Supplementary Figure S2. 2D diagram interactions (panel A, B and C) of **7**, **8** and **9** with C-terminal domain of HSP82 yeast analogue of Hsp90 α (PDB: 2CG9). Positive charged residues are colored in violet, negative charged residues are colored in red, polar residues are colored in light blue, hydrophobic residues are colored in green. H-bond (side chain) are reported as dotted pink arrows.

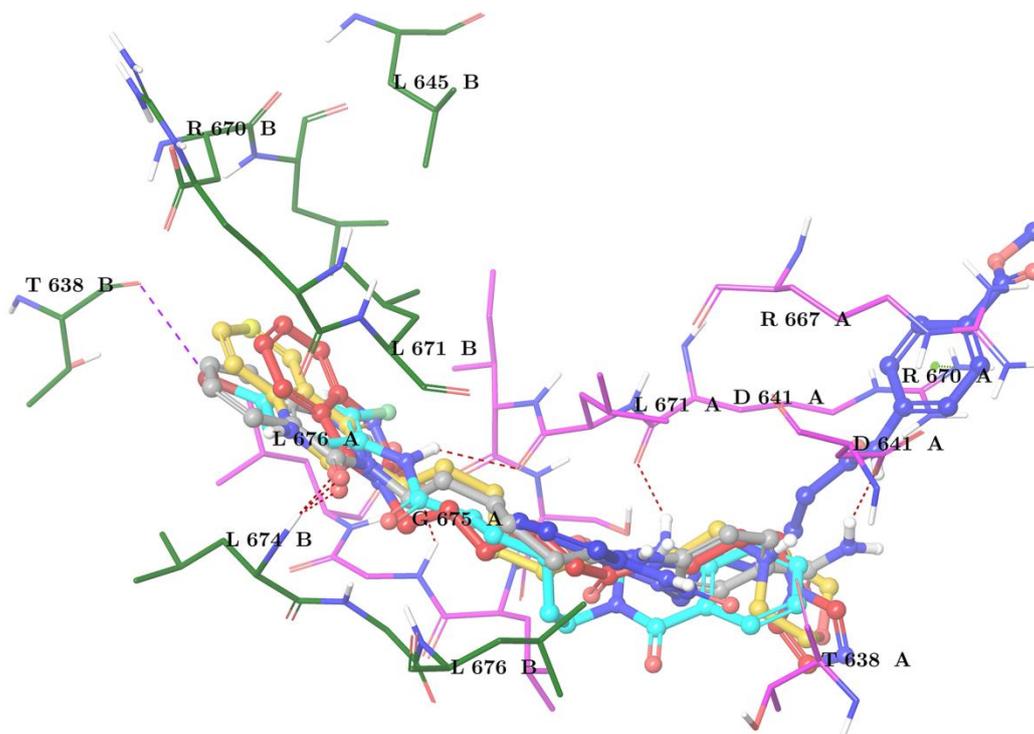

Supplementary Figure S3. Superimposition of **7** (light pink sticks), **8** (sky-blue sticks) and **9** (light green sticks) with C-terminal domain of HSP82 yeast analogue of Hsp90 α (PDB: 2CG9). The protein is depicted by purple (chain A) and green (chain B) sticks.

Supplementary Figure S4. 2D diagram interactions (panels A, B, C, D and E) of **10**, **11**, **12**, **13** and **14** with C-terminal domain of HSP82 yeast analogue of Hsp90 α (PDB: 2CG9). Positive charged residues are colored in violet, negative charged residues are colored in red, polar residues are colored in light blue, hydrophobic residues are colored in green. The π - π stacking interactions are indicated as green lines, and H-bond (side chain) are reported as dotted pink arrows.

