ACKNOWLEDGMENTS

The writer of this thesis is greatly indebted to Dr. J. Harold Greenlee, Professor of New Testament at Asbury Theological Seminary, for suggesting the topic of research, and for guiding the project to its completion.

Dr. Wilbur Dayton, Professor of New Testament at Asbury Theological Seminary, has given suggestions as a second reader, and Professor Dennis Kinlaw, Associate Professor of Old Testament at Asbury Theological Seminary, translated the section in French. To these men the writer offers his appreciation.

Mr. Onva Boshears, Assistant Librarian, Asbury Theological Seminary, furnished valuable suggestions regarding thesis form and procedure.

Finally, the writer offers his grateful thanks to his wife, Wanda, for her patience and encouragement, and for typing the manuscript.

CHAPTER I

PRELIMINARY CONSIDERATIONS CONCERNING PAPYRUS BODMER XV

The discovery of new manuscripts presents several problems to the textual critic. First, the textual affinity of the new manuscript must be established. Secondly, the position of textual criticism which has been held must be re-evaluated in the light of these new discoveries. Among the manuscripts which have recently been brought to light, the several Bodmer Papyri have been of particular significance. These manuscripts have added evidence of the first order to the textual tradition of the New Testament in the very earliest period of textual history.

This paper deals with the text of Papyrus Bodmer XV (P⁷⁵). P⁷⁵ is actually one manuscript containing the Gospels of Luke and John. Bibliotheca Bodmeriana has given the designation "Papyrus Bodmer XIV" to the Gospel of Luke, and "Papyrus Bodmer XV" to the Gospel of John. Luke contains the greater part of chapters 3-24, and John contains most of chapters 1-15.

The aim of the present project is to examine the textual affinities of Papyrus Bodmer XV by collating its text against that of the Textus Receptus and attempting to determine the textual character of its variants from the Textus Receptus.

I. PAPYRUS BODMER XV

Contents of the papyrus. Papyrus Bodmer XV contains thirty-eight leaves of John's Gospel. Some portions of the manuscript are more fragmentary than others. Chapters 1-5:23 and chapters 8:22-10:14 have been preserved almost entirely except for a few places at the beginning or end of a line. Chapters 5:23-8:22 are fragmentary, as are chapters 10:14-15:7-8. Chapter 12:1-49 is very fragmentary. Chapter 13 contains parts of verses 1 and 2 and parts of 3-10. Chapter 14 includes verses 9-30. Chapter 15 has portions of verses 6-8.

The codex originally contained about seventy-two folios, according to Metzger, with only fifty-one surviving. It is in a form of a single quire, measuring 26 by 13 cm., with an average of forty-two lines of text in single columns per page.¹ However, a close examination of the codex reveals that there are forty-three lines per page rather than forty-two.

Date of the papyrus. The editor of the Papyrus Bodmer XV believes that it was written between 175 and 225 A.D., that is, somewhere around 200 A.D. He

¹Bruce M. Metzger, "The Bodmer Papyrus of Luke and John," The Expository Times, LXXIII (April, 1962), 201.

suggests that it is a little earlier than Bodmer Papyrus II, P⁶⁶.² This places the manuscript one or one and one half centuries earlier than Codex Vaticanus (B) and Codex Sinaiticus (A). It is the earliest manuscript of the Gospel extant except the Rylands fragment of the Gospel of John (P⁵³). The Rylands fragment, however, contains only a few verses, whereas P⁷⁵ includes a total of fifty-one leaves which embrace the greater part of the Gospels of Luke and John.

The date assigned places the manuscript contemporary with Clement of Alexandria, who died c. 215 A.D., and Origen of Alexandria, who died c. 253 A.D. Thus the text is older than the Chester Beatty papyri, as well as Sahidic and Bohairic versions, and almost all other witnesses.

Significance of the papyrus. Besides the early date of the manuscript, it has significance in several areas. Metzger points out that it has a great significance on the bearing of the history of the church in Egypt:

Some scholars (for example W. Bauer) have held that during the second century Greek-speaking Christianity in Egypt was relatively primitive.

²Floyd V. Filson, "More Bodmer Papyri," The Biblical Archaeologist, XXV (January, 1962), 52.

The discovery now of a copy of two gospels, dating from about A.D. 200, in the form of text which many have judged to be the result of scholarly editorial work at Alexandria in the fourth century, speaks eloquently for the high level of recensional activity of those second century Egyptian Christians who were responsible for its preservation and transmission.³

The papyrus is significant in that it generally agrees with Codex B and the Alexandrian text type. In common with the Alexandrian text type, it has several noteworthy omissions, especially the story of the woman taken in adultery (7:53-8:11) and the section in the healing of the lame man which speaks of the angel troubling the waters (5:3b-4).

