a component unit, between component units or

involving a fiduciary fund in which the activity is not a reimbursement for services provided.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank. For Interfund Activity-Grantee Agency Forms completed electronically, this form will automatically calculate certain fields.

INSTRUCTIONS

Information reported on Form SCO-567 will automatically create corresponding information on Form SCO-568 (Interfund Activity-Grantor Agency). Each providing agency should be contacted and transaction type and related receivable/liability amounts should be agreed upon. In most cases, the grantee agency has the most accurate GAAP information available regarding the due to/from amount in a given transaction. It is important to provide the primary government or component unit classification of each providing agency.

The Comptroller's Office will enter the prior year interfund receivables or liabilities, if any, and prior year accounts payable, if any. In addition, the Comptroller's Office will enter current year receipts information for SAMS mandatory transfers. These amounts should be reviewed. If material discrepancies exist between amounts entered by the Comptroller's Office and agency records, the Comptroller's Office should be contacted. Do **not** change prior year amounts without contacting the Comptroller's Office.

Total reimbursable costs are the fiscal year expenditure amounts. Disallowed costs should be separately disclosed and excluded from the calculation. If the only amounts received during the fiscal year were subgrants through other State agencies, total reimbursable costs should agree to the expenditure reported in the CY GAAP Basis column on the Trial Balance. Funds receiving direct grants and grants through other State agencies should total the costs reported on Forms SCO-567 and SCO-563, and that total should agree to the expenditures reported in the CY GAAP Basis column on the Trial Balance.

If grantor payments are based on a method other than expenditures incurred, the method of payment must be disclosed. Disclosure can be made in the program description area or in an attachment. An example of a non-expenditure based payment would be a payment for services based on an hourly/daily rate, where the payment bears no relation to actual costs incurred.

In cases where interfund subgrants comprise only a portion of a fund's activity, determining total reimbursable costs is a more difficult process. Information from grant ledgers, federal reports, subgrantee reports, SAMS, and the payable analysis on Form SCO-549 should be reviewed.

Current year receipts include amounts received July through June per agency records for individual subgrants/contracts.

The current year receivable or liability is calculated based on other amounts reported on this form. If a liability is calculated, it must be determined whether the liability represents deferred revenue (amounts to be expended in the next fiscal or grant year) or a due to amount (amounts to be returned to the grantor).

Agencies responsible for recording mandatory transfers are identified in the Mandatory Transfer Listing (SAMS Procedure 27.50.50). Mandatory transfers received during the fiscal year will be provided by the Comptroller's Office in the bottom section of the form. The amounts received during the fiscal year should agree to the amount reported in the transfers-in account in the Agency Records (SCO-517, 522 or 527) or Balance per SAMS (SCO-512) column of the Trial balance. Mandatory transfers must be categorized by transaction type; therefore, reclassification may be necessary. Mandatory transfers **must** be reviewed to determine whether transactions represent internal reimbursements, third party reimbursements, payments for services, transfers, or transfer-like activities. Any accruals related to mandatory transfers must be reported on this form and standard journal entries should be recorded.

Interfund transactions meeting the transfer criteria and involving one or more agency funds require special reporting. SAMS Procedure 27.50.50 identifies mandatory transfers involving agency funds. These transactions should be reported on Form SCO-567 to the agency assigned responsibility. Special journal entries are required for these transactions since agency funds require a balance sheet only for financial reporting purposes (i.e., no transfers-in/out are recorded). If the agency fund is the grantor, the grantee must reclassify (SCO-547) the transfers received during the year to the appropriate revenue report account (e.g., other taxes, other revenues, etc.). Accrual amounts should be posted as adjustments (SCO-548) impacting balance sheet accounts for the agency fund and both balance sheet and revenue accounts for the grantee fund.

Information reported on this form will assist in the preparation of the Statewide SEFA; therefore, it is important to complete all applicable fields, including [CFDA number](#), pass-through entity identification number and amounts provided to subrecipients. [OMB Circular A-133](#) defines a subrecipient as a non-federal entity expending federal awards received from a pass-through entity to carry out a federal program. Subrecipient does not include an individual beneficiary of the program. In addition, for statewide reporting purposes, subrecipient does not include entities qualifying as part of the primary government. As new grants are received from other State agencies, it is very important to determine whether the original funding source was Federal. If this information is not provided in the inter-agency agreement, the providing agency must be contacted.

STANDARD JOURNAL ENTRIES

The purpose of the following entries is to record the various reclassifications and adjustments resulting from completion of this form. The entries identified below are based on the type of transaction. There are two general interfund activities reported on Form SCO-567. They are as follows:

1. Agency Activity
2. SAMS Mandatory Transfers

Within each of the two activities reported on Form SCO-567, there are five types of transactions. Those transaction types are as follows:

- Internal Reimbursements (**Interfund reimbursement** transactions for other funds of the State or of the same component unit),
- Third Party Reimbursements (**Interfund reimbursement** transactions from other funds of the State in which the other fund is reimbursed through a grant or contract by a third party),
- Payments for Services (**Interfund services provided**),
- Transfers (**Interfund transfers** between a primary government governmental or proprietary fund and a primary government governmental or proprietary fund or between a fund of a component unit and a fund of the same component unit) and
- Transfer-like (**Interfund transfers** between a primary government governmental, proprietary or fiduciary fund and a primary government fiduciary fund; a primary government governmental, proprietary or fiduciary fund and a component unit; or between a fund of a component unit and a fund of a different component unit).

[GASB 34](#) requires these types of transactions to be recorded differently on each fund's trial balance based on the respective transaction type. See SAMS Procedure 05.50.01 for a definition of the bolded terms above. All entries shown assume a due from other funds scenario will result. If a due to other funds or a deferred revenue scenario results, see page 19 of these instructions for guidance.

INTERFUND ACTIVITY-GRANTOR AGENCY (SCO-568)

PURPOSE

The Interfund Activity-Grantor Agency Form (Exhibit 27.20.68-A) has several purposes: to provide receivable and liability adjustments relating to transactions with other State funds, to provide mandatory transfer documentation and to determine entries necessary to the GAAP Trial Balance Forms. Data collected on Form SCO-568 also assists in the preparation of the Schedule of Federal Awards (SEFA) for the primary government portion of the State of Illinois' Reporting Entity. In addition, Form SCO-568 captures all non-internal service, non-pension trust and non-university fund activity. Internal service and pension trust fund activity is only captured for transfers while university activity is only captured for SEFA reporting. Interfund transactions consist of internal reimbursements, third party reimbursements, payments for services, transfers and transfer-like activities. Furthermore, such transactions are broken down and summarized on the form reporting the activity between:

- Governmental and proprietary funds within the primary government with other governmental and proprietary funds within the primary government.
- Governmental, proprietary and fiduciary funds within the primary government or component units with fiduciary funds within the primary government.
- Governmental and proprietary funds within the primary government with component units.
- Component unit within the same component unit.
- Component units with other component units.

When applicable, this form will be completed annually by the Comptroller's Office and sent to the agency for review and approval. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Interfund Activity-Grantor Agency Form will be completed by the Comptroller's Office for all funds recording fiscal year activity that included transactions with other funds except as noted above. Interfund transactions must be reviewed to determine whether transactions represent internal reimbursements, third party reimbursements, payments for services, transfers or transfer-like activities. For guidelines on determining the proper categorization of interfund reimbursement,

interfund services provided or used or interfund transfer transactions, refer to SAMS Procedure 05.50.01. Transfer-like activity is a transaction between the primary government and a component unit, between component units or involving a fiduciary fund in which the activity is not a reimbursement for services provided.

All amounts reported on this form will be rounded to the nearest thousand. Where a line or column does not apply, it will be left blank. For Interfund Activity-Grantor Agency Forms completed electronically, this form will automatically calculate certain fields.

INSTRUCTIONS

Information reported on Form SCO-568 is generated by the Comptroller's Office from information reported on Form SCO-567. The agency must review the information reported on Form SCO-568 for accuracy and indicate the amounts reported agree to agency records. The Comptroller's Office should be notified of any material discrepancies between the amounts reported and agency records.

Mandatory transfers made during the fiscal year are reflected in the bottom section of the form. The amounts disbursed during the fiscal year should agree to the amount reported in the transfers-out account in the Agency Records (SCO-517, 522 or 527) or Balance per SAMS (SCO-512) column of the Trial Balance. Mandatory transfers must be categorized by transaction type; therefore, reclassification may be necessary. Mandatory transfers **must** be reviewed to determine whether transactions represent internal reimbursements, third party reimbursements, payments for services, transfers or transfer-like activities. Any accruals related to mandatory transfers must be reported on this form and standard journal entries should be recorded.

Interfund transactions meeting the transfer criteria and involving one or more agency funds require special reporting. SAMS Procedure 27.50.50 identifies mandatory transfers involving agency funds. These transactions should be reported on Form SCO-568 by the agency assigned responsibility. Special journal entries are required for these transactions since agency funds require a balance sheet only for financial reporting purposes (i.e., no transfers-in/out are recorded). If the agency fund is the grantee, the grantor must reclassify (SCO-547) the transfers made during the year to the appropriate expenditure (expense) report account (e.g., education, transportation, etc.). Accrual amounts should be posted as adjustments (SCO-548) impacting balance sheet accounts for the agency fund and both balance sheet and expenditure (expense) accounts for the grantor fund.

STANDARD JOURNAL ENTRIES

The purpose of the following entries is to record the various reclassifications and adjustments resulting from completion of this form. The entries identified below are based on the type of transaction. There are two general interfund activities reported on Form SCO-568. They are as follows:

1. Agency Activity
2. SAMS Mandatory Transfers

Within each of the two activities reported on Form SCO-568, there are five types of transactions. Those transaction types are as follows:

- Internal Reimbursements, (**Interfund reimbursement** transactions to other funds of the State or of the same component unit),
- Third Party Reimbursements (**Interfund reimbursement** transactions to other funds of the State in which the other fund is reimbursed through a grant or contract by a third party),
- Payments for Services (**Interfund service used**),
- Transfers (**Interfund transfers** between a primary government governmental or proprietary fund and a primary government governmental or proprietary fund or between a fund of a component unit and a fund of the same component unit) and
- Transfer-like (**Interfund transfers** between a primary government governmental, proprietary or fiduciary fund and a primary government fiduciary fund; a primary government governmental, proprietary or fiduciary fund and a component unit; or between a fund of a component unit and a fund of a different component unit which has the characteristics of a interfund transfer).

[GASB 34](#) requires these types of transactions to be recorded differently on each fund's trial balance based on the respective transaction type. See SAMS Procedure 05.50.01 for a definition of the bolded terms above. All entries shown assume a due to other funds scenario will result. If a due from other funds or a deferred revenue scenario results, see page 16 of these instructions for guidance.

CHANGES IN ASSETS AND LIABILITIES AGENCY FUNDS (SCO-576)

PURPOSE

The purpose of the Changes in Assets and Liabilities Agency Funds Form (Exhibit 27.20.76-A) is to provide the gross additions and deletions to balance sheet accounts for the current year.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Changes in Assets and Liabilities Agency Funds Form must be completed for all funds classified as an agency fund according to the Comptroller's Office. Refer to Summary of Agencies and Fund Classification (Procedure 27.50.10) to obtain fund classification.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Form SCO-576 is a reconciliation of beginning and ending balances for each asset and liability account. Amounts from the prior year trial balance should be used as the beginning of year balances. There are two approaches to calculating current year additions and deletions. The preferred approach is to report additions and deletions as gross amounts. This approach requires total activity in an account during the year to be accumulated and reported. If the gross amounts are not available, additions and deletions may be reported as net amounts. This approach requires prior year balances to be reported as deletions for the current year and current year balances to be reported as additions for the current year. However, at a minimum, the additions and deletions to cash and cash equivalents should agree to actual receipts, disbursements and transfers in and out. For treasury held funds, these amounts should agree to the SCO-534.

INVENTORY ANALYSIS (SCO-577)

PURPOSE

The purpose of the Inventory Analysis (Exhibit 27.20.77-A) is to determine the value of the agency's total inventory at fiscal year-end.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Inventory Analysis Form must be prepared for all proprietary funds, pension/investment/private purpose trust funds and component units. Governmental funds should submit Form SCO-577 to the Comptroller and include inventory on the balance sheet/statement of net assets (SCO-511 for shared funds, SCO-516 for nonshared funds or SCO-521 for locally held funds) only when inventory exceeds \$150,000.

The major categories to be used for inventory include:

- Equipment parts and accessories including automobile, truck, airplane, and equipment parts.
- Food supplies including inventories at commissaries and food centers, and food for free distribution.
- Gasoline, oil and lubricants.
- Paper and printing supplies, excluding normal office supplies.
- Road salt and sand.
- Wearing apparel, including clothing for inmates and residents.
- "Other", which includes material inventories not noted above (e.g., tools and chemicals). Identify all inventory types included in "Other."

All amounts on this form must be rounded to the nearest thousand.

INSTRUCTIONS

In accordance with accounting principles applicable to inventories, agencies must price inventory at the lower of cost or market. To determine the lower of cost or market, the following steps must be completed:

- Step 1: Determine the valuation method for each type of inventory. The methods required to be used for all State funds are either the FIFO (first-in, first-out) method or the average cost method. The FIFO method allocates costs to inventory on the assumption that goods are used in the order in which they are purchased. Under this method, the inventory is a build-up or layering of the most recent purchase costs. The Average Cost Method values inventories based on the average cost of the item purchased during the year. The Average Cost Method should only be used when it approximates the FIFO method.
- Step 2: Determine the cost of the inventory based on the valuation methods described above. Cost is defined as the price paid or the consideration given to acquire the inventory item. Included in the cost are all direct and indirect costs incurred during transportation.
- Step 3: Determine the market value of the inventory. Market value is defined as the item's current replacement cost by either purchase or reproduction. Exceptions to this definition are:
- The market value should not exceed the net realizable value (ceiling). The net realizable value is the estimated selling price of the inventory in the ordinary course of business, less reasonably predictable costs of completion and disposal. Example: obsolete and damaged material which, if stated at replacement cost, would result in an overstatement of inventory.
 - The market value should not be less than the net realizable value reduced by an allowance for an approximately normal profit margin. Example: selling price less a normal profit margin is more than the replacement cost.
- Step 4: Determine which is lower, cost or market, for each type of item. This amount will be recorded on the agency's trial balance to be submitted to the Comptroller's Office.

STANDARD JOURNAL ENTRIES

An adjusting entry is needed to record inventory as an asset for those agencies with inventoriable items. In addition, a reduction to the expenditure account charged with the original inventory

LOANS/NOTES RECEIVABLE (SCO-578)

PURPOSE

The purpose of the Loans/Notes Receivable Form (Exhibit 27.20.78-A) is to report the loans and/or notes receivable for each fund. Information will be needed for the amount of principal to be repaid within and after the State's availability period of 60 days (lapse period). Also, an allowance for the amount of doubtful collections of receivables, if any, should be allocated between current and noncurrent.

This form is to be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record, and one for the Auditor General or his representative.

