Carnets de Géologie (2011: Book 3 - Livre 3)

Catalogue of the Eocene mammal types of the Natural History Museum Basel.

Loïc COSTEUR & Martin SCHNEIDER

Abstract

This catalogue presents a list of the Eocene mammalian type specimens held in the collection of the Natural History Museum Basel (Naturhistorisches Museum Basel, hereafter NMB). After a close inspection of the very rich Eocene collection (several tens of thousands of specimens), a total of 51 valid holotypes (plus 16 invalid species) were identified together with 21 valid lectotypes and several hundreds paratypes, paralectotypes and syntypes. These types belong to 123 originally described species, of which 99 are still valid, 30 having been moved to another genus.

Introduction

The vertebrate collection of the NMB is one of the most relevant of Europe regarding fossil mammals. The tradition of collecting and acquiring all kinds of fossil mammals dates back to the first curator for vertebrates at Basel, Ludwig RÜTIMEYER (1825-1895). He set the bases of this collection while collecting at various and now well-known Swiss localities. His famous successor Hans Georg STEHLIN (1870-1941), father of the "Grande Coupure" (recognition of the Eocene-Oligocene faunal renewal), largely contributed in popularizing the collection in the palaeontological community as he described several tens of species from the Swiss fossil record, and beyond, from the whole European record. His seminal works on the Eocene Swiss fauna of Egerkingen (STEHLIN, 1903, 1904, 1905a, 1905b, 1906, 1908, 1910, 1912, 1915-1916) made the Eocene collection of the NMB a reference as many later recognised widespread European species in all the mammalian orders, including primates, were then described and richly illustrated. The Eocene at the NMB represents tens of thousands of fossils which are still mostly undescribed and often not yet digitalised. More than

100 localities spanning all the Eocene MP reference levels but one, including half of the reference level localities, are well organised and 15 localities bear holotypes and associated type material. The unstudied status of many specimens makes the collection a living one and types are still being described even very recently (e.g., the apatemyid *Carcinella sigei* KOENIGSWALD *et alii*, 2009).

The purpose of this catalogue is to give a detailed and up-to-date account of the Eocene type material hosted at the NMB; some holotypes, lectotypes and syntypes are also here figured. This is the first step towards a comprehensive understanding of our fossil mammal types and it gives the opportunity to increase the standard of the collection by reviewing the validity and status of long described specimens.

Material and Methods

The types are ordered after the classification published in MCKENNA & BELL (1997) adapted from more recent sources (see below). Informations on types is given following this sequence (after TURNI & KOCK, 2008): original species name, author, year of publication, original reference, current species name, type locality when a holotype, lectotype or neotype is concerned, type category, localities for paratypes, paralectotypes and syntypes, catalogue number, nature of specimen with holotype first when at NMB followed by other kinds of types and their corresponding locality when different from that of the holotype or lectotype or neotype, collector and date of collection when known or donator and date of donation when known, comments on location of the holotype when known. When type locality is the same for paratypes, it will not be repeated in the list of paratypes.

Given the status of the collection, only those specimens for which the holotype, lectotype or neotype is in the collection are referred to. Yet, a number of paratypes for which the holotype is in another collection are given when known but others which were never labelled as such and thus are very difficult to identify can not be mentioned. Likewise, paratypes in other public collections with holotypes at Basel may exist without being known to us as not being referred to on the holotypes' labels. These will not be mentioned here but we expect their amount to be very small, if any, as our collection consists of specimens from localities which were almost entirely stored here at Basel and the type series were correspondingly given on the material stored at the NMB. Careful check of the type publications has been carried out to avoid such a problem.

Upper teeth will be written with capitals and lower teeth without. I and i stand for incisors, C and c stand for canines, P and p stand for premolars and M and m stand for molars.

It is to be noted that a nomenclatural tradition existed in Basel in the past. Curators and collection managers at the Museum, RÜTIMEYER, STEHLIN, HELBING, SCHAUB and HÜRZELER numbered premolars from posterior to anterior and not from anterior to posterior such as widely accepted now. This resulted in actual p4 being p1 or actual p2 being p3, actual p1 being p4 and actual p3 being p2 for them. We corrected this for the holotypes and lectotypes but could not go through the whole serie of syntypes, paratypes and paralectotypes to correct this here. This is thus highly possible that these kinds of types still are numbered using this nomenclature, it is also not to be excluded that others who worked on the material actually corrected this before. The bulk of the data comes from a computer database constituted by non-specialists in the 1980s and 1990s; the information was carefully taken from the literature, labels and entry books written by the curators themselves; we are confident about the great fidelity of the data although these nomenclatural problems were not systematically corrected. This is to be kept in mind when one wants to study the material of the NMB. The precise nomenclature following extant usage will be given upon requests to the authors for specific needs.

The rules and terminology of the International Commission on Zoological Nomenclature (ICZN 1999) were followed.

Besides type publications and McKENNA & BELL (1997), various synthetic works were used to provide an up-to-date version of the systematics of the groups for which the NMB has types. These include BECKER (2003), ERFURT & MÉTAIS (2007), THEODOR *et alii* (2007), MAÎTRE (2008).

Type publications for the species presented here are available at the NMB.

Index of species with type material at the NMB and found in this catalogue

(classified by Order and Family following McKENNA & BELL (1997) or more recent revisions; valid and invalid names are given here. When a species is not valid anymore, valid names are indented below).

Didelphimorphia

DIDELPHIDAE

- 1- Valid name: *Amphiperatherium bastbergense* CROCHET, 1979
- 2- Valid name: *Amphiperatherium dormaalense* CROCHET, 1978
- 3- Valid name: *Amphiperatherium goethei* CROCHET, 1979

Rodentia

ISCHYROMYIDAE

- 5- Valid name: *Plesiarctomys huerzeleri* WOOD, 1970
- 6- *Sciurus spectabilis* (FORSYTH MAJOR, 1873)
valid name: *Plesiarctomys spectabilis* (FORSYTH MAJOR, 1873)
- 7- Valid name: *Ailuravus stehlinschaubi* WOOD, 1976

THERIDOMYIDAE

- 8- *Adelomys cartieri* (STEHLIN & SCHAUB, 1951)
valid name: *Protadelomys cartieri* (STEHLIN & SCHAUB, 1951)

MYOXIDAE

- 9- Valid name: *Gliravus majori* STEHLIN & SCHAUB, 1951
- 10- *Gliravus priscus* STEHLIN & SCHAUB, 1951
valid name: *Glamys priscus* (STEHLIN & SCHAUB, 1951)

Cimolesta

APATEMYIDAE

11- Valid name: *Carcinella sigei* KOENIGSWALD *et alii*, 2009

12- *Heterochiromys fortis* STEHLIN, 1916

valid name: *Heterohyus armatus* (GERVAIS, 1848)

