## Word of Welcome

On behalf of the EHA Board and the Scientific Program Committee we are pleased to introduce to you this year's Abstract Program. The richness of the program is a testament to EHA's spirit: unity through diversity.

The Scientific Program Committee has compiled an exciting program of Simultaneous Oral and Poster Sessions from close to 2500 submitted abstracts representing all fields of hematology. For the second year, a number of presenters will have the opportunity to pitch their abstract. These Poster pitches are an exciting opportunity to promote basic science and research, and to invite delegates to the poster walks.

The six Best Abstracts will be presented during the Presidential Symposium on Friday afternoon. This will be a session not to miss. During this plenary session EHA is also awarding, for the first time, the best abstracts by trainees in four categories in basic and clinical hematology research. These awardees and the travel grant winners can be found on the next page. YoungEHA are the future of hematology!

The late breaking abstract submission is an integral part of the scientific program. The late breaking submission is intended for abstracts with "hot" data that were not available by the time of the regular submission deadline. Only few abstracts, with the most exciting results are selected for a presentation in the Late Breaking Oral Session on Sunday morning.

A selection of abstracts will be presented during the regular Poster Walks. The Poster Session consists of two parts: the Poster Walk and dedicated Poster Browsing Time. This setup guarantees sufficient time for discussion of the important research presented, so look out for the Poster Walk Moderators in their red baseball caps! There will also be E-posters available on the E-poster screens, for which a specific time is allocated during the Poster Browsing Time at the end of each Walk. The Simultaneous Oral Sessions are spread over three days (Friday to Sunday) providing you with ample opportunity to attend a number of these important sessions.

All posters can be viewed on the E-poster screens from Friday morning to Saturday evening. All the abstracts are also available on the EHA Learning Center, for which you have complimentary access after the congress: [learningcenter.ehaweb.org](http://learningcenter.ehaweb.org).

On behalf of the EHA Board, the committees and all the people involved in this year's EHA Congress, we thank you for coming to Madrid and wish you a great meeting.

Shai Izraeli

*Chair Scientific Program Committee 22<sup>nd</sup> Congress*

## Travel Grant Winners

For this Congress 140 travel grants have been awarded to junior members of EHA, based on the mean score of their abstracts.

EHA congratulates the following persons with their travel grants:

Agrawal M, <i>Germany</i>	Farina F, <i>Italy</i>	Manier S, <i>France</i>	Schwartzman O, <i>Israel</i>
Anagnostou T, <i>USA</i>	Fattizzo B, <i>Italy</i>	Mannion N, <i>United Kingdom</i>	Seyfried F, <i>Germany</i>
Arriazu E, <i>Spain</i>	Fernandez MC, <i>Spain</i>	Manta L, <i>Germany</i>	Short N, <i>USA</i>
Barcia Duran JG, <i>USA</i>	Ferrero S, <i>Italy</i>	Marchesini M, <i>Italy</i>	Smith J, <i>United Kingdom</i>
Beekman R, <i>Spain</i>	Figuroa R, <i>Spain</i>	McKerrell T, <i>United Kingdom</i>	Song Y, <i>China</i>
Bhoi S, <i>Sweden</i>	Flasinski M, <i>Germany</i>	McPherson S, <i>United Kingdom</i>	Stamatopoulos B, <i>Belgium</i>

## YoungEHA Best Abstract Awards

One of the primary missions of the European Hematology Association is to support young hematology clinicians and researchers. This year we are proud to announce the launching of the YoungEHA Best Abstract Awards. These will be awarded to the highest ranking abstracts in the following four categories: Clinicians or medical students training for a PhD degree, PhD research students, postdoctoral fellows and clinical hematology trainees. We are honored that these outstanding YoungEHA trainees will be presenting during the EHA congress – they are the future of Hematology!

### CLINICAL TRAINEE AWARD

K C Pawlyn, *United Kingdom*

### MD-PHD AWARD

K O Schwartzman, *Israel*

### PHD RESEARCH STUDENT AWARD

EUROPEAN  
HEMATOLOGY  
ASSOCIATION

 **haematologica**

Journal of the European Hematology Association  
Owned & published by the Ferrata Storti Foundation

### **Information for readers, authors and subscribers**

Haematologica (print edition, pISSN 0390-6078, eISSN 1592-8721) publishes peer-reviewed papers on all areas of experimental and clinical hematology. The journal is owned by a non-profit organization, the Ferrata Storti Foundation, and serves the scientific community following the recommendations of the World Association of Medical Editors ([www.wame.org](http://www.wame.org)) and the International Committee of Medical Journal Editors ([www.icmje.org](http://www.icmje.org)).

Haematologica publishes editorials, research articles, review articles, guideline articles and letters. Manuscripts should be prepared according to our guidelines ([www.haematologica.org/information-for-authors](http://www.haematologica.org/information-for-authors)), and the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, prepared by the International Committee of Medical Journal Editors ([www.icmje.org](http://www.icmje.org)).

*Manuscripts* should be submitted online at <http://www.haematologica.org/>.

*Conflict of interests.* According to the International Committee of Medical Journal Editors (<http://www.icmje.org/#conflicts>), "Public trust in the peer review process and the credibility of published articles depend in part on how well conflict of interest is handled during writing, peer review, and editorial decision making". The ad hoc journal's policy is reported in detail online ([www.haematologica.org/content/policies](http://www.haematologica.org/content/policies)).

*Transfer of Copyright and Permission to Reproduce Parts of Published Papers.* Authors will grant copyright of their articles to the Ferrata Storti Foundation. No formal permission will be required to reproduce parts (tables or illustrations) of published papers, provided the source is quoted appropriately and reproduction has no commercial intent. Reproductions with commercial intent will require written permission and payment of royalties.