GENERAL

Loans receivable are amounts that have been loaned to individuals or organizations external to a government, including notes taken as security for such loans. Notes receivable are unconditional written promises, signed by the maker, to pay a certain sum of money on demand or at a fixed or determinable future time, either to the bearer or to the order of a person designated therein.

INSTRUCTIONS

Information for the completion of this form can be obtained from the loan/note payment schedule contained in the loan/note agreement. The allowance for uncollectible loans and notes receivable can be determined either with an experience factor based on prior uncollectibles or a review of economic conditions and the current financial position of the borrower.

The range of interest rates and maturity dates are an integral part of required footnote disclosure and, therefore, must be completed for **each** category of loans and notes receivable.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

ANALYSIS OF DEPOSITS AND INVESTMENTS (SCO-579)

PURPOSE

The purpose of the Analysis of Deposits and Investments Form (Exhibit 27.20.79-A) is to disclose risk information about deposits and investments presented in the state-wide financial statements in accordance with GAAP.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Analysis of Deposits and Investments must be prepared by the State Treasurer and agencies maintaining deposits and/or investments outside the State Treasury.

Generally, investments should be reported at fair value on the balance sheet/statement of net assets, in accordance with GASB Statements 27 and 31, as amended by Statement 40. Fair value is the amount at which an investment could be exchanged in a current transaction between willing participants, other than in a forced or liquidation sale. Agencies may elect to report money market investments and certain short-term participating interest earning investment contracts at amortized cost. Money market investments are short-term highly liquid debt instruments including commercial paper, bankers acceptances, and U.S. Treasury and Agency obligations.

INSTRUCTIONS

Complete Form SCO-579, disclosing the requested information at June 30. Deposits include cash on deposit with financial institutions (excluding the State Treasurer held funds) and different types of cash equivalents held by financial institutions, such as money market accounts and certificates of deposits (short-term and long-term).

Bank balance refers to the actual amount of cash physically present in the bank at June 30. Deposits in-transit and outstanding checks are not included in the bank balance as they have not cleared the bank at June 30.

The reported amount of deposits and investments must agree to amounts reported on the balance sheet/statement of net assets.

Investments should be categorized according to risk, with certain exceptions, such as investment pools managed by other governments (Illinois Funds) or mutual funds. The Treasurer’s Office will provide a list of all agencies/funds that have money in Illinois Funds. These amounts should be reported on each investing agency’s SCO-579.

Additional Guidance

- The sum of amounts reported in the custodial credit risk categories for each deposit should agree to the bank balance. The Bank Balance may differ from the Book Balance due to in transit items.
- The sum of amounts reported in the custodial credit risk categories for each investment should agree to the Fair Value.

All amounts on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

CONTENTS

Refer to Exhibit 27.20.79-B.

COMPENSATED ABSENCES (SCO-580)

PURPOSE

The purpose of the Compensated Absences Form (Exhibit 27.20.80-A) is to gather information regarding compensated absences of governmental fund types in order to provide the appropriate disclosure in the statewide financial statements.

When applicable, this form must be prepared annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Compensated Absences Form should be completed for an agency's liability for its governmental funds related to employee services previously rendered where payments for such services is not dependent on a particular event (e.g., illness) that is outside the control of the State and the employee. Generally, the State of Illinois' liability for compensated absences will consist of vacation and other leave and sick leave earned by employees, but not taken. The accrual of this liability is subject to certain conditions. Since the conditions for vacations and other compensated absences are different from the conditions applying to sick leave, these two types of compensated absences are discussed separately below.

Vacation leave and other compensated leave, except sick leave, should be recorded as a liability when benefits are earned by the employee provided: (1) the right to receive the compensation is related to services already rendered **and** (2) the state will compensate employees for the benefit through paid time off or cash payments at separation or retirement. If the agency's policy is to pay employees for unused holiday and/or compensatory time at separation or retirement, this must be included as part of the vacation and other leave amount.

Sick leave should be recorded as a compensated absence when the benefit is earned, provided it is probable the employee will be compensated for the benefit through cash payments at separation or retirement. Pursuant to 30 ILCS 105/14a, only sick leave accumulated from January 1, 1984 through December 31, 1997 is eligible for compensation at 50%, through cash payments at separation or retirement. This calculation will be based upon the sick leave accumulated at the balance sheet date.

PROCEDURE	COMPENSATED ABSENCES (SCO-580)	REVISION NUMBER	
		06-001	

Another component of the liability for compensated absences for vacation and other leave and sick leave is an amount for salary related payments directly and incrementally associated with the payment of compensated absences. Salary related payments include the employer's share of social security taxes, medicare taxes and any other charge having a direct and incremental relationship with the compensated absence payment. Salary related payments should be accrued using the rates in effect at the balance sheet date. The current rates in effect for employer contributions are 6.2% for social security and 1.45% for medicare. Therefore, if social security and medicare contributions are applicable, the total employer FICA contribution rate is 7.65% of taxable wages. Computations will vary by employee since certain employees are not subject to social security and some employees will exceed the social security wage cap. Employer contributions for retirement should not be considered salary related costs because that liability is currently accounted for as part of the accrued retirement costs.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Compensated absences generally should be computed using the specific identification method. This can be accomplished by multiplying the actual number of vacation days or hours and other **vested** compensated absences for each employee by the employee's daily or hourly salary as of June 30. The employee's daily or hourly salary can be determined by dividing a computed yearly salary based on the June 30 payroll by 261 (daily) and dividing this by the number of hours accounted for by the agency's normal work day (in hours). Form SCO-580 applies to governmental fund types only. Compensated absences for employees paid from proprietary, pension/investment/private purpose trust funds or component units should be reported on Form SCO-540.

**COMPONENT UNIT TRIAL BALANCE-
BALANCE SHEET (SCO-581)**

PURPOSE

The purpose of the Component Unit Trial Balance-Balance Sheet (Exhibit 27.20.81-A) is to collect Component Unit balance sheet information at June 30 for inclusion in the State's Comprehensive Annual Financial Report.

When applicable, this trial balance must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the component unit: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

All information reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

Information needed to complete this form can be obtained from the component unit's balance sheet. Transactions between the component unit and URO's should be eliminated. Account numbers used on the component unit's balance sheet may differ from GAAP account numbers. Refer to the Chart of Accounts (SAMS Manual Procedure 27.50.20) for account numbers and descriptions. A draft copy of the component unit's financial statements and reconciliation to the SCO-581 should be submitted with this form.

A detailed explanation must be submitted for all account increases (decreases) equal to or greater than \$5,000,000 (\$5,000 rounded to the nearest thousand) from the prior year. The detailed explanations must be reported on Form SCO-510 (See SAMS 27.20.10).

**COMPONENT UNIT TRIAL BALANCE-
STATEMENT OF REVENUES, EXPENSES AND CHANGES IN NET ASSETS (SCO-582)**

PURPOSE

The purpose of the Component Unit Trial Balance-Statement of Revenues, Expenses and Changes in Net Assets (Exhibit 27.20.82-A) is to collect information for inclusion in the State's Comprehensive Annual Financial Report.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the component unit: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

All amounts reported on the statement must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

The information necessary to complete this form can be obtained from the component unit's records and/or financial statements. Transactions between the component unit and URO's should be eliminated. A draft copy of the component unit's financial statements and a reconciliation to the SCO-582 should be submitted with this form.

A detailed explanation must be submitted for all account increases (decreases) equal to or greater than \$5,000,000 (\$5,000 rounded to the nearest thousand) from the prior year. The detailed explanations must be reported on Form SCO-510 (See SAMS 27.20.10).

**COMPONENT UNIT SCHEDULE OF FOOTNOTE DISCLOSURE INFORMATION
(SCO-585)**

PURPOSE

The purpose of the Component Unit Schedule of Footnote Disclosure Information Form (Exhibit 27.20.85-A) is to collect all required footnote disclosure information to be reported in the State's Annual Financial Report.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the component unit: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Component Unit Schedule of Footnote Disclosure Information must be completed by all component units.

All amounts reported on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank. If more space is needed, attach additional pages clearly indicating to which section the attachment refers.

INSTRUCTIONS

The Leases-Lessee section of the SCO-585 can be completed using the Comptroller's lease reports and/or component unit records. The Certificates of Participation and Revenue Bonds Payable and Extraordinary Items, Special Items and Endowment Information sections can be completed using component unit records. Total future commitments for certificates of participation and revenue bonds reported by the component unit should agree to the principal and interest outstanding reported in the confirmation of the State's Annual Report of Bonded Indebtedness and Long Term Obligations.

PENSION (AND OTHER POSTEMPLOYMENT BENEFIT)/INVESTMENT/PRIVATE
PURPOSE TRUST FUNDS
STATEMENT OF NET ASSETS (SCO-594)

PURPOSE

The purpose of the Pension (and Other Postemployment Benefit)/Investment/Private Purpose Trust Funds Statement of Net Assets (Exhibit 27.20.94-A) is to collect the June 30 financial position information for pension (and other postemployment benefit)/investment/private purpose trust funds to be reported in the State's Comprehensive Annual Financial Report.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Pension (and Other Postemployment Benefit)/Investment/Private Purpose Trust Funds Statement of Net Assets should be completed by agencies with pension (and other postemployment benefit)/investment/private purpose trust funds according to the Comptroller's Office. All information reported should agree to amounts reported on the agency's financial statements if reported for a pension system. In addition, all agencies should complete Form SCO-565 to support the "due to" and "due from" primary government and component unit amounts reported on the SCO-594. State agencies are listed and classified as either primary government or component units in Procedure 27.50.10 of the SAMS Manual.

All amounts reported on this form must be rounded to the nearest thousand. Where a line does not apply, leave it blank.

INSTRUCTIONS

Amounts due from other State agencies should be reported in (10) and/or (11). Amounts due from other funds within the agency should be reported in (10).

PURPOSE

The purpose of the Pension (and Other Postemployment Benefit) Trust Funds Schedule of Footnote Disclosure Information Form (Exhibit 27.20.97-A) is to collect information necessary for disclosure in the footnotes to the State's Annual Financial Report as required by [Governmental Accounting Standards Board \(GASB\) Statement No. 27, Accounting for Pensions by State and Local Governmental Employers](#) and [GASB Statement No.45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pensions](#), and other financial statement disclosures.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Pension (and Other Postemployment Benefit) Trust Funds Schedule of Footnote Disclosure Information should be completed by all funds classified as pension (and other postemployment benefit) trust funds in the State's financial statements. To determine fund classification, refer to the Summary of Agencies and Fund Classifications (Procedure 27.50.10).

All amounts reported on the form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank.

INSTRUCTIONS

The reporting agency must fill out applicable amounts and provide summary policy statements as indicated. Additional pages may be attached, if necessary, and must indicate the official agency name and number on each additional page and provide information for which Form SCO-597 section it applies.

**CONTINGENCIES, COMMITMENTS AND RELATED
PARTY TRANSACTIONS (SCO-599)**

PURPOSE

The purpose of the Contingencies, Commitments, and Related Party Transactions Form (Exhibit 27.20.99-A) is to gather information regarding contingencies, commitments and related party transactions to provide appropriate disclosure in the state-wide financial statements in accordance with generally accepted accounting principles (GAAP).

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

GENERAL

The Contingencies, Commitments and Related Party Transactions Form should be completed for each agency of the State of Illinois. A contingency is an existing condition, situation or set of circumstances involving uncertainty as to possible gain (gain contingency) or loss (loss contingency) to the State that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset, reduction of a liability, loss or impairment of an asset or the incurrence of a liability.

The agency should report any significant contingencies of which they are aware. The information provided **must** include:

- The nature of the contingency, including whether the contingency is a gain or a loss.
- The probability that a loss contingency will result in a loss (probable, possible or remote).
- The estimated amount of gain or loss or the estimated range of gain or loss. The agency should accrue probable loss on contingencies in the appropriate year-end reporting package.

It should be noted that probable loss on contingencies that relate to a specific fund should be accrued in the appropriate GAAP reporting package by the agency.

Commitments relate to contracts or projects authorized, but are in the pre-contract stage or unobligated.

Related party transactions occur between the agency and an individual or other organization whose relationship with the agency is such that the transactions cannot be presumed to be carried out on an “arms length” basis. The nature of the relationship may preclude the requisite conditions necessary for competitive, free-market dealings. Examples of individuals with whom the agency may have a related party transaction include employees or governing board members. Examples of organizations with whom the agency may have a related party transaction include foundations or other affiliated organizations.

All amounts reported on this form must be rounded to the nearest thousand.

INSTRUCTIONS

Contingencies

The Comptroller’s Office intends to include a list of pending or threatened litigation as well as a list of unasserted claims or assessments in the letter of audit inquiry to the Office of the Attorney General for the purpose of ensuring a timely response from the Attorney General. If there is an unasserted claim or assessment management considers probable of assertion, and, if asserted, that claim or assessment would have at least a reasonable possibility of an unfavorable outcome, the assertion **must** be reported as a contingency. If there are no unasserted claims or assessments of which management is aware, that fact must be stated in the Contingency Section of the form.

If the agency believes there is a need to protect their client privilege rights, this information should be indicated so the Comptroller’s Office can take appropriate action.

Contingencies (e.g., grant audit and lawsuits), for purposes of disclosure on this form, should be reviewed by the agency GAAP coordinator and legal counsel before being approved by the agency director.

Commitments

Commitments that impair current funds and are either not subject to an appropriation signed into law after year-end or excluded from reported encumbrances should be included on Form SCO-599.

Related Party Transactions

Related party disclosures should include the following:

- The nature of the relationship involved.
- A description of the transactions, including transactions to which no amounts or nominal amounts were ascribed for the reporting period and such other information deemed necessary to provide an understanding of the effects of the transaction on the year-end reporting packages and financial statements.
- The dollar amount of transactions for the reporting period and the effects of any change in the method of establishing the terms from that used in the preceding period.
- Amounts due from or to related parties as of the end of the reporting period and, if not otherwise apparent, the terms and manner of settlement.

PROCEDURE SUMMARY OF AGENCIES AND
FUND CLASSIFICATIONS

REVISION NUMBER
08-002

Purpose

The purpose of the Summary of Agencies and Fund Classifications is to define the State of Illinois financial reporting entity. [Governmental Accounting Standards Board \(GASB\) Statement 14](#), "The Financial Reporting Entity" establishes the criteria to be used for defining the reporting entity. These criteria indicate that the reporting entity includes (1) the primary government, (2) agencies for which the primary government is financially accountable, and (3) other organizations which, if excluded from the reporting entity, would result in the financial statements being misleading or incomplete.

Under the GASB Statement 14 criteria, the **primary government** includes all organizations that are legally part of the reporting entity. In the table that begins on page 5, agencies that are part of the primary government of the State of Illinois will be designated with the letters "PG" in bold type immediately after the agency name. Statement 14 also establishes the classification of **component unit** for those organizations for which elected officials of the primary government are financially accountable or whose exclusion would make the financial statements misleading or incomplete. In the table that begins on page 5, component units will be designated with the letters "CU" in bold type immediately after the agency name.