The presence of P⁷⁵ makes it clear that at the end of the second century and the beginning of the third century, a text type essentially identical with the Alexandrian was in existence in Egypt. Thus, the scribes of B and \mathcal{N} ' did not create their own type of text, but transmitted it.

II. METHOD OF INVESTIGATION

The procedure in investigation has been, first of all, to compare the manuscript with the Textus Receptus.⁴

³Metzger, op. cit., p. 203.

⁴Novum Testamentum, Oxonii: Clarendoniano, 1863.

Then the witnesses for the variants have been collated from the textual apparatuses of the following, and in the order given: Tischendorf,⁵ Merk,⁶ von Soden,⁷ Souter,⁸ Nestle,⁹ and Bover.¹⁰ In order to understand these works, the writer has referred to Gregory's Prolegomena;¹¹ Kraft's key to von Soden;¹² Robertson's Introduction;¹³

⁵Constantinus Tischendorf (ed.), Novum Testamentum Graece, Vol. II, Editio octava critica major, 3 vols.; Lipsiae: Giesecke and Devrient, 1869.

⁶Augustinus Merk (ed.), Novum Testamentum, Eighth edition, Romae: Sumptibus Pontificii Institutii Biblici, 1957.

⁷Hermann Freiherr von Soden (ed.), Die Schriften Des Neuen Testaments, Göttingen: Vandenhoeck und Ruprecht, 1913.

⁸Alexander Souter (ed.), Novum Testamentum Graece, Editio altera, London: Oxford University Press, 1956.

⁹Eberhard Nestle (ed.), Novum Testamentum Graece, 24th ed. Stuttgart: American Bible Society, 1960.

¹⁰Joseph M. Bover (ed.), Novi Testamenti Biblia Graeca et Latina, Fourth edition, Matriti, 1959.

¹¹Caspar Rene' Gregory, Prolegomena, Vol. III of Novum Testamentum Graece, Editio octava critica major, Edited by Constantinus Tischendorf, 3 vols.; Lipsiae: J.C. Henrichs, 1894.

¹²Benedikt Kraft, Die Zeichen für die wichtigeren Handschriften des griechischen Neuen Testaments, Freiburg, Germany: Herder, 1955.

¹³A. T. Robertson, An Introduction to the Textual Criticism of the New Testament, Nashville: Broadman, 1925.

and to Greenlee's "New Testament Textual Criticism for Beginners."¹⁴

In addition to the apparatuses in these works, the variants have been collated against Codex Θ ¹⁵ and P⁶⁶¹⁶ individually, and in several areas against Codex B.¹⁷

The data which has been gleaned from these sources have been evaluated following the method of Greenlee in The Gospel Text of Cyril of Jerusalem.¹⁸

In the tables of the variants of Papyrus Bodmer XV from the Textus Receptus, there are five columns classifying the witnesses: the first column is for the witnesses of the Alexandrian text-type; the second is for the Caesarean text-type; the third is for the Western

text-type; the fourth is for the Byzantine text-type; the last for those who have no classification according to text-type. Where a variant is singular or has no known attestation, the symbol  is used to indicate this fact.

CHAPTER II

TEXT OF PAPYRUS BODMER XV

I. ORTHOGRAPHIC PECULIARITIES OF PAPYRUS BODMER XV

The scribe of Papyrus Bodmer XV has a particular way of spelling which is different from the Textus Receptus. Often he uses ει for long ι, as in γινωσκεις] γεινωσκεις (3:10); αρχιτρικλινω] αρχιτρικλεινω (2:8). He makes consistent usage of the movable ν, as πιστευ-σωσι] πιστευσωσιν (1:7), and ηλθε] ηλθεν (1:11). ν at the end of a line is indicated by a horizontal line above and extending, as τη̄ (1:23).

The orthography of the name "John" varies. The name ιωαννης appears with a single ν four times; with a double ν twelve times; with a second ν inserted above 2 times. Codex D has ιωαννης spelled with a double ν 17 times and a single ν 4 times. Codex B uses the single ν completely.

The papyrus has the usual contractions for the divine names and some proper names. θεος is θ̄ς (1:1); ανθρωπον is αν̄ον (4:29); πνευμα is π̄να (1:32); Ισραηλ is ῑηλ (1:31).

There are no accent marks in the papyrus. The rough breathing mark occurs over words which might be confused. (e.g. ε̄ις, ε̄ν, ε̄ξ, ο̄ν, ο̄).