13- *Heterochiromys gracilis* (STEHLIN, 1916)

valid name: *Heterohyus gracilis* (STEHLIN, 1916)

14- *Calamodon europaeus* RÜTIMEYER, 1890

valid name: *Heterohyus europaeus* (RÜTIMEYER, 1890)

15- *Phenacodus minor* RÜTIMEYER, 1891 (Fig. 1)

valid name: *Heterohyus europaeus* (RÜTIMEYER, 1890)

PANTOLESTIDAE

16- Valid name: *Buxolestes hammeli* JAEGER, 1970 (Fig. 2)

PAROXYCLAEIIDAE

17- *Russellites simplicidens* van VALEN, 1965

valid name: *Vulpavoides simplicidens* (van VALEN, 1965)

Creodonta

HYAENODONTIDAE

18- *Prototomus torvidus* van VALEN, 1965

valid name: *Allopteron don torvidus* (van VALEN, 1965)

19- *Prodissopsalis phonax* van VALEN, 1965

valid name: *Allopteron don torvidus* (van VALEN, 1965)

20- Valid name: *Proviverra typica* RÜTIMEYER, 1862

21- *Prorhyzaena egerkingiae* RÜTIMEYER, 1891

valid name: *Proviverra typica* RÜTIMEYER, 1862

- 22- *Pseudosinopa ruetimeyeri* DEPÉRET, 1917 (Fig. 3)
valid name: *Cynohyaenodon ruetimeyeri* (DEPÉRET, 1917)
- 23- Valid name: *Cynohyaenodon trux* van VALEN, 1965
- 24- Valid name: *Praecodens acutus* LANGE-BADRÉ, 1981
- 25- Valid name: *Paracynohyaenodon schlosseri* MARTIN, 1906
- 26- Valid name: *Alienetherium buxvilleri* LANGE-BADRÉ, 1981
- 27- *Prodiissopsalis theriodis* van VALEN, 1965 (Fig. 4)
valid name: *Eurotherium theriodis* (van VALEN, 1965)
- 28- *Pterodon magnus* RÜTIMEYER, 1891
valid name: *Paroxyaena galliae* (FILHOL, 1881)
- 29- *Hyaenodon ambiguous* MARTIN, 1906
valid name: *Hyaenodon gervaisi* MARTIN, 1906

Erinaceomorpha

AMPHILEMURIDAE

- 30- *Alsaticopithecus leemanni* (HÜRZELER, 1947) (Fig. 5)
valid name: *Amphilemur leemanni* (HÜRZELER, 1947)
- 31- Valid name: *Gesneropithex peyeri* HÜRZELER, 1946

DIMYLIDAE

- 32- Valid name: *Exoedaenodus schaubi* HÜRZELER, 1944

Soricomorpha

NYCTITHERIIDAE

- 33- Valid name: *Saturninia gracilis* STEHLIN, 1940
- 34- Valid name: *Saturninia rigassii* HOOKER & WEIDMANN, 2000
- 35- Valid name: *Paradoxonycteris soricodon* REVILLIOD, 1919

Chiroptera

FAMILY INDET.

36- *Necromantis grandis* REVILLIOD, 1920 (Fig. 6)

valid name: *Necromantis adichaster* WEITHOFER, 1887

37- *Necromantis planifrons* REVILLIOD, 1920

valid name: *Necromantis adichaster* WEITHOFER, 1887

PALAEOCHIROPTERYGIDAE

38- *Nycterobius gracilis* REVILLIOD, 1919

valid name: *Stehlinia gracilis gracilis* (REVILLIOD, 1919)

39- *Pseudorhinolophus egerkingensis* REVILLIOD, 1922

valid name: *Stehlinia gracilis* (REVILLIOD, 1919)

40- *Paleunycteris minor* REVILLIOD, 1922

valid name: *Stehlinia minor* (REVILLIOD, 1920)

41- *Paleunycteris pusilla* REVILLIOD, 1922

valid name: *Stehlinia pusilla* (REVILLIOD, 1922)

42- *Paleunycteris quercyi* REVILLIOD, 1922

valid name: *Stehlinia quercyi* (REVILLIOD, 1922)

43- *Paleunycteris rutimeyeri* REVILLIOD, 1922

valid name: *Stehlinia rutimeyeri* (REVILLIOD, 1922)

EMBALLONURIDAE

44- Valid name: *Vespertiliavus gracilis* REVILLIOD, 1920

45- Valid name: *Vespertiliavus schlosseri* REVILLIOD, 1920

46- Valid name: *Vespertiliavus wingei* REVILLIOD, 1920

RHINOLOPHIDAE

47- *Rhinolophus priscus* REVILLIOD, 1920

valid name: *Vaylatsia prisca* (REVILLIOD, 1920)

- 48- *Rhinolophus priscus* REVILLIOD, 1920
valid name: *Vaylatsia pellislei* MAÎTRE, 2008
- 49- *Rhinolophus pumilio* REVILLIOD, 1920
valid name: *Vaylatsia pumilio* (REVILLIOD, 1920)
- 50- *Pseudorhinolophus schlosseri* REVILLIOD, 1917
valid name: *Hipposideros* (*Pseudorhinolophus*) *schlosseri* *schlosseri* (REVILLIOD, 1917)
- 51- *Pseudorhinolophus weithoferi* REVILLIOD, 1917
valid name: *Hipposideros* (*Pseudorhinolophus*) *weithoferi* (REVILLIOD, 1917)
- 52- Valid name: *Palaeophyllophora quercyi* REVILLIOD, 1917
- 53- *Paraphyllophora robusta* REVILLIOD, 1922 (Fig. 7)
valid name: *Palaeophyllophora quercyi* REVILLIOD, 1917
- 54- *Palaeophyllophora sanctaeneboulae* REVILLIOD, 1917
valid name: *Palaeophyllophora oltina* DELFORTRIE, 1873

Primates

FAMILY INDET.