Detailed information about subscriptions is available online at [www.haematologica.org](http://www.haematologica.org). Haematologica is an open access journal. Access to the online journal is free. Use of the Haematologica App (available on the App Store and on Google Play) is free.

For subscriptions to the printed issue of the journal, please contact: Haematologica Office, via Giuseppe Belli 4, 27100 Pavia, Italy (phone +39.0382.27129, fax +39.0382.394705, E-mail: [info@haematologica.org](mailto:info@haematologica.org)).

Rates of the International edition for the year 2017 are as following:

	<i>Institutional</i>	<i>Personal</i>
<i>Print edition</i>	<i>Euro 500</i>	<i>Euro 150</i>

*Advertisements.* Contact the Advertising Manager, Haematologica Office, via Giuseppe Belli 4, 27100 Pavia, Italy (phone +39.0382.27129, fax +39.0382.394705, e-mail: [marketing@haematologica.org](mailto:marketing@haematologica.org)).

*Disclaimer.* Whilst every effort is made by the publishers and the editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles or advertisements herein are the responsibility of the contributor or advisor concerned. Accordingly, the publisher, the editorial board and their respective employees, officers and agents accept no liability whatsoever for the consequences of any inaccurate or misleading data, opinion or statement. Whilst all due care is taken to ensure that drug doses and other quantities are presented accurately, readers are advised that new methods and techniques involving drug usage, and described within this journal, should only be followed in conjunction with the drug manufacturer's own published literature.

**Background:** The role of autologous stem cell transplantation (ASCT) as first line therapy for newly diagnosed (ND) patients with multiple myeloma (MM) remains under evaluation given the deep responses to novel induction regimens. Outcomes for those not proceeding to ASCT following induction remain unclear, likely to be influenced by genetic risk and response depth. This study was designed to evaluate a stratified approach to ASCT, investigating if patients in CR/VGPR to induction may safely be assigned to delayed ASCT.

**Aims:** This single arm phase 2 clinical trial conducted at 13 UK sites aimed to determine the progression free survival (PFS) for patients who achieved  $\geq$ VGPR to induction therapy with no further treatment. Here we report the primary endpoint, PFS at 2 years in the patients not proceeding to ASCT, and the influence of MRD status on PFS.

**Methods:** NDMM patients eligible for ASCT received PAD (bortezomib 1.3mg/m<sup>2</sup> IV or SC days 1, 4, 8, 11; doxorubicin 9mg/m<sup>2</sup> days 1-4, dexamethasone 40mg days 1-4 (and days 8-11 and 15-18 for cycle 1 only)) for 4-6 cycles. Those achieving <PR were off protocol; all others had PBSCH followed by restaging including MRD assessment on bone marrow using multi-parameter flow cytometry. Those in PR were stratified to ASCT (no maintenance) whereas those achieving  $\geq$ VGPR stopped treatment. Responses were assessed at 100 days post PBSCH (including MRD), and at monthly intervals for up to 2 years. High risk disease was defined by the presence of one or more adverse FISH lesions (t(4;14), t(14;16), t(14;20), del(17p13), +1q21).

**Results:** Between April 2011 and January 2014 153 patients were enrolled (median age 55, range 28-71 years), 139 (91%) received 4-6 cycles of PAD. The majority (88.2%) received SC bortezomib, 18 (11.8%) received at least 1 cycle IV. FISH data was available for 132 patients, 89 (67.4%) patients were standard and 43 (32.6%) adverse risk. 51 (33.6%) patients were ISS I, 67 (44.1%) ISS II and 34 (22.4%) ISS III. The overall response rate to PAD was 82.4% ( $\geq$ VGPR: 41.2%). Responses were similar irrespective of ISS or genetic risk (standard:  $\geq$ VGPR 37.5%, PR 40.9%, adverse:  $\geq$ VGPR 53.5%, PR 34.9%). Post-PBSCH, 63 (41.2%) patients achieved  $\geq$ VGPR, and 44 (28.8%) patients achieved PR of whom 36 proceeded to ASCT. After a median follow-up of 45.4 months from registration, median overall PFS was 22.5m (95% CI: 18.1-25.3). For those who achieved  $\geq$ VGPR, median PFS from PBSCH was 8.9m (95% CI: 4.6-13.3) and 25.7m (95% CI: 13.7-37.6) for MRD+ (N=25) and MRD- (N=16) patients at D100 post-PBSCH respectively, 2y-PFS 28.0% (95% CI: 10.4-45.6) and 56.3% (95% CI: 32.0-80.6) respectively. PR patients proceeding to ASCT had a median PFS of 17.2m (95% CI: 14.2-20.2) and 23.1m (95% CI: 16.8-29.4) for those who were MRD+ (N=20) and MRD- (N=7) at D100 respectively, 2y-PFS 15.0% (95% CI: 0-30.7) and 42.9% (95% CI: 6.2-79.6) respectively.

**Summary/Conclusions:** This is the first study to report outcomes of patients stratified to ASCT by depth of response. The overall PFS for the study is shorter than other published trials, most likely due to the inferior outcome for MRD+ patients not proceeding to ASCT. The median PFS for  $\geq$ VGPR patients who are MRD- and stopped therapy was similar to that in PR patients achieving MRD- status post-ASCT. The PFS for ASCT was relatively short, reflecting selection of those only achieving PR. Response rate alone is not sufficient to identify patients who would benefit from ASCT and use of MRD to stratify treatment is now being investigated.