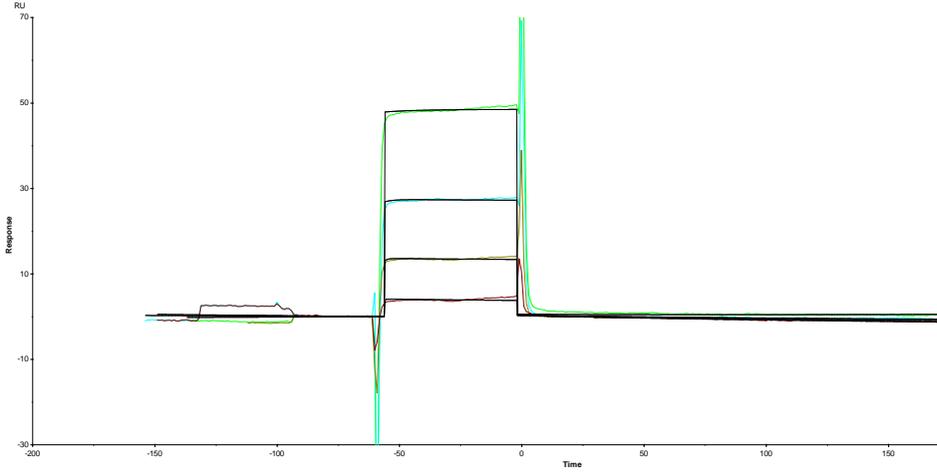

Supplementary Figure S5. 2D diagram interactions of second binding mode of **10** with C-terminal domain of HSP82 yeast analogue of Hsp90 α (PDB: 2CG9). The positive charged residues are colored in violet, negative charged residues are colored in red, polar residues are colored in light blue, hydrophobic residues are colored in green. H-bond (side chain) are reported as dotted pink arrows.

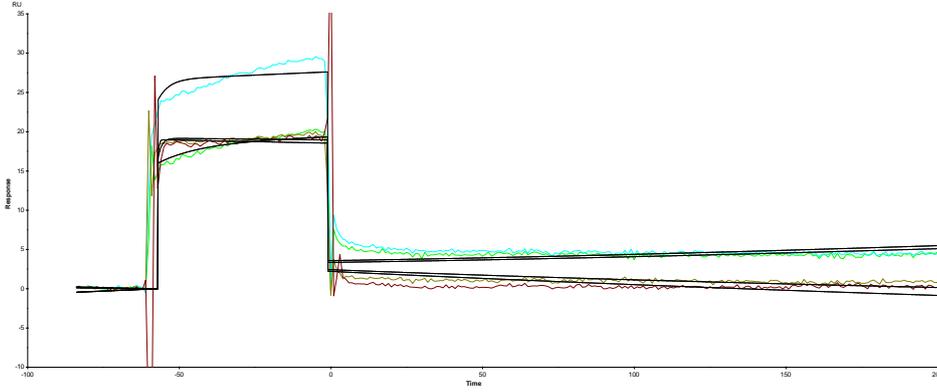

Supplementary Figure S6. Superimposition of **10** (cyan sticks), **11** (red sticks), **12** (yellow sticks), **13** (blue sticks), and **14** (grey sticks) with C-terminal domain of HSP82 yeast analogue of Hsp90 α (PDB: 2CG9). The protein is depicted by purple (chain A) and green (chain B) sticks.

Supplementary Figure S7. SPR sensorgrams documenting the interaction between **1, 4, 5, 7-15, 20-22** and **26** Hsp90.

Supplementary Figure S8. Original images of western blots displayed in Figure 3A of the main text. In the figure was indicate the same filter cropped and probed with different primary antibody (Protein ladder :Opti-Protein XL Marker, Applied Biological Materials Inc., Canada).

Supplementary Figure S9. Original images of western blots displayed in Figure 3B of the main text. The protein ladder was indicated (Opti-Protein XL Marker, Applied Biological Materials Inc., Canada; or Prestained Natural Protein Standard, Bio-Rad.). In the figure was indicate the same filter cropped and probed with different primary antibody.