- 55- Valid name: *Chasselasia eldredgei* SCHWARTZ & TATTERSALL, 1982

ADAPIDAE

- 56- Valid name: *Caenopithecus lemuroides* RÜTIMEYER, 1862

84- *Phenacodus europaeus* (RÜTIMEYER, 1888) (Fig. 11)

valid name: *Meniscodon europaeum* (RÜTIMEYER, 1888)

85- Valid name: *Buxobune daubreei* SUDRE, 1978

86- Valid name: *Metriotherium paulum* STEHLIN, 1906

CEBOCHOERIDAE

87- Valid name: *Cebochoerus ruetimeyeri* STEHLIN, 1908

88- *Choeromorus jurensis* STEHLIN, 1908

valid name: *Cebochoerus ruetimeyeri* STEHLIN, 1908

MIXTOTHERIIDAE

89- Valid name: *Mixtotherium gresslyi* RÜTIMEYER, 1891

90- *Mixtotherium priscum* STEHLIN, 1908

valid name: *Mixtotherium gresslyi* RÜTIMEYER, 1891

91- Valid name: *Mixtotherium infans* STEHLIN, 1910

DACRYTHERIIDAE

92- Valid name: *Dacrytherium priscum* STEHLIN, 1910

- 93- Valid name: *Dacrytherium saturnini* STEHLIN, 1910
94- Valid name: *Catodontherium buxgovianum* STEHLIN, 1910
95- Valid name: *Catodontherium fallax* STEHLIN, 1910 (Fig. 12)

CAINOTHERIIDAE

- 96- *Oxacron valdense* STEHLIN, 1906
valid name: *Paroxacron valdense* (STEHLIN, 1906)

XIPHODONTIDAE

- 97- Valid name: *Xiphodon intermedium* STEHLIN, 1910
98- Valid name: *Dichodon cartieri* RÜTIMEYER, 1891
99- Valid name: *Dichodon ruetimeyeri* STEHLIN, 1910
100- Valid name: *Dichodon simplex* KOWALEVSKY, 1873 (Fig. 13)
101- Valid name: *Dichodon subtilis* STEHLIN, 1910
102- Valid name: *Haplomeryx egerkingensis* STEHLIN, 1910
103- Valid name: *Leptotheridium lugeoni* STEHLIN, 1910
104- Valid name: *Leptotheridium traguloides* STEHLIN, 1910 (Fig. 14)

AMPHIMERYCIDAE

- 105- Valid name: *Pseudamphimeryx pavlowiae* STEHLIN, 1910
106- *Xiphodontherium schlosseri* (RÜTIMEYER, 1891)
valid name: *Pseudamphimeryx schlosseri* (RÜTIMEYER, 1891)
107- Valid name: *Pseudamphimeryx valdensis* STEHLIN, 1910

Perissodactyla

INCERTAE SEDIS

- 108- *Tapinodon gresslyi* von MEYER, 1846
valid name: Equoidea indet.
109- *Lophiotherium elegans* RÜTIMEYER, 1862
valid name: Equoidea indet.

110- Valid name: *Hallensia parisiensis* FRANZEN, 1990 (Fig. 15)

EQUIDAE

111- Valid name: *Propalaeotherium helveticum* SAVAGE et alii, 1965

112- *Propalaeotherium parvulum* LAURILLARD, 1849

valid name: *Eurohippus parvulus* (LAURILLARD, 1849)

113- *Propalaeotherium minutum* RÜTIMEYER, 1891

valid name: *Eurohippus parvulus* (LAURILLARD, 1849)

114- *Plagiolophus minutus* RÜTIMEYER, 1862

valid name: *Eurohippus parvulus* (LAURILLARD, 1849) or *Anchilophus depereti* STEHLIN, 1905

PALAEOTHERIIDAE

115- Valid name: *Palaeotherium castrense* NOULET, 1863 (Fig. 16)

116- Valid name: *Palaeotherium pomeli* FRANZEN, 1968 (Fig. 17)

117- Valid name: *Palaeotherium renevieri* STEHLIN, 1904

118- Valid name: *Palaeotherium ruetimeyeri* STEHLIN, 1905

119- Valid name: *Plagiolophus cartieri* STEHLIN, 1904

ANCHILOPHIDAE

120- Valid name: *Anchilophus depereti* STEHLIN, 1905

LOPHIODONTIDAE

121- Valid name: *Lophiodon rhinocerodes* RÜTIMEYER, 1862

HYRACHYIDAE

122- *Lophiodon cartieri* RÜTIMEYER, 1862

valid name: *Chasmotherium cartieri* RÜTIMEYER, 1862

123- *Lophiodon annectens* RÜTIMEYER, 1891 (Fig. 18)

valid name: *Chasmotherium cartieri* RÜTIMEYER, 1862

**7 - *Ailuravus stehlinschaubi*
WOOD, 1976**

Wood A.E. (1976). The Paramyid Rodent *Ailuravus* from the Middle and Late Eocene of Europe, and its relationships. *Palaeovertebrata*, vol. 7, n°1-2, p. 117-149.

Valid name: *Ailuravus stehlinschaubi* Wood, 1976

Paratype:

Locality: Mormont, Éclépens, Switzerland.

Mt.1567 Upper left M1

Comment: The holotype (MGL 39559) is at the Cantonal Museum of Geology in Lausanne, Switzerland.

THERIDOMYIDAE ALSTON, 1876

8 - *Adelomys cartieri*
STEHLIN & SCHAUB, 1951

STEHLIN H.G. & SCHAUB S. (1951).- Die Trigonodontie der simplicidentaten Nager.- *Schweizerische Palaeontologische Abhandlungen*, vol. 67, 385 p.

Valid name: *Protadelomys cartieri* (STEHLIN & SCHAUB, 1951)

Locality: Egerkingen - Oberbuchsiten, Switzerland.

Holotype:

Ef.1002 Upper right P4-M3

Paratypes:

Eg.587 Lower right p4-m3

Eg.596 Fragment of right maxilla with P4-M2

Eg.597 Upper right M3

Eg.601 Left maxilla with P4-M2

Eh.592 Left maxilla with m1-m2

Ek.249 Upper left M1 and M2

Em.21 Fragment of right mandible with p4-m3

H.E.6 Lower left molar

H.E.14 Right maxilla with M1-M2 and alveoli for M3

MYOXIDAE GRAY, 1821

9 - *Gliravus majori*
STEHLIN & SCHAUB, 1951

STEHLIN H.G. & SCHAUB S. (1951).- Die Trigonodontie der simplicidentaten Nager.- *Schweizerische Palaeontologische Abhandlungen*, vol. 67, 385 p.

Valid name: *Gliravus majori* STEHLIN & SCHAUB, 1951

Locality: Phosphorites du Quercy, France.

Holotype:

Q.P.625 Partial skull with left P4-M2 and right P3-M3

10 - *Gliravus priscus*
STEHLIN & SCHAUB, 1951

STEHLIN H.G. & SCHAUB S. (1951).- Die Trigonodontie der simplicidentaten Nager.- *Schweizerische Palaeontologische Abhandlungen*, vol. 67, 385 p.

Valid name: *Glamys priscus* (STEHLIN & SCHAUB, 1951)

Locality: La Débruge, France.