Elision occurs for the word $\alpha\lambda\lambda\alpha$ ($\alpha\lambda\lambda'$ 1:14; 1:33). Crasis often appears for $\kappa\alpha\iota \epsilon\gamma\omega$, which becomes $\kappa\alpha\gamma\omega$.

II. PALEOGRAPHIC DETAILS OF PAPYRUS BODMER XV

The scribe indicates sub-divisions of the text by leaving several blank spaces after a word and punctuation, as $\overline{\alpha\nu\theta\upsilon}$. $\kappa\alpha\iota$ (1:51-2:1). Sub-divisions are indicated at the end of the following passages: 1:34; 1:51; 2:22; 2:25; 4:39; 4:54; 6:42; 7:36; 7:39; 7:52; 8:27; 8:50; 10:33. Metzger indicates several other features of division:

Sometimes at the end of one section and the beginning of another he left blank a space normally occupied by several letters. Frequently he used also a suspended point at the close of the preceding section. Occasionally he inserted a short horizontal line near the left margin (the $\mu\epsilon\tau\alpha\sigma\tau\epsilon\lambda\epsilon\iota\alpha$), with or without extending slightly into left margin the first letters of the following line. In some cases these breaks in sense occur at the same places as similar breaks in P⁶⁶, but in other cases the two manuscripts differ. Obviously, at the time when these two papyri were copied, no fixed and complete system of sub-divisions of the Gospels had gained currency in Egypt. Though in many cases the divisions happen to coincide with modern editors' judgments regarding paragraphing the text, this coincidence should not be thought remarkable, for not infrequently the divisions are clearly demanded by the sense of the text.¹⁹

¹⁹Metzger, "The Bodmer Papyrus of Luke and John," The Expository Times, p. 201.

Several corrections have been made in the text. Metzger feels some to be in the same hand, others inserted by later scribes.²⁰

A corruption appears at 4:5 where Papyrus Bodmer XV reads ερχεταιι for ερχεται . A corrector has added the words ουν εις πολιν σαμαρειας at the bottom of the leaf after this word in 4:5. An arrow in the margin pointing up (↑) and one at the side of the addition pointing down (↓) indicates these words are to be included. Metzger believes these to be by the same hand.²¹ However, the letters are smaller in size, and are written on a slanting line, which is easily distinguishable from the beautiful lines made by the scribe.

In 4:13 a corrector has smeared in α above πως. In 4:36 ων has been crossed out of χαιρων, and η placed above. In 4:47 ται appears above ιαση. This appears to be by a corrector, as the δ does not have the tail δ as the original uses.

In 5:5 στη appears above εχων. It is somewhat smeared, set on an angle, and is written with a heavier pen than the original scribe and the first corrector. In 5:47 a smaller σ appears above ετε of πιστευετε.

²⁰Ibid., p. 202.

²¹Ibid., p. 201.

In 6:54 a ν appears above $\tau\eta$. It is N as against the original N . In 6:59 $\alpha\gamma\omega$ reads $\alpha\gamma\omega^{\nu\eta}$, with a heavier pen used. In 7:43 $\sigma\chi\iota\mu\alpha$ has σ above the ι with a different type σ used.

Letters have often been crossed out by a corrector, (e.g., the second ι in $\epsilon\iota\pi\epsilon\iota\nu$, 4:27; the first λ in $\pi\omicron\lambda\lambda\upsilon\nu$, 5:6). Occasionally a corrector has placed parentheses over a section which he feels is not to be included, as $(\alpha\pi\epsilon\sigma\tau\epsilon\iota\lambda\alpha\nu . . . \tau\omicron\nu)$ (11:3).

Another hand has added the words $\tau\omicron\nu \nu\omicron\nu \omega\varsigma$ $[\kappa\lambda\upsilon\rho\iota\omicron\nu]$ $\alpha\pi\omicron$ $\tau\eta\varsigma$ $\tau[\rho\alpha]\mu\epsilon\zeta$ at the end of the page which contains 7:49-8:22. The Coptic letters $[XH$ $\overline{MILEYH}]$ appear above 12:20. Regarding these inscriptions in the margins the editor says:

Aside from the corrections which are marked, one finds sometime in the margin inscriptions of writing without relation to that of the text. The origin of these inscriptions remains problematic, aside from that of f^o 21, where the words traced in the margin, in irregular capitals, as though by a child, reproduce the end of the first line of the page: TOY YON $\Omega\varsigma$ $[K]YPIO[N]$ $\alpha\pi\omicron$ $TH\varsigma$ $T[PA]MEZ[HE\varsigma]$. Two others remain, for us, unexplained: v. f^o 54 some words placed in the opposite direction to that of the text of the page, the writing regular, large: f^o 61 where the hand is still different; the reading remains doubtful, one can even question if there is not Coptic here, for the second letter resembles the djandja (followed by $N?$), but one can affirm nothing.²²

²²Papyrus Bodmer XIV, Coligny-Geneve, Switzerland: Bibliotheca Bodmeriana, 1961, p. 24. (Translated from the French by Professor Dennis Kinlaw, Asbury Theological Seminary).

