

**Chart of head length of pouch young tammar wallabies
(*Macropus eugenii*) of known age**

**Lauren Marotte, Division of Biomedical Science and Biochemistry,
Research School of Biology, Australian National University and Andrew
James, Division of Neuroscience, John Curtin School of Medical
Research, Australian National University.**

Head length was measured from the tip of the nose to the most caudal point of the occipital bone.

Day 0 is the day of birth.

Accurate to within ± 2.2 days

No difference between males and females.

Regression line:

Head Length in millimetres = $7.7006 + 0.3532 \times \text{Days}$ (Standard error of the mean = 0.78mm)

Correlation Coefficient, $\rho = 0.9973$