Lectotype (BOSMA & de BRUIJN, 1979):

Db.486C Lower left m2

Paralectotypes:

Db.486A Lower left d4

Db.486B Lower left p4

Db.486D Lower right m3

Db.656 Upper right M

Locality: Mormont, Switzerland

Mt.386 Right mandible with i and p4-m3

Order: Cimolesta McKENNA, 1975

APATEMYIDAE MATTHEW, 1909

11 - *Carcinella sigei*
KOENIGSWALD et alii, 2009

KOENIGSWALD W. von, RUF I. & GINGERICH P.D. (2009).- Cranial morphology of a new apatemyid, *Carcinella sigei* n. gen. n. sp. (Mammalia, Apatotheria) from the late Eocene of southern France.- *Palaeontographica, Abt. A.*, vol. 288, n° 1-3, p. 53-91.

Valid name: *Carcinella sigei* KOENIGSWALD et alii, 2009

Locality: Phosphorites du Quercy, France.

Holotype:

Q.H.922 Skull

Comment: this is the type species of genus *Carcinella*.

12 - *Heterochiromys fortis* STEHLIN, 1916

STEHLIN H.G. (1915-1916).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, zweite Hälfte: *Caenopithecus* - *Necrolemur* - *Microchoerus* - *Nannopithex* - *Anchomomys* - *Periconodon* - *Amphichiromys* - *Heterochiromys* - Nachträge zu *Adapis* - Schlussbetrachtungen zu den Primaten.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 41, p. 1299-1552.

Valid name: *Heterohyus armatus* (GERVAIS, 1848)

Locality: Egerkingen, Switzerland.

Holotype:

Eh.753 Fragment of left mandible with enbedded i

Paratype:

Eh.606 Upper I

13 - *Heterochiromys gracilis* (STEHLIN, 1916)

STEHLIN H.G. (1915-1916).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, zweite Hälfte: *Caenopithecus* - *Necrolemur* - *Microchoerus* - *Nannopithex* - *Anchomomys* - *Periconodon* - *Amphichiromys* - *Heterochiromys* - Nachträge zu *Adapis* - Schlussbetrachtungen zu den Primaten.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 41, p. 1299-1552.

Valid name: *Heterohyus gracilis* (STEHLIN, 1916)

Locality: Egerkingen, Switzerland.

Holotype:

Eh.757 Right mandible with i

Paratypes:

Eh.755 Left mandible with i

Eh.603 Lower left i

Eh.604 Upper I

Eh.605 Upper I

Eh.607 Upper I

14 - *Calamodon europaeus*

Valid name: *Praecodens acutus* LANGE-BADRÉ, 1981

Locality: Bouxwiller, France.

Holotype:

Bchs.266 Upper right molar

**25 - *Paracynohyaenodon schlosseri*
MARTIN, 1906**

MARTIN R. (1906).- Revision der obereocänen und unteroligocänen Creodonten Europas - Ein Katalog der Materialien von Basel, Genf und Montauban.- *Revue suisse de Zoologie, Annales de la Société zoologique Suisse*, vol. 14, n° 3, p. 405-600.

Valid name: *Paracynohyaenodon schlosseri* MARTIN, 1906

Locality: Phosphorites du Quercy, France.

Lectotype (LANGE-BADRE, 1979):

Q.B.393 Right mandible with m1-m3

26 - *Alienetherium buxvilleri*
LANGE-BADRÉ, 1981

LANGE-BADRÉ B. (1981).- Les créodontes (Mammalia) de Bouxwiller (Bas-Rhin).- *Annales de Paléontologie*, vol. 67, n° 1, p. 21-32.

Valid name: *Alienetherium buxvilleri* LANGE-BADRÉ, 1981

Locality: Bouxwiller, France.

Holotype:

Bchs.481 Left mandible with p2-p4 and m2-m3

27 - *Prodiissopsalis theriodis*
van VALEN, 1965 (Fig. 4)

VALEN L.M. van (1965b).- Some European Proviverrini (Mammalia, Delta-theridia).- *Palaeontology*, vol. 8, n° 4, p. 638-665.

Valid name: *Eurotherium theriodis* (van VALEN, 1965)

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Em.12 Skull

Paratypes:

Em.14b Left mandible with m3

Figure 4: NMB Em.12: Holotype of *Prodiissopsalis theriodis* van VALEN, 1965 now known as *Eurotherium theriodis* (van VALEN, 1965). Scale bar: 10 mm.

En.193 Upper left M2

En.247 Upper M1

28 - *Pterodon magnus*
RÜTIMEYER, 1891

RÜTIMEYER L. (1891).- Die eocäne Säugetier-Welt von Egerkingen.-
Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft, vol.
18, p. 1-153.

Valid name: *Paroxyaena galliae* (FILHOL, 1881)

Locality: Moutier, Switzerland.

Holotype:

Ms.102 Upper left M2

29 - *Hyaenodon ambiguous*
MARTIN, 1906

MARTIN R. (1906).- Revision der obereocänen und unteroligocänen Creo-
donten Europas - Ein Katalog der Materialien von Basel, Genf und Mon-
tauban.- *Revue suisse de Zoologie, Annales de la Société zoologique
Suisse*, vol. 14, n° 3, p. 405-600.

Valid name: *Hyaenodon gervaisi* MARTIN, 1906

Locality: Phosphorites du Quercy, Lot, France.

Lectotype (LANGE-BADRE, 1979):

Q.C.993 Right maxilla with P1-P4, roots for M1 and alveoli for M2

Order: Erinaceomorpha GREGORY, 1910

AMPHILEMURIDAE HILL, 1953

30 - *Alsaticopithecus leemanni*
(HÜRZELER, 1947) (Fig. 5)

HÜRZELER J. (1947).- *Alsaticopithecus leemanni* nov. gen. nov. spec., ein
neuer Primate aus dem unteren Lutétien von Buchsweiler im Unterel-
sass.- *Eclogae Geologicae Helvetiae*, vol. 40, n° 2, p. 343-356.

Valid name: *Amphilemur leemanni* (HÜRZELER, 1947)

Locality: Bouxwiller, France.

Holotype:

Bchs.560a Lower c

Bchs.560e Upper right P1-M3
Bchs.560b Upper P4
Bchs.560c Upper right I
Bchs.560d Upper C
Bchs.560e Upper P4-M3
Bchs.560f Upper right M2-M3
Bchs.560g Lower left p4-m3
Bchs.560h Lower right m1-m3
Bchs.560i Upper P3
Bchs.560j Lower p3
Bchs.560k Lower p1

Figure 5: NMB Bchs.560e: Part of holotype of *Alsaticopithecus leemannii* (HÜRZELER, 1947) now known as *Amphilemur leemannii* (HÜRZELER, 1947). Scale bar: 10 mm.