In a footnote, the editor has suggested that "by preserving XH, one can read also: [TA]PXH ΜΠΕΥΑ[ΓΓΕΛΙΟΝ]

Thus it is safe to conclude that two or three correctors or interpolators have used or worked on the manuscript.

III. TEXTUAL AFFINITIES OF PAPYRUS BODMER XV

The tables show a great variety of variants from the Textus Receptus. The greatest number of variants appear in change of word order, changes in a verb (tense, mood, or number), and spelling. Omission of a word or words is frequent. Following is a list of the types of variants and an example of each:

Change of word order ουκ ειμι εγω] εγω ουκ ειμι
(1:20)

Verbal changes (tense, mood, number) ιδετε] οφεσθε
(1:40)

Noun changes (case, number) το κερμα] τα κερματα
(2:15]

Pronouns

Additions ασθενια] add αυτου (5:5)

Omissions εγω] omit (1:27)

* Change οικον²] οικου (2:16)

Substitution-pronouns for nouns τον Ιησουν] αυτον
(3:2)

²³Ibid. * Note: This should be included under nouns.

Conjunctions

Addition	ηλθον] add ουν	(1:40)
Omission	δε] omit	(1:26)
Change	και] οτι	(1:16)

Words

Omission	ος εμπροσθεν μου γεγονεν] omit	(1:27)
Addition	αυτω] add ο ῑς	(1:44)
Change	οτε] εν η ημερα	(9:14)

Article

Omission	τω ²] omit	(1:31)
Addition	πωλουντας] add τας	(2:14)
Omit ο	ο Ιωαννης] omit ο	(1:35)
Add ο	Ιωαννης] ο ιωαννης	(1:28)

Divine names

Omission	ο θεος ³] omit	(3:34)
Change	ο Χριστος ο υιος] ο α[γιος] (6:69)	

It is significant that Papyrus Bodmer XV frequently has shorter readings than the Textus Receptus, but rarely does it have longer readings.

Most of the variants are inconsequential except for textual studies. However, the papyrus supports some of the more important readings of the Alexandrian text-type.

One important variant theologically is in 1:18 where the choice is between μονογενης θεος and μονογενης

υιος. The Byzantine reading is υιος, but \aleph ECLW 33, 350, Bohairic, Sahidic, Origen, Cyril of Alexandria, and many of the Fathers had supported θεος. Now p⁶⁶ and p⁷⁵ both add support for θεος. Thus θεος, a difficult but understandable reading which makes sense, and, in view of the external testimony, is preferable.

In 1:23 Papyrus Bodmer XV reads βηθανια (Bethany) rather than Βηθαβαρα with \aleph ECL. βηθανια would be more likely, since the author was probably trying to distinguish the Bethany beyond Jordan from the one near Jerusalem.

The papyrus reads ιωαννου for the name of Simon Peter's father, in agreement with χ BLW and p⁶⁶.

The manuscript omits μη αποληται αλλ in 3:15 with \aleph BL 33. These words may have been added in 3:15 by an ancient scribe under the influence of 3:16.

The latter part of 5:3 and all of 5:4 are not included. This section, describing the moving of the waters at the pool of Bethesda, is omitted with χ BCWD and p⁶⁶.

The longest omission is that of 7:53-8:4, which is in agreement with excellent Alexandrian support, good Caesarean, some Western, p⁶⁶, X, many minuscules, and some Fathers. The scribe does not indicate that he had knowledge of this passage, as nothing but the regular

sub-division of the text occurs at the end of 7:52.

In 10:7, instead of the traditional text, "I am the door of the sheep," Papyrus Bodmer XV replaces "the door" (η θυρα) by "the shepherd" (ο ποιμην). Here Papyrus Bodmer XV is supported by the Sahidic alone.

There are several passages which have had very small support but are now attested by Papyrus Bodmer XV. Formerly only B was a witness to ηλειας against ηλιας in 1:21, but P⁷⁵, P⁶⁶ and Θ support this reading.