FOOTNOTE REFERENCES

- A Agency is required to prepare and submit GAAP basis financial statements to the Comptroller's Office. (See SAMS Procedure 27.50.60). In addition, component units are required to file a GAAP package.
- B Agency is not part of the financial reporting entity for GAAP reporting purposes.
- C A complete list of Court of Claims funds for budgetary purposes can be found on Comptroller Report SE04. The funds listed here are for GAAP reporting purposes.
- D Form SCO-562 should be prepared providing information to the administering agency regarding interest accruals.
- E A GAAP package is not required for this fund. Information for this fund is included in another GAAP package for the agency.

**PREPARATION OF FINANCIAL STATEMENTS
IN ACCORDANCE WITH GENERALLY ACCEPTED
ACCOUNTING PRINCIPLES (GAAP)**

PURPOSE

The purpose of this procedure is to provide guidelines for the preparation and presentation of agency-level financial statements in accordance with GAAP. Currently, financial reporting literature exists (See SAMS Manual Procedure 3.10.10) which is applicable in most instances and should be utilized by agency personnel in drafting GAAP basis financial statements. The Governmental Accounting Standards Board (GASB) statements, codification, etc., provide adequate information in order to properly report most agency-level financial statement information. However, several financial reporting issues have not been addressed by the above mentioned authoritative literature when reporting shared funds in agency-level financial statements. This procedure recommends account titles for those accounts which are unique to shared funds presentations, along with defining certain accounts and recommending preferred placement in the financial statements.

These instructions will augment, using in some instances, the current Comptroller's GAAP compilation process to arrive at agency-level financial statements. However, since the reports are the responsibility of each agency's management, the presentations as well as the procedures to gather the information will be the decision of each agency.

It should be noted that this SAMS Procedure applies only to those primary government agencies which are currently being audited by the Office of the Auditor General (or his special assistant auditors) and required to prepare GAAP basis financial statements. Agencies required to prepare GAAP basis financial statements are referenced by footnote in Procedure 27.50.10.

Although the GAAP reporting process is similar, component units should not report shared funds as described below. Shared fund activity for a component unit should be shown as a nonshared fund. In addition, component units should only use reporting models prescribed by GASB and not the one shown in Exhibit 27.50.60-A and C.

GENERAL

Current year-end GAAP reporting procedures, forms and instructions (as set forth in SAMS Manual Chapter 27, with modifications for unique shared funds accounts discussed later) should provide the framework for the agency's GAAP basis financial statements. The threshold for reporting contingent liabilities and for disclosing other financial information will be significantly lower in the agency-level financial statements than in the State financial statements. Therefore, materiality levels for

appropriate footnote disclosures should be thoroughly examined by each agency because of the diverse variations in the dollar amounts to be reported by each State agency. In addition, an agency is required to provide the Auditor General or his representative a reconciliation of any differences between amounts reported in the agency-level financial statements and amounts reported in the Comptroller's annual GAAP reporting packages.

NONSHARED FUNDS PRESENTATIONS

Nonshared funds exist when one agency has responsibility for administering a fund. This classification includes all locally held funds, permanent funds, enterprise funds and internal service funds. The General fund accounts, special revenue funds, capital projects funds and debt service funds may be shared or nonshared. For GAAP reporting purposes, the agency administering a nonshared fund prepares a single reporting package reflecting the total activity of the fund. When preparing agency-level financial statements for a nonshared fund, balance sheet information (account titles, amounts, etc.) can be obtained from the GAAP package trial balance form for assets, liabilities and fund equity (SCO-516, 521 or 526). Operating statement information (account titles, amounts, etc.) can be obtained from the GAAP package trial balance form for revenues and expenditures/expenses (SCO-517, 522 or 527).

SHARED FUNDS PRESENTATIONS

Shared funds exist when more than one agency expends from and/or deposits receipts into a fund (e.g., the General Revenue Fund). For agency-level reporting purposes, a fund may be displayed as a nonshared fund if one agency is the major participant in the fund and other agencies activities are immaterial in relation to total fund activity. The footnotes should disclose the above situation, if applicable.

Current authoritative literature does not address reporting shared fund activity in agency-level financial statements. Some of the more common problems involved in presenting shared funds are addressed individually below with appropriate definitions and suggested procedures and the sources of financial statement accounts to derive proper amounts. Illustrations are presented where appropriate.

The Composition of Agency Fund Balances at Fiscal Year End

For shared funds, the fund balance consists of more than one agency's balance in the fund. Therefore, for agency-level financial reporting, the agency fund balance, should replace fund balance or fund equity to more appropriately display that this is not the entire fund balance.

SUB-SECTION	INPUT PROCEDURE	EFFECTIVE DATE July 15, 2002
PROCEDURE	PREPARATION OF FINANCIAL AGENCY FINANCIAL STATEMENTS IN ACCORDANCE WITH GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (GAAP)	REVISION NUMBER NEW

Agency fund balances at June 30 should equal: (1) the reserve for encumbrances (GAAP account 310 on Form SCO-511, Shared SAMS Funds Trial Balance for Assets, Liabilities and Fund Equity) plus (2) adjustments to other GAAP asset accounts (e.g., cash-in-transit, receivables, due from's, inventories, etc.) on Form SCO-511, reduced by (3) outstanding obligations for reappropriated accounts (net of liabilities for reappropriated accounts), but not less than zero and (4) liabilities payable from future years' appropriations, June 30. If there are liability adjustments which will never be paid in cash (e.g., deferred revenue), and/or lapse period appropriation refund credits which increase reserve for encumbrances on Form SCO-550, a corresponding debit to fund balance is necessary.

The reserve for encumbrances is calculated on Form SCO-550, Reserve for Encumbrances Computation. This computation is as follows: Lapse expenditures per Report SG05 plus lapse period appropriation credits, if any, plus liabilities from SAMS mandatory transfers, outstanding obligations for reappropriated accounts at June 30 and liabilities payable from future year's appropriations, if any, less total liabilities as computed on Form SCO-549, Summary of Liabilities.

Impact of Reappropriations to a Subsequent Fiscal Year

The final fund appropriations per SAMS records (i.e., SAMS extended Report SE04 for August or other appropriate SAMS accounting records) should be recorded in the appropriations from State resources on the operating statement. When current year appropriations are reappropriated to the subsequent fiscal year, the current year appropriations from State resources account should be reduced by the amount of the reappropriation to reflect the State's realignment of the budgetary needs to the subsequent year and avoid "double counting" a portion of the appropriation in more than one fiscal year.

When obligations for reappropriated accounts from Form SCO-549 contain amounts which are liabilities at June 30, the net change in liabilities from reappropriated accounts from the prior year to the current year must be reflected in the GAAP operating statement as a net change in liabilities for reappropriated accounts. Likewise, the liabilities payable from reappropriated accounts must be included in an asset account to properly reflect the substance of the agency shared fund balance at June 30, Current Year (CY). This can be accommodated by including the net change in unexpended appropriation.

Treatment of Revenue/Receipts by State Agencies

In order to account for and present the entire financial activity of the agency for the period and yet not display a large artificial agency fund balance, the receipts which an agency deposits into a shared fund must be reported as receipts/revenues and then deducted as an other sources (uses) of financial

resources. Receipts collected and transmitted to State treasury should be used for the other sources (uses) of financial resources account.

Presentation of Appropriations in Excess of a Fund's Available Cash

State law prohibits spending from a fund which does not have an adequate balance to cover a proposed expenditure - even though the appropriation authority exists. This deficiency in the fund will be reflected as lapsed appropriations. Lapsed appropriations which occur because of insufficient cash in the fund should be explained in the footnotes.

Unique Agency-Level Financial Statement Accounts For Shared Funds

Unexpended appropriation. This asset account is defined as lapse period warrants issued July-August per SAMS records (i.e., Comptroller's extended Report SE04 as of August or other appropriate SAMS reports) plus increase in liabilities for reappropriated accounts CY or minus a decrease in liabilities for reappropriated accounts CY, if any.

Reappropriation to future year(s). This contra revenue account reduces current year's appropriations by the amount of the reappropriation to reflect the State's realignment of the budgetary needs to the subsequent year and avoid double counting a portion of the appropriation in more than one fiscal year.

Net change in liabilities for reappropriated accounts. This account reflects the amount which should be added to or subtracted from the current year's appropriation for shared funds to reflect the increase or decrease from PY to CY for amounts included in obligations for reappropriated accounts on Form SCO-549 which are liabilities at June 30, PY and June 30, CY.

Appropriations from State resources. This other sources (uses) of financial resources account equals the final legally adopted appropriation per SAMS records (i.e., Comptroller's extended Report SE04 as of August or other appropriate SAMS reports).

Receipts collected and transmitted to State treasury. This other sources (uses) of financial resources account equals all receipts per SAMS (non-GAAP) except appropriations from State resources above from Balance per SAMS column on Form SCO-512. This account (non-GAAP) on the GAAP combined operating statement will agree to the budget and actual operating statement for a fund.

PROCEDURE	PREPARATION OF FINANCIAL AGENCY FINANCIAL STATEMENTS IN ACCORDANCE WITH GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (GAAP)	REVISION NUMBER NEW

NOTE: If prior year refunds per Comptroller's Report SG06 occur for shared funds, it is necessary to increase expenditures by an identical amount for agency-level reporting purposes.

Lapsed appropriations. Final legally adopted appropriation minus net warrants issued for the fourteen month period July-August per SAMS records (e.g., extended Report SE04 as of August).

INSTRUCTIONS

AGENCY-WIDE FINANCIAL STATEMENTS

Agencies required to prepare agency-wide financial statements that do not have activity in proprietary funds and have been assigned to only one function (see SAMS Procedure 11.50.50) have the option of using one of two reporting models. The first reporting model is a single statement presentation of both the agency-wide financial statements and the fund level financial statements (Exhibit 27.50.60-A and C). The adjustment column in this presentation displays the reconciliations between the statement of net assets and the governmental funds balance sheet and the statement of activities and the governmental funds statement of revenues, expenditures and changes in fund balances. The second reporting model is the basic reporting model prescribed by GASB Statement No. 34. Agencies with proprietary fund activity or have been assigned to more than one function must use the basic reporting model prescribed by GASB Statement No. 34.

NOTES TO THE FINANCIAL STATEMENTS (FOOTNOTES)

Footnotes must be comprehensive in scope and in accordance with current GAAP authoritative literature. Once footnotes have been drafted for an agency's initial report, the narrative information and amounts can be reviewed and updated for use in succeeding years' reports. The length and content of the footnotes will vary depending on an agency's activity and complexity, but certain disclosures apply to all agencies. Some of the more common footnotes necessary for the fair presentation of the financial statements follow.

Summary of Significant Accounting Principles and Policies. This footnote includes, but is not limited to, a description of the basis of presentation and the reporting entity (See Exhibit 27.50.60-G); a description of the funds and fund types used in the report; a description of the budgetary process; and a description of the accounting policies used in preparing the financial statements.

Disclosures Concerning Deposits and Investments. Governmental Accounting Standards Board [Statement No. 3](#), *Deposits with Financial Institutions, Investments (including Repurchase Agreements) and Reverse Repurchase Agreements*, requires certain disclosures that include classifying deposits and certain types of investments into risk categories. Further information related to GASB Statement No. 3 and its application can be obtained from SAMS Procedure 27.20.79 and from the Comptroller's Office. For locally held funds, the required information is presented on Form SCO-579, Analysis of Deposits and Investments. [GASB Statement No. 27](#), *Accounting for Pensions by State and Local Governmental Employers*, [GASB Statement No. 28](#), *Accounting and Financial Reporting for Securities Lending Transactions* and [GASB Statement No. 31](#), *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, also provide guidance on the valuation and disclosure of investments.

Disclosure of Interfund Receivable and Payable Amounts. The information for each fund necessary for "due from/to" footnote disclosure is presented on Form SCO-565, Interfund Payable/Receivable Analysis.

Capital Assets Balances and Changes in Capital Assets. The information for each proprietary fund and all governmental funds is presented by asset class and can be obtained from GAAP Form SCO-538, Capital Asset Summary.

Long-Term Obligations Balances and Changes in Long-Term Obligations. In most cases, information for this footnote is available from two sources. For compensated absences, Form SCO-580, Compensated Absences can be used. For capital leases, Comptroller provided schedules should normally be utilized.

Disclosures Concerning Future Lease Commitments. The required information must be presented for capital leases, installment purchases and operating leases and can be obtained from Comptroller provided lease schedules.

Retirement System(s). [Governmental Accounting Standards Board Statement No. 5](#), *Disclosures of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers*, [GASB Statement No. 25](#), *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, [GASB Statement 26](#), *Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans* and [GASB Statement No. 27](#), *Accounting for Pensions by State and Local Governmental Employers* require certain disclosures by State agencies issuing financial statements.

Disclosure of Significant Contingent Liabilities. The necessary information can be obtained from agency legal counsel and GAAP Form SCO-599, Contingencies, Commitments and Related Party Transactions.

The above listing is not all inclusive. As previously stated, materiality levels for appropriate footnote disclosures should be thoroughly examined by each agency because of the diverse variations in the dollar amounts to be reported by each State agency. A particular agency's activities may necessitate additional disclosures. For example, if an agency has taxes receivable, loans and notes receivable, or a material deficit fund balance, additional footnote disclosure would be required. In making any footnote disclosure, prudent judgment must be exercised and the materiality of the item taken into consideration. The Guide to Implementation of [GASB Statement 34](#) and Related Pronouncements lists the following as potential areas for disclosures:

- Accounting policies
- Bond, revenue and tax anticipation notes
- Claims and judgments
- Commitments and contingencies
- Conduit debt
- Deficit fund balances
- Demand bonds
- Deposits and investments
- Derivatives
- Designations
- Encumbrances
- External investment pools
- Interfund eliminations
- Nonexchange transactions that are not measurable
- Operating leases
- On-behalf payments
- Other postemployment benefits
- Pension plans and activities
- Related-party transactions
- Reporting entity considerations
- Repurchase and reverse repurchase agreements
- Securities lending
- Special assessments
- Termination benefits
- Violations of legal provisions

The Comptroller's Office can provide the necessary information and a model footnote to facilitate State agency disclosures in accordance with the GASB Statements.

REQUIRED SUPPLEMENTAL INFORMATION

The Comptroller's Office is not requiring agencies to prepare required supplemental information. Agencies that do not prepare required supplemental information in their agency financial statements should consult with the Office of the Auditor General for the effect of the opinion of the agency's agency-wide financial statements. For those agencies that want to prepare required supplemental information, a brief discussion is contained below.

Management's Discussion and Analysis. Management's discussion and analysis is an objective and easily readable analysis of the government's financial performance for the year. This analysis should provide users with the information they need to help them assess whether the government's financial position has improved or deteriorated as a result of the year's operations. [GASB Statement No. 34](#), paragraphs 8-11 provides a listing of items required to be presented in the management's discussion and analysis.

Budgetary Comparison Schedule for Major Governmental Funds. This is a comparison of the current budgetary year's original budget, final amended budget and actual amounts received and expended. For nonshared funds, the Comptroller's Office can provide individual fund reconciliations of budgetary excess or deficiency to GAAP excess or deficiency.