Paratypes:

Bchs.223 Left mandible p4-m3
Bchs.320 Lower left m
Bchs.321 Lower right molar
Bchs.496 Lower left molar
Bchs.561 Fragment of right mandible with a molar

Comment: there are several specimens for the holotype; HÜRZELER (1947) indicates that they were found isolated but in such a close vicinity (without doubles) that they most probably belong to the same individual. They were all given the single number Bchs. 560 in this publication.

REVILLIOD P. (1919).- L'état actuel de nos connaissances sur les Chiroptères fossiles (Note préliminaire).- *Compte Rendu des séances de la Société de Physique et d'Histoire naturelle de Genève*, vol. 36, n° 3, p. 93-96.

Valid name: *Stehlinia gracilis gracilis* (REVILLIOD, 1919)

Locality: Phosphorites du Quercy, France.

Holotype:

Q.P.632 Rostrum

39 - *Pseudorhinolophus egerkingensis*
REVILLIOD, 1922

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Stehlinia gracilis* (REVILLIOD, 1919)

Syntypes:

Locality: Egerkingen a, Switzerland.

Ef.995 Left maxilla with M1-M3

Ef.998 Fragment of maxilla with broken M2

Comment: REVILLIOD (1922) defined species *Pseudorhinolophus egerkingensis* on these 2 specimens. A third one included in the syntypes' list, Ef. 994, is now considered to belong to a new taxon described in MAÎTRE (2008) and waiting for formal publication.

40 - *Paleunycteris minor*
REVILLIOD, 1922

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Stehlinia minor* (REVILLIOD, 1922)

Locality: Phosphorites du Quercy, France.

Holotype:

Q.P.752 Right mandible with p4-m3 and alveoli

41 - *Paleunycteris pusilla*
REVILLIOD, 1922

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Stehlinia pusilla* (REVILLIOD, 1922)

Locality: Egerkingen a, Switzerland.

Holotype:

Ef.993 Left mandible with m2, (m3), and alveoli for i1-m1

42 - *Paleunycteris quercyi*
REVILLIOD, 1922

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Stehlinia quercyi* (REVILLIOD, 1922)

Locality: Phosphorites du Quercy, France.

Holotype:

Q.P.727 Right mandible with c-m3

43 - *Paleunycteris rutimeyeri*
REVILLIOD, 1922

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Stehlinia rutimeyeri* (REVILLIOD, 1922)

Locality: Egerkingen β, Switzerland.

Holotype:

Ef.992 Fragment of left mandible with P3-M3

Comment: REVILLIOD (1922) names the new species "*Paleunycteris rütimeyeri*" (now *Stehlinia rutimeyeri*), a proper way of spelling it would be "*S. ruetimeyeri*" but common usage and the last revision of the species (MAÎTRE, 2008) spell it "*S. rutimeyeri*".

REVILLIOD, 1920**

REVILLIOD P. (1920).- Contribution à l'étude des Chiroptères des terrains tertiaires (2ème partie).- *Mémoires de la Société Paléontologique Suisse*, vol. 44, p. 61-130.

Valid name: *Vespertiliavus schlosseri* REVILLIOD, 1920

Paralectotypes:

Locality: Phosphorites du Quercy, France.

Q.P.773 Mandible

Q.P.813 Mandible

Locality: Sainte-Néboule de Béduer, Phosphorites du Quercy, Lot, France.

Q.P.793a Mandible

Locality: Mouillac, Phosphorites du Quercy, Tarn-et-Garonne, France.

Q.P.766 Fragment of right mandible with p1-m1

Comment: MAÎTRE (2008) designated specimen numbered "Quercy 1" from the collections of the Natural History Museum Geneva as lectotype.

**46 - *Vespertiliavus wingei*
REVILLIOD, 1920**

REVILLIOD P. (1920).- Contribution à l'étude des Chiroptères des terrains tertiaires (2ème partie).- *Mémoires de la Société Paléontologique Suisse*, vol. 44, p. 61-130.

Valid name: *Vespertiliavus wingei* REVILLIOD, 1920

Locality: Phosphorites du Quercy, France.

Lectotype (MAÎTRE, 2008):

Q.P.855 Fragment of maxilla with P3-M3

Paralectotypes:

Q.H.48 Mandible

Q.H.412 Mandible

Q.H.421 Fragment of mandible

Q.H.422 Fragment of mandible

Q.H.423 Fragment of mandible

Q.H.425 Fragment of mandible

**53 - *Paraphyllophora robusta*
REVILLIOD, 1922 (Fig. 7)**

REVILLIOD P. (1922).- Contribution à l'étude des Chiroptères des terrains tertiaires (3ème partie et fin).- *Mémoires de la Société Paléontologique Suisse*, vol. 45, p. 131-195.

Valid name: *Paraphyllophora quercyi* REVILLIOD, 1922

Locality: Phosphorites du Quercy, France.

Holotype:

Q.P.1000 Skull and mandible

Figure 7: NMB Q.P.1000: Part of holotype (skull not figured) of *Paraphyllophora robusta* REVILLIOD, 1922, now known as *Paraphyllophora quercyi* REVILLIOD, 1922. Scale bar: 10 mm.

**54 - *Palaeophyllophora sanctaenebouliae*
REVILLIOD, 1917**

REVILLIOD P. (1917).- Contribution à l'étude des Chiroptères des terrains tertiaires (1ère partie).- *Mémoires de la Société Paléontologique Suisse*, vol. 43, p. 1-60.

Valid name: *Palaeophyllophora oltina* DELFORTRIE, 1873

Locality: Phosphorites du Quercy, France.

Lectotype (SIGE, 1978):

Q.P.780a Rostrum

Paralectotypes:

Locality: Phosphorites du Quercy, France.

Q.P.710 Fragment of mandible

Q.P.841 Fragment of mandible

Q.P.843 Fragment of mandible

Q.W.31 Fragment of rostrum

Q.W.32 Right mandible with c-m3

Locality: Mouillac, Tarn-et-Garonne, Phosphorites du Quercy, France.

Q.H.179 Skull fragment

Locality: Sainte-Néboule de Béduer, Lot, Phosphorites du Quercy,

France.

Locality: Bach, Lot, Phosphorites du Quercy, France.

Q.U.265 Fragment of rostrum

Q.W.629 Right mandible with c-m3

Order: Primates LINNAEUS, 1758

FAMILY INDET.

55 - *Chasselasia eldredgei* SCHWARTZ & TATTERSALL, 1982

SCHWARTZ J.H. & TATTERSALL I. (1982).- Relationships of *Microadapis sciureus* (STEHLIN, 1916), and two new primate genera from the Eocene of Switzerland.- *Folia Primatologica*, vol. 39, p. 178-186.

Valid name: *Chasselasia eldredgei* SCHWARTZ & TATTERSALL, 1982

Locality: Egerkingen γ, Switzerland.