Papyrus Bodmer XV concurs with B and slight other support in using the first aorist form of some verbs instead of the second aorist. Examples are ειδαν for ειδον, and ειπαν for ειπον. Other instances where the Papyrus supports B with little other support include the following:

3:27	ουδεν] ουδε εν	with B, P ⁶⁶ 472 Chr
4:52	παρ αυτων] omit ωραν] add εκεινην	with B 1194 with B 350
5:19	ο Ιησους] omit	with B Tert 472 347
6:42	ουχι] ουχι	with B T
8:12	ο] omit	with B
8:25	ο] omit	with B 476
8:28	Ιησους] add οτι	with B Sah P ⁶⁶
8:34	ο] omit	with B 0141
9:11	Σιλωαμ] σειλωαμ	with B

9:27	ττ] add ουυ	With B P ⁶⁶ Aeth
9:36	εσττ] add εθη	with B P ⁶⁶
9:41	ο] omit	with B P ⁶⁶
14:16	ατωνα] add η	with B

It will be noted that Papyrus Bodmer XV has a close affinity to the Alexandrian text-type, and to the fourth century manuscript B. Of the 609 variants, 357 show good Alexandrian support, and 508 of the variant readings agree with B.

Porter has collated Papyrus Bodmer XV with B and lists 205 variants. Of these, 33 are in the use of the article; 27 are variations in word order; 30 are variations in the use of conjunctions; and 25 in the tense and mood of verbs. He concludes that the text of B is essentially the same as that of P⁷⁵.²⁴

The present writer approached the investigation without having any previous knowledge of the textual affinity of the manuscript, but must conclude, on the basis of the following evidence, that the text is most closely related to the Alexandrian text-type, and individually to Codex B.

²⁴Calvin L. Porter, "Papyrus Bodmer XV (P⁷⁵) and the Text of Codex Vaticanus," Journal of Biblical Literature, LXXXI (December, 1962), 374.

CHAPTER III

CONCLUSIONS

The tables for the text of Papyrus Bodmer XV show a total of 672 variants from the Textus Receptus. Sixty-three of these are singular, or have no known attestation, which leaves a total of 609 variants to be considered.

Papyrus Bodmer XV shows a close affinity to the Alexandrian text-type. Of the 609 variants, 357 show strong Alexandrian support, or fifty-eight per cent of the total. Strong Caesarean support is shown by 71 variants, or eleven per cent. Strong Western support is indicated by 67 variants, or about eleven per cent. However, Codex D is not extant in two chapters, which might alter Western support slightly.

The Alexandrian text-type also shows strong support for what is termed "split-Alexandrian." This means that a good portion of the Alexandrian witnesses support the reading, but a significant number of others differ. When the Alexandrian and split-Alexandrian are taken together, they constitute eighty-four per cent of the total variants, whereas Caesarean and split-Caesarean together constitute thirty-four per cent of the total, and Western and split-Western together constitute twenty per cent of the total.

The strongest support for the text of Papyrus Bodmer XV comes from the Alexandrian text-type, with 248 instances which have strong Alexandrian support alone. This is based on the individual text-type support and not on the split-text type. The Alexandrian support appears in all but thirteen of the instances. Following the Alexandrian support are the Alexandrian-Western with forty instances; Alexandrian-Caesarean with thirty-seven instances; and the Alexandrian-Caesarean-Western with nineteen instances.

Support by individual manuscripts is most numerous in the Alexandrian text-type. Codex B has, by far, the greatest number of affinities, 508, or eighty-three per cent of the total. This is followed by L with 380, or sixty-two per cent of the total. Next is p⁶⁶, which has been considered of a mixed text-type, but which often follows the Alexandrian, with 373, or sixty per cent of the total. λ' , D, Θ , 33, C, X, 565, A, Π , K, and G follow in order.

Among the versions, the Sahidic and Bohairic, both witnesses to the Alexandrian text-type, show strong support, with Armenian and Aethiopic following.

Cyril of Alexandria and Origen, both witnesses to the Alexandrian text-type, show strong support, with Chrysostom giving fair support.

It should be noted that the evidence by individual manuscripts or manuscript combinations are not conclusive in themselves, since many of them are fragmentary.

The chart by chapters indicates that the manuscript is consistently one witness throughout. There are no appreciable changes in attestation.

The following summary of Papyrus Bodmer XV may be offered:

1. It is substantially Alexandrian text.
2. There is greater affinity to B than to any other manuscript.
3. There is close affinity to L and λ' , both Alexandrian witnesses, and to P⁶⁶, which frequently supports the Alexandrian text-type.