Reconciliation of Budgetary Excess or Deficiency to GAAP Excess or Deficiency Budget vs. GAAP. This is a reconciliation of the excess (deficiency) of revenues over expenditures and other sources (uses) of financial resources (budgetary basis) to the excess (deficiency) of revenues over expenditures/expenses and other sources (uses) of financial resources (GAAP basis) for major funds. The actual excess (deficiency) of revenues over expenditures and other sources (uses) of financial resources for major funds on the combined operating statement (Non-GAAP) must be reconciled to the GAAP basis excess (deficiency) in a footnote to the required supplemental information as follows:

Revenue adjustments. Current year (CY) GAAP revenue adjustments minus prior year (PY) GAAP revenue adjustments. (For shared funds, from Form SCO-512; nonshared Form SCO-517. Nonshared funds must add CY cash

on hand and in transit and PY cash on hand and in transit, if applicable, to both sides of the above calculation).

Expenditure adjustments. (PY GAAP expenditure adjustments plus PY encumbrances minus PY lapse period expenditures) minus (CY GAAP expenditure adjustments plus CY encumbrances minus CY lapse period expenditures). Note: Nonshared funds must add PY vouchers in transit and CY vouchers in transit to both sides of the above calculation.

PRESENTATION

For financial reporting purposes, the presentation of GAAP basis financial statements and notes should follow a logical progression. Agency-level financial statement information should normally be presented in this sequence:

- * Introductory Section. This includes the Table of Contents and any other information considered appropriate by management.
- * Financial Section. This section includes:
 1. The Auditor's Report
 2. Management's Discussion and Analysis
 3. The Agency-wide Financial Statements
 - (a) The Statement of Net Assets, and
 - (b) The Statement of Activities
 4. The Fund Financial Statements. Depending on an agency's activities, the Fund Financial Statements may include:

 7. Combining Statements/Schedules - by fund type - where an agency has more than one fund of a given fund type or in some instances, more than one fund type (e.g., private purpose trust and agency fiduciary funds). These statements should be presented by fund type and include all funds of a fund type not presented as major funds in the fund financial statements.

NOTE: Agencies that do not have activity in proprietary funds and have been assigned to only one function that chose to have a single statement presentation will display 1) a Statement of Net Assets and Governmental Funds Balance Sheet, 2) a Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Assets a Statement of Activities and Governmental Funds, 3) a Statement of Revenues, Expenditures and Changes in Fund Balances, 4) a Reconciliation of the

The above discussion is intended to provide guidance to agencies preparing GAAP basis financial statements. Some of the more common issues have been addressed in this procedure and suggestions have been made for presentation of agency-level information in the financial statements. As stated earlier, however, the statements are the responsibility of agency management and statement presentation preferences are the decision of agency management.

The GASB's Codification of Governmental Accounting and Financial Reporting Standards, GFOA's *Governmental Accounting, Auditing, and Financial Reporting* and other governmental accounting authoritative literature should be referred to as needed. The Comptroller's Office can also provide guidance as necessary.

State Agency
Reconciliation of Statements of Revenues, Expenditures and Changes in
Fund Balances of Governmental Funds to Statement of Activities
For the Year Ended June 30, 2002

Exhibit 27.50.60-D
(03-002)

Net change in fund balances (25,000)

Amounts reported for governmental activities in the Statement of Activities are different because:

Governmental funds report capital outlays as expenditures while governmental activities report depreciation expense to allocate those expenditures over the life of the assets. This is the amount by which depreciation exceeded capital outlays in the current period. (25,000)

Some capital additions were financed through capital leases. In governmental funds, a capital lease arrangement is considered a source of financing, but in the Statement of Net Assets the lease obligation is reported as a liability. (25,000)

Some capital additions were financed through certificates of participation. In governmental funds, a certificate of participation arrangement is considered a source of financing, but in the Statement of Net Assets the certificate of participation obligation is reported as a liability. (25,000)

Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds. 5,000

Prepaid expenses in the Statement of Net Assets are not reported as expenses in the funds. 5,000

Repayment of principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Assets. 250,000

Receipt of bond proceeds is a current financial resources in the governmental funds, but an obligation in the Statement of Net Assets (100,000)

Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. These activities consist of:

Increase in compensated absences (5,000)

Increase in claims and judgments

Increase in accrued interest (2,000)

Some assets were transferred in from other State agencies and therefore, were received by the agency at no cost. -

Some long-term debt obligations of the agency are not displayed on the agency's Statement of Net Assets due to an unavailable allocation method of certain State bonds. (125,000)

Change in net assets of governmental activities (72,000)

The accompanying notes of the financial statements are an integral part of this statement.

STATE OF ILLINOIS
STATE AGENCY
NOTES TO THE FINANCIAL STATEMENTS

Year Ended June 30, 2002

1. ORGANIZATION AND FUNCTIONS

The State Agency (the Agency) was created by and act of the General Assembly (XX ILCS XXX) in 19XX.

The Agency is organized to provide for (purpose of Agency). The Agency is organized into XX departments to carry out its responsibilities.

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES

a. Basis of Presentation (For an Agency Presenting Government-wide Financial Statements)

The accompanying financial statements of the Agency have been prepared in conformity with generally accepted accounting principles ("GAAP") as prescribed in pronouncements issued by the Governmental Accounting Standards Board ("GASB").

a. Basis of Presentation (For Agency Preparing Nonshared Funds Financial Statements)

The accompanying financial statements of the Agency present only the nonshared funds of the Department and are not intended to present fairly the financial position and results of operations of the Department in conformity with generally accepted accounting principles ("GAAP") as prescribed in pronouncements issued by the Governmental Accounting Standards Board ("GASB").

b. Financial Reporting Entity

As described in the Illinois Comprehensive Annual Financial Report, the State of Illinois is the oversight unit which includes all funds for all elected offices, departments and agencies of the State, as well as boards, commissions, authorities, and universities for which the State is considered financially accountable and over which the State's executive and legislative branches exercise oversight responsibility. Oversight responsibility is defined to include, but is not limited to, the following considerations: financial interdependence, selection of governing authority, designation of management, ability to significantly influence operations, accountability for fiscal matters, the scope of an organization's public service, and/or special financing relationships.

Based on the above definition, the Agency has been determined to be part of the primary government of the State of Illinois, the financial reporting entity. The accompanying financial statements present the financial position and results of operations of all the funds which comprise the Office.

c. Statement Presentation (For An Agency Using Single Statement Presentation)

The government-wide financial statements (i.e., the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the Agency. Separate financial statements are provided for the Agency's fiduciary funds. The effect of the Department's interfund activity has been removed from the government-wide statements.

For the primary government, governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. As the Agency only supports the governmental activities of the primary government, the government-wide statements display governmental activities only.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include both charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as general revenues. As all of the Agency's activities are classified as part of the general government function of the primary government, all direct expenses and program revenues of the Agency are considered one function.

Since the government-wide financial statements of the Agency reflect only the general government function of governmental activities of the primary government the following government-wide financial statements and fund financial statements have been presented together:

<u>Government-wide</u> <u>Financial Statements</u>	<u>Fund</u> <u>Financial Statements</u>
Statement of Net Assets	Governmental Funds Balance Sheet
Statement of Activities	Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances

An adjustments column has been included to display the relationship between the two statements. With the exception of net assets in the government-wide financial statements and fund balance in the fund financial statements, the adjustments column

A separate statement of fiduciary net assets and statement of changes in fiduciary net assets has been presented to display the Agency's fiduciary activity. This activity is not a part of the government-wide statements.

c. Statement Presentation (For An Agency Using [GASB Statement No. 34](#) Presentation)

The accompanying financial statements of the Agency have been prepared in conformity with generally accepted accounting principles ("GAAP") as prescribed in pronouncements issued by the Governmental Accounting Standards Board ("GASB").

The government-wide financial statements (i.e., the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the Agency. Separate financials statements of provided for the Agency's fiduciary funds. The effect of the Department's interfund activity has been removed from the government-wide statements.

For the primary government, governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include both charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental and major individual proprietary funds are reported as separate columns in the fund financial statements with nonmajor funds being combined into a single column.

c. Statement Presentation (For An Agency Presenting only Nonshared Funds)

The combined balance sheet, statement of revenues, expenses and changes in fund balance, statement of revenues, expenses and changes in net assets and statement of cash flows report information on all of the nonshared funds activities of the Agency.

INTRODUCTION

GENERAL

State property consists of land, land improvements, site improvements, buildings, building improvements and equipment. Equipment is defined in section 5010.200 of the Illinois Administrative Code (Title 44, Subtitle D, Chapter I, Part 5010, Subpart B). Other categories of State property are defined in 03.30.10 of the SAMS Manual.

The State Property Reporting System has two major functions. It provides current statewide information applicable to property held by or on behalf of the State and ensures that agencies update property records, as necessary, to reflect the current balance of State property. It also enhances the accuracy of the statewide information reported by the agencies and the Comptroller.

The objective of this reporting process is to maintain current property information at a summary level. The reporting of detailed property information to the Comptroller at the transaction or individual property item level (except capital lease acquisitions) is not required at this time. This detailed information is to be maintained and made available to the Comptroller upon request.

DETAIL RECORD KEEPING

Although agencies are required to report to the Comptroller on the summary level, supporting detail records must be maintained. Such detail records are to be organized by major asset category and include the following information for each asset: (1) Cost (or other value); (2) function and activity; (3) reference to acquisition source document; (4) acquisition date and date placed in service; (5) name and address of vendor; (6) short description of asset; (7) organization unit charged with custody; (8) location; (9) fund and account from which the item was purchased; (10) method of acquisition; (11) estimated useful life; (12) estimated salvage value; (13) date, method and authorization of disposition; (14) tag number; (15) accumulated depreciation; (16) depreciation method; (17) depreciation convention; and (18) insured value (if applicable). This list is not exhaustive. An agency may include additional information for its own needs. Items of a nominal value may be excluded from the detail records; however, listings of the items are to be maintained for internal accountability purposes. For example, a list of nominal value items might indicate a description of the item, its location, and quantity.

REPORTING TO THE DEPARTMENT OF CENTRAL MANAGEMENT SERVICES

The State Property Control Act ([30 ILCS 605](#)) describes an agency's reporting responsibilities to the Department of Central Management Services (CMS). CMS is required to keep a master record of real property (e.g., land, buildings, etc.). Therefore, agencies are required to report to CMS any changes, additions, deletions, or other transactions affecting real property on a monthly basis. Forms will be furnished by CMS.

Agencies must also maintain a permanent record of all property. A listing of the permanent record is required to be submitted to CMS annually in a format prescribed by CMS. Annual or even more frequent inventories may be required by CMS. Detail reporting requirements will be transmitted to agencies by CMS.

SYSTEM CYCLE

The system cycle begins at the agency level with the preparation of the "Agency Report of State Property" (Form C-15). When the report is completed, it is submitted to the agency official responsible for approving it. After the official has reviewed and signed the report, it is submitted to the Office of the Comptroller for processing.

Purchased assets should generally be included on the "Agency Report of State Property" in the quarter the assets were received. Capital lease assets are to be included on the report for the quarter in which the lease was executed. Because capital lease assets include an interest component, their costs will be calculated for all State agencies by the Comptroller's Office. The Comptroller's Office will transmit information on the cost of each capital lease asset to the agency in a timely manner, allowing the cost to be included in the appropriate quarterly report.

Upon receiving the report from the agency, the Comptroller's Office will review it for completion of all data elements, clerical accuracy and reasonableness.

After determining that the information reported is ready for processing, it will be entered in the State Property Reporting system. The data will be used for reporting purposes and for responding to inquiries by the general public and other users of statewide State property information.

DOCUMENT DESCRIPTION

The “Agency Report of State Property” is for the reporting by State agencies of State property information classified by major category. The report also reconciles the beginning balance of State property by category, per agency records, to the ending balance of State property by category, per agency records. It is used in preparing the Statewide Report of State Property. Its primary data elements are the major categories of State property, their related costs, the beginning balances for the quarter, the additions for the quarter, the deductions for the quarter, net transfers for the quarter and the ending balance for the quarter.

PROCEDURES FOR ANNUAL ASSET COUNT AND INSPECTION

Each State agency should conduct an inventory of its assets on an annual basis in order to support the existence and accuracy of amounts reported. The inventory should include all capital assets meeting the requirements for capitalization in Procedure 03.30.30, Capitalization, as well as any additional assets meeting the requirements identified in [Section 5010.460](#) of the Department of Central Management Services’ Property Control Regulations. Agency management should take into consideration the number of assets to be counted and the location of the assets when determining the timing of the count.

Procedures to be followed in conducting an inventory depend on the category of the asset:

Moveable Assets

A physical inspection and count should be conducted of all moveable assets (e.g., equipment and works of art) to ensure the Agency’s asset records are complete and accurate.

Immovable Assets

Agencies will need to determine if it is practical to physically count immovable assets, e.g., infrastructure, land, land improvements, site improvements, buildings and building improvements. At a minimum, agencies should ensure the listing of immovable assets is complete, accurate and supported by underlying documentation of ownership (e.g., certificate of title or deed).

Assets that are obsolete, damaged or no longer used in operations should be identified and, if necessary, removed from the agency’s asset records. The asset records should be reconciled to the results of the inventory and updated accordingly.

STATUTE REFERENCE

The State Comptroller Act ([15 ILCS 405/17](#)) states that:

"The Comptroller shall maintain current inventory records of all property held by or on behalf of the State or any State agency, which may be copies of the official inventory control records maintained by State agencies or summaries thereof. The Department of Central Management Services and each other State agency so holding such property shall report to the Comptroller, on forms prescribed by the Comptroller, all property acquired or disposed of by that agency, in such detail and at such times as the Comptroller requires, by rule, to maintain accurate, current inventory records. The Department of Central Management Services shall transmit to the Comptroller a certified copy of all reports it may issue concerning State property, including its annual report."

As a result of this mandate, the State Property Reporting System was developed to provide a current summary of statewide State property information.

PROPERTY CONTROL OBJECTIVES

PROPERTY CONTROL REQUIREMENT

Property control procedures are required by section 3001 of the Fiscal Control and Internal Auditing Act (**30 ILCS 10/3001**). With respect to property control, the aforementioned statute requires that, “All State agencies shall establish and maintain a system, or systems, of internal fiscal and administrative controls, which shall provide assurance that:

...(3) funds, property, and other assets and resources are safeguarded against waste, loss, unauthorized use, and misappropriation.”

PROPERTY CONTROL OBJECTIVES

The objectives of property control include operational objectives of good stewardship and preservation of assets to minimize the burden placed on State government to replace lost, stolen or damaged property. Property control procedures include physical inspection and recording the existence of inspected property items, adjustment of property control records and reporting the results of the annual survey to the Comptroller’s Office, as required by SAMS. Property control procedures are generally designed to prevent or, at least, promptly detect loss or damage to property.

Agencies of the State of Illinois should distinguish between property control objectives described in Chapter 29 and financial reporting objectives described in Chapters 3 and 27.

Financial reporting objectives include providing support for the underlying assertions of management in the State’s financial statements, including assertions of existence or occurrence, completeness, rights and obligations, valuation or allocation and presentation and disclosure. In other words, management asserts that the assets reported actually exist and the transactions reported actually occurred and were recorded in the proper period. They also assert that assets are rights, liabilities are obligations and neither are materially misstated in light of the accounting principles used. Finally, the presentation and disclosure assertion gives support that items reported are properly described and classified.