Holotype:

Eh.751 Fragment of right mandible with m1-m2

Comment: this is the type species of genus *Chasselasia*.

ADAPIDAE TROUESSART, 1829

56 - *Caenopithecus lemuroides* RÜTIMEYER, 1862

RÜTIMEYER L. (1862).- Eocaene Säugetiere aus dem Gebiet des Schweizerischen Jura.- *Neue Denkschriften der allgemeinen schweizerischen Gesellschaft für die gesammten Naturwissenschaften*, vol. 19, p. 1-98.

Valid name: *Caenopithecus lemuroides* RÜTIMEYER, 1862

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Ef.383 Fragment of right maxilla with M1-M3

57 - *Adapis sciureus* STEHLIN, 1916

STEHLIN H.G. (1915-1916).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, zweite Hälfte: *Caenopithecus - Necrolemur - Microchoe-*

rus - *Nannopithecus* - *Anchomomys* - *Periconodon* - *Amphichiromys* - *Heterochiromys* - Nachträge zu *Adapis* - Schlussbetrachtungen zu den Primaten.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 41, p. 1299-1552.

Valid name: *Microadapis sciureus* (STEHLIN, 1916)

Locality: Egerkingen γ, Switzerland.

Lectotype (SZALAY, 1974):

Eh.750 Fragment of Left mandible with C-M3

Paralectotype:

Eh.772 Left upper M1/2

58 - *Adapis sudrei*
GINGERICH, 1977

GINGERICH P.D. (1977).- New species of Eocene Primates and the phylogeny of European Adapidae.- *Folia Primatologica*, vol. 28, p. 60-80.

Valid name: *Adapis sudrei* GINGERICH, 1977

Paratype:

Locality: Robiac, France.

Rb.54 Left mandible with m2 and Alveoli for m3

Comment: the holotype (RBN-5120) is at the University of Montpellier II, France.

59 - *Adapis ruetimeyeri*
STEHLIN, 1912

STEHLIN H.G. (1912).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, erste Hälfte: *Adapis*.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 38, p. 1165-1298.

Valid name: *Adapis ruetimeyeri* STEHLIN, 1912

Syntypes:

Locality: Egerkingen α, Switzerland.

Locality: Egerkingen γ, Switzerland.

Em.2 Right mandible with p2-m3

60 - *Alsatia dunaifi*
TATTERSALL & SCHWARTZ, 1983

TATTERSALL I. & SCHWARTZ J.H. (1983).- A new genus and species of adapid primate from the Middle Eocene of Alsace, and a new genus for "*Adapis ruetimeyeri*" STEHLIN, 1912.- *Folia primatologica*, vol. 41, p. 231-239.

Valid name: *Europolemur klatti* (WEIGELT, 1933)

Locality: Bouxwiller, France.

Holotype:

Bsch.648 Right upper M1

Paratypes:

Bsch.274 Right upper M1/2

Bsch.305 Right upper M1/2

Bsch.315 Left upper M1/2

Comment: The original species name (TATTERSALL & SCHWARTZ, 1983) was synonymised to *Europolemur klatti* by FRANZEN (2004).

61 - *Simonsia lynnae*
SCHWARTZ & TATTERSALL, 1982

SCHWARTZ J.H. & TATTERSALL I. (1982).- Relationships of *Microadapis sciureus* (STEHLIN, 1916), and two new primate genera from the Eocene of Switzerland.- *Folia Primatologica*, vol. 39, p. 178-186.

Valid name: *Simonsia lynnae* SCHWARTZ & TATTERSALL, 1982

Locality: Egerkingen γ, Switzerland.

Holotype:

Eh.770 Fragment of left mandible with m2-m3

Paratypes:

Locality: Egerkingen γ, Switzerland.

Eh.760 Right Mandible with m2-m3

Eh.764 Fragment of left mandible with m2-m3

Locality: Egerkingen - Oberbuchsiten, Switzerland.

En.2 Fragment of right mandible with p4-m2

Locality: Egerkingen α, Switzerland.

Ef.381 Lower left m1/2

Comment: this is the type species of genus *Simonsia*

**62 - *Anchomomys stehlini*
GINGERICH, 1977**

GINGERICH P.D. (1977).- New species of Eocene Primates and the phylogeny of European Adapidae.- *Folia Primatologica*, vol. 28, p. 60-80.

Valid name: *Anchomomys stehlini* GINGERICH, 1977

Locality: Egerkingen γ, Switzerland.

Holotype:

En.1 Right mandible with p4-m3

Paratypes:

Eh.748a left mandible with m1-m2

Eh.749 Left mandible with m3

**63 - *Caenopithecus pygmaeus*
RÜTIMEYER, 1890**

RÜTIMEYER L. (1890).- Übersicht der eocänen Fauna von Egerkingen nebst einer Erwiederung an Prof. E.D. COPE.- *Verhandlungen der Naturforschenden Gesellschaft in Basel*, vol. 9, p. 331-362.

Valid name: *Anchomomys stehlini* GINGERICH, 1977

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Ef.367 Upper right M1

Paratype:

Ef.372 Upper right M2

Comment: It was first moved to new genus *Anchomomys* by STEHLIN (1916) and later synonymised with the newly defined species *A. sehlinsi* by GINGERICH (1977).

**64 - *Protadapis brachyrhynchus*
(STEHLIN, 1912) (Fig. 8)**

Figure 9: NMB Q.H.441: One of the syntypes of *Necrolemur antiquus major* STEHLIN, 1916. Scale bar: 10 mm.

Valid name: *Necrolemur antiquus major* STEHLIN, 1916

Syntypes:

Locality: Larnagol, Lot, Phosphorites du Quercy, France.

Q.H.470a Skull

Locality: Lamandine, Tarn-et-Garonne, Phosphorites du Quercy, France.

Q.H.441 Right mandible with c-m3

Q.H.468 Right maxilla with P3-M3

Locality: Cajarc, Lot, Phosphorites du Quercy, France.

Q.H.442 Left mandible with c-m3

68 - *Nannopithecus pollicaris* STEHLIN, 1916

STEHLIN H.G. (1915-1916).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, zweite Hälfte: *Caenopithecus* - *Necrolemur* - *Microchoerus* - *Nannopithecus* - *Anchomomys* - *Periconodon* - *Amphichiromys* - *Heterochiromys* - Nachträge zu *Adapis* - Schlussbetrachtungen zu den Primaten.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 41, p. 1299-1552.