PROCEDURE PROPERTY CONTROL OBJECTIVES

REVISION NUMBER

NEW

The objectives of financial reporting and property control are in some ways overlapping or complementary. However, controls designed to prevent or promptly detect a loss of a small value asset, while important operationally, are not relevant for financial reporting, which is primarily concerned with the dollar values of the assets. For financial reporting purposes, managers weigh the costs of reporting small-dollar assets with the benefits derived from reporting them. For example, the costs associated with calculating, recording, reporting and maintaining depreciation records for small value assets significantly exceed the corresponding value of the benefits. Therefore, the State has adopted much higher asset capitalization thresholds for financial reporting than for property control reporting.

STATEMENT OF GENERAL POLICY

"AGENCY REPORT OF STATE PROPERTY" (FORM C-15)

As mentioned previously, this report provides information at a summary level. When properly completed, it should present the total cost of State property, by category, reflected on the agency's records as of the reporting date and reconcile the beginning balance of State property to the ending balance.

In order to facilitate the consistent preparation of this report for transactions of a similar nature, the following guidelines should be followed:

I. Donated Property

Land, buildings, equipment and/or other State property received as a gift or donation should be recorded in the agency's records at their fair market value at time of donation. The fair market value is generally established by an appraisal performed by a qualified appraiser.

II. Lease Property

Capital Lease Property, is property which meets one of the four criteria for classifying as a capital lease (see Procedure 03.50.60). These leases should be capitalized and recorded as an asset of the leasing State agency. This property must also be reflected on the "Agency Report of State Property" at a cost determined by the Comptroller's Office.

By using the following procedure, an agency will facilitate the recording of capital lease property at the correct cost. For every Contract Obligation Document (C-23) which cites type code 38 or 39, and some which cite type code 31, agencies must submit to the Comptroller's Office a completed SCO-560 (Accounting for Leases-Lessee). These forms should be sent to the Financial Reporting Department of the Comptroller's Office. The SCO-560 will enable the Comptroller's Office to determine if the lease agreement is a capital lease and, if so, to determine the asset's basis. This information will be provided to agencies on a timely basis so that it can be included in the "Agency Report of State Property" in the "Capital Lease Assets" section.

III. Installment Purchase Property

The value of property acquired by the installment purchase method is calculated by the Comptroller's Office in the same manner as leased property. All installment purchase transactions that have a transaction code of 38 or 39 on their Contract Obligation Document, an SCO-560 must be sent to the Financial Reporting Department of the Comptroller's Office at the time the Contract Obligation Document is submitted to the Obligations Unit. The Comptroller's Office will then inform the agency of the proper cost of the asset to be recorded in their records in a timely manner. When an agency is informed of the cost, this amount must be treated as an addition to the appropriate category of State property (i.e., buildings and building improvements, equipment, etc.). Installment purchase assets are **not** to be placed in the capital lease category, even though the asset cost is calculated in the same manner.

IV. Capital Development Board (CDB) Activity

A. Construction in Progress

The cost of projects involving the construction of assets or major remodeling, renovation and rehabilitation projects (as defined by the CDB) which are funded by direct appropriations to the CDB will be reported by the CDB as "Construction in Progress" (CIP) on their "Agency Report of State Property" until the CDB determines the project to be "substantially complete" (i.e., ready for its intended use). At the time the project is substantially complete, the CDB will complete the CDB Agency Turnover Report to transfer the project cost to the agency. The agency is then responsible for recording the capital asset on their books and records.

Remodeling, renovation and rehabilitation projects that are not classified as "major" by the CDB will not be accounted for as CIP. Costs associated with these projects will be transferred to the agencies on a quarterly basis, through the use of the "CDB Agency Turnover Report." These costs will be classified as Non-CIP costs. At the time of the transfer, these costs should be recorded by the agency in their capital asset records as a repair and maintenance cost for that period. The guidance for distinguishing between repairs and maintenance and capital items is provided in SAMS 03.30.10.

B. Completed Projects

When a project which is being accounted for as construction in progress by the CDB is substantially complete (i.e., ready for its intended use), the CDB will remove these costs from its construction in progress account. The CDB removes costs from construction in progress quarterly and notifies agencies, through the use of the "CDB Agency Turnover Report," of the costs to be recorded on their books. The agency for which the project was undertaken should record the cost of the project in the applicable asset category.

C. Capital Development Board Durable, Moveable Equipment

When an agency receives durable, moveable equipment purchased by the Capital Development Board, the equipment should be recorded on the agency's property records as the equipment is received, and the equipment should be reported on the Agency Report of State Property in the period during which the equipment's cost is transferred from the CDB. If problems are encountered with the transfer report, please contact the CDB.

V. Non-CDB Construction in Progress

Agencies that have construction in progress which is funded by direct appropriations to them should report the construction in progress costs as "Construction in progress" on their "Agency Report of State Property." This is true even though the Capital Development Board may be administering the project.

Exhibit 29.20.10-A illustrates a blank form with the reference numbers on it. Exhibit 29.20.10-B illustrates a properly completed "Agency Report of State Property." NOTE: A single Form C-15 should be prepared for all of an agency's governmental funds, while a separate Form C-15 should be prepared for each proprietary and fiduciary fund. In addition, a single Form C-15 should be prepared by each university. *All amounts should be rounded to the nearest dollar.

GENERAL INFORMATION

- (1) Print or type the name of the agency, board, commission, university office, etc.
- (2) Enter the 3-digit Comptroller assigned agency number. Refer to Section 11 - Expenditure Authority (Procedure 11.50.40) for a complete listing of agency names and numbers.
- (3) Enter the official fund name for proprietary and fiduciary funds.
- (4) Enter the 4-digit Comptroller assigned fund number.
- (5) Enter the last day of the reporting period. For example, December 31, 2001 would be .

ACCOUNT INFORMATION

Instructions (6) through (12) apply to the cost of land and land improvements, site improvements, buildings and building improvements, equipment, capital lease assets and construction in progress reflected on the reporting agency's records as of the end of the last quarter reported. Cost refers to the historical cost of the assets. Assets should **not** be reported net of depreciation.

The cost of land, land improvements, site improvements, buildings and equipment should include the agency's cost of completed and substantially completed (i.e., ready for its intended use) facilities whether constructed or acquired by the Capital Development Board or the agency. Form C-15 makes a distinction between capital lease assets and other types of assets. Other types of assets include those equipment items, buildings and building improvements **not** currently being acquired through a capital lease arrangement. Capital lease assets are acquired through a capital lease arrangement and are to be reflected on Form C-15 at the amount specified by the Comptroller's Office. The Comptroller's Office will determine which multiple-year leases are capital leases. If a multiple-year lease is determined to be a capital lease, the Comptroller's Office will specify the appropriate asset value. Therefore, each new multiple-year lease entered into by the agency will have to be reported to the Comptroller's Office on Form SCO-560. The SCO-560 must be completed and submitted to the Financial Reporting Department of the Comptroller's Office for each multiple-year lease at the time the Contract Obligation Document (C-23) is filed with the Obligations Unit. However, agencies who administer proprietary funds (including all universities) do not have to report on Form SCO-560 if the agency uses their own lease calculating system and the agency reports this information on Form SCO-535, Proprietary Fund Schedule of Footnote Disclosure Information or Form SCO-585, University Schedule of Footnote Disclosure Information. Once SCO-560 form has been submitted, the Comptroller's Office will provide the correct reporting amount to the agency as soon as the determination is made.

- (6) Enter the previous quarter's "Amount Per Agency Records" balance for land and land improvements.
- (7) Enter the previous quarter's "Amount Per Agency Records" balance for site improvements.
- (8) Enter the previous quarter's "Amount Per Agency Records" balance for buildings and building improvements.
- (9) Enter the previous quarter's "Amount Per Agency Records" balance for equipment.
- (10) Enter the previous quarter's "Amount Per Agency Records" balance for buildings and building improvements that have been determined to be capital lease assets. The Comptroller's Office will determine whether an asset is a capital lease asset by reviewing the SCO-560 form submitted by the agency.
- (11) Enter the previous quarter's "Amount Per Agency Records" balance for equipment items that have been determined to be capital lease assets. The Comptroller's Office will determine whether an asset is a capital lease asset by reviewing the SCO-560 form submitted by the agency.

- (12) Enter the previous quarter's "Amount Per Agency Records" balance for construction in progress. (See SAMS Procedure 29.10.30 for construction in progress reporting requirements.)
- (13) Sum amounts reported in (6) thru (12) and enter the result.
- (14) Enter, on the appropriate line, all additions to each asset category that occurred during the quarter being reported. This does not include transfers-in. Additions are new purchases, new capital lease items, property donated to the State and acquisitions related to prior years not previously reported. Note: Addition amounts related to prior years' acquisitions should also be separately identified on line (28).
- (15) Enter, on the appropriate line, all deletions to each asset category that occurred during the quarter being reported. This does not include transfers-out. Deductions include reductions, corrections of prior year errors and unplanned terminations of capital lease assets. Reductions can include inventory adjustments down and sales or retirements. The majority of corrections are adjustments for prior year errors and material deletions. Note: All corrections must be footnoted. Unplanned terminations of capital lease assets are leases terminated at any time prior to the normal expiration of the specified lease term. If deductions result in a positive amount, they are to be shown in brackets.
- (16) Enter, on the appropriate line, the net amount of transfers in/out that occurred during the quarter being reported. If the balance of net transfers is negative, it must be shown in brackets. Transfers refer to items that have either been moved between agencies (e.g. Capital Development Board construction, Central Management Services surplus property) or within an agency between property categories. For example, when payment on a capital lease is complete and ownership of the asset acquired, the cost must be transferred out of the Capital Lease Asset category and transferred into the appropriate asset category. Also, items reported the previous quarter as "Transfers in from CDB" (18) must be included in the current quarter as "Net Transfers" in the appropriate asset category. Because these items were not part of the "Amount Per Agency Records" for the previous quarter, they were not included in the current quarter's beginning balance, and they need to be accounted for in the agency's records.
- (17) For each asset category, subtract (15) from the sum of the appropriate beginning balance (6-12), (14), and (16) and enter the result.

- (18) Enter, on the appropriate line, the amount of transfers-in from the Capital Development Board (CDB), if any. The amount to be recorded is the amount received from the CDB on the "CDB Agency Turnover Report" for the current quarter. Amounts on the "CDB Agency Turnover Report" are not to be reported as construction in progress, but in the categories designated by CDB. CDB will provide two copies of the "CDB Agency Turnover Report" to the agency when property is transferred. One copy of this document must be attached to the C-15 filed with the Comptroller to support the "Transfers-in from CDB" amount. Note: Because the previous quarter's "Transfers-in from CDB" amount was not included in the "Amount Per Agency Records", it must be included as "Net Transfers" on the current quarter's C-15. (See reference #16 above)
- (19) Enter, on the appropriate line, those items which were transferred from CDB that are not capitalized, if any, (e.g., repair and maintenance, equipment items previously added to inventory) by the reporting agency.
- (20) For each asset category, subtract (19) from the sum of (17) and (18) and enter the result.
- (21) Add all amounts in (14) and enter the result.
- (22) Add all amounts in (15) and enter the result.
- (23) Add all amounts in (16) and enter the result.
- (24) Add all amounts in (17) and enter the result. This should also equal the result of (13) plus (21) minus (22) plus/minus (23).
- (25) Add all amounts in (18) and enter the result.
- (26) Add all amounts in (19) and enter the result.
- (27) Add all amounts in (20) and enter the result. This should also equal the result of (24) plus (25) less (26).
- (28) Enter additions related to prior period acquisitions not previously reported.
- (29) Enter the name(s) of the State agency(s) involved in the asset transfer(s) reported in "Net Transfers". (See reference #16 above)

INTRODUCTION

The bonded indebtedness system is designed to provide statewide financial information concerning general and special obligation and revenue bonds issued by the State and State agencies. The above bond classifications include the following types of indebtedness:

- * general obligation bonds - bonds secured by a pledge of the full faith and credit of the State

- * special obligation bonds - bonds secured by a pledge of dedicated portions of the State's resources (e.g. sales tax, horse racing privilege tax)

- * revenue bonds issued by State agencies or authorities- bonds secured by a pledge of income from assets constructed or acquired

- * revenue bonds issued on behalf of State agencies by units of local government

- * certificates of participation

State agencies are required under Section 218 of the Comptroller Act to submit bond issues information to the Comptroller's Office. This section of the SAMS Manual indicates the procedures to be followed by State agencies in reporting new bond issues to the Comptroller, including the reporting of periodic transactions involving redemption of principal and payment of interest.

Upon receiving the reports from State agencies, the Comptroller's Office will review them for completion of all data elements and record the information as required by law. The Comptroller's Office will issue an annual report prepared from the recorded information.

STATUTE REFERENCE

Chapter 15, Section 218, of the Illinois Revised Statutes, 1973, states that ([15 ILCS 405/18](#)):

"The comptroller shall maintain current records indicating the outstanding bonded indebtedness of the State and of all State agencies, setting out the State agency incurring the indebtedness, whether general obligation or revenue bonds, the amount of the outstanding indebtedness, maturity schedules, interest rates and such other information as may be required for professional, accurate and current accounting. The treasurer of the State of Illinois shall report to the comptroller each month changes in such outstanding general obligation bonded indebtedness. The comptroller shall maintain similar current records on the amount authorized indebtedness on which debt has not been incurred."

The Bonded Indebtedness System was developed as a means for the State agencies to notify the Comptroller of new bond issues and to provide the capability of maintaining records pertaining to the outstanding bonded indebtedness of all State agencies.

PROCEDURE	ESTABLISHING NEW BOND ISSUES ON THE COMPTROLLER'S RECORDS	REVISION NUMBER 05-001

ESTABLISHING NEW BOND ISSUES ON THE COMPTROLLER'S RECORDS

The Comptroller's Office is required to maintain current records of the outstanding general and special obligation bonded indebtedness of the State. To meet this requirement, the Comptroller's Office must receive the following specific information for each new bond issue from the Governor's Office of Management and Budget.

1. A copy of the bond resolution/order.
2. A copy of the official bid awarded, if applicable.
3. A copy of the prospectus/official statement and, where applicable,
4. A copy of the Notice of Sale.
5. For refunding bond issues only, information showing arithmetic and economic gains and/or losses, must be attached. This information is available from the issuing agency's bond council.

Upon receiving the preceding information, the Comptroller and Treasurer must then compute a maturity schedule for each new issue.

All required information should be sent to the following address:

TRANSACTION REPORTING - PERIODIC PAYMENT OF
PRINCIPAL AND INTEREST

The Treasurer will be responsible for all transaction reporting concerning general obligation bonds. The trustee, appointed by the Governor's Office of Management and Budget, of the special obligation bond accounts will be responsible for the applicable transaction reporting.

Transaction reporting is concerned only with redemption of principal and/or payment of interest. Form C-08, "Notice of Payment of Bond Interest and/or Principal" (Exhibit 31.30.20-A), is to be used for the reporting of both types of transactions. When reporting payments for more than one bond issue, a separate form must be submitted for each bond issue. The form should be prepared and submitted by the Treasurer on the date that the voucher is processed for payment. In lieu of Form C-08, the Treasurer may submit a copy of the debt service voucher with an attached list of the bond issues for which payment is requested. Forms and schedules may also be scanned and transmitted to the Illinois Office of the Comptroller at: bondpayments@mail.ioc.state.il.us.

Early redemption of principal should be reported on the form "Notice of Payment of Bond Interest and/or Principal" and an adjusted "Bond Interest and Redemption Schedule" (C-05) should be attached to the form.

All forms and schedules should be sent to the following address:

The Comptroller's Office is also required to maintain current records of the outstanding Revenue Bonded Indebtedness of all State agencies. To perform this function, the Comptroller's Office must receive specific information concerning new bond issues. Any agency having a new bond issue must submit to the Comptroller's Office the following data within 30 days subsequent to the closing date or beginning date of the borrowing, whichever is later, unless supplementary procedures have been issued by the Comptroller's Office:

1. A copy of the Prospectus/Official Statement.
2. A copy of the Notice of Sale, where available.
3. A completed Form C-05 "Bond Interest and Redemption Schedule" (Exhibit 31.30.10-A).
4. For refunding bonds only, completed Form C-31, or equivalent information as provided by issuing agency's bond counsel.

The preceding documents should be sent to the following address:

TRANSACTION REPORTING - PERIODIC PAYMENT OF
PRINCIPAL AND INTEREST

GENERAL INFORMATION

Transaction reporting is required where there is a redemption of principal and payment of interest. A single form C-08, "Notice of Payment of Bond Interest and/or Principal" (Exhibit 31.30.20-A) is to be used for the reporting of both types of transactions. For those Agencies who are the "paying agent" to bond owners, a form C-08 should be prepared and submitted within 30 days from the date that the voucher is processed for payment by the agency. However, for agencies who utilize trustees as their "paying agent", a form C-08 should be prepared and submitted within 15 days of the agency's receipt of the trustee's monthly statement. To assist agencies which utilize trustees, a provision should be included in the trustee's contracts which require them to send to the Comptroller's Office the Notice of Payments directly when payments are made. Forms and schedules may also be scanned and transmitted to the Illinois Office of the Comptroller at: bondpayments@mail.ioc.state.il.us.

Early redemption involving the payment of a premium by the issuing agency must be reported on the form "Notice of Payment of Bond Interest and/or Principal." The amount of premium paid should be footnoted on the form for informational purposes. Also, an adjusted maturity schedule should be submitted on the Form C-05 as set forth in Exhibit 31.30.10-A.

All forms and schedules should be sent to the following address:

Office of the Comptroller
Financial Reporting - Bonded Indebtedness
325 West Adams Street

Failure to submit these documents on the appropriate date shall result in a delinquency letter being sent to the Auditor General and a copy to the agency.

**SCHEDULE OF FOOTNOTE DISCLOSURE OF
CURRENT AND ADVANCE REFUNDING DEBT (C-31)**

PURPOSE

The purpose of the Schedule of Footnote Disclosure of Current and Advance Refunding Debt form C-31 (Exhibit 31.45.10-A) is to collect refunding debt information to calculate disclosures required by the Governmental Accounting Standards Board (GASB) [Statement 7](#), [Statement 23](#) and [Statement 34](#).

The form is to be completed at the time the agency issues refunding debt and sent to the Comptroller's Office. Upon completion of the calculation of required disclosure information by the Comptroller's Office, the agency will receive the proper footnote disclosures in addition to supporting schedules. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

Note: It is permissible for the agency to submit the above requested information in a format other than a Form C-31 providing it is prepared by their bond counsel and contains all of the information and support requested on the form C-31.

GENERAL

Form C-31 collects information that is used to calculate the disclosures required by GASB Statement 7, Statement 23 and Statement 34 for current and advance refundings resulting in defeasance of debt. Refundings involve the issuance of new debt whose proceeds are used to repay old (previously issued) debt. In a current refunding, the proceeds of the new debt are used to repay the old debt immediately. However, in an advance refunding, the new debt proceeds are placed with an escrow agent and invested until they are used to pay principal and interest on the old debt at a future time. An in-substance defeasance occurs when debt is considered defeased for accounting and financial reporting purposes. To qualify as an in-substance defeasance, the debtor irrevocably places cash or other assets with an escrow agent in a trust to be used solely for satisfying scheduled payments of both interest and principal of the defeased debt, and the possibility that the debtor will be required to make future payments on the debt is remote.

GASB Statement 7 requires a general description of the advance refunding transactions, regardless of where the debt is reported (i.e. governmental activities, business-type activities or component units). At a minimum, the disclosures should include (a) the difference between the cash flows required to service the old debt and the cash flows required to service the new debt and complete the refunding (the arithmetic gain or loss) and (b) the economic gain or loss resulting from the transaction. If variable rate debt has been issued to refund fixed rate debt, additional disclosures should be made for the range of potential savings based on the variable rate debt maximum and minimum interest rates.

When measuring the difference between the two cash flows, additional cash used to complete the refunding paid from resources other than the proceeds of the new debt should be added to the new debt cash flows. Accrued interest received at the debt issuance date should be excluded from the new debt cash flows.

The economic gain or loss is the difference between the present value of the old debt service requirements and the present value of the new debt service requirements adjusted for additional cash paid and accrued interest received as discussed above. However, the new debt service requirements must be discounted at the effective interest rate which produces a present value equal to the proceeds of the new debt (including accrued interest) net of any premiums or discounts and any underwriting spread and issuance costs that are not recoverable through escrow account earnings.

[GASB Statement 7](#) also requires the disclosure of the accounting gain or loss, as computed by APB Opinion 26 for university funds (component unit). This gain or loss should be expensed during the period in which the refunding occurred.

[GASB Statement 23](#) amended Statement 7 to require all advance refunding disclosures to be made for current refundings by proprietary funds (business-type activity). In addition, Statement 23 requires the calculation of the difference between the reacquisition price and the net carrying amount of the old debt to be deferred and amortized as a component of interest expense in a systematic and rational manner over the remaining life of the old debt or the life of the new debt, whichever is shorter. On the balance sheet, this deferred amount should be reported as a deduction from or an addition to the new debt liability.

[GASB Statement 34](#) subsequently amended both Statement 7 and Statement 23 to include general and special obligation debt for primary government activity (governmental activities).

The reacquisition price is the amount required to repay previously issued debt in the refunding transaction. In a current refunding, this includes principal of the old debt, any call premium and any interest of the old debt which is to be repaid by the new debt proceeds. In an advance refunding, it is the amount placed in escrow that, together with interest earnings, is necessary to pay interest and principal on the old debt and any call premium. The net carrying amount is the amount due at maturity, adjusted for any unamortized premium or discount or issuance costs related to the old debt.

In addition to these disclosures which are made in the year of the refunding, in all periods following the current or advance refunding for which debt defeased in-substance remains outstanding, the outstanding debt should be disclosed in the footnotes.

INSTRUCTIONS

Form C-31 must be completed at the time refunding bonds are issued by an agency. The completion of this form will enable the Comptroller's Office to calculate the required refunding disclosures to be included in the agency's and the State's annual financial statements. All amounts should be entered to the nearest dollar.

Information provided by the issuing agency may be substituted for Form C-31 providing it contains all the information required by Form C-31.

The form is divided into three parts. Part I is used to collect information for calculating the arithmetic and economic gain or loss for current or advance refunding bonds issued by all fund types. Debt service requirements schedules for the old debt, including call premiums, and the new debt should also be submitted. Part II is used to calculate the accounting gain or loss based on APB 26 for all current or advance refunding bonds issued which will be included in the financial statements. Part III is used to calculate the difference between the reacquisition price and the net carrying amount of the old debt for advance or current refunding bonds issued. This amount should be deferred and amortized as a component of interest expense in a systematic and rational manner over the remaining life of the old debt or the life of the new debt, whichever is shorter. This deferred amount should be reported as a deduction from or an addition to the new debt liability.

PURPOSE

The purpose of this procedure is to document the Comptroller's policies and accounting procedures for the imprest accounts maintained at each university, the Department of Agriculture, the Department of Commerce and Economic Opportunity, the Office of the State Treasurer and the Illinois Mathematics and Science Academy.

STATUTE REFERENCES

Section 21 of the State Comptroller Act ([15 ILCS 405/21](#)) gives the Comptroller the power to promulgate rules and regulations.

"The Comptroller shall promulgate rules and regulations to implement the exercise of his powers and performance of his duties under this Act and to guide and assist State agencies in complying with this Act. Any rule or regulation specifically requiring the approval of the State Treasurer under this Act for adoption by the Comptroller shall require the approval of the State Treasurer for modification or repeal.

The Comptroller may provide in his rules and regulations for periodic transfers, with the approval of the State Treasurer, for use in accordance with the imprest system, subject to the rules and regulations of the Comptroller as respects vouchers, controls and reports, as follows:

- (a) To the University of Illinois, Southern Illinois University, Chicago State University, Eastern Illinois University, Governors State University, Illinois State University, Northeastern Illinois University, Northern Illinois University, Western Illinois University and State Community College of East St. Louis under the jurisdiction of the Illinois Community College Board, not to exceed \$200,000 for each campus;

Definition of the Imprest System established by the Office of the Comptroller:

"The system under which a fixed amount of money otherwise maintained in the State Treasury, is advanced to an imprest account for the purpose of handling minor disbursements. Disbursements are made from time to time as needed. At certain intervals, or when the imprest cash is nearly expended, an invoice-voucher (C-13) with supporting documentation is prepared and presented to the Comptroller and State Treasurer for transfer of a like amount to the imprest account.

The transfer will be accomplished by posting the disbursements to the proper appropriation accounts and the preparation of a state warrant. The total of imprest cash on hand plus the amount of supporting documents (vendor's invoices, etc.) at any one time must equal the total amount of the imprest account authorized. Implicit in the imprest concept is the review by the Comptroller of the propriety of the expended amounts before the transfer is approved."

ESTABLISHMENT OF IMPREST ACCOUNT

The State Treasurer will segregate \$200,000 from the State's available cash balance for the establishment of each imprest account unless a different amount is mutually agreed upon between the agency and the State Comptroller subject to approval by the State Treasurer. The approved amount of the imprest account authorized for each account is shown on Exhibit 33.10.10-A.

CUSTODIAN OF IMPREST ACCOUNT

The imprest account will be in the custody of one person who shall be known as the Custodian. The Custodian may be any bonded employee other than the person(s) authorized to approve vouchers for payment. The Custodian shall be responsible at all times for the balance of the imprest account which shall consist of cash in the imprest bank account and/or approved vouchers for disbursements made and pending reimbursements from the appropriated accounts. A reconciliation of the imprest account should be performed and forwarded to the State Treasurer and State Comptroller each time there is a permanent change of Custodians. When there is a change in custodians, the Comptroller's Office must be notified by letter. This requirement can be met by copying the Comptroller on the letter sent to the Treasurer informing her of the change in custodian.

USE OF IMPREST ACCOUNT

The purpose of the imprest account is to facilitate the following types of payments within the dollar limits established by statute (15 ILCS 405/21):

- A. Payments that do not exceed \$1,000.00.
- B. Payments that may exceed \$1,000.00 for the following purposes:
 1. Employee travel reimbursements.
 2. Reimbursements of local funds for expenditures made for State appropriated purposes.
 3. Purchases made in a foreign currency.
 4. Where there is a requirement that the payment must accompany the order such as United States Government Printing Office orders, and certain orders for periodical subscriptions, registration fees, membership dues and educational materials.
 5. To satisfy a legal requirement, such as having a check available at a certain closing date in a real estate transaction.
 6. Where an actual and ascertainable economic benefit such as obtaining a substantial cash discount or avoiding an interest penalty would only result by expediting the payment through the imprest fund.
 7. Payments to utility companies.
 8. Payments to nonresident aliens and foreign corporations.

The use of the imprest account is limited to the above purposes. Exceptions will be permitted only for special circumstances, where there is a real and advantage to the State in expediting the payment through the imprest account.

Generally, expenditures from the imprest account are not permitted for the following purposes:

1. Personal Services, except for payments to "locally held" funds which are limited to those employees whose personal services are partially funded with State appropriations if prior approval has been obtained from the Comptroller's Office; or as provided in the State Payroll System for new or terminated employees.

2. Lease payments for real property except:
 - A. The first lease payment of a fiscal year where this payment cannot be made in accordance with the terms of the lease because of a delay in the signing of the appropriation.
 - B. The initial payment of a new lease where such payment is necessary to comply with the terms of the lease.
 - C. Where the lease requires payment in a foreign currency.
3. Purchases of real property except in those cases where there is not sufficient time to obtain a State warrant by a set closing date.
4. Employee check cashing and advances.

DISBURSEMENTS FROM IMPREST ACCOUNT

Disbursements from the imprest account can only be made if the proper reimbursing state appropriation line item has an adequate, unexpended balance to support the disbursement. The following documents, prepared in accordance with the rules of the Office of the Comptroller, are acceptable as authorization for the disbursements:

- Comptroller Approved State of Illinois Invoice-Voucher
- Vendor Invoices
- Comptroller Approved Travel Voucher
- Request to pay document-containing name of person to whom payment is made, the signature of the payee, the date of payment, purpose of expenditure, appropriation account code, detail expenditure object account code and amount of each account and the total amount of the disbursement

TAXPAYER REPORTING TO INTERNAL REVENUE SERVICE (AND FOREIGN GOVERNMENT, WHERE APPLICABLE)

The custodian of an imprest account is responsible for all required taxpayer reporting to the Internal Revenue Service (IRS) and foreign governments, where applicable, (e.g., IRS 1099 reportable payments) for the aggregate of the payments made from the imprest account.

Also, the Comptroller may delegate the employer reporting requirements (e.g., 941, W-2's, etc.) of Federal, state and foreign governments for employee earnings and withholdings made from the imprest account maintained in the operation of foreign offices. The delegation could apply to all employer Federal,

OBLIGATION REQUIREMENTS

In general, the contract obligation requirements for content and statutory compliance for regular payments to vendors will apply to imprest payments. Contracts or agreements which are to be paid from the imprest account that are in excess of \$10,000 must be filed with the Comptroller within 15 days of execution*, and Professional or Artistic contracts in excess of \$5,000 must be submitted in writing prior to the services being rendered.

Individual obligation will not be required for reimbursements to university central stores, university printing and similar cases involving intra-agency payments.

*NOTE: Contracts need not be filed with the Comptroller before payments are made from the imprest account. Contracts must be filed before the imprest account is reimbursed.

Individual purchases of \$10,000 or less which are not pursuant to an ongoing contract may be paid without an obligation.

Permissible lease payments for real property must be supported by a filed and individually obligated lease.

COD's for imprest payments requiring individual obligation shall be completed in accordance with regular procedures, except as noted below:

- a. The Vendor Identification Number (VIN) shall be a unique number assigned by the Comptroller.
- b. The Vendor's Name should be listed on the top line.
- c. The Description shall state that this is a reimbursement to an imprest account and shall list the seller's name and describe the services.

(See Exhibit 15.20.10-A)

The general obligation rules of the Office of the Comptroller pertaining to amending and liquidating obligations shall apply to all obligations established against the imprest account.