Valid Name: *Nannopithecus filholi* CHANTRE & GAILLARD, 1897

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Ef.369 Fragment of right maxilla with M1-M3

**69 - *Microchoerus ornatus*
STEHLIN, 1916**

STEHLIN H.G. (1915-1916).- Die Säugetiere des schweizerischen Eocaens, Siebenter Teil, zweite Hälfte: *Caenopithecus* - *Necrolemur* - *Microchoerus* - *Nannopithex* - *Anchomomys* - *Periconodon* - *Amphichiromys* - *Heterochiromys* - Nachträge zu *Adapis* - Schlussbetrachtungen zu den Primaten.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 41, p. 1299-1552.

Valid name: *Microchoerus ornatus* STEHLIN, 1916

Locality: Entreroches, Mormont, Switzerland.

Holotype:

Mt.132 Right maxilla with P2-M3

Order: Artiodactyla OWEN, 1848

CHOEROPOTAMIDAE OWEN, 1845

Tapirulus is here included after HOOKER & THOMAS (2001) followed by ERFURT & MÉTAIS (2007).

**70 - *Choeropotamus depereti*
STEHLIN, 1908**

STEHLIN H.G. (1908). Die Säugetiere des schweizerischen Eocaens, Fünfter Teil: *Choeropotamus* - *Cebochoerus* - *Choeromorus* - *Haplobunodon* - *Rhagatherium* - *Mixtotherium*.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 35, p. 691-837.

Valid name: *Choeropotamus depereti* STEHLIN, 1908

Locality: Saint Hippolyte de Caton - Euzet-les-Bains, France.

Holotype:

St.H.20 Right mandible with m1-m2

St.H.21 Lower right D4

Paratype:

Locality: Mormont, Éclépens, Switzerland

Mt.21 Fragment of lower left molar

Comment: both specimens of the holotype were given 2 numbers but they might well belong to the same individual.

DICHOBUNIDAE TURNER, 1849

77 - *Necrolemur cartieri* RÜTIMEYER, 1891

RÜTIMEYER L. (1891).- Die eocäne Säugethier- Welt von Egerkingen.-
Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft, vol.
18, p. 1-153.

Valid name: *Mouillacitherium cartieri* (RÜTIMEYER, 1891)

Locality: Egerkingen a, Switzerland.

Lectotype (STEHLIN, 1906):

Eg.529 Left maxilla with P4-M3

Paralectotypes:

Locality: Egerkingen (old collection), Switzerland.

En.254 Lower m2

Locality: Egerkingen a, Switzerland.

Eg.550 Upper left M2

Eg.551 Upper right M2

**78 - *Dichobune spinifera*
STEHLIN, 1906**

STEHLIN H.G. (1906).- Die Säugetiere des schweizerischen Eocaens, Vierter Teil: *Dichobune* - *Mouillacitherium* - *Meniscodon* - *Oxacron*.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 33, p. 596-690.

Valid name: *Hyperdichobune spinifera* (STEHLIN, 1906)

Locality: Entreroches, Mormont, Switzerland.

Holotype:

Mt.147 Right maxilla with D3-M2

Comment: this is the type species of genus *Hyperdichobune*.

**79 - *Hyperdichobune hammeli*
SUDRE, 1978**

SUDRE J. (1978).- Les Artiodactyles de l'Éocène moyen et supérieur d'Europe occidentale (Systématique et évolution).- *Mémoires et Travaux de l'Institut de Montpellier de l'École Pratique des Hautes Études*, vol. 7, 229 p.

Valid name: *Hyperdichobune hammeli* SUDRE, 1978

Locality: Bouxwiller, France.

Holotype:

Bchs.570 Right mandible with p4-m2

Paratypes:

Bchs.233a Upper right M3

Bchs.233b Upper right M2

Bchs.235 Left mandible with m2-m3

Bchs.262a Upper right M3

Bchs.262b Upper right M2

Bchs.273a Lower m3

Bchs.398 Upper M

Bchs.430 Upper right M1

Bchs.432 Upper left D

Bchs.521 Upper right M

Bchs.522 Upper right D4

Bchs.572 Upper right M2-M3

**80 - *Hyperdichobune spectabilis*
STEHLIN, 1910**

STEHLIN H.G. (1910).- Die Säugetiere des schweizerischen Eocaens, Sechster Teil: *Catodontherium* - *Dacrytherium* - *Leptotheridium* - *Anoplotherium* - *Diplobune* - *Xiphodon* - *Pseudamphimeryx* - *Amphimeryx* - *Dichodon* - *Haplomeryx* - *Tapirus* - *Gelocus* - div. Nachträge.- Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft, vol. 36, p. 838-1164.

Valid name: *Hyperdichobune spectabilis* STEHLIN, 1910

Locality: Entreroches, Mormont, Switzerland.

Holotype:

Mt.392 Left mandible with p4-m3

**81 - *Dichobune langi*
RÜTIMEYER, 1891**

RÜTIMEYER L. (1891).- Die eocäne Säugetier-Welt von Egerkingen.- Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft, vol. 18, p. 1-153.

Valid name: *Hyperdichobune langi* (RÜTIMEYER, 1891)

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Eg.213 Right maxilla with M1-M3

**82 - *Dichobune nobilis*
STEHLIN, 1906**

STEHLIN H.G. (1906).- Die Säugetiere des schweizerischen Eocaens, Vierter Teil: *Dichobune* - *Mouillacitherium* - *Meniscodon* - *Oxacron*.- Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft, vol. 33, p. 596-690.

Valid name: *Hyperdichobune nobilis* (STEHLIN, 1906)

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Eg.210 Right maxilla with M2-M3

83 - *Meniscodon picteti*
RÜTIMEYER, 1888

RÜTIMEYER L. (1888).- Über einige Beziehungen zwischen den Säuge-thierstämmen Alter und Neuer Welt. Erster Nachtrag zu der eocänen Fauna von Egerkingen.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 15, p. 1-63.

Valid name: *Meniscodon picteti* RÜTIMEYER, 1888

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Eg.513 Upper left M2

Comment: this is the type species of genus *Meniscodon*.

84 - *Phenacodus europaeus*
(RÜTIMEYER, 1888) (Fig. 11)

RÜTIMEYER L. (1888).- Über einige Beziehungen zwischen den Säuge-thierstämmen Alter und Neuer Welt. Erster Nachtrag zu der eocänen Fauna von Egerkingen.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 15, p. 1-63.

Valid name: *Meniscodon europaeum* (RÜTIMEYER, 1888)

Locality: Egerkingen (old collection), Switzerland.

Holotype:

Eg.514 Upper right M1

Paratypes:

Locality: Egerkingen (old collection), Switzerland.