PERIODIC TRANSFERS (Reimbursements of Imprest Account)

Request for transfer to the imprest account must be submitted at a minimum of once a month to the Comptroller unless no disbursements were made. The maximum amount for each periodic transfer shall not exceed the amount specified in State law.

Each State of Illinois invoice-voucher requesting the transfer shall be prepared in accordance with the rules of the Office of the Comptroller for preparation of the State of Illinois invoice-voucher. This includes indicating the obligation document number and the appropriate detail expenditure accounts and amount to be charged to each account.

A separate State of Illinois invoice-voucher shall be prepared for each appropriated line item to request transfers to the imprest account.

- a. For the following appropriation line items the State of Illinois invoice-voucher used shall be supported for each disbursement by an approved vendor's invoice or a State of Illinois invoice-voucher:
 - Personal Services (imprest account payments made to new or terminated employees are to be reimbursed through the State Payroll System)
 - Contractual Services
 - Commodities
 - Printing
 - Equipment
 - EDP
 - Telecommunication Services
 - Operation of Automotive Equipment
 - Permanent Improvements

- b. For the following appropriation line items the State of Illinois invoice-voucher used shall be supported for each disbursement in the following ways:
- Travel - A travel voucher in compliance with all applicable travel regulations, signed by the traveler
 - Awards and Grants
 - Matching funds for university supported programs (projects)
a State of Illinois invoice-voucher or a "request to pay" form indicating the project and amount authorized for payment by someone other than the Custodian
 - Student grants and Student Loan Programs
- a State of Illinois invoice-voucher or a "request to pay" form indicating the loan or grant program and the amount authorized for payment by someone other than the Custodian
 - Refunds
- a State of Illinois invoice-voucher indicating the amount of the refunds and authorized for payment by someone other than the Custodian
- c. The imprest account name should be cited as the payee name on the top line on the invoice-voucher requesting the transfer. The key words "imprest account" or "imprest fund" must be included. (See Exhibit 33.10.10.-C)
- d. For overseas imprest system operations, an adjustment should be made on a quarterly, but not less than annual, basis when overages and shortages exist due to fluctuality of currency exchange rates. If a shortage exists, the amount should be included on the subsequent reimbursement voucher from the contractual service appropriation citing detail object 1289. If an overage exists, the subsequent imprest account reimbursement voucher should be netted against the "contractual service" appropriation expenditures.

WRITING-OFF OUTSTANDING CHECKS

Checks must be printed with the notation that the check is "Void after twelve months" (or a lesser period if preferred). If a check issued on the imprest account is outstanding over twelve months, a stop pay is to be issued to the bank and the money returned to the State treasury and deposited into the General Revenue Fund. The agency is to take all necessary follow-up action in attempting to insure timely vendor presentation of the check for payment within the twelve month period.

MONTHLY RECONCILIATION

A monthly reconciliation of the imprest account shall be prepared by the agency and a copy submitted within the 15 day period following the bank statement date to the State Treasurer and State Comptroller. Failure to submit the reconciliation by the reporting deadline will result in a delinquency letter to the Office of the Auditor General. A copy of the entire bank statement must be attached to verify this date. The format of the reconciliation to be submitted is shown on Exhibit 33.10.10-B. The State Treasurer will review the reconciliation for appropriateness and timeliness of completion.

(Note: For the Departments of Agriculture and Commerce and Economic Opportunity, the 15 day period begins at the statement date of either the U.S. bank account or the foreign country bank account, whichever is later.)

STATUTE REFERENCE

15 ILCS 405/16 requires agencies to submit locally held fund reports as prescribed by the Comptroller.

"Reports from State agencies. The Comptroller shall prescribe the form and require the filing of quarterly fiscal reports by each State agency. Within 30 days after the end of each quarter, or at such earlier time as the comptroller by rule requires, each State agency shall file with the comptroller the report of its receipts and collections during the preceding quarter, including receipts and collections of taxes and fees, funds and fund authorizations from sources other than appropriation by the General Assembly, gifts, grants and donations, and income from revenue producing activities or property of or under the control of the agency. The report shall specify the nature, source and fair market value of any assets received, any increase or decrease in its security holdings (other than those held by the State Treasurer), and such other related information as the comptroller, by rule, requires. The report shall, consistent with the uniform State accounting system, account for all encumbrances, transfers, and releases of encumbrances upon assets held by the State agency, except any assets held in trust for another State agency or person, and any additional accounting as may be determined by the comptroller to be necessary for his maintenance of accurate encumbrance accounts for State agencies. The report shall include a separate accounting for each revenue bond issue administered by the particular agency, and shall indicate any changes in authorized or outstanding indebtedness of the agency or of the State through the agency. This Section does not require the duplication of reports concerning security holdings and investment income of the State Treasurer which are issued by the Treasurer pursuant to law."

15 ILCS 405/20 requires the Comptroller to include locally held fund cash basis activity in an annual report as prescribed below.

“Annual report. The comptroller shall annually, as soon as possible after the close of the fiscal year but no later than December 31, make out and present to the Governor, the President of the Senate, the Speaker of the House of Representatives, the Minority Leader of the Senate, and the Minority Leader of the House of Representatives a report, showing the amount of warrants drawn on the treasury, on other funds held by the State Treasurer and on any public funds held by State agencies, during the preceding fiscal year, and stating, particularly, on what account they were drawn, and if drawn on the contingent fund, to whom and for what they were issued. He shall, also, at the same time, report to the Governor, the President of the Senate, the Speaker of the House of Representatives, the Minority Leader of the Senate, and the Minority Leader of the House of Representatives the amount of money received into the treasury, into other funds held by the State Treasurer and into any other funds held by State agencies during the preceding fiscal year, and stating particularly, the source from which the same may be derived, and also a general account of all the business of his office during the preceding fiscal year. The report shall also summarize for the previous fiscal year the information required under Section 19.”

INTRODUCTION

GENERAL

The Locally Held Fund Reporting System's major function is to capture cash receipts and disbursements information on a quarterly basis in order to provide a more comprehensive fiscal data base for the State of Illinois. In addition, the information is used to prepare an annual report at the end of the fiscal year for the activity of each locally held fund. The information reported applies to "locally held" funds only and does not pertain to cash receipts which are submitted to the Office of the Comptroller for processing and which are then deposited in the State Treasury. It also does not pertain to cash disbursements which are initiated by preparing any one of the various types of vouchers which authorize the Office of the Comptroller to make payment in the form of a warrant.

The information reported on the reporting form applies to monies deposited in and disbursed from local bank accounts.

REPORTING CYCLE

The reporting cycle begins at the agency level with the preparation of a "Report of Receipts and Disbursements for Locally Held Funds" applicable to each local fund maintained by the agency. When the reports are completed, they are submitted to the agency official responsible for approving them. After the official has reviewed and signed the reports, they are submitted to the Office of the Comptroller for processing.

Upon receipt, the Comptroller's Office will review the reports for completion of all data elements and for reasonableness. The reports are filed and made available for public inspection upon request. After the end of the fiscal year, these quarterly reports will be combined to prepare an annual report of activity for all locally held funds.

DOCUMENT DESCRIPTION

The "Report of Receipts and Disbursement for Locally Held Funds" (Form C-17) is used to report locally held fund activity. This form, which reflects fiscal year-to-date receipts and disbursements per the agency's records, contains accounts almost identical to the accounts used in processing receipt and disbursements for Treasurer-held funds. This facilitates combining similar items and highlights unique items.

Each agency is responsible for preparing one report for each "locally-held" fund it maintains. These funds are also included in the year end GAAP compilation process. If no locally held funds are maintained, agencies are required to submit a Form C-17, indicating the form is "not applicable."

STATEMENT OF GENERAL POLICY

The "Report of Receipts and Disbursements for Locally Held Funds" is prepared at a summary level of information. When properly completed, it presents the fiscal year-to-date receipts and disbursements as of the report date applicable to each locally fund maintained by the reporting agency.

To facilitate the consistent preparation of Form C-17 for transactions of a similar nature, SAMS Manual Procedure 27.50.30 (which are not intended to be all-inclusive) sets forth the types of accounts which should be included in the major receipts classifications shown on the forms. Using these accounts as a guideline, the reporting of receipts for locally held funds will be more meaningful.

**PREPARATION OF THE "REPORT OF RECEIPTS AND
DISBURSEMENTS FOR LOCALLY HELD FUNDS"**

The following procedures provide details for preparing the "Report of Receipts and Disbursements for Locally Held Funds" (Form C-17) for each "locally held" fund in which your agency has accountability. All amounts should be reported as fiscal year-to-date and rounded to the nearest dollar. If your agency does not have a "locally held fund," then enter "NOT APPLICABLE" on the face of the form and submit to the Comptroller's Office. After your initial submission of "Not Applicable", your agency is not required to submit any further reports as long as the agency does not maintain any locally held funds. Exhibit 33.13.20-A illustrates a blank form, Exhibit 33.13.20-B illustrates a form with the reference numbers on it and Exhibit 33.13.20-C illustrates a properly completed form.

DESCRIPTIONS OF REVENUE SOURCES TO INCLUDE IN THE RECEIPT ACCOUNTS

The following listing of revenue sources to be included in the reporting receipt accounts should be used as a guideline only and is not intended to be all - inclusive.

<u>SOURCE NUMBER</u>	<u>NAME, DESCRIPTION AND EXAMPLES</u>
803	<u>Bond Issue Proceeds</u> - Monies received from the sale of bonds.
806	<u>Bond Operations</u> - Monies from operations which were initially financed from bond issue proceeds and for which a portion of the bonds are currently outstanding. Examples include room and board revenues, hospital and medical services revenues, university union revenues, bookstore sales and rentals, food sales, highway tool revenues.
824	<u>Auxiliary Enterprises</u> - Monies received for goods or services which are <u>NOT</u> in excess of what is required to maintain the operation which provided the goods or services. Examples include service oriented revolving funds such as printing, motor vehicles, etc. Currently, excess profits on the universities' auxiliary enterprises are required to be deposited in the State Treasury. This account will provide information on revenues which are not considered excess and, therefore, are not deposited in the State Treasury. Note - If the auxiliary enterprise was initially financed from bond proceeds and a portion of the bonds are currently outstanding, report the fiscal year-to-date receipts under "Bond Operations." If no bonds are outstanding, report the receipts under this category.
831	<u>Federal Government</u> - Monies received directly or indirectly from the Federal Government in the form of grants or contracts. This also includes Federal monies received via another state.
843	<u>Fines, Penalties or Violations</u> - Monies collected as a result of an infraction of the law, rules or regulations. Examples include parking fines, library fines, property damage, etc.
846	<u>Fund Transfers</u> - Monies transferred from another fund into the local fund.

855	<u>Licenses, Fees or Registrations</u> - Monies received in connection with issuing licenses, registrations, or collected fees for services rendered. Examples include school registration fees, docket fees, postage fees, library fees, parking stickers, laboratory fees, etc.
858	<u>Local Illinois Governmental Units</u> - Monies received from local governmental units such as cities, counties or townships. Examples may include gifts, grants or contracts.
861	<u>Miscellaneous</u> - Monies received which are low dollar amounts not warranting a specific classification. Examples include jury duty reimbursement, pay telephone receipts, lapsed deposits, bail bond receipts, etc.
864	<u>Other Illinois State Agency Grants</u> - Monies received from State agencies in the form of grants or contracts.
867	<u>Other States</u> - Monies received from another state which were not Federal monies initially. An example may be two states working in a joint venture with one state acting as custodian of the total money.
870	<u>Private Organizations or Individuals</u> - Monies received from individuals or non-governmental organizations such as charities, foundations, etc. Examples include cash gifts, bequests, endowments, etc.
876	<u>Rental Income</u> - Monies received from rentals of buildings, land or other facilities. Examples include stadium and field house rentals, trailer court rentals, equipment rentals, etc.
878	<u>Repayment of Loans</u> - Monies received from a participant in an agency administered loan program such as the student loan program.

STATUTE REFERENCE

The statutory authority requiring State agencies to file reports on tax expenditures which they administer is contained in the State Comptroller Act, ([15 ILCS 405/16](#)):

"In addition to the quarterly reports required by this Section, each agency shall on an annual basis file a report giving that agency's best estimate of the cost of each tax expenditure related to each of the revenue sources administered by the agency. This annual report shall include the agency's best estimate of the cost of each tax expenditure including: (a) a citation of the legal authority for the tax expenditure, the year it was enacted, the fiscal year in which it first took effect, and any subsequent amendments; (b) to the extent that it can be determined, the total cost of the tax expenditure for the preceding fiscal year together with an estimate of the projected cost for the next succeeding fiscal year along with a description of the methodology used to determine or estimate the cost of the tax expenditure; and (c) an assessment of the impact of the tax expenditure on the incidence of the tax in terms of the relative shares of revenue received under the provisions of the tax expenditure and the revenue that would have been received had the tax expenditure not been in effect. For purposes of this Act, the term "tax expenditure" means any tax incentive authorized by law that by exemption, exclusion, deduction, allowance, credit, preferential tax rate, abatement, or other device reduces the amount of tax revenues that would otherwise accrue to the State."

PURPOSE

The purpose of the Tax Expenditure Report form (SCO-041) is to provide information required to satisfy the annual tax expenditure reporting requirement as specified in the State Comptroller Act [15 ILCS 405/16](#). This data will be summarized in a publication to be issued by the Comptroller's Office. Reports are necessary for each tax, license, fee, or registration authorized by state law and collected by state agencies. Reports are not necessary for taxes, licenses, fees, or registrations levied by units of local government but collected by state agencies nor for taxes, licenses, fees, or registrations that are not deposited into state funds. The Comptroller's Office has developed an Internet-based Tax Expenditure Reporting System. Agencies reporting tax expenditures must use this system to simplify processing of tax expenditure information. The following exhibits illustrate the information that is gathered through the Internet Reporting System.

GENERAL

A tax expenditure is any incentive authorized by law that by exemption, exclusion, deduction, allowance, credit, preferential tax rate, abatement, or other device reduces the amount of tax revenue that would otherwise accrue to the State.

Exemptions from one state tax that are subject to another tax are not considered tax expenditures. Examples include the use tax exemption for transactions subject to the state sales tax and credits for taxes paid to other states.

When tax payments are deferred, the tax expenditure is the estimated interest loss to the State due to this deferral. An example of a deferral is provisions that excuse farmers from making estimated income tax payments.

Description

The tax is imposed on the privilege of earning or receiving income in or as a resident of Illinois. The tax is a flat rate percent of net income. Net income is federal taxable income (before losses) modified by additions, subtractions and less the standard exemption. The corporate tax rate is 4.8%.

Description This tax credit is provided to taxpayers that invest, and place in service, qualified property in an Illinois enterprise zone. The credit is equal to .5% of the property placed in service during the taxable year. The tax credit cannot reduce income tax liability below zero. If the credit amount exceeds tax liability, then the excess credit amount can be carried forward five years. (14)

Methodology

A 1998 study reviewed the 1299-D credits claimed by taxpayers for tax year 1996. Based on the 1998 study, there were \$8.4 million in Enterprise Zone Investment tax credits claimed for tax year 1996.

(16)

Assessment

This tax expenditure only has a minor impact on Corporate Income Tax revenues with a cost of \$8.4 million accounting for only 0.6% of tax receipts.

STATUTE REFERENCE

The statutory authority requiring State agencies to file reports on fees they have imposed is contained in the State Comptroller Act (15 ILCS 405/16.2):

Agency fees; report to General Assembly.

- (a) A State agency that imposes fees shall file the Agency Fee Imposition Report Form established under Section 3-8.5 of the Illinois State Auditing Act with the Comptroller at the time the Comptroller specifies by rule.
- (b) The Comptroller shall submit to the General Assembly by September 1 of each year beginning in 1995 a report detailing by agency the information required under the Agency Fee Imposition Report Form.

The various elements that must be reported by State agencies are specified in the Illinois State Auditing Act (30 ILCS 5/3-8.5):

Agency Fee Imposition Report Form.

- (a) The Auditor General shall develop an Agency Fee Imposition Report Form to be used by all State agencies that impose and collect fees. The form shall provide for the reporting by State agencies of the following:
 - (1) A list and description of fees imposed by the agency.
 - (2) The purpose of the fees.
 - (3) The statutory or other authority for the imposition of the fees.
 - (4) The amount of revenue generated.
 - (5) The general population affected by the fee.
 - (6) The funds into which the fees are deposited.
 - (7) The use of the funds, if earmarked.
 - (8) The cost of administration and the degree to which the goals of the program are met.
- (b) The Auditor General shall issue the form required by this Section by February 1, 1995.

PURPOSE

The purpose of the Agency Fee Imposition Report Form (See Exhibit 33.16.20-A) is to obtain information specified in the Illinois State Auditing Act (30 ILCS 5/3-8.5). The information is compiled in a report by the Comptroller's Office and submitted annually to the General Assembly by September 1. The Comptroller's Office has developed an Internet-based Agency Fee Imposition Report System. All agencies must submit their report with this system. The following exhibits illustrate the information that is gathered through the Internet Reporting System.

GENERAL

Fees mean all charges by State agencies to citizens and private organizations. They include assessments, fares, fees, fines, levies, licenses, penalties, permits, registrations, tolls, and tuition. They do not include the following:

- Criminal and Civil penalties (e.g., court fines, speeding tickets).
- Charges to State employees only for insurance and retirement.
- Charges commonly considered taxes (e.g., hotel operators tax, liquor taxes, sales and use taxes).

PURPOSE

The purpose of the Public Accountability Report (PAR) is to provide information on the service efforts, costs, and accomplishments of the agency or its major programs. This report is to be submitted annually to the Comptroller's Office as part of the year-end reporting package. The Public Accountability Report is due to the Comptroller's Office by October 15. Each year, the Comptroller's Office will notify those agencies that should submit information by the deadline.

The Comptroller's Office has developed an Internet-based reporting system for collecting data from state agencies. The reporting system is available through the Comptroller's Public Accountability web page.

GENERAL

The Governmental Accounting Standards Board (GASB) is the highest source of accounting and financial reporting guidance for state and local governments and retains ultimate authority over all external financial reporting by governmental entities. Through its due process procedures, GASB has established suggested guidelines for voluntary reporting of Service Efforts and Accomplishments (SEA) performance information.

The primary purpose of SEA reporting is to provide more information about a government's performance than can be provided by traditional financial statements. SEA reporting is intended to include information about the services provided and the effect of those services to assist users in assessing how well the government is achieving its goals and objectives.

In its Concepts Statement No. 1, *Objectives of Financial Reporting*, "is based on the belief that SEA information is necessary for assessing accountability and in making informed decisions; therefore, to be more complete, General Purpose External Financial Reporting (GPEFR) for governmental entities needs to include SEA information which will be reported separately from the Comprehensive Annual Financial Report (CAFR)." One of three objectives established by the Board in this document is that "financial reporting should provide information to assist users in assessing the service efforts, costs, and accomplishments of the governmental entity."

GASB's Concepts Statement No. 2, *Service Efforts and Accomplishments Reporting*, emphasizes this point when it states, "The assessment of a governmental entity's performance requires information not only about the acquisition and use of resources, but also about the outputs and outcomes of the services provided and the relationship between the use of resources and their outputs and outcomes."

SECTION	MISCELLANEOUS	PROCEDURE - PAGE NO. 33.20.20 2 of 8
SUB-SECTION	INPUT PROCEDURES	EFFECTIVE DATE January 1, 2010
PROCEDURE	SERVICE EFFORTS AND ACCOMPLISHMENTS (SEA) REPORTING	REVISION NUMBER 10-002

Currently, financial reporting provides information on whether funds are being used legally and for the purpose intended, but not whether they are being used efficiently and with the intended results. Both GASB and the Comptroller's Office recognize that (1) in the absence of SEA information, financial reports cannot meet the test of sufficient accountability, and (2) a change in this situation would call for an extension of the very concept of financial reporting itself.

As stipulated in Public Act 86-1415 (15 ILCS 405/6.01), effective September 11, 1990, the Comptroller is responsible for defining financial reporting requirements for Illinois state agencies:

The Comptroller shall specify and establish the financial accounting and reporting standards and principles to be used by all State government and State agencies....These standards and principles shall be known as the Generally Accepted Accounting Standards and Principles for Illinois State Government, and shall, whenever possible, be compatible with any similar nationally existing generally accepted accounting standards and principles for government.

The core mission of the Comptroller's Office is "to provide quality fiscal information." It is the position of the Comptroller's Office that fiscal information that consists solely of *financial* information is lacking an acceptable level of quality. Such financial information must be coupled with *non-financial* information (i.e., information on service efforts and accomplishments) if the financial information is to be meaningful.

This procedure will help establish standards for SEA reporting until GASB completes its due process activities. The following general principles and guidelines, which may be modified from time to time as new information or experience becomes available, will govern service efforts and accomplishments reporting in Illinois for the present:

- These guidelines are consistent with expectations and other reporting requirements regarding performance measurement already existing in Illinois State statutes. The Fiscal Control and Internal Auditing Act (30 ILCS 10/1001-3004) requires controls to assure that "resources are utilized efficiently, effectively, and in compliance with applicable law." (30 ILCS 10/3001(1)) It is not possible to demonstrate efficiency or effectiveness without appropriate measures of efforts, costs, and accomplishments. Additionally, the Civil Administrative Code of Illinois (Part 2) requires "annual accountability reports" from each Code agency (15 ILCS 20/50-15).

- These procedures establish principles for *reporting* information about state government's performance, including the categories and characteristics of SEA information. They do not establish the performance indicators, measures, or standards themselves. The Comptroller's Office may, from time to time, advise and direct agencies on generally accepted performance indicators for reporting on specific programs or services.
- Within the framework established by these principles and procedures, state agencies are expected to develop valid and generally accepted SEA indicators for approval by the Comptroller's Office; gather the data required for the indicators; and report performance results in the form prescribed herein. Based on statutory provisions and requirements previously cited above, it is assumed that a significant amount of information is already available for SEA reporting.
- Subject to the approval of the Comptroller's Office, State agencies may use judgment and discretion in reporting SEA information. Generally speaking SEA measures should be reported for all major programs, goals and objectives of the agency, as defined by the reporting entity in conjunction with the Comptroller's Office. It is assumed that not every agency function will be included in such reporting. At the same time, reporting on the smallest, discrete program within an agency is not sufficient. Part of the challenge in SEA reporting is rationalizing the program structure as a framework for SEA measurement. Where possible, agencies may report at the "corporate" or "enterprise" level for the department as a whole. Another approach would be to report on the highest organizational level possible or the programs or functions with the largest funding.
- Agencies should not intermingle SEA information from different programs or services, but should prepare separate SEA reports for each distinct agency function, program, or service being reported.
- Agencies should be able to substantiate their reports by maintaining adequate and appropriate documentation to support their mission statements, goals, objectives and performance measures. This would include such elements as statutory or other authoritative sources for programs, mission statements, goals and objectives, definitions of performance indicators and data, the data collection and reporting process, the data storage and retrieval environment, etc.
- In *Concepts Statement No. 2, Service Efforts and Accomplishments Reporting*, the GASB has provided guidance on the characteristics that agencies should strive for in performance data:

Characteristics Performance Information Should Possess

28. Performance information should meet the characteristics of relevance, understandability, comparability, timeliness, consistency, and reliability. The application of these characteristics to performance information is discussed below.

Relevance

32. SEA performance information is a representation of performance and includes a broad variety of measures. SEA performance information needs to cover the major goals and objectives of the programs and services being reported on, while maintaining a focus on key results so as not to overwhelm users with more information than can be used. In order to provide a broad picture of performance, it is important for all elements of relevant SEA performance measures to be included.

Understandability

35. In order for the information within an SEA report to be understandable, it needs to be expressed simply and clearly. Users have different purposes for reviewing SEA performance information, as well as different interests, needs, and levels of understanding, education, and public involvement. Governments, therefore, need to obtain feedback from actual or potential users of an SEA report in order to enhance the understandability of reported SEA performance information. It is also important to communicate SEA performance information in different forms and at different levels of detail so that the information can be understood by those who may not have a detailed knowledge of a government's programs and services.

37. The manners of presentation commonly used in SEA reports include charts and tables with numeric measures of SEA performance, graphs showing the relationships between two or more pieces of data, and objective narrative description of results. Tables, charts, or graphs can be used to enhance understandability by showing many different types of comparisons, such as to targets, previous periods, citizen feedback, or other governments.

Comparability

40. SEA performance measures, if presented alone, do not provide a basis or context for assessing SEA performance. If the information presented within an SEA report is comparable and comparisons are presented, then the information provides a frame of reference for users to assess SEA performance. To assess whether the reported SEA performance is improving,

deteriorating, or remaining the same, users need comparative information such as measures from earlier periods, established targets, industry standards, or other similar governments. The types of comparative information reported may depend on issues such as the availability of reliable and relevant information, the purpose of the report, and the needs of the users.

Timeliness

44. The report needs to be issued soon enough after the reported events to affect decisions or assessments of accountability.

Consistency

46. Consistency in reporting SEA performance information means measuring and reporting the same SEA performance measures in the same way from period to period. Consistency in the manner of presentation avoids confusing users and helps them to assess changes in SEA performance over time.

47. Changes in presentation formats, performance targets, or goals and objectives can occur and, in many cases, result in improved SEA performance measures. If SEA performance measures are modified or replaced or the manner of presentation is changed, then it is important to communicate to users that a change has taken place and the reasons for the change.

Reliability

48. SEA performance measures need to be verifiable to provide assurance that the information in an SEA report would be replicated by independent evaluators using the same measurement methods. SEA performance information needs to be derived from systems producing verifiable data.

REPORTING DATES

State agencies report SEA information annually to the Comptroller's Office, as prescribed in the following instructions, according to the schedule below:

By **August 15**, agencies submit for the approval of the Comptroller's Office a list of all programs administered by the agency—identifying those programs to be reported on—with the (briefly stated) purpose and the current fiscal year budget and staffing figures for each program, summing to the total budget and staffing of the agency. Agencies will also submit for the approval of the Comptroller's

Office a list of the specific performance measures (Input Indicators, Outcome Indicators, External Benchmarks, Output Indicators, and Efficiency/Cost Effectiveness Indicators) that the agency proposes for each of the programs to be included in the Public Accountability Report (Exhibit 33.20.20-A). (This information is to be submitted on worksheets provided by the Comptroller's Office. See Exhibit 33.20.20-B.)

By **October 15**, agencies submit their final SEA data to the Comptroller's Office using the PAR system.

Failure to submit these reports by the deadlines could result in a delinquency letter to the Office of the Auditor General.

INSTRUCTIONS

State agencies should use the on-line Public Accountability Reporting system at the Comptroller's web site, <http://www.apps.ioc.state.il.us/office/par/login/>, for reporting SEA information. Information requested is as follows:

- 1) Agency: Indicate the name of the agency, department, board, or commission submitting the report.
- 2) Program: Identify the program under which the performance data are grouped or classified.
- 3) Fund(s): Identify the state fund or funds supporting the program or service.
- 4) Statutory Authority: Cite the statute from which authority is derived for the program and its mission and goals.
- 5) Mission Statement: Provide a general statement of the program's purpose and reason for being as derived from its origin (statute or other authoritative source). A mission statement should define what the program aims to do, why and for whom.
- 6) Goals: Provide broad, but clear statements of intent that project the general outcomes the program was designed to accomplish. Goals anticipate the outcome indicators (see below) but are not as specific or measurable.
- 7) Objectives: Provide specific measurable objectives in support of the goals which describe the end results that a service or program is expected to accomplish in a given time period.

- 8) Performance Indicators: The report form provides for definition of performance indicators and reporting of performance data. First, indicate the specific performance indicators for each category of indicator (input, output, outcome, etc.). Then, provide the specific data for each performance indicator for each year applicable. Also report the targets that were set for each indicator for the current fiscal year and establish targets for the ensuing fiscal year. The categories of indicators include:

Measures of Accomplishments

- 9) Input Indicators: These are measures of the financial and non-financial resources applied in providing services (e.g., total expenditures, total appropriated expenditures, full-time equivalents, etc.). All SEA reports should identify at a minimum the total dollar value of resources provided to the program or service being reported.
- 10) Output Indicators: These are measures of the number of units produced or services provided by a program (sometimes referred to as activity or workload measures). They are measures of the quantity of the work produced (e.g., the number of students enrolled or clients served, number of projects completed, etc.).

Measures of Efforts

- 11) Outcome Indicators: These are measures of the results achieved, at least in part, because of the services provided (e.g., percentage of lane-miles of road maintained in a certain condition, the change in students' test scores, level of customer satisfaction, etc.).

Measures Relating Efforts to Accomplishments

- 12) Efficiency/Cost-Effectiveness Indicators: These are measures of the cost per unit of output or outcome (e.g., cost per lane-mile of road repaired, cost per student graduated, etc.).

Other Measures

- 13) External Benchmarks: For comparative purposes, a program's outcome and efficiency/cost-effectiveness indicators should be presented, where possible, in conjunction with similar measures of a comparable program, a regional or national average or an established industry or federal standard. These measures should come from an authoritative source.
- 14) Explanatory Information: Provide any explanatory information that helps clarify the specific performance information reported. Particular emphasis should be placed on outcomes. Agencies

who claim “cost savings” or “jobs created” must use this part of the report to present their methodologies for making those calculations. Other types of explanatory information might include:

- environmental, external, or other factors which can influence performance or help explain the context for the reported performance, including factors over which the agency has little or no control (e.g., demographics) and factors substantially within the control of the agency (e.g., staffing patterns);
- the limitations of the performance measurement system or specific performance measures;
- information which comments on or helps explain the specific level of performance;
- information on actions which may alter or affect performance in the future.

15) Agency Narrative: Provide a brief narrative comprised of:

- a) A summary table of all the agency’s programs with their associated expenditures and average monthly staffing, summing to the totals of the agency as a whole;
- b) A brief description of the agency’s mission; and
- c) A brief description of the agency’s key programs and performance.

Each agency should submit one narrative only for all programs. Do not complete this section of the form for each program.