Eg.512 Upper Left M2

Eg.518 Left maxilla with M1-M3

Eg.523 Right maxilla with D3-D4 and alveoli for D2, M1-M2

Eg.556a Right maxilla with M2-M3 + isolated Humerus fragment

Eg.557a Upper right M2

Eg.558a Upper right M2

Eg.559a Right maxilla with M2-M3

Figure 11: NMB Eg.514: Holotype of *Phenacodus europaeus* (RÜTIMEYER, 1888) now known as *Meniscodon europaeum* (RÜTIMEYER, 1888). Scale bar: 10 mm.

**85 - *Buxobune daubreei*
SUDRE, 1978**

SUDRE J. (1978).- Les Artiodactyles de l'Éocène moyen et supérieur d'Europe occidentale (Systématique et évolution).- *Mémoires et Travaux de l'Institut de Montpellier de l'École Pratique des Hautes Études*, vol. 7, 229 p.

Valid name: *Buxobune daubreei* SUDRE, 1978

Locality: Bouxwiller, France.

Holotype:

Bchs.516 Upper M1 or M2

Paratypes:

Bchs.97 Lower m2-m3

Bchs.206 Upper right M1

- Bchs.395 Lower m1-m3
 Bchs.396 Mandible with p4-m3
 Bchs.431 Upper M1 or M2

109 - *Lophiotherium elegans* RÜTIMEYER, 1862

RÜTIMEYER L. (1862).- Eocaene Säugetiere aus dem Gebiet des Schweizerischen Jura.- *Neue Denkschriften der allgemeinen schweizerischen Gesellschaft für die gesammten Naturwissenschaften*, vol. 19, p. 1-98.

Valid name: Equoidea indet.

Paralectotypes:

Locality: Egerkingen (old collection), Switzerland.

Eb.543 C

Ee.195 Fragment of right mandible with m3

Comment: the lectotype (A/V212) is at the paläontologisches Institut und Museum Zürich under the name Equoidea indet.

Comment: the material of *Tapinodon gresslyi* seems to be lost since 1862 and the NMB only holds plates of the description by STEHLIN (1905) where he described it as a "Palaeohippidae indet.". As far as *Lophiotherium elegans* is concerned, the NMB only has a cast of a lower m3 (cast number Ee.194) and the rest of the material seems to be lost, only plates of the material published in STEHLIN (1905) are currently kept, the material is also referred to as "Palaeohippidae indet."

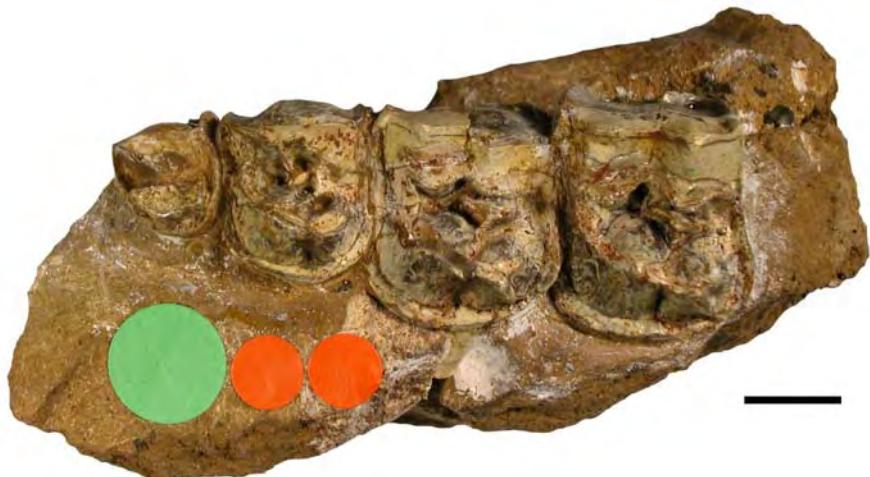

Figure 16: NMB Ec.403: Lectotype of *Palaeotherium castrense* NOULET, 1863. Scale bar: 10 mm.

Valid name: *Palaeotherium castrense* NOULET, 1863

Locality: Egerkingen a, Switzerland.

Lectotype (FRANZEN, 1968):

Ec.403 Left maxilla with P1-P4

Paralectotypes:

Locality: Egerkingen (old collection), Switzerland.

Ec.414 Upper left P4

Locality: Egerkingen a, Switzerland.

Ec.412 Upper left P3

Ec.413 Upper left P2

116 - *Palaeotherium pomeli*
FRANZEN, 1968 (Fig. 17)

FRANZEN J.L. (1968).- Revision der Gattung *Palaeotherium* CUVIER 1804 (Palaeotheriidae, Perissodactyla, Mammalia).- PhD Thesis, Naturwissenschaftlich-mathematische Fakultät der Albert-Ludwigs-Universität zu Freiburg, 181 p.

Figure 17: NMB Cst.157: Holotype of *Palaeotherium pomeli* FRANZEN, 1968. Scale bar: 10 mm.

Valid name: *Palaeotherium pomeli* FRANZEN, 1968

Locality: La Badayre, Sables du Castrais, France.

Holotype:

Cst.157 Right mandible with p2-m3

117 - *Palaeotherium renevieri*
STEHLIN, 1904

STEHLIN H.G. (1904).- Die Säugetiere des schweizerischen Eocaens, Zweiter Teil: *Palaeotherium* - *Plagiolophus* – *Propalaeotherium*.- *Abhandlungen der Schweizerischen Palaeontologischen Gesellschaft*, vol. 31, p. 154-258.

Valid name: *Palaeotherium renevieri* STEHLIN, 1904

Locality: Entreroches, Mormont, Switzerland.

Lectotype (FRANZEN, 1968):

Mt.151 Skull fragment with left C, D1, P2-M3

Paralectotypes:

Mt.109 Lower left c

Mt.135 Lower left d3

Mt.152 Skull fragment with left D1-D3 and M1

Mt.154 Fragment of mandible with right p2-m3 and left p4-m1

Acknowledgments

Several colleagues gave precious information on valid and invalid names or provided important references: we thank Olivier MARIDET (rodents), Bernard SIGÉ and Élodie RIGAUD (bats), Jens Lorenz FRANZEN and Jean RÉMY (perissodactyls), and Heinz FURRER (Zurich). A special thank to Floreal SOLE for his extensive information on creodonts. We thank Félix WIEDENMAYER (NMB) who spent several years in the 1990s checking all the type literature, digitalising several thousands of fossils, and labelling the types with regards to their nature; this work considerably facilitated the making of this catalogue. We also thank Burkart ENGESSER, the former curator for vertebrates at the NMB, who kept the collection in its highest standard; he was always willing to help when questions came from our side. The idea of this catalogue was stimulated by the 22nd International Senckenberg Conference (Frankfurt am Main, November 2011) and we thank the organisers, and especially Thomas LEHMANN, for encouraging this project.

We finally thank Bruno GRANIER for his editorial work.
